Lerana. *(C.japonica)*, Tagliabue, 1840, *Nomenclatore Camelliae.* No description. Originated in Italy. (Believed extinct.)

Lercari. *(C.japonica), I Giardini.* 1855. Originated by Professor Attilio Tassi in Italy. No description. Van Houtte Catalogue, 1858, 72:17: Bright red, spotted with white. Imbricated. Synonyms: 'Lercari Maculata', 'Lercaro Maculata'.

Lercari Maculata. Franchetti, 1855, *Collezione di Camelie*, p.41. Synonym for **Lercari.**

Lercaro Maculata. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.12. Synonym for **Lercari.**

Lercaro Spinosa. *(C.japonica)*, Franchetti, 1855, *Collezione di Camelie*, p.41: Bright red, often spotted. Imbricated. Originated in Italy. Orthographic error 'Lecaro Spinosa'.

Lerlind. *(C.japonica) American Camellia Yearbook*, 1974, vol.II, p.236, Reg. No.1344: A 5 year old chance seedling that first bloomed 1971. Originated by Mr & Mrs Henry S. Stone, Baton Rouge, Louisiana, USA. Plant growth is average to dense with very dark, green leaves, 8 cm x 4.5 cm. The rose form double to formal double, white bloom, is very flat with 85 petals. 9.5 cm across x 1.2 cm deep. Blooms early to late.

Les Berg. *(C.reticulata), New Zealand Camellia Bulletin*, 1972, vol.VII, No.4, p.6, Reg. No.61: A chance reticulata seedling that first flowered 1968. Originated by Mr & Mrs L. Berg, Whakatane, New Zealand. The plant has rapid, upright growth, the foliage is mid-green, reticulate with sharp, distinct serrations, keeled, apex recurved. The flower is a loose, peony form with 18 petals and some petaloids. Petal margins have heavy, multiple notches and darker veining. The colour is RHS.CC.Red Group, 53C-D and size 14 cm across x 5 cm deep. For colour photo see front cover, 1986, *New Zealand Camellia Bulletin*, vol.XIV, No.8.

Les Enfants Nantais. *(C.japonica)*, Pépinières Thoby, Carquefou, France, Plant List, 2003, p.18; No description.

Les Jury. *(C.x williamsii). New Zealand Camellia Bulletin*, 1992, Issue No.111, vol.XVII, No.4, p.46, Reg. No.301. Originated by Les Jury, New Plymouth, as a seedling of **Rendezvous**. A vigorous upright plant with dark green leaves 8 cm long x 4 cm wide. Medium to large, red

(RHS.CC.46B) flowers, formal double to peony, with 75+ petals and 10+ petaloids, 10 cm across x 5 cm deep. Mid-season blooming.

Les Marbury. *(C.japonica),* ACS 1991, *American Camellia Yearbook,* p.78, and colour photo pp.80-81. Reg. No.2210: Small size, pink and white striped red, formal double *C.japonica* chance seedling. Blooms mid-season. Originated by Dr J.M. Habel Jr, Suffolk, Virginia, USA. The 6 year old seedling first flowered 1985. Average flower size, 7.5 cm across x 5 cm deep with 50 petals. Heat and cold hardy. Compact grower. Plant is upright, dense with rapid growth and dark green leaves 10 cm long x 5 cm wide.

Les Marbury Red. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1997, p.15, Reg. No.2411. A small red, formal double sport of **Les Marbury.** Flowers mid-season to late. Originated by Dr. J.M. Habel, Jr, Suffolk, Va., USA. *American Camellia Yearbook*, 1997, p.4, colour photo before p.1. The sport was first observed in 1991 and has flowered true for 4 years on 20 plants. Other flower characteristics as for **Les Marbury**. Plant growth is upright, dense and average, with dark green leaves 7.5 cm long x 5 cm wide.

Les Namnètes. *(C.japonica),* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.18; Pink semi-double.

Les Richards. *(C.japonica), American Camellia Yearbook*, 1967, pp.228, 229, Reg. No.918: The semi-double flower is tulip shaped. Petals well rounded, large, thick and satiny. Colour bright, cardinal red with bright, yellow anthers. Size is 12.5 cm across x 7 cm deep with 20-25 petals. Blooms midseason. A chance seedling that first bloomed 1958 aged 7 years. Originated by M.J. Witman, Macon, Georgia, USA. Plant growth is upright and dense with dark green leaves, 10.5 cm x 5 cm.

Les Rose. (*C.reticulata* hybrid). ACRS, *Camellia News*, Spring 2003, No.163, p.10, colour photo p.2, Reg. No.551. Originated by Les Rose, Toowoomba, Qld, Australia, registered by John Butler, Cabarlah, Qld. A chance seedling of *C.reticulata* hybrid **Lasca Beauty** that first flowered in 1994. A mid-pink, semi-double flower of 15 petals, 13.5 cm diameter x 8 cm deep. Flowers mid-season to late on an open, spreading, upright plant. Leaves dark green, matt, flat, rounded at base, apiculate apex, 8.5 cm long x 5 cm wide. Stamens in a column. A darker pink than **Lasca Beauty.**

Leschii. Veitch, James Jr, 1853, Catalogue of Select Stove Plants…, p.14. Orthographic error for 'Lechi', synonym for **Parini.**

Leslie Ann. *(C.sasanqua),* SCCS., 1958, *Camellia Nomenclature*, p.94: White, tipped reddish lavender. Large, semi-double with irregular petals to peony form. Received the Ralph Peer Sasanqua Award, 1961. Orthographic error 'Leslie Anne'. Originated in USA.

Leslie Ann (Cannon). *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.6, invalidly as 'Leslie Ann'. No description. Originated in USA. No valid listing located.

Leslie Anne. Feathers, 1979, *The Camellia,* p.463. Orthographic error for **Leslie Ann.**

Leslie Howard. *(C.japonica),* Gerbing's Azalea Garden Catalogue, 1938-1939: Semi-double, deep pink marbled white. Mid-season blooming. Very dark green leaves and bushy growth. Originated in USA. See black and white photo, p.213, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

Leslie R. *(C.japonica),* Hillcrest Nursery Catalogue, 1958,: Light pink, large semi-double to anemone form, with large petals. Early to mid-season blooming. Originated in USA by L. Richards, Mobile, Alabama.

Leslie Rivett. *(C.reticulata x C.japonica), New Zealand Camellia Bulletin*, 1984, vol.XIII, No.6, p.22, Reg. No.198: A chance seedling raised by Mrs Ida Berg, Whakatane, New Zealand that first flowered 1980. A cross between *C.reticulata* 'Crimson Robe' (**Dataohong**) x *C.japonica*

Dixie Knight. Medium, upright growth with dark green leaves, 10 cm x 5 cm. The large, peony form, bright scarlet flowers are 15 cm across x 6 cm deep with 14 petals and many petaloids, cream filaments and yellow anthers. Late flowering.

Leslie Wilkes. *(C.japonica), American Camellia Yearbook*, 1978, p.132, Reg. No.1456: A large, rose, semidouble *C.japonica* chance seedling, early to mid-season flowering. Originated by Mrs Herman Johnson, Madison, Florida, USA. The 8 year old seedling first bloomed 1973 with 14 petals, 3 petaloids, yellow anthers, white filaments. Average size, 11 cm across x 5 cm deep. Plant growth is average with dark green leaves, 8 cm x 3.8 cm.

Lesperia. *(C.japonica)*, Trillon, Le Mans Nursery Catalogue, 1843, p.6. No description. Originated in Italy. Probably an orthographic error for **L'Esperia.**

Les-tay-home. *(C.japonica), American Camellia Yearbook*, 1961, p.226, Reg. No.532: A 6 year old chance seedling that first bloomed 1959. Originated by Dr Leslie Taylor, Theodore, Alabama, USA. Plant growth is rapid in rate, upright and open with dark green leaves, 11 cm x 4.5 cm. The variegated white and red, peony form flowers, similar to **Professor Sargent,** measure 6 cm across x 5 cm deep with 290 petals. Flowers early to mid-season.

Leta Rembrant. *(C.japonica)*, Hillcrest Nursery Catalogue, 1958, No description. Originated in USA.

Letitia. Cannon, 1974, ACS., *The Camellia Journal*, vol.29, No.4. Abbreviation for **Letitia Mac.**

Liangye Jinxin. (Glossy Leaf Gold Heart), *(C.japonica),* Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.46: The plant reaches a small tree, 5-7 m. tall, branches spreading, irregular, strong greyish, upper slanting, lower pendant. Leaves large, elliptic, glossy, thick-leathery, new growth red tinted and tip of leaf bud, red. Flowers sparse, single, scarlet, 5 cm across, petals 5-6, incised, connate, tube-like at base, 5 cm long, arranged in two rows. Stamens more than 100, joined into a short tube. Buds long-ovate to ovate-elliptic, pointed, green with scorched margins. Blooms mid-season to late. Originated in China.

Liangye Yinhong. *(C.reticulata),* Yü & Bartholomew ,1980, *American Camellia Yearbook*, p.14: Spinel pink. Mid-season, Kunming. Feng et al., 1986, *Yunnan Camellias of China*, p.57 as 'Liangyeyinhong': Leaves oblong-ovate, apices long-acuminate, bases cuneate, flat, thin, dark green, glossy, 7.5-10.5 cm long x 2.5-4.5 cm wide. Flowers Spinel Pink (RHS.CC.62A), diameter 9-10.5 cm. Petals 26-30 in 4-5 whorls, regularly arranged; inner whorls, undulate. Stamens numerous, inconspicuously divided into several fascicles in the flower centre. Pistils rudimentary, flattened. The branches of this cultivar extend horizontally. Its flower buds are ovate and the calyx margins red. This is a new cultivar selected from seedlings of open pollenated seeds by researchers at the Kunming Botanical Garden. Flowers early to mid-season. Different readings: 'Liang-yeh Yin-hung', 'Liangyeyinhung'. Synonyms: 'Glossy Pink', 'Bright-leaf Spinel Pink', 'Glossy Leaf Pink'. Western Synonym: 'Bright Leaf Pink'.

Liang-yeh Yin-hung. Yü & Bartholomew, 1980, *American Camellia Yearbook*, p.25. Different reading for **Liangye Yinhong.**

Lianhua. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.422; New Chinese synonym for the ancient China *C.japonica* **Anemoniflora.**

Lianhua Hong. *(C.japonica), Chinese Camellia Culture,* 2003, Appendix, p.570 as 'Lianhuahong'; Leaf broad-ovate, 7-9 cm x 3.5-4.5 cm, apex acuminate, base broad cuneate, vein obvious, margin shallow and obtuse. Flower semi-double, lotus type, pink to red, occasionally with white spots, regular arrangement, 9-10 cm diameter. Late flowering. From Sichuan Province, China.

Lianhua Shijie. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.422; Chinese synonym for the Japan *C.rusticana* **Rengesekai.**

Lianhua Shijie. (H.M. Water Lily). Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.368 with colour photo; Originated by the Xinzhu Camellia Society, Taiwan. Flowers white with a blush overtone, rose form to formal double, medium size.

Lianpian Tuozhu. *(C.reticulata)*, Yü & Bartholomew, 1980, *American Camellia Yearbook*, p.11; Savige, 1980, *International Camellia Journal*, No.12, p.71: A translation given is 'Lotus Pearl'. The petals of this variety are like those of a lotus in full bloom, while the stamens are like golden pearls held in the centre of the petals. It is named "lianpian", petals of the lotus, "tuo", holding; "zhu", pearls. Feng et al., 1986, *Yunnan Camellias of China*, p.40: Leaves oblong, apices acuminate, bases cuneate, margins sparsely and shallowly serrate, slightly rugose, 6.5-8 cm long x 2.5-4 cm wide. Flowers pink (RHS.CC.55B), diameter about 12 cm. Petals 17-20, flat, long, outwardly expanded when open. Stamens numerous, clustered around petals. Pistils well developed. Flowers mid-season. The cultivar was selected from an open pollenated plant of wild reticulata in Tengchong. The petals of this cultivar are long and flat, and the flower form looks like a mound of pearls on a lotus petal. Different reading: 'Lien-pien T'o-chu'. Synonyms: 'Lotus Pearl', 'Lotus Petal Supporting a Pearl'.

Lianrui. *(C.reticulata)*, Savige, 1980, *International Camellia Journal*, No.12, p.71: The translation of this name is "Double Bowl". Apparently the stamens are joined to make a cup-shaped form in the centre of a bowl-shaped flower. Feng et al., 1986, *Yunnan Camellias of China*, p.38: Leaves broad-elliptic to elliptic-ovate, apices acuminate, bases broad-cuneate, 8-9.5 cm long x 4-5 cm wide. Flowers pink (RHS.CC.62A), diameter 9-10 cm, single. Petals 9-11 in 2-3 whorls. Stamens numerous, mostly well developed. Pistils well developed, fertile. This is a new cultivar, selected from seedlings of open pollenated seeds by researchers at the Kunming Botanic Garden. It is a vigorous grower. The stamens are united at the base to form a tube, hence its Chinese name which means united stamens. Flowers mid-season. Different reading: 'Lien-jui'. Synonyms: 'Double Bowl', 'Joined Stamens'.

Liantaifanying. *(C.reticulata) Chinese Camellia Culture,* 2003, p.247 with colour photo; Silvery red flower from Tengchong County, China. Diameter 11-13 cm. Flowers early to mid-season.

Lib Scott. *(C.japonica),* ACS, *The Camellia Journal,* May 1998, p.18, Reg. No.2453. A large, pale pink with different size red stripes, semi-double to peony form chance seedling. Flowers early. Originated by Elizabeth R. Scott, Aiken, S.C., USA. *American Camellia Yearbook,* 1998, p.4, colour photo before p.1. The 15 year old seedling first flowered in 1988. Average flower size is 12.7 cm across x 6.5 cm deep, with 20 petals, 5 petaloids, light yellow anthers and light yellow filaments. Plant growth is spreading, dense and average, with dark green leaves 10.7 cm long x 6.5 cm wide.

No.1555: A small to medium size, very pale blush with rose to carmine streaks, rose form double to formal double *C.japonica* (**Sadie Mancill** x **Evalina**), mid-season blooming. Originated by Mrs Henry S. Stone, Baton Rouge, Louisiana, USA.

Lil Stella. *(C.japonica). American Camellia Yearbook*, 1976, p.161, Reg. No.1403: A chance *C.japonica* seedling of **Letitia Schrader.** Originated by Mrs Henry S. Stone, Baton Rouge, Louisiana, USA. Plant growth is upright and medium with dark green leaves, 10.5 cm x 7 cm. The 'Herme' (**Hikarugenji**) type, bloom is rosy red with 26-30 petals and 4-6 trumpet shaped petaloids, white-blush filamets and anthers. Size, 10 cm across x 6 cm deep. Outer petals waxy and crinkled. Blooms mid-season.

Lil Symonds. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 2001, p.21, colour photo p.20, Reg. No.2551. A semi-double to rose form double chance seedling, with deep red flowers, yellow anthers and yellow filaments. Flowers mid-season to late. The cold hardy plant has dense, upright, average growth. Originated by Elizabeth R. Scott, Aiken, S.C., USA. *American Camellia Yearbook*, 2001, p.95, colour photo p.c14. Average flower size is 11.5 cm across x 6.5 cm deep, with 24 fimbriated, heavy textured petals. Filaments are red at base. Leaves are 9.5 cm long x 4.5 cm wide.

Lil Tiff. *(C.japonica), American Camellia Yearbook*, 1978, p.132, Reg. No.1498: A miniature, clear pink, anemone form *C.japonica* chance seedling, blooms late mid-season. Originated by P.A. Menard, Slidell, Louisiana, USA. The 9 year old seedling first bloomed 1972 and has yellow anthers and white filaments. Two or three petaloids are white. Flower size 5.2 cm across x 3.4 cm deep. Plant growth is spreading, open and medium in rate with mid-green leaves, 9 cm x 4 cm.

Lila. Doty & Doerner Nursery Catalogue, ca.1949. Synonym for **Catherine Cathcart.**

Lila Akel. *(C.reticulata x C.saluenensis), New Zealand Camellia Bulletin*, 1986, vol.XIV, No.5, p.10, Reg. No.236: A chance seedling cross between *C.reticulata* and *C.saluenensis*, originated by Mrs Ida Berg, Whakatane, New Zealand. The 8 year old plant first flowered, 1981. It has dark green leaves, 11-12 cm long x 6-7 cm wide. The plant is upright with average density. Flowers midseason, semi-double to peony in form. Colour is dark, salmon rose, (RHS.CC.Red-Purple Group 57D) size about 15 cm across x 5 cm deep with many stamens with yellow anthers.

Lila Fretwell. *(C.japonica), American Camellia Yearbook*, 1966, p.94, Reg. No.846: An 8 year old chance seedling that first bloomed 1958. Originated by Mrs R.E. Brownlee, Anderson, South Carolina, USA. The leaves are dark green, 7.5 cm x 4.5 cm average and plant growth average. The semidouble flower, 9-10 cm across x 2 cm deep, is deep pink shading to white in the centre, with 11 petals. Blooms early.

Lila Lee. *(C.japonica),* SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Snow white. Medium, peony form. Vigorous, compact, upright growth. Early to mid-season flowering. Originated by Armstrong Nurseries, Ontario, California, USA. Plant patent granted 1949, No.891. See black and white photo, p.32, SCCS, 1950, *The Camellia. Its Culture and Nomenclature.*

Lila Moore. *(C.japonica),* SCCS., 1956, *The Camellia. Its Culture and Nomenclature,* p.61: Red. Large size, loose semi-double to peony form. Originated by J. Moore, Charleston, South Carolina, USA.

Lila Naff. *(C.reticulata* hybr.), ACS, 1967, *The Camellia Journal*, vol.22, No.1, front cover, pp.2, 9. *American Camellia Yearbook*, 1968, p.132, Reg. No.965: A 10 year old seedling of *C.reticulata* 'Butterfly Wings', (**Houye Diechi**), that bloomed for the first time in 1958. Originated by Mrs Ferol Zerkowsky, Slidell, Louisiana, USA. Plant growth is upright, dense and rapid in rate, with dark green leaves, 10 cm x 5.5 cm. The semi-double flower is 10-12.5 cm across x 6-7 cm deep with 15 petals and a few petaloids. Colour is a delicate, silvery pink with yellow anthers and ivory filaments. Petals measure 6 cm x 7.5 cm and have rabbit ears at times. Blooms mid-season. Sport: **Lila Naff Variegated.** See colour photo facing p.180, *American Camellia Yearbook*, 1970 and facing p.85, *American Camellia Yearbook*, 1978. Received the "Frank L, Stormont Reticulata Award", 1969. Chinese synonym 'Nafu'.

Lila Naff Variegated. *(C.reticulata* hybr.), Cannon, 1967, ACS., *The Camellia Journal*, vol.22, No.4, p.16 as 'Lila Naff Var.': A virus variegated form of **Lila Naff** - Silvery pink blotched with white. Originated in USA.

Lila Rosa. *(C.japonica),* Overlook Nursery Catalogue, 1948-1949, p.17: Large size, full peony form, clear pink. Fendig, 1951, *American Camellia Catalogue* with colour pl.: Large, deep, clear rose-pink, incomplete double (anemone form), 10 cm across x 4 cm deep. The petals are obovate, about 5 cm long with notched tips. A variable flower with a formation similar to Marchioness of Exeter, sometimes showing many petaloids but few stamens. Leaves mid-green, long-elliptic, 11 cm x 5 cm, base tapered acute, long acuminate apex, wide, sharp serrations, black tipped. Plant is a fast, spreading grower. Originated by Breckinridge Gamble, Tallahassee, Florida, USA from seed of unknown parents about 1940. Orthographic error: 'Lila Rosea'. Sport: **Lila Rosa Variegated.** See black and white photo, p.205, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Liliputian. SCCS, 1958, *Camellia Nomenclature*, p.94, 96. Orthographic error for 'Lilliputian', synonym for **Wabito.**

Lilla Fletcher Inman. *(C.japonica), American Camellia Yearbook*, 1968, p.133, Reg. No.1009: A 15 year old chance seedling that first bloomed 1957. Originated by Mrs Clara Inman, Quincy, Florida, USA. Plant growth is average and rapid with dark green leaves, 8 cm long x 4.5 cm wide. The rose form double flowers, which open to anemone form, are over 10 cm across x 4.5 cm deep and have 40-50 petals and 30-40 petaloids. White to blush with pink stripes, white filaments and yellow anthers. Blooms early to mid-season.

Lilli. Sharp, 1948, *Camellias Illustrated*, p.133. Synonym for **Lily.**

Lilli Brewster. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue:* White. Incomplete double. Mid-season. *American Camellia Yearbook*, 1954, p.319, Reg. No.187: A 6 year old seedling of 'Amabilis' (**Yukimiguruma**), originated by Mrs Lucien Marioneaux, Shreveport, Louisiana, USA that first flowered 1953. Plant growth is open, low-spreading and slow. Leaves mid-green, apex acuminate, base abrupt cuneate, finely serrulate. Flower buds large, white and ovoid. The flower is white, incomplete double in form with two rows of petals, showing considerable depth, with mixed petals and yellow stamens, 12-15 cm across. Blooms late. Orthographic error: 'Lily Brewster'.

Lillian A. *(C.reticulata* hybr.), *American Camellia Yearbook*, 1982, p.174, Reg. No.1815: A very large, deep pink, peony form, *C.reticulata* chance seedling of **Buddha.** Early flowering. Originated by L.G. McKeevan, Orinda, California, USA. First bloomed 1974. Average size, 16 cm across x 5.5 cm deep with 22-24 petals and 10-12 petaloids, gold anthers and cream filaments. Outer two rows of petals shade to lighter pink margins. Plant growth is dense and rapid with dark green leaves, 11 cm long x 5.5 cm wide.

Lillian Jernigan. *(C.japonica),* ACS, *The Camellia Journal*, Sept. 2008, p.31 with colour photo, Regn No. 2735; A chance seedling that first flowered in 1986. Originated by Ed Jernigan, Greenville, Ala., USA, and propagated by Park Smith, later by John Grimm, Metairie, La. An 11.5 cm diameter, semi-double flower with broad petals. Described as white splotched and striped with red, but the photo shows pink and red as the dominant colours. Yellow anthers and cream filaments, not prominent. Flowers early. *American Camellia Yearbook*, 2008, p.120 with colour photo; Dark green leaves are 6.5 cm x 4.5 cm.

Lillian Mann. *(C.japonica), American Camellia Yearbook*, 1965, p.239, Reg. No.765: An 8 year old chance seedling that first bloomed 1962. Originated in USA by W.H. Veo, Orlando, Florida, USA. Plant growth is upright, dense and medium in rate with dark green

Lillian Ricketts. *(C.japonica),* SCCS., 1960, *Camellia Nomenclature*, p.73: Blush pink. Very large, semidouble with recurved petals. A seedling of **Gauntlettii** raised by Wally Rickets, Melbourne, Victoria, Australia.

Lillian Teufel. *(C.japonica),* Vanderbilt, 1941, *Camellia Research, II*, p.4. No description. Originated in USA. (Believed extinct.) Orthographic error: 'Lilian Tenfel'.

Lillie G. Mealing. *(C.japonica), American Camellia Yearbook*, 1973, p.192, Reg. No.1244: A chance *C.japonica* seedling that first bloomed 1969. Originated by Dr & Mrs H.G. Mealing Sr.,

North Augusta, South Carolina, USA. Plant growth is open and medium in rate. The peony form, Camellia Rose 622/1 with darker veins 622, bloom has yellow anthers and flowers mid-season. It measures 12.5 cm across x 7 cm deep.

Lillie Robinson. *(C.japonica), American Camellia Yearbook*, 1958, p.289, Reg. No.325: A 5 year old chance seedling, originated by Julington Nurseries, Jacksonville, Florida, USA. Plant growth is compact with medium sized, bright green leaves, ovate and acuminate. The incomplete double, blush pink flowers, 8-10 cm across, have two rows of curved and twisted petals, with prominent stamens, surrounded by fluted petals and petaloids. Blooms mid-season.

Lillie S. Adams. *(C.japonica),* Belle Fontaine Nursery, 1964, ACS, *The Camellia Journal*, vol.19, No.4, p.19. No description. *American Camellia Yearbook*, 1965, p.239, Reg. No.764: A 10 year old chance seedling that first bloomed 1959. Originated by Nick J. Adams, Albany, Georgia, USA. Plant growth is strong, upright and dense with dark green leaves, 10 cm x 6 cm. The semi-double to peony flower is rose-pink to lighter rose-pink with yellow anthers and white filaments. The blooms are 12.5-13 cm across x 6 cm deep with 29 petals and 8 petaloids. Blooms mid-season.

No.602: An 8 year old Camellia that first bloomed 1956, originated by Edward Abbott, Monticello, Florida, USA. Plant growth is upright and rapid in rate with dark green leaves averaging 7.5 cm x 4 cm. The peony form flower, 11 cm across x 6 cm deep, is blush pink variegated (Pink, red and white) with golden stamens and 29 petals, 45 petaloids and 100 stamens. Blooms early to mid-season. Synonym: 'Linda Abbott Variegated'.

Linda Abbott Solid. *(C.japonica),* Shackelford, 1967, ACS, *The Camellia Journal*, vol.22, No.1, p.14 as 'Linda Abbott S.'. A solid pink form of **Linda Abbott.** Originated in USA.

Linda Abbott Variegated. Shackelford, 1967, ACS, *The Camellia Journal,* vol.22, No.5 as 'Linda Abbott V.'. Synonym for **Linda Abbott.**

Linda Abbott White. *(C.japonica),* Shackelford, 1969, ACS., *The Camellia Journal*, vol.24, No.1 as 'Linda Abbott W.'. A solid white form of **Linda Abbott.** Originated in USA.

Linda Barry. *(C.japonica),* McIlhenny, 1937, *600 Varieties of Camellias*, p.3: Medium size, white, heavily washed rose-pink, occasionally a rose-pink bloom is produced, double with a few stamens. Early flowering. Semi-double to rose form double. Medium, bushy growth. Originated by McIlhenny, Avery Island, Louisiana, USA.

Linda Brothers. *(C.japonica), American Camellia Yearbook*, 1966, p.94, Reg. No.877: A shell pink sport of 'Alyne Brothers', first observed 1960 and originated by S.L. Brothers, Gainsville, Florida USA. The flower has yellow anthers and white filaments. It is 10.5 cm across x 5.5 cm deep, with 16 petals and 118-136 petaloids. A solid, shell pink form. Early blooming. See colour photo facing p.22, 1969, *American Camellia Yearbook* as 'Lynda Brothers'. Sport: **Linda Brothers Blush.**

Linda Brothers Blush. *(C.japonica), American Camellia Yearbook*, 1984, p.179, Reg. No.1931: A medium, shell pink with a white border form of *C.japonica* sport of **Linda Brothers,** originated by S.L. Brothers, Gainsville, Florida, USA. All other characteristics are the same as the parent plant.

Linda Bruce. *(C.japonica),* ACRS, 1983, *Camellia News*, No.87, P.22, Reg. No.297, colour photo p.13: Originated by Mrs J. Sowerby Drake, Warrawee, N.S.W., Australia. A chance seedling of *C.japonica* **Frances Hill,** that first bloomed 1974 when 4 years old. The informal, 11 cm,

double, white flowers open mid-season. The open, upright plant has 10.5 cm x 5 cm bright green leaves with obtuse apex.

Linda Carol. (*C.reticulata* hybrid). ACS 1995, *The Camellia Journal*, vol.50, No.3, p.37, Reg. No.2357: Very large size, light pink, semi-double *C.reticulata* hybrid [**Damanao** ('Cornelian') x **Mrs D.W. Davis**] x **Buddy Bills**. Blooms early to late. Originated in USA by Frank Pursel, Oakland, California. ACS 1995, *American Camellia Yearbook*, p.6, and colour photo: the 15 year old seedling first flowered 1985. Average flower size is 15 cm across x 7 cm deep with 19 petals and 12 petaloids. Plant growth is upright, open and vigorous, with dark green leaves 13 cm long x 7.5 cm wide.

Linda Gilmore. *(C.japonica x C.reticulata), American Camellia Yearbook*, 1977, p.214, Reg. No.1442: Medium size, white base, heavily striped crimson throughout, hybrid with reticulata parentage (**Lady Vansittart** x 'Crimson Robe' (**Dataohong**), Seedling No.43). Flowered mid-season to late. First bloomed 1975. Originated by David L. Feathers, Lafayette, California, USA. The formal double type bloom is white base, heavily striped crimson with 50 petals. Size is 8 cm across x 4.5 cm deep. Plant growth is upright, dense and medium with light green leaves, 8 cm long x 4.5 cm wide.

Linda Griffin. *(C.reticulata),* ACS, *The Camellia Journal,* Dec. 2013, p.27 with colour photo; Regn No.2884, Originated, registered and propagated by James & Elaine Smelley, Moss Point, Miss., USA. ACS, *Yearbook*, 2013, p.124 with colour photo; A 20 year old seedling of **Curtain Call** x **Pleasant Memories**, first flowered 1993. Very large, 16.5cm diameter x 7.5cm deep flower is semidouble with 11 petals, light pink. Tubular stamens have yellow anthers and white filaments. Heavy petal texture and flowers fall whole. Upright, open, vigorous plant. Dark green leaves average 13.4cm x 6.5cm with medium serration. Flowers midseason to late.

Linda Henson. *(C.japonica),* SCCS., 1974, *Camellia Nomenclature*, p.91: White with a few pink streaks. Medium to large, formal double. Vigorous, open, upright growth. Early to mid-season flowering. Originated by T. Eagleston, Port Arthur, Texas, USA.

Linda Laughlin. *(C.japonica), American Camellia Yearbook*, 1959, pp.276, 277, Reg. No.385: A sport of 'Lady Clare', (**Akashigata**) originated by Mrs William Laughlin, Aiken, South Carolina, USA. Plant growth is upright, dense and rapid in rate with glossy, dark green leaves, 10 cm long x 5.5 cm wide. The flowers. pale pink, flecked rose, average 12.5 cm across x 6 cm deep with 16 petals and an occasional rabbit ear. Mid-season flowering.

Linda Leary. *(C.japonica),* SCCS, 1976, *Camellia Nomenclature*, p.94: Pink veined. Medium to large semi-double. Vigorous, upright growth. Originated in USA by Haynie.

Linda Lee Ehrhart. *(C.reticulata* hybrid*),* ACS, *The Camellia Journal*, Sept. 2013, p.27 with colour photo; Regn No. 2865; Originated, registered and propagated by Robert E. Ehrhart, Walnut Creek, Calif., USA. ACS, *Yearbook*, 2013, p.124 with colour photo; A 10 year old seedling of **Lauretta Feathers**, first flowered 2008. Large, 11.5cm diameter x 6.5cm flower is a silvery pink semidouble with raised and waved petals. Yellow anthers and white filaments. Upright, spreading plant with average growth rate. Mid-green leaves average 10cm x 5cm with low serration. Flowers early to late.

Linda Margaret. *(C.japonica), American Camellia Yearbook*, 1958, p.289, Reg. No.329: A 5 year old chance seedling, originated by W.F. Wilson Jr., Hammond, Louisiana, USA. Plant growth is dense, rapid and spreading with very smooth leaves, 10 cm x 5 cm. The bright pink (Maerz & Paul Rhodonite Pink), formal double flowers are 8-10 cm across x 6 cm deep with 80 or more petals. Blooms early. Chinese synonym 'Linda Meigui'.

Linda Marie Rogers *(C.japonica),* SCCS., 1958, *Camellia Nomenclature*, p.54: Chalk white with occasional red or pink stripe, and short, yellow stamens. Medium size semi-double. Blooms mid-

season to late. Originated by F. Griffin Sr., Columbia, South Carolina, USA. Orthographic error: 'Lynda Marie Rogers'. Sports: **Linda Marie Rogers Pink, Linda Marie Rogers Red.**

Linda Marie Rogers Pink. *(C.japonica)*, SCCS., 1960, *Camellia Nomenclature*, p.73: Solid pink sport of **Linda Marie Rogers.** All other characteristics the same as parent. Originated in USA.

Lisa. *(C.sasanqua).* Camellia Forest Nursery Catalogue, 2008, p.7; White, rose form to formal double with very symetrical appearance. Upright and vigorous with small leaves. Early flowering.

Lisa Adams. *(C.japonica), American Camellia Yearbook*, 1967, p.229, Reg. No.954: A chance seedling of **Ville de Nantes** that first bloomed 1962. Originated by B.F. Marshall, Mobile, Alabama, USA. Plant growth is upright, dense and medium with dark green leaves, 8 cm long x 3.8 cm wide. The semi-double flowers are 11 cm across x 5 cm deep with 26 petals. Colour is rose-red with yellow anthers and white filaments. Blooms mid-season to late.

Lisa Adele Shuman. *(C.japonica),* ACS., Feb.1989, *The Camellia Journal*, vol.44, No.1, p.12, Reg. No.2117: Medium size, shaded rose-pink, formal double *C.japonica* chance seedling. Blooms mid-season to late. Originated by Johnny Aldrich, Brooklet, Georgia, USA. *American Camellia Yearbook*, 1989, p.124, colour photo, [p.134]: This 15 year old seedling first bloomed 1978. Average flower size, 8.3 cm across x 3.2 cm deep with 68 petals. Plant growth

is spreading and dense with dark green leaves, 8 cm long x 3.8 cm wide. Orthographic error: 'Lisa Haele Shuman'.

Lisa Beasley. (*C.fraterna* hybrid). *American Camellia Yearbook,* 1994, p.61, Reg. No.2283: A miniature, pink, rose form double, *C.fraterna x C.japonica,* late. Originated by Marvin Jernigan, Warner Robins, Georgia, USA. The seedling first bloomed in 1987. Average flower size is 5 cm across x 2.5 cm deep with 42 petals, white anthers and white to blush pink filaments. Plant growth is upright, spreading and average, with light green leaves 8 cm long x 2.5 cm wide.

Lisa Buono. *(C.japonica), American Camellia Yearbook*, vol.II, 1974, p.263, Reg. No.1305: An 8 year old chance seedling originated by Ferol Zerkowsky, Slidell, Louisiana, USA. Plant growth is upright and average with dark green leaves, 7.5 cm x 3.8 cm. The bloom has various flower forms and is blush with a pink centre, shading to light pink, then to dark pink edges on outer petals. Average flower size, 6-7.5 cm across x 3.2-3.8 cm deep. It has yellow anthers and filaments with 50 petals and 10-15 petaloids. Blooms midseason. See colour photos: p.47, *American Camellia Yearbook,* 1980 and rear cover 1980, ACS., *The Camellia Journal*, vol.35, No.3.

Lisa Cashion. *(C.japonica), American Camellia Yearbook*, vol.II, 1974, pp.236, 237, Reg. No.1339: A 9 year old chance japonica seedling that first bloomed 1973. Originated by Mr & Mrs W.R. Cashion, Florence, South Carolina, USA. Plant growth is upright, dense and medium with dark green leaves, 5 cm x 3.2 cm. The formal double, **Alba Plena** type, bloom is rose coloured with 36 petals. Average size, 7.5 cm across x 5 cm deep. Blooms late.

Lisa Gael. *(C.reticulata), New Zealand Camellia Bulletin*, 1967, vol.V, No.3, p.10, Reg. No.37: A chance seedling of *C.reticulata* 'Purple Gown', (**Zipao**) which first bloomed 1964. Originated by H.J. Clark, New Lynn, New Zealand. The plant has an upright, dense habit of growth with mid-green, reticulate leaves, 9 cm long x 4.5 cm wide. The flower is a rose form double with 15 or more petals and some petaloids. The colour is rose bengal, showing a range of variations.. See colour photo: front cover, 1980, *New Zealand Camellia Bulletin*, vol.XI, No.6.

Lisa Haele Shuman. SCCS., 1990, *Camellia Nomenclature*, p.67. Orthographic error for **Lisa Adele Shuman.**

Lisa Maibach. *(C.japonica), American Camellia Yearbook*, 1972, p.131, Reg. No.1224: A 4 year old chance seedling that first bloomed 1965. Originated by Ed Wylie, Shreveport, Louisiana, USA. Plant growth is upright and average with dark green leaves, 8 cm x 5 cm. The formal double, **Alba Plena** type, bloom is white to pink in colour with 79 petals. It is 8 cm across x 2.5 cm deep. Flower is white to the last outer two rows of petals which are pink. Flowers early to mid-season.

Lisa Rhody. *(C.japonica),* ACS., Feb.1990, *The Camellia Journal*, vol.45, No.1, p.12, Reg. No.2186: Large size, dark pink, rose form double, chance *C.japonica* seedling. Blooms mid-season. Originated by Ferol & Sam Zerkowsky, Slidell, Louisiana, USA. *American Camellia Yearbook*, 1990, p.89, colour photo between pp.90-91. The 21 year old seedling first bloomed 1970. Flower size. 11 cm across x 6 cm deep. Plant growth is upright and average with dark green leaves, 7.5 cm long x 3.8 cm wide.

Lisagaier. Gao, Jiyin, 1993, *The Observations from the Camellia World,* p.16, No.520. Chinese synonym for the New Zealand *C.reticulata* **Lisa Gael.**

Lisaura Pagliai. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, p.118 with colour photo; Medium to large formal double, pinkish red (RHS.CC.63A). A seedling of 'Latifolia Rubra' **(Latifolia)** x 'Plutone', first flowered in 1990.

Lisha Mingtian. Shao, Taichong, 1992, *The Observations from the Camellia World,* p.14. Chinese synonym for the USA *C.japonica* **Tomorrow's Lisa.**

Littae. Morren, 1845, *Annals de Gand*, 1:185; pl.17 facing p.185. Synonym for **Duca di Litta.**

Little Aggie. *(C.japonica), American Camellia Yearbook*, 1976, p.162, Reg. No.1404: A 10 year old chance *C.japonica* seedling that first bloomed 1971. Originated by M.E. Rowell, Fresno, California, USA. Plant growth is spreading to weeping and slow with dark green leaves, 7 cm x 3.3 cm. The single, **Kimberley** type, bloom is strong to light, purplish pink (7.5RP 8/5 Nickerson) with pink and white anthers. Average size, 6 cm across. Blooms mid-season to late.

Little Ann. (Wabisuke x *C.hiemalis),* ACRS., Dec.1990, *Camellia News*, No.115, p.11, Reg. No.393: Originated by Keith Abbott, West Riverton Drive, Rossmoyne, West Australia. Seed parent **Fuiri-kochô-wabisuke,** pollen parent *C.hiemalis* **Kanjirô.** First flowered 1980. The semi-double to anemone form flower is pink on the inner part of the petals, and deep pink on the outer edge, 5 cm across x *2* cm deep (RHS.CC.72C-73B). Blooms early to mid-season on a slow growing, dwarf plant. Petaloids RHS.CC.63C-62D. Leaves matt, deep green, flat, elliptic, crenate, variegated at total circumference of leaf margins and veining, 6 cm long x 2.3 cm wide. Petals notched, few stamens. A small 12 petalled form with dark tonings on petal margins in a band or watermark matching the leaves.

Little Babe. *(C.japonica), American Camellia Yearbook*, vol.II, 1974, p.237, Reg. No.1342: A 21 year old japonica chance seedling that first bloomed 1955. Originated by W. Maurice Harrison, Pensacola, Florida, USA. Plant growth is dense and rapid with dark green leaves, 6 cm x 3.8 cm. The rose form double, 'Mathotiana' (**Julia Drayton**) type, bloom is very dark red, with golden anthers and pink filaments and 56 petals. Average size is 6 cm across x 5.5 cm deep. Blooms early to late season. Sport: **Little Babe Variegated.** Chinese synonym: 'Ruying'.

Little Babe Variegated. *(C.japonica)*, Cannon, 1983, ACS., *The Camellia Journal*, vol.38, No.4 as 'Little Babe Var.'. A virus variegated form of **Little Babe** - Dark red and white. Originated in USA. Chinese synonym 'Hua Ruying'.

Little Beaut. *(C.japonica),* Mark S. Cannon 1975, ACS., *The Camellia Journal*, vol.30. No.4: Small, pink, formal double. Originated in Australia.

Little Bit. *(C.japonica), American Camellia Yearbook*, 1958, p.289, Reg. No.333: A 12 year old chance seedling that first flowered 1951. Originated by Dr John D. Lawson, Antioch, California, USA. Plant growth is medium, fast and upright with dark green leaves, 8 cm long x 6 cm wide. The colour of the flower is red (Nickeron fan 2.5R5/15) with white flecking, or solid red. The flower measures 6 cm across x 3.2 cm deep, with 5 outer petals, rounded and bilobate, with 150-200 petaloids in fascicles. No visible stamens. The petaloids form a hemisphere surrounded by the 5 petals. Mid-season blooming. See colour photo: *New Zealand Camellia Bulletin,* 1977, vol.X, No.3, front cover. Sports: **Little Bit Variegated, Little Bit Red.**

Little Bit Red. *(C.japonica),* Camellia Haven Catalogue, 1991, p.8: The solid red form of **Little Bit** with no white showing. Originated in NZ.

Little Bit Variegated. *(C.japonica),* Camellia Haven Catalogue, 1983 as 'Little Bit Var.'. A virus variegated form of **Little Bit** - Red marbled with white. Originated in USA. Chinese synonym 'Huanizi'.

Little Black Bud. *(C.japonica),* Cannon, 1984, ACS., *The Camellia Journal*, vol.39, No.4, p.19. No description. No valid listing located.

Little Bo Peep. *(C.japonica), American Camellia Yearbook*, 1982, pp.174, 175, Reg. No.1784 with colour photo facing p.76: A medium, pale pink, formal double, *C.japonica* chance seedling that blooms mid-season. Originated by Nuccio's Nurseries, Altadena, California, USA. Their

#7754. The 7 year old seedling first bloomed in 1976. Average flower size, 7 cm across. Plant growth is upright, open and rapid in rate with light green leaves.

Little Brad. *(C.japonica), American Camellia Yearbook,* 1965, p.240, Reg. No.762: A 9 year old chance seedling that first bloomed 1958. Originated by Dr Leland E. Chow, Bakersfield, California, USA. Plant growth is upright, spreading and medium in rate. The semi-double to formal flowers are white with yellow stamens. Blooms are white with yellow stamens. Blooms are 5 cm across and 2.5 deep. Blooms mid-season.

Little Cheeper. *(C.japonica),* SCCS., 1981, *Camellia Nomenclature*, p.97: Rose-pink. Small, formal double. Medium, open growth. Mid-season blooming. Originated in USA by Haynie.

Little Crimson. Synonym for **Xiaotaohong.**

Little Cutie. *(C.japonica), American Camellia Yearbook*, 1982, p.175, Reg. No.1808: A medium size, light pink, formal double, chance *C.japonica* seedling that blooms mid-season to late. Originated by Ted Alfter, Bakersfield, California, USA. The 8 year old seedling first bloomed 1977. Average flower size, 8 cm across x 3.8 cm deep with 30-50 petals, sometimes with colour darker on outer edge. Plant growth is upright, dense and rapid in rate with dark green leaves, 8 cm long x 4.5 cm wide.

Little David. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.9. No description. SCCS., 1981, *Camellia Nomenclature*, p.97: Rose red, spotted white. Miniature, formal double. Open growth, Mid-season blooming. Originated in USA.

Little Dixie. *(C.japonica),* SCCS., 1981, *Camellia Nomenclature*, p.97: Shell pink. Miniature formal double. Bushy growth. Early blooming. Originated in USA by Haynie.

Little Dreamer. *New Zealand Camellia Bulletin*, 1986, vol.XIV, No.8, p.14. Synonym for **Dream Baby.**

Little Gem. McIlhenny, 1941, *700 Varieties of Camellias*, p.16. Synonym for **Kôgyoku.**

Little Ginger. *(C.japonica), American Camellia Yearbook*, 1977, p.214, Reg. No.1420: A small pink with edges fading to white in the centre, formal double. A 12 year old chance seedling that first bloomed 1966. Originated by Dr J.M. Habel Sr., Suffolk, Virginia, USA. The formal double, **Alba Plena** type, bloom has 125 petals. Average size is 7 cm across x 3.8 cm deep. Late blooming. Plant growth is upright with dark green leaves, 7.5 cm x 3.8 cm.

Little Glen. *(C.japonica), New Zealand Camellia Bulletin*, 1979, vol.XI, No.3, p.21, Reg. No.150: A chance seedling *C.japonica*, originated by A.P. Gamlin, New Zealand, which first flowered 1975. The plant habit is upright, dense with dark green leaves, 10 cm long x 5 cm wide. Blooms are peony form with 30 petals, up to 20 petaloids and cream stamens. The colour is soft pink, veined on outer edge with a creamy centre. Flowers mid-season.

Little Holland. West End Nurseries Supplementary List, Jan.1989, p.1. Synonym for 'Orandabeni' (**Orandokô**).

Little Hooper. *(C.japonica), American Camellia Yearbook*, 1994, p.61, Reg. No.2282, colour pl. pp.64-65: A small white, anemone form, *C.japonica* seedling of **Mrs Hooper Connell**; early blooming. Originated by Ivan J. Mitchell, Melrose, Florida, USA. The 14 year old seedling first flowered 1985. Average flower size is 7 cm across x 3 cm deep with 114 petals, white to lemon anthers and filaments. Plant growth is upright and average with dark green leaves 7.5 cm long x 3 cm wide.

Little John. (*C.japonica),* Dodd, 1968, *Adventures in Camellia Seedlings*, p.6, colour photo: Deep pink, formal double, 10 cm across with long, oval petals. A seedling of 'Galilee' originated by Richard Dodd, Marshallville, Georgia, USA.

Little Jon. (*C.japonica), American Camellia Yearbook*, 1960, p.200, Reg. No.489: A 15 year old chance seedling that first bloomed 1950. Originated by Jon C. Campbell, Natchez, Mississippi, USA. Plant growth is average with dark green leaves, 8 cm x 5 cm. The cadmium red, semi-double flowers, 10 cm across x 6 cm deep, have 14 petals and yellow stamens. Flowers early to mid-season.

Little Joy. *(C.japonica),* ACRS, *Camellia News,* 1992, No.123, p.4, Reg. No.409: Originated by Doug Haviland, Asquith, NSW, Australia. Seed parent **Chô-chô-san.** Pollen parent unknown. First flowered 1984. The rose-pink (RHS.CC.58D), anemone form flower has 8 guard petals and 130 petaloids, 8.5 cm across x 4 cm deep. Free flowering mid-season to late on an upright, medium spreading bush. Leaves glossy green, elliptic, margins serrate, flat auminate apex, 6.5 cm long x 3 cm wide.

Little Lady. *(C.japonica), American Camellia Yearbook*, 1966, p.94, Reg. No.818: A 10 year old chance seedling that first bloomed 1959. Originated by S.M. Mixson, Gainsville, Florida, USA. Plant growth has dark green leaves, 9.5 cm x 4.5 cm with average growth. The formal double bloom, similar to **Alba Plena,** is white, 8 cm across x 3.8 cm deep with 50 or more petals. Blooms midseason.

Little Lavender. *(C.x williamsii),* McCaskill Gardens Catalogue, 1965, Lavender pink; miniature, anemone form. Vigorous, compact, upright growth, Blooms mid-season. Originated from *C.x williamsii* **Phillipa Forwood** x *C.japonica*, originated by McCaskill Gardens, Pasadena, California, USA. Chinese synonym: Xiaolan'.

Little Lisa Leigh. (*C.fraterna* hybrid). ACRS, Camellia News, 1993, No.127, p.8, Reg. No.420, colour photo p.2: Originated by Marjorie Baker, Macleod, Victoria, Australia. Seed parent **Snow Drop.** Pollen parent unknown. First flowered 1989. Miniature, 6 petalled single, bi-colour pink (RHS.CC.73C) fading to soft pink (RHS.CC.65D) on outer edge. Size 3.7 cm across x 1.3 cm deep. Free flowering early to late on a slow growing, weeping plant with leaves mid-green, oval, flat, matt surfaces, apices acuminate, margins serrate, 6.6 cm long x 3.2 cm wide. Petals notched, stamens columnar, fragrant.

Little Liz. *(C.japonica),* ACS, *The Camellia Journal*, Sept. 2008, p.31 with colour photo, Regn No. 2745; A small white semi-double with yellow anthers and cream filaments. Seedling of **Elizabeth Boardman.** Average, spreading, open growth. Flowers mid-season. Originated in 2000 by Louise Poe Hairston, Birmingham, Ala., USA. *American Camellia Yearbook*, 2008, p.120 with colour photo; Flowers are 7-7.5 cm diameter x 2 cm deep, 16-26 petals and 4-6 petaloids. Light green leaves are 11.5 cm x 5 cm.

Little Man. *(C.japonica), American Camellia Yearbook*, 1954, p.320, Reg. No.191: A 9 year old chance seedling, originated by Hugh Shackelford, Albany, Georgia, USA and bloomed for the first time 1953. Plant growth is upright and rapid in rate with small, round, smooth leaves. The flowers are white, shading to pink, formal double, 7 cm across. Blooms mid-season. Chinese synonym 'Xiaorenwu'.

Little Man Formal. (*C.japonica),* Nuccio's Nurseries Catalogue, 1982, p.9: White with a pink edge. Small, formal to rose form double. Mid-season blooming. Originated at Nuccio's Nurseries, Altadena, California, USA.

Little Maple. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.139. Synonym for **Komomiji.**

Little Masterpiece. *(C.japonica),* ACS., Aug. 1987, *The Camellia Journal,* vol.42, No.3, p.6, Reg. No.2055: Small, white, formal double to rose form double, *C.japonica* chance seedling. Flowers early to mid-season. Originated in USA by Elmer F. Achterberg, Citrus Heights, California. *American Camellia Yearbook,* 1989, p.82, colour photo between pp.60-61: The 9 year old seedling first bloomed 1982. Average flower size, 6 cm across x 4 cm deep with 70

petals, yellow anthers and white filaments. Flowers open informal double - rosebud - form to rose form double in later blooming season. Plant growth is upright, average and rapid with dark green leaves, 8 cm long x 5 cm wide.

Little Michael. *(C.japonica)*, Donnan, 1981, *American Camellia Yearbook*, p.82: Small to miniature camellia, developed in USA by Franklin Moore, West Covinia, California. A cross of **Demi-tasse** x **Hishikaraito.** The bloom has a creamy white, anemone bud centre with pink guard petals, The 9 year old seedling first flowered 1977. Average size, 6 cm across. The plant growth is upright, dense and medium in rate with dark green leaves. Registration No.1783 with the ACS.

Little Miss. *(C.japonica)*, Fruitland Nursery Catalogue, 1947-1848, p.20: Small, white, single. Originated by the Fruitland Nursery, Augusta, Georgia, USA.

Little Pearl. *(C.sasanqua)*, Nuccio's Nurseries Catalogue, 1972, Number 5101: Pink buds, opening pure white. Medium size, irregular, semi-double. Originated in USA by Nuccio's Nurseries, Altadena, California. USA. Chinese synonym: 'Xiaohnoji'.

Little Poppy. *(C.japonica)*, SCCS., 1974, *Camellia Nomenclature*, p.92: Soft pink with a centre of creamy petaloids. Miniature, anemone form. Vigorous, bushy, upright growth. Mid-season blooming. Originated in USA at the McCaskill Gardens, Pasadena, California.

Little Princess. Hazlewood's Nursery Catalogue, 1949, p.10. Synonym for **Shôwa-wabisuke.**

Little Red Riding Hood. *(C.japonica)*, McCaskill Gardens Catalogue, 1965. Small, formal double red. *American Camellia Yearbook*, 1967, p.229, Reg. No.908: A chance seedling that first bloomed 1960, originated by McCaskill Gardens, Pasadena, California, USA. Plant growth is vigorous, upright and compact. Flower is a formal double, similar to **Alba Plena,** and is crimson. Bloom measures 5.8 cm across x 3.2 cm deep. Flowers mid-season. Received the William E. Wylam Miniature Award, 1969. See pl. No.100, p.55, *Encyclopedia of Camellias in Colour*, vol.II, 1978.

Little Ruby. *(C.japonica)*, SCCS, 1981, *Camellia Nomenclature*, p.98: Rich red. Miniature, loose peony form to semi-double. Compact growth. Mid-season blooming. Originated in USA by Haynie.

Little Sittart. *(C.japonica)*, *American Camellia Yearbook*, 1962-63, p.221, Reg. No.641: A 17 year old chance seedling that first bloomed 1951; originated by Wheeler's Central Georgia Nurseries, Macon, Georgia, USA. Plant growth is upright and compact with very dark green, serrated leaves. The peony form blooms, similar to **Lady Vansittart,** range from 4-8 cm across. Colour is white and red or red or pink or pink and white or light pink. The flower has 15 petals. Blooms early to midseason.

Little Slam. *(C.japonica)*, Nuccio's Nurseries Catalogue, 1969, #6702; Miniature, peony red. *American Camellia Yearbook*, 1979, p.108, Reg. No.1512: A miniature, rich red, full peony form *C.japonica* seedling that blooms early to mid-season. Originated by Nuccio's Nurseries, Altadena, California, USA. The 11 year old seedling first bloomed 1967. Average flower size, 5 cm across. Plant growth is upright, dense and rapid with dark green leaves, 6 cm x 3.2 cm. Received the William E. Wylam, Miniature Award, 1971 and the John A. Taylor Jr., Miniature Award, in 1981. See photo: p.131. Macoboy, 1981, *The Colour Dictionary of Camellias;* and pl.101, p.53, *Encyclopedia of Camellias in Colour*, vol.II,1978. Sports: **Little Slam Variegated, Little Slam Pink.**

Little Slam Pink. *(C.japonica)*, ACS., 1989. *The Camellia Journal*, vol.43, No.3, p.34, Reg. No.2089: Miniature size, bright pink, peony form *C.japonica*, sport of **Little Slam.** Blooms early to midseason. Originated in USA by Martha Vallery, Williams Nursery, Forest Hills, Louisiana. *American Camellia Yearbook*, 1989, p.189, colour photo between pp.186-187. This sport was first observed 1983. Plant habit is upright, open and rapid with dark green leaves.

Little Slam Variegated. *(C.japonica), American Camellia Yearbook*, 1978, p.102 as 'Little Slam Var.'. A virus variegated form of **Little Slam** - Red marbled white. Originated in USA by Nuccio's Nurseries, Altadena, California.

Little Susie. *(C.japonica), American Camellia Yearbook*, 1973, p.192, Reg. No.1234: An 8 year old chance japonica seedling that first bloomed 1968; originated by Montgomery Nursery, Savannah, Georgia, USA. Plant growth is upright and medium with dark green leaves, 10 cm long x 5 cm wide. The formal double, **Alba Plena** type bloom is blush pink, 7.5 cm across x 3.5 cm deep. It has 112 petals, blooms mid-season to late, with a central star formation. Abbreviation: 'Susie'. See colour photo, p.27, *New Zealand Camellia Bulletin*, vol.XVI, No.7, Nov.1990.

Little Too. *(C.japonica), American Camellia Yearbook*, 1967, p.229, Reg. No.927: A 10 year old chance seedling that first bloomed 1959; originated by Mr & Mrs H.E. Ashby, Bonneau, South Carolina, USA. Plant growth habit is upright, spreading and medium in rate with light green leaves, 7 cm x 3.2 cm. Flower is semi-double, similar to 'Donckelaeri' (**Masayoshi**) and is 5 cm across, x 2.5 cm deep. Colour is white with red streaks and spots. Sports to a solid colour red. Stamens golden. Blooms mid-season to late.

Little 'un. *(C.japonica)*, SCCS., 1962, *Camellia Nomenclature*, p.65: Rose. Miniature semi-double. Slow, compact growth. Late flowering. Originated in USA by W. Wylam, California.

Littore. *(C.japonica)*, McEacharn, Neil, 1963, *Catalogue of Plants in the Gardens of the Villa Taranto*, p.59. No description. No valid listing located.

Liu-chiao Hen-t'ien-kao. Yü & Bartholomew, 1980, *American Camellia Yearbook*, p.26. Different reading for **Liujiao Hentiangao**.

Liujiao. Chinese reading for the Japanese 'Rokkaku'.

Liujiaobai. (Hexagon White), *(C.japonica)*, Huang Nursery Shanghai Catalogue, 1949: A white, formal double with tiered rows of petals in the form of a hexagon star. Leaves narrow-elliptic, apices acuminate, margins serrate. Chang, Shao Yun, 1987, *Camellias from Zhejiang*, pp.85, 98, colour photo where it is used as a synonym for Yumeiren. Originated in China. Orthographic variant: 'Bailiujiao'. Different readings: 'Lu-chio Pe', 'Pai-liu-chueh', 'Liu-chio-pai'. Synonyms: 'White Hexagon', 'Hexagon White'. Japanese reading: **Rokkakushiro.** It is believed to originally be a Chinese cultivar. However the earliest valid listing is for the Japanese **Rokkakushiro**, Itô, Jukyû, 1739 and this is its prior name.

Liujiao Baota. (Hexagonal Pagoda), *(C.japonica)*, Wang & Yu, 1981, *Shancha Hua.* Large, tiered white with concave centre and numerous, small, ovate petals. Originated in China. Different reading: 'Liu-chiao Bao-ta'. Synonyms: 'Baixueshan', 'Dabai'. See colour photo [p.133], Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.8. Synonym: 'Hexagonal Pagoda'.

Liujiao Baozhu. *Chinese Camellia Culture,* 2003, p.164 with colour photo of plant only, as 'Liujiaobaozhu'; A tree up to 200 years old in Hongwu Flower and Tree Garden, China. No further details.

Liujiao Dachun. (Large Sechuan Hexagonal), *(C.japonica)*, Huang Nursery Shanghai Catalogue, 1949. No description. Originated in China. Different reading: 'Liu-chiao Ta-chuan'. Synonym: 'Large Sechuan Hexagonal'.

Liujiao Dahong. (Hexagonal Scarlet), *(C.japonica)*, Huang Nursery Shanghai Catalogue, 1949: Medium size, 8-9 cm across, red formal double, with up to 80 petals in 6-7 rows, with a large proportion of blooms opening in a hexagonal, tiered form. Leaves 9-10 cm long x 4.3-3.9 cm wide, flat, rather caudate, base broad cuneate, serrations thick, shallow and scarse; midrib prominent, buds elliptic, light green. Late blooming. Originated in Zhejiang, China. Different reading: 'Liu-chiao Ta-hung'. Synonyms: 'Hexagonal Scarlet', 'Songyanghong' and used as a

synonym for **Chidan.** Believed to be synonymous with **Myrtifolia.** Japanese reading: Benirokkaku'.

Liujiao Fenhong. (Hexagonal Pink), *(C.japonica)*, Wang & Yü, 1981, *Shancha Hua:* Medium size, pink, formal double with petals usually in a hexagonal star or tiered form. Originated in China. Different reading: 'Liu-chiao Fen-hung'. Synonym: 'Hexagonal Pink'.Synonym for **Fenxia.**

Liujiao Fentongcao. *(C.reticulata), Chinese Camellia Culture*, 2003, p.250 with colour photo; A sport of **Fentongcao**, with the petals arranged in hexagonal layers. Other details as for **Fentongcao.**

Liujiao Hentiangao. (Hexangular Dwarf), (*C.reticulata*), Yü & Bartholomew, 1980, *American Camellia Yearbook*, p.20, colour pl. p.126: Spinel pink. Late. Feng et al., 1986, *Yunnan Camellias of China*, p.90 as 'Liujiaohentiangao': Leaves large, thin and brittle, broad-elliptic to elliptic-ovate, apices short-pointed, bases rounded to broad-cuneate, 6.5-11 cm long x 4.5-6.5 cm wide. Flowers pink with white along the margin (RHS.CC.52B), diameter 9-11 cm. Petals about 41 in 7-8 whorls, long-ovate, apices emarginate or slightly lobed and hamulate, inner petals smaller than outer ones, overlapping in a radiate form. Stamens mostly forming small, narrow petaloids, a few being rudimentary and connate to the inner petals. Pistils rudimentary and flattened. This camellia was selected from a bud mutation of **Hentiangao**. It is characterized by the overlapping petal arrangement and hexagonal corolla. Flowers mid-season. Different reading: 'Liuchiao Hen-t'ien-kao'. Synonym: 'Hexangular Dark Rose'. See colour photo facing p.14, *American Camellia Yearbook*, 1980.

Liujiao Juban. *(C.reticulata), Chinese Camellia Culture*, 2003, p.249 with colour photo as 'Liujiaojuban'; A sport of **Juban** with the petals arranged in hexagonal shape. Other details as for **Juban.**

Liujiao Taohong. (Hexagonal Crimson), *(C.japonica)*, Wang & Yü, 1981, *Shancha Hua:* Crimson, formal double, sometimes tiered. Medium size, late blooming. See Gao & Zhuang, 1989, *The Camellia in China*, p.48, No.292, colour photo, No.168. Originated in China.

Liujiao Yinhong. (Hexagonal Spinel Pink), *(C.japonica)*, Huang Nursery, Shanghai, Catalogue, 1949. No description. Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.87, colour photo, [p.119]: Medium size, light red, formal double, with 6-7 rows of broad, rounded, slightly emarginate petals, smaller, ovate and hooded towards the centre. Leaves elliptic, mid-green, apices acuminate, margins obscurely serrate. Sport of **Liujiao Dahong.** Originated in China. Different reading: 'Liu-chiao Yin-hung'.

Liujiao Yinhongchuan. (Hexagonal Spinel Pink Rosary), *(C.japonica)*, Huang Nursery, Shanghai Catalogue, 1949. No description. Different reading: 'Liu-chiao Yin-hung-ch'uan'. Originated in China.

Liujiao Zhenchun. (Hexagonal Spring Treasure), *(C.japonica)*, Liu, 1959, *Chungkuo Chuming Tichi Ching Huahui.* No description. Originated in China. Different reading: 'Liu-chiao Chang-chun'.

Liuxia. *(C.japonica), Chinese Camellia Culture*, 2003, p.254 with colour photo; Semidouble with irregularly placed petals. Light pink with light red stripes and spots. Diameter about 10 cm. Flowers mid-season to late. Raised by Ms Xu Biyu, Flower Gardens of Hangzhou City, China.

Liuxing Hei. (Prevailing Black). Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for 'Nuccio's #9320".

Liu-yeh Ta-knei-yeh. Different reading for 'Liuye Daguiye'.

Liu-yeh Yin-hung. Watanabe & Andoh, 1980, *Hana to Kino Bunka, Tsubaki*, p.158. Different reading for **Liuye Yinhong.** Japanese synonym 'Yanagiba-ginkô'.

Liuye Daguiye. Feng & Shi, 1966, Yunnan *Shanchahua Zhiwuxue Texing ji Huaxing Fenlei de Tantao*, 2:105-113. Different reading: 'Liu- yeh Ta-kuei-yeh'. Synonym for **Xiguiye.**

Liuye Yinhong. (Willow Leaf Spinel Pink), *(C.reticulata)*, Fang, 1930, *Diannan Chahua Xiaozhi:* The leaves are narrow and long like willow leaves and the petals are complicated. Feng et al., 1986, *Yunnan Camellias of China*, p.47, colour photo: Leaves oblong-ovate to ovate-lanceolate, apices acuminate, bases cuneate, 6.8-10 cm long x 2.6-4.6 cm wide. Flowers light spinel pink with pale stripes (RHS.CC.65A), diameter 12-15 cm. Petals about 30 in 3-4 whorls, oblong-ovate, broadened at apex, bases attenuate, outer whorls flat, inner whorls slightly folded, decreasing in size from outer to inner whorls. Stamens numerous, divided into several groups by inner petals. Pistils mostly rudimentary, flattened. This cultivar is magnificent when in full bloom with its numerous flowers and vigorous tree form. The flower and leaf buds are long and thin, and light green in colour. The flowering season is long, mid-season to late. It is widely cultivated in the Kunming area. Different reading: 'Liu-yeh Yin-hung'. Synonyms: 'Willow Leaf Spinel Pink', 'Willow Leaf Pink', 'Narrow Leaved Shot Silk', 'Shot Silk Narrow Leaved'. Western Synonym: 'Willow Wand'. Received RHS, "Award of Merit" in 1967. See colour photos: *New Zealand Camellia Bulletin*, 1965, vol.IV, No.4, p.27 as 'Willow Wand' and facing p.149, *American Camellia Yearbook*, 1975 and facing p.14, *American Camellia Yearbook*, 1980. Japanese synonym 'Yanagiba-ginkô'.

Liuyehtakueiyeh. Ikeda, 1974, *American Camellia Yearbook*, p.114. Different reading for 'Liuye Daguiye'.

Liuyehinhung. Durrant, 1963, *New Zealand Camellia Bulletin*, vol.III, No.3, p.7. Orthographic error for 'Liuyehyinhung', different reading for **Liuye Yinhong.**

Liuyehyinhung. Lammerts, 1950, *American Camellia Yearbook*, p.115. Different reading for **Liuye Yinhong.**

Livea Borromea. Jean Verschaffelt, 1860-1861, Price List, p.12. Orthographic error for **Livia Borromeo.**

Livea Borromeo. Burdin Maggiore & Co. Catalogue, 1856-1857. Orthographic error for **Livia Borromeo.**

Livia Boromeo. Hovey & Co. Nursery Catalogue, 1857, p.10. Orthographic error for **Livia Borromeo.**

Livia Borromeo. *(C.japonica)*, Luzzatti Catalogue, 1853. No description. Franchetti, 1855, *Collezione di Camelie*, p.41: Vivid violet red, tinted and striped with white. Beautifully imbricated. Verschaffelt, 1858, *Nouvelle Iconographie*, Book XI, No.I as 'Livia Boromeo': Received from Italy. The blossoms, measuring more than 10 cm across, are of a delicate and ruddy pink with many broad stripes arranged in rays. It is a perfection in the full meaning of the word. Orthographic errors: 'Livea Borromeo', 'Livia Boromea', 'Livia Boromeo', 'Livea Borromea', 'Livia Boromea'.

Livia Lauzi. *(C.japonica)*, Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.119 with colour photo; Medium size formal double, red (RHS.CC.46B). Sometimes a few white streaks on the inner petals. A seedling of 'Rubra Simplex' **(Rubra)** x 'Latifolia Rubra' **(Latifolia),** first flowered in 1989.

Livinia Maggi. Auguste van Geert Nursery Catalogue, No.65, 1869-1870, p.54. Orthographic error for **Lavinia Maggi.**

Liweide. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.415; Chinese synonym for the USA *C.japonica* **Reverend John Bennett.**

Li-yü Chu. Yang, 1965. *Study of the Camellia Varieties of Taiwan.* Different reading for **Liyuzhu.**

Liyuan. (Beautiful Garden), Gao & Zhuang, 1989, *The Camellia in China*, p.81, No.628. Chinese synonym for the Nuccio's hybrid **Garden Glory**

Liyuzhu. (Carp's Eye), *(C.japonica)*, Yang, 1965, *Study of the Camellia Varieties of Taiwan*, p.4: Leaves elliptic, 6.2-8.3 cm long x 2.6-5.0 cm wide. Formal double, red, of about 116 petals, 7 cm across. Originated in China in the Qing Dynasty. Different reading: 'Li-yü Chu'. Japanese synonym 'Rigyoku'.

Liz Beebe. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue:* Soft pink with irregular shading of deeper pink. Medium size, semi-double. Vigorous, bushy growth. Mid-season blooming. Originated in USA at McCaskill Gardens, Pasadena, California, USA.

Liz Carter. *(C.japonica)*, Valdosta Camellias, ACS., Nov.1987, *The Camellia Journal*, vol.42, No.4, p.19. No description. *New Zealand Camellia Bulletin*, 1990, vol.XVI, No.5, p.42, Reg. No.269: Originated by T. Lennard, Te Puke, New Zealand. A chance seedling that first bloomed 1985 at 8 years of age. Average growth habit and rate of growth, with dark green leaves, 7 cm x 4 cm. The semi-double, small to medium size bloom, averages 8 cm across x 4.5 cm deep and has 27 petals. The ruby red flower with black veining in the petals, has yellow pollen and pink filaments. Blooms mid-season to late.

Lizhi Cha. (Litchi Camellia), *(C.japonica)*, Yang, 1965, *Study of the Camellia Varieties of Taiwan*, p.3 as 'Li-chih Cha': Leaves small to large, oval, 6-11.5 cm long x 2.7-5.2 cm wide. Flowers, petals in 5-6 rows, double, red, 9 cm across. Different reading: 'Li-chih Cha'. Originated in China.

Lizhu. Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for the Japanese *C.japonica* **Reigyoku.**

Lizzie Jones. *(C.japonica)*, Feast's Catalogue, 1858, p.16. No description. Halliday, 1880, *Practical Camellia Culture:* Rose striped red. Langdon's Nursery Catalogue, 1890-1891 has: Striped and spotted pink and white. Originated in USA. Orthographic variants: 'Lizzy Jones', 'Lizzi Jones'.

Lizzi Jones. Jean Verschaffelt, 1863, Supplement to Catalogue Général, p.10. Orthographic error for **Lizzie Jones.**

Lizzie Mays. *(C.japonica)*, Dodd, 1968, *Adventure in Camellia Seedlings*, p.14, colour photo: Large size, red, semi-double, 10-11 cm across with 2-3 rows of petals, about 15-17, large, oval. A seedling of **Rainy Sun** originated by Richard Dodd, Marshallville, Georgia, USA.

Lizzie Ware. Wade, 1949, *American Camellia Yearbook*, p.194. Synonym for **Julia Drayton**, invalidly as 'Mathotiana'.

Lizzie Waters. *(C.japonica)*, Jean Verschaffelt, 1863-1864, Price List, p.39 as 'Lizzi Waters'. Pure white formal double similar to **Alba Plena.**

Lizzy Jones. van Houtte Catalogue, 1864-1865, 104:83. Orthographic variant for **Lizzie Jones.**

Lois Boudreaux. (*C.reticulata* hybrid). ACS, *The Camellia Journal,* Mar. 2003, p.29 with colour photo, Reg. No.2589. Flower has dark rose pink, semi-double to loose peony flowers with yellow anthers and white filaments. Heavy petal texture. Flowers mid-season. Originated by Hyman R. Norsworthy, Beaumont, Tex., USA. *American Camellia Yearbook,* 2003, p.63, colour photo p.c3. The 12 year old seedling first flowered in 1995. A seedling of **Pop Gee,** pollen parent unknown. Flowers have 30-35 petals, and measure 10 cm across x 7 cm deep. Plant is upright and dense with average growth rate. The dark green leaves are 9 cm long x 3.8 cm wide.

Lois Coker. *(C.japonica), American Camellia Yearbook,* 1979, p.108, Reg. No.1576: A small to medium size, white, formal double *C.japonica* seedling of 'Magnoliiflora' (**Hagoromo**), mid-season flowering. Originated by Robert R. Coker, Hartville, South Carolina, USA. The 10 year old seedling first flowered 1976. The flower has about 50 petals and averages 9 cm across, opens flat. Plant growth is upright, dense and rapid in rate with dark green leaves, 9.5 cm long x 4.5 cm wide.

Lois Dunn. *(C.japonica),* ACS., *Quarterly*, 1951, vol.7: Shell pink. Large size, loose petalled semi-double with vigorous, upright growth. Blooms early to late. Originated in USA by Rosa.

Lois Gerow. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Coral red. Medium large, semi-double. Originated in USA.

Lois Hill. *(C.japonica),* SCCS., 1946, *Camellias*, p.15: Sport of 'Tricolor'. Light pink, veined deeper pink, edged white. Medium size. Synonyms: 'Elizabeth Colville', 'Tricolor Sport'. See black & white photo, p.216, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I. Note: Not a sport of the Japanese 'Tricolor' (**Ezo-nishiki**), but of the American **Tricolor California.**

Lois Norvell. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue*, Dark red, semi-double, mid-season. *American Camellia Yearbook*, 1954, p.320, Reg. No.174: A 12 year old, chance seedling, originated by Central Georgia Nursery, Macon, Georgia, USA. Flowered for the first time 1944. Plant growth is compact, upright and slow with leaves dark green, glossy, ovate, cuspidate and crenate, 8 cm x 5 cm. Flowers dark red, semi-double with 15-23 petals, similar to 'Donckelaeri' (**Masayoshi**). It is 9-12.5 cm across and blooms mid-season. Orthographic error: 'Lois Norvelle'. Sport: **Lois Norvell Variegated.**

Lois Norvell Variegated. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* A virus variegated form of **Lois Norvell** - Dark red blotched with white. Originated in USA.

Lois Norvelle. Hillcrest Nurseries Catalogue, 1958. Orthographic error for **Lois Norvell.**

Lois Shinault. *(C.reticulata x C.granthamiana), American Camellia Yearbook*, 1976, p.152: This cultivar is a hybrid between *C.reticulata* 'Crimson Robe' (**Dataohong**) and *C.granthamiana*, made by Al Smith, Granada Hills, California, USA, that first bloomed 1966. The semi-double type bloom is medium, orchid pink, shading to lighter pink at the centre. The petals have a silky irridescence. Flowers early to mid-season. Orthographic error: 'Louis Shinault'. Chinese synonym 'Shinate'.

Lois Taylor. *(C.japonica),* SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Shell pink. Large, semi-double. Originated in USA by Bolen. For black & white photo see p.206, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Loki Schmidt. *(C.hybrid). International Camellia Journal* 2005, p.129 with colour photo; Reg. No. 57. A seedling of *C.japonica* **Akebono** and *C.pitardii.* Originated by Peter Fischer, Wingst, Germany. First flowered 1990. An upright, bushy shrub of medium growth rate. Flowers mid-season. Blooms consist of 6 petals, white centre with a wide border of rose pink (RHS.CC. 55C) and golden stamens. Cup-shaped flowers, 7 cm diameter x 4 cm deep. Flowers fall whole. Considered a hardy garden plant in Germany. Chinese synonym 'Laoke'.

Lola. *(C.japonica),* SCCS., 1964, *Camellia Nomenclature*, p.77: Ivory white. Medium, loose peony form. Vigorous, upright growth. Originated in the USA by W.D. Davis.

Lola Barnes. *(C.japonica), American Camellia Yearbook*, 1967, p.229, Reg. No.935: A 7 year old chance seedling that first bloomed 1960. Originated by Julington Nurseries Inc., Jacksonville, Florida, USA. Plant growth is spreading, dense and medium in rate, with dark green, serrated leaves, 8 cm x 5 cm. The semi-double flower, similar to 'Donckelaeri' (**Masayoshi**), is 12.5 cm across x 3.2 cm deep, with 18-24 petals and 2-3 occasional petaloids. Colour is a bright, shrimp pink. Flower has 3 rows of large, heart shaped petals standing apart. Blooms mid-season.

Lola Firth. Cannon, 1980, ACS., *The Camellia Journal*, vol.35, No.4. No description. Originated in USA. No valid listing located.

Lolita. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.9. No description. SCCS., 1964, *Camellia Nomenclature*, p.77: Red moired white or light pink. Large, semi-double to peony form. Vigorous, upright growth. Mid-season blooming. Originated by W.M. Harrison, Pensacola, Florida, USA.

Lolita (Treseder). *(C.sasanqua),* Treseder's Special Camellia List, 1965, invalidly as 'Lolita': Pink single. Originated in England.

Loloma. *(C.reticulata),* ACRS., 1971, *Camellia News*, No.43, p.34, Reg. No.135: Originated by Edgar R. Sebire, Wandin North, Victoria, Australia; parents unknown, from seed sent from USA. First flowered 1969. The plant has an upright, open, vigorous growth habit and flowers mid-season. Blooms 17 cm across, semi-double, fuchsine pink in colour. The olive green,

reticulate leaves are 10.5 cm long x 5 cm wide with an obtuse base, acuminate apex and small, sharp serrations. Orthographic variant: 'Lo Lo Ma'.

Lollypop. *(C.hybrid)*, ACRS., 1971, *Camellia News*, No.43, p.36, Reg. No.149: Originated by F.S. Tuckfield, Berwick, Victoria, Australia. A chance seedling from *C.hybrid* **Cornish Snow** that first flowered 1969. The putative pollen parent is a *C.x williamsii.* The plant has an open branched habit and blooms early to mid-season. The informal double flowers are about 5 cm across with a pale pink ground colour, stippled with a deeper tone. It has 5 narrow petals surrounding several smaller petals and petaloids. The leaves are lanceolate, 10 cm x 3.8 cm, dark green with medium, sharp serrations. Chinese synonym 'Bangbangtang'.

Lombarda. *(C.japonica)*, Verschaffelt Catalogue, 1849-1850, p.47. No description. de Jonghe, 1851, *Traité de la Culture du Camellia*, p.111: (Mariani), Large double flower, similar to the **Duchesse d'Orleans,** bright, deep pink, white centre with well sited streaks. Franchetti, 1855, *Collezione di Camelie*, p.41: Ivory white with many vivid carmine stripes. Large, round, imbricated form. Verschaffelt, 1854, *Nouvelle Iconographie*, Book I, pl.IV, who says that it should not be confused with 'Lombardii' synonym for **Hendersonii.** Sport: **Lombarda Rosea.** Orthographic errors: 'Lombardo', Lombordo Vera'. Synonym 'Lombarda' (Mariani). van Geert, 1863 says "from Burdin". A sport of **Camillo Galli.**

Lombarda (Mariani). *(C.japonica)*, Mercatelli Catalogue, 1881: Ivory white with many bright, carmine lines. Large, round flower. Imbricated. Mercatelli refers it to the 1854 Verschaffelt flower and it is the same as the Franchetti description for **Lombarda.**

Lombarda Rosea. *(C.japonica)*, Auguste van Geert, 1854, Catalogue, No.36, p.40. Franchetti, 1855, *Collezione di Camelie*, p.41. Sport of **Lombarda.** Bright pink of a completely new shade, petals veined and shadowed a deeper hue with some white stripes and softly tinted a deeper red. Originated in Italy. Orthographic error 'Lombardo Rosea'.

Lombardii. Harrison ed., 1838, *Floricultural Cabinet*, p.149. Synonym for **Hendersonii.**

Lombardi o Hendersoni. Luzzatti, 1851, *Collezione di Camelie*, p.25. Synonym for **Hendersonii.**

Louise Dovell. *(C.japonica), American Camellia Yearbook*, 1986, p.133, Reg. No.1006: An 8 year old chance seedling of **Lady Mary Cromartie Variegated** that first bloomed 1963. Originated by John and Stella Sewell, Jacksonville, Florida, USA. Plant growth is upright and medium with dark green leaves, 8 cm x 3.5 cm. The semi-double flower is 12.5 cm across x 7.5 cm deep with 6-8 rows of petals. Neyron rose 623, shading lighter to centre petals with yellow anthers and white filaments. Blooms mid-season. Sport: **Louise Dovell Variegated.**

Louise Dovell Variegated. *(C.japonica),* SCCS., 1976, *Camellia Nomenclature*, p.96 as 'Louise Dovell Var.': A virus variegated form of **Louise Dovell** - Neyron rose with high, white variegation. Originated in USA.

Louise Dowd. (Wabisuke), *American Camellia Yearbook*, 1981, p.102, Reg. No.1743: A miniature, cerise semi-double *C.hybrid* of Wabisuke **Sukiya** that blooms mid-season. Originated by John E. Rose, Gaithersberg, Maryland, USA. The 6 year old seedling first bloomed 1979. Average flower size is 5 cm across x 3.8 cm deep with 9-12 petals, yellow anthers and filaments. Plant growth is upright, spreading and medium in rate with dark green leaves, 7.5 cm x 4.5 cm.

Louise English. *(C.japonica), American Camellia Yearbook*, 1965, p.240, Reg. No.806: A sport of **Governor Mouton** first observed in 1960. Plant growth is upright, spreading, open and medium in rate with dark green leaves, 7.5 cm x 3.8 cm, originated by Dan English Jr., Dawson, Georgia, USA. The anemone form flower, bright, solid red with green anthers and white filaments, has velvety sheen. The flower is 8 cm across x 2 cm deep with 12 petals and 32 petaloids. Blooms mid-season.

Louise Gerbing. *(C.reticulata). American Camellia Yearbook,* 1994, p.61, colour photo pp.64-65, Reg. No.2299: A very large red, semi-double *C.reticulata* that blooms early to mid-season.

Originated by Marvin Jernigan, Warner Robins, Georgia, USA. The 14 year old seedling first flowered 1982. Average flower size is 13.3 cm across x 7.5 cm deep with 30 petals, white anthers and filaments. Plant growth is upright, open and vigorous in rate with dark green leaves 12.5 cm long x 3.5 cm wide.

Louise Hairston. *(C.japonica), American Camellia Yearbook*, 1967, p.229, Reg. No.959: A 9 year old seedling of **Elizabeth Boardman** that first bloomed 1960, originated by W. Lee Poe, Birmingham, Alabama, USA. Plant growth is upright with dark green leaves, 8 cm x 3.8 cm. The semidouble flower is about 13 cm across x 7.5 cm deep with 32 petals in 7 rows and 5-6 rows of petaloids mixed with stamens. Colour is clear pink with an undertone of coral; anthers and filaments are yellow. Blooms mid-season. Sport: **Louise Hairston Variegated.** Orthographic error: 'Louise Hariston'. Chinese synonym: 'Haiersidun'.

Louise Somervell. *(C.japonica)*, *American Camellia Yearbook*, 1974, vol.II, p.237, Reg. No.1302: An 8 year old chance seedling *C.japonica* that first bloomed 1971. Originated by Mrs Albert Walden, Ocala, Florida, USA. Plant growth is upright and rapid in rate with dark green leaves, 10 cm x 3.8 cm. The semi-double 'Donckelaeri' (**Masayoshi**), type bloom is white striped pink. Average size, 9 cm across x 3.8 cm deep with yellow anthers and white filaments with 17 petals. Blooms mid-season.

Louise Strother Reid. *(C.japonica)*, Dodd, 1968, *Adventure in Camellia Seedlings*, p.14, Colour photo: Medium size, watermelon pink, formal double; petal edges incurved, colour softening towards the centre. A seedling of **Rainy Sun** originated by Richard Dodd, Marshallville, Georgia, USA.

Louise Strozzi. Jean Vervaene fils, 1864, Price List, No.17, p.7. William Bull Nursery Catalogue, 1869-1870; Verschaffelt Catalogue, 1869-1870. Orthographic variant for **Luiza Strozzi.**

Louise Tamponet. *(C.japonica)*, Berlèse, 1840, *Monographie*, ed.2, p.96: Obtained as a seedling by M. Tamponet, Paris, France. Leaves 10 cm x 7 cm, long, twisted, apex recurved, venation apparent, serrate, dark green. Bud, long, acuminate with green scales. Flower over 8 cm across, double, delicate, clear rose with the same shade as **Wilbrahamia.** Exterior petals in 3 rows, of average length, rounded notched, displayed without regularity. The centre petals are not numerous, longer than the first, but not so wide and fasciculate, some erect, some flat.

Louise van Dusen. *(C.japonica)*, ACS, *The Camellia Journal*, Sept. 2008, p.31 with colour photo, Regn No. 2743; 9 cm diameter x 4.5 cm deep, pink anemone form, with interspersed stamens of yellow anthers and white filaments. Dense, average growth. Flowers mid-season to late. Originated in 1995 as a chance seedling by Don Bergamini, Martinez, Calif., USA. *American Camellia Yearbook*, 2008, p.121 with colour photo; Dark green leaves are 9 cm .6.5 cm.

Louise Weick. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue, 1942-1943: Fiery red. Large semi-double with vigorous, compact growth. Originated in USA by Magnolia Gardens, South Carolina as a seedling of **Firebrand.** Sport: **Louise Weick Variegated.**

Louise Weick Variegated. *(C.japonica)*, Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.140, as 'Louise Weick Var.': A virus variegated form of **Louise Weick**. Fiery red blotched white. Originated in USA.

Louise Weiss. *(C.japonica)*, Woodroof, 1947, SCCS., *Bulletin*, 8(6):6. No description. Originated in USA.

Louise Wilson. *(C.japonica)*, Burncoose & Southdown Nursery Catalogue, 1980, p.16: Semi-double, creamy white. Originated in UK.

Louise Whiting. *(C.japonica)*, *American Camellia Yearbook*, 1979, pp.108, 109, Reg. No.1560: A very large, blush pink, peony form (some-times a thick semi-double), *C.japonica* chance seedling, that blooms mid-season. Originated in USA by Hugh Shackelford, Albany, Georgia. The 8 year old seedling first bloomed 1977. Average flower size, 14 cm across. Plant growth is dense and medium.

Louisiana Purchase. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue.* A large, magenta-red, incomplete double, 11-12.5 cm across. There are 3 rows of outer petals and 28-32 inner petals which curl upwards. The stamens are in 5 separate groups. Filaments are light yellow, anthers darker yellow. Leaves dark green, broad-ovate, 10.5 cm x 7 cm, indistinctly veined and finely serrate. Growth is compact and rapid. Originated by Mr & Mrs T.S. Clower, Gulfport, Mississippi, USA from seed of unknown parents. First bloomed 1951. Reg. No.143 with the ACS, 1954. See black and white photo, p.63, SCCS, 1954, *The Camellia. Its Culture and Nomenclature.* Sport: **Louisiana Purchase Variegated.**

Louisiana Purchase Variegated. *(C.japonica)*, Hillcrest Nursery Catalogue, 1958 as 'Louisiana Purchase Var.'. A virus variegated form of **Louisiana Purchase** - Magenta-red and white. Originated in USA.

Louisiana Red. *(C.japonica)*, SCCS, 1942, *Classification of Camellias*, p.2. Incomplete double red, 8 cm across. Early blooming. Originated in USA.

Love Boat. *(C.japonica), American Camellia Yearbook*, 1982, p.175, Reg. No.1791: A medium to large, light pink to white with vivid pink margins, semi-double to peony form, *C.japonica* (**Dr Tinsley** x **Debutante**), mid-season blooming. Originated by David L Feathers, Lafayette, California, USA. The 13 year old seedling first bloomed 1970. Average flower size 10 cm across x 7.5 cm deep with yellow anthers and white filaments. Plant growth is upright, dense and medium in rate with medium green leaves, 11 cm x 6 cm. See colour photo, back cover ACRS, 1981, *Camellia News*, No.79.

Love Letters. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.6. No description. *American Camellia Yearbook*, 1967, p.230, Reg. No.926: A 10 year old chance seedling that first bloomed 1957. Originated by Mr & Mrs H.E. Ashby, Bonneau, South Carolina, USA. The light green leaves average, 10 cm x 5.5 cm. The flower is a rose form double, similar to **Purity** ('Shiragiku'), and is 10-12 cm across x 5 cm deep. Colour is light pink. It has 5 rosettes of petals and stamens in the flower when fully developed. Blooms early to mid-season.

Love Song. *(C.japonica),* RHS, 1992, *Rhododenrons with Camellias and Magnolias*, No.44, p.81: Received March 1990. Medium sized, anemone form rose red (Red Group 52C with darker veinings of Red Group 52B). Raised by John T. Gallagher Verwood, Dorset, England.

Lovelight. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature*, p.65: White. Large, semi-double with heavy petals. Vigorous, upright growth. Mid-season blooming. *American Camellia Yearbook*, 1965, p.240, Reg. No.731: (SCCS.No.62-20) Originated by Harvey Short, Pasadena, California, USA. An 8 year old seedling that first bloomed 1959. A seedling of 'Lotus' (**Gauntlettii**). It is 13 cm across x 5 cm deep. See colour photo, front cover ACRS, 1987, *Camellia News*, No.103. Chinese synonym 'Aiqing Huohua'.

Loveliness. *(C.japonica),* McIlhenny, 1937, *600 Camellia Varieties*, p.3: Semi-double, rose-pink petals fringed Amaranth pink. Vigorous, upright growth. Mid-season flowering. Originated at Jungle Gardens, Avery Island, Louisiana, USA.

Lovely Bird. *(C.sasanqua),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.255: Pink bordered softer pink, single. Originated in USA.

Lovely Illusion. *(C.japonica),* Gerbing's Azalea Gardens Catalogue, 1941-1942: A new Camellia from Middleton Place (Middleton No.30). Semi-double, shell-pink flowers, measuring 8-10 cm across. The foliage is large, round and medium green. Growth tall. Late flowering. Originated Middleton Place, South Carolina, USA.

Lovely Lady. *(C.reticulata* hybr.), ACRS., 1981, *Camellia News*, No.79, p.28, Reg. No.263, colour photo, p.41: Originated by E.R. Sebire, Wandin North, Victoria, Australia as a chance seedling of *C.reticulata hybrid* **Pink Sparkle** that first bloomed 1979. It has an upright, dense growth habit with 12 cm x 5 cm dark green, lanceolate leaves with tapering base and fine serrations. The 12 cm diameter, soft pink flowers have a slight salmon cast, about 70 petals with a ruffled appearance. Flowers formal double mid-season. Chinese synonym: 'Baobei Furen'.

Lovely Rosa. Del Lungo & Girardi, 1928, *Le Camelie*, p.118. Orthographic error for **Lovely Rose.**

Lovely Rose. *(C.japonica),* Jacob Makoy et Cie Nursery Catalogue, 1839, p.17. No description. van Houtte Catalogue, 1839, 1:5. No description. Van Houtte Catalogue, 1844-1845, 18:14: Peony form, carmine violet. Charles van Geert Catalogue, No.10, 1847, p.11: Rose form, soft salmon red. Synonym: 'Carrea'. Orthographic errors: 'Lowely Rose', 'Lovely Rosa', 'Lovely Rosea', 'Lovvely Rose', 'Lowly Rose'.

Lovely Rosea. Longone Catalogue, 1846. Orthographic error for **Lovely Rose.**

Lover Boy. *(C.japonica), American Camellia Yearbook*, 1977, p.215, Reg. No.1435: A very large, deep red to red, semi-double. An 8 year old chance seedling *C.japonica* that first bloomed 1972.

Originated in USA by Neal Rogers of Belle Fontaine Nursery, Theodore, Alabama. Plant habit is upright, open and rapid in rate with medium dark green leaves, 10 cm x 5 cm. The flower has 20-25 petals, bright yellow anthers and pink filaments. Average size, 15 cm across x 7.5 cm deep. Petals well creped at edges. Blooms early to mid-season.

Lover's Seedling. *(C.japonica)*, SCCS., 1955, *The Camellia Review*, 4:13. No description. Originated in USA.

Lucie Lanham. *(C.japonica),* SCCS., 1960, *Camellia Nomenclature*, p.74: Light pink. Large semi-double to anemone form. Slow, spreading growth. Mid-season to late flowering. Originated in USA by Ashby.

Lucie Schwoerer. *(C.japonica), American Camellia Yearbook*, 1960, p.201, Reg. No.456: A 15 year old chance seedling of 'Princess Baciocchi', (**Princesse Baciocchi**), originated by Mr Schwoerer and C.W. Lattin, San Francisco, California, USA. Plant growth is dense in habit with dark green leaves, 11 cm x 6 cm. The rose coloured flowers, 10-12.5 cm across x 4-6 cm deep, are peony to anemone form, sometimes semi-double, with a rose-bud centre, similar to **Kumasaka,** outer petals flat; centre composed of numerous petaloids and stamens with a few convoluted petals. Flowers mid-season to late. Plant patent No.1852.

Lucie Turner. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.141. No description. Originated in the USA. No valid listing located.

Lucile Dickson. *(C.japonica),* ACS, *The Camellia Journal,* June 2005, p.8, colour photo p.9 as 'Lucille Dickson', Reg. No. 2640. A chance seedling that first flowered 1995. Originated by James D. Dickson, North Augusta, S.C., USA. The 9 cm diameter semi-double flower has a tubular centre of yellow anthers and white filaments with a pink cast. The photo shows uniformly reflexed petals. *American Camellia Yearbook,* 2005, P.43, colour photo p.C6. Plant is upright and dense, with average growth rate. Dark green leaves are 8.2 cm x 4.5 cm.

Lucile Morris. *(C.japonica),* Cecil Morris, 1954, *American Camellia Yearbook*, p.115: "Our second seedling is named for my wife, Lucile Morris (see Fig.31). It is an incomplete double, red, and the flowers appear late in the season. It was given an Award of Merit at the Greenville

Camellia Show". Originated in USA by Cecil Morris, Greenville, South Carolina. Orthographic error: 'Lucille Morris'.

Lucille Chapell. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues.* p.141. No description. Originated in USA. No valid listing located.

Lucille Davis. *(C.japonica), American Camellia Yearbook,* 1966, p.94, Reg. No. 843: This large white Camellia is a 10 year old chance seedling of **Elizabeth Boardman** that first bloomed 1959. Originated by D.W. Davis, Seffner, Florida, USA. The flower is pure white with yellow anthers and white filaments, 13 cm across x 7.5 cm deep with 30 petals and 25 petaloids. Flowers mid-season. Plant growth is upright with mid-green leaves, 10 cm x 5 cm.

Lucille Farrell. RHS., 1962, *Rhododendron and Camellia Yearbook,* No.16, p.118. Orthographic error for 'Lucille Ferrell', synonym for **C.M. Wilson.**

Lucille Ferrell. SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* Synonym for **C.M. Wilson.** Orthographic error: 'Lucille Farrell'.

Lucille Flanagan. *(C.japonica),* Fruitland Nursery Catalogue, 1948-1949, p.30: Red. Very large, semi-double with trumpet form petaloids. Mid-season flowering. Fendig, 1952, *American Camellia Catalogue:* A large, dark strawberry red, incomplete double, 11-13 cm across x 3.8 cm deep. The petaloids replacing stamens, form a trumpet, not unlike a daffodil. Filaments pink, anthers brownish yellow, petals stand apart veined dark red. Leaves dark green, lanceolate, 8 cm x 3.2 cm. Tip slim, twists and curls, averages 15 serrations to inch, texture stiff, bends upward from the centre vein. Vigorous and extremely hardy. Originated by Mrs A.J. Tennant, Houston, Texas, USA as a seedling of 'Donckelaeri' (**Masayoshi**). For black and white photo see p.210, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II. Orthographic error: 'Lucille Flannagan'.

Lucille Flannagan. *American Camellia Yearbook,* 1949 index p.248. Orthographic error for **Lucille Flanagan.**

Lucille Harkey. *(C.reticulata* hybr.), *American Camellia Yearbook,* 1980, p.169, Reg. No.1676: Very large, dark pink, semi-double, *C.reticulata* hybrid, (['Cornelian' (**Damanao**) x **Brigadoon**] x 'Crimson Robe' (**Dataohong**)), raised by Frank Pursel, Oakland, California, USA. The 5 year old seedling first bloomed 1979. Average flower size, 15 cm across x 7.5 cm deep with yellow anthers. Plant growth is upright and medium in rate with dark green leaves, 11 cm long x 6 cm wide.

Lucille Jackson Harris. *(C.japonica), American Camellia Yearbook,* 1970, p.166, Reg. No.1108: A 9 year old chance seedling that first bloomed 1965, originated by J.M. Haynie, Theodore, Alabama, USA. Plant growth is upright, average and open with dark green heavily textured leaves, 10 cm x 6 cm. The semi-double to anemone type flower averages 11 cm across x 7 cm deep with 12-20 petals and up to 75 petaloids. Colour is white with a blush tint - one or more of the outer petals with as much as one half light pink - other flowers with no pink markings. Some flowers lay flat with a cluster of stamens and petaloids intermingled. Firm, velvety texture. Blooms mid-season.

Lucille Jernigan. *(C.japonica),* SCCS 1993, *Camellia Nomenclature,* p.70: White, large size, loose peony to anemone form with vigorous, upright growth. Blooms mid-season to late. Originated by Marvin Jernigan, Warner Robins, Georgia, USA.

Lucille Smith. *(C.japonica), American Camellia Yearbook,* 1972, p.132, Reg. No.1180: An 8 year old chance japonica seedling that first bloomed 1967. Originated by Fred H. Smith, Statesboro, Georgia, USA. Plant growth is upright and medium in rate with dark green leaves. The anemone form bloom is white, with some red stripes, 190 petaloids, 11 cm across. Blooms midseason.

Lucina Plena. *(C.japonica),* Berlèse, 1840, *Monographie*, ed.2, pp.81, 225: Leaves 8 cm x 5.4 cm, oval, apex narrowing to somewhat acuminate, coarsely serrate, clear green. Bud large, obtuse, scales blackish at base, yellowish green at tip. Flowers average 8 cm across, full and white; the centre only has a light wash of clear yellow. Petals are wide, imbricated, regular, deeply notched. Two or three dots of red hardly perceptible, are displayed on 2 or 3 petals. de Jonghe, 1851, *Traité de la Culture du Camélia,* p.95, as 'Alba Plena Lucina'. The true sort from Milan, of Italian origin. Synonym: 'Alba Lucina'.

Lucinda. *(C.sasanqua),* ANZCRS., 1957, *Camellia Annual*, No.4, p.8, Reg. No.27: A sasanqua seedling raised by Dr. Ducker, Lindfield, N.S.W., Australia. Pink bloom with petaloid centre, over 7.5 cm across. Very early flowering. Parentage unknown. Chinese synonyms: 'Lusainuo', 'Lusenda'.

Lucinda Alba. *(C.sasanqua).* Dancraft Nurseries Catalogue, Wilberforce, NSW, Australia, 1997, p.2: A medium size, white, semi-double sport of **Lucinda** on a tall, bushy, spreading plant. Note: the name is illegal according to the Nomenclature Code, which now bars Latin for use in cultivar names.

Large, white semi-double flower is 11.5 to 12.7 cm diameter and 5 to 6.5 cm deep and has 12 creped petals. Central column of stamens with yellow anthers. Upright, open spreading growth at average rate. Mid-green leaves are 10.8 cm x 4.5 cm. Flowers very early to midseason. ACS Journal, June 2012, p.30 with colour photo; Regn No. given as 2818.

Lucy Rooney. *(C.japonica), American Camellia Yearbook*, 1954, p.321, Reg. No.199: A 10 year old chance seedling, originated by Filo H. Turner, Pensacola, Florida, USA. First flowered 1951. Plant growth is open and slow with dark green leaves, oval, tapering acute and slightly serrate. Flower, incomplete double with mixed petaloids, similar to **Nobilissima,** 10-12 cm across. Colour creamy white, peppered and streaked Tyrian pink, appearing almost light pink. Flowers mid-season. (Turner's No.17).

Lucy Shirah Variegated. *(C.japonica),* ACS, *The Camellia Journal,* June 2005, p.8 as 'Lucy Shirah, Var', colour photo p.9, Reg. No.2641. A chance seedling that first flowered 1982. Originated by John W. Shirah, Lakeland Fla, USA, and propagated by Shirah's Camellia Nursery. The 10 cm formal double flower is pink with white variegation. Falls in one piece. Flowers early to mid-season. *American Camellia Yearbook,* 2005, p.44, colour photo p.C6. Plant is upright with vigorous growth rate. Dark green leaves are 8.2 cm x 3.8 cm.

Lucy Stewart. *(C.japonica), American Camellia Yearbook*, 1973, p.193, Reg. No.1227: An 8 year old chance seedling that first bloomed 1968. Originated by J.M. Haynie, Theodore, Alabama, USA. Plant growth is upright and medium in rate and open with dark green leaves, 11 cm x 5.5 cm. The loose, peony form flower is 11 cm across x 7.5 cm deep. The colour is white, form graduating from large, outside petals to small petals in the centre, white filaments and yellow anthers intermingled with petals. Blooms mid-season to late. Chinese synonym: 'Yubai Luxi'.

Lucy Strike. ACS 1993, *The Camellia Journal,* vol.48, No.4, p.32. Valdosta Camellia Scions, advt. Orthographic error for **Lucky Strike.**

Lucy Turner. *(C.japonica),* Stowe, 1951, *American Camellia Yearbook*, p.281: "The **Lucy Turner** named for Mr Turner's Daughter, will be much sought after. It is an irregular double white, measuring 10 cm across x 8 cm high. Blooms early to mid-season." Fendig, 1952, *American Camellia Catalogue:* Medium to large, white with pink variegation, irregular double (peony form), 8-10 cm across x 5 cm deep. The colour is white with a pale pink tint and a rare pink stripe on some petals. The petals are round and 3.8 cm in diameter. The few stamens are hidden by the petals, filaments and anthers white. Bud round and light green. Leaves mid-green, broadly oval to round, 8 cm x 5.5 cm. The apex is short, base tapered, veins ridged, serrations shallow and average. Originated in USA by Turner, Pensacola, Florida. First bloomed 1949. Reg. No.201 with ACS, 1954. (Turner seedling No.33).

Ludai Kona. (Green Ribbon Kona). *(C.japonica),* Gao Jiyin, 1996, *The Observations from the Camellia World,* back page, CR6: A sport of **Kona**, originated by Mr Lou Xianna, Hangzhou, Zheijiang, China in 1990. Light green, edged darker, fimbriated and twisted petals, very large, 12 cm across x 9 cm deep, peony form. Thick leaves, young leaves with red stripes. Slow growth, dwarf, compact. Late blooming.

Luteo-variegata. Joshua Condor, 1893, *Landscape Gardening in Japan*, p.117. Synonym for **Kifukurin-benten.**

Lutescens Leonardi. *(C.japonica)*, van Houtte Catalogue, 1849-1850, 38: 45: Straw coloured. Orthographic error 'Lucescens Leonardi'. (Believed extinct.)

Lutetiana. Berlèse, 1837, *Monographie* ed.1, p.63. 'Spectalilis', obtained from seed in Paris, has long been called 'Celesiana'. English gardeners have sent it to us under the name 'Spectalilis'; in Paris it is also known under the name 'Lutetiana'.

Lutiana. Berlèse, 1843, *Iconographie*, pl.143. Synonym for **Jussieua** as 'Jussieuana'.

Luua. Rollison, 1877-1878, *Plant Catalogue*. Orthographic error for 'Luna', pseudonym for **Sacco Nova.**

Luxin Jinban Lizhi. Gao & Zhuang, 1989, *The Camellia in China*, p.38, No.187. Orthographic error for **Luxin Jinpan Lizhi.**

Luxin Jinpan Lizhi. (Lichees uncovered on Gold Tray), *(C.japonica)*, Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.60, coloured photo, [p.136]: Medium size, anemone form, red with 6-7 outer guard petals, lobed, rounded, surrounding a centre, compact, spherically shaped, of small red, folded petaloids, sometimes with gold anthers in the centre. Leaves ovate, mid-green, apices acuminate, margins serrulate. Orthographic error: 'Luxin Jinban Lizhi'. Originated in China.

Luxor. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1962, p.6. No description. Originated in USA. No valid listing located.

Luy Van. *(C.x williamsii)*, Blackburn Nursery Catalogue, 1986-1987: Red. Originated in England.

Lüzhuqiu. (Beryl Ball), *(C.japonica)*, Wang & Yu, 1981, *Shanchahua:* Greenish white, rose form double. Synonym: 'Beryl Ball'. Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.75: Leaves deep green, glossy, elliptic, 8.5-9.5 cm long x 4.6-4.8 cm wide, thick, margins slightly recurved, sparsely, shallowly, obscurely serrate, midrib prominent, venation obscure. Flowers sparse, pale green, 8-9 cm across, 25-30 petals in 4 rows, slightly crisped on the margin; more than 100 stamens crowded together like a green ball. Pistil degenerate. Originated in Hangzhou, China. 1964. Difficult to propagate by cuttings.

Lydia Adams. *(C.japonica)*, *American Camellia Yearbook*, 1961, p.226, Reg. No.566: A 9 year old chance seedling that first bloomed 1958; originated by Ben Marshall, Mobile, Alabama, USA. Plant growth is upright and rapid in rate with dark green leaves, 5 cm long x 3.8 cm wide. The peony form, soft pink flowers with white stamens, are 11 cm across x 6 cm deep with 35 petals and 5 petaloids. Blooms early to mid-season.

Lynda's Own. *(C.japonica),* ACRS, *Camellia News*, 1995, No.135, p.12, Reg. No.448: Originated by Kenneth Brown, Mitcham, Victoria, Australia. A chance seedling of *C.japonica* **Jessie Burgess.** First flowered 1989. A pink (RHS.CC.62A), anemone form of 13 petals and petaloids, 8 cm across x 4.5 cm deep. Flowers freely mid-season to late on an average growing, bushy plant. Leaves olive-green, glossy, ovate, flat, margins crenulated, apices acuminate, 9 cm long x 5 cm wide. Petals notched, opening flat. Filaments mixed with petaloids. Flowers shed whole.

Lyndleia. Anon. 1830, "Ueber die Cultur der Kamellien" in *Der Blumen Gaertner*, p.52. Orthographic error for **Lindlei.**

Lynette Hooper. *(C.reticulata x C.japonica),* ACRS., 1981, *Camellia News*, No.79, p.28, Reg. No.274: Originated by G.W. Hooper, Bexley North, N.S.W., Australia from *C.reticulata* 'Cornelian' (**Damanao**) x *C.japonica* **Ville de Nantes.** It first flowered 1977 as a 5 year old plant. A spreading, dense shrub with 10 cm x 5 cm, broad-elliptic, leathery, mid-green leaves. The large semidouble to peony, 14 cm wide, deep red, shading to black at petal edge, flowers. Blooms mid-season. Sport: **Lynette Hooper Variegated.**

Lynette Hooper Variegated. *(C.reticulata),* Valdosta Camellias, ACS., Nov.1990, *The Camellia Journal*, vol.46, No.4, p.22: A virus variegated form of **Lynette Hooper** - Deep red blotched white. Originated in USA.

Lynkii. Berlèse, 1845, *Monographie*, ed.3, p.286. Orthographic error for 'Linkii' (**Kingii**).

Lynn Hairston. *(C.japonica)* ACS, *The Camellia Journal*, Sept. 2012, p.26; Regn No.2825; Regd by Mrs Louise Poe Hairston, Birmingham, Ala. ACS, *Yearbook* 2012, p.177 with colour photo; Six year old chance seedling, first flowered 2008. A medium size, 9cm x 5cm flower, light pink in centre shading to dark pink or red at edges. Outer petals wavy, and photo shows pointed petals; Mid-green leaves are 9.5cm x 3.2cm. Upright, open growth at average rate. Flowers midseason.

Lynn Marie. *(C.japonica), American Camellia Yearbook,* 1959, p.277, Reg. No.420:- A 7 year old seedling of White Giant, originated by Harold Larson, Orange, California, USA, that first flowered 1958. Plant growth is dense, upright and medium in rate with dark green leaves, 11 cm x 7.5 cm. The peony form flowers are blush to rose-pink, 8 cm across x 5 cm deep with 60 petals. Flowers mid-season.

Lynne Woodroof. *(C.japonica),* McCaskill Gardens Newest Camellias, 1957; Wylam, 1957, *American Camellia Yearbook*, p.25: An upright, vigorous, bushy grower with anemone form flowers. The sheer petals of blush, tinged lavender pink, have a delicate appearance. Originated in USA by Reg Ragland, California. Mid-season flowering.

Lysanta. Franchetti, 1855, *Collezione di Camelie*, p.42. Orthographic error for **Lysantha.**

Lysantha. *(C.japonica),* Herbert, 1837, *Amaryllidaceae & Suppl.*, p.376: From the single white (**Alba Simplex**) from the pollen of **Pompone...**the flowers, if possible, are more regular than the 'Buff' (**Incarnata**) or old double white (**Alba Plena**), red with a watery line and margin to each petal. Anonymous, Apr.1843, *Gardeners' Chronicle*, p.243: New camellia. We have received from the Dean of Manchester [Dr. Herbert], under the name camellia **Lysantha,** a seedling raised at Spofforth. Its maternal parent was a seedling from the old single red

(**Rubra**), ferlilized with the common striped camellia (**Variegata**) and was itself crossed with the myrtle-leaved variety (**Myrtifolia**). The colour is bright carmine with stripes of pale pink running down the centre of each petal. The outer petals are rounded and, when the flower is half open, are beautifully cupped; when fully expanded however, they fall back in the same manner as the old double white. The inner petals are somewhat pointed but fill up well in the centre. Synonym: 'Lysimachus'. Orthographic error, 'Lysanthe', 'Lysanta'.

Berlèse, 1837, *Monographie*, ed.1, p.128: There are offered for sale several varieties of Camellias under this name; the oldest has a single flower of little merit; the second has beautiful foliage and a little, insignificant semi-double flower; the third resembles **Humboldtiana** and the last, which I consider the true one, has leaves 13 cm. long x 10 cm wide, ovate, prominent venation and a beautiful green. The flowers are very well formed, cherry red with broad, rounded petals; those at the centre, rumpled, distorted and spirally arranged with some short stamens showing. Flower is about 8 cm in diameter. Note: This name has been used for forms of different camellia species such as *C.saluenensis* f. *macrophylla*, *C.sinensis* f. *macrophylla*, and *C.chrysantha* var. *macrophylla.* These have no relationship to the *C.japonica* cultivar above which originated in Italy. Sealy, 1937, *Botanical Magazine* named a form of *C.saluenensis* f. *macrophilla,* but later established that it was the cultivar **St Ewe.** See p.185, Sealy's *A Revision of the Genus Camellia,* 1958.

Macrophylla. *(C.saluenensis),* SCCS., 1962, *Camellia Nomenclature*, p.113. Erroneous synonym for **St Ewe.**

Macula Perfecta. Chidamian, 1959, *Camellias for Everyone.* Orthographic error for **Maculata Perfecta.**

Maculada Perfecta. Loureiro Catalogue, No.9, 1872-1873. Orthographic variant for **Maculata Perfecta.**

Maculata. *(C.japonica),* Prince, 1823, Catalogue, p.99: This has leaves spotted or blotched with white and double white flowers. Originated in USA by Fraser. Synonyms: 'Maculata de Fraser', 'Maculata de Frezer', 'Blotched Leaves', 'Maculata de Frazer'.

Maculata Alba Superba. *(C.japonica),* Auguste van Geert Nursery Catalogue, 1845: Peony form, white. Originated in Belgium. (Believed extinct.)

Maculata de Fraser. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Synonym for **Maculata.**

Maculata de Frazer. Verschaffelt, 1844-1845, Catalogue No.50, p.26. Synonym for **Maculata.**

Maculata de Frezer. Seidel, 1846, Pflanzen Catalog, p.9. Orthographic error for 'Maculata de Fraser', synonym for **Maculata.**

Maculata Grandiflora. Jacob Makoy et Cie Catalogue, 1839, p.17. Synonym for **Sweetiana.**

Maculata Perfecta. *(C.japonica),* Verschaffelt, 1849, *Nouvelle Iconographie*, Book VIII, pl.I: By the arrangement of its numerous, erect and imbricated petals, it resembles a large, hundred petalled rose; to this is added a pink colour, streaked a pure white. At the centre it has upright, serried petals and it measures 12 cm or more in diameter. Mercatelli Catalogue, 1881: Imbricated flower, sometimes silky rose with white stripes, sometimes white with red streaks, sometimes striped and marbled. It was originated in 1846 by M. Ch. De Loose of Ghent, Belgium as a sport of **Cruciata.** In 1849 van Houtte published the name 'Cruciata Nova, de Pronay' as a synonym. Other synonyms: 'Cruciata Panaché', 'Maculata Perfecta'(de Loose), 'Varische Vera'. Orthographic errors: 'Maculata Perfetta', 'Maculada Perfecta', 'Macula Perfecta', 'Manculata Perfecta'. Van Houtte Catalogue, 1859, 77:53 gives this variety as a synonym for 'Contessa de Spauri' (as 'Spaur') but this is rejected as the evidence is not conclusive.

Maculata Perfetta. Scarlatti Catalogue, 1891-1892. Orthographic variant for **Maculata Perfecta.**

Maculata Superba. *(C.japonica),* van Houtte Catalogue, 1839, 15. No description. Berlèse, 1840, *Monographie,* ed.2, pp.204, 235: Buds, very large, obtuse, scales green; flower over 9 cm. across, full, whitish rose with longitudinal streaks of deep cherry-red at the centre of the

petals. A formal double similar to 'Punctata Major'. Originated in England. See colour pl.142, Berlèse, 1843, *Iconographie.*

Maculosa. *(C.japonica)*, Verschaffelt, 1860, *Nouvelle Iconographie*, Book XI, pl.I: This variety resembles a large, hybrid remontant rose. Its ample petals, the exterior rounded, those interior lanceolate-acute are spirally inserted but grouped regularly. The colouring is cherry-crimson, liberally streaked with white, with sometimes the white predominating. Originated in the USA and not connected with the Herbert 'Maculosa', a synonym for **Calypso.**

Maculosa. Herbert, 1837, *Amaryllidaceae & Suppl.*, p.367. Synonym for **Calypso.**

Macye Justice. *(C.japonica), American Camellia Yearbook*, 1965, p.240, Reg. No.673: A 6 year old chance seedling that first bloomed 1960; originated by the Justice Nursery, Fitzgerald, Georgia, USA. Growth is upright, dense and medium in rate with medium, light green leaves, 8 cm x 3 cm. The anemone form flower is 12.5 cm across x 7 cm deep with 13 deep, velvet red petals and multiple, rose coloured petaloids, variegated white. Stamens have white filaments and yellow anthers. Flowers mid-season.

Madame Cachet. *(C.japonica)*, Lemaire, ed., 1872, *L'Illustration Horticole*, vol.19, p.241, pl.103 as 'Mme Cachet': A good shaped bush with average sized leaves, acute apex, serrate, thick, flat and strong, and of a good colour. The flowers are large with the petals regularly imbricated, orbicular with a notched apex. The colour is white with a transparent flesh tint, some petals touched with fine stripes of deep pink. This variety was originated from seed by M. A. Cachet of Angers, France. Abbreviations: 'Mad. Cachet', 'Mme Cachet'. Orthographic errors: 'Mme Cochet', 'Mad. Cochet', 'M.de Cachet', 'Souv. Madame Cochet'. Orthographic variant: 'Madam Cachet', 'Madame Cacket'. Sport: **Madame P. de Pannemaeker.** The cultivar described in SCCS., *Camellia Nomenclature* and *The Camellia. Its Culture and Nomenclature* from 1947 and on, is not the valid variety, as it is a semi-double, not a formal double as shown in all early illustrations. This would seem to have originated with McIlhenny's release of an erroneous variety as listed in *600 Varieties of Camellias*, 1937.

Madame Cachet (US). *(C.japonica),* SCCS., 1947, *The Camellia. Its Culture and Nomenclature* erroneously as 'Mme. Cachet': White to flesh with some petals spotted or striped pink. Medium, semi-double. Medium, open growth. Mid-season blooming. McIlhenny's description, 1937: Semi-double, white with lemon cast at base.

Madame de Maintenon. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'Madame Maintenon', renamed 'Madame de Maintenon' in 1945 catalogue and on: Large, cup-shaped, light pink, semi-double, 11 cm across, with a few white blotches. There are 4 rows of petals. Centre petals form a cup with several groups of stamens, filaments white, anthers yellow. Leaves mid-green, finely serrate, 7 cm x 3.8 cm. Originated in the USA at Magnolia Gardens, South Carolina. Orthographic variants: 'Madame Maintenon', 'Madam Maintenon'. Abbreviation; 'Mme de Maintenon'. For black and white photo see; Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III, p.156. For another form see **Madame de Maintenon Variegated.**

Madame de Maintenon Variegated. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1950-1951 as 'Mme de Maintenon Var.': A virus variegated form of **Madame de Maintenon** - Light pink blotched white. Originated at Magnolia Gardens, South Carolina.

Madame de Rambuteau. *(C.japonica),* Anonymous, 1843, *Revue Horticole,* p.376-378, no description; Schweidweiler ed., 1843, *Journal d'Horticulture Pratique Belge*, as 'Mme de Rambuteau': Very large, white, double, the petals of the circumference, very large, round, while those of the centre are elegantly contorted. Scheidweiler, Brussells, 1843, *Journal d'Horticulture Pratique*, p.122: Flower more than 10 cm across, rounded, double, snow-white. Petals in 7-8 rows, broad, elongated, some indented, others entire. almost all dotted with red, The first 4 rows horizontal, the others broad, indented, twisted, segmented, forming a protruding corolla of a certain regularity. Synonym: 'Comtesse de Rambuteau'. Abbreviation: 'Mme de Rambuteau'. Originated in France by M. Tamponet, Paris.

Madame de Saumarez. Lenten, 1964, *Gardeners' Chronicle*, p.447 as 'Mme de Saumarez', synonym for **Lady de Saumarez.**

Madame de Sèvignè. *(C.japonica),* Franchetti, 1855, *Collezione de Camellia*, p.42: Flesh coloured, all spotted and lined with carmine. Imbricated. Verschaffelt, 1855, *Nouvelle Iconographie*, Book IX, pl.I: It is conspicuous amongst the perfections by its quite convex bloom formed of numerous petals, unusually convex, rounded, almost all equal, very regularly imbricated, all

of a vivid pink. The foliage is small. It is believed to be an Italian variety in spite of its French name.

Madame de Strakeloff. Volonte Catalogue, 1888 as 'Mad. de Strakeloff'. Orthographic error for **Madame de Strekaloff .**

Madame de Strechhaloff. Contini & Nava Catalogue, 1900. Orthographic error for **Madame de Strekaloff.**

Madame de Streckaloff. Contini & Nava Catalogue, 1915. Orthographic error for **Madame de Strekaloff.**

Madame de Streekaloff. Scarlatti Catalogue, 1891-1892. Orthographic error for **Madame de Strekaloff.**

Madame de Strekaloff. *(C.japonica)*, Luzzatti Catalogue, 1853. No description. Franchetti, 1855, *Collezione di Camelie*, p.42: Admirable flower, bright, soft pink, the margins of the petals veined a more vivid pink; many slender, white lines cover the flower, with wide, yellowish white stripes on the central petals; imbricated. Verschaffelt, 1855, *Nouvelle Iconographie*, Book VIII, pl.III: We obtained this camellia from Italy. The arrangement of its petals with the exterior rows regularly imbricated, and the central rows irregular. The central petals are very small and imbricated, but differ to the exterior due to the spiral insertion of the intermediate petals. A delicate pink colouring is variegated by white stripes. Abbreviations: 'Mad. de Strekaloff', 'Madame Strekaloff', 'Mme de Strekaloff'. Orthographic errors: 'Madame de Strakeloff', 'Madame de Streekaloff', 'Madame de Streckaloff', 'Madame Strekaleff', 'Madame Strakaloff', 'Madame Stretakoff', 'Madame de Strakeloff', 'Madame Detr. Sekaloff'. Synonym: 'Madame de Strekaloff Variegated'. Sport: **Madame de Strekaloff, Deep Pink.**

Madame de Strekaloff, Deep Pink. *(C.japonica)*, Vanderbilt, 1941, *Camellia Research, II*, p.4 as 'Madam de Strek. Deep Pink'. A deep pink sport of **Madame de Strekaloff** . Originated in USA.

Madame de Strekaloff Variegated. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Madame de Strekaloff .**

Madame de Vatry. *(C.japonica)*, Scheidweiler, ed., 1843-1844, *Journal d'Horticulture Pratique*, p.123 as 'Mme de Vatry.': Almost 10 cm in diameter, full, white base with pink tints and a few red lines or stripes. Outer petals in 5 rows, ovate, rounded, indented, widely imbricated, central petals yellow, numerous, incomplete and intermixed with the stamens, tending to a peony form. Anonymous, Aug. 1843, *Revue Horticole*, p.376-378. Grown from seed by M. Tamponet, Paris, France. Berlèse, 1845, *Monographie*, ed.3, p.288: Leaves 9 cm long x 6 cm wide, acuminate, horizontal, venation of average prominence, finely serrulate, deep green; bud oblong, solid, scales greenish. Flower nearly 10 cm, in diameter, full, rose form, of a soft white with reflections of rose, and sometimes streaks or red rays, rare and small marks; outer petals in 4-5 rows, round-ovate, notched and imbricated, standing apart; centre straw yellow, incomplete petals in groups with stamens intermingled; corolla round with a tendency to develop into a peony form. Abbreviation: 'Mme de Vatry'.

Madame Debois. van den Heede, May. 1882, *Revue Horticole*, p.196. Orthographic error for **Madame Lebois.**

Madame Detr. Sekaloff. Tregrehan Camellia Nursery, 1970 as 'Mme. Detr. Sekaloff'. Orthographic error for **Madame de Strekaloff.**

Madame Dickers. *(C.japonica)*, Peer, 1956, *American Camellia Yearbook*, p.55. No descripton.

Madame Domage. *(C.japonica)*, Verschaffelt, 1859, *Nouvelle Iconographie*, Book XII, pI.I: It was obtained from seed in Italy from where was received by M. Miellez of Lille, France. Its form

is that of a rose of perfect regularity, composed of numerous, rounded, imbricated petals with upturned edges of paler pink than the uniform, vivid pink of the background. Abbreviation: 'Mme Domage', 'Mad. Domage'.

Madame Dombrain. Hovey, ed., 1867, *Magazine of Horticulture.* Orthographic variant for **Mrs Dombrain.**

Madame Dora. *(C.japonica),* Giles & Son Nursery Catalogue, 1881, p.91 as 'Madam Dora'. No description. Originated in Australia. (Believed extinct.)

Madame Drouard Gouillon. G.D. Bahuaud Catalogue, ca.1935. Synonym for **Marguerite Gouillon.**

Madame Du Bois. Champernowne Catalogue, 1972-1973. Orthographic error for **Madame Lebois.**

Madame Dumoustier. *(C.japonica),* Bruneau Catalogue, 1858. No description. Originated in Nantes, France. (Believed extinct.)

Madame Elisa Centurioni. *(C.japonica),* Van Geert Nursery Catalogue, No.105, 1848, p.113. Ibid, No.117, 1850, p.6 as 'Elisa Centurioni Marquess': Imbricated. Pure white, variegated blood red. Luzzatti, 1851, *Collezione di Camelie*, p.16 as 'Eliza Centurioni': Large size flower, white with some splashes of blood red, imbricated. Verschaffelt, 1853, *Nouvelle Iconographie*, Book XI, pl.II. The arrangement of its blooms in spiral, concentric lines, which are regularly imbricated, compact, small rounded and deeply emarginate. A pure white colouring, tinged a delicate pink at the centre with a few scarse spots of the same shade, medium size, formal double. Orthographic errors: 'Elira Centurioni', 'Elisa Centuriana', 'Elisa Centurion'. Abbreviations: 'Mme Elisa Centurioni', 'Elisa Centurioni', 'EIiza Centurioni'. Orthographic variant 'Marchesa Elisa Centurioni'. Sport: **Docteur Boisduval.** Originated by Borsone, Genova, Italy. André Leroy, 1873, *Catalogue. Des arbres, frutiers et d'ornement.*

Madame Faucillon. *(C.japonica),* Lindo Nursery Price List, 1940-1941 as 'Madam Faucilon'. No description. Valley Garden Supplies Catalogue, 1946-1947: Light rose-pink, sometimes spotted white. Medium, full, symmetrical double. Vigorous, loose, upright growth. Medium, dark green foliage. Mid-season blooming. Abbreviation: 'Madam Faucillon'. Orthographic error: 'Madame Francillon'. Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II, p.52 gives this as a synonym for Caleb Cope but it appears to be rather the variegated form. Originated in USA.

Madame Félicie. *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1845. Imbricated pink, marbled and variegated white. Orthographic error 'Madame Feliere. Originated in Italy.

Madame Feliere. Burdin Maggiore & Co. Catalogue, 1845. Orthographic error for **Madame Félicie.**

Madame Feter. Prudente Besson Catalogue, 1860. Orthographic error for **Mrs Fetters.**

Madame Feters. Catalogo della Stablimento Agrario-Botanico de Castagnola e Casabono, 1867-1868. McIlhenny, 1935, *List of Camellias for Sale*, p.9. Orthographic error for **Mrs Fetters.**

Madame Fetters. van Houtte Catalogue, 1846-1847, 27:27. Orthographic variant for **Mrs Fetters.**

Madame Francillon. Fendig, 1953, *American Camellia* Catalogue..Synonym for **Madame Faucillon.**

Madame Garland. *(C.japonica),* Linden Catalogue, No.94, 1875 as 'Mme. Garland'. No description. Originated in France. (Believed extinct.)

Madame Gouillion. E.B. Campernowne Catalogue, 1979, p.2. Orthographic error for **Marguerite Gouillon.**

Madame Grisi. *(C.japonica)*, Cachet Catalogue, 1840-1841, p.3. No description. Originated in Italy. (Believed extinct.)

Madame Guichard. Vanderbilt, 1940, *Camellia Research*, p.5. Abbreviation for **Madame Appoline Guichard.**

Madame Haas. *(C.japonica)*, Menoreau Nursery Catalogue, 1890: Formal double, light red, veined deeper, occasionally marked light pink in the centre. Vigorous, upright growth. Leaves dark, glossy green, 8 cm x 5 cm, apex acuminate, coarsely serrate. Originated in France by E. Haas in 1879. Black and white photo, p.247, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.1. Colour photo facing p.114, 1954, *American Camellia Yearbook.* Abbreviations: 'Madam Haas', 'Mme. Haas'. Synonym: 'Mrs Haas'.

Madame Hahn. *(C.japonica)*, SCCS., 1945, *Camellias*, p.15 as 'Mme. Hahn': Rose-pink, semi-double. Mid-season blooming. Magnolia Gardens and Nursery Catalogue, 1948-1949: Large cup--shaped, bright pink mottled white, with petaloids. Vigorous, upright growth. Believed to have come from Japan to the Star Nursery, California about 1915. See black and white photo, p.246, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I. Sport: **Sierra Spring.**

Madame Hahn Variegated. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.31 as 'Mme. Hahn Var.'. Synonym for **Sierra Spring.**

Madame Harrison. van Houtte Catalogue, 1844-1845, 18:14 as 'Madame Harrisson': Enormous, white flower. Berlèse, 1849, *Annales de la Société d'Horticulture de Paris*, 40:309: Peony form. 10-11 cm across, milk-white around the circumference. The outer petals few in number, broad, loosely imbricated, notched. Those are, at the centre, of various shapes, numerous, intermixed with stamens which give the interior a yellow cast. Originated by Harrison, USA. Orthographic error: 'Madame Harrisson'. Abbreviation: 'Mde. Harrison'.

Madame Harrisson. van Houtte Catalogue, 1844-1845, 18:14. Orthographic error for **Madame Harrison.**

Madame Henri Bahuaud. *(C.japonica)*, Jean Laborey, 1986, *Les Camellia*, p.53 in a list of plants cultivated by M. Bahuaud in his nursery in 1900. Originated in France. (Believed extinct).

Madame Henri Cormerais. *(C.japonica)*, Jean Laborey, 1986, *Les Camellias*, p.52, colour photo: Medium size, white, semi-double to rose form double, 3-4 rows of imbricated, outer petals with the centre a mixture of stamens and a few petaloids and 2-3 small, crinkled petals. Originated in France by Bahuaud-Litou about 1900 as a sport of **Nobilissima.** Chinese synonym 'Heli Nüshi'.

Madame Henri Cormerias-Litou. Bahuaud-Litou Catalogue, ca. 1925. Synonym for **Souvenir de Bahuaud-Litou.**

Madame Herbelin. *(C.japonica)*, Franchetti, 1855, *Collezione di Camelie*, p.42: Transparent, rosy white, delicately lined with pink; imbricated. Originated in Italy.

Madame Herman. *(C.japonica)*, van Houtte Catalogue, 1858, 72:17: Circumference bright vermilion, centre pink; petals lined down the centre and lightly bordered; very beautifully imbricated. Verschaffelt, 1860. *Nouvelle Iconographie*, Book V, pl.IV: An Italian variety introduced two or three years ago, recommended for the pink colouring and good form of the blooms which measure at least 11 cm across and are composed of very large, biform petals, all regularly imbricated; the central ones ovate, full; the others, towards the circumference, fully rounded, scarsely emarginate. A few white stripes appear here and there on the pink ground.

Madame Hovey. *(C.japonica)*, Nicholson, 1892-1893, *Dictionary d'Horticulture*, p.478 as 'Hovey (Mme)': Medium pink, fading lighter in the centre. Large formal double. Vigorous, upright growth. Mid-season flowering. Synonyms: 'Ecstacy'(Hearn), 'Ecstacy', 'Ecstacy'(California), 'Nassisiana'. Orthographic variants: 'Madam Hovey', 'Mme Hovey', 'Mrs Hovey'.

Madame Ingrad. *(C.japonica),* Portland Camellia Nursery Camellia Catalogue, 1946-1947, p.6: White, semi-double, medium size. Weeping growth, Mid-season blooming. Orthographic error: 'Madame Ingrid'. Abbreviation: 'Mme. Ingrad'.

Madame Ingrid. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Madame Ingrad.**

Madame J. Linden. Companhia Horticolo-Agricola Portuense Catalogue, No.40, ca. 1904, p.70. Orthographic variant for 'Madame Linden', synonym for **Virginia Marini.**

Madame Jannock. *(C.japonica),* SCCS., 1942, *Classification of Camellias*, p.1 as 'Mme Jannock': Red semi-double, 8 cm diameter. Blooms mid-season. SCCS., 1950, *The Camellia. Its Cultivation and Nomenclature,* p.51: Light red. Large semi-double. Vigorous, compact, upright growth. Early flowering. Originated at Huntington Gardens, San Marino, California as an unidentified plant imported from Japan about 1918 and renamed by the Jannock Nursery. See black and white photo, p.252, Hertrich, 1954, *Camellias in the Huntington Gardens.* vol.I. Chinese synonym 'Jiannuoke Furen'.

Madame Jeanne Osmond. Anonymous, Aug.1843, *Revue Horticole*, pp.376, 378 as 'Mme Jeanne Osmond'. Synonym for **Mademoiselle Jeanne d'Osmond.**

Madame Jules Mechlynch. *(C.japonica),* Loureiro Catalogue Suppl.#24, 1888 & No.25, 1889-1890, p.94: Double, delicate pink with carmine veining, edged white. Originated in Portugal by Alfredo Allen at Quinta de Villar d'Allen, Porto.

Madame Kurtz. Wilmot *Camellia Variety Classification Report*, 1943, p.12 as 'Madam Kurtz'. Synonym for **Mary Kurtz.**

Madame L. van Houtte. van Houtte Catalogue, 1879-1880, 184:239 as 'Mad. L. van Houtte'. Abbreviation for **Madame Louis van Houtte.**

Madame La Bois. Chandler & Son Nursery Catalogue, ca.1945, p.5-7. Orthographic error for **Madame Lebois.**

Madame La Duchesse de Nemours. Berlèse, 1843, *Iconographie*, pl.153. Orthographic variant for **Duchesse de Nemours.**

Madame Langelier. *(C.japonica), Proceedings of the RHS.*, 1861, p.167: Exhibited Mar.1860 at the RHS by Messrs J. & C. Lee, Hammersmith. A variety of fine habit, free blooming, producing large blooms. The flower is upwards of 10 cm in diameter, full, imbricated and reflexed, of a deep pink to pale rose colour.

Madame Le Bois. van Houtte Catalogue, 1857, 67:44. Orthographic error for **Madame Lebois.**

Madame Le Bois Variegated. Fendig, 1953, *American Camellia Catalogue.* Orthographic variant for 'Madame Lebois Variegated', synonym for **Admiration.**

Madame Le Monnier. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.144. Orthographic variant for **Madame Lemonnier.**

Madame Leblois. de Bisschop Nursery Catalogue, 1935, p.4. Orthographic error for **Madame Lebois.**

Madame Lebois. *(C.japonica),* Leguay, Jan.1853, *Revue Horticole,* p.39: Very large, formal double; petals sometimes dark cherry-red, sometimes light violet red with dark, cherry-red margins. Verschaffelt, 1854, *Nouvelle Iconographie*, Book VII, pl.II: Of French origin by M. Miellez; blossoms of medium size, full-bodied, perfectly imbricated. The colouring of the exterior petals, which are ample and rounded, is a deep cherry-red; the interior ones, which are sub-oval, are a beautiful pink. See black and white photo, pp.242, 244, Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.I. Orthographic errors: 'Madame Le Bois', 'Madame Leblois', 'Madame Debois', 'Mme. Le Bois', 'Mme Lesbois', 'Madame Laboise',

'Madam Le Bois', 'Madame La Bois', 'Madame de Bois'. Abbreviations: 'Mme Lebois', 'Mad. Lebois', 'M.de Lebois'. Synonyms: 'Carl Rosenquist', 'Rosedale's Beauty', 'Carlo Rosenquist'. Sport: **Admiration.**

Madame Lebois Variegated. Fendig, 1953, *American Camellia Yearbook*. as 'Madame Le Bois Variegated'. Synonym for **Admiration.**

Madame Leboise. Henderson Nursery Catalogue, 1868. Orthographic error for **Madame Lebois.**

Madame Lemischez. *(C.japonica),* Auguste van Geert, 1855, Catalogue, No.38, p.27. No description. Originated in France. Synonym for **Lemichezii.**

Madame Lemischez. Joseph Baumann, 1856, Prix Courant, p.4. Synonym for **Lemichezii.**

Madame Lemonnier *(C.japonica),* Lemaire, ed., 1883, *L'Illustration Horticole,* vol.30, p.59, pl.483: Originated by M. Lemonnier, from a seedling of **Lavinia Maggi**…perfection of form, the softness of its colour of pale cream, lightly streaked iridescent pink. The plant is vigorous and floriferous. Orthographic variant: 'Madame Le Monnier'. Originated in Lille, France.

Madame Léontine Mosca. *(C.japonica),* Sgaravatti Catalogue, 1896. No description. Originated in Italy. (Believed extinct.)

Madame Lesbois. Wallace & Barr Nursery Catalogue, 1957-1958. Orthographic error for **Madame Lebois.**

Madame Linden. Lemaire, ed., 1878, *L'Illustration Horticole*, vol.25, p.42, pl.308: A sport of the variety **Madame Ambroise Verschaffelt.** Synonym for **Virginia Marini.** This sport occurred in Linden's Nursery, Belgium and Franchetti's Nursery, Italy and were given different names in the same year. Orthographic variant: 'Madame J. Linden'. Abbreviation: 'Mad. Linden'.

Madame Louis van Houtte. *(C.japonica),* van Houtte Catalogue, 1879-1880, 184:239 as 'Mad. L. van Houtte'. A flesh pink sport of **Jenny Lind.** A first class novelty which was figured in vol.XXIII of van Houtte's *Flore des Serres* .... A very beautiful, large flower, imbricated almost to the centre, of the most mellow flesh pink, all petals edged with white and netted pale carmine with small carmine spots on some petals. See illustration on p.289, van Houtte's *Flore des Serres...*, vol.XXIII. Mid-season blooming. Originated in Belgium by van Houtte. Abbreviations: 'Mad. L. van Houtte', 'Madame L. van Houtte', 'Mme. van Houtte', 'Mme. L. van Houtte', 'M.de Louise van Houtte', 'Mme Louis van Houtte'. Synonym: 'Marie van Houtte'.

Madame Louise Mouthu. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.12. No description. Originated in Italy. (Believed extinct.)

Madame Lourmand. *(C.japonica),* Guichard Soeurs Catalogue, 1910 as 'Mme. Lourmand': Large, single flower, pure white. Originated in France. Abbreviation: 'Mme. Lourmand'. Orthographic error: 'Madame Lourmond'. Synonym: 'Magnolyoeflora'.

Madame Lourmond. Thoby et al., 1988, *Tsubaki - A Propos de Camellia,* p.46. Orthographic error for **Madame Lourmand.**

Madame M. Calusaut Pink. Coolidge Gardens Wholesale List, 1942-1943, p.4, as 'Mme. M. Calasaut Pink'. Synonym for **Pink Calusaut.**

Madame Maintenon. Magnolia Gardens and Nursery Catalogue, 1942-1943. Orthographic error for **Madame de Maintenon.**

Madame Marguerite Calusant. Magnolia Gardens and Nursery Catalogue, 1948-1949 as 'Mme. Marguerite Calusant'. Orthographic error for **Madame Marguerite Calusaut.**

Madame Marguerite Calusant Pink. Magnolia Gardens and Nursery Catalogue, 1948-1949 as 'Mme. Marguerite Calusant Pink'. Synonym for **Pink Calusaut.**

Madame Marguerite Calusaut. *(C.japonica),* Magnolia Gardens and Nursery, 1948-1948, p.15 as 'Mme. Marguerite Calusant' - corrected to 'Madame Marguerite Calusaut' in 1950-1951 catalogue and thereafter. A white, striped pink, large, irregular semi-double with medium, upright growth. Early to mid-season flowering. Originated as a seedling at Magnolia Gardens, South Carolina, USA. Orthographic errors: 'Madame Marguerite Calusant', 'Madame Calusant', 'Mme. Margherite Calusaut', 'Mme. Marguerite Calusant'. 'Madame Marguerite Clausant', 'Calusant'. Abbreviations: 'Mme. Marguerite Calusaut', 'Marguerite Calusaut'. Synonyms: 'Marguerite Calusaut Variegated', 'Madame Margurite Calusaut Variegated'. Sport: **Pink Calusaut.**

Madame Marguerite Calusaut Variegated. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.144 as 'Madame Marguerite Calusant Var.'. Synonym for **Madame Marguerite Calusaut.**

Madame Marguerite Clausant. Fendig, 1953, *American Camellia* Catalogue. Orthographic error for **Madame Marguerite Calusaut.**

Madame Maria Louisa Motie. *(C.japonica),* Auguste van Geert, 1857, Catalogue No.43, p.35. No description. Originated in Italy. Orthographic error 'Madame Maria Louisa Motti'.

Madame Marie Louisa Motti. Auguste van Geert Catalogue, No.65, 1869-1870, p.55. Orthographic error for **Madame Maria Louisa Motie.**

Madame Martin Cachet. *(C.japonica),* Bahuaud-Litou Catalogue, 1914-1920: as 'Mme. Martin Cachet': Rose pink. Medium large peony form with creped petals. Onillon, Angers Nursery Catalogue, 1939, p.3: Peony form, light red, very double and very floriferous. Originated in France. Orthographic error: 'Madame Martin Cochet'. Madame Onetto. Joseph Baumann, 1856, Prix Courant, p.4. Orthographic error for **Madame Oneto.**

Madame Oreta. *(C.japonica),* Giles Nursery Catalogue, 1881. No description. Originated in Australia. (Believed extinct.)

Madame Orolle. *(C.japonica),* Sgaravatti Catalogue, 1896. No description. Originated in Italy. (Believed extinct.)

Madame P. de Pannemaeker. *(C.japonica),* Lucien Linden, ed., 1885, *L'Illustration Horticole*, vol.32, p.61, pl.554: This Camellia is a sport of **Madame Cachet** discovered by M. Linden. Flowers of average size, numerous petals, even, rounded, slightly bilobate, regularly imbricated, of a bright pink with paler venation, the colour fading to the edge of the petals which are bordered with white. Originated in Belgium.

Madame Paling. *(C.japonica),* Guilfoyle, 1875, *Botanical Papers*, p.26. No description. Shepherd & Co. Catalogue, 1883-1884, p.31: Brilliant crimson, cupped. Originated in Australia.

Madame Patti. *Camellias at Eaton Hall*, 1939. Synonym for 'Angela Patti'.

Madame Pépin. *(C.japonica),* van Houtte Catalogue, 1858, 72:17. From Pépin. Not described. Verschaffelt, 1859, *Nouvelle Iconographie*, Book XII, pl.IV: A distinctive variety, the introduction of which we owe to M. Miellez ... Its blossoms, larger than medium, have a double form, two kinds of petals and triple colouring with perfect imbrication. The petals of the rows of the circumference are ample and rounded, full, a vivid cherry-red; the intermediate ones of similar form, are a delicate pink; near the centre they become suddenly smaller, oval, outspread in the form of a delicate pink dahlia, of a more delicate pink edged with white; at the centre they are smaller still, hooded, red with recurved edges. Originated in Italy by Sr. Pepin, Pisa. Orthographic errors: 'Madam Peppin', 'Madame Peppin'. Abbreviation: 'Mme. Pepin', 'Madam Pepin', 'de Pepin', 'M. de Pepin'. Synonyms: 'Madame Pépin de Pise', 'Madame Pépin'(Miellez). Orthographic variant 'Signora Pepin'.

Madame Pépin de Pise. André, 1864, *Plantes de terre de bruyéres...*, p.245. Synonym for **Madame Pépin.**

Madame Pépin (Miellez). Vervaene, J. Catalogue No.11, 1888. Synonym for **Madame Pépin.**

Madame Peppin. Nobelius Nursery Catalogue, 1930, p.57. Orthographic error for **Madame Pépin.**

Madame Paucillon. Guichard Soeurs Catalogue, 1928. Orthographic error for 'Madame Faucillon', synonym for **Monsieur Faucillon.**

Madame Picauline. Vanderbilt, 1940, *Camellia Research*, p.5. Orthographic error for **Madame Picouline.**

Madame Picouline. *(C.japonica),* Verschaffelt, 1855, *Nouvelle Iconographie*, Book IX, Pl.II: Blooms above average in size, petals innumerable, serried, twisted all ways to form a maze; deep cherry-red. Full informal peony form. Originated by M. Francotte Sr. Liege, Belgium. Synonym: 'Akaroa Rouge'. Abbreviations: 'Mme. Picouline', 'Madame Picouline'. Orthographic errors: 'Madame Picauline', 'Madame Picoulini'.

Madame Picoulini. Jose Loureiro, 1872-1873, Catalogue No.9, p.56. Ingram, 1951, *American Camellia Yearbook*, p.97. Orthographic error for **Madame Picouline.**

Madame Place. *(C.japonica)*, Le Texnier, 1911, *Le camellia, essais sur 1'histoire de quelques fleurs d'ornement*, p.28 as "grown in 1856 by Henri Courtois". No description. Originated in France.

Madame Raymond Lemonier. *The Garden*, 1883. Orthographic error for **Madame Lemonnier.**

Madame Reuss. *(C.japonica)*, Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p. 145. No description. Originated in Belgium. (Believed extinct.)

Madame Rambuteau. *(C.japonica)*, Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.12. No description. Originated in Italy. (Believed extinct.)

Madame Robillant. *(C.japonica)*, Mercatelli Catalogue, 1894. No description. Originated in Italy. (Believed extinct.)

Madame Rosalie Boschi. *(C.japonica)*, Ambroise Verschaffelt, 1854, Catalogue, p.19, as 'Madame Boschi'. No description. Burnier Catalogue, 1855-1856. No description. Franchetti, 1855, *Collezione di Camelie*, pp.42, 43: Pure white, almost flesh coloured, very full double, imbricated in the form of **Incarnata.** Originated in Italy. Abbreviations: 'Madame Boschi', 'Madam Boschi'. Orthographic error 'Madame Bosqui'.

Madame Rothschild. Forrest, 1985, *Trees and Shrubs Cultivated in Ireland.* Orthographic error for **Elizabeth de Rothschild.**

Madame Rudolph Abel. *(C.japonica)*, Lemaire, ed., 1869, *L'I1lustration Horticole*, vol.16, pl.596: A variety from the establishment of M. Ambroise Verschaffelt, Belgium. It belongs to the class of perfections. The flower is large with petals rounded and oblong, pink with violet reflections and which have large, whitish streaks down the centre. Abbreviations: 'M.de Rudolph Abel', 'Mde. Rudolph Abel'. Orthographic error 'Madame Rudolpheafel'.

Madame Rudolpheafel. Shirley Hibbert, *The Floral World and Garden Guide*, vol.5, p.89. Orthographic error for **Madame Rudolph Abel.**

Madame Schmitz. *(C.japonica)*, Mercatelli Catalogue, 1894. No description. Originated in Italy. (Believed extinct.)

Madame Streakaloff. Gerbing's Azalea Gardens Catalogue, 1938-1939. Orthographic error for **Madame de Strekaloff.**

Madame Strekaleff. McIlhenny, 1935, *List of Camellias for Sale.* Orthographic error for **Madame de Strekaloff.**

Madame Strekaloff. Leguay, Jan.1853, *Revue Horticole*, p.30. Orthographic error for **Madame de Strekaloff.**

Madame Strekaloff Variegated. Fendig, 1953, *American Camellia Catalogue*, as an invalid synonym for **Bella Romana.**

Maddalena. *(C.japonica)*, Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*, 40:226: There are two camellias sold under this name, one from Milan, the other from Brescia. The first is red marked with white lines, 10 cm. in diameter, formal double, crimson red with pinkish veins, (**Maddalena d'Italie**) the other is white occasionally streaked with red and resembling 'Punctata Major'. Franchetti, 1955, *Collezione di Camelie*, p.43: White with straw yellow streaks, imbricated. Synonym 'Procrastinans'.

Maddalena Benucci. *(C.japonica)*, Luzzatti, 1851, *Collezione di Camelie*, p.25. From Florence. No description. Franchetti, 1855, *Collezione di Camelie*, p.43: Delicate red tinted brighter at the centre; imbricated. Very distinctive leaves. Originated in Florance, Italy.

Maddalena Cajani. *(C.japonica)*, Anonymous, 1879, *R. Società Toscana di Orticultura Bollettino*, 4:99-102. No description. Originated in Italy. (Believed extinct.)

Maddalena d'Italie. *(C.japonica)*, van Houtte Catalogue, 1843-1844, 12:zz. No description. Von Biedenfeld, 1856, *Practische Grundlehren der Cultur von Camellien…,*p.46: Vivid cherry-red with even more vivid white veins. van Houtte Catalogue, 1858, 72:17 as 'Maddalena'(Lechi): First class imbrication, outer petals bright pink, centre petals the same colour; intermediate petals pink with a white, satiny sheen, the entire flower striped with white. Synonyms: 'Margarita'(Lechi), 'Victoria Magna', 'Victoria Magnosa', 'Maddalena'(Lechi), 'Maddalena Lechi Vera', 'Maddalena'(d'Italie), 'Margherite Lechi', 'Marguerita Lechi', 'Margarita Lecchi'. Orthographic error 'Madelina d'Italie'.

Maddalena (d'Italie). van Houtte Catalogue, 1848, 33-15. Orthographic variant of **Maddalena d'Italie.**

Maddalena di Francia. *(C.japonica)*, Luzzatti Catalogue, 1853. No description. Franchetti, 1855, *Collezione di Camelie*, p.43: Bright rosy pink, deeper at the circumference, central petals lined with white; imbricated. It is thought that this may be a synonym for Cachet's **Madeleine.** Originated in France.

Maddalena Lecchi. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.12. Synonym for **Maddalena d'Italie.**

Maddalena(Lechi). van Houtte Catalogue, 1858, 72:17. Synonym for **Maddalena d'Italie.**

Maddalena Lechi. Burdin Maggiore & Co. Catalogue, 1845. Synonym for **Maddalena d'Italie.**

Maddalena Lechi Vera. Luzzatti, 1851, *Collezione di Camelie*, p.27. Synonym for **Maddalena d'Italie.**

Maddalena Legnani. *(C.japonica)*, Luzzatti, 1851, *Collezione di Camelie*, p.26. No description. Franchetti, 1855, *Collezione di Camelie*, p.43: Ivory white. Perfect imbrication. Originated in Italy. Orthographic error: 'Maddalena Leguani'.

Maddalena Leguani. de Jonghe, 1851, *Traité de Culture du Camellia*, p.112. Orthographic error for **Maddalena Legnani.**

Maddalena Manasse. *(C.japonica)*, Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.12. No description. Castagnola & Casabona Catalogue, 1861-1862: Flower dark red, sometimes spotted with white. Imbricated. Orthographic error: 'Maddalena Manassi'. Originated in Italy.

Maddalena Manassi. Burdin Maggiore & Co. Catalogue, 1880-1881, p.74. Orthographic error for **Maddalena Manasse.**

Madeleina. Louis Leroy, 1868, Catalogue, p.124. Orthographic error for **Madeleine.**

Madeleine. *(C.japonica)*, Cachet Catalogue, 1845-1846, p.7. No description. Originated in France. Orthographic errors: 'Madaleine', 'Madeleina'. (Believed extinct.)

Madelin Nadeau. *(C.japonica), American Camellia Yearbook*, 1969, p.165, Reg. No.1027: A 12 year old chance seedling that first bloomed 1960; originated by Harold Harwood, Americus, Georgia, USA. Plant growth is upright, spreading and medium with light green leaves, 10 cm x 4.5 cm. The semi-double flower is 11 cm across x 7 cm deep. Crimson with yellow anthers and white filaments. Variable flower formation. Blooms mid-season.

Madeline Bayors. *(C.japonica)*, SCCS., 1960, *Camellia Nomenclature.* p.75: Light pink, large size, semidouble with irregular petals. Blooms early to mid-season. Originated in USA.

Madeline Bryars. *(C.japonica)*, Hillcrest Nursery Catalogue, 1958. Description not seen. Originated in the USA.

Madeline Perrow. *(C.japonica)*, Turner, 1950, *American Camellia Yearbook*, pp.164, 165: Amongst the many old specimen plants is one which has borne perfect double, self red flowers. However for the past 15 years it has produced red and white, mottled blooms, intermingled with solid red ones. Originated by Perrow Jones, Thompson, Georgia, USA.

Madeline Roberts. *(C.japonica),* SCCS., 1968, *Camellia Nomenclature*, p.88: Deep rose-red. Large anemone form. Vigorous, upright growth. Early to mid-season blooming. Originated in USA by Mrs C.H. Roberts, Adel, Georgia.

Mademoiselle. *(C.japonica),* Feray's Fine Flowers Catalogue, 1960. No description. Originated in USA. No valid listing located.

Mademoiselle Caroline. *(C.japonica),* Cachet Catalogue, 1845-1846, p.7 as 'Mlle. Caroline'. No description. (Believed extinct.)

Mademoiselle de Libert. Berlèse, 1840, *Monographie*, ed.2, p.196. Synonym for 'Sckrimakersii' (**Schyrnmakersii**).

Mademoiselle Jeanne d'Osmond. *(C.japonica),* Anonymous, 1843, *Journal d'Horticulteur Pratique Belge:* Double, around 10 cm in diameter, pure white; outer petals broad, rounded and entire. Central petals numerous. *Annales de la Société d'Horticulture de Paris*, 32:311-317. Raised from seed by M. Tamponet. Flower double, 12 cm diameter. Outer petals in 5 rows, pure white, rounded, some entire, some indented, the central petals numerous. Orthographic error: 'Madame Jeanne Osmond'. Abbreviation: 'Mlle. Jeanne d'Osmond'.

Mademoiselle Leonie van Houtte. *(C.japonica),* van Houtte Pere Catalogue, 1896, 265P:107 as 'Madem. Leonie van Houtte': Latest novelty. Large, splendid flower, well imbricated, fleshy white, streaked and shaded rose, petals bordered with white. Originated in Belgium.

Mademoiselle Marguerite Barrat. Jean Laborey, 1986, *Les Camellias*, p.53. Synonym for **Mademoiselle Marie Barrat.**

Mademoiselle Marguerite Calusant. Hastie, 1950, *American Camellia Yearbook*, p.51 as 'Mlle. Marguerite Calusant'. Orthographic error for **Madame Marguerite Calusaut.**

Mademoiselle Marguerite Calusant Pink. Griffiths & Strothers, 1954, ACS., *Nomenclatural Cross Reference List* as 'Mlle. Marguerite Calusant Pink'. Synonym for **Pink Calusaut.**

Mademoiselle Marie Barrat. *(C.japonica),* Crézé, 1986, ACS., *The Camellia Journal*, vol.41, No.1, p.18 as raised by Ferdinand Favre in France in 1862. Synonym: 'Mademoiselle Marguerite Barrat'.

Mademoiselle Marie Bouturlin. *(C.japonica),* Scarlatti Catalogue, 1888 as 'Mad. Marie Bouturlin': Originated by Sodini, Florence, Italy. Flower large, imbricated, perfect, dark red, inner petals clear, shaded violet on petal edge with blue spots. A new variety.

Madge Burt Miller. Synonym for **Madge Miller.**

Madge Miller. *(C.japonica),* McIlhenny, 1941, *700 Varieties of Camellias,* p.10: Synonym, 'Chandlerii Alba'- Pure white.; double. Fendig, 1952, *American Camellia Catalogue:* Medium, white, incomplete double, 8 cm across x 3.2 cm deep. Outer petals clover-leaf shaped, 3.8 cm wide x 3.5 cm long. Inner petals semi-erect, twist, swirl and intermingled with short stamens. Filaments cream coloured, anthers yellow-brown. Buds round to oval. Leaves mid-green, 8 cm x 4 cm, elliptic. Apex short and narrow, texture thin, serrations coarse, venation recessed and obscure. Plant habit, bushy, upright and medium in rate. Originated by H.K. Miller, Monticello, Florida, USA from seed of unknown parents. However believed to be a seedling of **Elegans** which it resembles in form. Synonyms: 'Madge Burt Miller', 'Chandleri Alba', 'Chandleri White', 'Chandleri Alba II'. For black and white photo see p.220, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

Madge Rouse. *(C.japonica),* ACS 1995, *The Camellia Journal,* vol.30, No.3, p.36, Reg. No.2331: Very large, clear light pink, anemone to peony form to rose form double *C.japonica* chance seedling. Blooms early to mid-season. Originated in USA by R. Dennis Rouse, Auburn, Alabama. ACS 1995, *American Camellia Yearbook,* p.6 with colour photo: The 10 year old seedling first flowered 1989. Average flower size is 12.5 cm across x 5 cm deep with 10

petals, 20-60 petaloids, bright yellow anthers and yellowish cream filaments. Plant growth is upright, dense and vigorous with dark green leaves 11 cm long x 5.5 cm wide.

Madici. Cachet Catalogue, 1845-1846, p.7. Orthographic error for **Medicea.**

Madicea. Longone Catalogue, 1846. Orthographic error for **Medicea**

Madieana. *(C.japonica),* Harrison ed., 1838, *Floricultural Cabinet,* vol.6, p.28: Double, white; large flower. Originated in England.

Madina. *(C.japonica),* William Paul, 1879, *Gardeners' Chronicle,* ser.2, 11:688: Flowers dark red with band of white down the centre of each petal, of medium size, flat, full, petals rounded. (Under exact or symmetrical flowers for Florists).

Madioanensis. *(C.japonica),* Prince & Co. Catalogue, 1844, p.104; Hovey, 1844, *Magazine of Horticulture.* No description. Originated in USA.

Madison. *(C.hybrid).* SCCS *Camellia Nomenclature* 2009, p.182; Small white semi-double with vigorous upright growth. A seedling of *C.hybrid* **Snow Flurry**. Flowers early. Originated in 2008 by CamelliaShop, Savannah, Ga., USA.

Madison Tea. *(C.sinensis)* ACS, Yearbook 2011, p.133. Miniature, single, light pink flower. Vigorous, compact plant has a crinkled leaf. Offered by CamelliaShop, Savannah, Ga., USA.

Madison's Holly. *(C.japonica),* SCCS *Camellia Nomenclature* 2009, p.79. A large to very large pink peony form sport of **Francis Eugene Phillips**. Vigorous, upright growth. Flowers mid-season to late. Unusual holly-like foliage with heavy serrations. Originated in 2008 by CamelliaShop, Savannah, Ga, USA.

Mado-akari. (Sunlight through Window). *(C.japonica), Nagoya Camellia Society Bulletin,* 1992, No.25, p.11, colour plate 36: Originated by Kôji Funakoshi, Nagoya, Japan. A chance seedling of **Mado-no-tsuki,** medium size, 8-9 cm across, white semi-double with a massive cylindrical stamen cluster, making a double **Mado-no-tsuki.** Pure white early in the season, changing to pale pink in late season. No fragrance.

Madoka. (Round or Harmonious), (*C.rusticana*), Tuyama, 1968, *Camellias of Japan,* pl.161, p.81, description, p.136: Large flowered snow Camellia. Leaves very dark green, elliptic, shortly acuminate, roughly serrate, 7-8.8 cm long x 2.9-4.1 cm wide; petioles 5-7 mm long, hairy. Flowers single, red (carmine 21/1),5-6, loosely wavy, irregularly lobated petals; largest, 6.6 cm x 5.1 cm; stamens spreading, filaments creamy. Originated in Japan in the wild at Mount Zaôzan, Niigata Prefecture. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.246 with colour photo; English translation p.172.. Late flowering. Irregular, round leaves mixed with trumpet shaped ones. Zigzagged and bent growth. A natural seedling from a wild population of yukibata camellia (*C.japonica ssp. rusticana*). Named and released by Yoshitaka Fujii around 1985.

Madona. Oudin Nursery Catalogue, 1845-1846, p.45. Verschaffelt, 1850, *Nouvelle Iconographie,* Book I, pl.III: Orthographic error for **Madoni.**

Madona. *(C.japonica),* Bahuaud, A.D., Catalogue, 1935: Peony form, flesh white. Late blooming. Originated in France.

Madona Ambroise. Peer, 1956, *American Camellia Yearbook,* p.54. Synonym for **Madame Ambroise Verschaffelt.**

Madona Rosea. *(C.japonica),* Bahuaud, A.D., Catalogue, 1935: Pale rose bordered with white. Late flowering. Originated in France by A.D. Bahuaud, Nantes as a sport of **Madoni.** Synonyms: 'Pink Madonna', 'Madonna Pink'.

Madoni. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue, No.50, p.26. No description. Burdin Maggiore & Co. Catalogue, 1845-1846. No description. Oudin Nursery Catalogue,

1845-1846, p.45 as 'Madona': Large size, imbricated, pure white, carmine stripes. Auguste van Geert Catalogue. 1848, p.19 as 'Madonna': Very large size, irnbricated, pure white circled carmine. Berlèse, 1849, *Annales de la Société Central d'Horticulture de Paris,* 40:81: A formal double about 10 cm across. White with a margin of pale carmine red. Petals in 6 rows, large, shell-like, serried and imbricated with admirable symmetry. Flowers of the above colours are usually quite variable and the modern cultivar associated with this name is a blush white formal double, pencilled and speckled rose. Verschaffelt, 1850, *Nouvelle Iconographie,* Book I, Pl.III. There is some confusion regarding the names 'Madona', 'Madonna', and 'Madoni' as, although the first and second have been used as orthographic variants of the third, they are the valid names of separate and distinct cultivars. 'Madoni' is an Italian family name, the others refer to the Virgin Mary. Originated in Italy. Synonym: 'Madonna Variegated'. Pseudonyms: 'Madonna', 'Madona'. Sport: **Madona Rosea.** Received an RHS First Class Certificate in 1865 as 'Madonna'. From Madoni according to Rovelli, 1852.

Madonna. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1944-1945. A late blooming semi-double, vivid red marked with white. Originated in Magnolia Gardens, South Carolina, USA.

Madonna. Berlèse, 1849, *Annales de la Société Royale d'Horticulture de Paris*, 40:81 as a synonym for **Madoni.** In America this name has been used erroneously for **Comte de Gomer** and **Anna Frost.**

Madonna della Neve. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, p.121 with colour photo; Medium size formal double, white (RHS.CC.155D). Pale yellow tinge to central petals. A seedling of **Alba Simplex** x 'Giorgia Bianca', first flowered in 1995. Originated by Dott. Guido Cattolica, Livorno, Italy.

Madonna Pink. The Pacific Camellia Society, 1946, *Camellia Nomenclature*, p.9. Erroneously used as a synonym for **Comte de Gomer.**

Madonna Variegated. Feray's Fine Flowers Catalogue, 1960 as 'Madonna Vari.'. Synonym for **Madoni.**

Mado-no-tsuki. (Moon at the window), *(C.sasanqua),* Minagawa, Iza'emon, 1885, *Nisshôen Chabaifu* as white with reddish margins. Nobelius Catalogue, 1939, p.36: Medium size, semi-double, pure white, slightly tipped with pink; short, broad, pointed petals form a lovely bloom. Slender, spreading, vigorous growth, with round leaves. Autumn blooming: Yashiroda, 1950. Originated in Tokyo, Japan. Chinese synonym: 'Chuangzhongyue'.

Mado-no-tsuki. (Moon at the Window), *(C.japonica),* Usami, Na'ohachi, ca.1910, *Nagoya Chinzu'e.* See Kyôto Engei Kurabu, 1967, *Tsubaki Tokushû*, No.6, p.127 as a synonym for **Iori-no-tsuki** and **Rôgetsu.** Minagawa, 1933, *Chinkashû.* See following colour photos: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.51. Tuyama, 1968, *Camellias of Japan*, pl.14, p.7. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.58. *Encyclopedia of Camellias in Colour*, 1972, vol.I, pl.85. Satô, 1975, *Chûbu no Tsubaki*, p.33: Leaves broadly oblong, base rounded, cuspidately acute apex, side veins raised. Flowers widely cup-shaped; petals 5-7, laxly undulate and wrinkled. Stamen cylinder, large and simple with big, yellow anthers and style protruding above. Originated in the Aichi Prefecture, Japan. Very similar to, or synonym for, **Kamo-honnami** and **Manazuru (Chûbu).**

Mado-no-yuki. (Snow at the Window) , *(C.rusticana),* Izu-Ohshima Hawaii Botanical Gardens, 1980, *List of Plants,* p.17 as 'Madonoyuki'. No description. Originated in Japan.

Madre Teresa di Calcutta. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.122 with colour photo; Medium to large flower, semi-double with tall central column of stamens, pink (RHS.CC.57D). A seedling of 'Rosa Simplex' **(Aitonia)** x **Moshio**, first flowered in 1984. Originated by Dott. Guido Cattolica, Livorno, Italy.

Madrépora. *(C.japonica),* José Marques Loureiro Catalogue No.1, 1865, p.33, & No.9, 1872-1873, p.45: Regular rose form, white with splashes of vivid rose. Originated in Portugal.

Mae Robichaux. *(C.japonica),* ACS., Aug.1986, ACS., *The Camellia Journal*, vol.41, No.3, colour pl. and description, front cover: Large to very large, medium pink, semi-double to peony, with a striking glow. A chance seedling originated by Sam. & Ferrol Zerkowsky, Slidell, Louisiana, USA. The 7 year old seedling first bloomed 1984. Average flower size is 15 cm wide x 10 cm deep with 16 large petals in 5 rows, yellow anthers and filaments. Mid-season blooms. Plant growth is erect and medium with dark green leaves, 8 cm x 5 cm. ACS. Reg. No.2028, *American Camellia Yearbook*, 1986, p.92.

Maehata-shiro. (Maehata's White Camellia). *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.84 with colour photo; A seedling of **Kantô-tsukimiguruma,** raised by S. Hisatomi, Japan, named in 2001. Small white tubular single. Columnar stamen cluster. Upright growth. Leaves large, elliptic, revolute at margins, and recurved at both extremities. Late flowering.

Magnificent. *(C.japonica)*, van Houtte Catalogue, 1852-1853, 48:41, as 'Magnificent'(C.Borghi): Large flower, intensely imbricated, colour deep lake to rose and white at the circumference. Verschaffelt, 1856. *Nouvelle Iconographie*, Book IX, pl.I: Blossoms of the largest size, of a velvety pink, growing whiter towards the centre; a distinctly double floral form - that of the circumference and middle parts having the petaline arrangement of the perfections; while that of the centre forms a rose. The petals of the first row are all rounded, emarginate, outspread, while, at the centre, they are slightly ruffled. Originated in Italy by Borghi. Orthographic error: 'Magnificens'.

Magnificent (C. Borghi). van Houtte Catalogue, 1852-1853, 48:41. Synonym for **Magnificent.**

Magnificent (Naidong). *(C.japonica), Collected Papers,* ICS Congress, Jinhua 2003, *Naming new Cultivars of "Naidong" Camellias...*, Chen Junzhi and Chen Jinshui, p.47 as 'Magnificent'; Red gem pendent form, red flower, cupped form.

Magnificent (Chandler's). van Houtte Catalogue, 1844-1845, 18:14. Synonym for **Superba** as 'Superba'(Palmer's).

Magnifii. Buist, 1839, *Camellias*, p.10. Synonym for **Saccoi Nova.**

Magniflora. *(C.japonica)*, Anonymous, 1831, *Annales de la Société Horticulture de Paris*, 9:47: "Camellia 'Magniflora' en fruit." No description. Berlèse, 1841, *Iconographie*, p. facing pl.66, as 'Mastersii' or 'Master's Double Red' or **Magniflora:** Cherry-red bordering, first on crimson, but later, poppy red. The petals of its circumference, imbricated in 3 rows, are notched, cordiform, convex and reflexed at the edge; those in the centre are wide, rose-shaped, small, rounded and short, some curled. Berlèse, 1837, *Monographie*, ed.1, p.90 as 'Masterii': Leaves rounded, acuminate and dark green: buds elongate with reddish scales: flower 9 cm across, full, well formed, of deep cherry-red or deep crimson; exterior petals oblong, cordiform, convex and recurved; those at the centre smaller and strap shaped, not numerous, some white marks. In this publication 'Master's Double Red' was treated as a separate cultivar, but the 1841, *Iconographie,* pl.66, combined them as the same variety. Synonyms: 'Mastersii', 'Master's Double Red', 'Mesteri', 'Splendens'(Magniflora). Orthographic errors: 'Marter's Double Red', 'Magnaflora', 'Masteri'. Originated in England.

Magniflora Plena. *(C.japonica)*, Cels, Paris Nursery Catalogue, 1836-1837, p.9 as 'Magnaflora Plena'. No description. Berlèse, 1837, *Monographie*, ed.1, pp.103, 110, 130: Leaves large, oval, thick, still, glossy, reflexed, dark green; flower very double, regular, 9 cm across, of a deep cherry-red approaching a poppy colour; exterior petals imbricated in 3 rows, very broad,

crenate; those at the centre, rounded, regularly arranged. Orthographic error: 'Magnaflora Plena'. Originated in England by Hamet, Clapham.

Magniflora Simplex. *(C.japonica),* Berlèse, 1837, *Monographie*, ed.1, p.128 as 'Magniflora Simpl'.: Flower large, cherry red, single. A sedling raised in France by M. Tamponet, Paris.

Magnolia. *(C.japonica),* Fruitland Nursery Catalogue, 1936-1937, p.16: Semi-double, medium size, vivid rose. Da Silva & Filhos Nursery Catalogue, 1948: Red sport of 'Magnoliiflora' (**Hagoromo**). Originated in Portugal. Renamed 'Magnoliaeflora Rubra' in 1963. The same sport occured in the Huntington Gardens, San Marino, California and was named 'Rudy's Magnoliaeflora' in Nuccio's 1989-1990 catalogue. The same sport has also occured in Japan where it was named 'Tennyo-no-mai'. Another synonym is 'Magnolia Rubra'. Note: The cultivar **Benihagoromo** from Japan is not related to **Magnolia.**

Magnólia (A.M. da Silva). *(C.japonica),* Catalogue No.84, 1949, p.18, ref 68A; Flowers similar to Magnolias, dark pink. Ferreira & Celina, 2000, *O Mundo da Camélia*, p.95 with colour photo; Red, semi-double, medium size, Blooms mid-season. Originated in Portugal in 1948 as a sport of **Hagoromo**. May be the same as the American **Magnolia.**

Magnolia Alba. Waterhouse, 1965, *New Zealand Camellia Bulletin*, vol.IV, No.2, p.16. Synonym for **Yukimiguruma.**

Magnolia Blush. *(C.japonica),* SCCS 1993, *Camellia Nomenclature,* p.71: Originated by Max Schultz, Edwardstown, South Australia. White centre shading to blush to red on outer edge. Large semi-double. Mid-season blooming. Slow growth.

Magnolia Camellia. Feng et al., 1981, *Yunnan* S*hancha Hua.* Western Synonym for **Yulan Cha.**

Magnolia Flora. Gerbing Azalea Gardens Catalogue, 1943-1944. Orthographic error for 'Magnoliiflora', synonym for **Hagoromo.**

Magnolia Flora Alba. Portland Camellia Nursery Catalogue, 1947-1948. Orthographic error for 'Magnoliiflora Alba', synonym for **Miyakodori.**

Magnolia King. Fruitland Nursery Catalogue, 1937-1938, p.18. Synonym for **Gigantea.**

Magnolia King Red. Vanderbilt, 1941, *Camellia Research II,* p.4. Synonym for **Gigantea Red.**

Magnolia Moon. *(C.synaptica)* SCCS *Camellia Nomenclature* 2009, p.195. White, very large and very fragrant. Vigorous spreading growth. Flowers mid-season. Originated in 2008 by CamelliaShop, Savannah, Ga., USA. Note: The stated parentage is most unlikely to be correct. *C.synaptica* is closely allied to *C.tsaii,* and has similar sized tiny flowers. Plants distributed in the USA as *C.synaptica* appear to be a form of *C.yunnanensis.*

Magnolia Number 25. *(C.japonica),* Gerbing Azalea Gardens Catalogue, 1941-1942 as 'Magnolia No.25'; An unusually large, cup-shaped, peony formed flower of the deepest red. It has short stamens in the centre and measures 13-15 cm across. Rounded, deep green foliage and slow symmetrical growth. Late flowering. Originated in USA.

Magnolia Pixie. *(C.japonica),* ACS, *The Camellia Journal*, June 2006, p.28, colour photo p.29, Reg. No.2674. A chance seedling that first flowered 1971. Originated by Magnolia Plantation & Gardens, Charleston, S.C., USA. The 5 cm diameter, vibrant pink, semi-double flower has yellow anthers and white filaments. Plant is upright and open, with average growth rate. Flowers mid-season. *American Camellia Yearbook*, 2006 p.60 with colour photo; Dark green leaves are 6.5 cm x 2.5 cm.

Magnolia Queen. Magnolia Gardens & Nursery Catalogue, 1945-1946. Synonym for **Priscilla Brooks.**

Magnolia Queen Pink. *(C.japonica)*, SCCS., 1958, *Camellia Nomenclature*, p.56: Deep pink sport of **Priscilla Brooks** as 'Magnolia Queen'. Originated in USA at Magnolia Gardens, John's Island, South Carolina. Synonym: 'Magnolia Queen Sport'.

Magnoliaeflora Rubra. Urquhart. 1956, *The Camellia* in discussion on 'Magnoliaeflora' ('Magnoliiflora). Synonym for **Magnolia.**

Magnoliaeflora Southern. Valley Garden Supplies Nursery Catalogue, 1946-1947. Orthographic error for 'Magnoliiflora Southern'; synonym for **Hagoromo.**

Magnoliaeflora White. Doty & Doerner Nursery Catalogue. 1942 as 'Magnoliaflora White'. Orthographic error for 'Magnoliiflora White'; synonym for **Miyakodori.**

Magnoliaflora. McIlhenny, 1937, *600 Varieties of Camellias*, p.4. Orthographic error for 'Magnoliiflora'; synonym for **Hagoromo.**

Magnoliaflora Alba. Valley Garden Supply Nursery Catalogue, 1949. Orthographic error for 'Magnoliiflora Alba'; synonym for **Miyakodori.**

Magnoliflora. Lord, 1986, *The Plant Finder*, p.60. Orthographic error for 'Magnoliiflora'; synonym for **Hagoromo.**

Magnoliiflora. Waterhouse, 1977, ACRS., *Camellia News*, No.64, p.18. Correct botanical latin for 'Magnoliaeflora'; synonym for **Hagoromo.** Chinese synonym: 'Mulanwang'.

Magnoliiflora Alba. Wada Nursery Catalogue, 1935, p.26 as 'Magnoliaeflora Alba'. Synonym for **Miyakodori.**

Magnoliiflora Pink. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.146. Synonym for 'Fléur de Pêché'.

Magnoliiflora (England). Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.146. Synonym for 'Fléur de Pêché' as 'Peach Blossom'.

Magnoliiflora (Southern). Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.146, Synonym for **Hagoromo.**

Magnoliiflora Red. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.146. Synonym for **Magnolia.**

Magnoliiflora White. Doty & Doerner Nursery Catalogue, 1942 as 'Magnoliaflora White'; synonym for **Miyakodori.**

Magnolissifera. Vanderbilt, 1940, *Camellia Research*, p.5. Synonym for 'Celtic Rosea'.

Magnolissiflora. Vanderbilt, 1941, *Camellia Research, II*, p.4. Synonym for 'Celtic Rosea'.

Magnosa. van Houtte Catalogue, 1872-1873, No.144. Synonym for **Magdalene.**

Magpie City. Loder, 1970, RHS., *The Rhododendron & Camellia Yearbook*, p.57. Orthographic error for **Magic City.**

Magrantha. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for 'Macrantha'; synonym for **Latifolia Nova.**

Magriço. *(C.japonica)*, José Marques Loureiro Catalogue, No.1, 1865, p.35, & No.9, 1872-1873, p.45: Formal double. Pale, delicate rose colour, striped white. Originated in Portugal.

Magteri. *(C.japonica)*, Berlèse, 1840, *Monographie*, ed.2, pp.209-210 as 'Magterii': Leaves 6.8 cm wide x 8.1 cm. long, thick, pronounced venation, uneven serrations; buds oval with green scales; flowers over 8 cm across, full, with a rose ground, striped and peppered a deep cherry-red, exterior petals in 3 rows, wide, flat. twisted, reflexed, notched, those of the centre, numerous, twisted, serried, long and forming a flower resembling **Colvillii.** See pl.171, Berlèse, 1843, *Iconographie*, vol.2. Orthographic error 'Magderii'. Originated 1835 by Baron Reinders, Brussels, Belgium.

Magu Shoutao. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.44 with colour photo; Synonym for **Shoutao.**

Mahas. Fratelli Rovelli Catalogue, 1852, p.21. Synonym for **Lowii.**

Mahata. Tammia Nursery Catalogue, 1958. Orthographic error for **Mihata.**

Mahdenblusch. Anonymous, 1843, *Horticulteur Belge Jornal Garden Amateurs.* Orthographic variant for 'Maiden's Blush'; synonym for **Incarnata.**

Mahelani. Prince & Co Catalogue, 1844, p.104. Orthographic error for **Mahleni.**

Maheli. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic error for **Mahleni.**

Mahelenii. Trillon, Le Mans Nursery Catalogue, 1845, p.6. Orthographic error for **Mahleni.**

Mahleni. *(C.japonica),* Berlèse, 1840, *Monographie.* ed.2, pp.190, 234: Leaves 6 cm wide x 13.5 cm long, twisted at apex, prominent venations, irregular serrations, dark green; buds oblong, scales pale green; flower 10.8 cm across, full, orange red, petals of exterior rows, wide, over 5.4 cm, not very numerous, well imbricated, notched, those of the interior, very narrow, long-oval, spoon shaped, centrally there are 3 or 4 similarly narrow, erect and long petals. Colour off-white. Originated in Belgium. Orthographic errors: 'Mahelani', 'Mahelenii', 'Maheli'.

Mahogany Glow. *(C.japonica),* Thompson, 1953, *American Camellia Yearbook*, p.79: (Seedling of **Covina** x **Kuro-tsubaki**). Raised by Harvey Short, Ramona, California, USA. The flower is 7.5-8.5 cm across, formal double of dark red. Foliage the same as **Kuro-tsubaki.**

Mahomet. *(C.japonica),* Naudin, Apr.1847, *Revue Horticole*, pp.159, 160. M. Porcher obtained a silver medal for a collection of camellias which included Mahomet. No description. (Believed extinct.)

Mahometa. Louis Leroy, 1868, Catalogue, p.124. Orthographic error for **Mahometto.**

Mahometo. Cachet Catalogue, 1845-1846, p.4. Orthographic error for **Mahometto.**

Mahometto. *(C.japonica),* Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.9: Well imbricated, velvety, blackish red. One of the most beautiful known. de Jonghe, 1851, *Traité de la Culture du Camélia*, p.112. Orthographic variants 'Mahometo' and 'Mahometa'.

Mahoroba. (Excellent, Good Country). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.170 with colour photo; Large formal double, imbricated petals, deep pink bordered white. Flowers mid-season to late. Leaves elliptic, medium size, thick. Vigorous, upright growth. A cross of **Beni-hagoromo** x **Etenraku**, named and released by Soshin Hirai in 2007. Orthographic error 'Mahonoba'.

Mahotiana Alba. Gexplant, Angers Catalogue, 1970-1971. Orthographic error for **Mathotiana Alba.**

Mahratta. (*C.sasanqua*), Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.255. No description. *What Camellia Is That?,* Macoboy, Stirling, 1997, pp38-39 with colour photo; Loose peony form, hot pink, outer petals somewhat recurved. Pink and gold stamens mixed with inner petals.

Mai. (Dancing), (*C.rusticana*), Ô'oka, Tokuji, 1985-1986, *Chinka-en:* Catalogue. On the cover page and p.2: Small red, campanulate single. Very early flowering. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.201, colour photo and description: Small size, red, campanulate single with 5 irregular petals and a central, yellow stamen column. Leaves mid-green, broad-elliptic to broad-ovate, apices abrupt acute, margins serrate. Originated in the Niigata Prefecture, Japan. A seedling of **Hinazuru.**

Mai Tai. (*C.reticulata* Hybr.), ACS., Feb.1989, *The Camellia Journal*, vol.44, No.1, p.12, Reg. No.2111: Miniature size, soft, baby pink, semi-double, chance seedling of **Nuccio's Ruby.** Originated by Houghton Hall, California, USA.

Maibulide. Shao, Taichong, 1992, *The Observations from the Camellia World*, p.10. Chinese synonym for the USA *C.japonica* **Barbara McBride.**

Maid of Honor. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Shell pink. Medium large, formal double. Medium, bushy growth. Blooms mid-season to late. Originated in the USA by Harvey Short, Ramona, California.

Maid of Mist. Mark S. Cannon Scion Catalogue, 1962, p.7. Abbreviation for **Maid of the Mist.**

Maid of Orleans. *(C.japonica),* Rubel, 1933, Wholesale Price List, No.60 and Choice Pot Grown Camellias, 1933, List No.63: Double white, rose form, striped with rose-pink. Has rose coloured sports. For colour pl. see Hume, 1946, *Camellias of America,* facing p.37, erroneously as 'Countess of America' and Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.I, p.93 for black & white photo. Synonyms: 'Countess of Orkney'(United States), 'Mackenzie Variegated'. Erroneously equated with **Countess of Orkney** and **Americana.**

Maid of the Mist. *(C.japonica), American Camellia Yearbook*, 1954, p.321 Reg. No.170: An 11 year old seedling of unknown parentage, originated by Hugh Shackelford, Albany, Georgia, USA. First flowered 1948. Plant growth is slow and compact. Leaves large, rounded, green. Flower buds very large, white. Flowers incomplete doubles with small petaloids, similar to **Elegans**, with 50-60 petals. Colour white. Size 13-15 cm. across, Early flowering. Abbreviation: 'Maid of Mist'.

Maiden. Vanderbilt, 1941, *Camellia Research, II,* p.4. Synonym for **Kumasaka.**

Maiden. (*C.sasanqua*), Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.255: Single, white with light pink tipped petals. Originated in USA.

Maiden Blush. Merten & Fontaine Catalogue, 1845. Synonym for **Incarnata.**

Maiden Blush. Sawada, Overlook Nurseries Catalogue, 1951-1952. Orthographic variant for the sasanqua **Maiden's Blush.**

Maiden Lane. *(C.japonica), American Camellia Yearbook*, 1960, p.201, Reg. No.440: An 8 year old seedling of unknown parentage that first bloomed 1957; originated by Camelliana, Antioch, California, USA. Plant growth is upright, open and rapid. The dark green leaves are 8 cm. long x 3.8 cm, wide. The clear, light pink flowers are semi-double, 8.5 cm. across x 7 cm deep and have long, narrow petals, overlapping each other to form a pine-cone effect. Flowers mid-season.

Maiden of Great Promise. *(C.japonica), Collected Papers,* ICS Congress, Kurume 2010, p.106, "Somatic embryogenesis….." Matthew Taylor et al, Longwood Gardens; Camellia Forest Nursery Catalogue, 2008, p.16 as 'Maidens of Great Promise'; Reputed to have originated in Ohio, USA, therefore very cold hardy. Medium to large pink peony flowers Late season. Compact plant.

Maidenblusch. Anonymous, Jan.1837, *Revue Horticole,* p.381. Synonym for **Incarnata.**

Maidenblush. Courtois, 1833, *Magazin d'Horticulteur*, 13pt.D4:310. Synonym for **Incarnata.**

Maiden's Blush. Curtis, Samuel, 1819, *Monograph on the Genus Camellia.* Synonym for **Incarnata.**

Maiden's Blush. (*C.sasanqua*), Sawada, Overlook Nursery Catalogue, 1933. A small size, blush pink, single, 5.5 cm across with 5 fluted petals, spreading, slender stamens with yellow anthers. Leaves mid-green, narrow-elliptic, 5 cm. long x 2 cm. wide. An old Japanese variety imported by Sawada, Alabama, about 1909. See colour photo, Sharp, 1957, *Camellias Illustrated,* p.89.

Maiden's Blush. *(C.hiemalis),* Haskins Nursery Ltd Catalogue, 1980: Shell pink, veined carmine. Originated in England.

Maiden's Blush. *(C.japonica),* Sawada, Overlook Nursery Catalogue, 1938-1939: Flesh pink veined deeper pink; medium size, formal double with incurved petals. Blooms mid-season. Believed

to have been imported from Japan by Sawada, Alabama, USA. Synonym: 'Japonica Flore Plena Virginia Rubra'.

Maiden's Blush. Rigall, Leslie, 1989. ACS., *The Camellia Journal*, vol.44, No.3, p.16. An invalid synonym for **Otome**, used in South Africa.

Maidens of Great Promise. Camellia Forest Nursery Catalogue, 2008, p.16; Obtained from Longwood Gardens as **Maiden of Great Promise.**

Maidôrô. (Votive Lantern Dance), *(C.pitardii* var. *yunnanica* hybr.*)*, JCS., 1989, *Japan Camellia*, No.33, p.13 with colour photo: Medium size, ivory white semi-double to peony form with 12-14 irregular, emarginate, waved and fluted petals in two rows, with a small, uneven, central stamen group with brownish-yellow anthers. Leaves small, elliptic, dark green, finely serrate. A seedling of *C.hiemalis* **Kanjirô** x *C.pitardii* var *yunnanica.* Originated in the Niigata Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.244 with colour photo; English translation p.171. Parentage stated to be *C.hiemalis* x *C.granthamiana*. Named and released by Kaoru Hagiya in 1989.

Maidzuru. Chûgai Nursery Catalogue, 1936-1937, p.19. Different reading for **Maizuru.**

Maifalan. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.413; Chinese synonym for the New Zealand *C.japonica* **Billie McFarland,** as 'Bill McFarland'.

Maiginu. Inazawa Nurseries Co. Ltd Catalogue, 1980-1981. Different reading for **Maigoromo.**

Maifubuki. (Dancing Snowstorm), *(C.japonica), Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.314: Medium size, peony form double, white with dense crimson speckles and dashes. Leaves elliptic, apex long-acuminate, shallowly serrate, olive green, prominent venation. See Seibundô Shinkôsha, 1979, *Senchinshû, p.*142 as 'Mai-fubuki' and Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.385. A pure white form is **Shiro-daikagura.** Named by Yoshizawa Chinju'en Nursery around 1967. From Saitama Prefecture. Chinese synonym 'Wuchuixue'.

Maigeshô. (Make-up for Dancing). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.244 with colour photo; English translation p.171. Medium to large, white semi-double to peony, occasionally with petaloids. Flowers early. Leaves broadly elliptic, medium size. Upright growth. A cross between *C.sasanqua* **Hitomaro** and *C.yuhsienensis.* Named and released by Kaoru Hagiya in 1982. From Niigata Prefecture.

Maigoromo. (Dancing Robe), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.142, colour photo, p.248, description: Large size, white with a faint pink cast, semi-double with streaks of soft pink and light red, 3 rows of petals, broad, emarginate, with a small, compact stamen cluster. Leaves small, lanceolate, serrations shallow. Different reading: 'Maiginu'. Originated in the Kantô district, Japan.

Maihime. (Pretty Dancer), (*C.rusticana*), Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.8; Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, p.213: Medium size, open peony form. Flowers peach pink with dark red streaking and deeper pink veining, petals with white borders. As the flower first opens it is cone centered, opening to an irregular centre with 120 stamens with dark yellow anthers. Leaves are short, petioles lightly hairy. Blooms late to very late. See Seibundô Shinkôsha, 1979, *Senchinshû*, p.142, colour photo, p.248, description. Originated in the Niigata Prefecture, Japan. Note: The colour pl.180 in Andoh's *Tsubaki, Meika no Shôkai to Saibai* is incorrect. Note: This name can mean "Prima Ballerina". Collected by Susumu Ishizawa, Named and released by Kaoru Hagiya.

Maijuru. Wada Nursery Catalogue, 1941. Corruption of **Maizuru.**

Maihua Guniang. Chinese synonym for USA *C. reticulata* hybr. **Flower Girl.**

Maika. Shao, Taichong, 1992, *The Observations from the Camellia World*, No.370, p.79. Chinese synonym for the USA *C.japonica* **Billie McCaskill.**

Maikirin. (Dancing Giraffe), *(C.japonica),* Minagawa, 1933, *Chinkashû.* Wada, 1941, *Garden Treasures of Japan:* Intense crimson, semi-double with large, smooth petals, cup shaped. Tuyama, 1966, *Camellia Cultivars of Japan,* pl. 118: Deep red, medium size, incomplete double with 4-5 rows of imbricated outer petals, about a small irregular group of stamen. A seedling of **Kôkirin** raised by Minagawa, Iza'emon in the Kantô district, Japan. Note: Kirin also means an imaginative creature, often alluding to an infant prodigy.

Mailin. *(C.oleifera hybrid). Das Deutsche Kamelien Buch,* 2014, Lucas Dhaeze-Van Ryssel; A seedling of *C.sasanqua x C.oleifera* hybrid **Survivor (Parks)** x *C.oleifera*. First flowered 2005. Originated by Peter Fischer, Wingst, Germany. A 6cm diameter, cup-shaped, white flower with 5-7 petals and yellow stamens. Dark green leaves, 8cm x 3.5cm, with prominent serration.

Mailinda. (Melinda), Gao, Jiyin, 30 July 1990. Chinese synonym for **Melinda Hackett.** Later changed to 'Hakete'.

Mainoni. *(C.japonica),* Burdin Maggiore & Co., 1849-1850, Catalogue General: Flowers self white or self Rose. Semi-double. Lichtenthal, 1852, *Manuele botanico enciclopedico popolare:* Semi-double, white and rose. Fratelli Rovelli Catalogue, 1852, p.21: Self white flowers, others self pink. Originated in Italy at Monza.

Mai-no-sode. (Dancing Sleeve), *(C.sasanqua),* Minagawa, Iza'emon, 1885, *Nisshôen* C*habaifu;* Tokio Catalogue, 1897, p.13: Pink shaded white. Pink is in irregular stripes. Large size, semi-double with curled petals. Originated in Tokyo Prefecture, Japan. Said to come from seedlings raised by Tomejiro Itô in 1850. Corruption of the name: 'Mae-nosode'. Synonym: 'Fukuzutsumi'(NZ). Chinese synonym: 'Xiuwu'

Mai-no-tamoto. (Dancing Sleeve), *(C.reticulata* hybrid*),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.29: Medium to large size, very pale blush pink, lotus form semi-double. Originated in the Niigata Prefecture, Japan as a seedling of *C.hybrid* **Barbara Clark** x *C.japonica* **Senbazuru.** Named and released by Kaoru Hagiya in 1980.

Mai-no-utena. (Dance Stage). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.244 with colour photo; English translation p.171. Medium size, pink graduating to white at the centre, white stripes on inner petals, cupped semi-double, split stamens. Flowers early. Leaves narrowly elliptic, medium size. Spreading growth. A cross between *C.x williamsii* **Elegant Beauty** and *C.rusticana* **Yuki-oguni.** Named and released by Kaoru Hagiya in 1984. From Niigata Prefecture.

Mainuosa. Gao, Jiyin, 1993, *The Observations from the Camellia World,* p.66, No.523. Chinese synonym for the New Zealand *C.x williamsii* **Mimosa Jury.**

Maio Agi. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.146. Corruption of the Japanese name **Mai-ôgi.**

Mai-ôgi. (Dancing Fan), *(C.japonica),* Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai,* p.213 as 'Maio-ôgi': Small size, campanulate single of 5 petals, blush ground with a fine peppering of red and occasional streaks. A compact, central cylinder of stamens with yellow anthers and pale cream filaments. A seedling of **Shûfûraku.** Originated by Sakuragi, Shun'ichi in 1970. See colour photos: Satô, 1975, *Chûbu no Tsubaki,* p.25: *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.121; Seibundô Shinkôsha, 1979, *Senchinshû,* p.142 as 'Maiôgi'(Chûbu). Different reading 'Maiohgi'. Synonym: 'Maiôgi'(Chûbu).

Mai-ôgi. (Dancing Fan), *(C.sasanqua),* Hakoda, JCS., 1987, *Tsubaki,* No.26, p.45; ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.34: Medium size, white shading to red, single. Early blooming. The original tree is growing in Kumamoto City, Japan. Designated as a Higo sasanqua by the Higo Sasanqua Society in 1968.

Maiôgi (Chûbu). Seibundô Shinkôsha, 1979, *Senchinshû,* p.142. Synonym for **Mai-ôgi.**

Mai-ôgi (Niigata). (Mai-ôgi from Niigata), (*C.rusticana*), Seibundô Shinkôsha, 1979, *Senchinshû,* p.142, colour photo, p.248, description: Medium size, red, anemone form with 9-11 outer guard petals in two rows, broad, irregular, notched with a cushion of small, erect, folded petals and petaloids. Originated in Nakauonuma-gun, Niigata Prefecture, Japan.

Maiohgi. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai,* p.213. Different reading for **Mai-ôgi.**

Mai-rôgetsu. (See Note), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, pp.376, 377, colour photo and description: Large size, light pink with densely peppered and streaked red, open peony form with a centre of golden stamens. Blooms mid-season. Leaves dark green, elliptic apices acuminate, margins serrate. Originated in the Hyôgo Prefecture, Japan. A seedling of **Rôgetsu** x **Maifubuki.** Note: This camellia was named after its parents, giving a translation of 'Dancing December'. Originated and named by Yoshihiko Mishima, released by Nobuo Sasai in 1982.

Maise Chettle. (*C.reticulata*), ACRS., 1982, *Camellia News*, No.83, p.22, Reg. No.281: Originated by T.E. Pierson, Hurstville, NSW, Australia. Parents *C.reticulata* **Buddha** x 'Cornelian' **(Damanao**) that first bloomed 1979. The 14 cm across x 10 cm. deep, lolly pink, loose, informal double flower, blooms mid-season to late. The open, upright plant has 12 cm x 5.5 cm lanceolate, dark green leaves, medium pointed apex, tapered base, distinct venation, prominent serrations and a short, medium stout petiole.

Maisugata. (Dancing Figure), *(C.hybrid),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.29: Medium size, white and pink, single with 5 incurved petals. Blooms mid-season. A seedling of *C.hiemalis* **Shishigashira** x *C.oleifera* 'Youxian'. Originated in the Niigata Prefecture, Japan.

Maize. Chinese synonym for USA *C. reticulata* **Edith Mazzei**.

Maizuru. (Dancing Crane), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* Greenish white, very large. Seibundô Shinkôsha, 1979, *Senchinshû*, p.142, colour photo, p.248, description: Large size, white, single of 6 petals and a spreading burst of about 120 stamens with light yellow anthers. Originated in Kumamoto Prefecture, Japan. Synonym: 'Higo-maizuru', 'Maizuru-Higo'. Note: "Maizuru" is also the name of a Japanese city.

Maizuru. (Dancing Crane), *(C.sasanqua),* Minagawa, Iza'emon, 1885, *Nisshôen Chabaifu;* Chûgai Nursery Catalogue, 1936-1937, p.19 as 'Maizuru': Rose shaded pink. Large semi-double. Prostrate, slow grower. Originated in Japan. Corruption of Japanese name: 'Maijuru'. Different reading: 'Maidzuru'. Note: "Maizuru" is also the name of a Japanese city.

Maizuru-Reikanji. (*C.rusticana*), Tuyama, 1968, *Camellias of Japan,* pl.281, p.141. Although published first, this name is now regarded as a synonym for Reikanji-maizuru.

Majestic. SCS., 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for 'Kôbotan' and 'Herme Pink', all are synonyms for **Benibotan.**

Majestic Queen. *(C.japonica),* SCCS., 1990, *Camellia Nomenclature*, p.70: Light pink, very large size, semi-double to loose peony. Medium, compact, upright growth. Blooms early to mid-season. Originated at Nuccio's Nurseries, Altadena, California, USA.

Majestic Snow. *(C.japonica),* SCCS 1993, *Camellia Nomenclature,* p.71. Originated at Nuccio's Nurseries, Altadena, California, USA. White, medium to large size semi-double. Average upright growth. Blooms early to mid-season.

Maji. (Maggi). Shao, Taichong, 1992, *The Observations from the Camellia World,* p.79, No.370. Chinese synonym for the Italian *C.japonica* **Lavinia Maggi.** Later changed to 'Kenmaji'.

Majiao. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.413; Chinese synonym for the USA *C.japonica* **Marjorie Magnificent.**

Major A.H. Walter. *(C.japonica)*, Dodd, 1968, *Adventure in Camellia Seedlings:* p.16, colour photo: Large, irregular, peony form; blush white ground, streaked and splashed carmine. Seedling of **Yobikodori,** originated by Richard Dodd, Marshallville, Georgia, USA.

Major Arthur T. Collette. *(C.japonica)*, Mellette, 1953, *American Camellia Yearbook*, p.295. No description. Originated in USA.Orthographic error 'Major Arthur Collett'.

Major Arthur Collett. Levi, 1967, *American Camellia Yearbook*, p.41. Orthographic error for **Major Arthur T. Collette.**

Major Lawrence Lewis. *(C.japonica)*, Gunnel, 1840, *Magazine of Horticulture,* 6:337: Originated by Gunnel, USA. It is a seedling of the old **Variegata.** The flower is a fine crimson, with 15 large, rose edged petals and 8 smaller, irregular petals, an imperfect style and a few anthers, green pericarp and foliage nearly like the 'Old Striped'.

Majorette. *(C.japonica), America Camellia Yearbook*, 1959, p.277, Reg, No. 402: An 11 year old chance seedling, originated by A.M. Hartman, San Fernando, California, USA, that first bloomed 1954. Plant growth is upright, dense and rapid with dark green leaves, 8 cm x 5 cm. The formal double flower is rose-pink, 10 cm across x 3.8 cm deep with 70 petals with a slight border of white on the edge and slightly darker veining. Blooms mid-season to late.

Majorie's Dream. SCCS 1996, *Camellia Nomenclature,* p.161. Orthographic error for **Marjorie's Dream.**

Major's Sawtooth. *(C.japonica),* ACS 1995, *The Camellia Journal*, vol.50, No.1, p.17, Reg. No.2311: Originated in USA by B.P. Livingston, and registered by Malcolm D. Smith, Prattville, Alabama. Red with white splotches, very large semi-double. ACS 1995, *American Camellia Yearbook*, p.7 with colour photo: The 30 year old seedling first flowered 1964. Average flower size is 12.5 cm across x 5.5 cm deep with 16 petals, 2 petaloids, yellow anthers and white filaments. Plant growth is upright with sawtooth edged dark green leaves 11 cm long x 6 cm wide. Synonym: 'Major's Sawtooth Variegated'.

Major's Sawtooth Variegated. SCCS 1996, *Camellia Nomenclature,* p.73. Synonym for **Major's Sawtooth.**

Makade. Chinese synonym for Australian *C. japonica,* **Aspasia Macarthur.**

Makalasi. Shao, Taichong, 1992, *The Observations from the Camellia World*, No.318, p.75. Chinese synonym for the Portuguese *C.japonica* **Dona Herzilia de Freitas Magalhaes.** Previously misspelled 'Makalari'.

Makang Furen. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.413; Chinese synonym for the USA *C.japonica* **Lady Macon.**

Makayana. Berlèse, 1840, *Monographie* ed.2, p.277. Orthographic error for **Mackayana.**

Makay's (Low). Verschaffelt, 1844, Catalogue, No.50, p.21. Verschaffelt Catalogue, 1846, p.55. Orthographic error for **Makoy.**

Makeslo. van Houtte Catalogue, 1849-1850, 38:45. Synonym for **Makoy.**

Makeyi. (McCoy). Gao, Jiyin, 1993, *The Observations from the Camellia World,* p.68, No.555. Chinese synonym for the USA *C.reticulata* hybrid **James McCoy.**

Makiginu. (Roll of Silk), *(C.japonica)*, Itô, Tokuemon, 1788, *Tsubaki Hanagata Tsuki Obo'echo.* Shirai-Bunko, 1789, *Shoshiki Hanagatachô; see* Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, p.5, p.79; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* as a red, double large size; see

JCS., 1969, *Tsubaki*, No.7, p.28: Large size, semi-double in two rows,, deep red, stamens spread like a bamboo whisk. Originated in Japan. (Believed extinct.)

Makihashira. (Scroll Support), *(C.japonica),* Itô, Toku'emon, 1788, *Tsubaki Hanagata Tsuki Obo'echo.* Shirai-Bunko, 1789, *Shoshiki Hanagatachô as* an egg coloured, formal double; see: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.77, as 'Maki-hashira'. No description. Originated in Japan. (Believed extinct.)

Makino-o. (Place name), *(C.japonica),* Chinka Zufu (before 1700), Watanabe, 1969, pl.157: Red with paler petal edges; rose form double. Originated in Japan. (Believed extinct.)

Makinowara-wase. (obscure), *(C.sinensis)* Kondô, 1978, *International Camellia Journal*, No.10. p.64. No description. Originated in Japan.

Makoy. *(C.japonica),* Loudon, 1835, *The Gardeners' Magazine*, p.143, as a hybrid between *C.japonica* **Insignis** x *C.euryoides.* However descriptions indicate that it is more likely a straight *C.japonica.* Oudin Nursery Catalogue, 1845-1846, p.45 as 'Makoyi': Beautiful form. Vivid red. Berlèse, 1849, *Annales de la Société Central d'Horticulture de France.* 40:80 as **Makoy de Low**: There are two camellias with the name **Makoy de Low**, one from M. Cels and the other from M. Verschaffelt. The second with a flower 10 cm across, formal double, loosely imbricated, cherry-red. The petals in 7 rows, deeply notched. The other is a peony form of clear red, almost rose, closely resembling **Triumphans.** The formal double form is considered the valid cultivar of **Makoy** and the name **Makoy de Low** is retained for the peony form Cels cultivar. Orthographic errors: 'Mackoii', 'Makeslo'. Synonyms: 'Makoyi', 'Makoy's Low', 'Makay's' (Low), 'Makay' (Low's).

Makoy de Low. *(C.japonica),* Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*:, 40:80: A peony form, clear red, almost rose, closely resembling **Triumphans.** The name is also a synonym for **Makoy** but used here as the valid name for the Cels variety. Synonyms: 'Makoy'(Low), 'Makoyi'(Low) 'Mackei'. Orthographic error: 'Mckay's Lowii'.

Makoyana. *(C.japonica),* Baumann, Mulhouse Nursery Catalogue, 1841-1842, p.41. No description. Originated in Belgium. (Believed extinct.)

Makoyi. van Houtte Catalogue, 1841, 7:12. Orthographic error for **Makoy.**

Makoyi (Low). Rousseau, Angers Nursery Catalogue, 1842-1843, p.3. Synonym for **Makoy de Low.**

Makoy's Low. Verschaffelt Catalogue, 1849-1850, p.48. Synonym for **Makoy de Low.**

Malbis Emperor. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1947-1948. No description. Originated in the USA by Malbis.

Malcolm Burke. *(C.reticulata). New Zealand Camellia Bulletin*, 1992, Issue No.112, vol.XVII, No.5, p.36, Reg. No.313. Originated by T.E. Burke, Whakatane, New Zealand. The 7 year old seedling first flowered in 1990. The plant is upright, open and of rapid growth with light green leaves 7 cm long x 3 cm wide. The semi-double flowers are 13 cm across x 7 cm deep with 17 petals and a few petaloids. The colour is cyclamen pink (RHS.CC.61D), with darker veining, some of the centre petals being tinged with white, especially the petaloids. The yellow stamens are mingled with the petals. Flowers mid-season to late.

Malcolm Roper. *(C.japonica),* SCCR, 1984, *Camellia Nomenclature*, p.68: Reddish pink. Large formal double. Medium, upright growth. Blooms mid-season. Originated in USA by L.C. Treston, Walnut Creek, California.

Malien. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p.119. Chinese synonym for **Marion Edwards.**

Maliflora. *(C.maliflora),* Edward's *Botanical Register*, 1827, t.1078: This species was imported from China to England in 1816 by Captain Richard Rawes for T.C. Palmer of Bromley. It was first illustrated in Curtis's *Monograph,* 1819 as 'Camellia Sasanqua flore pleno', or 'Double Blush Sasanqua'. Other early Pseudonyms were 'Sasanqua Rosea', 'Palmer's Double Sasanqua', 'Sasanqua Stricta', 'Sasanqua Rosea Plena', 'Sasanqua Roseo-Carneo', 'Sasanqua Multiflora', 'Sasanque Palmer's Double', 'Rose Coloured Sasanqua'. Synonym: 'Mrs Palmer's Camellia'. It was established as the species *Camellia maliflora* by Lindley in the *Botanical Register*, 1827. It is a densely leafed shrub, up to 2.5 meters tall; leaves oblong-elliptic, or broadly-elliptic; bluntly acute, 3.7-5 cm long x 1.8-3 cm wide, minutely denticulate, thinly leathery, dark green. Flowers semi-double, 3.5-4 cm across, blush rose, composed of numerous petals, stamens few, filaments white, anthers yellowish. It was later confused with the species *C.rosiflora* and was grown at Kew for many years under the name

C.rosiflora var. *flore pleno.* 'Temari-tsubaki' is the Japanese synonym. Others synonyms used were 'Maliflora Rosea Pleno' and 'Maliflora Lindley', 'Multiflora', 'Florida'(Multiflora) 'Betty McCaskill', 'Apple Flowered'. Orthographic errors: 'Malifolia', 'Maleflora', 'Malliformis', 'Malleflora'. Chinese synonym 'Yinghuacha'.

Mammoth. *(C.japonica).* Henderson, E.G., Catalogue. 1867, p.33: Very large flower. Proceedings of the RHS, 1861, p.168: Exhibited March 18th, 1860 at the RHS. A fine variety of American origin. flowers very large with 2 or 3 series of remarkable, broad, smooth deep crimson petals, sparingly blotched with white and having a close anemone centre. Originated in USA.

Mam'selle. *(C.japonica),* Wylam, 1957, *American Camellia Yearbook,* p.29: A semi-double seedling with flowers 11-12.5 cm across. delightfully cupped. The dainty, pointed petals of soft pink are flushed lavender. A compact, spreading plant with dark green leaves. A seedling of **Madge Miller** raised by McCaskill Gardens, Pasadena, California, USA.

Man Sixe. Bob Wine's Nursery Catalogue, 1985-1986, p.2. Orthographic error for **Man Size.**

Man Size. *(C.japonica), American Camellia Yearbook,* 1961, p.226. Reg. No.581: A 9 year old chance seedling of 'Magnoliiflora' (**Hagoromo**) that first bloomed 1957. Originated by W.R Wilson Jr., Hammond, Louisiana, USA. Plant growth is upright. open and medium in rate with mid-green leaves, 7.5 cm x 3.8 cm. The anemone form flowers are miniature. 5-6 cm across x 2.5-3.2 cm deep. The flowers are white with yellow stamens and have 12 petals and 98 petaloids. Blooms mid-season. Won the "William E Wylam Miniature Award", 1978, The "John Illges Award", 1979; The "John A. Taylor Miniature Award", 1979 and the "National Camellia Hall of Fame Award", 1979. Orthographic error: 'Man Sixe'. For colour photos see p.132, Macoboy, 1981, *The Colour Dictionary of Camellias* and pl.104, p.56, *Encyclopedia of Camellias in Colour*, vol.II, 1978. Chinese synonym: 'Nanzihan'.

Man To Lo. Chinese group name for camellia. Different reading: 'Manduole'. Synonyms: 'Shan-cha', 'Shancha Hua'.

Man To Lo Shu. Chinese group name for camellia. Different reading: 'Manduo Leshu'. Synonyms, 'Shancha', 'Shancha Hua'.

Mana Chaffin. *(C.japonica),* ACS 1995, *The Camellia Journal,* vol.50, No.1, p.15, Reg. No.2308: Medium size, bright rose outer petals fading to light pink, formal double *C.japonica* chance seedling. Originated in USA by Dr O.V. Lewis, Picayune, Mississippi. ACS 1995, *American Camellia Yearbook,* p.7 with colour photo: The 19 year old seedling first flowered 1975. Average flower size is 8 cm across x 2.5 cm deep with 40 incurved and swirled petals. Plant growth is upright with light green leaves 8 cm long x 5 cm wide.

Manana. *(C.japonica),* SCCS., Bulletin, vol.11, No.5, p.5, 1950: An **Imperator** seedling registered by R.C. Carr, Tulare, California, USA. Dark red, medium to large size semi-double to peony. Blooms early to mid-season. Fruitland Nursery Catalogue, 1950-1951, p.32. No description.

Fendig, 1951, *American Camellia Yearbook* with colour pl.: Large, dark, clear red (scarlet to crimson), incomplete double (anemone form) to complete double (formal), 10-11 cm across x 7.3-8 cm deep. Stamens are intermixed with petals. Bud is large and round. Leaves large, dark green, broad oval, 11 cm x 5.6 cm. Stiff. Tip prominent, veins raised, serrations medium coarse. Plant habit vigorous, sturdy flower long lasting. Originated by R.C. Carr, Carrs Camellia Garden, Tulare, California, USA from seed of **Imperator**. First flowered 1947. Registered with ACS., as No.43, 1954. See black and white photo, p.139, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III.

Manao. (Cornelian), *(C.reticulata)*, Yü & Feng, 1958, *Yunnan Shancha:* The leaves are long-oval and undulating, curved inwards, light green, 9.7 cm. x 4.6 cm with 54 serrations each side of leaf. Flower is bright red wth an occasional white spot, some extensively spotted, and some self red. Flowers mid-season. Originated in Yunnan, China.

Manao. (Cornelian), *(C.japonica)*, Wang & Yü, 1981, *Shancha Hua:* Red marbled white, formal double. Originated in China.

Manao Cha. (Cornelian Camellia), *(C.japonica)*, Wang, Xiangjin, 1621, *Qunfangpu.* No description. Ichijima, 1906, *Kokon Yôrankô:* Originated in Chekiang Province, China. Pinkish yellow looking like powdery white. Stamens large with red petaloids. Different readings: 'Marnao Cha', 'Ma-nao-cha'.

Manao Juban. (Cornelian Chrysanthemun Petal), *(C.reticulata), Chungkuo Shantung Moutan*, *Yunnan Chahua Chanlan*, 1974. No description. Feng et al., 1986, *Yunnan Camellias of China*, p.84, colour photo and description: Leaves elliptic to elliptic-ovate, reclinate in a V-shape, apices obtusely rounded, bases obtusely rounded to broad-cuneate, 5-7 cm long x 3-3.5 cm wide. Flowers light pink (RHS.CC. 52C), diameter 7-10 cm. Petals about 37 in 7-8 whorls with white spots, outer whorls comparitively large, inner whorls smaller, regularly imbricate. Stamens very few, undeveloped, pistils rudimentary. This is a new cultivar selected from a bud mutation of **Juban** from which it differs by having white spots. Flowers early. Different readings: 'Manaojuban', 'Marnaotsueban', 'Ma-nao Chü-pan'. Synonyms: 'Cornelian Rose', 'Cornelian Rose Flower', 'Cornelian Chrysanthemum'.

Manao Shizitou. Yü & Feng, 1958, *Yunnan Shancha Hua Tichih.* Different reading: 'Ma-nao Shih-tzu-t'ou', 'Mamaoshihzetou'. Synonym: 'Cornelian Rose Flower'. Synonym for **Damanao.**

Manao Songzike. (Cornelian Pine Cone), *(C.reticulata)*, Chuang, 1959, *Yunnan Shancha Hua:* A variegated form of **Songzike**- Rose-red blotched white. Blooms about 30 petals in 5-6 whorls, 8-10 cm across. Originated in China. Different readings: 'Na-nao Sung-tzu-k'o', 'Marnao-sungtzeke'. Synonym: 'Cornelian Pine Cone'.

Manao Zipao. (Comelian Purple Gown), *(C.reticulata), Chungkuo Shangtung Moutan, Yunnan Chahua Chanlan*, 1974. No description. Feng et al., 1986, *Yunnan Camellias of China*, p.82, as 'Manaozipao', colour photo and description: Leaves large, thick, brittle, flat, oblong, apices short-pointed or short-acuminate and slightly recurved, bases orbicular or obtusely rounded, 8-9 cm long x 4-5.2 cm wide. Flowers purple, (RHS.CC.53A-13) diameter 12-14 cm. Petals about 45 in 6-8 whorls, white spotted above, outer whorls flat, slightly reclinate at apex, inner whorls folded and erect to form a raised centre. Stamens mostly form small petaloids, a few being rudimentary. Pistils rudimentary. The flower is similar to **Zipao** but differs in having white spots on its petals. It is a bud mutation of **Zipao** which originated in Kunming, Yunnan, China. Flowers early to mid-season. Different readings: 'Ma-nao Tzu-p'ao', 'Manaozipao', 'Marnaotzepao'. Synonym:-'Cornelian Purple Gown'.

Manara. *(C.japonica)*, de Jonghe, 1851, *Traité de la Culture du Camellia*, p.112. No description. Luzzatti, 1851, *Collezione di Camelie* p.26: Magnificent, imbricated flower, bright pink spotted with white. Franchetti, 1855, *Collezione di Camelie*, p.43: Imbricated flower, bright rose speckled with white, deeper centre. Verschaffelt, 1857, *Nouvelle Iconographie*, Book VI,

pl.I: The blossoms, larger than average, are formed of numerous rounded or ovate petals, scarsely lobulate, outspread, convex, of a vivid, almost uniform, cherry-red, with a few faint white stripes at the centre. Originated in Italy by B. Lechi. Orthographic error: 'Mannara'.

Manaro Ferdinando. *(C.japonica),* Auguste van Geert, 1857, Catalogue, p.43, p.35. Ibid, 1863-1864, Catalogue, No.54, p.43: Imbricated rose.

Manasse. Franco Agostoni, 1844, *Catalogo Plantarum.* Cachet Catalogue, 1845-1846, p.3. Synonym for **Maddelena d'Italie.**

Manaza. *(C.japonica),* Escoula de Agricola Catalogue, 1882. No description. Originated in Spain. (Believed extinct.)

Manazuru. (Place Name), *(C.sasanqua).* Satomi. 1958, *Nomenclature List of Sasanqua of Japan*, p.12: Pink shaded white to edge. Large, semi-double with rather long petals. Originated in Japan.

Manazuru. (Place Name), (Higo), Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement.* p.69 as 'Mana-zuru': Flower white, 10 cm across, 6 petals. Stamens spreading, filaments white, anthers pale yellow. Petals curled to outside when fully open. Leaves, medium size, ovate. For colour photo: Seibundô Shinkôsha, 1979, *Senchinshû*, p.143 as 'Manazuru'(Higo). Originated in Kumamoto Prefecture, Japan.

Manazuru. (Place Name), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* as white with small streaks, double, large size. Itô, Ko'emon, 1879, *Chinkashû:* White spotted rose-pink, large, double. Originated in Japan. (Believed extinct.)

Manazuru (Chûbu). ('Manazuru' from Chûbu), *(C.rusticana),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.248: White, sometimes with red lines and small variegation, single, tubular to bowl shaped flowers with large, cylindrical stamen cluster. Size medium large. Early flowering. Leaves medium sized, wide-ovate, dark green; petioles hirsute. Plant habit tall, upright growing, vigorous. Originated in the Chûbu District, Japan. Sport of **Kamo-honnami** except for the red markings. It also resembles **Hakutsuru.**

Manchada. *(C.japonica), La Camelia .....Diputación Provincial de Pontevedra,* 2004, p.147, Register No.112. Small formal double, about 50 petals in varying shades of pink, with large white spots. Petals concave early, ageing to almost flat or convex. Leaf mid-green, glossy on both upper and underside, 8 cm x 4 cm, elliptic, denticulate, pointed apex. Flowers mid-season. Dense, compact, slow, upright growth. Originated by Maciñeira Nursery, Galicia, Spain.

Manchurian Crane. *Camellias,* Y.C. Shen, 2009, p.216 with colour photo; Synonym for **Tanchô.**

Mandalay. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Red, irregular double, mid-season. SCCS, 1954, *The Camellia. Its Culture and Nomenclature,* p.61: Rose-red. Large, full peony form showing distinctly separate anemone form flower in the centre. Vigorous, compact, upright gowth. Mid-season blooming. Originated in USA by Harvey Short, Ramona, California.

Mandalay Queen. (*C.reticulata*), Shade & Shadow Nursery Catalogue, 1963. No description. *American Camellia Yearbook*, 1967, p.230, Reg. No.958: A 10 year old chance seedling of 'Tali Queen' (**Dali Cha**) that first bloomed 1961. Originated by the Shade & Shadow Nursery, Mountain View, California, USA. Plant growth is upright, open and rapid in rate with dark green leaves, 12 cm x 6 cm. The semi-double flowers, similar to **Frizzle White,** are 14.5 cm across x 8 cm deep with 38 petals and 4 petaloids. Colour is rose-pink with yellow anthers. Petaloids variegated. Blooms mid-season. Received the "Aubrey Harris Hybrid Award", 1975 and the "Frank L. Stormont Reticulata Award", 1970. For colour photo see Macoboy, 1981, *The Colour Dictionary of Camellias*, p.161.

Mandalay Queen Variegated. *(C.reticulata)*, Gentry, 1969, ACS., *The Camellia Journal*, vol.24, No.4 as 'Mandalay Queen V.' A virus variegated form of **Mandalay Queen** - Rose-pink blotched white. Orignated in USA.

Mandarin. *(C.japonica), Anonymous*, 1948, *American Camellia Yearbook* p.168: McCaskill Gardens' seedling No.73. This full, complete double, irregular camellia is a brilliant, glowing red. The flowers are 10 cm. across. Growth habit, upright, bushy and vigorous. Leaves are mid-green, elliptic, serrate, 8 cm x 3.8 cm. First flowered 1941. Blooms early to late. Unknown parentage. Originated at McCaskill Gardens, Pasadena, California, USA. Registered as No.42 with the SCCS. in 1949.

Mandarin Variegated. *(C.japonica)*, Levi, 1958, *American Camellia Yearbook*-, pp.241, 251 as 'Mandarin Var.': A virus variegated form of **Mandarin** - Glowing red marbled white. Originated in USA.

Mandi. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars*, p.119. Chinese synonym for **Mandy Smith.**

Mandi Xiaojie. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.426; Chinese synonym for the USA *C.japonica* **Miss Mandie.**

Mandie Shuman. *(C.japonica),* ACS., 1988, *The Camellia Journal*, vol.43, No.1, p.6, Reg. No.2073: A very large, pink with white edges, streaked deep pink, anemone form *C.japonica* chance seedling. Flowers mid-season to late. Originated in USA by Johnny Aldrich, Brooklet, Georgia. *American Camellia Yearbook*, 1988, p.189, colour photo between pp.186-187: The 15 year old seedling first bloomed 1978. Average flower size 13 cm, across x 6 cm. deep with 12 petals, 18 petaloids, yellow anthers and white filaments. Plant growth is upright and medium with light green leaves, 7.5 cm. x 2.5 cm.

Mandokoro. (see below), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.183, p.93, description, p.143: Large leaved snow Camellia. Leaves dark green, flat, 7.8-10.8 cm long x 3.8-6.6 cm wide; petioles 7.5-9 mm long, very hairy. Flowers semi-double, widely cup-shaped, ultimately recurved, rosy claret (Claret rose 021). Petals 12-16, largest 5.6 cm x 5.7 cm, widely undulate outside the stamens, with 1-3 petal-like petaloids. Flowers mid-season. Originated by Mr Hiroji Togashi, Niigata Prefecture, Japan. The name alludes to a woman of ancient times who was noted for her strong political power in the government. Seibundô Shinkôsha 1979 *Senchinshû*, p.144 colour pl.

Mandosa. *(C.japonica)*, Cachet Catalogue, 1845-1846, p.7. No description. (Believed extinct.)

Mandy. *(C.rosiflora* hybr.), ACRS., 1984, *Camellia News*, No.91, p.22, Reg. No.322: Originated by Edgar R. Sebire, Wandin North, Victoria, Australia. A seedling of *C.rosiflora* that first flowered 1982. Semi-double, pale pink, miniature, perfumed flowers produced abundantly, mid-season to late. The plant has an open, weeping habit with mid-green, 8 cm x 3 cm, lanceolate leaves with long, tapering apex and fine serration.

Mandy Lane. *(C.japonica),* SCCS 1996, *Camellia Nomenclature*, p.73. Pink, medium to large size, formal double with incurved petals. Average, open, upright growth. Blooms mid-season. Originated in USA by E. Attains, Shalimar, Florida.

Mandy Smith. (*C.reticulata* hybrid). Valdosta Camellias, ACS., Nov.1990, *The Camellia Journal*, vol.46, No.4, p.22. No description. *American Camellia Yearbook*, 1992, p.35, Reg. No.2227: A very large, heavily frosted red, peony form *C.reticulata* [**Damanao** ('Cornelian') x **Jean Pursel**]. Originated by Frank Pursel, Oakland, California, USA. The seedling first bloomed in 1984. Average flower size is 115 cm across x 9.5 cm deep with golden stamens and red filaments. Plant growth is upright, average and rapid in rate with dark green leaves 13 cm long x 5 cm wide.

Maraschino. *(C.japonica),* Vanderbilt, 1940, *Camellia Research*, p.5. No description. McIlhenny Catalogue, 1941: Small, fully imbricated, tyrian pink, each petals blotched in the centre, sometimes from base to tip with white; small, rose-bud like centre. Blooms mid-season. Originated in USA by Doty & Doerner. See black and white photo, p.218, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Marble Column. (*C.sasanqua* hybrid). *New Zealand Camellia Bulletin,* March 1999, Issue No.132, vol.XXI, No.1, p.13, Reg. No.395. Registered by N. Haydon, Takanini, New Zealand. A seedling of the *C.sasanqua* x *C.fraterna* cross **Yoimachi** x an unknown pollen parent, which first flowered in 1992. The plant is fast-growing, has a slender, fastigate, upright form, can set several buds at each leaf axil, and flowers early to late. Flower is single, 6 cm diameter x 1.5 cm deep, having 6-7 recurving, obcordate petals of heavy texture. Petals are pink (RHS.CC.65B) at the outer edge shading to near-white at the centre, giving an overall colour impression of light pink (RHS.CC.65C). The name evokes the spire-like appearance of the plant when in flower.

Marble Halls. *(C.japonica),* SCCS., 1956, *The Camellia, Its Culture and Nomenclature*, p.64: White, pink, rose and variegated. Medium size, semi-double. Vigorous, bushy growth. Blooms mid-season to late. Originated by Harvey Short, Ramona, California, USA.

Marbled White. *(C.japonica),* Fruitland Nursery Catalogue, 1944-1945, p.27. No description. Originated in USA. (Believed extinct.)

Marbury's 100. Cannon, 1966, ACS., *The Camellia Journal*, vol.21, No.l. No description. Originated in USA. No valid listing located.

Marc Den Blauch. *(C.japonica),* Peer, 1956, *American Camellia Yearbook*, p.56. No description.

Marc Eleven. *(C.japonica),* SCCS., 1970, *Camellia Nomenclature*, p.91: Cherry red. Large semi-double with wavy, upright petals. Vigorous, spreading, upright growth. Blooms mid-season to late. Originated by J.L. Mandarich, Menlo Park, California, USA. This cultivar was registered by the ACS. under the orthographic error: 'March Eleven', in *American Camellia Yearbook*, 1972, p. 132, reg. No.1192. Sport: **Marc Eleven Variegated.**

Marc Eleven Variegated. *(C.japonica),* Gentry, 1969, ACS., *The Camellia Journal*, vol.24, No.4 as 'Marc Eleven V.': A virus variegated form of **Marc Eleven** - Cherry red and white. Originated in USA.

March Eleven. *American Camellia Yearbook*, 1972, p.132, Reg. No.1192. Orthographic error for **Marc Eleven.**

Marcehal Mac-Mahon. Rovelli Catalogue, 1874, p.29. Orthographic error for **Maréchal MacMahon.**

Marcel Valois. *(C.japonica), American Camellia Yearbook*, 1962-1963, p.221, Reg. No.605: A 9 year old chance seedling that first bloomed 1959. Originated by T.C. Patin, Hammond, Louisiana, USA. Plant growth is upright, and medium with dark green leaves, 8 cm x 4.5 cm. The semi-double flowers, similar to **Frizzle White**, are 6 cm across x 3.8 cm deep with 19 petals and 16 petaloids. The ruby red (HCC.827/1) flowers have white filaments and golden yellow anthers. Blooms early to mid-season.

Marcella Hovey. *(C.japonica),* SCCS., 1966, *Camellia Nomenclature*, p.86: Light pink, veined and spotted deep red. Large formal double. Vigorous, compact, upright growth. Mid-season blooming. Orignated in USA by J.D. O'Connor, Red Bluff, California.

Marcellina. Verschaffelt Catalogue, 1844-1845, No.50, p.26. Orthographic error for **Marcellino.**

Marcellino. *(C.japonica),* Isola Madre Catalogue, 1845. No description. Originated in Italy. Orthographic error: 'Marcellina'. (Believed extinct.)

Marchioness de Exeter. McIlhenny, 1937, *600 Varieties of Camellias.* Orthographic variant for **Marchioness of Exeter.**

Marchioness of Exeter. *(C.japonica)*, Harrison ed., 1838, *Floricultural Cabinet*, vol.6, opposite p.97, illustrated p.120 described as a large, pink, formal double. Raised by James Priaulx, Guernsey, from seed of 'Middlemists' (**Middlemist's Red**). The plant combines the vigor of that variety with the valuable property of a profuse bloomer. Berlèse, 1840, *Monographie*, ed.2, p.97 as 'Marquise d'Exeter: We do not have the description of this flower but Harrison's *Floricultural Cabinet*, May,1838 says that it is the largest flower known in England. It is very full, well made, pink and showy. Figured and described by Berlèse, 1843, *Iconographie*, vol.3, pl.298: The flower, 14-15 cm in diameter, is full complete double; colour rose, more or less intense with a touch of velvet red. The petals in 9-10 rows, are numerous, cupped, rounded, lightly emarginate, the others entire, a few deeply notched, symmetrically imbricated from the circumference to the centre. Verschaffelt, 1849, Nouvelle Iconographie, Book XI, pl.III as 'Marquise d'Exeter'. Orthographic variants: 'Marquis d'Exeter Pink', 'Pink Marchioness of Exeter', 'Marchionnes of Exeter', 'Marchioness de Exter', 'Marchioness de Exeter'. Orthographic errors: 'Marchionessao Fexeter', Marchiones of Exeter'. Sport: **Rosularis.** Synonyms: 'Marquisa', 'Bright Pink', 'Candy Pink'. Magnolia Gardens, South Carolina, USA listed a cultivar of their own raising as 'Marquis of Exeter' from their 1942-1943 catalogue and on. This became confused with the true **Marchioness of Exeter** in USA. Chinese synonym 'Houjue Furen'.

Marchioness of Exeter Variegated. Lindo Nurseries Price List, 1946, p.9 as 'Marchioness of Exeter Var'. Synonym for **Rosularis.**

Marchioness of Hastings. Ed Pynaert van Geert Catalogue No.6, 1877-1878, p.45. Orthographic variant for **Countess of Hastings.**

Marchioness of Lorne. *(C.japonica)*, Burbridge, F.W., 1876, *The Floral Magazine*, ser.2, pl.205: Medium size, formal double to rose form double, bright red with white stripes and blotches. Originated in England.

Marchioness of Salisbury. *(C.japonica)*, Franchetti, 1855, *Collezione di Camelie*, p.45. No description. Originated in Italy. (Believed extinct.)

Marchioness of Salisbury. *(C.japonica)*, Gerbings Azalea Gardens Catalogue, 1938-1939: Peony form flower of darkest red marbled white, about 8 cm. across. Narrow light green foliage. Slow, tall, angular, willowy growth. Mid-season to late flowering. Originated at Magnolia Gardens, South Carolina, USA. Orthographic error: 'Marchioness of Salsbury'. See black and white photo, p.219, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Margaret. *(C.japonica).* Fendig, 1953, *American Camellia Catalogue.* Rose pink. Large peony form with stamens in several clusters amongst the petals. Early blooming. Originated by Clower. Florida, USA.

Margaret Alwyn. *(C.japonica),* ANZCRS., 1957, *Camellia Annual*, No.4, p.7, Reg. No.16: Originated by Dr R. Merrillees, St Kilda, Victoria, Australia. Seedling of **Gloire de Nantes.** Incomplete double flower, 10-11 cm across. Colour rose-pink. Flowers mid-season.

Margaret Bardsley. *(C.japonica),* Anonymous, 1948, *American Camellia Yearbook*, p.175: Originated by Bradford's Wayside Nursery, Ocean Springs, Mississippi, USA. First bloomed 1938. An upright, vigorous grower with dull green foliage, leaves rounded, venation pronounced, slightly serrate. A chance seedling. Incomplete double, petals wide and well spaced, interior of the flower composed of numerous petaloids and stamens intermixed. Size 9-10 cm across, colour deep rose-red with some centre petaloids marbled white. Flowers mid-season. Sport: **J.S. Bradford.**

Margaret Bernhardt. *(C.reticulata* hybr.), *American Camellia Yearbook*, 1982, p.175, Reg. No.1820: A large to very large, rose-red, formal double, *C.reticulata* hybrid ('Crimson Robe' [**Dataohong**] x **Jean Pursel**). Blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 7 year old seedling first bloomed 1982. Average flower size,

12-13 cm across x 6 cm deep. Plant growth is upright and medium with dark green leaves, 10 cm x 7 cm. Chinese synonym: 'Benhate'.

Margaret Burstal. *(C.japonica),* ACRS., 1966, *Camellia News*, No.24, p.36, Reg. No.72: Originated by Dr A.C. Burstal, Tuross Head, via Moruya, N.S.W., Australia as a seedling of 'Sodekakushi', (**Gauntlettii**), first flowered 1962. Informal double flower, 11 cm across, of flat form with large, outer petals and a petaloid and stamen centre. Colour is the palest, flesh pink.

Margaret Calleoni. Geo. Jackson & Son, 1955-1956, p.17. Orthographic error for **Margherita Coleoni.**

Margaret Carbone. Merrillee's Shere Catalogue, 1951. Synonym for **Margherita Coleoni.**

Margaret Clower. *(C.japonica),* Harris' Longview Nursery Retail Price List, 1955-1956, p.7. No description. Originated in USA.

Margaret Crozier. *(C.japonica),* ANZCRS., 1957, *Camellia Annual*, No.4, p.7, Reg. No.18: Originated by C.R Cole, Canterbury, Victoria, Australia. Parents **Spencer's Pink** x **Elegans,** handcrossed 1946. Flower incomplete double, 10 cm across. Colour delicate pink. Vigorous, upright grower. Early bloomer.

Margaret Crutcher. *(C.japonica), American Camellia Yearbook*, 1977, p.215, Reg. No.1409: A very large, bright red, anemone form. An 8 year old chance seedling that first bloomed 1971. Originated by C.C. Crutcher, Theodore, Alabama, USA. The anemone form bloom has golden anthers and filaments, size 14-15 cm across. Plant growth is spreading and dense, with dark green leaves, 12 cm x 5cm.

Margaret D. O'Connor. *(C.japonica), American Camellia Yearbook*, 1965, p.241, Reg. No.692: [SCCS. No.62-28]. A 5 year old seedling that first bloomed 1962. A seedling of **Tricolor Superba.** Originated by George Harvey, Red Bluff, California, USA. Flowers are deep pink with yellow stamens and up to 13 cm across x 5 cm deep, waxy looking, like crêpe paper, semi-double in form.

Margaret Davis. *(C.japonica),* ACRS., 1963, *Camellia News*, No.12, p.24, Reg. No.54: Originated by A.M. Davis, Cammaray, N.S.W., Australia. A sport of **Aspasia Macarthur** which originated in 1958. Except for colour the flower is a typical **Aspasia Macarthur**. Characteristics: Colour cream with the petals brilliantly edged with rose in the manner of the Azalea 'Albert & Elizabeth'. Sports: **Margaret Davis Ashley, Margaret Davis Picotee.** Orthographic error: 'Margareth Davis'. Received the "William Hertrich Award", 1969; the "Sewell Mutant Award", 1976 and the "William E. Woodroof, Hall of Fame Award", 1979. For colour photos see: pl. facing p.114, 1976, *American Camellia Yearbook;* pp.55 & 102, Macoboy, 1981, *The Colour Dictionary of Camellias;* front cover, *New Zealand Camellia Bulletin*, vol.VII, No.2; front cover ACRS, 1965, *Camellia News*, No.20: *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.21. Chinese synonym: 'Kuancaidai'.

Margaret Davis Ashley. *(C.japonica), American Camellia Yearbook*, 1983, p.162, Reg. No.1898: A medium white to creamy white, with heavy dashings of vermilion from outer petal edges towards the centre of bloom, a peony form *C.japonica* mutant of **Margaret Davis.** Blooms early to mid-season. Originated by Gene King, Monroe, Louisiana, USA. First year observed 1981. Flower characteristics same as parent. Plant growth upright and medium with dark green leaves.

Margaret Davis Benten. *(C.japonica),* Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.147 with colour photo; Synonym for **Bianye Kuancaidai.**

Margaret Davis Picotee. *(C.japonica), American Camellia Yearbook*, 1982, p.175, Reg. No.1813: A medium white to creamy white, edged vermilion, peony form *C.japonica* mutant of **Margaret Davis,** early to mid-season. Originated in USA by Williarn E. Woodroof, Sherman Oaks,

California, USA. Characteristics of flower and plant same as parent. Chinese synonym: 'Zhaicaidai'.

Margaret Dykes. *(C.japonica),* Anonymous, 1949, *American Camellia Yearbook*, p.248: A seedling from Camellia Nurseries, Tallahassee, Florida, USA. A loose, semi-double with varying formation. Rose-red veined blood red. Orthographic error: 'Mrs Mararet Dykes'.

Margaret Ellen. *(C.japonica),* ANZCRS., 1958, *Camellia Annual*, No.5, p.30, Reg. No.19: Seedling of **Strawberry Blonde,** originated by Mrs M. Thompson, Pymble, N.S.W., Australia. First flowered 1956. Formal double of slightly deeper shade of salmon pink than its parent. Foliage, dark, glossy green. Blooms early to mid-season.

Margaret Ferris. *(C.japonica), American Camellia Yearbook*, 1969, p.164, Reg. No.1041: A 6 year old chance seedling that first bloomed 1966. Originated by B.C. Ferris, Orlando, Florida, USA. Plant growth is upright, open and medium in rate with dark green leaves, 7.5 cm x 3.8 cm. The semidouble flowers, similar to 'Herme' (**Hikarugenji**) are 10 cm across x 6 cm deep with 26 petals and 4 petaloids. Pure white wih a few pink streaks, yellow anthers and white filaments. Early blooming.

Margaret G. Gill. (*C.reticulata* hybrid). *American Camellia Yearbook*, 2009, p.114 with colour photo; Regn No.2761; A cross, first flowered 2002, of [*C.pitardii* var. *yunnanica* x *C.reticulata* hybrid **Forty-Niner**] x [(*C.pitardii* var. *yunnanica* x *C.fraterna*) x *C.japonica* **Tom Knudsen**]. Originated by Daniel Charvet, Heartwood Nursery, Fort Bragg, Calif., USA, and registered by Margaret Gill, Atherton, Calif. Medium size flower is 9 cm diameter x 5 cm deep, orchid picotee shaded darker towards the edges. Golden anthers and white filaments. 19-22 petals. An upright, open plant with average growth rate. Dark green leaves average 7.5 cm x 3.2 cm. Flowers early to mid-season. Note; SCCS, Supplementary List 2011 has 'Purple Gown' (**Zipao**) instead of **Forty-Niner**.

Margaret Gullion. Vanderbilt, 1941, *Camellia Research, II*, p.4. Orthographic error for **Marguerite Gouillon.**

Margaret Haughery. *(C.japonica),* McIlhenny Camellia Catalogue, 1945-1946, p.12: A small, pure white, loosely imbricated; inner petals cupped around a tight, white bud. Originated at Jungle Gardens, Louisiana, USA.

Margaret Hearn. *(C.japonica),* SCCS., 1942, *Classification of Camellias*, p.5: Red. Small peony form. Vigorous, bushy growth, Fragrant. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.48: Red anemone form, 8 cm across. Blooms mid-season. Originated in USA by Clarence Hearn, Arcadia, California, USA from **Cheerful** x **Daikagura.** First flowered 1934. Leaves dull green, elliptic, 8 cm x 4 cm. Apex sharp and recurved, raised venation, texture thin. serrulate. For black and white photo see, p.140, Hertrich. 1959, *Camellias in the Huntington Gardens*, vol.III.

Margaret Hertrich. Wilmot *Camellia Variety Classification Report*, 1945, p.7. Orthographic error for **Margarete Hertrich.**

Margaret Hertrick. Coolidge Rare Plants Gardens Camellia Catalogue, July, 1950. Orthographic error for **Margarete Hertrich.**

Margaret Higdon. *(C.japonica).* Gerbing's Azalea Gardens Catalogue, 1941-1942: Loose, peony-like, brilliant rose-red in colour, each petal of the 10-12 cm flower is margined with white. Medium. glossy green foliage. Leaves elliptic. prominent venation, apex long-acuminate, finely serrulate. Originated by Simon's Nursery. Charleston. South Carolina. USA from chance seed. First bloomed 1937. Synonyms: 'Elizabeth Grandy'. 'Elizabeth Higdon'. Sport: **Margaret Higdon Variegated.** For colour photos see: G.G. Gerbing. 1945, *Camellias.* p.145; Fendig. 1951, *American Camellia Catalogue.* Macoboy, 1981, *The Colour Dictionary, of Camellias,* p.102.

Margaret Higdon Variegated. *(C.japonica)*, Fruitland Nursery Catalogue, 1943-1944, p.28: A virus variegated form of Margaret Higdon- Brilliant rose-red blotched white. Originated in USA.

Margaret Hildord. Bob Wine's Nursery Catalogue, 1985-1986, p.6. Orthographic error for **Margaret Hilford.**

Margaret Hilford. *(C.reticulata)*, *New Zealand Camellia Bulletin*, 1979. vol.XI, No.3, p.21, Reg. No.148: A chance seedling of *C.reticulata*, grown by J.N. Rolfe, Hamilton, New Zealand, and first flowered 1977. Plant habit. upright, open and fast growing; foliage, mid-green, reticulate, leaves measuring 11 cm x 5.5 cm. Flowers semi-double. 12-13 petals and occasional petaloids; filaments white, anthers gold. Size. 13 cm across x 5 cm deep and colour very deep red (RHS.CC.Red- Purple Group 60A-B). Blooms early to mid-season. Sport: **Margaret Hilford Variegated.** Orthographic error: 'Margaret Hildord'. See colour photo: front cover, *New Zealand Camellia Bulletin.* vol.XIV, No.1. 1985.

Margaret Hilford Variegated. *(C.japonica).* Valdosta Camellias. 1986, ACS., *The Camellia Journal*, vol.41, No.4. p.9 as 'Margaret Hilford V.'. A virus variegated form of **Margaret Hilford-** Very deep red, blotched white. Originated in USA.

Margaret Jack. Vanderbilt. 1940, *Camellia Research*, p.5. Synonym for **Finlandia Variegated.** Note: 'Margaret Jack' was published prior to **Finlandia Variegated** but as the latter is now in universal usage it is let stand as the valid name over 'Margaret Jack'.

Margaret Johnson. *(C.japonica)*, *American Camellia Yearbook*, 1973, p.193, Reg. No.1254: A 12 year old chance *C.japonica* seedling that first bloomed 1963; originated by Frank D. Bisbee, Jacksonville, Florida, USA. Plant growth is upright, spreading and medium in rate with dark green leaves, 8 cm x 5 cm. The formal double bloom has 65-70 petals. The colour is white and size 11 cm across x 3.8 cm deep. Heavy texture and prolific. Blooms early to mid-season.

Margaret K. Cutter. *(C.japonica)*, ACS, *Quarterly*, 6(2):8: A seedling of unknown parentage from the Domoto Nursery, California, USA. Plant growth is upright, slow and medium in density; blooms early, sets seed. Buds ovate and green. Flower is single, colour rose-opal (RHS Chart), 8-10 cm across.

Margaret Lawrence. Magnolia Gardens and Nursery Catalogue, 1942-1943, synonym for **Vedrine** as 'Ruby Glow'.

Margaret Lesher. *(C.japonica)*, *American Camellia Yearbook*, 1992, pp.35-36, Reg. No.2267: A medium to large size, red, rose form double *C.japonica* chance seedling that blooms early to mid-season. Originated by Robert E. Ehrhart, Walnut Creek, California, USA. The 10 year old seedling first flowered 1987. Average flower size is 10 cm across x 2.5 cm deep with 60 petals. The red blooms have a purple cast. Plant growth is upright and average with dark green leaves 10 cm long x 4.7 cm wide. Chinese synonym 'Laishe'.

Margaret Lyle. *(C.sasanqua).* C. Aust, *Camellia News*, No.182, Autumn 2010, p.7 with colour photo; Regn No.603-N; Deep red, large informal double. Bushy upright growth. Flowers early to mid-season. Originated by Bill Parker, Camellias-R-Us, Glenorie, NSW, Australia.

Margaret Madsen. Fendig, 1953, *American Camellia Catalogue.* Abbreviation for **Mrs Margaret Madsen.**

Margaret McCown. *(C.japonica)*, Domoto Price List, 1956, p.3. Virus variegated form of **Catherine McCown** - Light pink and white. Medium size. Originated in USA by Shepp. Synonym: 'Driftwood'.

Margaret McLendon. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue.* Rose-pink. Large, flat semi-double. Originated in USA by Coleman.

Margaret Magnificent. Fruitland Nursery Catalogue, 1949-1950, p.28. Orthographic error for **Marjorie Magnificent.**

Margaret Nielsen. (*C.reticulata* hybrid). *New Zealand Camellia Bulletin,* 1992, Issue No.112, vol.XVII, No.5, p.36, Reg. No.312: Originated by A.P. Gamlin, Manaia, New Zealand 10 years ago, and first bloomed 1985. It is of upright growth, average density and medium rate of growth. The leaves are light green, 14 cm long x 6 cm wide. The blooms are semi-double, 15 cm across x 7 cm deep. Colour is fuschia pink. The blooms have upright centre petals and yellow anthers on cream filaments. Blooms early to late.

Margaret Noonan. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Light, rosepink, striped and splashed darker rose-pink. Medium size, incomplete double to peony form, 9-10 cm across x 5 cm deep with 18 petals and intermixed with yellow stamens. Vigorous, open, upright growth with glossy, dark green, lanceolate leaves. Originated by W.S. Duncan, Pensacola, Florida, USA as a chance seedling. Reg. No.49 with ACS, 1950. Sport: **Margaret Noonan Variegated.**

Margaret Noonan Variegated. *(C.japonica),* Laurel Lake Nursery Catalogue, 1964 as 'Margaret Noonan Var'. A virus variegated form of **Margaret Noonan** - Light rose-pink and white. Originated in USA.

Margaret Pond. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1964-1965, p.10. No description. Cannon, 1966, *American Camellia Yearbook,* p.72: Originated by Dr & Mrs Habel Jr., Suffolk, Virginia, USA. This seedling is white with a red background. Not too large. Synonym: 'Margaret Pond Variegated'.

Margaret Pond Variegated. Mark S. Cannon Scion Catalogue, 1964-1965, p.10 as 'Margaret Pond Var'. Synonym for **Margaret Pond.**

Margaret Price. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1964-1965, p.12. No description. Originated in USA. No valid listing located.

Margaret Radcliffe. Fendig, 1951, *American Camellia Catalogue.* Orthographic error for **Margaret Ratcliffe.**

Margaret Ratcliff. Riverview Nursery Catalogue, 1957-1958, p. 12. Orthographic error for **Margaret Ratcliffe.**

Margaret Ratcliffe. *(C.japonica),* Fendig, 1951, *American Camellia Catalogue* with colour pl. as 'Margaret Radcliffe': Medium to large, delicate, shell-pink shading to white, semi-double, 10-11 cm across. Until fully open, some central petals tend to remain semi-erect. The petals are obovate and crinkle towards the tip. Filaments white, anthers yellow; bud long, oval and with pink tip. Leaves dark, dull green. oval. 7.5 cm long x 4 cm wide. short apex, prominent, raised veins, finely serrulate. Plant habit erect. vigorous and a profuse bloomer. Originated by C.S. Tait Sr., Brunswick, Georgia, USA from seed of unknown origin.

Margaret Rose. *(C.japonica),* RHS. 1955, *The Rhododendron and Camellia Yearbook,* No.9. p.82. No description. Hyden Nurseries Ltd Catalogue. 1972. p.29: Formal double pink. Originated in England.

Margaret Sandusky. Semmes Nursery Catalogue, 1945-1946. Synonym for **Rosea Superba Variegated.**

Margaret Sandusky Pink. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Rosea Superba.**

Margaret Sears. Bob Wine's Nursery Catalogue, 1985-1986, p.3. Orthographic error for **Marguerite Sears.**

Margaret Short. *(C.japonica),* SCCS., 1956, *The Camellia. Its Culture and Nomenclature,* p.64: Deep lavender pink. Large, irregular semi-double with erect, fluted petals around a centre of blonde stamens. Medium, compact growth. Blooms mid-season. Sport: **Margaret Short Variegated.**

Originated by Harvey Short, Ramona, California, USA. See colour pl. facing p.50, 1959, *American Camellia Yearbook.*

Margaret Short Variegated. *(C.japonica)*, SCCS, 1960, *Camellia Nomenclature*, p.76: A virus variegated form of **Margaret Short** - Deep lavender pink, marbled white. Originated in USA.

Margaret Tourji. River View Nursery Catalogue, 1957-1958. Orthographic error for **Marguerite Tourje.**

Margaret Turner. River View Nursery Catalogue, 1957-1958. Orthographic error for **Marguerite Turner.**

Margaret Vickery. (*C.reticulata* hybr.), SCCS., 1990, *Camellia Nomenclature*, p.129: Deep to blush pink. Large size, semi-double to peony form. Vigorous, open, upright growth. Blooms mid-season. (Retic. hybrid **Pink Sparkle** x **Jean Pursel**). Originated by Walter Homeyer Jr, Macon, Georgia, USA. ACS., Nov.1989, *The Camellia Journal*, vol.44, No.4, p.17, Reg. No.2169. *American Camellia Yearbook*, 1989, p.124: The 11 year old seedling first bloomed 1981. Average flower size, 15 cm across x 7.5 cm deep with 18 wide, curled and fluted petals and 3-5 compound, curled and rabbit-eared inner petals and white anthers and filaments. Plant growth is upright, open and rapid with light green leaves, 11 cm x 6 cm.

Margaret Walker. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue, 1942-1943: Large, white striped pink. Semi-double to rose form double with loose petaloids and stamens in the centre when fully opened. 11 cm across x 3.8 cm deep. Leaves, oval, medium green, short apex, veins pale green, recessed, close, shallow serrations. Synonym: 'Tea Gardens 330'. One of the camellias from Tea Gardens, Summerville, South Carolina, USA, believed to have originally been imported from Europe but name lost. Sport: **Margaret Walker Pink.** See black and white photo p.221, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II. Note; *Collected Papers*, ICS Congress, Locarno 2005, Kamelien an Küsten des Schwarzen Meeres, Nakhutsrishvili, G., records **Margaret Walker** as growing 1912-1914 in the von Batumi Botanic Garden, which indicates that this was the original name.

Margaret Walker Pink. *(C.japonica)*, SCCS., 1960, *Camellia Nomenclature*, p.76: A pink sport of **Margaret Walker.** Originated in USA.

Margaret Waterhouse. *(C.x williamsii)*, ANZCRS., 1955, *Camellia Annual*, No.2, p.5, Reg. No.1: A *C.saluenensis* seedling raised by E.G. Waterhouse, Gordon, N.S.W., Australia. A semi-double, 8-9 cm across. Colour Amaranth rose, 520/2-1. Mid-season flowering. For illustration see front cover, ACRS., 1966, *Camellia News*, No.24 and on p.20, ACRS, 1977, *Camellia News*, No.66.

Margaret Weems. *(C.japonica)*, SCCS., 1976, *Camellia Nomenclature*, p.100: Light peach pink. Medium size, semi-double with irregular petals. Vigorous, bushy growth. Originated in USA by Haynie.

Margaret Wells. *(C.japonica)*, *American Camellia Yearbook*, 1960, p.201, Reg. No.475: A 10 year old chance seedling, originated by Dr R.F. Wells, Panama City, Florida, USA. First bloomed 1958. Plant growth is upright and medium with dark green leaves, 8 cm x 3.8 cm. The semi-double to peony form flowers are deep rose, shading to purple on petal edge, averaging 13 cm across x 8 cm deep with 20-30 petals of heavy texture and yellow stamens. Blooms early. Orthographic error: 'Margareth Wells'. Sport: **Margaret Wells Delight**. Chinese synonym: 'Weiersi'.

Margaret Wells Choice. *(C.reticulata* hybr.) SCCS., 1984, *Camellia Nomenclature*, p.122: Deep, rich pink. Very large semi-double. Vigorous, upright growth. Mid-season blooming. A seedling of *C.reticulata* **Damanao** x *C.reticulata* hybrid **Arcadia,** originated by Piet & Gaeta, California, USA.

Margaret Wells Delight. *(C.japonica), American Camellia Yearbook*, 1968, p.133, Reg. No.987: A sport of Margaret Wells first observed in 1964. Originated by Azalea Road Nursery, Mobile, Alabama, USA. A virus variegated form of **Margaret Wells** - It is highly variegated and has the same form, texture and bloom as the parent. The colour is not as deep red. Synonym: 'Margaret Wells Variegated'.

Margaret Wells Swift. *(C.japonica),* Lawrence, Paul, 1935, "Camellias in the South"; *Gardeners' Chronicle*, 39(3):67. Bloomed for the first time, 1934, the plant then being 6 years old. Originated by Robert Rubel Jr, Crichton, Alabama, USA. See black and white photo, p.9, *Garden Digest,* Apr.1935: The flower measures 9.5 cm across and larger, is of a light cherry red, shading to deep rose-pink, with many petals and petaloids, irregularly twisted and ruffled, interspersed with golden anthered stamens and with about 20 large, guard petals, making a globular shaped flower.

Margaret Wells Variegated. Mark S. Cannon Scion Catalogue, 1963-1964, p.9 as 'Margaret Wells Var'. No description. This cultivar was registered in 1968 as **Margaret Wells Delight**, ACS., Reg. No.987 and this is considered the valid name as 'Margaret Wells Variegated' was not validly listed.

Margaret Willey. Oregon Camellia Society, 1949. Abbreviation for **Mrs Margaret Willey.**

Margaret Williams. *(C.japonica)*, ACS., 1988, *The Camellia Journal*, vol.43, No.4, p.22, Reg. No.2098: Medium size, purple, formal double *C.japonica* chance seedling. Blooms mid-season. Originated in USA by John G. Williams, Tampa, Florida. *American Camellia Yearbook*, 1988, p.189, colour photo between pp.186-187: The 34 year old seedling first bloomed 1964. Average flower size 7.5 cm across x 3.8 cm. deep with 70 petals. Plant growth is upright, dense and rapid with dark green leaves, 10 cm. x 5 cm.

Margarete Carbon. Wylam, 1952, *American Camellia Yearbook*, p.12. Synonym for **Margherita Coleoni.**

Margarete H. Hertrich. Select Camellias Catalogue, Whittier, 1964. Orthographic variant for **Margarete Hertrich.**

Margarete Hertrich. *(C.japonica),* First described as Reg, No.1, SCCS., Bulletin, 5:12, 1945 as 'Margaret Hertrich'. This spelling was corrected to **Margarete Hertrich** in *Bulletin,* 5:52, 1945: White. Medium size, 10-11 cm, formal double with 50-70 small petals. Vigorous, compact, upright growth. Mid-season blooming. Originated at Huntington Gardens, San Marino. California. USA. Orthographic errors: 'Margaret Hertrich', 'Margaret Hertrick', 'Margareth Hertrich'. See black and white photo. p.225, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

Margherita Capra. *(C.sasanqua).* Italian CS, *Notiziario*, 1997, No.3, pp.24-25, colour photo front cover; Originated by Mario Carmine, Cannero Riviera, Italy. Semi-double to peony form, petals irregular, white, diameter 6.5-7.5 cm. Lightly fragrant. Outer margins have 12-14 lacinations. 5 imbricated sepals. Stamens numerous with yellow anthers. A few petaloids dispersed among the stamens. Flowers early. Leaves dark green upper surface, light green lower surface, form elliptic, apex reflexed and twisted, 7-7.5 cm x 3cm. Compact upright growth.

Margherita Coleoni. *(C.japonica).* The first description located is in van Houtte Catalogue, 1865-1866, 110:20 as 'Margarita Caleoni': Very bright, pomegranate red, numerous petals, well

imbricated and in his 1879-1880 Catalogue, 184:238: Beautiful imbricated flower, rounded petals, of a beautiful rose, shaded with vivid carmine, all first class.. This very popular camellia has suffered innumerable misspelling of its name, including the following: 'Margaret Carbone', 'Margarete Carbon', 'Margarita Calcioni', 'Margarita Calceoni', 'Margarita Caleoni', 'Margarita Coleoni', 'Margarita Coleonie', 'Margarita Colsoni', 'Margharita', 'Margharita Calceomie', 'Margharita Caleone', 'Margharita Caleoni', 'Margharita Caleonia', 'Margharita Caleonie', 'Margharita Calconi', 'Margharita Coleoni', 'Margherita Caleonie', 'Margherita', 'Margherita Calconi', 'Margherita Caleoni', 'Margherita Caleonie', 'Margherita Colleoni', 'Marguerita Caleoni', 'Marguerite Calconie', 'Marguerite Caleonie', 'Marguerite Caleoni', 'Marguerite Celleoni', 'Marguerite Carbon', 'Margurita Coleonia', 'Mad. Cealonia', 'Marguerite Calconia', 'Margaret Calleoni'. Synonyms: 'General Douglas MacArthur', 'Red Queen', 'Campbelhi', 'Tokayama'(South), 'Margherita Caleoni Red', 'Margherita Coleoni No.2' Pseudonym: 'Campbellii'. Sport: 'Margherita Coleoni Variegated'. Colour Photo, Fairweather, 1979, *Rhododendrons & Azaleas,* p.123. Krussman, 1976, *Manual of Cultivated broad-leaved Trees and Shrubs,* p.20, erroneously equated **Margherita Coleoni** with 'Campbellii'. Hillebrand of Pallanza reports that the camellias on sale under the names 'Margherita Coleoni' and 'Francesco Ferruccio' are the same varieties although originally different cultivars.

Margherita Coleoni Variegated. *(C.japonica)*, Valley Garden Supplies Catalogue, 1948 as 'Margherita Coleoni Var.': A virus variegated form of **Margherita Coleoni** - Dark oriental red, blotched white. Formal double, 8.5 cm across x 3.8 cm deep. When fully open has a cuplike centre. Originated in USA. Synonyms: 'General Douglas MacArthur Variegated', 'Campbellii Variegated', 'Mary Hare', 'Berkeley Square', 'Margharita Caleoni No1', 'Tewilliger'. Orthographic errors: 'Margherite Coleoni Variegated', 'Margharita Caleoni Variegated'. Pseudonym: 'Azuma Shibori'. See black and white photos, p.227, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

Margherita Colleoni. SCCS., 1942, *Camellias*, p.20. Orthographic error for **Margherita Coleoni.**

Margherita di Savoia. *(C.japonica)*, Linden Catalogue, No.94, 1875 as 'Margherita di Savoya'. No description. Originated in Italy. (Believed extinct.) Orthographic variant: 'Margherita di Savoya'. Orthographic error: 'Margeurite de Savaya'. Chinese synonym 'Sawoya'.

Margherita di Savoya. Linden Catalogue No.94, 1875. Orthographic variant for **Margherita di Savoia.**

Margie. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1963-1964, p.9. No description. Orinda Nursery Catalogue, 1968: White. Large formal double. Early to mid-season flowering. Originated in USA at the Orinda Nursery, Bridgeville, Delaware.

Margie B. *(C.japonica), American Camellia Yearbook*, 1960, p.201, Reg. No.507: A 7 year old seedling *C.japonica*, originated by Louis A. Brantley, Savannah, Georgia, USA. First flowered 1957. Growth, upright, compact and rapid in rate with light green leaves, 9.5 cm long x 6 cm wide. The semi-double to loose peony form flowers are 12.5 cm across x 7 cm deep. The 16-20 petals and the 3-7 petaloids are pure white, fluted and of a good texture. Rabbit ears and/or petaloids are interspersed with pale green filaments and bright yellow anthers. Early flowering.

Margie Dee. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* A virus variegated form of **Galilee** - Light pink and white. Originated in USA.

Margie Dee Fisher. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Pink, incomplete double. SCCS., 1954, *The Camellia. Its Culture and Nomenclature:* Soft pink, lightly variegated with white. Large, loose, semi-double to anemone form. Vigorous, upright growth. A seedling originated by Gilbert E. Fisher, Birmingham, Alabama, USA. See black and white photo, p.141. Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.II.

Margie Selby Thomas. *(C.hybrid).* ACS, *The Camellia Journal,* Nov. 2000, p.28, Reg. No.2528. A non-reticulata hybrid chance seedling, semi-double with a central, slightly flared stamen group. The lavender pink flowers have 20 petals, gold anthers and white stamens. Plant is vigorous, upright and open. Flowers mid-season to late. Originated by Sam Zerkowski, Slidell, La., USA. *American Camellia Yearbook,* 2000, p.4, colour photo p.c11. Flowers are 10 cm across x 3.8 cm deep. The light green leaves are 8.2 cm long x 2.5 cm wide. Note: The published photo shows a flower typical of *C.japonica* x *C.saluenensis.*

Marginata. *(C.japonica),* Proceedings of the RHS., 1861, p.200: Exhibited Apr.26th, 1860. From Mr Halley. A late blooming seedling, the flower moderately sized, rather thin with convex petals, lively rose colour and faintly scented as in the variety **Myrtifolia.**

Margined Wirlinga Belle. *(C.hybrid). Nagoya Camellia Society Bulletin*, No.25, 1992, p.13, colour plate No.46: Originated by Dr Kôji Funakoshi, Nagoya, Japan. A seedling of **Juraku** x **Wirlinga Belle.** Flower shape similar to **Wirlinga Belle.** Very pale pink, miniature single, margined pink. Profuse flowering. Early blooming. Fragrant.

Margo-Anne Loe. *(C.japonica),* ACS., 1988, *The Camellia Journal*, vol.43, No.3, front cover, Reg. No.2095 and colour photo: Boutonniere, miniature to small size; 100 tight flower petals, formal double, white with broken, pink stripes and reverses to red with white spots. Abundant midseason blooms on a dark green, bushy plant. A chance seedling originated by Ferol & Sam Zerkowsky, Tammia Nursery, Slidell, Louisiana, USA. *American Camellia Yearbook*, 1988, p.189: The 8 year old seedling first bloomed 1988. Average flower size, 7.5 cm across x 5 cm deep with 100 petals. Some flowers have swirls. Plant growth is upright and rapid with dark green leaves, 10 cm x 3.6 cm.

Margo-Lyn. *(C.japonica),* ACRS.,1969, *Camellia News*, No.32, p.17, Reg. No.90: Originated by G.W. Hooper, Bexley North, N.SW, Australia. Parents unknown. First flowered 1963. Spreading, open growth habit. The semi-double blooms are 10 cm across, solfino purple, HCC.26/2 colour. Blooms mid-season.

Marguarita. Puddle & Hangar, 1960, RHS., *The Rhododendron and Camellia Yearbook*, No.14, p.157. Synonym for **Mikenjaku** as 'Nagasaki', however see next entry.

Marguerita. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'Margurita', changed to 'Marguerita' in following catalogues, 1945-1946 and on: A red sport of 'Candida Elegantissima', ('Nagasaki'). Very large, semi-double red with two rows of large petals and conspicuous stamens in the centre with a few petaloids. Rounded, serrate, dark green foliage. This name was subsequently erroneously quoted in many catalogues as synonym for **Mikenjaku** as 'Nagasaki'. It was mispelt as 'Margarita', 'Margurita' and 'Marguarita'. Hertrich, 1954 later illustrated and described it in *Camellias in the Huntington Gardens*, vol.I, pp.266, 269 under the synonym: 'Nagasaki Rose'.

Marguerita Caleoni. de Bisschop Nursery Catalogue, 1935. Orthographic error for **Margherita Coleoni.**

Marguerita Lechi. Fruitland Nursery Catalogue, 1941-1942, p.27. Synonym for **Maddalina d'Italie.**

Marguerite. Franco Agostoni, 1844, *Catalogo Plantarum* .... Orthographic error for 'Margarita', synonym for **Maddalina d'Italie.**

Marguerite Bellomine. Platt, 1961, RHS., *The Rhododendron and Camellia Yearbook*, No.15, p.107. Orthographic error for **Margherita Belluomini.**

Marguerite Bullard. *(C.sasanqua), American Camellia Yearbook*, 1958, p.289, Reg. No.316: A 9 year old seedling of Mine-no-yuki; originated by Mrs M. Eugene Bullard, Wilmington, North Carolina, USA. Plant growth is rapid and spreading. The pink, peony form flowers resemble 'Mine-no-yuki' in form and have 30 petals and 8 petaloids. Size, 8 cm across x 3.8 cm deep and retains a rose-bud centre for some time. Blooms early.

Marguerite Calconia. Arther Charlton Catalogue, 1957, p.11. Orthographic error for **Margherita Coleoni.**

Marguerite Gauthier. *(C.japonica),* Sander Nursery Catalogue, 1939, p.1. No description. Originated in Belgium. (Believed extinct.)

Marguerite Gouillon. *(C.japonica),* Drouard-Gouillon Catalogue, 1839. No description. van Houtte Catalogue, 1842, 9:54: Peony form, soft pink, spotted and streaked with vivid red. Berlèse, 1842, *Annales de la Société d'Horticulture de Paris*, 30(175):427-429: Peony form, white flushed very pale pink, dotted and striped with crimson, 8-9.5 cm in diameter. Petals obovate, 4 cm x 3.5 cm wide, outer petals in 4-5 layers; centre petals smaller and mixed with stamens and petaloids to give a raised centre. Leaves elliptic, 8 cm x 4.8 cm, shallowly serrate, acuminate, mid-green. Habit upright and vigorous becoming spreading. This camellia was raised by Drouard-Gouillon of Febraud Nursery, Nantes, France about 1840 and named for his daughter. It was first released in a 3 page leaflet, prepared by Berlèse and headed: "1842. Description d'un Nouveau Camellia, souscription ouverte pour le Camellia **Marguerite Gouillon.** Here is a beautiful camellia variety obtained from seed by M. Drouard-Gouillon of Nantes and flowered for the first time this year, 1842. The flower is 10 cm across, it is full, rounded, almost regular rose form, with a delicate pink base, speckled and streaked vivid red. The broad outer petals are in 6 fan-like rows, rounded, slightly indented, thin and transparent, regularly imbricated and tints of dehcate pink with streaks spots and bands of red. The interior has a variable number of upright, elongated petals of diverse form, some strap-like, others oval, grouped in clusters and forming a united centre, detached from the circumference." Berlèse described it in the 3rd ed. of his *Monographie*, 1845 and Verschaffelt illustrated it in his *Nouvelle* I*conographie*, 1850, Book X, pl. III. In recent years it has become confused with another, similar cultivar from the same area in **General Lamoricière** but they are considered to be separate cultivars. Synonyms: 'Madam Gouillon', 'Parini Nova'. In America **Duc d'Orleans** has been a psuedonyn for **Marguerite Gouillon**. Sports: **Marguerite Gouillon Rose,** 'Stardust'. Orthographic variants and errors: 'Marguerite Guillon', 'Margherite Gouillon', 'Margherita Gouillon', 'Margurite Gouillon', 'Marguerite de Gouillon', 'Margeritta Guillon', 'Margaret Gullion', 'Marguerite Quillon', 'Marguerite Gruillon', 'Marte Guillon'. Mariantonia. Stefano Pagliai Catalogue, 1867. Orthographic error for **Maria Antonietta.**

Marian Faircloth. *(C.japonica), American Camellia Yearbook*, 1972, p.132, Reg. No.1174: A 9 year old chance *C.japonica* seedling that first bloomed 1966, originated by J. Faircloth, Pensacola, Florida, USA. Plant growth is upright and medium with dark green leaves, 7.5 cm x 3.8 cm. The peony form bloom is light pink with dark pink stripes. It has yellow anthers, 18 petals, 56 petaloids and measures 11 cm across x 5 cm deep. Blooms early to mid-season.

Marian Harrison. *(C.japonica), American Camellia Yearbook*, 1961, p.226, Reg. No.529: An 11 year old chance seedling that first bloomed 1956; originated by W.H. Harrison, Marianna, Florida, USA. Upright, rapid growth with dark green leaves, 8 cm x 6 cm. The flowers are a glowing, cerise pink, anemone to peony form, similar to **Daikagura.** Filaments are white with yellow anthers. Flowers are 15 cm. across x 10 cm deep with 34-40 petals and 0-90 petaloids. Early flowering.

Marian Mitchell. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue, 1942-1943: This is our finest hybrid in the red chance seedlings, originated at Magnolia Gardens, John's Island, South Carolina, USA. A scarlet red, large, semi-double, late blooming. Slow, upright growth. Orthographic variation: 'Marion Mitchell'. For different form see **Marian Mitchell Variegated.**

Marian Mitchell Variegated. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue, 1944-1945: We were so well pleased with this variety as a solid red that we were overwhelmed when, through grafting, it came out heavily variegated. A virus variegated form of **Marian Mitchell** - Scarlet red, heavily marbled with white. Originated in USA by Magnolia Gardens, South Carolina. Orthographic variant: 'Marion Mitchell Variegated'. See black & white photo, p.229,

Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I. See colour photo: pl.107, p.57, *Encyclopedia of Camellias in Colour*, vol.II, 1978 as 'Marion Mitchell Variegated'.

Marian Stewart. *(C.japonica)*, Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.149. No description. Originated in USA. No valid listing located.

Mariana. *(C.japonica)*, Guilfoyle Nursery Catalogue, 1866. A Camden Park seedling originated by Macarthur, N.S.W., Australia. A bright crimson lake, very double, outer petals large and flat, inner excessively crowded, erect and inclined to be blotched or striped, very like 'Vesta', very waved. Orthographic variant: 'Marianna'. Synonym: 'Red Waratah'. See colour pl.41, facing p.122, Longhurst & Savige, 1982, *The Camellia;* p.21, ACRS., 1977, *Camellia News*, No.66.

Marianna Trivulzio. *(C.japonica)*, Franco Agostoni, 1844, *Catalogo Plantarum....* No description. Burdin Maggiore & Co., 1849-1850, Catalogo General: Delicate flesh coloured with carmine stripes, imbricated. Verschaffelt, 1854, *Nouvelle Iconographie*, Book VIII, pl.II as 'Marianna Trivulgio': This camellia of Italian origin was sent by Mr Luigi Croft of Milan. It is placed in the anemone group due to the arrangement of its petals, the exterior ones being large, rounded and outspread; the next ones being suddenly smaller, form a compact, outspread heart as in a garden ranunculus. The pure white colouring with a yellowish tinge at the centre, is interspered here and there by wide, bright pink stripes. Franchetti, 1855, *Collezione di Camelie*, p.45 as 'Marian Trivulzio': Ivory white with streaks and stains of carmine, the outer rows imbricated, a small cluster in the centre. Orthographic errors: 'Mariana Trivuglio', 'Mariana Trivuglia', 'Mariana Trivugli', 'Mariane Trivoglia', 'Marriane Trivulgio', 'Marriane Truilzio', 'Marianna Trivulzie', 'Mariana Trivulzio', 'Marianna Trivulgi', 'Mariane Trivulcia', 'Marianna Trivalzia', 'Mariana Trivalgio'.

Marianna Trivulzio (Nova). *(C.japonica)*, Burdin Maggiore & Co. Catalogue. 1845. No description. Luzzatti, 1851, *Collezione di Camelie*, p.25: Blush pink, striped with cherry red, imbricated.

Verschaffelt. 1856, *Nouvelle Iconographie*, Book IV, pl.IV as 'Marianna Trivalzio'(Nova): Small floral size, sent from Italy. The petals are ample, some rounded, the others ovate; all of a delicate pink, veined a deeper shade with white margins. Note: Verschaffelt had previously figured and described a white camellia with pink stripes under the name 'Marianna Trivuglio'. This appears to be a pink sport. Orthographic errors: 'Mariana Trivulzio', 'Marianna Triveri'. 'Marianna Trivalzio'(Nova), 'Marianna Trivalzio Nova'.

Marianne O. Marscher. *(C.japonica), American Camellia Yearbook*, 1966, p.95, Reg. No.859: A 10 year old chance seedling that first bloomed 1960. Originated by John F. Marscher. Beaufort, South Carolina, USA. Habit is uright, open and medium. Leaves are light green, 11 cm x 5 cm. The rose form, double flower is strong red with yellow anthers and white filaments. Size 10-12.5 cm across x 6 cm deep with 40 petals. Most flowers have rose-bud formation, others resemble **Tomorrow.** Blooms mid-season.

Marianne Rankin. *(C.japonica)*, Tammia Nursery Catalogue, 1960, p.5. No description. *American Camellia Yearbook*, 1960, p.202, Reg. No.494: A 10 year old chance seedling which first bloomed 1957; originated by Mr & Mrs T.S. Clower, Gulfport, Mississippi, USA. Plant habit is upright, of medium density and rapid in rate with dark green leaves, 9 cm x 4.5 cm. The rose-red, semi-double flowers, 12.5 cm across x 6 cm deep, have 16 petals and 11 petaloids and pink and white stamens. Flowers usually have whitish stripes in centre petals. Flowers mid-season to late. Orthographic error: 'Mariann Rankin'.

Marianne's Blush. *(C.japonica)*, SCCS., 1970, *Camellia Nomenclature*, p.92: Rose-pink. Medium size, semi-double. Medium, upright growth. Flowers early to late. Originated in USA by D. English, Jr. Dawson, Georgia, USA.

Marianno de Carvalho. *(C.japonica)*, Companhia Horticolo-Agricola Portuense Catalogue, #29, 1895-1896: Double. Deep vermilion with some white stripes. Originated in Portugal.

Marie van Houtte. Backhouse Nursery Catalogue, 1873. Synonym for **Madame Louis van Houtte.**

Marie Wood. *(C.japonica),* Fruitland Nursery Catalogue, 1949-1950: No description. Fendig, 1950, *American Camellia Catalogue:* Large, white, semi-double, 12.5 cm across x 3.8 cm deep. There are 4 rows of petals, some of which are 5 cm long and lobed. Buds, unusually showy, are 5 cm long and open like a rose. The foliage is dark green, oval, 10 cm x 5 cm, serrated and curled. A seedling originated by Mr & Mrs W.T. Wood, Overlook Avenue, Macon, Georgia, USA, from seed of unknown parentage imported from Japan. Registered as No.67 with the ACS. See black and white photo, p.144, Hertrich, 1959, *Camellias in theHuntington Gardens*, vol.III.

Marie Young. *(C.sasanqua),* ANZCRS., 1958, *Camellia Annual*, No.5, p.30, Reg. No.33: Originated by Gordon Waterhouse, Kurrajong, N.S.W., Australia. The flower has 5-6 petals and 2-3 petaloids. Colour fuchsine pink 627/2. Plant habit, erect and robust.

Mariel. *(C.reticulata* hybrid). C.Aust., *Camellia News,* Autumn 2006, No.170, p.12, Reg. No. 561. Originated by Audrey O'Ferrall, Bowral, NSW, Australia. A chance seedling that first flowered in 1977. A large, soft pink (RHS.CC. 75C – 56D), semi-double flower of 22-25 petals, 16 cm across x 7 cm deep. Flowers mid-season to late on a strong, upright, tall plant. Leaves dark green, matt, elliptic, shallow serrations, apex acuminate, 13.5 cm x 5 cm. Flowers shed whole. Champion camellia, Highlands Garden Society 2004.

Marietta Benucci. *(C.japonica)*, de Jonghe, 1851, *Traité de la Culture du Camellia*, p.113: Very large, imbricated, double flower, round petals; those at the centre striped white. Luzzatti, 1851, *Collezione di Camelie*, p.25: Vivid rose with white stripes, often lighter in the centre, imbricated, large, satiny. Originated in Italy by Benucci, Florence. For colour illustration see pl.IV, Book VIII, Verschaffelt, 1855, *Nouvelle Iconographie.* Orthographic errors: 'Marietta Bennucci', 'Marietti Benucci', 'Marietta Bennucci', 'Marietta Bennuci', 'Mariette Bennucci'.

Marietta de Massani. da Silva, 1880, *Forcing Varieties of Camellias in Oporto*, p.15. Orthographic variant of **Marietta Massani.**

Marietta Delgrande. *(C.japonica)*, Medici Spada, 1858, *Delle Nuove Camellie che si Vengono Ottenendo dalle Semine Romane*, p.6: Flower medium, with 5 outer rows of petals, rounded, lobate and imbricated in the form of a cup; those medium and central, oblong; the first rounded, the second acuminate and imbricated like a star. The 5 outer rows are a soft flesh colour, embroidered and spotted carmine, becoming scarlet in the middle and central areas with some stripes of pale rose. Originated in Italy by Delgrande, Rome.

Marietta Massani. *(C.japonica)*, de Jonghe, 1851, *Traité de la Culture du Camellia*, p.114: (Nutini). Very double, imbricated flower in the manner of **Miniata**; like 'Cecile de Valtange' (**Cécile Voltange**), the circumference of the petals is a beautiful rose, the centre of the flower a light rose. Luzzatti, 1851, *Collezione di Camelie*, p.26: Like the camellia **Miniata** of Low, the outer petals are a splendid rose and the centre petals a clear pale colour. Perfectly imbricated. For colour illustration see pl.IV, Book IX, Verschaffelt, 1855, *Nouvelle Iconographie*, which gives the colour as cherry-red at the circumference and a delicate pink at the centre. A tiered formal double; originated in Florence, Italy, by Bouturlin. Orthographic errors: 'Marietta Massari', 'Marietta Massini', 'Mariatta Massani', 'Marietta de Massani', 'Mariette Massanii', 'Marietta Mossoni', 'Marietta Mosoni'.

Marikarako. (Ball Shaped Anemone), *(C.japonica),* Shirai-Bunko, 1812, *Tsubaki Nayosechô*, as red single, occasionally with many, small, white spots, peony form; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Red single with white spots. Originated in Japan. (Believed extinct.)

Mariko. (Female given name), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.187, colour photo and description: Small size, deep red, tubular to campanulate single with 5 wide, emarginate, overlapping petals and a central stamen cluster with red filaments and yellow anthers. Blooms mid-season to late. Leaves small, strong, lustrous green, elliptic, long, tapering apices, margins obscurely serrate. Originated in Izu Ohshima Isle, Japan. Named and released by Shimoda Camellia Club in 1979.

Marilan. *(C.japonica),* Originated by Roger Salaün, "Stervinou", Guipronvel, France. Plant is upright and fast growing, with supple, arching branches. Leaves are a particularly attractive shiny dark green, elliptic, 11cm x 5cm, contrasting well with the flower, which is a pure white semi-double, with a mixed centre of petaloids and stamens, diameter 8-8.5cm. Mid-season flowering, approx. 3 months.

Marilea. *(C.japonica),* SCCS., 1958, *Camellia Nomenclature,* p.57: White marked red with rose tinted petals near base, fading towards the edge. Large semi-double to peony form with loose petals. Compact, upright growth. Blooms mid-season. Originated in USA by Dr L.U. Graves, Tallahassee, Florida.

Marilia de Dirceo. *(C.japonica),* José Marques Loureiro Catalogue, No.1, 1865, p.34, & No.9, 1872-1873, p.45: Regular rose form, flesh coloured with stripes and blotches of light pink. Originated in Portugal.

Marilee Gray. *(C.japonica),* SCCS., 1990. *Camellia Nomenclature,* p.72: Peach pink, medium size, formal double. Compact growth. Blooms mid-season to late. Originated at Kramer Bros, Upland, California, USA. Sport: **Marilee Gray Variegated.**

Marilee Gray Variegated. *(C.japonica),* SCCS., 1990, *Camellia Nomenclature*, p.72 *as* 'Marilee Gray Var.': A virus variegated form of **Marilee Gray** - Peach pink, variegated with white. Originated at Kramer Bros Nursery, Upland, California, USA.

Marilyn Dive. *(C.sasanqua),* ACRS., 1966, *Camellia* News, No.24, p.36, Reg. No.75: Originated by Arthur Butler, Castle Hill, N.S.W., Australia. A seedling of unknown origin that first flowered 1959. The blooms are 10 cm. across, single, of fuchsine pink. Plant habit is spreading, open and suitable for espalier.

Marilyn Evans. (*C.reticulata* hybrid). ACRS, *Camellia News,* 1995, No.135, p.11, Reg. No.441: Originated by Jason Hawke, Boonooroo, Carrara, Queensland, Australia. A chance seedling that first flowered 1987. A deep red (RHS.CC.46A-60A), formal double of 20 petals, 10 cm across x 5 cm deep. Flowers freely mid-season to late on an open, rapid growing bush. Leaves light green, glossy, ovate with serrate margins and acuminate apices, 10 cm long x 5 cm wide. Petals notched and fluted. Filaments in groups and flowers shed whole.

Marilyn Maphis. (*C.reticulata* hybrid). ACS, *The Camellia Journal*, Mar. 2007, p.29 with colour photo; Reg. No. 2700. A cross between the *C.reticulata* hybrids **Lilette Witman** x **Hulyn Smith,** first flowered 1990. Originated by Jack Mandarich, Garner, N.C., USA, and propagated by Hulyn Smith, Valdosta, Ga. The 17 cm diameter, pink, semidouble flower is highly frosted,

and has golden anthers and white filaments Heavy petal texture and fluorescence or sheen. Plant is upright and open, with vigorous growth. Flowers mid-season. *American Camellia Yearbook*, 2007, p.70 with colour photo.

Marilyn McElveen. *(C.japonica), American Camellia Yearbook*, 1970, p.160, Reg. No.1113: A 7 year old chance seedling that first bloomed 1967; originated by W.A. Anglin, Bogalusa, Louisiana, USA. Plant growth is dense and medium in rate with light green leaves, averaging 11 cm long x 5.5 cm wide. The semi-double to anemone form bloom is 10-12.5 cm across x 5-5.5 cm. deep with 27 petals and 38 petaloids. The colour is rose-red with yellow anthers and pink filaments. Blooms early to mid-season.

Marilyn McKiver. (*C.japonica),* Cannon, 1971, ACS., *The Camellia Journal*, vol.28, No.4. No description. Originated in USA. No valid listing located.

Marilyn Nickel. *(C.japonica),* SCCS., 1956, *The Camellia*. *Its Culture and Nomenclature,* p.65: White, striped rose-pink. Large semi-double. Vigorous, spreading growth. Mid-season blooming. Originated by G. Nickel, Arcadia, California, USA.

Marina. *(C.japonica), Australian Botanical & Horticultural Society Report*, 1849. No description. Waterhouse, 1947, *Camellia Quest,* pp.15,18: Camden Park Seedling No.12/50. Scarlet crimson, petals outer two rows, large and flat, inner, smaller, erect and confused. Originated by Sir William Macarthur, Camden Park. N.S.W.. Australia. Orthographic error: 'Mariner'.

Marina (Burdin). *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1849-1850 invalidly as 'Marina'. No description. Originated in Italy. (Believed extinct.)

Marina Mist. *(C.sasanqua).* ACS, *The Camellia Journal*, Nov. 2001, p.21, colour photo p.20, Reg. No.2562. A single chance seedling with blush buds opening white, and yellow anthers and filaments. The plant is vigorous and upright and flowers early. Originated by John L. Spencer, Lakeland, Fla., USA. *American Camellia Yearbook*, 2001, p.96, colour photo p.c14. The 9 year old seedling first flowered in 1997. Flowers measure 8.2 cm across x 2.5 cm deep. The dark green leaves are 5 cm long x 2.5 cm wide.

Marina Pearl. *(C.sasanqua).* ACS, *The Camellia Journal*, June 2003, p.24 with colour photo, Reg. No.2595. A white formal double chance seedling which has blush pink edges, centre and buds. Flowers early to mid-season. Originated by John L. Spencer, Lakeland, Fla., USA. *American Camellia Yearbook*, 2003, p.64, colour photo p.c4. The 11 year old seedling first flowered in 1998. Flowers measure 5-6.5 cm across x 2.5 cm deep, with 50-60 petals and 3-10 petaloids. Plant is open and vigorous with dark green leaves 5 cm long x 2.5 cm wide.

Mariner. Hales Catalogue of Fruit & Forest Trees etc., 1861. Orthographic error for **Marina.**

Marinka. *(C.japonica),* Burncoose & Southdown Nursery Catalogue, 1987, p.11: Anemone form, dark crimson. Mid-season blooming. Originated in England.

Marino Faliero. *(C.japonica),* de Jonghe, 1851, *Traité de la Culture du Camellia*, p.114. No description. Originated in Italy. (Believed extinct.)

Mario Bergamini. *(C.japonica),* ACS, *The Camellia Journal*, Feb. 1997, p.15, Reg. No. 2393. A large to very large, red, semi-double to anemone form chance seedling, which flowers mid-season. Originated by Jack L. Mandarich, Grants Pass, Ore., USA. *American Camellia Yearbook*, 1997, p.5, colour photo before p.1. First bloomed in 1988. Average flower size is 12-14.5 cm diameter x 6.5-9 cm deep, with 5-8 petals, 35-55 petaloids, yellow anthers and white

filaments. Plant growth is upright and average with dark green leaves 11.5 cm long x 7 cm wide.

Marion Darsow. *(C.japonica),* SCCS., 1964, *Camellia Nomenclature*, p.82: Dark red, miniature, formal double. Medium, upright growth. Mid-season blooming. Originated by George Linton, Somersby, N.SW, Australia.

Marion Edwards. *(C.reticulata), American Camellia Yearbook,* 1985, p.184, Reg. No.1964: A very large, bright red, semi-double. *C.reticulata* ('Crimson Robe' [**Dataohong**] x **Arch of Triumph**). Blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 6 year old seedling first bloomed 1982. Average flower size 15 cm across x 8 cm deep. The plant growth is upright and rapid in rate.

Marion Gaeta. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.150. Orthographic error for **Marianna Gaeta.**

Marion Hall. *(C.japonica),* ACS, *The Camellia Journal,* Mar. 2006, p.29 with colour photo, Reg. No. 2670. A chance seedling that first flowered in 1996. Originated by Marion H. Hall, Dothan, Ala., USA. The 14 cm diameter is marbled rosy red and white, with yellow anthers interspersed among the petals. Plant growth is upright, dense and vigorous. Flowers early to mid-season. *American Camellia Yearbook,* 2006, p.61 with colour photo. Dark green leaves are 10 cm x 5 cm.

Marion Hatcher. *(C.japonica), American Camellia Yearbook,* 1980, p.169, Reg. No.1604: A medium, currant red with dark red veining, formal double *C.japonica* (**Elizabeth Boardman** x **Dixie Knight**). Blooms mid-season to late. Originated by Dr W.F. Homeyer, Jr., Macon. Georgia, USA. The 14 year old seedling first bloomed 1969. Average flower size, 8 cm across x 3 cm deep with 84 petals. Plant growth is upright, dense, spreading and mediumn rate with dark green leaves, 12.5 cm x 6 cm wide. Sport: **Marion Hatcher Variegated.**

Marion Hatcher Variegated. *(C.japonica),* Cannon, 1981, ACS., *The Camellia Journal*, vol.36, No.1 as 'Marion Hatcher Var'. A virus variegated form of **Marion Hatcher** - Currant red blotched with white. Originated in the USA.

Mariposa. *(C.japonica),* Hastie, 1948, *American Camellia Yearbook*, p.56. No description. SCCS., 1950, *The Camellia. Its Culture and Nomenclature:* Very pale pink. Medium large, single. Mid-season blooming. Originated at Magnolia Gardens, John's Island, South Carolina, USA.

Marischino. *(C.japonica),* SCCS., 1942, *Classification of Camellias,* p.4: Formal double red, 7,5 cm across. Lae flowering. Originated in the USA.

Mariu-shibori. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Variegated pink, single. Mid-season blooming. This appears to be a corruption of an unknown Japanese name.

Marjorie. *(C.japonica),* Bisschop Nursery Catalogue, 1975: A salmon pink double. Blooms mid-season. Originated in Belgium.

Marjorie Carlyon. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Large, red, semi-double. Originated in England.

Marjorie Hobbs. *(C.sasanqua).* ACRS, *Camellia News,* 1996, No.139, p.9, colour photo p.2 as 'Marj Hobbs', Reg. No.466. Registered by Mrs Marjorie Baker, Macleod, Vic., Australia. Originator Len Hobbs, Doncaster, Vic.. A chance seedling that first flowered in 1989. The flower of 28 petals opens as a formal double and matures to an informal double that is white, shading to pale pink (RHS.CC.69B) at the petal edges, 7 cm across x 3 cm deep. Flowers freely early to mid-season, on a slow growing, spreading plant. Leaves are dark green, glossy, keeled, elliptic, acute apex, serrate margins, 5.5 cm long x 3 cm wide. Petals notched and folded with a few petaloids.

Marjorie Huckabee. *(C.japonica), American Camellia Yearbook,* 1956, p.63, Reg. No.258: A 15 year old chance seedling, originated by the Central Georgia Nurseries, Macon, Georgia, USA that first flowered 1949. Plant growth is upright, dense, medium in rate, strong, with 8 cm x 5.5 cm leaves. Flowers, light pink, semi-double to incomplete double; irregular petals form a centre for incomplete double; resembles **Thelma Dale** in form but larger. Number of petals, 40; size 10.5 cm across x 5.5 cm. deep. Flowers mid-season. Sport: **Marjorie Huckabee Variegated.** Orthographic error: 'Marjorie Huckebee'.

Marjorie Huckabee Variegated. *(C.japonica),* SCCS., 1968, *Camellia Nomenclature,* p.91 as 'Marjorie Huckabee Var.':- A virus variegated form of **Marjorie Huckabee** - Light pink, blotched white. Originated in USA.

Marjorie Huckebee. Mark S. Cannon Scion Catalogue, 1963-1964, p.10. Orthographic error for **Marjorie Huckabee.**

Marjorie Magnificant. Central Georgia Nurseries Catalogue, 1955-1956, p.7. Orthographic error for **Marjorie Magnificent.**

Marjorie Magnificent. *(C.japonica),* Doty et al., 1949, *American Camellia Yearbook,* p.249: A seedling developed from Japanese seed imported 1937 by G.H. Wilkinson, Pensacola, Florida, USA. First flowered 1944. The blush pink, 8 cm flowers are incomplete double with several rows of petals. Before finally opening to show stamens it has a high rose-bud centre. The flowers are very regular, An upright grower. Blooms early to mid-season. See colour pl. in Fendig, 1953, *American Camellia Catalogue.* Black and white photo, p.225, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II. Orthographic errors: 'Marjory Magnificent', 'Margaret Magnificent', 'Marjorie Magnificant'. Reg. No.36 with the ACS., Jan.1950, Quarterly, vol.5, No.1. Chinese synonym 'Majiao'.

Marjorie Miller. *(C.japonica),* Exbury Enterprises Ltd Catalogue, 1995. No description. Originated in UK.

Marjorie Nan. *(C.japonica),* SCCS., 1968, *Camellia Nomenclature,* p.91: Deep red. Large, semi-double with curved petals. Medium, compact, upright growth. Flowers mid-season. Originated in USA by Wills.

Marjorie O'Malley. (*C.reticulata* hybr.), *American Camellia Yearbook,* 1982, p.175, Reg. No.1847: A very large, rose-red, semi-double to loose peony form *C.reticulata* hybrid, that blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 7 year old seedling first bloomed 1981. Average flower size 15.5 cm. across x 8 cm deep. The flower has a few petaloids and yellow filaments. Some red veining is evident in the petals. Plant growth is upright, spreading and medium with dark green, heavily serrated leaves, 12.8 cm. long x 8 cm wide.

Marjorie Townsend. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* White, semi-double, mid-season. SCCS., 1954, *The Camellia. Its Culture and Nomenclature,* p.62: White, large, irregular semi-double to anemone form with large petaloids. Medium, compact growth. Early

to midseason flowering. Originated at the Huntington Gardens, San Marino, California, USA. See black and white photo, p.231, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II and *American Camellia Yearbook*, 1955, p.39.

Marjorie Waldegrave. *(C.x williamsii*), Tregrehan Camellia Nursery Catalogue, 1973: Rose-pink. Medium semi-double. Vigorous growth. A seedling from *C.saluenensis x C.japonica* **Marjorie Magnificent**, originated by Gillian Carlyon, Par, Cornwall, England.

Marjorie's Double. *(C.japonica), New Zealand Camellia Bulletin,* 1984, vol.XIII, No.6, p.24, Reg. No.212: A chance seedling of *C.japonica* that first flowered 1978; originated by E.W.E. Butcher, Hamilton, New Zealand. The plant has an upright, dense, rapid growth habit with light green leaves, 8.5 cm. x 5 cm. The formal double flowers are a deepish pink with a lighter centre - 50-53 petals and measure 11 cm across x 4 cm. deep. Flowers late.

Marjorie's Dream. (*C.fraterna* hybrid). ACRS, *Camellia News,* 1993, No.127, p.8, Reg. No.419: Originated by Marjorie Baker, Macleod, Victoria, Australia. Seed parent *C.pitardii x C.fraterna* **Snow Drop.** Pollen parent unknown. First flowered 1988. Miniature informal double white flower of 10 petals, 4.6 cm across x 1.8 cm deep. Early and long flowering, with slow weeping growth habit. Leaves deep green, matt, twisted, apices acuminate, ovate, margins serrate, 6.3 cm long x 3.2 cm wide. Petals notched with petaloids. Fragrant. Attractive weeping habit. Colour plate p.19, ACRS, *Camellia News,* 1994, No.128.

Maruben-hagoromo. *Kurume Camellia,* 1997, English translation, p.24. Synonym for 'Haru-no-akebono', now known as **Hagoromo-Kansai.**

Marubeni. (Round Red). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.79 with colour photo; Small red single, round to cupped petals, stamens in a solid column. Flowers mid-season. Leaves ovate, medium size. Average growth. A descendant of crosses between wild camellias from Niigata and **Tamagasumi,** etc. Originated and released by Shinichi Noguchi, Tokyo, Japan, in 2009.

Maruben-karanishiki. (Perfect Petal - Chinese Brocade), *(C.japonica),* Shufu-no-Tomo-sha, 1976, *Tsubaki to Sazanka*, p.44, colour photo: Medium sized, semi-double, 13-15 petals, soft pink ground with a peppering of crimson dots and ticks. Small, irregular stamen cluster, golden anthers, white filaments. Blooms late to very late. For other colour photos see: *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.410. Seibundô Shinkôsha, 1979, *Senchinshû*, p.144. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.343. Originated in Kantô, Japan. Resembles **Hakuro-nishiki** and **Kara-nishiki**. Note: Possibly the same as **Kara-nishiki** from the Edo era.

Maruben-hagoromo. Seibundô Shinkôsha., 1979, *Senchinshû*, p.240. Synonym for 'Kansai--hagoromo' and 'Haruno-akebono'.

Maruyama-kasuri. (Maruyama variegated), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pls. 172, 389, 455, and 636. From the plates there appears to be two cultivars involved. However they are all white semi-doubles with crimson streaks. Originated in Japan. (Believed extinct.)

Maruyama-koshimino. (Maruyama Straw Raincoat), *(C.japonica).* This was listed with painting in *Chinka Kozu*, (before 1850), owned by Masuda, Tokube'i: White with splashes, semi-double. See: Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.130. Originated in Japan. (Believed extinct.)

Mar-Vel Murray. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Pink. Incomplete double. Mid-season. SCCS., 1954, *The Camellia. Its Culture and Nomenclature:* Pink. Medium peony

form showing petaloids. Medium growth. Mid-season blooming. Originated in USA by F.K. Murray, San Marino, California.

Marvin Jernigan. *(C.japonica),* ACS 1995, *The Camellia Journal,* vol.50, No.2, p.15, Reg. No.2314: Very large size, red with white variegation, semi-double to peony form. A seedling of **Ville de Nantes** x **Granada.** Blooms mid-season to late. Originated in USA by Marvin Jernigan, Warner Robins, Georgia. ACS 1995, *American Camellia Yearbook,* p.8 with colour photo: The 12 year old seedling first flowered 1985. Average flower size is 13 cm across x 8 cm deep with 41 petals and white anthers. Plant growth is upright, spreading, dense and vigorous with dark green leaves 10 cm long x 4.5 cm wide. Synonym: 'Marvin Jernigan Variegated'.

Marvin Jernigan Variegated. SCCS 1996, *Camellia Nomenclature,* p.76. Synonym for **Marvin Jernigan.**

Marvin Mann. *American Camellia Yearbook,* 1958, p.289, Reg. No.341. Name changed to **Judge Marvin Mann.** See *American Camellia Yearbook,* 1959, p.275.

Marvin Sowell. *(C.hybrid), American Camellia Yearbook,* 1980, p.169, Reg. No.1595: A very large, light crimson, semi-double to loose peony form *C.hybrid* chance seedling, mid-season to late. Originated by Kramers Bros. Nursery, Upland, California, USA. The seedling first bloomed 1974. Flower size 13 cm across x 6 cm deep with irridescent petals. Plant growth is upright and rapid with light green leaves, 10 cm x 5 cm.

Mary A. Bergamini. *(C.reticulata).* ACS, *The Camellia Journal,* Sept. 2006. p.29 with colour photo; Reg. No. 2687. A chance seedling of *C.reticulata* **Arch of Triumph**, first flowered in 1999.. Originated by Don Bergamini, Martinez, Calif., USA. The 12.7 cm diameter hot pink, peony form flower has heavy petal texture. Plant is spreading, with average growth rate. Flowers mid-season to late. *American Camellia Yearbook,* 2006, p.61 with colour photo; Dark green leaves are 10 cm x 6.5 cm.

Mary A.Cox. Belle Fontaine Nursery, 1967, ACS., *The Camellia Journal*, vol.22, No.3, p.20. Abbreviation for **Mary Alice Cox.**

Mary A. Greer. *(C.japonica), American Camellia Yearbook,* 1960, p.202, Reg. No.445: A chance seedling originated by A.P. Carlton, San Diego, California, USA that first bloomed 1952. Plant growth is dense and medium with light green leaves, 8.5 cm x 4.5 cm. The peony form flowers, 11-15 cm across, are a true red and have conspicuous, yellow stamens.

Mary Adger. *(C.japonica), American Camellia Yearbook,* 1962-1963, p.222, Reg. No.633: An 8 year old chance seedling that first bloomed 1960. Originated in USA by B.A. Carlin, Mobile, Alabama. Plant growth is spreading and medium in rate. The semi-double flowers, similar to **Finlandia,** are 12.5 cm across x 6 cm deep, pink with yellow stamens and have 11 petals. Blooms mid-season.

Mary Agnes Patin. *(C.japonica), American Camellia Yearbook,* 1962-1963, p.222, Reg. No.604: A 9 year old chance seedling that first bloomed 1959. Originated in USA by T.C. Patin, Hammond, Louisiana. The plant growth is upright, open and rapid with dark green leaves, 12 cm x 5.5 cm. The rose form double flowers, similar to 'Purity' (**Shiragiku**), are 12-12.5 cm across x 5-6 cm deep. The blooms are china rose (024/2) and have 45 petals with white stamens interspersed, some petals fimbriated, scattered rabbit ears. Early blooming. For colour photos see: p.145, *American Camellia Yearbook,* 1964 and the front cover, 1963, ACS., *The Camellia Journal,* vol.18, No.5. Orthographic errors: 'Mary Agnes Pattin', 'Mrs Agnes Patin'. Sport: **Mary Agnes Patin Variegated.** Chinese synonym: 'Mali Xiaojie', later changed to 'Dating'..

Mary Agnes Patin Variegated. *(C.japonica),* Tammia Nursery Catalogue, 1965-1966 as 'Mary Agnes Patin Var.'. A virus variegated form of **Mary Agnes Patin** - China rose, blotched white.

Originated by Tammia Nursery, Slidell, Louisiana, USA. See colour photo, pl.110, p.58, *Encyclopedia of Camellias in Colour*, vol.II, 1978.

Mary Agnes Pattin. Oliver's Hill Nursery Catalogue, 1976. Orthographic error for **Mary Agnes Patin.**

Mary Alice. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2003, p.21 with colour photo, Reg. No.2603. A sport of **Marlena Bozeman**, first observed in 1998, and which has flowered true for 5 years.The semi-double flower is deep red, blotched with white. Petals have heavy texture and are fimbriated. Originated by Lyman L. Fillingame, Purvis, Miss., USA. *American Camellia Yearbook*, p.64, colour photo p.c4. Flower measures 10 cm across x 5.7 cm deep, with 27 petals, 6 petaloids and yellow anthers. Plant is upright, spreading and of average growth rate. Flowers mid-season. The dark green leaves are 8.2 cm long x 5.5 cm wide.

Mary Alice Cox. *(C.japonica), American Camellia Yearbook*, 1967, p.230, Reg. No.945: An 8 year old chance seedling that first bloomed 1963, originated by T.N. Cox, Georgetown, South Carolina, USA. Plant growth is upright and medium rapid with dark green leaves, 12.5 cm x 5 cm. The formal double flower, 13 cm across x 3.8 cm deep has 75-80 petals and is white. Petals are medium wide at base of bloom to narrow with short petals at a rose-bud centre. Blooms early to mid-season. Abbreviation: 'Mary A. Cox'. Chinese synonym 'Mali'.

Mary Anderson. *(C.japonica), American Camellia Yearbook*, 1960, p.202, Reg. No.506: A seedling of **Rosea Superba** that first bloomed 1958; originated by Gus Roberts, Savannah, Georgia, USA. Plant growth is upright, sturdy and rapid with dark green leaves, 11 cm x 5 cm. The rich red, semidouble flowers, similar to Coral Pink Lotus, are 11-13 cm. across x 5.5 cm deep, with 16-18 petals, occasional petaloids and white stamens. Blooms mid-season. Sport: **Mary Anderson Variegated.**

Mary Anderson Variegated. *(C.japonica)*, Cannon, 1963, ACS., *The Camellia Journal*, vol.18, No.1, back cover as 'Mary Anderson Var.'. A virus variegated form of **Mary Anderson** - Rich red blotched white. Originated in USA.

Mary Ann. *(C.japonica)*, Lindo Nursery price list, 1941-1942. No description. SCCS, 1950, *The Camellia. Its Culture and Nomenclature* as 'Mary Ann'(California): Deep pink streaked white, Small, formal double. Originated in USA by Anderson. Synonym: 'Mary Ann'(California).

Mary Ann (California). SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.49 as 'Mary Ann'(Calif.). Synonym for **Mary Ann.**

Mary Ann Hooks. *(C.japonica*). ACS, *The Camellia Journal*, June 2004, p.28, colour photo p.29, Reg. No. 2615. A 14 year old chance seedling, first bloomed 1996. Discovered by Sen. George Hooks, Americus, Ga., USA. A white, full peony bloom, heavy petal texture, 5.7 cm across. Flowers early to mid-season. *American Camellia Yearbook*, 2004, p.93, colour photo p.c2. Plant is upright and open with average growth rate. Dark green leaves are .6.5 cm long x 3.2 cm wide.

Mary Ann Lawrence. *(C.japonica)* ACS, *Yearbook*, 2013, p.125 with colour photo, Regn. No.2887; Originated by Steve and Gayle Lawrence, Tallahassee, Fla., USA, and propagated by Randolph Maphis, Tallahassee. An 8 year old seedling of **Royal Velvet,** first flowered 2008, pollen parent unknown. Large to very large, 12cm diameter x 5cm deep flower is bright red with 9 petals. Tight central column of stamens with yellow anthers and white filaments. Heavy petal texture. Dense, spreading plant with average growth rate. Mid-green leaves average 9cm x 4.5cm with medium serration. Flowers midseason to late.

No.2160: Medium size, pink variegated with white, rose form double *C.reticulata* **Pink Sparkle** x *C.hybrid* **Julie.** Blooms mid-season to late. Originated by R.D. Gramling, Tallahassee, Florida, USA. *American Camellia Yearbook*, 1989, p.125, colour photo [p.134]: The 10 year old seedling first flowered 1979. Average flower size, 9.5 cm, across x 7.5 cm. deep with 18 petals, yellow anthers and white filaments. Plant growth is upright, average, open and medium with dark green leaves, 10 cm x 4 cm. Orthographic error: 'Mary Bain'. Sport: **Mary Baine Variegated.**

Mary Baine Variegated. (*C.reticulata* hybrid). ACS 1992, *The Camellia Journal*, vol.47, No.4, p.13 in Valdosta Camellia Scions advert. as 'Mary Baine V.'. The virus variegated, white blotched form of **Mary Baine.** Originated in USA.

Mary Bates. *(C.japonica), American Camellia Yearbook*, 1969, p.164, Reg. No.1039: A 6 year old chance seedling that first bloomed 1966; originated by Mrs R.E. Bates Sr., Waycross, Georgia, USA. The plant growth is upright, open and medium in rate with light green leaves, 10.3 cm x 5.5 cm. The formal double flower is 8 cm across x 3.2 cm. deep with 13 petals, like **Alba Plena,** Deep rose colour. Blooms mid-season.

Mary Bell Glennan. *American Camellia Yearbook*, 1946, p.61. Synonym for **Gigantea.** Orthographic errors: 'Mary Belle Glennan', 'Mary Glennan', 'Mary Belle Glennen', 'Mary Belle Brennan'.

Mary Belle Brennan. Woodroof, 1947, SCCS., *Bulletin*, 8(6)5. Orthographic error for 'Mary Bell Glennan', synonym for **Gigantea.**

Mary Belle Glennan. SCCS., 1947, *The Camellia. Its Culture and Nomenclature.* Orthographic variant for 'Mary Bell Glennan', synonym for **Gigantea.**

Mary Belle Glennen. Heutte, 1955, *American Camellia Yearbook*, p.232. Orthographic error for 'Mary Bell Glennan', synonym for **Gigantea.**

Mary Beth. *(C.japonica)*, SCCS., 1974, *Camellia Nomenclature*, p.100**:** White dashed pink. Medium semidouble to loose peony form. Mid-season blooming. Originated in USA by J.M. Haynie, Theodore Alabama.

Mary Bethea. *(C.japonica)*, Fendig, 1951, *American Camellia Catalogue:* Medium spirea red, shading to beet purple, semi-double to incomplete double (Anemone form), 8-10 cm across. Stamens and petaloids evenly balanced. Buds are oval and dark green with red tips. Leaves, elliptic, 10.5 cm x 4.5 cm, thin; apex slim and long, veins raised on underside, Long, shallow serrations. Slow, open growth with branches small and long. Originated in USA by Mr & Mrs T.S. Clower, Gulfport, Mississippi, USA. Reg. No.85, *American Camellia Yearbook*, 1954.

Mary Boyce. *(C.japonica)*, SCCS., 1976, *Camellia Nomenclature*, p.103: Dark pink. Large, loose peony form. Vigorous, compact, upright growth. Blooms mid-season. Originated in USA by J.M. Haynie, Theodore, Alabama.

Mary Butler. *(C.japonica), American Camellia Yearbook*, 1957, p.301, Reg. No.297: A 6 year old chance seedling; originated by Hugh Shackelford, Albany, Georgia, USA that first bloomed 1955. Plant habit compact and medium with light green leaves. The flowers are incomplete doubles with small petaloids, similar to **Nobilissima,** 10-12.5 cm in diameter, with 15 petals, pale pink, similar to 'Majorie Magnificent'. Flowers mid-season.

Mary Cantey. *(C.japonica), American Camellia Yearbook*, 1961, p.227, Reg. No.563: A 10 year old chance seedling that first bloomed 1957; originated by Joseph S. Cantey, Marion, South Carolina, USA. Plant growth is slow, dense and medium spreading with glossy, light green leaves, 8.5 cm long x 2 cm wide. The light pink flower is formal double, 6 cm across and 3.8 cm deep. Heavy textured miniature. Blooms mid-season.

Mary Caroni. *(C.japonica), International Camellia Journal* 2005, p.130 with colour photo; Reg. No. 59. An open pollinated seedling of **Bokuhan**. Originated by Peter Fischer, Wingst, Germany. Named for long-term ICS Director, Mary Caroni. First flowered 2005. A spreading, upright shrub of medium growth rate. Flowers mid-season. A red (RHS.CC. 46C) anemone form, 6.5 cm diameter x 2.5 cm deep. Blooms fall whole.

Mary Catherine Cape. *(C.reticulata),* ACS, *The Camellia Journal*, Sept. 2013, p.27 with colour photo; Regn No.2871; Originated by Hulyn Smith, Valdosta, Ga., USA. ACS, *Yearbook,* 2013, p.126 with colour photo; Registered and propagated by Ralph Maphis, Tallahassee, Fla. A 7 year old seedling of **Suzanne Withers** x **Annabelle Fetterman**, first flowered 2008. Medium size, 8.2cm diameter x 3.8cm deep flower is semidouble with raised petals, medium pink with frosting on petals. Yellow anthers and white filaments. Upright, open plant with average growth rate. Mid-green leaves average 10cm x 3.8cm with low serration. Flowers late season.

Mary Celeste Early. *(C.japonica), Camellias,* Y.C. Shen, 2009, p.145 with colour photo; Rose red formal double. Inner petals have incurved edges. Diameter 10 cm. Leaves elliptic, dark green. Upright growth.

Mary Charlotte. *(C.japonica),* SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Light pink. Medium sized, flat anemone form, 11-13 cm across with one row of guard petals. Vigorous, compact, upright growth with dark green, oval leaves, 8 cm x 4 cm, short, sharp apex and medium, shallow serrations. Introduced in 1947 in USA by the Rancho del Descanso. La Canada, California who acquired it from a Japanese grower who imported it to America from Japan in 1931. There may be a prior Japanese name. Orthographic error: 'Mary Charolette'.

Mary Charolette. Wheeler's Central Georgia Nursery Catalogue, 1954-1955, p.6. Orthographic error for **Mary Charlotte.**

Mary Christian. *(C.x williamsii),* RHS., *Journal*, 67(6):210, 1942: "Award of merit". Also RHS., "First Class Certificate", 1977 from the Wisley Trials. Raised by J.C. Williams, Caerhays Castle, Cornwall, England as a cross *C.saluenensis x C.japonica.* It is a phlox pink, medium sized, single, somewhat trumpet shaped, 5-7.5 cm across, petals usually 7, elliptic-ovate to broadly-ovate; stamens in a cylindrical mass. 2 cm across x 2 cm. long; stigma shorter; leaves dark, dull green above. Sport: A foliage variegated plant believed to be a mutation of 'Mary Christian' has been named **Golden Spangles.**

Mary Comer Train. *(C.japonica),* Cannon, 1963. ACS.. *The Camellia Journal*, vol.18 No.5, p.28. No description. Originated in USA. No valid listing located.

Mary Compton. *(C.japonica), American Camellia Yearbook*, 1960, p.202, Reg. No.481: A 12 year old chance seedling that first flowered 1956; originated by Julington Nurseries Inc., Jacksonville, Florida, USA. Plant growth is upright, medium dense and fast with dark green leaves, 7 cm x 3.8 cm. The semi-double flowers. similar to **Finlandia** in form, 10 cm across, are white with deep pink markings, with an occasional solid pink form, have 15-18 petals and long, central white stamens. Three alternative rows of slightly undulate, heart-shaped petals. stand apart, giving depth to the flower. Late blooming.

Mary Corley. *(C.japonica),* ACS, *The Camellia Journal,* Sept. 2004, p.29 with colour photo; Reg. No.2624. A 10 year old chance seedling that first flowered in 1998. Originated by Tom E. Corley, Auburn, Ala., USA. The very light pink, semi-double bloom has a few deeper pink stripes, 30 petals plus 5 petaloids, yellow anthers and filaments. Size is 10 cm across. Flowers early to mid-season. *American Camellia Yearbook*, 2004, p.93, colour photo p.c2. Plant is upright with average growth rate. Dark green leaves are 10.8 cm long x 4.5 cm wide.

Mary Costa. *(C.japonica), American Camellia Yearbook*, vol.II, 1974, p.237, Reg. No.1306: A 12 year old chance seedling (**Hagoromo** x Unknown) that first bloomed 1964; originated by David

Feathers. Lafayette, California, USA. Plant Growth is upright, dense and medium with dark green leaves, 12.5 cm long x 6 cm wide. The loose, anemone form bloom is white with yellow anthers, white filaments and 13 petals and a variable number of petaloids. Size. 12.5 cm across x 7 cm deep. Guard petals are fluted; petaloids strap-shaped and unusually long. Blooms early to mid-season. See colour photo, p.53, *Camellias at Wisley*, Handbook, 1980, No.37.

Mary Cowan. *(C.japonica). American Camellia Yearbook*, 1983, p.163, Reg. No.1894: A small, pink formal to rose form double, *C.japonica* chance seedling that blooms mid-season to late. Originated in USA by E.D. Cowan. Ruston, Louisiana. The 6 year old seedling first bloomed 1982. Size, 6 cm across x 2 cm deep with 36 petals. Plant growth is upright and slow with light green leaves, 8 cm long x 3.2 cm. wide.

Mary Cromartie. *Camellia Digest.* 1(3),1943 as 'Mary Cromarti'. Abbreviation for **Lady Mary Cromartie.**

Mary Dillard. *(C.japonica),* ACS 1995, *The Camellia Journal,* vol.50, No.3, p.36, Reg. No.2336: Large size, light rose with deep lavender inner petals, formal double, 12 cm across, *C.japonica* chance seedling. Blooms early to late. Originated in USA by O.L. Jacobson, Jacksonville Beach, Florida.

Mary Dudley. *(C.japonica),* Davis Nursery Catalogue, 1956: Pink. Small formal double with incurved petals. Early to mid-season blooming Sport: **Mary Dudley Variegated.** Originated in USA by Davis.

Mary Dudley Variegated. *(C.japonica),* Mark S. Cannon Scion Catalogue. 1963-1964, p.10 as 'Mary Dudley Var.': A virus variegated form of **Mary Dudley.** Pink and white. Originated in USA.

Mary Latane. *(C.japonica)*, ACS, *The Camellia Journal*, June 2003, p.24 with colour photo, Reg. No.2596. A rose pink, semidouble to loose peony form flower. Originated by Robbie Snell, Mt. Herman, La., USA. *American Camellia Yearbook*, 2003, p.64, colour photo p.c4. The 8 year old seedling first flowered in 1999. Flowers are 12.7 cm across x 7.5 cm deep, with 15 petals, 12 petaloids, yellow anthers and yellow filaments. Flowers early. Plant is upright with average growth, and dark green leaves 7.5 cm long x 5.7 cm wide.

Mary Lee. *(C.japonica)*, *American Camellia Yearbook*, 1954, p.323, Reg. No,155: A 25 year old seedling, owned by Mrs J.H. Gary, Norfolk, Virginia, USA, that first flowered 1930. Leaves long, narrow, shiny, heavily serrate. Flowers similar to **Alba Plena** with 22-24 petals. White. Blooms midseason to late.

Mary Lennard. *(C.japonica)*, *New Zealand Camellia Bulletin*, March 2007, No.156, p.88, Reg. No. 476. Registered by Lennard Camellias, Te Puke, New Zealand. A chance seedling that first flowered in 1990. The plant is spreading, of average density and medium growth rate. Dark green leaves are 10 cm x 3.5 cm. Flower is of single form, 11 cm wide and 7 cm deep, with 7 petals of firm texture. About 100 cream anthers and stamens form a compact columnar central mass. Flowers in shade are pale pink (RHS.CC. 56C/D) while sunlight flowers are darker, shading from RHS55B on the outer parts of the petals to a lighter 55D at the centre. Flowers mid-season to late. Flowers last well when picked. Won the Maine Trophy, Best Seedling, at the NZ National Show 2005.

Mary Leo. SCCS., 1987, *Camellia Nomenclature*, p.127. Abbreviation for **Sister Mary Leo.**

Mary Libby. *(C.japonica)*, ACS., 1961, *The Camellia Journal*, vol.16, No.2, p.32. No description. *American Camellia Yearbook*, 1962-1963, p.222, Reg. No.617: An 11 year old chance seedling that first bloomed 1954; originated by John T, Weisner, Fernandina Beach, Florida, USA. Plant habit, upright, open growth with light green leaves, 9.5 cm x 4.5 cm. The

semi-double flowers are white with pink stripes and white stamens, 12.5 cm across x 5 cm deep with 18-22 petals. Blooms early to mid-season.

Mary Ligon. *(C.japonica), American Camellia Yearbook*, 1967, p.231, Reg. No.950: A 7 year old chance seedling that first bloomed 1964; originated by S.E. Ligon, Abbeville, South Carolina, USA. Plant growth is upright and medium with dark green leaves, 9.5 cm long x 5 cm wide. The semi-double flower, similar to 'Herme' (**Hikarugenji**) is 12.5 cm across x 3.8 cm deep with 10 petals and 8 petaloids. Colour light pink with yellow stamens. Blooms mid-season.

Mary Lilla Dumas. *(C.japonica), American Camellia Yearbook*, 1984, p.180, Reg. No.1964: A very large, white with an occasional chartreuse centre, semi-double to peony form *C.japonica* (**Gus Menard** x **Charles Bettes**), mid-season blooming. Originated by Dr. W.F. Homeyer Jr., Macon, Georgia, USA. The 14 year old seedling first flowered 1976. Average flower size 14.5 cm across x 5.5 cm deep with 12-17 petals, 150-160 petaloids and yellow anthers, Plant growth is upright and rapid with dark green leaves, 12.5 cm x 5.5 cm.

Mary Linden Rogers. *(C.japonica)*, Levi, 1958, *American Camellia Yearbook*, pp.241, 251. No description. Originated in USA.

Mary Lou Watford. *(C.reticulata),* ACS, *The Camellia Journal*, Dec. 2009, p.29, Regn No. 2782; Originated by E. Hulyn Smith, Valdosta, Ga., USA. *American Camellia Yearbook*, 2009, p.115 with colour photo; A 20 year old chance seedling, first flowered in 2000. Very large flower is 14 cm diameter x 10 cm deep, a pink semi-double to rose form double, with yellow anthers and filaments. Dense upright growth at average rate. Dark green leaves average 11.5 cm x 5 cm. Late flowering.

Mary Louise Cantelou. *(C.japonica), American Camellia Yearbook*, 1977, p.213, Reg. No.1437: A large, blush pink, shading darker towards the edge, semi-double. A 20 year old chance japonica seedling of **Victory White** that first bloomed 1965. Originated by Richard Dodd, Marshallville, Georgia, USA. The bloom has 14 petals, 4-5 prominent petaloids, yellow anthers and filaments. Average size is 12 cm across, Blooms mid-season to late. Plant growth is upright and rapid with dark green leaves 10 cm x 6 cm.

Mary Love. *(C.japonica),* SCCS., 1974, *Camellia Nomenclature*, p.101: White. Large to very large, semidouble with loose petals. Mid-season blooming. Originated by J.M. Haynie, Theodore, Alabama, USA.

Mary Lu. *(C.japonica), American Camellia Yearbook*, 1965, p.241, Reg. No.674: A 10 year old chance seedling of **Imura** that first bloomed 1957; originated by Windy Hill Nursery, Jacksonville, Florida, USA. Growth habit is upright, open and medium with dark green leaves, 8 cm x 4.5 cm. The formal double, blush pink flower is 8 cm across x 2.5 cm deep with 80 petals. Blooms early to mid-season.

Mary Lucas. *(C.japonica),* SCCS., 1958, *Camellia Nomenclature*, p.59: Red variegated white, Large, semidouble with irregular petals, Medium growth, Mid-season blooming. Originated by Lucas, Hattiesburg, Mississippi, USA. Very similar to **Mikenjaku** as 'Nagasaki'.

Mary Ludington. *(C.japonica), American Camellia Yearbook*, 1960, p.203, Reg. No.510: An 8 year old chance *C.japonica* seedling that first flowered 1957. Originated by S.L. Marbury, Wilmington, North Carolina, USA. Growth habit, upright and medium with dark green leaves, 7 cm x 3.8 cm. Flowers semi-double, similar to **Finlandia,** pink and white variegated, also solid pink, 7.5 cm across x 3.7 cm deep with 30-35 petals with a few petaloids and yellow stamens. Flowers mid-season. Sport: **Mary Ludington Pink.**

Mary Ludington Pink. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature*, p.70: Solid pink sport of **Mary Ludington.** Originated in USA.

Mary Lunsford. *(C.japonica),* SCCS., 1966, *Camellia Nomenclature*, p.90: Bright pink. Medium formal double with rounded petals and pointed rose-bud centre. Slow, spreading growth. Mid-season to late flowering. Originated in USA by the Julington Nursery, Jacksonville, Florida.

Mary Mann. *(C.japonica),* Wilmot, *Camellia Variety Classification Report*, 1944, p.5. No description. Originated in USA.

Mary Margaret. *(C.japonica), American Camellia Yearbook*, 1956, p.63, Reg. No.264: An 11 year old seedling of **Elegans**; originated by Earl D. Hudson, Sun Valley, California, USA. First flowered 1950. Plant growth is upright and rapid with small leaves having shallow serrations. Flowers rose-red (RHS.CC.724), incomplete double with small petaloids, similar to **Elegans** with 16-20 guard petals, 11-13.5 cm across. Some of the petaloids are white. Colour is much deeper than **Elegans.** Flowers mid-season.

Mary Mc. *(C.japonica),* McIlhenny, 1937, *600 Varieties of Camellias*, Bright rose-pink. Small, anemone form. Mid-season blooming. Originated by McIlhenny, Avery Island, Louisiana, USA.

Mary McKinnon. *(C.japonica),* Fendig, 1956, *American Camellia Yearbook*, p.31: Originated by Mrs L.T. McKinnon, Brunswick, Georgia, USA, as a seedling of 'Donckelaeri' (**Masayoshi**). It has a very large, pale rose-pink, semi-double flower of 9-12 petals, 13-15 cm across. Formation and petal structure similar to 'Donckelaeri'. Blooms mid-season. Reg. No.840, *American Camellia Yearbook*, 1966, p.95.

Mary Merritt. *(C.japonica), American Camellia Yearbook*, 1954, p.323, Reg. No.203: An 11 year old chance seedling, originated by Filo H. Turner, Pensacola. Florida, USA that first flowered 1949. Plant growth is upright and rapid with dark green leaves, oval, tapering, acuminate and lightly serrate. Flowers are semi-double, similar to 'Donckelaeri' (**Masayoshi**), 8-10 cm across, very dark, satiny red with pink filaments and 9-11 heavy petals. Blooms mid-season.

Mary Moughon. *(C.japonica), American Camellia Yearbook*, 1966, p.95, Reg. No.904: A chance seedling that first bloomed 1959 at 9 years age; originated by G.W Moughon, Birmingham, Alabama, USA. Plant growth is upright, spreading with dark green leaves, averaging 10 cm long x 6 cm wide. This plant produces both semi-double and peony form flowers. Colour is glowing red with yellow anthers. Blooms measure 14-15 cm across x 8 cm deep with 30 petals and 1-12 petaloids. Flowers mid-season to late. See colour photo, front cover, 1965, ACS., *The Camellia Journal*, vol.20, No.5. Sport: **Mary Moughon Variegated.**

Mary Moughon Variegated. *(C.japonica),* Cannon, 1968, ACS., *The Camellia Journal*, vol.23, No.1 as 'Mary Moughon Var,'. A virus variegated form of **Mary Moughon** - Glowing red, blotched with white. Originated in USA.

Mary Musante. (*C.reticulata* hybrid). ACS, *The Camellia Journal*, Feb. 1997, p.15, Reg. No.2393. A large red, rose form double to formal double cross of **Arch of Triumph** x **Jean Pursel.** Flowers mid-season. Originated by Jack L. Mandarich, Grants Pass, Ore., USA. *American Camellia Yearbook*, 1997, p.5, colour photo before p.1. First bloomed in 1988. Average flower size is 11.5-12.7 cm diameter x 7.5-11.5 cm deep with 20-25 petals. Plant growth is upright and average with dark green leaves 12.7 cm long x 6.5 cm wide.

Mary Mustante. ICS, *Journal*, 1998, p.90: Orthographic error for **Mary Musante.**

Mary Novick. *(C.reticulata), American Camellia Yearbook*, 1981, p.102, Reg. No.1770: A very large, medium red, semi-double *C.reticulata* chance seedling, mid-season blooming to late. Originated by I. John Novick, La Verne, California, USA. The 5 year old seedling first bloomed 1970. Average flower size 15 cm across x 10 cm deep with 24 petals and occasional petaloids, Anthers yellow, filaments white. It has a full circle of rabbit ears. Plant growth is upright, open and rapid with dark green leaves, 10 cm x 5.5 cm.

Mary Myrick. *(C.japonica), American Camellia Yearbook*, 1975, p.239, Reg. No.1365: A 10 year old chance seedling that first bloomed 1965. Originated by Emanuel Kronstadt, Savannah, Geor-

gia, USA. Plant growth is upright and medium with dark green leaves, 10 cm long x 4 cm wide. The semi-double 'Herme' (**Hikarugenji**) type bloom is light pink blush, yellow anthers and white filaments with 36-40 petals and 7-10 petaloids. Average size is 9.5 cm across x 5.5 cm deep. Blooms mid-season.

Mary Noble. *(C.japonica), American Camellia Yearbook*, 1971, p.48, Reg. No.1150: An 8 year old chance seedling that first bloomed 1965. Originated by Frank D. Bisbee, Jacksonville, Florida, USA. Plant growth is spreading and medium in rate with dark green leaves, 9.5 cm x 5 cm. The peony form, white bloom measures 12.5 cm across x 7.5 cm deep with 30 petals and 13 petaloids and yellow anthers. Blooms early to mid-season.

Mary Noel Green. *(C.japonica), American Camellia Yearbook*, 1966, p.96, Reg. No.842: An 8 year old chance seedling that first bloomed 1959, originated by Julington Nurseries Inc, Jacksonville, Florida, USA. Plant growth is dense and medium with heavy, dark green leaves, 7.5 cm x 5 cm. The close, anemone flower is bright red (Turkey red) with gold anthers and white filaments; 11 cm across x 6 cm deep with 24 petals and 7-10 petaloids. Flower has 4 alternative rows of large, rounded petals with several rows of smaller petals. Petals slightly wavy, heavy textured. Blooms mid-season.

Mary O'Donnell. (*C.reticulata* hybrid). *American Camellia Yearbook,* 1992, p.36, Reg. No.2264, colour photo pp.41-42: A medium to large size, phlox pink, peony to rose form to formal double *C.reticulata* hybrid (**Lilette Witman** x **Hulyn Smith**). Blooms early to late. Originated by Jack Mandarich, Menlo Park, California USA. The 11 year old seedling first flowered 1987. Average flower size is 10 cm across x 5 cm deep with 35+ petals and golden anthers. Plant growth is upright, spreading, dense and vigorous in rate with light green leaves 11.2 cm long x 5 cm wide. Chinese synonym 'Dongnaier'.

Plant habit is upright, semi-spreading, foliage a dark green, 9 cm x 4 cm. Flower peony form with 10-14 petals and 5060 petaloids, yellow anthers, cream filaments, 13.5 cm across x 4.5 cm deep. Colour light rosepink. Early to mid-season flowering. Orthographic error: 'Mary P. Thylor'. Abbreviation: 'Mary Phoebe'.

Mary R. Solomon. *(C.japonica), American Camellia Yearbook*, 1971, p.48, Reg. No.1146: A 9 year old chance seedling that first bloomed 1967. Originated by J.L. Solomon, Augusta, Georgia, USA. Plant growth is spreading and medium with light green leaves, 4 cm long. The semi-double, 'Herme' (**Hikarugenji**) style, bloom is white with red variegation and gold anthers and light yellow filaments. It has 15 petals and 2 petaloids and measures 10 cm across x 4 cm deep. Late blooming.

Mary Rhodes. *(C.reticulata).* ACS, *The Camellia Journal,* June 2013, p.26 with colour photo; Regn No.2851; Originated by Hulyn Smith, Valdosta, Ga., USA. ACS, *Yearbook,* 2013, p.126 with colour photo; Registered and propagated by Randolph Maphis, Tallahassee, Fla., A 12 year old seedling of **Suzanne Withers** x **Annabelle Fetterman**, first flowered 2005. Large to very large, 10-10.8 diameter x x 9.5cm deep flower is light pink shading to white, semidouble with raised and wavy petals. Heavy petal texture, and flowers fall whole. Yellow anthers and white filaments. Upright, spreading, vigorous growth. Dark green leaves average 10-12cm x 5cm with low serration. Late flowering.

Mary Robertson. Fendig, 1951, *American Camellia Yearbook*, p.77. Synonym for 'Donckelaeri', (**Masayoshi**).

Mary Robinson. *(C.japonica), American Camellia Yearbook*, 1973, p.193, Reg. No.1246: A 9 year old chance seedling, originated by E.D. Robinson, St Pauls, North Carolina, USA. Plant growth is average and slow with light green leaves, 7.5 cm x 3.8 cm. The formal double, pink bloom has 77 petals and opens mid-season. It measures 7 cm across x 3.8 cm deep. Good texture with centre petals pointed and incurved.

Mary Ruth Smith. *(C.japonica),* ACS 1995, *The Camellia Journal*, vol.50, No.3, p.36, Reg. No.2334: Large size, deep pink with red veins, formal double *C.japonica* chance seedling. Blooms mid-season to late. Originated in USA by William H. Smith, Gainesville, Florida. ACS 1995, *American Camellia Yearbook,* p.8 with colour photo: The 9 year old seedling first flowered 1989. Average flower size is 10.5 cm across x 6 cm deep with 61 petals. Plant growth is spreading and average in rate with dark green leaves 10 cm long x 3.5 cm wide.

Masetiana. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **Julia Drayton** as 'Mathotiana'.

Masmetto. *(C.japonica), The Gardeners' Chronicle and Agricultural Gazette,* 1856, p.208. No description. Originated in USA. (Believed extinct.)

Mason Farm. (*C.sasanqua x C.oleifera*). Camellia Forest Nursery Catalogue, 1995, p.6: Originated by Dr Clifford Parks, Chapel Hill, N.C., USA as an F.2 segregate of *C.sasanqua x C.oleifera*, cold hardy to -10 degrees Fahrenheit. Vigorous shrub with large white flowers, petals tinged pink. Blooms freely in early autumn. This indicidual was selected because it survived the coldest winter without injury.

Masquerade. (*C.japonica*), Nuccio's Nurseries Catalogue, 1953, pp.9, 11: White striped pink on one or more petals. Large, semi-double to anemone form with lacy petaloids in the centre. Medium, compact growth. Mid-season flowering. Originated by Nuccio's Nurseries, Altadena, California, USA. Sports: **Marguerite Tourje, Masquerade Red.**

Masquerade Red. (*C.japonica*), Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.153. The solid red sport of **Masquerade.** Originated in USA.

Massani Novissima. (*C.japonica*), Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.13. No description. Originated in Italy. (Believed extinct.)

Massani Vera. (*C.japonica*), Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.13. No description. Originated in Italy. (Believed extinct.)

Masse Lane. Thermal Nurseries, (Rotorua) Ltd Catalogue, 1986, p.12. Orthographic error for **Massee Lane.**

Massee Lane. *(C.reticulata* hybr.), *American Camellia Yearbook*, 1974, p.172, Reg. No.1263, A 9 year old seedling of **Phyl Doak** that first bloomed 1967. Originated by Milo Rowell, Fresno, California, USA. Plant growth is upright, spreading and dense with dark green leaves, 10 cm x 5.3 cm. The anemone to rose form bloom is spinel red. It measures 13 cm across x 7 cm deep with 28 petals and yellow filaments. Blooms mid-season. Orthographic errors: 'Massie Lane', 'Masse Lane'. Sport: **Massee Lane Variegated**. See colour photos: Front Cover, SCCS., 1973, *The Camellia Review*, vol.34, No.5 and front cover. 1981, *New Zealand Camellia Bulletin*, vol.XII, No.2. Also facing p.196, *American Camellia Yearbook*, 1973. Chinese synonym: 'Shancha Zhidu'. Note; Colour later corrected to pink.

Massee Lane Variegated. *(C.reticulata* hybr.), Shackelford, 1973, ACS., *The Camellia Journal*, vol.28, No.1 as 'Massee Lane Var'. A virus variegated form of **Massee Lane** - Spinel red, blotched with white. Originated in USA. Chinese synonym: 'Yuban Shancha Zhidu'.

Massiani. Downing Nursey Catalogue, (before 1968). Orthographic error for **Massini.**

Massie Lane. Newman's Nursery Catalogue, 1982-1983. Orthographic error for **Massee Lane.**

Massimiana. *(C.japonica),* van Houtte Catalogue, 1872-1873, No.144. No description. Originated in Italy. (Believed extinct.)

Massimo d'Azeglio. *(C.japonica),* Anonymous, 1879, *R. Società Toscana di Orticultura Bulletino,* 4:99-102: Originated in Italy by Cesare Franchetti, Florence. Large, perfectly imbricated flower; colour red lined with white. Orthographic error: 'Messimo d'Azeglio'.

Massineana. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.153. Orthographic eror for **Massimiana.**

Massini. *(C.japonica),* Verschaffelt Catalogue, 1849-1850, p.48 as 'Massinii'. No description. Originated in Italy. (Believed extinct.) Orthographic errors: 'Massiani', 'Massinii', 'Tricolor Massina'.

Master Cope. Seidel, 1870, Pflanzen Catalogue, p.9. Orthographic error for **Mrs Cope.**

Master Double. Bosse, 1840, *Handbuch der Blumengartneri,* p.449. Abbreviation for **Master's Double Red.**

Master Double Red. Berlèse, 1837, *Monographie,* ed.1, p.122. Orthographic error for **Master's Double Red.**

Master of Ceremonies. Camellias, Y.C. Shen, 2009, p.169 with colour photo; Translation of the Japanese *C.japonica* **Shikibu,** which is the valid name and should always be used.

Master Piccoti. *(C.japonica),* Berlèse, 1840, *Monographie,* ed.2, p.190: Leaves, 8.6 cm. x 5.4 cm, oblong, apex recurved, finely serrate, smooth, dull green; bud obtuse with yellowish scales; flower full, 9.5 cm. across, orange-red, exterior petals in 4 rows, wide, well imbricated, undulate, almost fringed; those of the centre to the number of 4 or 5, are erect, twisted and undulated. Tagliabue, 1840, *Nomenclatore Camelliae,* as 'Master's Piccoti'. No description. Originated in England. Orthographic errors: 'Master Picotti', 'Master Picoti', 'Master's Piccotee', 'Master's Piccoti'.

Master Picoti. Paillet, 1844, In Lemaire, *Des Genres Camellia, Rhododendron, Azaleés...,* p.157. Orthographic error for **Master Piccoti.**

Master Picotti. Berlèse, 1840, *Monographie,* ed.2, p.234. Orthographic error for **Master Piccoti.**

Master Rosa. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.154. Orthographic error for **Master Rosea.**

Master Rosea. *(C.japonica),* Cachet Catalogue, 1861; Dombrain, 1862, *Floral Magazine,* vol.2, pl.95.: Imbricated. Rose colour with deeper veining. Williams B.S., 1869, Catalogue, p.207. Originated in France. Orthographic variants: 'Maester Rosea', 'Master's Rosea'.

Mastererii. Berlèse, 1838, *Monographie,* English edition reprinted by McIlhenny, p,78. Orthographic error for 'Masteri', synonym for **Master's Double Red.**

Masteri. J.E. von Reider, 1834, *Die Beschreibung und Kultur der Azaleen, Cactus, Camelien..,* p.219 as 'Masterii'. Loddiges Catalogue, 1836, p.25 as 'Masterii'. Berlèse, 1837, *Monographie,* ed.1, pp.90, 99 as 'Masterii'. Synonym for **Master's Double Red.**

Masterii. Bosse, 1840, *Handbuch der Blumengartnerei,* p.446. Orthographic error for 'Masteri', itself a synonym for **Master's Double Red.**

Masterpiece. *(C.japonica),* Thompson, 1950, *American Camellia Yearbook,* p.144: A seedling of Harvey F. Short, Ramona, California, USA, from seed of **Gauntlettii** as 'Lotus'. Its 10-12.5 cm flower is full, imbricated. Its foliage is sensational, very dark green, up to 18 cm. long x 11 cm wide. It is a large white, sometimes opening faintly blush; a formal double with a high centre to rose form double, with tall, vigorous growth. Received a RHS., P.C. in 1961. Sport: 'Masterpiece Pink'. Synonym: 'Masterpiece White'. Chinese synonym: 'Jiezuo'.

Masterpiece Alba. ACS 1995, *The Camellia Journal,* vol.50, No.2, p.20. Florida Star Nurseries and Supply Co, Marianna, Florida. Erroneous synoym for **Masterpiece.**

Masterpiece Pink. *(C.japonica),* SCCS., 1968, *Camellia Nomenclature*, p.94: A pink sport of **Masterpiece.** Originated by Mrs J.P. Moon, Lake Carles, Louisiana, USA. Synonym: 'Pink Masterpiece'.

Masterpiece White. Bob Wines Nursery Catalogue, 1985-1986, p.3. Synonym for **Masterpiece.**

Masterscent. (*C.lutchuensis* hybrid). *New Zealand Camellia Bulletin*, 1994, Issue 118, vol.XVIII, No.5, p.32, Reg. No.348: Originated by J.R. Finlay, Whangarei, New Zealand as a seedling of **Mrs Bertha A. Harms** x (**Salab** x **Scentuous**). Flower coral red (RHS.CC.52B-C), peony form, 11 cm across with 12 petals and 22 petaloids, some large. The flower has a firm texture, falls in one piece and has a good fragrance. Growth habit upright, open, medium rate with dark green leaves 11 cm long x 5 cm wide.

Master's Double Red. *(C.japonica),* Courtois, 1833, *Magazin d'Horticulteur*, 1[pt.D]:316. No description. Berlèse, 1837, *Monographie*, ed.1, p.122: Leaves somewhat large, ovate-obtuse, rolled under, strongly veined. deep green; bud medium size, scales calycinal, yellowish; flower large, double, orange red, sometimes spotted with white. Berlèse in this publication listed and described 'Masteri' as a separate cultivar, but in his *Iconographie*, 1841, pl.66, combined them as the one variety as follows:- 'Mastersii', **Master's Double Red** or 'Magniflora': Cherry red bordering at first on crimson but later poppy red. The petals at the circumference, imbricated in three rows, are notched, cordiform, convex and reflexed at the edge; those in the centre are wide, rose shaped, small, rounded and short, some curled and irregularly disposed. Synonyms: 'Masteri', 'Magniflora'. Orthographic errors: 'Master Double Red', 'Marter Double Red', 'Master Double', 'Masterii'.

Mastersii. Berlèse, 1841, *Iconographie*, p. facing pl.66. Orthographic error for 'Masteri', synonym for **Master's Double Red.**

Master's Piccotee. Tagliabue, 1840, *Nomenclatore Camelliae* .... Orthographic error for **Master Piccoti.**

Master's Piccoti. Baumann, Mulhouse Nursery Catalogue, 1841-1842, p.14. Orthographic error for **Master Piccoti.**

Mathose. *(C.japonica)*, Peer, 1956, *American Camellia Yearbook*, p.56. No description.

Mathotiana. *(C.japonica)*, Anonymous, 1847, *Gardeners' Chronicle*, (27):434. Spae, 1847, *Société Royale d'Agriculture et de Botanique de Gand, Annales*, 3:459-460, pl.170: This flower is distinguished by its vigorous habit; its branches are strong, brown and very heavily foliaged; the leaves are very large and thick, of a dark green and very dentate. The flower is of the most beautiful cerise-red, very large ... the petals are large, very well imbricated and adhere strongly to the tortus, the type of flower which remains for a long time on the plant and it acquires in the end a purple violet colour. It is recorded as a seedling of **Anemoniflora** x 'Sieboldii' (**Leeana Superba**) raised by Mathot of Ghent, Belgium. This cultivar is also illustrated and described in Verschaffelt, 1849, *Nouvelle Iconographie*, Book IX, pl.III There appear to have been two other camellias distributed under the name 'Mathotiana'. The first one is dealt with under its prior, valid name of **Julia Drayton** and the second one under **Grand Sultan.** Orthographic errors: 'Mathioliana', 'Mathiotiana', 'Mattutiana', 'Matthotiana', 'Mattheotiana'. Synonym: 'Mathotiana Rubra'. Chinese synonym 'Masedi'a'na.

Mathotiana. Vanderbilt, 1941, *Camellia Research, II.* A name erroneously given in the USA to an old plant from Magnolia Gardens previously known as **Julia Drayton.**

Mathotiana Alba. *(C.japonica)*, van Houtte Catalogue, 1858; Verschaffelt 1858, *Nouvelle Iconographie*, Book VI, pl.II. Found in a group of seedlings obtained by the late Mr Mathot of Ghent. Its blossoms of the largest size, are composed of very numerous, ample petals of equal size, ovate and almost pointed, of a snow white colouring and imbricated. This formal double camellia, about 10 cm across, is white with a rare pink fleck, vigorous, upright growth and large, light green leaves, smooth, leathery with obscure serrations. Note: This cultivar and its sports bear no relationship with **Mathotiana, Grand Sultan** or **Julia Drayton.** Sports: **Mathotiana Rosea, Mathotiana Rosea Variegated, Souvenir de Bahuaud-Litou.** Synonyms: 'Blood of Christ', 'Inconstant Beauty'. Orthographic errors: 'Matholiana Alba', 'Mattutiana Alba', 'Mathottiana Alba', 'Mathoniana Alba', 'Mothotiana Alba', 'Mattothiana Alba', 'Mathatiana Alba', 'Mathistiana Alba'. See colour pl.XXXV, Urquhart, 1960, *The Camellia*, vol.II. For black and white photos see p.231, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II and Sharp, 1958, *Camellias Illustrated*, p.160.

Mathotiana Alba Pink. Vanderbilt, 1941, *Camellia Research, II,* p.5. Synonym for **Souvenir de Bahuaud-Litou.**

Mathotiana Alba Pink Beauty. Vanderbilt, 1941, *Camellia Research, II,* p.5. Synonym for **Mathotiana Rosea.**

Mathotiana Blotched. Glen St Mary Nursery Catalogue, 1948-1949. Synonym for **Mathotiana Rosea Variegated.**

Mathotiana Fimbriata. SCCS., 1956, *The Camellia. Its Culture and Nomenclature*, p.66. Synonym for **Flowerwood.**

Mathotiana Pink Beauty. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.154. Synonym for **Mathotiana Rosea.**

Mathotiana Purple King. Stonehurst Nurseries Catalogue, 3, before 1954. Synonym for **Julia Drayton.**

Mathotiana Red. Treseder's Nurseries (Truro) Ltd Camellia List, 1962-1963, p.3. Synonym for **Grand Sultan.**

Mathotiana Rosa. da Silva & Filhos Nursery Catalogue No.99, 1964-1965, p.26. Orthographic error for **Mathotiana Rosea.**

Mathotiana Rosea. *(C.japonica),* Veitch Nursery Catalogue, 1874. A carmine sport of **Mathotiana Alba** (HCC. Carmine 21) with all other characteristics identical. James Veitch Nursery Catalogue, 1876-1877, p.63: Has all the additions for late flowering camellias; excellence of form and foliage of **Mathotiana Alba.** Flowers large size, imbricated, of clear rose colour. Comes into bloom when the other varieties have shed their flowers. Originated in England. Synonyms: 'Pink Beauty', 'Laura Polka', Warick', 'Storeyii New Pink', 'Pink Spangles', 'Mathotiana Pink Beauty'. Orthographic errors: 'Mattutiana Rosea', 'Mathionia Rosea', 'Mothotiana Rosea', 'Matholiana Rosea'. Some early listings in America incorrectly identified this cultivar as a sport of **Julia Drayton** when it was erroneously identified as **Rosea Superba.** For black and white photo see p.149, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III. For colour photo see p.124, Fairweather, 1979, *Rhododendrons and Azaleas.* Received the RHS, "Award of Merit" in 1954. Sport: **Mathotiana Rosea Variegated.** Chinese synonyms 'Waweike', and 'Aulike', later changed to 'Mase Meigui'.

Mathotiana Rosea Superba. Vanderbilt, 1941, *Camellia Research, II,* Synonym for **Rosea Superba** a sport of **Julia Drayton.** (as 'Mathotiana').

Mathotiana Rosea Variegated. *(C.japonica),* Fruitland Nursery Catalogue, 1945-1946, p.27. A virus variegated form of **Mathotiana Rosea** - Carmine blotched with white. Originated in USA where it was also erroneously named 'Anna Bruneau'. Synonym: 'Mathotiana Blotched'.

Mathotiana Rubra. Campos, 1891, *Portuguese Jornal Horticolo Pratica*, 22:210. Synonym for **Mathotiana**. Orthographic errors: 'Martholiana Rubra', 'Matholiana Rubra'.

Mathotiana Rubra. Fruitland Nursery Catalogue, 1933-1934. Synonym for **Julia Drayton** (as 'Mathotiana')

Mathotiana Rubra Variant. Semmes Nursery Catalogue, 1949-1950. Synonym for **C.M. Hovey.**

Mathotiana Shell Pink. Lindo Nurseries Price List 3 before 1945. Synonym for **Souvenir de Bahuaud-Litou.**

Mathotiana Special. SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* As this is a virus variegated form of **Julia Drayton** (As 'Mathotiana') the name **Julia Drayton Variegated** takes precedence.

Mathotiana Superb Red. RHS., 1984-1985, *Rhododendrons with Magnolias and Camellias*, pp,69,106. Synonym for **Grand Sultan.**

Mathotiana Supreme. *(C.japonica)*, SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* A sport of **Julia Drayton** (as 'Mathotiana'). A very large, dark red, semi-double with loose, irregular petals interspersed with stamens, 12-13 cm across. Originated in USA by the Flowerwood Nurseries, Mobile, Alabama. Synonym: 'Mima-Mae'. Sports: **Sue Ann Mouton, Cherry Bounce, Mathotiana Supreme Variegated, Mathotiana Supreme Benten.** Chinese synonym: 'Chaoji Masetiana', later changed to 'Chaoma'. Note: While this is not a form of the valid **Mathotiana,** the name **Mathotiana Supreme** stands as it is universally known. For colour photos see front cover SCCS., 1954, *The Camellia. Its Culture and Nomenclature.* Illustration facing p.178, *American Camellia Yearbook*, 1953. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.104. *Encyclopedia of Camellias in Colour*, vol.II, 1978. pl.111, p.58. Received the Sewell Mutant Award from the ACS for 1965.

Mathotiana Supreme Benten. *(C.japonica)*, ICS., Apr.1990, *Book of Manuscripts*, ICS Maizuru Congress, p.20: Originated in Brookhaven, Mississippi, USA in the garden of Thomas Perkins III. It is very similar to **Mathotiana Supreme** except that it has a distinct, dark watermark pattern on each leaf and petal.

Mathotiana Supreme Pink. Cannon, 1963, ACS., *The Camellia Journal*, vol.18, No.5. Synonym for **Sue Ann Mouton.**

Mathotiana Supreme Variegated. *(C.japonica)*, McDonald Nursery Catalogue, 1954-1955. A virus variegated form of **Mathotiana Supreme** - Dark red, blotched white. Originated in the USA. Synonyms: 'Avery Island', 'Kate Smith', 'Mima Mae Variegated', 'Kate Smith Variegated'. Chinese synonym: 'Fusechaoji Masetiana', later changed to 'Fuse Chaoma'.

Mathotiana (US). Vanderbilt, 1941, *Camellia Research II.* Synonym for **Julia Drayton** as 'Mathotiana'. Chinese synonym: 'Masetiana'.

Mathotiana Variant. Blackwell Nursery Catalogue, 1947-1948, p.19. Synonym for **Julia Drayton Variegated** as 'Mathotiana Variegated'. Also a pseudonym for C.M. Hovey.

Mathotiana Variegated. Orton Price List, 1947-1948; Fruitland Nursery Catalogue, 1947-1948; *American Camellia Yearbook*, 1947, pl. facing p.58, colour photo. Synonym for **Julia Drayton Variegated.**

Mathottiana. *Paxton's Botanical Dictionary*, Revised, 1868, p.105. Orthographic error for **Mathotiana.**

Mathottiana Alba. Fraser & Langton Nursery catalogue, 1874-1875. Orthographic error for **Mathotiana Alba.**

Matilda. Gerbings Azalea Gardens Catalogue, 1938-1939. Orthographic variant for 'Mathilda', synonym for **Caleb Cope.**

Matilda Bradford. *(C.japonica), American Camellia Yearbook*, 2003, p.65, Reg. No.2607. A dark red, peony form chance seedling with numerous petaloids and yellow anthers. Size is 9 cm across. The 25 year old seedling first flowered in 1978. Originated by J.A. Peninger, Shreveport, La., USA. Flowers mid-season to late. Petals have heavy texture. Plant has spreading, dense growth of average rate with dark green leaves 7.5 cm long x 3.8 cm wide.

Matilde Arnous. *(C.japonica), R. Società Toscana di Orticultura Bollettino*, 1876: Vivid cinnabar red, perfectly imbricated. Originated in Italy. Orthographic error: 'Metilde Arnous'.

Matilde O'Connell. *(C.japonica), R. Società Toscana di Orticultura Bollettino*, 1876: Large flowers, perfectly imbricated, vivid rose colour. Originated in Italy by Franchetti, Florence.

Matilde Sormani Granelli. *(C.japonica)*, Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.127 with colour photo; Medium size, formal double, outer petals reflex. Pink (RHS.CC.58B). Some

petals streaked with white. A seedling of **Moshio** x 'Pomponia Semiplena' **(Pomponia Semi-duplex),** first flowered in 2000. Originated by Dott. Guido Cattolica, Livorno, Italy.

Matilija Poppy. (*C.japonica*), Nuccio's Nurseries Catalogue, 1991, #8236: White, large semi-double. SCCS 1993, *Camellia Nomenclature,* p.77: White, large to very large size, semi-double with crinkled petals. Vigorous, compact, dense growth. Blooms mid-season to late. Originated in USA by Nuccios Nurseries, Altadena, California. Chinese synonym 'Baiyingsei'.

Matissa. *(C.japonica),* Griffin ed., 1957, *Camellian*, p.19. No description. Originated in USA.

Matoba-nishiki. (Variegated Camellia from Matoba), *(C.japonica),* JCS., 1987, *Japan Camellia*, No.24, p.4, colour photo: Originated in a camellia hedge at the target range at Inasa Town, Matoba, Inasa Sub-prefecture, Shizuoka Prefecture and grown by Funakoshi Kôji, Aichi, Japan. A few red vertical lines on a white ground. Medium sized, semi-double blooms. Late flowering. Fragrant. A good seed setter.

Matose. Vanderbilt, 1940, *Camellia Research*, p.6. Orthographic error for **Matosi.**

Matosi. *(C.japonica),* Gerbing Azalea Gardens Catalogue, 1938-1939. A full double, baby pink, marbled pure white. Blooms early in the season and lasting a long period; tall, bushy growth, light green leaves. Sports: **Sacco Rose, Matosi Baby.** Synonym: 'Baby Pink Variegated'. Orthographic errors: 'Matose', 'Motose'. See black and white photo, p.233, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Matosi Baby. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.163 as 'Motosi Baby': A solid colour, pink sport of Matosi. Originated in USA.

Matronesson Nova. Burdin Maggiore & Co. Catalogue, 1862. Orthographic error for **Mitronesson** .

Matronesson Vera. Burdin Maggiore & Co. Catalogue, 1863. Orthographic error for **Mitronesson Vera.**

Matsuba. (Pine Needles), *(C.japonica),* Yashiro, 1841, *Kokon Yôrankô*, vol.309, 'Grasses and Trees' , p.361. (Illustrations omitted in reprint). Originated in Japan. (Believed extinct.)

Matsuga-e. (Pine Branch), *(C.japonica),* Yashiro, 1841, *Kokon Yôrankô;* vol.311. No description. Tsubaki Hachiboku Sanboke-tsuki, *Nayose Hanagatatsuki Meisai* (before 1868) and Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Snow white with red streaks. Semi-double with 3-4 petal rows, bell-flower shape. Originated in Japan. (Believed extinct.)

Matsuga-e. (Pine Branch), *(C.japonica),* Itô, Ko'emon, 1879, *Chinkashû:* Medium white, semi-double with 12-13 fluted and crinkled petals in 2-3 rows. Small, irregular stamen cluster. Leaves narrow-elliptic, long acuminate, finely serrulate. Originated in Kantô, Japan. For colour plate see: *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.389. Seibundô Shinkôsha, 1979, *Senchinshû,* p.143. Different reading: 'Matsuga-eda'. A sport of **Oimatsu** or **Matsu-no-yuki.**

Matsugasa. Different reading for **Matsukasa.**

Matsugasaki. (Name of a Village), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in section on early flowering: White with red splashes. Itô, Ko'emon, 1879, *Chinkashû:* White with red spots. Medium sized double. Early blooming. Originated in Japan. Different reading: 'Matsu-ga-saki'.

Matsugenkifu. Different reading for **Shôgenkifu.**

Matsuhana. (Expected flower), *(C.japonica),* Tuyama, 1968, *Camellias of Japan*, pl.201, p.102, description, p.149, as 'Matsu-hana': Leaves elliptic to broad-elliptic, venation impressed, margins crenate, 6.7-7.5 cm long x 3.4-4.1 cm wide; petioles, 6-7 mm long, glabrous. Flowers double, red, (Cardinal red 822/3), the centre filled with small petals and petaloids; petals

20-22, in general, rounded at the top and concave, inner petals loosely and irregularly wavy. Filaments pale pink, reddish to base with 1-7 petaloids. Late flowering. Originated in the Okayama Prefecture, Japan.

Matsukasa. (Pine Cone), *(C.japonica)*, Mizuno, Motokatsu, 1681, *Kadan Kômoku;* Itô, Ihei, 1695, *Kadan Chikinshô; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.31; Yashiro, 1841, *Kokon Yôrankô*, vol.342; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Deep red, double, centre of the flower protruding like a pine cone. Tuyama, 1966, *Camellia Cultivars of Japan*, p.76, pl.40: Medium sized, red, double, 7-8 cm across x 5.5 cm deep, with 6-7 rows of imbricated, narrow, pointed petals, standing apart, in the form of the scales of a pine cone. A few stamens in the centre. Leaves dark green, 7.5 cm x 3.8 cm, apex acuminate, recurved, margins shallowly, coarsely serrate. Late blooming. Low, bushy grower. Originated in the Kansai area, Japan. See colour illustrations: Tuyama, 1966 *Camellia Cultivars of Japan*, pl.40, p.76; Ibid, 1968, *Camellias in Japan*, pl.204. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.285. Satô, 1975, *Chûbu no Tsubaki*, p.97. Seibundô Shinkôsha, 1979, *Senchinshû*, p.143. Synonyms: 'Pine Cone', 'Matsukasa Red'. In USA the variegated form has usurped the name **Matsukasa** which should only be applied to the solid colour form. (See erroneous descriptions in SCCS., *Camellia Nomenclature*, 1950 and on). The variegated form is validly known as **Kagoshima.**

Matsukasa Alba. Vanderbilt, 1940, *Camellia Research*, p.6. Orthographic variant for 'Matsukasa White', synonym for **Kagiri.**

Matsukasa Red. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Matsukasa.**

Matsukasa-shibori. Chûgai Nursery Catalogue, 1934-1935. Synonym for **Kagoshima.**

Matsukasa-tairin. (Large Flower Pine Cone), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Deep red, formal double, with white spots, large size. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.80. Itô, Toku'emon, 1788, *Tsubaki Hanagata Tsuki Obo'echô.* No description. Originated in Japan. (Believed extinct.)

Matsukasa White. Hume, 1946, *Camellias in America*, p.335. Synonym for **Kagiri.**

Matsukasa-edagawari. ('Matsukasa' Sport), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Iro-hanayose Irotsuki.* No description. See: JCS., 1969, *Tsubaki*, No.7, p.35. Originated in Japan. (Believed extinct.)

Matsukaze. (Wind in the Pines), *(C.japonica)*, Mizuno, Motokatsu, 1681, *Kadan Kômoku:* Large variegated. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Single, white with red spots, cylindrical stamen cluster. Originated in Japan. (Believed extinct.)

Matsukaze. (Wind in the Pines), *(C.x vernalis)*, JCS., 1987, *Tsubaki*, No.26, p.50: Small size, pink, single. Tanaka et al., 1986, *Journal of Japanese Society of Horticultural Science*, 55(2)108: A triploid cultivar of *C.vernalis.* Originated in Shizuoka. Prefecture, Japan.

Matsukaze-nishiki. (Wind in the Pines brocade), (*C.japonica*), Uekiya, Seigorô, 1874, *Tsubaki Hyakuro no Zu*, vol.I: Semi-double, white with multiple streakings of crimson, 3-4 rows of reflexed petals and central stamen cluster. Originated in Japan.

Matsukaze-shibori. (Variegated Matsukaze'), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, #176; Yashiro, 1841, *Kokon Yôrankô*, vol.306: Single, medium sized flower, white daubed with red. Originated in Japan. (Believed extinct.)

Matsumari-tsubaki. (Pine Ball Camellia), *(C.japonica)*, Nakayama, Yûhei, 1847, *Senka'ôden:* Resembles 'Matsukasa'. Different reading: 'Shôkyû-tsubaki'. Originated in Japan. (Believed extinct.)

Matsumoto-uzuba. (Matsumoto's Swirled Leaf), *(C.japonica)*, Mizuno, Taka'aki, 1829, *Sômoku Kinyôshû:* In the section of "unusual leaves". "Uzu' means swirled, and "Uzuba" indicates

that the leaves are strongly twisted, slender and long. See Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.158. Synonym: 'Matsumoto-uzu-tsubaki'. Originated in Japan. (Believed extinct.)

Matsumoto-uzu-tsubaki. Watanabe, 1970, Kyôto Tsubaki Kurabu, *Tokushû*, p.142. Synonym for **Matsumoto-uzuba.**

Matsumushi. (Cricket), *(C.japonica)*, Hino, Sukekatsu, 1632, *Sukekatsukyôki; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.406: Medium sized double, with 4-5 rows of red petals, with the colour fading to pink at their edges, emarginate, and a small group of infertile, centre stamens. Originated in Japan. (Believed extinct).

Matsunami. (Waves of Pines), *(C.rusticana), Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.326, p.144 description, p.339: Medium sized, open, peony form flower, 8 cm across, white with light red splashes and streaks, outer row of small, erect petals, petaloids and stamens inter-mixed. Leaves, pale green, elliptic, tapering at both ends, coarsely and sharply serrate. Named by Kawamura, Yiachi. Originated in Ojiya City, Niigata Prefecture, Japan. Colour photo: Seibundô Shinkôsha, 1979, *Senchinshû*, p.143.

Matsu-no-eda. Kamegorô 1859, *Tsubaki Irohanayose Irotsuki*. Different reading for **Matsuga-e.**

Matsu-no-kaori. (Fragrance of Pine), *(C.x vernalis)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.266, description, p.267, colour photo: Small size, pink with colour fading towards the centre, saucershaped single of 6 broad, rounded, emarginate, overlapping petals and a spreading, yellow stamen cluster. Blooms early to midseason. Fragrant. Leaves mid-green, obovate, apices long acuminate, margins strongly serrate. Originated in Izu Ohshima Isles, Japan. A seedling of **Umegaka.** Named and released by Takeo Ogawa in 1970s.

Matsu-no-uzuba. (Pine and Pelican Head), *(C.japonica)*, Aoyama, Kinta, 1827, *Sômoku Kihin Kagami*. No description. Mizuno, 1829, *Sômoku Kinyôshû:* Leaves reflexed outwards, dark lustrous green; flowers red, single. See Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.169. Originated in Japan. (Believed extinct.)

Matsu-no-yama. (Name of a Village), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.126, p.63, description, p.124: Leaves dark to olive green, thin, broadly-elliptic, apex acuminate, base tapered, venation impressed, 6.3-7.5 cm long x 3-3.3 cm wide; petioles, 4-8 mm long, glabrous. Flowers peony type, pink, (Neyron rose 623/2), with deeper shade (623/3) in centre. Petals, 1824, very wavy. Stamens divided into 2-5 fascicles, with additional 2-7 petals inside the stamens. which are 2.7-3.5 cm high, filaments palest pink. Late flowering. Originated in Matsu-noyama-mura, Higashi-kubiki-gun, Niigata Prefecture, Japan.

Matsu-no-yuki. (Snow on the Pines), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium size, double, white with red spots. Itô, Ko'emon, 1879, *Chinkashû:* White spotted pink. Medium sized double. Flowers early to mid-season. Tuyama, 1966, *Camellia Cultivars of Japan*, p.256; Seibundô Shinkôsha, 1979, *Senchinshû*, p.248: Double blossom, 12-13 petals in lotus fashion, with small, red spots on white flowers. Small, cylindrical stamen cluster. Medium sized. Mid-season flowering. Leaves, medium sized, long ovate, acuminate apex, keeled midrib, yellow variegation. Plant habit, upright, well furnished, variable. Mutation of **Oimatsu** from Kantô, Japan. Sport: **Matsuga-e**. The ancient variety is believed to be the same as the modern one of this name.

Matsu-no-yuki. (Snow on the Pines), *(C.sasanqua)*, Ashizawa, Yagorô, 1898, *Chabaika Taishû;* Wada, 1941, *Japanese Garden Treasures*, p.31: Pink edge, suffused white, semi-double. Leaves dotted pale yellowish white. Slender, spreading, slow growth. Originated in Japan.

Matsu-o. (Place Name), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.387 as 'Matsuo': Medium sized, dark red, open peony type with a mixture of petaloids and stamens. Originated in Japan. (Believed extinct.)

Matsura-no-hoshi. *(C.japonica), Collected Papers,* ICS Congress, Cornwall, 2008; Tama-no-ura Camellias, Hiruki, Chuji, p.VIII 2. Bright red with a white edge. Flat open single with widely sprayed stamens. Flowers early. Leaves elliptical, medium size. Erect, upright growth. A cross of a Higo camellia x **Tama-no-ura**, originated by K. Murata, Japan.

Matsuribina. (Festival Dolls), *(C.x vernalis),* Yokoyama & Kirino, 1898, Nihon no Chinka, p.77: Pale pink with white base, cup-shaped, medium size, fragrant. A seedling of *C.x vernalis* **Umegaka.** Dwarf plant habit, suitable for pot culture. Originated in the Toyama Prefecture, Japan.

Matsuribina. (Festival Dolls). *(C.vernalis). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.246 with colour photo; English translation p.172. Medium size, pink graduation on pale pink to white ground, bowl-shaped single, rusticana-like stamens, fragrant. Flowers mid-season to late. Leaves elliptic, medium size, thin. Dwarf growth. A natural seedling of **Umegaka.** Named and released by Mitsuroku Makino in 1980s. From Toyama Prefecture.

Matsusaka. (Place Name), *(C.japonica), Chinka Zufu* (before 1700), Watanabe, 1969, pl.49: Red, double of pine cone form, medium size, about the same height as diameter. Mid-season flowering. Originated in Japan. (Believed extinct.) Different reading: 'Matsuzaka'.

Matsushima. (Pine Island), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô;* Itô, Jukyû, 1739, *Honzô Hanamki'e;* Shirai-Bunko, 1812, *Tsubaki Nayosechô;* Yashiro, 1841, *Kokon Yôrankô,* Single, small red flower, with white spots in all directions, like a cluster of clouds. Originated in Japan. (Believed extinct.) A place name. One of the three famous scenic points of Japan.

Matsushima. (Pine Island), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.544: The illustration in the *Chinka Zufu* shows a white single with red, cloud-like markings. Originated in Japan. (Believed extinct.) A place name. One of the three famous scenic points of Japan.

Matsushima. (Pine Island), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White single, with red spots, large size, occasionally deformed; stamens widely spread like a bamboo whisk. Note: This is similar to the existing **Matsushima** but it is not certain that they are the same, as the modern one is said to be recently produced in Itabashi-ku, Tokyo. A place name. One of the three famous scenic points of Japan.

Matsushima. (Pine Island), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.143 and Yokoyama, 1975, *Gendai Tsubaki Meikan,* p.215: Single, evenly opening blooms, cylindrical stamen cluster. White ground with red streaking. Originated in Itabashi-ku, Tokyo, Japan. Resembles **Tenninmatsushima.** A place name. One of the three famous scenic points of Japan.

Matsuyama. (Place name), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.164: Peony form, dark red with white spots and 4-5 fascicles of golden stamens. Medium size. Originated in Japan. (Believed extinct.)

Matt Lee. *(C.japonica),* Lee, 1947, *American Camellia Yearbook,* p.152: semi-double, soft pink, sometime will show a few stamens, but, more frequently, has a bundle of petaloids in the centre. Originated in the USA by Dr W.G. Lee, Macon, Georgia.

Mattea Maffinae. Peer, 1956, *American Camellia Yearbook.* p.56. Orthographic error for **Matteo Molfino.**

Mattie Cole. *(C.japonica).* ANZCRS., 1955. *Camellia Annual.* No.2, p.6, Reg. No.6: Originated in Australia by C.F. Cole, Canterbury, Victoria. A seedling of **Elegans** x **Spencer's Pink**. Flower is a large single, opening flat. 11-12.5 cm across. Colour rose carmine. Blooms mid-season. Chinese synonym 'Kuer'.

Mattie Grayson. *(C.japonica).* Trues Camellias. 1961. ACS., *The Camellia Journal*, vol.16, No.3. p.41. No description. SCCS, 1962, *Camellia Nomenclature.* p.71: Red. Large rose form double to peony form with 4-5 upright petals around the centre. Medium, upright growth. Mid-season blooming. Originated in USA by C. Rester. Poplarville, Mississippi.

Mattie Love Wine. *(C.japonica).* SCCS.. 1984. *Camellia Nomenclature.* p.74: Light pink. Large semi- double with irregular petals. Vigorous, spreading, upright growth. Mid-season flowering. Originated in USA by Dr M.B. Wine, Thomasville. Georgia.

Mattie O'Reilly. *(C.japonica), American Camellia Yearbook*, 1948, p.169: McCaskill Seedling No.100. The flower is coral rose-pink, large, measuring more than 12 cm across. A full complete double, irregular in form. The centre of the flower is filled with innumerable petaloids, interspered with high. folded petals. The plant has a slow, upright, bushy growth habit. Leaves are midgreen, 12cm x 6 cm, elliptic, acute and sharply serrate. Parentage unknown. First

flowered 1942. Flowers early to mid-season. Originated in USA by McCaskill Gardens, Pasadena, California. For black and white photo see p.234, Hertrich, 1955, *Camellias in the Huntington Gardens.* vol.II. Reg. No.93, *American Camellia Yearbook.* 1954. Sports: **Mattie O'Reilly Variegated, Mattie O'Reilly Sport .**

Mattie O'Reilly Sport. *(C.japonica),* Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II, p.235, plate, p.232, description: Flower, mostly semi-double; Neyron rose 623/1, 12 cm across x 5 cm deep with 10 guard petals, undulate, sometimes reverse to rabbit ears 6 cm. long x 5 cm wide, apical notching, conspicuous marginal venation, firm texture. Centre of flower, exceptionally numerous stamens in a sunburst, intermingled with petaloids in fascicles, long, slender, white filaments, small golden anthers. Leaves elliptic to oblong, variable, 10 cm x 5 cm, medium, glossy green, flexible, broad shallow to medium fine serrations, long pointed apices. Habit, densely spreading; mid-season flowering. Extremely variable in form from single to heavily, incomplete double. Originated in USA at the Huntington Gardens, San Marino, California, USA.

Mattie O'Reilly Variegated. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.10 as 'Mattie O'Reilly Var.': A virus variegated form of **Mattie O'Reilly** - Coral rose-pink blotched white. Originated in USA.

First observed 1972. Flower size 11 cm across. Plant growth is dense and medium with dark green leaves, 10 cm x 5 cm. Chinese synonym: 'Mayi'.

Maureen Elizabeth. *(C.japonica),* C.Aust., *Camellia News,* Autumn 2007, No.173, p.6, colour photo p.19, Reg. No. 572. Originated by Mr. M.H. Schultz, Edwardstown, South Australia. A chance seedling that first flowered in 2001. A formal double, imbricated, white flower, 13 cm across x 6 cm deep. Flowers mid-season on an upright medium growing plant. Leaves dark green, flat, glossy, elliptic, 9 cm x 3.5 cm. Flower falls whole. Petals are of heavy texture, and do not reflex.

Maureen Ostler. *New Zealand Camellia Bulletin*, 1974, Reg. No.92. Name withdrawn as the cultivar was already registered as **Just Sue.**

Maureen Schloss. *(C.reticulata* hybrid*)* ACS, *The Camellia Journal*, Dec. 2010, p.29 with colour photo; Regn No.2803. Originated by E. Hulyn Smith, Valdosta, Ga., USA. ACS, *Yearbook* 2010, p.78 with colour photo; A 15 year old cross of **Hulyn Smith** x **Jean Pursel**, first flowered 2000. Upright, vigorous growth. Dark green leaves are 11.5 cm x 7.5 cm. Large blooms are 12.7 cm diameter x 7.5 cm height, dark pink, semi-double to peony form. Yellow anthers and white filaments. Flowers midseason to late.

Maurice Hurst. Thomasville Nursery Catalogue. Synonym for **Enrico Bettoni (US).**

Maury Pink. *(C.japonica)*, Greenbrier Farms Catalogue, [before 1945]. Pale pink. Medium sized semi-double. Originated in USA by Greenbrier Farms Inc. Norfolk, Virginia.

Mauve. Parramore, 1957, ANZCRS., *Camellia Annual*, No,4, p.27. Synonym for **Benizuru.**

Mauve Paeony. Camellia Grove Catalogue, 1947, p.7. Synonym for **Mrs Beresford.**

Mauve Star. *(C.sasanqua), American Camellia Yearbook*, 1948, p.171, Colour mauve, 5 petals, long and narrow, slightly crinkled at tips. Measures 6 cm across; stamen cluster 2 cm in diameter. Leaves medium green, 3.8 cm x 2 cm, slightly obtuse at tips. Growth habit, pendant. Originated in USA at Fruitland Nursery, Augusta, Georgia.

Maverick. *(C.japonica), American Camellia Yearbook*, 1961, p.227, Reg. No.579: A 5 year old seedling of Tomorrow that first bloomed 1961. Originated by Dr Gilbert Fisher, Union Springs, Alabama, USA. Plant growth is open, spreading and rapid in rate with dark green leaves, 13.5 cm x 5 cm. The peony form flower, 16-17 cm across x 8 cm deep, is strawberry pink, variegated; with yellow stamens. The blooms are like 'Tomorrow' in shape and size but with a picotee edge of white. Blooms mid-season. Note: SCCS., *Camellia Nomenclature* 1964 and on lists this name as a synonym for **Tomorrow Variegated.**

Mavis Edna. *(C.japonica)*, ACRS, *Camellia News*, 1993, No.127, p.8, Reg. No.417: Originated by Don O'Reilly Ainslie, ACT, Australia. A chance seedling that first flowered 1977. Formal double, white, 40 petals, 9 cm across x 3 cm deep, petals rounded to cuspidate. Sometimes imbricated, usually star-shaped and tiered. Slow, compact, bushy growth; leaves glossy mid-green, flat, ovate-elliptic, apices apiculate, margins serrate, 10 cm long x 7 cm wide. Free flowering, mid-season to late.

Mavis Gwaltney. *(C.japonica)*, SCCS., 1970, *Camellia Nomenclature*, p.97: Deep pink. Very large, semidouble with loose, wide petals, sometimes with petaloids. Medium, upright growth. Blooms early to mid-season. Originated in USA by Mrs A.T. Williams, Dotham, Alabama.

Mavis Merson. *(C.japonica), New Zealand Camellia Bulletin*, 1967, vol.V, No.2, p.9, Reg. No.30: A chance *C.japonica* seedling, raised by Mrs T.B. Merson, Whakatane, New Zealand that first flowered 1963. It has a medium, spreading habit, with mid-green leaves with rolled margins, 10 cm x 5 cm. The flowers are semi-double with 12-14 petals and a varying number of petaloids, some trumpet shaped. Size is 14-15 cm across and up to 5 cm deep. The colour is Cardinal red (RHSECC.822/2) and there is a large burst of stamens with pink filaments and golden anthers. See colour photo, front cover, *New Zealand Camellia Bulletin*, 1969, vol.VI, No.2.

Mavourneen. *(C.japonica), New Zealand Camellia Bulletin*, 1972, vol.VII, No.4, p.6, Reg. No.59: A chance seedling of **Mrs Bertha Harms** which first flowered 1968 and originated by Dr D.G. O'Toole, Ohope, New Zealand. The foliage is dark green with leaves, 8 cm long x 4 cm wide. The flower is a rose form double with about 60 petals and measures 10 cm across x 4 cm deep. The colour is very pale pink, merging to cream and changing to lime green at the centre.

Max Cotton. *(C.japonica)*, Outteridge, 1962, *1000 Named Camellias in Australia*, p.12: A medium sized, deep red, formal double, 10-11 cm across. Grown in Australia by Gordon Waterhouse, Kurrajong, N.S.W. See: ACRS, *Camellia News*, No.21, Mar.1966, p.9. Origin uncertain.

Max Goodley. *(C.japonica), American Camellia Yearbook*, 1950, p.328: Award of Merit as a seedling, originated by J.P. Illges, Columbus, Georgia, USA from seed of **Enrico Bettoni (US).** First flowered 1949. *American Camellia Yearbook*, 1954, p.324, Reg. No.74: Large pink, incomplete double, anemone form to irregular peony form, 11-12.5 cm across x 7.5 cm deep with 10-12 petals and large petaloids. Leaves dark green, broad-oval, 10 cm x 6 cm, heavily textured, apex blunt acute, base tapered, raised venation, wide, shallow serrations. Rapid. open, bushy, upright growth. See black and white photo: p.151, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III. Sport: **Max Goodley Variegated.**

Max Goodley Variegated. *(C.japonica)*, Griffin ed., 1957, *Camellian*, vol.9, p.27. A virus variegated form of **Max Goodley** - Pink and white. Originated in USA.

Max Holliman. *(C.japonica), American Camellia Yearbook,* 1994, p.62, Reg. No.2294, colour photo pp.64-65: A medium to large size, deep red with a blue tint, peony form *C.japonica* chance seedling. Blooms mid-season to late. Originated by John Holliman, Thomaston, Georgia, USA. The 34 year old seedling first bloomed in 1961. Average flower size is 10 cm across x 6 cm deep with hundreds of petals. Flower has 2 to 3 rows of ruffled petals, then a thick cluster of shorter petals and then more ruffled petals or rabbit ears. Plant growth is upright, dense and vigorous in rate with dark green leaves 10 cm long x 5 cm wide.

Max Siershee. *(C.japonica),* Gerbing's Azalea Gardens Catalogue, 1958. No description. Originated in USA.

Max Swisher. *(C.japonica),* Sewell, 1956, *American Camellia Yearbook*, p.50: A seedling originated by Gerbings Nurseries, Fernandina Beach, Florida, USA. The flowers are semi-double, large, brilliant red with golden stamens. Similar to **H.A. Downing.**

Maxieer. (Marshall). Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for USA *C.japonica* **Elsie Ruth Marshall.**

Maxima. *(C.japonica),* Anon. 1830, "Ueber die Cultur der Kamellien" in *Der Blumen Gaertner,* p.52. Courtois, 1833, *Magazin d'Horticulteur*, 1[pt.D]: 313. Originated by André Leroy. Red flowers. Regular double. Synonym: 'Maxima Rubra'.

Maxima Plenissima Carmosina. (*C.japonica*), Baumann, Mulhouse Nursery Catalogue, 1841-1842, p. 14. No description. Originated in Italy. (Believed extinct.)

Maxima Rubra. Shneiderff, Enrico, ed. 1848, *Catalogo piante che si Trovano nel Giardino del Sig. Enrico Shneiderff*, p.9. Synonym for **Maxima.**

Maxine. *(C.japonica),* SCCS., 1981, *Camellia Nomenclature*, p.109: Faint pink striped darker pink. Medium, formal double. Pedulous growth. Mid-season to late flowering. Originated in USA by Haynie.

Maxiscent. (*C.japonica* hybrid). *New Zealand Camellia Bulletin*, March 2005, Issue No.150, vol.XXIV, No.2, p.35, Reg. No.465. Registered by J.R. Finlay, Whangarei, New Zealand. a 10 year old cross of an unnamed C.hybrid seedling (**Mrs Bertha A. Harms** x **Salab**) x *C.japonica* **Kramer's Supreme,** which first flowered in 1999. Flower is a semi-double to loose peony form with 14 petals, 4-12 petaloids and over 100 gold anthers on yellow filaments. The flower is light pink (RHS.CC.55D) in colour and has a strong fragrance. The plant is upright, and of average density and growth rate, with light green leaves 9 cm long x 2.5 cm wide. Flowers early to mid-season.

May A'Vard. *(C.japonica),* ACRS., 1967, *Camellia News*, No.22, p.5, Reg. No.84: Originated by Mrs May A'Vard, Emerald, Victoria, Australia. A seedling from the cross **Spencer's Pink** x **Gauntlettii** that first flowered 1962. Blooms mid-season to late. Blooms light pink, 11-12.5 cm across, with 12 petals shaped similar to **Gauntlettii**. An open, upright growth habit with light to mid-green leaves, 10 cm x 6 cm.

May Ingram. *(C.japonica),* Nuccio's Nurseries Catalogue, 1959: Orchid pink. Medium formal double. Vigorous, upright growth. Early blooming. Originated at Nuccio's Nurseries, Altadena, California, USA. See colour photo, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangements*, p.108 and on front cover SCCS, 1959, *The Camellia Review*, vol.20, No.5. Orthographic error 'Mary Ingram'.

May MacDonald. Hillsman, 1966, *American Camellia Yearbook*, p.121. Synonym for **Ama-obune.**

May Swanson. *(C.japonica),* SCCS., Bulletin, vol.11, No.2, Dec. 1949. No description. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.49: Red. Small, anemone form. Medium, upright growth. Mid-season to late flowering. Originated in USA by E.E. Swanson, Pasadena, California. See black and white photo, p.237, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

May Watson. Magnolia Gardens and Nursery Catalogue, 1944-1945. Synonym for **Triphosa.**

May Westbrook. *(C.reticulata),* ACRS., 1976, *Camellia News*, No.62, p.21, Reg. No.178: Originated by Edgar R. Sebire, Wandin North, Victoria, Australia. A seedling of 'Crimson Robe' [**Dataohong**] that first bloomed 1973. The upright, open, vigorous plant produces 16.5 diameter, deep red flowers in mid-season. The deep green, 12.7 cm x 6.3 cm, ovate leaves are blunt pointed with fine serrations. Sport: **May Westbook Variegated.**

May Westbrook Variegated. *(C.reticulata),* Cannon, 1985, ACS., *The Camellia Journal*, vol.40, p.4, p.13. A virus variegated form of **May Westbrook** - Deep red, blotched white. Originated in USA.

Maya Gogô. (Maya No.5), *(C.japonica),* Andoh, 1971, *Tsubaki*, *Meika no Shôkai to Saibai*, pl.207, p.65, description, p.213: Medium sized, white, semi-double with a pink splash, sometimes one pink petal; petals 11-12, rounded, reflexed, some crinkled and a compact, tubular, centre of stamens, yellow anthers, white filaments. Leaves lanceolate, mid-green, finely, sharply serrate. Originated in Hyôgo Prefecture, Japan.

Maya-fujin. (Married Lady of Maya), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Camellia Cultivar List*, p.15: Medium to large size, pink shading to white at petal base, lotus form semi-double. Blooms early to mid-season. Maya is a place name in Kobe, Hyôgo Prefecture, Japan, where this camellia was produced. Raised by Takuzô Hashimoto, Mt. Maya, from USA seed, parentage unknown. Named by Kiyoshi Tarumoto in 1980.

Maybell Paulen. Mark S. Cannon Scion Catalogue, 1962, p.7. Orthographic error for **Maybell Paulin.**

Maybell Paulin. *(C.japonica),* Griffin, ed., 1958, *Camellian:* Blush pink, medium sized, rose form double. Originated in Portugal. Orthographic error: 'Maybell Paulen'.

Maybell Ragland. Mark S. Cannon Scion Catalogue, 1963-1964, p.10. Orthographic error for **Maybelle Ragland.**

Maybelle Ragland. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature*, p.71: Soft pink with silver overtones. Large semi-double to peony form with wavy, rounded, notched outer petals and folded, upright, centre petals and petaloids interspersed with 5 fascicles of white stamens. Medium, open, upright growth. Originated in USA by Reg Ragland, California. Orthographic errors: 'Maybell Ragland', 'Mabel Ragland'.

Maye Diechi. Yü, 1950, *Camellia reticulata and Its Garden Varieties. Camellia and Magnolia Conference Report*, RHS., as 'Mayehtiechih'. Synonym: 'Reticulate Leaf Butterfly'. Different reading: 'Ma-yeh Tieh-ch'ih'. Synonym for **Maye Taohong.**

Mayehtiechih. Yü, 1950, RHS., *Camellia and Magnolia Conference Report*, p.130. Different reading for 'Maye Diechi', synonym for **Maye Taohong.**

Maye Taohong. (Reticulate Leaf Crimson), *(C.reticulata),* Bartholomew & Tse, 1980, ACS., *The Camellia Journal*, vol.35, No. 2, p.20. No description. Feng et al., 1986, *Yunnan Camellias of China,* p.46 as 'Mayetaohong' with colour photo: Leaves oblong-ovate, reclinate, apices long acuminate, bases cuneate or broad-cuneate, dark green, veins sunken above, 7.4-8.7 cm long x 2.8-4.2 cm wide. Flowers light pink (RHS.CC.66C), diameter 7-10 cm. Petals about 30 in 5-6 whorls, valvately arranged, obovate and flat in the outer whorls, spatulate and undulate in the inner whorls, easily deciduous. Stamens mostly petaloid, only a few remaining. Pistils

rudimentary, flattened or petaloid. This cultivar is similar to **Houye Diechi** in all respects except the flower form. The petals of **Houye Diechi** are folded and erect while those of **Maye Taohong** are flat. This cultivar has a nice shape with the branches open and laterally expanding. Flowers midseason to late. The cultivar originated in Kunming, Yunnan, China. There is an old tree at the Panlong Temple estimated to be over 600 years old. Different readings: 'Ma-yeh T'ao-hung', 'Mayehtaohung'. Synonyms: 'Reticulate Leaf Crimson', 'Maye Diechi'. Western synonym: 'Professor Tsai'. For colour illustrations see Feng et al, 1981, *The Camellias of Yunnan*, p.55, Japanese edition and p.21, Chinese edition.

Mayehyinhung. Yü, 1950, RHS., *Camellias and Magnolias Conference Report.* Different reading for **Maye Yinhong.**

Maye Yinhong. (Reticulate Leaf Spinel Pink), *(C.reticulata),* Yü, 1950, RHS., *Camellias and Magnolias Conference Report* as 'Mayehyinhung'. Feng et al., 1981, *Yunnan Camellias of China*, p.50, colour pl.: Leaves long ovate-lanceolate, apices acute and recurved, bases cuneate, veins conspicuously sunken forming a rough surface, 7-11 cm long x 2.4-4.5 cm wide. Flowers pink (RHS.CC.58C, diameter 9-12 cm. Petals about 29 in 4-5 whorls, valvately arranged, red striped, easily deciduous. Stamens numerous, divided into several groups. Pistils petaloid, flattened. This cultivar originated in Kunming, Yunnan, China. It has short trunk and many branches. Flowers mid-season to late. There is an old tree in the Panlong Temple in Jinning County said to be 600 years old. Different readings: 'Ma-yeh Yin-hung, 'Mayehyinhung'. Synonyms: 'Reticulate Leaf Spinel Pink', 'Shot Silk Reticulate'. Western synonym: 'Reticulate Leaf Pink'. For colour illustrations see Feng et al., 1981. *The Camellias of Yunnan*, pp.50, 51, Japanese edition, p.20, Chinese edition.

Mayer Israel. *(C.japonica), American Camellia Yearbook,* 1977, p.216, Reg. No.1458: A large, blush to light pink with pink flecks, rose form double to formal double. Blooms mid-season. This 14 year old chance seedling *C.japonica*, first bloomed 1968. Originated by Ferol Zerkowsky, Slidell, Louisiana, USA. The 'Mathotiana' (**Julia Drayton**) type bloom has 80 petals, yellow anthers and white filaments, 11 cm across x 5 cm. deep. The bloom is high-lighted with darker pink flecks and the petals often incurved and form 5 swirls. Plant growth is upright and medium with dark green leaves, 8 cm x 4 cm. See colour photo, back cover, ACS, 1977, *The Camellia Journal*, vol.32, No.3.

Mayflower. *(C.japonica), American Camellia Yearbook*, 1960, p.203, Reg. No.438: A 10 year old chance seedling, originated by Henry Novick, Los Angeles, California, USA, that first bloomed 1953. Plant growth is vigorous, dense and rapid in rate with medium green leaves, 10 cm x 4 cm. The rose form double flowers have 38-45 petals and 3-5 petaloids, shading from the deep rose clour of the outer petals to pure white petals or rabbit ears. Blooms mid-season.

Mayhills. *(C.reticulata), New Zealand Camellia Bulletin*, 1970, vol.VI, No.5, p.32, Reg. No.45: A seedling of the *C.reticulata* 'Shot Silk' (**Dayinhong**) raised at Tirau, New Zealand by Dr Jane Crisp, from a controlled cross with the pollen of 'Crimson Robe', (**Dataohong**). First flowered 1967. The plant has an erect, vigorous habit of growth with dark green, keeled and reticulate leaves, 12 cm, x 6 cm. The flower colour is bright red, (RHS.CC.47B) large, semi-double, 13-15 cm across x 6 cm deep with about 16, veined, fluted petals with notched margins. The flower has a distinctive, high centre and golden stamens. Flowers early to mid-season. See colour photo, front cover, 1982, *New Zealand Camellia Bulletin*, vol.XII, No.7.

Mayi. Gao, Jiyin, Ltr, 25-6-1990. Chinese synonym for **Maui.**

Maylene Wong. (*C.japonica*), *American Camellia Yearbook*, 1954, p.338, Reg. No.219: A 7 year old chance seedling. Originated by Homer C. Wilson, Fresno, California, USA. First flowered 1952. Plant growth upright, medium and compact with glossy, dark green leaves, ovate, serrate, thick and leathery with distinct veins. The large, pointed, red flower buds open

slowly. The glowing crimson flowers, 11 cm across x 5 cm deep, are complete double in form. The petals, 21-27, stand out separately. The inner row resembles a crown enclosing a centre of feathery petaloids and stamens. Flowers mid-season. Sport: **Maylene Wong Variegated.**

Maylene Wong Variegated. *(C.japonica),* SCCS., 1960. *Camellia Nomenclature*, p.80 as 'Maylene Wong Var'. A virus variegated form of **Maylene Wong** - Crimson blotched with white. Originated in USA.

Maynard de Lavalette. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.59. No description. van Houtte Catalogue, 1849-1850, 38:46. No description. Originated at Tourres, France. (Believed extinct.) Orthographic variant: 'Maynard de la Lavalette'.

Maynard de la Lavalette. Verschaffelt Catalogue, 1849-1850, p.48. Orthographic variant for **Maynard de Lavalette.**

Mayor Talia. (*C.reticulata* hybrid). *American Camellia Yearbook*, 1992, p.36, Reg. No.2257, colour photo pp.40-41: A medium size, light lavender pink, semi-double *C.reticulata* chance seedling that blooms early to mid-season. Originated by Albert E. Buchholz, Cupertino, California, USA. The 16 year old seedling first flowered 1981. Average flower size is 8.5 cm across x 8.5-10 cm deep with 14 petals, 136 petaloids, yellow anthers and filaments. Plant growth is upright, open and medium in rate with light green leaves 8 cm long x 2 cm wide.

Mayor Webb-Hart. *(C.x williamsii), American Camellia Yearbook*, 1981, pp.102, 103 Reg No.1715: A large to very large, fuchsia pink, semi-double *C.hybrid* chance seedling of *C.x williamsii* **Donation,** mid-season flowering. Originated by Ferol Zerkowsky, Slidell, Louisiana, USA. The 14 year old seedling first bloomed 1969. Average flower size is 13 cm. across x 3.8 cm deep with 21-24 petals, yellow anthers, pink filaments. Plant growth is upright, spreading and rapid in rate with dark green leaves, 8 cm x 5 cm. See colour photo, front cover, ACS., 1981, *The Camellia Journal*, vol.36, No.4.

Maytime. (*C.japonica*), Tammia Nursery Catalogue, 1960, p.5. No description. SCCS., 1960, *Camellia Nomenclature*, p.80: Pale pink, edged white. Medium, upright growth. Late blooming. Originated in USA by F. Wittsche, Sacramento, California.

Mayudama. (Cocoon) *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.246 with colour photo; English translation p.173. Small, pale pink, cup-shaped single, cylindrical stamen column. Flowers mid-season. Leaves ovate, medium size, flat. Spreading growth. Selected from wild japonicas growing in Hirado City. Discovered and named by Kenji Maeda in 1980. From Nagasaki Prefecture.

Mayuzumi. (Blackening for Eyebrows), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.527: Medium sized, white single, 7-9 petals with a pink flush at the base; some blackish spots. Originated in Japan. (Believed extinct.)

Mazachelli. *The Florist, Fruitist & Garden Misc.*, 1859. Orthographic error for **Mazzuchelli.**

Mazagram. *(C.japonica),* Verschaffelt, 1857, *Nouvelle Iconographie*, Book X, pl.III: Received quite recently from Italy. Large blossoms, composed of numerous, full, rounded petals, outspread and convex, fauntlessly imbricated from the circumference to the middle, while from there to the centre they are hooded and cupped or in the form of a rose. The colour is a uniform, vivid carmine red, tinged pink and white in the centre. Orthographic errors: 'Mazagran', 'Mazagrami'.

Mazagrami. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.155. Orthographic error for **Mazagram.**

Mazagran. Morren and de Vos, 1887, *Horticulteur Italia.* Orthographic error for **Mazagram.**

Megohime. (Beloved Princess). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.261 with colour photo; English translation p.184. Miniature, pink, bowl shaped single, split stamens, long flower stalks, profuse. Flowers early to late. Leaves broadly elliptic, medium size. Cespitose growth. A cross between 'Hakubaihin', a Taiwanese camellia, and *C.sinensis* 'Yabukita'. Named and released by Kaoru Hagiya in 1980. From Niigata Prefecture.

Meg's Variegated. Fruitland Nursery Catalogue, 1948-1949, p.31. Orthographic error for 'Meig's Variegated', synonym for **Fra Arnaldo da Brescia.**

Megumi. (Personal Name). *(C.sasanqua). "Sasanquas, The Winter Flowers"* ICS Congress, Kurume 2010, English translation, p.62; Pale pink base, edged deeper pink, double, large, very early. From Kurume, Fukuoka. A new cultivar

Meguriai. (Encounter), Itô Jukyû, 1739, *Honzô Hanamaki'e* vol.15. Different reading for **Tamasaka.**

Meguriai. (Encounter), *(C.rusticana)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.328, colour photo and description: Large size, deep red with white blotching, semi-double with 3-4 rows of irregular petals and a centre cluster of stamens with golden anthers. Blooms late to very late. Leaves deep green, broad-elliptic, curved, margins serrate. Originated in Toyama Prefecture, Japan.

Mei Kuei. Liu, 1959, *Chungkuo Chuming Tichi Chung Huahui*. Different reading for **Meigui.**

Meibô. (see below), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.103, p.52, description, p.117 as 'Mei-bô': Leaves dark green, broadly elliptic, very shortly acuminate, venation impressed, 7.4-8.5 cm long x 4.1-4.3 cm wide; petioles 10-11 mm long, glabrous. Flower, formal double, pale pink becoming deeper at the centre, petals 49-72, diminishing to the centre, largest petal 3.4 cm x 2.6 cm, phlox pink 625/2-3, shallowly emarginate, late flowering. Originated in the Niigata Prefecture, Japan. Meibô literally means "Clear Eyes" but alludes to a "Beautiful Lady".

Meibuer. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **Mabel Bryan.**

Meifan. (Beautiful Fragrance), *(C.sasanqua x C.reticulata)*, Hagiya, 1986, *Studies on Intraspecific Hybridization of Camellias.* No.2, p.9, colour photo 13, p.8: A seedling of *C.sasanqua* 'Gensetsu' x *C.reticulata* **Damanao,** originated by Dr Kaoru Hagiya, Niigata University, Japan. Flower, deep peach pink; 12 petalled, semi-double, 12-13 cm across, large; petals ovate, rounded, cleft at apex, wavy; stamens about 90, joined at the base to form a tube, filaments light yellow, anthers dark yellow, luxuriant hairs on ovary. Early flowering, slight perfume. Leaves medium ovate, venation obscure, margins finely serrate. Plant habit spreading and branches short.

Meigehong. (A Beauty, in Yi Language) *(C.reticulata) Records of Camellia Ancient Trees in Chuxiong*, p.61 with colour photos. The maternal tree is located in the Camellia Garden, Zixi Mountain, Chuxiong, China. Named by Chen Zidong. Flowers lotus form, crimson, 13 cm diameter, 28 notched petals. Slightly sprayed stamen centre with some petaloids. Leaves oblong-elliptic, 7-9 cm x 3.5-4 cm. Apices acuminate, margins finely serrated, bases cuneate. Flowers early to midseason.

Meigetsu. (Bright Moon), *(C.sasanqua)*, Minagawa, Iza'emon, 1885, *Nisshôen Chabaifu;* Wada, 1941, *Garden Treasures of Japan*, p.31: White, red flushed on edges. Large semi-double. Early flowering. Originated in Japan. Preserved at Minagawa Chinka'en Nursery in Angyo.

Meigetsu. (Distinguished Moon), *(C.japonica)*, Mizuno, Motokatsu, 1681, *Kadan Kômoku:* White spotted pink. Double. The first character is different from that of the sasanqua so that it refers to the "Moon of the 15th day of the 8th lunar month and the 13th day of the 9th lunar month". Originated in Japan. (Believed extinct.)

Meigetsu. (Bright Moon), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Single, widely opening, pale colour with white spots. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.76. Originated in Japan. (Believed extinct.)

Meigetsu. (Bright Moon), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.69 & 155: Single, flat, medium sized, red with cylindrical stamen cluster. Originated in Japan. (Believed extinct.)

Meigetsu. (Bright Moon), *(C.japonica)*, Katayama, 1957, *Tsubaki Ochabana:* Medium, cup-shaped single. White. Satô, 1975, *Chûbu no Tsubaki*, p.7: A white, single, opening cup-shaped, 6-7 petals, about 6 cm across; stamens in a compact column with dark golden anthers and white filaments. Fragrant. Leaves broad-ovate, dark, olive green, apex blunt acute, margins coarsely, shallowly serrate on upper part. Originated in the Kansai area, Japan. See colour photo, Seibundô Shinkôsha, 1979, *Senchinshû*, p.149.

Meigetsu-shôeki-shiratama. (White Gem Inherited at Meigetsu), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.526: Small to medium size, white semi-double with golden stamen column. Originated in Japan. (Believed extinct.)

Meig's Semi-double. Florida Nursery Land Co. Catalogue, 1949. Synonym for **Fra Arnaldo da Brescia.**

Meig's Variegated. Thomasville Nursery Catalogue, 1935, p.7. Synonym for **Fra Arnaldo da Brescia.**

Meigui. (Dark Sunflower), *(C.japonica)*, Liu, 1959, *Chungkuo Chuming Tichi Chung Huahui:* Formal double. Dark purple with a blackish tint. Originated in China. Different reading 'Mei Kuei'.

Meigui. (Rugosa Rose), Gao & Zhuang, 1989, *The Camellia in China*, p.79, No.608. Chinese synonym for the *C.sasanqua* **Rosea.**

Meigui Cha. Yang, 1965, *Camellia Varieties of Taiwan.* (Rose Camellia), Synonym for **Rosea Superba.** Different reading *Mei Kuei Cha.*

Meigui Chahua. Chen 1955, *Guanshan Shumuxue.* Rose Camellia var. 'Magnoliiflora'. Also called 'Yulan Chahua'. (Magnolia Camellia). Different reading 'Mei Kuei Cha Hua'.

Meigui Dianli. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for Nuccio's *C.japonica* **Rose Parade.** Synonym: 'Meiguihong'.

Meigui Xiongdi. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.416; Chinese synonym for the USA *C.japonica* **Brother Rose.**

Meiguihong. Gao & Zhuang, 1989, *The Camellia in China*, p.82, No.642. Subsequently changed to 'Meigui Dianli' as a more exact synonym for **Rose Parade.**

Meiguilian. (Rosy Lotus), *(C.japonica)*, Wang & Yü, 1981, *Shan Chahua.* No description. Gao & Zhuang, 1989, *The Camellia in China*, p.49, No.294, colour photo, No.169: Medium size, red, formal double with 4-5 rows of emarginate, imbricated petals with faint, white stripes. Early blooming. Originated in China.

Meiguishu. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.416; Chinese synonym for the New Zealand *C.x williamsii* **Rose Bouquet.**

Meiguizi. (Rosy Purple), *(C.japonica)*, Liu, 1959, *Chungkuo Chuming Tichi Chung Huahui:* A red-purple, flat, incomplete double, medium size bloom. The leaves have a reddish tint. Different reading 'Mei Kuei Tze'. Chang Shao Yun, 1987, *Camellias from Zhejiang*, p.51 as 'Renmian Taohua': Habit, small, shrub-like, compact, young twigs greenish purple. Leaves glossy deep green, 5.4-5.7 cm long x 2.6-3.8 cm wide, elliptic, a few lanceolate, base cuneate, serrations wide and few, midrib prominent, laterals obscure. Flowers glossy, rosy red, 7-8 cm across with 25-38 petals in 4 rows, broad-obovate, variable, slightly creped on edges, slightly concave on apex. Petaloids, 12-20, interspersed with 10-13 stamens. Pistils degenerate, styles filament-like. Buds short-elliptic, yellowish-brown. Originated in Hangzhou Province, China. See colour photo, [p.122], Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.51 as 'Renmian Taohua'.

Meiguo Dahong. (American Crimson), Gao, Jiyin & Zhuang, 1989, *The Camellia in China*, p.50, No.309, colour photo, No.179. Chinese synonym for the French *C.japonica* **Coquettii.**

Meiguo Huang. (American Yellow), Gao, Jiyin, Ltr. 25-5-1990. Chinese synonym for the Australian *C.japonica* **Brushfield's Yellow.**

Meiguo Yupu. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars*, p.88. Chinese synonym for **Tama Americana**.

Meihi. (Shining Queen), (*C.japonica*), Yokoyama & Kirino, 1989. *Nihon no Chinka*, p.307, colour photo and description: Large size, pale pink, flushing to white towards the centre, semi-double with

2-3 rows of ovate petals, outer row with slight point at apex and a slender stamen column with ivory filaments and yellow anthers. Blooms mid-season to late. Leaves dark green, ovate, apices acute. Originated in Kyôto Prefecture, Japan. A seedling of **Hagoromo** x **Furô'an.** Originated by Misoji Yamaguchi, named and released by Kiyoshi Tarumoto in 1984.

Meihong. (Prunus Red), *(C.japonica)*, Fang, 1930, *Diannan Chahua Xiaozhi:* The colour is like a new *Prunus mume.* Originated in China. Different reading 'Mei-hung'.

Meihong Damanao. Gao, Jiyin, Ltr, 25-5-1990. Chinese synonym for 'Chandlers Elegans Improved'.

Meihong Furong. (Rosy Hibiscus), *(C.japonica)*, Chang, Shao, Yun, 1987, *Camellias from Zhejiang*, p.68, colour photo, [p.123]: Medium sized pink with fine veining of deeper pink, 3-4 rows of large, rounded, slightly emarginate, outer petals, 15-21 in number, diameter, 7-8 cm. Centre a few stamens, over 200 in fascicles and small, erect petals. Leaves deep green, glossy, elliptic, uneven, 6.5-9 cm long x 3.4-4.4 cm wide, apex acute, base cuneate, young leaves purplish red, midribs elevated, slightly curved, side veins obscure, margins serrate. Originated in Sichuan Province, China.

Meihong Guiye. (Rosy Osmanthus Leaf), *(C.reticulata)*, Ikeda, 1974, vol.II, *American Camellia Yearbook*, pp.112,114 as 'Chingmeihungkueiyeh'. No description. Feng et al., 1986, *Yunnan Camellias of China*, p.51: Leaves broad-lanceolate to narrow-elliptic, flat or slightly reclinate, apices acuminate or recurved, bases cuneate to broad-cuneate, 6-8 cm long, 2-3.2 cm wide. Flower pink with light purple (RHS.CC.57C), diameter 10-11 cm. Petals about 30, imbricately arranged, outer whorls flat, inner slightly folded. Stamens numerous, divided into 4-5 fascicles. Pistils mostly rudimentary, very few well developed. This cultivar is densely branched with branches thin and erect. The leaves are comparatively small and similar to **Xiaoguiye,** and the colour is dark green. It originated in Dali. Flowers early. Synonym: 'Qingmeihong Guiye'. Different reading: 'Mei-hung Kuei-yeh'. Western Synonyms: 'Rosy Osmanthus Leaf', 'Crimson Osmanthus Leaf', 'Mume-Red Osmanthus Leaf', 'Meihong Osmanthus Leaf'. See colour photo facing p.117, *American Camellia Yearbook*, 1979.

Meihong Manao. (Rosy Agate), *(C.japonica)*, Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.65: Double hibiscus type, Leaves yellowish green, elliptic, 6.5-9.5 cm long x 3.7-4.9 cm wide, margins serrate, oblique, midrib bent, petiole 7-8 mm long. Flower rosy pink, slightly purplish when opening, 7-8 cm across; petals 13-18 in 2-3 rows, rounded, slightly creped, notched at the apex. Petaloids, more than 40, mostly clustered in the centre, and interspersed with about 200 normal stamens in 9-10 fascicles; pistils degenerate. Buds short, heart-shaped to short-elliptic, brownish or pale grey. Flowers mid-season to late. Originated in the Sechuan Province, China.

Meihong Osmanthus Leaf. Dryden, 1982, SCCS., *The Camellia Review*, vol.44, No.1, p.17. Synonym for **Meihong Guiye.**

Meihong Wuchi. (Rosy Five Wings), *(C.reticulata)*, Feng et al., 1986, *Yunnan Camellias of China*, p.90 as 'Meihongwuchi': Leaves oblong, apices acuminate, bases cuneate, reclinate, 6.5-8 cm long x 2.4-3.5 cm wide. Flowers pink, diameter 7.5 cm. Petals about 19, slightly reclinated, five pointed, radiate. Stamens absent or very few remaining. Pistils rudimentary. Flowers mid-season. This cultivar was selected from an open pollinated plant of *C.reticulata* f. *simplex* in Tengchong, Yunnan, China. Different reading: 'Mei-hung Wu-ch'ih'. Synonym: 'Plum Coloured Fivewing'.

Mei-hung. Watanabe & Andoh, 1980, *Hana to Kino Bunka -Tsubaki*, p.155. Different reading for **Meihong.**

Melody Shepherd. *(C.japonica), American Camellia Yearbook,* 1974, p.193, Reg. No.1251: A 13 year old chance seedling that first bloomed 1968; originated by W.T. Shepherd, North Charleston, South Carolina, USA. Plant habit is upright, dense and rapid in rate with dark green leaves, 11 cm long x 5.5 cm wide. The semi-double **Frizzle White** type, bloom is a bright red with white filaments and yellow anthers. It measures 13 cm across x 7 cm. deep and has 15-25 petals and 50 petaloids. The flowers vary on the one plant from semi-double to anemone to peony form with rabbit ears. Sport: **Melody Shepherd Variegated.**

Melody Shepherd Variegated. *(C.japonica), American Camellia Yearbook,* 1978, p.132: A virus variegated form of **Melody Shepherd** - Bright rose-red and white. Originated by W.T. Shepherd, North Charleston, South Carolina, USA.

Meloni. *(C.japonica),* Grilli, 1843-1844, Catalogo Generale. Burnier & Grilli Catalogue, 1846-1847. No description. van Houtte Catalogue, 1846-1847, 27:27: Wide flower, peony form, carmine splashed brighter red. Berlèse, 1849, *Annales de la Societe Central d'Horticulture de France,* vol.40, p.239: Peony form 10-11 cm across, vivid carmine cherry red tinted orange-red. Outer petals are in 2 or 3 rows, very broad, cupped, rounded at base, interior petals numerous, in

diverse forms, elongated, twisted and forming a ball-shaped centre. Originated by Mariani. Verschaffelt, 1852, *Nouvelle Iconographie*, Book VI, pl.II: The lovely cup-shape of its blossoms, the amplitude of its petals, their dainty pink colour, the many large stripes of more vivid shade, place it first amongst the striates. Franchetti, 1855, *Collezione di Camelie*, p.46: Very large flowers with numerous petals, deep glossy pink, sprinkled and streaked purple, many outer row of regular petals, the central petals gathered in a globular form. Originated in Italy by Negri. Orthographic error: 'Melloni'. Franchetti gives **Marchesa Isimbardi** as a synonym but Verschaffelt illustrates and describes them both and they would appear separate cultivars.

Melonia Newton. *(C.japonica),* Cannon, 1976, ACS., *The Camellia Journal*, vol.31, No.4. Originated in USA. No description. No valid listing located.

Melpomene. *(C.japonica),* Louis Leroy, 1863, Catalogue, p.124. William Bull Retail Catalogue, 1867, p.74. No description. Menina e Moza. EEscuela de Agricultura Catalogue, 1882. Orthographic variant (Spanish translation) for **Menina e Moca.**

Mennai-chidori. (Blind Plover). *(C.vernalis). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.261 with colour photo; English translation p.184. Miniature, purplish dark red, sake cup-shaped single, thick petals circular stamen cluster. Flowers early. Leaves narrowly elliptic, miniature,

reflexed. Upright, vigorous growth. An old variety from Toyota District, Aichi Prefecture, seemingly a *C.vernalis* type. Named and released by Hiroshige Hayakawa in 1991. Chinese synonym 'Muwu Qianniao'.

Menrui. (Resembling a Face), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Small size, double, pinkish white, cup-shaped. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.79. Originated in Japan. (Believed extinct.)

Men's Mini. (*C.japonica*), *American Camellia Yearbook*, 1972, p.133, Reg. No.1189: A 10 year old chance japonica seedling that first bloomed 1968; originated by A.H. Walters, Laurel, Mississippi, USA. Plant growth is upright and medium with dark green leaves, 10 cm x 5 cm. The anemone form bloom is deep red, with a silver sheen, 4-5 cm across x 3.5 cm. deep. It has yellow anthers, red filaments, 24 petals and 6 petaloids. Blooms mid-season to late.

Mentosa. (*C.japonica*), Trillon, Le Mans Nursery Catalogue, 1843, p.7. No description. Originated in Italy. (Believed extinct.)

Meotoboshi. (Pair orf Stars), (*C.japonica*), Yokoyama & Kirino. 1989, *Nihon no Chinka*, p.218, colour photo and description: Medium size, bright crimson, campanulate single, with 5-6 rounded, overlapping petals and a central, pinched stamen column with yellow anthers. Blooms mid-season to late. Leaves mid-green, elliptic to broad-elliptic, apices acuminate, margins serrate. Originated in the Chûbu area, Japan. Named and released by Minoru Satô in 1983. Different readings: 'Myôtoboshi', 'Meotohoshi'.

Meotohoshi. ICS., Apr.1990. *Japanese Camellia Cultivar List*, p.15. Different reading for **Meotoboshi.**

Meotozaki. (Double blooming), *(C.hiemalis)*, Saitama Engei, 1911: Double flowering, white, slightly touched and edged reddish. Medium semi-double with curled petals, producing 3 flowers at each blooming point. Synonyms: 'Wagôjin', 'Wagô-no-kami'. Different readings: 'Myôto-zaki', 'Myôtosaki'.

Mera. (Place Name), (*C.reticulata* x *C.japonica*), JCS., 1987, *Japanese Camellia*, No.25, p.4, colour photo: Originated by Ohara Kinji, Chûbu, Japan. A chance seedling. Pale red colour, medium size single. A special characteristic is the thread-like white edging to the petals. Blooms mid-season.

Meraviglia di Rossi. *(C.japonica)*, Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.13 erroneously as 'Meraviglia de Rossi'. Resembles **Collettii**, of which it is a seedling. Not only an improved form but overwhelmingly more colourful and more vivid of its type. Originated in Italy by G.D.R.

Merceau. (*C.japonica*), Mariotti Catalogue, 1924, p.16. Large, light rose. Originated in France.

Mercedes. (*C.japonica*), van Houtte Catalogue, 1848, 123:56: Immense flower, rose, well imbricated, petals well rounded. Originated by Villa, Italy.

Mercury. *(C.japonica), Gardening Yearbook and Garden Oracle* 47th ed. A fine deep salmon pink variety. Floricultural Certificate, Royal Botanic Society, March 10th, 1904. From Messrs Paul & Son. Paul, 1911, *The Garden.* A large, crimson, semi-double. Puddle & Hanger, 1960, RHS, *The Rhododendron and Camellia Yearbook*, No.14, pp.156, 157, Fig.44: Semi-double with 15-20 petals, orbicular, 5 cm. long x 4-5 cm wide, inner petals decreasing in size and narrower, rounded, notched at apex, outer petals slightly recurved, prominent venation. Stamens arranged in a loose, central ring and often intermixed with petaloids. Flower size about 10-11 cm. across, coloured crimson 22 with deeper venation. Leaves dark, glossy green, upper surface, elliptic, 10 cm long x 5 cm wide, margins serrulate, apices acuminate, tapering evenly to base. A fine variety with good foliage and large crimson flowers freely produced. Introduced by William Paul & Sons about 1900, and although the name **Mercury** has been applied to other varieties in old literature, those generally cultivated nowadays are derived

from plants distributed by William Paul. Sports: **Mercury Variegated, Mercury Supreme**. Synonym: 'Mercury Red'.

Mercury Red. Mark S. Cannon Scion Catalogue, 1962, p.7. Synonym for **Mercury.**

Mercury Supreme. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.7. No description. SCCS., 1962, *Camellia Nomenclature*, p.72: Sport of **Mercury** with a form similar to 'Donckelaeri'. (**Masayoshi**). Originated in USA.

Mercury Variegata. Marwood Hill Gardens Catalogue, 1986. Name is illegal being part latin. Orthographic error for **Mercury Variegated.**

Mercury Variegated. *(C.japonica),* McCaskill Gardens Newest Camellias, 1957 description. A virus variegated form of Mercury - Crimson blotched white. Originated in USA. Synonym: 'Mercury Variegated (Moired)'. American pseudonym: 'General Mendalgo'. Orthographic error: 'Mercury Variegata'. Abbreviations: 'Mercury Var', 'Mercury V.'.

Mercury Variegated (Moired). Tammia Nursery Catalogue, 1965-1966 as 'Mercury Var.'(Moired). Synonym for **Mercury Variegated.**

Mère Teresa. *(C.japonica),* Claude Thoby, 1993, *Camélias*, pp.12, 18, 22, 48, colour photo p.11: Large size semi-double flower with white, crinkled petals, sometimes petaloids and stamens mixed with petals. Flowers mid-season. Leaves strongly veined, clear green, broad-ovate, apices acute. Originated in France.

Meredith. *(C.japonica), American Camellia Yearbook*, 1980, p.170, Reg. No.1664: A large, pale pink to crimson on outer petals, semi-double *C.japonica* chance seedling of **Berenice Boddy,** originated by Mrs J.K. Rigg, Annopolis, Maryland, USA. The 12 year old seedling first flowered 1979. Average flower size, 11 cm across x 4.5 cm. deep. Plant growth is dense and medium with dark green leaves, 10 cm. long x 4.5 cm. wide.

Meredith Green. (*C.reticulata* hybrid). ACS, *The Camellia Journal*, June 2008, p.32 with colour photo, Regn No.2727; A cross of **Royalty** x **Jean Pursel** which first flowered in 1998. Originated and propagated by E. Hulyn Smith, Valdosta, Ga., USA. A 14.5 cm diameter x 7.5 cm deep, semi-double, pink flower with very waved and raised petals. Central stamens in a loose column with golden anthers on white filaments. Heavy petal texture and flowers mid-season. Plant is upright and spreading, with average growth rate. *American Camellia Yearbook*, 2008, p.122 with colour photo; Dark green leaves 11.5 cm x 7.5 cm.

Meredith Kay Shuman. *(C.japonica),* ACS., Feb.1989, *The Camellia Journal* vol.44, No.1, p.12, Reg. No.2104: Large size, pink with deep pink marking, semi-double to peony form *C.japonica* chance seedling. Blooms mid-season to late. Originated by Johnny Aldrich, Brooklet, Georgia, USA. *American Camellia Yearbook*, 1989, p.125: the 15 year old seedling first bloomed 1978. Average bloom size, 10 cm. across x 5 cm deep with 29 petals, yellow anthers and white filaments. Plant growth is upright and medium with mid-green leaves, 10 cm. x 4 cm.

Meredith Lake. *(C.japonica),* SCCS., 1942, *Classification of Camellias*, p.1: Single pink, 7.5 cm across. Late blooming. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.49. White with pale lilac overtones. Medium sized, semi-double. Vigorous, bushy growth. Mid-season flowering. Imported from Japan to Huntington Gardens, San Marino, California. Synonyms: 'Della Robbia', 'Mrs Meredith Lake', 'Light Lavender', 'The Duke', 'Della Robia'. Orthographic error: 'Meridith Lake'.

Meridith Lake. Coolidge Rare Plant Gardens Camellia Catalogue, 1949, Orthographic error for **Meredith Lake.**

Meriam Lewis. *(C.japonica) American Camellia Yearbook*, 1966, p.96, Reg. No.828: A 9 year old chance seedling that first bloomed in 1959. Originated by F.C. Lewis Nursery, Norfolk,

Virginia, USA. Plant growth is upright and medium with dark green leaves, 8.5 cm long x 5 cm wide. The semi-double, Frizzle White type, flower is 10-12 cm. across x 5 cm. deep with 14-20 petals. The colour is pink - a darker shade than **Monte Carlo**, with yellow stamens. Blooms early to midseason. Sport: **Meriam Lewis Variegated.**

Meriam Lewis Variegated. *(C.japonica), American Camellia Yearbook*, 1966, p.96, Reg. No.829: A virus variegated form of **Meriam Lewis** - Pink blotched with white. Originated by F.C. Lewis Nursery, Norfolk, Virginia, USA.

Meride. *(C.japonica),* Colla, 1843, *Camelliografia*, pp.34, 95, 96, illustration: A semi-double white, 7-8 cm. across, petals 9-12, regular, almost round, emarginate with a yellow cast. Originated in Italy by Negri, Milan.

Merillees. Mount Congreve Gardens *Computerised List of Camellias Grown in the Gardens*, 1995, p.4. Orthographic error for **Merrillees.**

Merle Gray. *(C.japonica), American Camellia Yearbook*, 1955, p.339, Reg. No.213: An 11 year old seedling from Japanese seed, originated by E.S. Kline, Osewago, Oregon, USA, that first flowered 1949. The plant growth is upright and compact with glossy, pointed leaves. The blush pink flowers are 10-11 cm across, incomplete double, similar to **Nobilissima,** with petaloids and stamens interspersed with petals. Early flowering.

Mermaid. *(C.japonica),* van Houtte Pere Catalogue, 1896, 265):109: Semi-double, white petals with a yellow centre. (Believed extinct.)

Mermaid. *(C.japonica),* SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Erroneously given as a synonym for **Kingyo-tsubaki.** Fendig, 1951, *American Camellia Yearbook* with colour pl: Medium to large, carmine red with darker veins, semi-double, 10 cm across x 3.8 cm deep. There are 14 petals about 5 cm long in two rows. Tips of petals round, margins wavy. Stamens are central. Filaments are pink at base, shading to white. Leaves, glossy green, long, narrow, with forked tip, 10 cm x 3.2 cm, thin, tending to bend and twist. Veins depressed; serrations deep and close. Plant habit upright and vigorous. Originated by F.M. Uyematsu of the Star Nursery, Montebello, California, USA from seed of unknown parents. The equation of this name in America with **Kingyo-tsubaki** is erroneous as the Japanese cultivar **Kingyo-tsubaki** is a single variety of only 5 petals.

Merope. Cachet Catalogue, 1845-1846, p.2. Synonym for **Heteropetala Alba.**

Merope. *(C.japonica),* van Houtte Catalogue, 1841, 7:13. No description. Originated in Italy. (Believed extinct.) Synonym: 'Merope d'Italie'.

Merope d'Italie. van Houtte Catalogue, 1845-1846, 23:8. Synonym for **Merope.**

Merrillees. *(C.japonica),* ANZCRS., 1957, *Camellia Annual*, No.4, p.8, Reg. No.29: Large, white, informal double seedling of **Great Eastern,** raised by E.G. Waterhouse, Gordon, N.SW, Australia. Very large outer petals, ruffled, with a low centre of twisted petaloids. Leaves very serrate. Blooms mid-season.

Merry Christmas. *(C.japonica),* Nuccio's Nurseries Catalogue, #8702, 1991: Red bordered white, single to semi-double. SCCS 1993, *Camellia Nomenclature*, p.78: Originated by Nuccio's Nurseries, Altadena, California, USA. Brilliant red to red bordered white. Medium size, single to semi-double. Average, upright growth. Blooms early to mid-season.

Merry Edna. *(C.sasanqua),* SCCS, 1987, *Camellia Nomenclature*, p.137: Shaded pink. Medium sized single. Originated in USA by McCaskill Gardens, Pasadena, California, USA from open pollination about 1956.

Merry Men. *(C.japonica), American Camellia Quarterly*, 1958, vol.13, No.4, Reg. No.335: A 15 year old chance seedling, originated at Fruitland Nurseries, Augusta, Georgia, USA. The shell pink flowers, 10-12.5 cm across x 7.5 cm deep, resemble **Mrs D.W Davis** but are slightly smaller.

The flowers have 3 rows of very large petals, each row in a plane of its own, and long, yellow stamens. Flowers mid-season.

Merryn Gaisworthy. *(C.x williamsii),* Treseder Nursery Catalogue, 1968-1969, p.24: Very large, single, red, opening flat. A *C.saluenensis* seedling originated at Trewithin, Cornwall, England.

Mertz. Levi, 1958, *American Camellia Yearbook*, pp.242, 246, 251. Synonym for **Julia Drayton** as 'Darlington Mathotiana'.

Mervyn Newman. *(C.japonica),* ICS *Journal,* 2002, p.86, Reg. No. 34: An open pollinated seedling of **George Orman.** Originated in the UK by Mrs J.A. Newman. First flowered 1995 at circa 14 years. A dense, slightly pendulous shrub with rapid growth rate. Blooms mid-season. A white semi-double, 7 cm across x 3 cm deep.

Meshikayama. (Doe Mountain), *(C.japonica),* Ôoka, Tokuji, 1983-1984, Chinka-en Catalogue, p.1 in the new sales section: Medium sized, scarlet, single, tubular blossom. Fragrant. Originated in Yamagata Prefecture, Japan. Different readings: 'Jorokusan', 'Mejikayama'.

Messimo d'Azeglio. Rovelli Catalogue, 1893-1894. Orthographic error for **Massimo d'Azeglio.**

Messugah. *(C.japonica),* SCCS *Camellia Nomenclature* 2009, p.88; Medium size, dark red, hose-in-hose semi-double.Average upright growth. Flowers mid-season. Originated in 1970 by Vi Stone, Baton Rouge, La., USA.

Mesteri. Baumann & Baumann Catalogue, 1835 (Illustration) pl.39 as 'Camellia W.tha. Mesterii'. Orthographic error for **Masteri.**

Meta. *(C.japonica),* Thomas Dunlap, 1841, *Magazine of Horticulture,* 7:99: Originated by Carroll. ... Leaves 8 cm x 6 cm, nearly flat, slightly acuminate, light green, strongly veined, thick texture, resembling 'Paeoniiflora'; bud, large, round with greenish, calcinal scales: flower with 2 rows of guard petals, 10 in number. recurved, inner ones small, arranged in 4 distinct circles, forming a large, globular flower, 8 cm across, without stamens or pistil, a shade or two lighter than 'Greville's Red' (**Rubra Plena**). The parents are 'Middlemist' fertilized by 'Grenville's Red'. Originated in USA.

Metalla. *(C.japonica),* Waterhouse, 1947, *Camellia Quest,* p.16. Camden Park seedling 59/52, raised by Sir William Macarthur, N.SW, Australia. Unidentified. (Believed extinct.)

Metalica. Smith & Son Nursery Catalogue, 1883. Orthographic error for **Metallica.**

Metallica. *(C.japonica),* Taylor & Sangster Nursery Catalogue, 1877: A dark, metallic purple. Medium large, formal double. Blooms mid-season. Originated in Australia by Michael Guilfoyle, Double Bay, N.S.W See black and white photo, p.152, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III. Orthographic errors: 'Metalica', 'Mettalica'.

Mettalica. Nairn & Son Nursery Catalogue, 1906. Orthographic error for **Metallica.**

Metcalf Red. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* Red. Semi-double. Early. SCCS., 1954, *The Camellia. Its Culture and Nomenclature*, p.64: Brilliant red. Medium to large semi-double. Vigorous growth. Early blooming. Originated in USA by Clower.

Meteor. *(C.japonica),* Berlèse, 1840, *Monographie*, ed.2, pp.190, 234: Originated by Harrison, New York, USA. Flower is 9.5 cm across, a dark orange red, very bright; outer petals large, well turned, apex well notched; those of the centre, long, numerous, straight, compact, separated from those of the circumference and forming a large, round, flattened ball; stamens and pistil lacking. Synonym: 'Météore Triomphant`. Orthographic errors: 'Meteore', 'Metheor'.

Meteor Triomphant. Rousseau, Angers Nursery Catalogue, 1842-1843, Orthographic variant for 'Météore Triomphant', synonym for **Meteor.**

Meteore. Downings Nursery Catalogue, [Before 1858]. Orthographic variant for **Meteor.**

Météore Triomphant. Cachet Catalogue, 1840-1841, p.3. Synonym for **Meteor**. Orthographic error: 'Meteor Triumphant`.

Miandianying. Gao & Zhuang, 1989, *The Camellia in China*, p.80, No.617. Chinese synonym for Hilsman's *C.irrawadienensis* hybrid **Burma Baby.**

Mianhuatang. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.427; Chinese synonym for the USA *C.sasanqua* **Cotton Candy.**

Miaojie. (Fine Pure). (*C.reticulata* hybrid). China Regn No.16. *China Flowers & Horticulture*, Oct 2007, No.20, p.46, with colour photo; A cross of **Suzanne Withers** x **Kona,** originated by John Wang, Orinda, Calif., USA. Flowers semi-double, light pink, 15 cm diameter. Petals in about 3 whorls, the inner incurved, the outer flat with emarginated apex. Leaves broad and thick, 12-15 cm long x 6-9 cm wide, dark green, shiny and showy. Flowers mid-season to late. A podmate of **Shengjie** and **Chongjie.**

Mibi-goromo. Williarns and Thompson, 1950, *American Camellia Yearbook*, p.93. Orthographic error for **Onigoromo.**

Mibuman'e. (Mibu Million-fold), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.302 as 'Mibu-man-e': Small, campanulate single, 6-7 petals, white with deep pink streaking. Originated in Japan. (Believed extinct.) Mibu is a place name.

Mibumanyo. (Mibu Millon Leaves), *(C.japonica)*, Mizuno, Motokatsu, 1681, *Kadan Kômoku*, vol.3. White spotted red. Originated in Japan. Different reading: 'Mibunokata' in Tomita et al., 1980, Heibonsha, *Tsubaki*, p.130. It is thought possible that **Mibumanyo** and **Mibuman'e** are synonymous. Different reading: 'Mibunokata'.

Mibunokata. Different reading for **Mibumanyo.**

Micaiya. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.421; Chinese synonym for the USA *C.japonica* **Cara Mia Variegated.** Previously 'Caimiya'.

Micana. da Silva, 1880, *Forcing Varieties of Camellias in Oporto*, p.15. Orthographic error with **Micans.**

Micans. (*C.japonica*), van Houtte Catalogue, 1841, 7:13. No description. Trillon, 1843, Catalogue, p.7: Imbricated carmine pink. Originated in Italy by Casoretti. Verschaffelt, 1849, *Nouvelle Iconographie*, Book IV, pl.II. By the regular concentric arrangement of its petals, this camellia belongs to the class of "perfections". Foliage glossy, dark green, thickly veined, finely serrate. The bud, slightly elongated with brownish scales; the blossom, very full, 10 cm. across; the petals, regularly imbricated, are thick, rounded, slightly emarginate, of a deep cherry-red, a flattened rose at the centre. Orthographic errors: 'Micana', 'Micaus'. Synonym: 'Micans'(Casoretti).

Micans (Casoretti). Verschaffelt Catalogue, 1844-1845, p.27. Synonym for **Micans.**

Micaus. de Jonghe, *Traité de la Culture du Camellias.* p.114. Orthographic error for **Micans.**

Mich. Columbo. Verschaffelt, 1844, Catalogue, p.21. Abbreviation for **Michel Colombo.**

Michael. Arnold Foster, 1948, *Shrubs for Milder Climates*, p.202, as C.x 'Michael'. This name was repeated in the 1949 and 1950 *American Camellia Yearbook*, in articles by Arnold Foster, for the Caerhay's *C.x williamsii* cultivar. However the name actually given by the originator, J.C. Williams, was **Charles Michael** after the Head Gardener at Caerhays, while the name **Michael** was reserved for a *C.cuspidata x C.saluenensis* hybrid.

Michael. (Cornish Snow hybrid), Hillier Nurseries Catalogue, 1954. Puddle, Charles, SCCS., 1956, *The Camellia* Review, vol.17, No.8. p.15 as a hybrid between *C.cuspidata* and *C.saluenensis*. It is

one of the original trio, **Cornish Snow, Winton and Michael** and very close to **Cornish Snow** in appearance, with pure white flowers on a more arching, green growth. This group is designated as the "Cornish Snow Hybrids". Originated at Caerhay's Castle, Cornwall, England by J.C. Williams. Because of the confusion over the name 'Michael', this cultivar is sometimes listed as 'Cornish Snow Michael'. Note: SCCS., *Camellia Nomenclature,* 1960 and on, list both names, 'Michael' and 'Charles Michael', but they erroneously refer to the same cultivar, the *C.x williamsii* **Charles Michael.**

Michael Angelo. Verschaffelt, 1856, *Nouvelle Iconographie*, Book XI, pl.III. Orthographic error for **Michelangelo.**

Michael Feray. SCCS., 1968, *Camellia Nomenclature*, p.96. Synonym for **Wilder's Rose.**

Michael Jackson. (*C.japonica*), *American Camellia Yearbook*, 1961, p.227, Reg. No.557: A 7 year old chance seedling that first bloomed 1959, originated by M.P. Jackson, Florence, South Carolina, USA. Plant growth is upright, dense and medium with dark green leaves, 8 cm x 4.5 cm. The semi-double flowers, similar to **Finlandia,** are pure white with rippled petals and compact, yellow stamens. The flower is 13 cm across x 5 cm. deep with 18 petals. Blooms mid-season to late.

Michael Johnson. (*C.japonica*), Truett, 1952, *American Camellia Yearbook,* p.24: Semi-double with conventional stamens. It is white with a pink stripe, has large flowers and is a mid-season bloomer. Originated in USA by Mrs Paul Brock.

Michael Snellgrove. (*C.saluenensis* hybrid). Trewidden Estate Nursery Retail Camellia Catalogue, 1995, p.6: A selected *C.saluenensis* seedling from Trewidden. Single, deep pink flowers. Shrub with a compact habit. Originated in England.

Michael Spry. (*C.japonica*), ACRS., 1989. *Camellia News*, No.111, p.12, Reg. No.371: Originated by William Michael Spry, The Basin, Victoria, Australia. *C.japonica* **Hassaku-tsubaki** x **Spencer's Pink** that first flowered 1979. A pink single of 9 petals (RHS.CC.55D at the base to 55C at the margin), 12 cm across x 3 cm deep. Petals notched, stamens in a column. Flowers over a long season. Plant is upright, open, slow growing, leaves glossy green, elliptic, flat, margins serrate, apex acuminate, size 9 cm x 5 cm.

Michael Witman. *(C.japonica), American Camellia Yearbook*, 1972, p.133, Reg. No.1176: A 7 year old japonica seedling of **Elizabeth Boardman** x **Tomorrow,** that first bloomed 1965. Originated by Mrs M.J. Witman, Macon, Georgia, USA. Plant growth is medium with dark green leaves, 8-10 cm x 5 cm. The semi-double flower is pure white with yellow anthers and white filaments, 12.5 cm. across x 5 cm deep with 21 petals. Blooms very early. The corolla is regular with fluted and frilled petals and wide, short stamens.

Michaelangelo. Rovelli Catalogue, 1893-1894. Orthographic variant for **Michelangelo.**

Michaelina. *(C.japonica), Jardim Portuense,* 1844, April, No.7, p.104; Small, dark scarlet with central cluster sometimes striped white. Originated in Porto, Portugal.

Michael's Joy. *(C.japonica), New Zealand Camellia Bulletin,* March 2000, Issue No.135, vol.XXI, No.4, p.6, Reg. No.419. Registered by N. Haydon, Takanini, New Zealand. A seedling of **Little Michael,** pollen parent unknown, which first flowered 1992. The handsome flower is a medium sized semidouble, 7 cm diameter x 4.5 cm deep, with about 25 petals and 1-3 petaloids. The background colour is wine red (RHS.CC.53B) with near-black veining, giving the flower an overall colour appearance of deep wine red (RHS.CC.53A). The plant is upright, and of average density and growth rate with dark green leaves 7.5 cm long x 3 cm wide. Flowers mid-season to late.

Michel Ange. van Houtte Catalogue, 1858, 72:19. Orthographic error for **Michelangelo.**

Michel Lis. *(C.japonica),* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.18; A single to semi-double, white striped with pink and carmine, sometimes solid pink. A seedling of **Berenice Boddy** x **Lady de Saumarez**, originated by Dr Clifford Parks, Chapel Hill, N.C., USA, and sent to the Thoby Nursery in 1979.

Michelangelo. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie*, p.6: Large flower, imbricated in tiers, bright red, central petals sometimes striped white. Verschaffelt, 1856, *Nouvelle Iconographie*, Book XI, pl.III: The blossom, of medium size, is composed of ample petals, regularly imbricated in star shaped serries, except those of the circumference which are spiral. The colouring is cherry-pink with a few longitudinal white stripes. Originated in Italy by Scarlatti. Orthographic errors: 'Michel Angelo', 'Michael Angelo', 'Michaelangelo', 'Michel Ange', 'Michele Angelo', 'Michelangiolo', 'Micheli-Angelo'.

Michelangelo Merisi. *(C.japonica),* Cattolica, G., *Le mie Camelie*, *My Camellias*, 2005, p.128 with colour photo; Medium size, formal double with central petals almost triangular, purple pink (RHS.CC.67C), with some white streaks and blotches. A sport of **Giulia Aloisi,** first found in 1998. Originated by Dott. Guido Cattolica, Livorno, Italy.

Michelangiolo. Mercatelli Catalogue, 1881. Orthographic error for **Michelangelo.**

Michele Angelo. van Houtte Catalogue, 1865-1866, 93:70. Orthographic error for **Michelangelo.**

Micheli-Angelo. Le Texnier, 1911, *Le Camellia*, *essais sur 1'histoire de quelques fleurs d'ornement*, p.96. *International Camellia Journal*, 1992, No.24, p.51. Orthographic error for **Michelangelo.**

Michelle Cooper. *(C.japonica),* SCCS *Camellia Nomenclature* 2009, p.88; Medium size, rose red, loose semi-double. Open, upright growth. Originated in 2001 by Vi Stone, Baton Rouge La., USA

Michelle Ford. *(C.japonica),* ACRS., 1987, *Camellia News*, No.107, p.22, Reg. No.352: Originated by James K. Powell, Helensburg, N.S.W., Australia. A chance seedling of **Betty Cuthbert,** that first flowered 1983. The upright, tall, vigorous plant produces a shell pink flower, single to semi-double, mid-season to late. The 12 cm bloom has a very large, distinct "Higo" centre of 180 stamens and occasional petaloids with large, flat petals in a single to double row. Leaves, glossy, dark green, heavily textured, ovate, serrate, 10 cm x 6 cm. Won the Sutherland Rotary prize at the 1986 Westfield Camellia Show.

Michelle Howell. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2013, p.27 with colour photo; Regn No.2877; Originated, registered and propagated. by Vernon L. Howell, Lucedale, Miss., USA. ACS, Yearbook, 2013, p.127 with colour photo; A 15 year old seedling, parentage unknown. First flowered 2001. Large size, 12.7 cm diameter x 7.5cm deep flower is maroon with white variegation in flecks and blotches. Semidouble form with 20 petals, plus petaloids among the dispersed stamens, which have yellow anthers and yellow filaments. Plant is upright and dense, with average growth rate. Dark green leaves average 7.5cm x 5cm with medium serration. Flowers midseason.

Michelle S. *(C.japonica),* ACS, *The Camellia Journal*, June 2004, p.28, colour photo p.29, Reg. No.2620. A chance seedling that first flowered 2000. Originated by Dr James Habel, propagated by Capt. Doug Simon, Norfolk, Va., USA. The rose-pink and white semi-double bloom has 46

petals, and occasionally flowers formal double. Size is 5 cm across. *American Camellia Yearbook*, 2004, p.93, colour photo p.c2. Plant is dense, with slow growth rate. Leaves are 7.5 cm long x 3.8 cm wide.

Michinoku-momo-wabishin**.** (See Note at end). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.250 with colour photo; English translation p.175. Miniature, reddish-pink, small sake cup-shped single degenerated stamens. Note: The long name means 'Peach coloured camellia with abortive stamens from Michinoku' (the old name for Tôhuku Region including Aomori). Alternative name for **Michinoku-wabishin.**

Michinoku-wabishin. (Tôhoku Scraped Stamens Camellia), (Wabisuke), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.159, colour photo and description: Small size, red, single of 5 rounded petals, opening wide cup-shaped, with a central, infertile stamen column. Leaves broad-ovate, shining mid-green, apices acute, margins serrate. Blooms early to mid-season. Originated in Natsudomari Peninsular, Aomori Prefecture, Japan. Tôhoku is the north-eastem part of Japan and its ancient name is Michinoku. Selected from wild japonicas at the northern limits of spontaneous generation. Named by Shûhô Kirino in 1983, released by Takeo Ogawa in 1986. Note; *Kurume Camellia*, 1997, English translation, p.39 lists 2 cultivars under this name with the additions (A) and (B). Flower descriptions are the same, flowering season differs.

Midaregami. (Disordered Hair), *(C.rusticana),* Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki, Tokushû*, No.8. See also *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.184: Medium sized, 8-9 cm across, red, occasionally with white streaks, peony form with one row of 11 large, guard petals, long and slender, emarginate, the centre about 50 confused, twisted and erect, small,

irregular petals with about 70 stamens intermingled. Leaves, dark green, long-ovate, 9 cm. long. Collected from Honai Village, Kita-kanbara Gun, Niigata Prefecture, Japan. Resembles **Beni-arashi.** See also Seibundô Shinkôsha, 1980, *Senchinshû*, p.146, colour photo. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.250 with colour photo; English translation p.175. Medium size, red, peony to lion form, stamens and petaloids mixed at the centre. Flowers mid-season to late. Leaves elliptic, medium size, recurved. Cespitose, of rusticana parentage. A cultivar at a private family in Kita-kanbara District. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1967. From Niigata Prefecture.

Midare-i. Different reading for **Ran-i.**

Midare-gi. (Disordered Tree), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium size, double. Pink with a few spots of white. Originated in Japan. See: JCS., 1969, *Tsubaki*, No.7, p.31. (Believed extinct.)

Midare-gi. (Disordered Tree), *(C.japonica), Tsubaki Hachiboku Sanboku Tsuki Nayose Hanagatatsuki Meisai* [latter 19th century]: Crimson with a few spots, rose form double, medium size. Originated in Japan. See JCS., 1982, *Tsubaki*, No.21, p.108. Different reading: 'Ranju'.

Midaregumo. (Disordered Clouds), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.146, colour photo, p.250, description: Small sized, red, with small, white dots, semi-double; petals 10-12, large, crinkled, opening cup-shaped with an irregular, centre stamen cluster, large yellow anthers. Leaves, olive green, wide-elliptic, acuminate, sharply serrate. Originated in Okatsu--chô, Akita Prefecture, Japan.

Midaregyoku. Different reading for **Rangyoku.**

Midarekanoko. (Disordered 'Kanoko'), *(C.japonica)* Itô, Ihei, 1695, *Kadan Chikinshô*, #123; Itô, Jukyû, 1739, *Honzô Hanamaki'e;* and Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki.* The tone of colour is that of the handkerchief called "Kanoko-shibori". Peony form, red with white spots. Early flowering. Originated in Japan. (Believed extinct.) The strict meaning of "Kanoko" is a fawn, but in this case it means a spotted design like the coat of a fawn.

Middle Georgia. *(C.japonica),* ACS 1992, *The Camellia Journal*, vol.47, No.4, p.26, Reg. No.2268. ACS 1993, *American Camellia Yearbook,* p.70, colour photo pp.70-71: A large to very large, dark red formal double, *C.japonica* (**San Dimas** x **Pirate's Gold**), blooms early to late. Originated by Walter Homeyer, Macon, Georgia, USA. The 10 year old seedling first flowered 1985. Average flower size is 12.5 cm across x 7.5 cm deep with 110 petals. Plant growth is upright, dense and average in rate with dark green leaves, fimbriated, 10.6 cm long x 4.5 cm wide. Chinese synonym 'Zhongbu Zuozhiya'.

Middlemist. Prince, William, 1828, *A Short Treatise on Horticulture*, p.170. Synonym for **Middlemist's Red.**

Middlemist Japan Rose. Prince Nursery Catalogue, 1822. Synonym for **Middlemist's Red.**

Middlemist's. Andrew's 1815, *The Botanical Register*, vol.1 pl.22. Synonym for **Middlemist's Red.**

Middlemist's Blush. Loudon, 1825, *The Greenhouse Companion*, p.74. Synonym for **Middlemist's Red.**

Middlemist's Carnea Plena. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.157. Synonym for **Middlemist's Red.**

Middlemist's Camellia. Herbert, 1837, *Amaryllidaceae Suppl.*, p.369. Synonym for **Middlemist's Red.**

Middlemist's Red. *(C.japonica),* Aiton, 1812, *Hortus Kewensis,* vol.4, p.235: Flowers late opening, rich rose-red colour. Similar to the semi-double red, but they measure 8 cm. across. The outer petals are round-cordate and more than 2.5 cm in diameter; before the flower fully opens they are concave and arranged in circles over one another. The centre petals are short, roundish, a little twisted and marked with deeper veining; all of them, more or less, have a small, white stripe in the centre. The stamens are often transformed into small petals so that the flower resembles an overblown rose. This camellia was imported from China in 1804 as, according to Chandler, Middlemist brought it to Kew that year. The first listing of a name for this cultivar was 'Carnea Plena' in Loddiges Catalogue, 1811. However as the name 'Carnea' was being applied as a synonym for other cultivars and as **Middlemist's Red** had become generally applied, this latter name is let stand. It received many variations of its name in the early history of camellias in England. They include: 'Middlemist', 'Middlemist's', 'Middlemist's Blush', 'Middlemist's Camellia', 'Middlemist's Paeoniiflora', 'Middlemist's Rosea', 'The Rose', 'The Pink', 'The Fawn', 'Coloured', 'Paeony Flowered', 'Middlemist's Flesh Colour', 'Rosacea', 'Rose Coloured Camellia', 'Double Pink', 'Carnea', 'Carneo Plena', 'Flore Carneo Plena', 'Flore Pleno Carnea', 'Rosea', 'Middlemist Japan Rose', 'Carnea Middlemist'. Illustrated in Curtis, 1814, *Botanical Magazine*, vol.40, pl.1654; Curtis, 1819, *Monograph on the Genus Camellia*, pl.4; Edwards, 1815, *The Botanical Register*, vol.1, pl.22.

Middleton. *(C.japonica),* Lindo Nurseries Price List, 1947, pp.7, 8, 9. No description. Originated in USA.

Middleton Gardens 115. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* Medium sized, pink, informal double. Blooms mid-season. Originated in USA.

Middletonii. *(C.japonica),* Gerbings Azalea Gardens Catalogue, 1941-1942. No description. Originated in USA. (Believed extinct.)

Middy Petteway. *(C.japonica), American Camellia Yearbook,* 1966, p.97, Reg. No.838: An 8 year old seedling that first bloomed 1955, originated by H.C. Petteway, Lakeland, Florida, USA. Plant growth is upright, bushy, dense and rapid in rate with leaves, 8 cm long x 5 cm wide. The formal double flowers are rose-pink, 8-10 cm across; silvers in warm weather. Blooms early to late.

Midget. *(C.sasanqua)*, Macoboy, 1981, *The Colour Dictionary of Camellias*, p.176, colour photo: A tiny bush with compact masses of long glossy leaves; the single, star-shaped blooms have petals of irregular length with rippled and reflexed edges. These graduate from white at the base to deep carmine. Stamens are from white to pale yellow. Originated in Australia.

Midget Wheeler. (*C.japonica*), *American Camellia Yearbook*, vol.II, 1974, p.238, Reg. No.1341: An 8 year old chance seedling that first bloomed 1969; originated by G.M. Wheeler, Shelby, Alabama, USA. Plant growth is upright and average with light green leaves, 7.5 cm long x 3.8 cm wide. The formal double, **Alba Plena** type, bloom is flesh pink with dots and dashes of rose-pink with 65 petals. Average size is 4.5 cm across x 2 cm deep. Blooms mid-season to late.

Midnight. *(C.japonica), American Camellia Yearbook*, 1965, p.242, Reg. No.715: (SCCS., No.63-8). A 12 year old chance seedling that first bloomed 1955. Originated by Nuccio's Nurseries, Altadena, California, USA. The flower is semi-double to anemone form, black-red with yellow stamens, 10-12 cm across. Vigorous, compact, upright growth. Blooms mid-season. Sport: **Midnight Variegated.** Chinese synonym 'Wuye'.

Midnight Lover. *(C.sasanqua).* ACS 1995, *The Camellia Journal*, vol.50, No.3, p.36, Reg. No.2338: Small size, currant red single, *C.sasanqua* seedling of **Crimson King.** Blooms mid-season. Originated by Dr Clifford Parks, Chapel Hill, NC, USA.

Midnight Magic. *(C.japonica),* Nuccio's Nurseries Catalogue, 1986-1987, p.10, No.7856: Very dark maroon red. Medium sized, peony form. Centre petals occasionally tinted white. Vigorous columnar growth. Late blooming. Originated in USA by Nuccio's Nurseries, Altadena, California. An 8 year old seedling that first bloomed 1978. Average lower size, 10 cm across. Plant growth upright, dense and rapid in rate. Reg. No.2022, *American Camellia Yearbook*, 1986, p.93. Chinese synonym: 'Wuye Mohuan'.

Midnight Ruby. *(C.sasanqua).* ACS 1994, *The Camellia Journal*, vol.49, No.4, inside back cover. Valdosta Camellia Scions: Small, dark red formal double seedling *C.sasanqua*, originated by Jerry Conrad, Plymouth, Florida, USA.

Midnight Serenade. *(C.japonica)*, Nuccio's Nurseries Catalogue, 1973: No.1973. Brilliant, darkest red. Medium to large single. Medium, bushy, upright growth. Blooms mid-season to late. Originated at Nuccio's Nurseries, Altadena, California, USA. See colour photo, pl.14, p.60, *Encyclopedia of Camellias in Colour*, vol.II, 1978.

Midnight Variegated. (*C.japonica*), ACRS, 1983, *Camellia News*, No.87, p.22, Reg. No.307, colour photo back cover: Originated by Alan F. Savage, Mt. Pleasant, Western Australia. First observed 1977. A virus variegated form of **Midnight,** 9 cm across, semi-double, red with white markings. Blooms mid-season to late. Chinese synonym: 'Wuye Piaoyin'.

Midori-no-shizuku. (Drop of Green). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.250 with colour photo; English translation p.176. Small, vermilion, tubular to cup-shaped single, cylindrical stamen column. Flowers mid-season. Leaves narrowly elliptic, small. Upright to spreading growth. A cultivar at the Prefectural Greenery Centre, considered to be a natural seedling. Named and released by Akinori Tajima in 1995. From Ehime Prefecture.

Midosan. Different reading for 'Midôyama'.

Midôyama. Kasuya, Kamegorô, 1859, *Tsubaki, Irohanayose Irotsuki:* This is an orthographic error for **Mimuroyama.** See: JCS., 1982, *Tsubaki*, No.21, p.108.

Mid-season Red. *(C.japonica),* Arthur Charlton Nursery Catalogue, 1957, p.11. A red, semi-double, flowering mid-season. Originated in England.

Midsummer's Day. Burncoose & Southdown Nursery Catalogue, 1987, p.11: Believed to be a form of **Grand Sultan** as 'Mathotiana Rubra', which, growing in a protected position at Caerhays Castle, sometimes carried flowers through to midsummer's day.

Mi'e. (Three fold), (*C.japonica*), Painting in *Chinzu Byobu* (Latter 17th Century), commented on by Watanabe, 1961, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.2, p.48. Originated in Japan. (Believed extinct.)

Mieko Tanaka. *(C.hybrid).* Camellia Forest Nursery Catalogue, 2008, p.7; Small single, true red colour. Long flowering, early to mid-season. Leaves very dark green, and more rounded than usual. Average, well branched growth. Originated by Dr Tanaka, Japan, as a cross of *C.x vernalis* **Gaisen** x *C.japonica.*

Mieko's Magic. (*C.reticulata* hybrid), ICS, *Journal*, 2013, p.170 with colour photoA 12 year old seedling, first bloomed 2007, parents unknown. Named for the late Mrs Mieko Yamamoto. Raised by Mrs Patricia Short, London, England from seed supplied by Mrs Yamamoto, registered by Herbert Short. Plant is of open, rapid growth and flowers midseason. Flower is red (RHSCC red group 46 C&D to 50A&52A) dependant on temperatures. Flower is loose peony, with 17-20 petals in 3 rows, and 12-15 petaloids. 80-100 stamens with pale yellow anthers and filaments sprayed and dispersed among the petaloids. Size very large, 14.5 – 16.5 cm diameter. Flowers fall whole. Leaves flat, dark green (RHSCC green group 137B front, 138B back) 10-16.5 cm x 5-9 cm.

Mi'e-nukishiro. (Three fold white), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.305: Medium sized, white, open peony form with golden anthered stamens, mixed with the centre petals. Originated in Japan. "Mi'e" is also a place name. (Believed extinct.)

Mifei. (Miffie). Shao, Taichong, 1992, *The Observations from the Camellia World,* No.394, p.80. Chinese synonym for the USA 'Miffie R.'.

Migali. (*C.japonica*), Treseder Special Camellia List, 1964-1965: Small, shell pink, single. Originated in England. Orthographic error: 'Migalli'.

Migalli. RHS., The *Rhododendron and* Camellia Yearbook, No.22, 1968, p.20. Orthographic error for **Migali.**

Migenuoen. Gao, Jiyin, Ltr, 5th August 1992. Chinese synonym for the Australian *C.sasanqua* **Mignonne.** Later spelling 'Migelong'.

Mignon. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.157. Orthographic error for **Mignonne.**

Mignonne. (*C.sasanqua*), ACRS., 1979, *Camellia News*, No.72, p.26, Reg. No.214: Originated by E.G. Waterhouse, Gordon, N.SW, Australia. A chance seedling from under *C.sasanqua* **Foliis Variegatis** about 1949. First bloomed 1964. The plant has a small, upright, growth habit, with 6 cm x 3 cm, lanceolate leaves, variegated with small, fine serrations having blunt points. Flowers, 5 cm across, formal double, light pink and flowers mid-season. Orthographic error: 'Mignon'.

Migoshi. (Three, four, five), Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû*, No.10, p.144. Different reading for **Sangoshi.**

Mihama. (A place name), (*C.japonica*), *Encyclopedia of Camellias in Colour,* vol.II, 1978, pl.373, p.152: Light red, medium sized, semi-double. 10-12 cm across with 12-15 oblong, notched, petals, inner ones channelled, hose-in-hose with a small, irregular stamen cluster. See also colour photo: Seibundô Shinkôsha, 1979, *Senchinshû*, p.146. Originated in Mihama, Fukui Prefecture, Japan.

Mihama-wabishin. Synonym for **Gensanmi.**

Mihara-sakigake. (Mihara's Harbinger). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.253 with colour photo; English translation p.178. Small, red single. Flowers very early. Leaves elliptic, medium size. Upright, vigorous growth. Selected from wild japonicas growing in Izu Ôshima. Much better flower shape and foliage than **Shima-sakigake,** a similar very early flowerer. Named and released by Takeo Ogawa in 1996.

Mihara-unryû. (Mihara Cloud Dragon), (*C.japonica*), Yokoyama, 1975, *Gendai Tsubaki Meikan,* p.220, black and white photo: Medium sized, single, red, 5 petals, trumpet shaped. Small, broad, rounded leaves with a blunt apex, keeled, dark green on zig-zag branches. Discovered by Kikuzô Naitô among wild japonicas on Mt. Mihara, Izu Ôshima, Japan. Named by Zenji Kamo. Mid-season blooming. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.173. Resembles **Mikawa-unryû, Kishû-unryû.**

Mihako. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.157. Corruption of the Japanese name **Mihata.**

Mihata. (Royal Japanese Flag), (Higo), Chûgai Nursery Catalogue, 1934-1935: Large, deep crimson, single to petaloid single, 11.5 cm across x 5 cm deep. Petals are round and about 6 cm in diameter; edge of petals wavy, tip notched; stamens have white filaments and pink anthers. Sometimes anthers change to small flags, making the centre, anemone form. Leaves are dark green, thick, ovate, 8 cm x 6 cm, flat, apex abrupt acute, base rounded, coarsely serrate. Wada, 1935, Hakoneya Nursery Catalogue, p.27: Bright crimson single, beautiful stamens. Synonym: 'Shubenihitoe'. Originated in japan. Corrupted name: 'Mihako'.

Mihata. (Royal Japanese Flag), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû,* p.146, colour photo, p.250, description: Medium size, irregular single of 5 petals, each of a different size, white splashed and streaked red. Leaves, dull, dark green, ovate, crenate, apices blunt acute. Large central stamen cylinder, yellow anthers and pinkish filaments. Originated in the Chûbu area, Japan. Corruption of name: 'Miahata', 'Minata'. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.252 with colour photo; English translation p.177. A cross between **Hatsukari (Chûbu)** and **Tatsuta-nishiki.** Originated and released by Minoru Satô in 1955.

Mihô. (Beautiful Treasure), *(C.x williamsii*), Yokoyama & Kirino, 1989, *Nihon no Chinka.* p.133. colour photo and description: Small to medium size, pink, single with 6-7 shining petals in 2 rows. fluted. folded and emarginate with a short, yellow stamen column. Leaves elliptic to long-elliptic, shining mid-green with tapering acute apices and finely serrulate margins. Blooms early to mid-season. A cross between *C.saluenensis* hybrid **Tulip Time** *x C.japonica* **Takara-no-hana.** Originated in Okayama Prefecture, Japan. Named and released by Nobuo Sasai in 1980.

Miho-no-homare. *(C.x vernalis). "Sasanquas, The Winter Flowers"* ICS Congress, Kurume 2010, English translation p.67; Peach red, single, cupped, round petals, tubular stamens small, early to mid-season. From Gifu. Orthographic error for **Mino-no-homare.**

Miho-no-matsu. (Pines of Miho), *(C.japonica),* Chûbu Tsubaki Kyôkai, 1931, *Tsubaki Meikan:* Medium size, white, single flower. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.59. Originated in the Chûbu area, Japan. Note: This is famous for the legend of Hagoromo and refers to the pine on which the celestial maiden hung her robe, and is a scenic place with a beautiful pine forest.

Miho-no-seki. (Place name), *(C.japonica),* Yokyama & Kirino, 1989, *Nihon no Chinka,* p.177: Colour photograph and description. Small size red, hose-in-hose, star-shaped single with 6 pointed petals and a central stamen column with pinkish filaments, joined at lower third and pinched, yellow anthers. Leaves elliptic to broad-elliptic, deep green, acuminate. Blooms mid-season to late. Originated in the Shimane Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.253 with colour photo; English translation p.178. Named and released by Shûhô Kirino in 1977.

Miho-no-tsuki. (Miho Moon). *(C.japonica)*, Funaki-en Camellia Catalogue, 1987-1988, p.13, No.244: Pink single, fading to white at base. Tubular to cup-shaped. Medium size. Mid-season blooming. Originated in Chûbu District, Japan.

Mi'idera. (Mi'i Temple), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.38 as 'Miidera': Medium sized, 5 petalled single with red and black-red streaks. Stamens with golden anthers and white filaments. Originated in Japan. (Believed extinct.)

Mijakodori. Torsanlorenzo Catalogue, 1987-1988, p.13. Corruption of the Japanese name **Miyakodori.**

Mijoka. (Lovely), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.149, colour photo and description: Small size, light red, wide, campanulate single with a slender stamen column, white filaments, joined for the lower third and yellow anthers. Leaves ovate, mid-green, apices blunt acute. Blooms mid-season to late. Originated in the Gotô Isle, Nagasaki Prefecture, Japan.

Mikado. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue, 1942-1943: A very dark red, medium sized, semi-double with petals mixed with stamens. Originated from an old plant at Magnolia Gardens. Note: This has no relationship with the sport of **Hikarugenji**, known as **The Mikado.**

Mikado. L.R. Russell Ltd Nursery Catalogue, 1965-1966, p.24. Orthographic error for **The Mikado.**

Mikado-nishiki. (Emperor's Brocade), *(C.japonica)*, Chûgai Nursery Catalogue, 1936-1937, p.25: White and scarlet. Large, cup-shaped single. Originated in Japan.

Mikaeri-unryû. ('Unryû' to be looked back). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.247 with colour photo; English translation p.174. Medium size, red, tubular to trumpet shaped single, somewhat wide at the tip of the stamen cylinder. Flowers mid-season to late. Leaves elliptic, medium size, somewhat curved inwards. Spreading growth, branches zigzagged. A natural seedling of 'Unryû' (**Unryû-tsubaki**). Named and released by Shinichi Noguchi in 1994. From Tokyo.

Mikasa. (Place Name), *(C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.15: Medium size, anemone form with single row of guard petals, vivid red. Late blooming. Originated in Okayama Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.248 with colour photo; English translation p.174. Thick and round petals. Leaves elliptic, medium to large, somewhat flat. Named and released by Nobuo Sasai in 1981.

Mikasamori. (Mikasa Forest), *(C.japonica)*, Satomi, 1956, *Camellia Varieties of Japan*, p.9: Pink variegated white. Medium, anemone form. Mid-season blooming. See colour photo, Seibundô Shinkôsha, 1979, *Senchinshû*, p.144 as 'Mikasa-no-mori'. Originated in Kansai area, Japan. Mikasa is a place name meaning "Three Umbrellas". Synonym: 'Mikasa-no-mori'.

Mikasa-no-mori. Seibundô Shinkôsha, 1979, *Senchinshû*, p.144, Synonym for **Mikasamori.**

Mikasa No Sukei. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.157. Corruption of the Japanese name **Mikasa-no-tsuki.**

Mikasa-no-tsuki. (Moon over Mt. Mikasa), *(C.japonica)*, Tateyama Nursery Catalogue, 1957: Deep pink, campanulate single, five petals, veined deeper pink and clear white edges. Large, compact stamen cylinder. Leaves mid-green, lanceolate-elliptic, apex acute, recurved, margins finely serrulate. For colour photos see: Satô, 1975, *Chûbu no Tsubaki*, p.45. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.146. Seibundô Shinkôsha, 1979, *Senchinshû*, p.144. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.270. Corrupted name: 'Mikasa No Sukei'. Originated in Chûbu area, Japan. A sport of **Tafuku-benten.** Appeared in *Owari-no-banzuke*, the List of Owari Camellias in 1941.

Mikawa-kurenai. (Mikawa Red), *(C.x vernalis)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.50; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.41: Small size, single, red. Mid-season flowering. Originated in the Mikawa District, Aichi Prefecture, Japan. Named by Shûhô Kirino.

Mikawa-no-tsu. Fendig, 1953, *American Camellia Yearbook.* Different reading for **Sanga-no-tsu.**

Mikawa-shiratama-shibori. (Mikawa White Jewel Dapple), *(C.rusticana)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.249: Red, vertical streaks on a white, translucent background, sometimes white whorls are exhibited. Single, campanulate blooms with cylindrical, stamen group. Medium size. Early flowering. Leaves, medium size, wide-ovate, apex blunt acute, curved, prominent venation. Petiole hairy. Plant habit upright and variable. Resembles **Shibori-rôgetsu.** Originated in Chûbu area, Japan.

Mikawa-sukiya. (Mikawa Tea House), (Wabisuke), Kyôto Engei Kurabu, 1971, *Tsubaki Tokushû*, No.11, pp.29, 31-33, for botanical drawings, colour photo and description; Yokoyama , 1975, *Gendai Tsubaki Meikan*, p.218: Small, deep pink single with 5 oblong petals, innermost pointed, with a short, compact column of white filaments. Leaves long-lanceolate, apex long-acuminate, dull, dark green, sharply serrate. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.145 and p.141, Yokoyama & Kirino, 1989, *Nihon no Chinka.*The original tree is growing with a private family in Mikawa District, Aichi Prefecture, Japan. Named and released by Hiroshige Hayakawa in 1973. Sport: **Otohime.** Synonyms: 'Mikawa-sukiya-wabisuke', 'Momoiro-wabisuke' and 'Kirawabisuke' in the Kansai area.

Mikawa-sukiya-wabisuke. Inazawa Nursery List of Plants, 1980-1981. Synonym for **Mikawa-sukiya.**

Mikawa-unryû. (Mikawa Cloud Dragon), *(C.japonica)*, Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.218: Deep red, single of 6 rounded, irregular petals, opening to a cup shape. Centre stamen column, golden anthers, pinkish filaments. Leaves, small, lanceolate, apex acuminate, recurved, branches and twigs zig zag shaped. Yokoyama & Kirino, 1989, *Nihon no Chinka.* p.191, colour photo. Originated in Chûbu area, Japan. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.145. Resembles **Kishû-unryû** and **Mihara-unryû.** See colour photo: *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.273. Selected from wild japonicas in the mountains of Mikawa District. Discovered by Giichirô Kôzu in 1960.

Mikawa-yuriba. (Mikawa Lily Leaved), *(C.japonica)*, Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.218: Deep red, trumpet shaped single of irregular petals, small. Short, compact stamen cluster. Leaves green, linear, very long and narrow similar to Yuriba. For colour photos see: Satô, 1975, *Chûbu no Tsubaki*, p.111; *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.278, p.121; Seibundô Shinkôsha, 1979, *Senchinshû*, p.145. Originated in Chûbu area, Japan. The original tree was in Mitsugi-chô, Aichi Prefecture. Discovered by Suzuki, named by Noboru Inagaki.

Mike & Jake. Sewell & Parks, 1981, *American Camellia Yearbook*, p.129. Orthographic error for **Mikenjaku.**

Mike Patch. *(C.japonica)*, Nuccio's Nurseries Catalogue, 1972: Rose-red, large, semidouble. Vigorous, compact growth. Flowers mid-season. Originated at Nuccio's Nurseries, Altadena, California, USA.

Mike Witman. *(C.japonica)*, *American Camellia Yearbook*, 1967, p.164, Reg. No.1034: A 7 year old seedling of **Elizabeth Boardman** x **Tomorrow,** that first bloomed 1965. Originated by Mrs M.J. Witman, Macon, Georgia, USA. Plant growth is upright and medium with dark green leaves, 8-10 cm long x 5 cm wide. The peony form flower is 12.5 cm across x 7.5 cm deep with 65 petals. Colour coral pink with yellow anthers and pale pink filaments. Petals curled and gently waved, the centre ones feathery and twisted upwards amongst stamens. Blooms mid-season. See colour photos: Front cover, SCCS., 1969, *The Camellia Review*, vol.30, No.5

and back cover ACS., 1968, *The Camellia Journal*, vol.24, No.4. Sport: **Mike Witman Variegated**.

Mike Witman Variegated. *(C.japonica)*, SCCS., 1972, *Camellia Nomenclature*, p.102 as 'Mike Witman Var.': A virus variegated form of **Mike Witman** - Coral pink and white. Originated in USA.

Miken. (Unknown), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.494: Small, white, irregular semi-double. Originated in Japan. (Believed extinct.)

Mikenjaku. (Mythical Giant with Wide Brows), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki*, *Irohanayose Irotsuki;* Itô, Ko'emon, 1879, *Chinkashû:* Cardinal red, marbled white. Rose-red, marbled white in various degrees. Large semi-double, with large, outer petals and a few small, centre petals lying flat. Slow, spreading growth. Blooms mid-season to late. For colour photos see: Satô, 1975, *Chûbu no Tsubaki*, p.91 as 'Mikenjyaku'. Tuyama, 1966, *Camellia Cultivars of Japan*, pl.141, p.245. Tuyama, 1968, *Camellias of Japan*, pl.283, p.143. Andoh, 1981, *Tsubaki, Meika no Shôkai to Saibai*, pl.68, p.26. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.271. Seibundô Shinkôsha, 1979, *Senshinshû*, p.145. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.322. RHS., "Award of Merit" in 1953 as 'Nagasaki'. "Mikenjaku" was the name of an ancient Chinese, mythical, brave soldier. Synonyms: 'Nagasaki', 'Lady Audrey Buller', 'Lonjan', 'Tenninkwan', 'Candida Elegantissima,',. 'S.Peter Nyce', 'Nagasaki'(Coe), 'Princess Nagasaki', 'Nagasaki Special', 'Princess Nagaski', 'Veinveanna', 'Bikashi Bia', 'Mike & Jake'. Kasuya described this cultivar name as another name for 'Suzukayama'. Different readings: 'Miken jaku', 'Mikenjyaku'. Orthographic errors: 'Mikenjyaka', 'Mikenjaka', 'Mykenjaku'. Originated in Kantô area, Japan. Resembles **Hoshibotan**. Sport: **Marguerita.**

Mikenjyaka. Nobelius Nursery Catalogue, 1941, p.31. Corruption of the Japanese name **Mikenjaku.**

Mikenjyaku. Satô, 1975, *Chûbu no Tsubaki*, p.91. Different reading for **Mikenjaku.**

Mike's Delight. *(C.japonica)*, ACRS, *Camellia News*, 1999, No.151, p.10, colour photo p.2, Reg. No.525. Originated by Kevin Coase, Eagle Heights, Queensland, Australia. A chance seedling that first flowered 1983. The semi-double, light crimson (RHS.CC.51A) flower of 14 petals is 9.6 cm diameter x 5.3 cm deep, and has an overtone deeper colour (RHS.CC.53A) to the outer edges of the petals. Flowers early in mid-season on a bushy upright plant of medium growth. Leaves glossy mid-green, elliptic, twisted, serrulate margins, acuminate apex, 8.5 cm long x 4.5 cm wide. Petals open flat, filaments columnar.

Mikey B. *(C.japonica)*, ACS., Feb.1987, *The Camellia Journal*, vol.42, No.1, Reg. No.2037: Miniature to small, dark red, formal double, *C.japonica* chance seedling. Flowers mid-season. Originated in USA by Dr J. Holtzman, Crows Landing, California. *American Camellia Yearbook*, 1987, p.82. The 15 year old seedling first bloomed in 1978. Average flower size is 6.5 cm across x 5 cm deep with 50 petals. Plant growth is dense and medium with dark green leaves, measuring 8-10 cm long x 3.8-5 cm wide. Orthographic error: 'Mickey B'.

Miki-no-kuchi. (See below), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.5, p.3, description, p.85: An intermediate snow camellia found in the wild in Kanazawa City, Japan. Leaves, shiny, deep green shaded olive, oblong-elliptic to narrowly-elliptic, cuspidate, flat, minutely serrulate, impressed venation, 5.2-8 cm long x 2.9-4.3 cm wide. Petioles hairy, 7-10 mm long. Petals 5-6, broadly-ovate, about 4.3 cm x 3.6 cm. Flowers, pure white or slightly tinged creamy yellow, slightly bilobate. Stamens 3.8-4.5 cm long, filaments creamy yellow. Flowers mid-season. The name refers to the funnel shaped sacred paper inserted into the mouth of the

sake bottle when presenting it to the god in Shintoism, alluding to the colour and shape of the funnel.

Mikoshi. (Expectation), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô;* Yashiro, 1841, *Kokon Yôrankô*, vol.306; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Light coloured, threefold, medium large flower. Calyx is round and tidy in shape. Originated in Japan. (Believed extinct.)

Mikoshiji. (The Road Ahead), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.353: Small, incomplete peony form, white with pink flush to petal base, and red stripes. Originated in Japan. (Believed extinct.)

Mikumiko. Fendig, 1953, *American Camellia Catalogue.* Corruption of Japanese name **Mikunikô.**

Mikuni. (Three Provinces), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatchô; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.308, 474: Open, peony form with light or deep pink background, white edges to petals, dark red streaking. Different reading: 'Sangoku'. Originated in Japan. (Believed extinct.)

Mikunibeni. Wada, 1941, *Garden Treasures of Japan*, p.51. Different reading for **Mikunikô.**

Mikunikô (National Red), *(C.sasanqua)*, Yashiro, 1841, *Kokon Yôrankô*, vol.344. No description. The Yokohama Gardener's Association, 1891, Descriptive Catalogue, p.9: Carmine, large flower, 7.5-8 cm across. Originated in Japan. Different readings: 'Mikunibeni', 'Mikuni Ko', 'Sangokukô', 'Shinkokukô', 'Shinkoku-beni', 'Shinkokkô. See colour pl.532, p.213, *Encyclopedia of Camellias in Colour*, vol.I, 1972. Resembles Negishikô', 'Hinohakama'. Note: This name has been given with different first characters. In Satomi's version they transliterate as, 'Mi-kuni' (or 'Shinkoku'), translating as "Land of the Gods"; another name for Japan, hence "National Red". The characters from the "Encyclopedia" translate as "Three Provinces" with a different reading 'Sangoku'. Orthographic errors: 'Mikumiko', 'Mikuni-Ku'. Synonyms: 'Mikuni Pink', 'Mikuniko Pink', 'Mikuniko Red'. It has also been known erroneously as 'Autumn Beauty'.

Mikuniko Pink. Hazlewood, ANZCRS., 1955, *Camellia Annual*, No.2, p.10. Synonym for **Mikunikô.**

Mikuniko Red. Hazlewood, ANZCRS., 1955, *Camellia Annual*, No.2, p.9. Synonym for **Mikunikô.**

Mikuniko White. Wylam, 1953, SCCS., *The Camellia Review*, vol.11, No.3. This camellia came to Hazlewoods, Australia labelled 'Mikuniko White' where it was called 'Flushed White', under which name it came to USA. It is considered synonymous with **Setsugekka.**

Mikuni-Ku. SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* Orthographic error for **Mikunikô.**

Mikunimusô. Sakuden, 1630, *Hyakuchin-shû.* Synonym for Udonge.

Mikuni Pink. Yashiroda, 1950, *American Camellia Yearbook*, p.15. Synonym for Mikunikô.

Mikuni-no-homare. (Nations Honour), (Higo), Yoshimura, 1961, *Higo Tsubaki Meikan:* Pink, reddish striped, margined white. Crimson streaks on rose-pink, 10 cm across, 7 petals, 150 light yellow stamens in a burst. Leaves, broadly-elliptic, shortly acuminate apex, margins coarsely crenate, strongly wavy, medium size. Blooms mid-season to late. See Hiratsuka, 1964, *Higo Camellia*, pp.13, 36. For colour photos: Tuyama, 1968, *Camellias of Japan*, pl.334, p.169. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.160, p.55. *Encyclopedia of Camellias in*

Colour, vol.I, 1972, pl.152, Seibundô Shinkôsha, 1979, *Senchinshû*, p.148. Note: These colour photos show considerable variation in the strength of the background colour. Originated in Kumamoto Prefecture, Japan. A mutation of **Higo-kyô-nishiki.** Sports: **Mikuni-no-homare Red, Tabaruzaka.** Chinese synonym 'Yuguo Zhi Yu'.

Mikuni-no-homare Red. (Higo). Nuccio's Nurseries Retail Price List, 1989-1990. A red sport of **Mikuni-no-homare.** Blooms mid-season. Originated in USA.

Milady. (*C.japonica*), Valley Garden Supplies Catalogue, 1946-1947: Pink blotched white. Large formal double with a bud centre. Vigorous, upright growth. Mid-season to late blooming. Sport of **Elisabeth Pink.** See black and white photos, p.240, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I. Synonyms: 'Coral Sea', 'Don Pedro Variegated'. Chinese synonym 'Fuse Dengpaidao' (as 'Don Pedro Variegated').

Milarepa. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.129 with colour photo; Medium size, semi-double, pink (RHS.CC.57D). A selfed seedling of 'Rosa Simplex' **(Aitonia),** first flowered in 1990. Originated by Dott. Guido Cattolica, Livorno, Italy.

Mildred Ellerman. Cannon, 1963, ACS., *The Camellia Journal*, vol.18, No.5, p.28. Orthographic error for **Mildred Elliman.**

Mildred Elliman. (*C.japonica*), SCCS., 1958, *Camellia Nomenclature*, p.60: White. Medium to large, formal double. Vigorous growth. Mid-season blooming. Originated in USA at Magnolia Gardens, John's Island, South Carolina. Orthographic error: 'Mildred Ellerman'.

Mildred Gilmore. (*C.japonica*), *American Camellia Yearbook*, 1978, p.133, Reg. No.1475: A medium size, deep red single *C.japonica* chance seedling, that blooms mid-season to late. Orignated by W.L. Gilmore, Conroe, Texas, USA. The 20 year old seedling first bloomed 1963 and has 8-10 petals. Average size, 9.5 cm across x 7 cm deep. Petals heavily veined with one or two rabbit ears. Plant growth is upright and rapid with dark green leaves, 11 cm long x 5 cm wide.

Mildred Lee Melder. (*C.japonica*), SCCS., 1966, *Camellia Nomenclature*, p.93 as 'Mildrer Lee Melder': Red. Large semi-double. Medium, upright growth. Mid-season blooming. Originated in USA at Poole Bros. Nurseries, Forest Hill, Louisiana.

Mildred Pitkin. (*C.reticulata*), *American Camellia Yearbook*, 1976, p.162, Reg. No.1406: A reticulata chance seedling that first bloomed 1968. Originated in USA by Frank Maitland, San Fernando, California. The growth is open and medium with light green leaves, averaging 10 cm long x 3.8 cm wide. The **Frizzle White**, type bloom is deep pink. Average size, 12.5 cm across x 6 cm deep. Blooms mid-season.

Mildred Seidel. Rubel, 1940-1941, *Floral Gems from China* price list No.79. Orthographic error for **Mildred Seydell.**

Midred Seydell. (*C.japonica*), Rubel, 1940-1941, *Floral Gems from China* price list, No.79 as 'Mildred Seidel': Pink and white. Medium sized, formal double with petals diminishing in size towards the centre. Originated at Bellingrath Gardens, Louisiana, USA.

Mildred Stoltz. (*C.japonica*), SCCS., 1966, *Camellia Nomenclature*, p.93: Red. Small single. Vigorous, compact, upright growth. Blooms mid-season. Originated in USA by Miss O. Fogt, Georgia.

Mildred Veitch. *(C.x williamsii*), Puddle, 1961, *American Camellia Yearbook*, p.96: **Mildred Veitch** is a hybrid of *C.saluenensis* and **Elegans** and can best be described as a pale **Donation** with a loose anemone centre. Good shaped flowers, attractive foliage and neat, compact habit. Received an RHS., "Award of Merit" in 1967. Robert Veitch & Son Ltd Nursery Catalogue, 1967-1968, p.6: This delightful camellia was raised at our nursery by crossing *C.saluenensis* and **Elegans.** The large, anemone form, clear pink flowers are produced in abundance, even on a small plant. It was first exhibited before the RHS on 24 Jan. 1962 when it received a

"Preliminary Commendation". On 21 Feb.1967 it was again put before the RHS and received an "Award of Merit". Orthographic error: 'Mildred Veitchi'.

Mima Mae. Ashby, 1958, *American Camellia Yearbook,* p.87. Synonym for **Mathotiana Supreme.**

Mima Mae Variegated. Gentry, 1968, ACS., *The Camellia Journal*, vol.23, No.1 as 'Mima Mae V.'. Synonym for **Mathotiana Supreme Variegated.**

Mimi. (*C.japonica*), *American Camellia Yearbook*, 1948, p.168: McCaskill Garden's Seedling No.167. Complete double, fully imbricated white flower with occasional, pink lines. Blooms mid-season to late. Flower is 7-8 cm across. Growth is upright, compact and vigorous with dark green leaves, 8 cm x 3.7 cm, elliptic, apex acute, margins serrate. First flowered 1944. Parentage unknown. Originated in USA.

Mimicans Rosea. *(C.japonica)*, Charles van Geert Catalogue, 1845. p.9. No description; Ibid, 1847, Catalogue No.101, p.11: Form and colour of 'Roulini' (**Elegans**) but smaller flowers and variegated white. 1848 Catalogue, p.10: Globular, lilac pink, variegated white. Form and colour of 'Roulini' plus small splashes of white. Resembles an improved **Pulcherrima Striata.**

Mimisaka. (Place Name). *(C.x williamsii). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.253 with colour photo; English translation p.178. Small to medium, peach red, tubular to trumpet shaped single, cylindrical stamen column. Flowers early to mid-season. Leaves narrowly elliptic, medium size, somewhat flat. Upright growth. A natural seedling of **Tulip Time.** Originated by Nobuo Sasai in 1985, released in 1997.

Mimosa. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.421; Chinese synonym for the New Zealand *C.x williamsii* **Mimosa Jury.**

Mimosa Jury. *(C.x williamsii). New Zealand Camellia Bulletin*, 1994, Issue No.118, vol.XVIII, No.5, p.31, Reg. No.342: Originated by M.C. Jury, North Taranaki, New Zealand. A *C.saluenensis* x **K. Sawada** seedling. Soft pink (RHS.CC.62D-B), formal double, 9 cm across x 3 cm deep with 70-80 petals. Early to late season flowering, shattering on maturity. Plant is of upright, medium growth. Leaves dark green, 7 cm long x 3.5 cm wide. Chinese synonym 'Mainuosa', later changed to 'Mimosa'.

Mimsa Egeria. Giles & Son Nursery Catalogue, 1881, p.91. Orthographic error for **Ninfa Egeria.**

Mimsie. *(C.sasanqua)*, ACRS., 1976, *Camellia News*, No.62, p.21, Reg. No.177: Originated by E.G. Waterhouse, Gordon, N.S.W., Australia. A chance seedling that first flowered 1970. The plant has an upright, dense, vigorous growth habit. The single to semi-double flower is slatey pink, 8.9-10.2 cm across. Blooms early to mid-season. The deep green leaves are 5 cm x 2.5 cm.

Mimuroyama. (Mount Mimuro), *(C.japonica)*, Itô Jukyû, 1739, *Honzô Hanamaki'e*, vol.15: White, streaked rose-pink; cylindrical stamen cluster. Large double. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Persimmon red in 3-4 tiers of. petals, with red splashes and stamens in divided clusters. Misreading of the name: 'Sanpôzan'. Originated in Japan. (Believed extinct.)

Mimuroyama. (Mount Mimuro), *(C.sasanqua)*, Fendig, 1953, *American Camellia Catalogue*, as 'MimuroYama. No description. Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.12: Deep pink. Large, semi-double with long petals. Originated in Japan.

Min Pin. *(C.sasanqua)*, ACRS., 1980, *Camellia News*, No.74, p.24, Reg. No.228: Originated by Alice Spragg, Sutherland, N.SW., Australia. A chance seedling that first flowered 1970. The plant has a dense, upright growth habit with small, dark green leaves. The deep red, 3.4 cm anemone flowers have some white petaloids.

Mina Bolzesi. *(C.japonica)*, Burdin Maggiore & Co. Catalogue, 1862. No description. Originated in Italy. (Believed extinct.)

Mina Bridges. Verschaffelt Catalogue, 1860-1861, p.13. Orthographic error for **Mima Bridges.**

Mina Ladiner. SCCS., 1946, *Camellias*, p.16. Orthographic error for **Mena Ladnier.**

Mina Mar. Laurel Lakes Nursery Catalogue, 1958. Orthographic error for 'Mima Mae', synonym for **Mathotiana Supreme.**

Mina Schmitz. *(C.japonica)*, Luzzatti Catalogue, 1853. No description. Franchetti, 1855, *Collezione di Camelie*, p.46: The first row of petals is white, a tufted centre formed of elevated petals with no stamens, noticeably straw yellow. Originated in Italy.

Minagawa. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.178. Synonym for **Shishigashira.**

Minakami. (Personal Name), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.224, p.113 illustration, p.157 description: Leaves, small, thin, broadly elliptic, acuminate, manifestly serrate, 8.5-11 cm long x 3.5-5 cm wide, petioles hairy, 8 mm long. Flowers double or tend to be anemone form, red (Claret rose 021 /1). Petals, 10-18, the largest 4.5 cm x 4.2 cm wide, cleft. Stamens in a single compact tube or several fascicles with small, fan-shaped petaloids, up to 81, intermingled with large, erect, inner petals up to 8. Filaments light cadmium yellow, rosy to base. Mid-season flowering. Originated by Mr Minakami, Yatsuo-machi, Toyama Prefecture, Japan.

Minamikaze. Different reading for **Nanpû.**

Minamoto. (Ancient Japanese Clan Name), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.313; Itô, Ihei, 1695, *Kadan Chikinshô*, #196: Blooms very early. Carmine spotted with white. Small, campanulate single with small, compact, centre of interspersed stamens and petaloids. (Satomi, 1958). Originated in Japan. (Believed extinct.)

Minamoto. (Ancient Japanese Clan Name), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.76: Large sized, very deep, dark red with white spots, double with 6-7 rows of petals. Listed by Shirai-Bunko, 1812, *Tsubaki Natosechô* and Yashiro, 1841, *Kokon Yôrankô*, as a synonym for **Ryûjin** and (or) **Saifu-tobi'iri.** Originated in Japan. (Believed extinct.)

Minase. (Place Name), *(C.japonica)*, Okumura, [before 1810], *Chinka Hin'i.* No description. Originated in Japan. (Believed extinct.)

Minata. Mount Congreve Gardens Supplementary List, Jan.1970. Orthographic error for **Mihata.**

Minato-nishiki. (Brocade of the Harbour), *(C.sasanqua)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.45. ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.34: Small size, red, single. Blooms early to midseason. Originated in the Tokyo Prefecture, Japan. Nippon Tsubaki - Sasanqua Meikan, 1998, p.315 with colour photo; English translation p.222. Leaves narrowly elliptic, margins bordered in greenish yellow. Spreading, weak growth. Preserved at Funaki'en Nursery.

Minato-no-akebono. (Harbor at Dawn), *(C.hybrid)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.120, colour photo and description: Very small size, light red with touch of mauve, fading towards white at the centre, single opening almost flat with 6 ovate, emarginate petals and a short stamen cluster, with white filaments and bronze anthers. Fragrant; flowers profusely. Leaves deep green, elliptic, margins serrate. Blooms early to mid-season. A seedling of *C.lutchuensis x C.japonica* **Kantô-tsukimiguruma.** Originated in Yokohama City, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.251 with colour photo; English translation p.176. Parentage stated to be *C.lutchuensis* x **Kantô-hanimiguruma**. Originated and released by Masaomi Murata in 1981. Chinese synonym 'Gangzhishu'.

Minato-no-asa. (Harbour in the morning), (*C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.15: Small size, red, tubular to campanulate, single. Blooms mid-season to late. Leaves variegated. Originated in Nagasaki Prefecture, Japan.

Minato-no-hana. (Harbor of Flowers), *(C.hybrid)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.303, colour photo and description: Very small size, pale pink, wide campanulate, semi-double of 9-10 rounded, reflexed petals in two rows with a small, spreading, gold stamen centre. Fragrant, floriferous. Late blooming. Leaves narrow-elliptic, mid-green, apices tapering acuminate, margins serrate. Flowers terminal and axillary. A seedling of *C.rosiflora.* Originated in Yokohama Prefecture, Japan by Masaomi Murata.

Minato-no-haru. (Harbour in Spring), *(C.hybrid)*, JCS., 1987, *Japan Camellia*, No.24, p.13, colour photo: Originated by Masaomi Murata, Kanagawa, Japan from a cross between *C.japonica* **Konwabisuke** x *C.lutchuensis.* Deep peach pink, single, cylindrical to campanulate form of blossom of very small size. Fragrant. Flowers mid-season to late. Very floriferous. Plant habit pendulous. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.120. colour photo. Originated in Yokohama Prefecture, Japan.

Minato-no-sakura. (Harbor of Cherries), *(C.hybrid)*, Yokoyama & Kirino, 1989. *Nihon no Chinka*, p.85, colour photo and description: Very small size, pale pink, single with 3 inner petals, large and rounded, and 3 small outer petals. Central stamen cluster, white filaments, pale yellow anthers. Floriferous and fragrant. Leaves small, mid-green, ovate, apices acuminate. Blooms mid-season to late. A seedling of *C.japonica* **Kantô-tsukimiguruma** x *C.lutchuensis.* Originated in Yokohama Prefecture, Japan by Masaomi Murata. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.251 with colour photo; English translation p.176. Parentage stated to be **Kantô-hanamiguruma** and *C.lutchuensis.*

Mina-usugoromo. (All Pale Robe), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, #59: Yashiro, 1841, *Kokon Yôrankô*, vol.306: Medium large, double, pale yellow flower with white spots, Sometimes the margin of the corolla is daubed with white. Originated in Japan. (Believed extinct.)

Mine-arashi. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, p.144. Same characters as **Mine-no-arashi.**

Mine-is-sure. *(C.japonica)*, Sawada, 1954, *American Camellia Yearbook*, p.162: Study on Camellia Fruit and Seed. Seed pod, globular, 3.8 cm. across. Smooth, rusty green. Seed, whole, half, quarter, brownish black. Originated in USA.

Mine-no-arashi. (Storm over the Peak), *(C.japonica)*, Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.15; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* as 'Mine-arashi': Large, anemone to peony form, pale ground, red streaks. Originated in Japan. (Believed extinct.) Different reading: 'Mine-arashi'.

Mine-no-kumo. (Cloudy Peak), (*C.japonica*), Miyazawa, 1954, *Kanshô Jumoku:* Semi-double, large peony type. White. Originated in Japan.

Mine-no-matsu. (Pine on the Ridge), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Red, double, large cup-shape. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.80. Originated in Japan. (Believed extinct).

Mine-no-sakae. Vanderbilt, 1941, *Camellia Research, II*, p.5. Orthographic error for **Shôwa-no-sakae.**

Mine-no-shirayuki. (Peak of White Snow), (*C.japonica*), Sakuden, 1630, *Hyakuchin-shû:* Medium sized, single with 5 petals; two of the petals are red with white freckles and the other three petals are pure red. Originated in Japan. (Believed extinct.)

Mine-no-yuki. Hakoda, JCS., 1987, *Tsubaki*, No.26, p.49. Synonym for the *C.hiemalis* **Fuji-no-mine.**

Mine-no-yuki. (Snow on the Ridge), *(C.sasanqua)*, Ashizawa, Yagorô, 1898, *Chabaika Taishû;* Yokohama Gardener's Association, 1891, Descriptive Catalogue, p.9 as 'Minenoyuki': Early,

snow-white, double, profuse bloomer, often giving 100-150 buds on one plant. Flower 5-7.5 cm across. Variable, ranging from semi-double to irregular double, pure white, 7-8 cm. across x 3.7 cm deep. Petals are thin with a tendency to a square shape, 3.8 cm wide with two distinct lobes at apex, crinkled and folded. Some yellow filaments with orange anthers intermixed with petaloids. Buds round with a pinkish tip. Leaves, dull, dark green, sometimes variegated, 4 cm x 2.5 cm, slightly serrate, apices blunt acute. Habit is willowy, spreading, medium vigorous and blooms heavily. Originated in Japan. Synonyms: 'White Doves', 'Snow on the Mountain', 'Snow on the Peak', 'Snow'. Different readings: 'Minenoyuki', 'Mine No Yuki'. Orthographic errors: 'Mino-no-yuki', 'Mine-no-fuki', 'Mine-o-yuki', 'Mini-no-yuki', 'Minnenoyuki'. Sport: **White Doves Benten.** Note: **Mine-no-yuki** and **Fuji-no-mine** are sometimes listed as synonyms, however they are separate and distinct cultivars. Received an RHS., "Award of Merit" in 1964. For black and white photo see p.309, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II. There is also a Higo and a *C.rusticana* and some extinct ancient varieties of the same name.

Mine-no-yuki. (Snow of the Ridge), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* White, double, medium size. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.79. Kasuya Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Snow white double with 3-4 tiers of petals; stamens shaped like a bamboo whisk. See: JCS., 1969, *Tsubaki*, No.7, p.31. Originated in Japan. (Believed extinct.)

Mine-no-yuki. (Snow on the Ridge), *(C.japonica)*, Nakayama, 1847, *Senka'ôden:* Pure white, single; similar to **Hatsu-arashi** but larger than it. Synonym: 'Minejiro'. See Kyôto Engei Kurabu, 1963, *Tsubaki Tokushû*, No.4, p.80. Originated in Japan. (Believed extinct.)

Mine-no-yuki. (Snow of the Ridge), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* Pink with some light pink stripes, margined white. Large. Hiratsuka, 1964, *Higo Camellia*, p.14: Deep crimson spots on light pink, 10 cm across, 7-9 petals, 150 light yellow stamens in a ring. Mid-season blooming. See colour photo, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.63. Synonym: 'Alpine Snow'.

Mine-no-yuki. (Snow of the Ridge), *(C.rusticana)*, Ishii, Yûgi, 1932, *Genshoku Engei Shokubutsu Zufu*, vol.4: Medium sized, white peony with fascicles of stamens intermixed with the centre petals. Leaves, glossy mid-green, broad-ovate, apex blunt acuminate, margins shallowly, coarsely serrate. For colour photos: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.69. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.250. Seibundô Shinkôsha, 1979, *Senchinshû*, p.146. Similar to **Hakubotan, Yukibotan.**

Mine-o-yuki. Blackwell Nursery Catalogue, 1954-1955, p.15. Corruption of the Japanese name **Mine-no-yuki.**

Mine-o-Tuke. *(C.sasanqua)*, Haskins Bros. Nursery Catalogue, 1959, p.3: Deep fuchsia pink, single. Scented. Received an RHS., "Award of Merit", 1974. A corruption of an unknown Japanese name.

Minerva. *(C.japonica)*, Thibauld, Paris Nursery Catalogue, 1845, p.12. No description. Verschaffelt Catalogue, 1844-1845, p.27. No description. Louis Leroy, 1863, p.124: Imbricated pink. Originated in Italy.

Minerva. *(C.japonica), The Garden*, 1911, p.249: Small single, deep rose. Hume, 1931, *Camellias and Azaleas*, 1st ed., p.33: Single, clear pink with golden stamens. Synonym: 'Minerva (1). Originated in England by Paul.

Minerva (1). Vanderbilt, 1940, *Camellia Research*, p.6. Synonym for **Minerva.**

Minerva (2). *(C.japonica)*, Vanderbilt, 1940, *Camellia Research*, p.6. No description. SCCS, 1950, *The Camellia. Its Culture and Nomenclature*, p.50 as 'Minerva II: Pink. Large, formal double. Originated in USA by Orton.

Minerva (3). *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* Pink. Irregular double. Mid- season. SCCS, 1954, *The Camellia. Its Culture and Nomenclature*, p.65 as 'Minerva III': Light shell pink with purplish tinge. Medium, loose peony form. Mid-season blooming. Originated in USA.

Minerva Medica. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete* p.13: Flower, large, imbricated in a cup shape, petals all emarginate, numerous, colour vivid coral pink, tinted with purple, sometimes the central petals are striped almost white. Originated by Belardi, Rome, Italy. Orthographic variant: 'Minerva Medicea'.

Minerva Medicea. Mercatelli Catalogue, 1881. Orthographic variant for **Minerva Medica.**

Minerva Pozzeri. *(C.japonica),* Catalogo della Stablimento Agrario-Botanico de Castagnola e Casabono, 1867-1868. Originated in Italy. No description. (Believed extinct.) Orthographic error 'Minerva Pozzesi'.

Minerva Pozzesi. William Bull Nursery Retail Catalogue, 1869, p.74. No description. Orthographic error for **Minerva Pozzeri.**

Minervia. Thibault. Paris Nursery Catalogue, 1845, p.12. Orthographic error for **Minerva.**

Mineyama. (Place Name). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.251 with colour photo; English translation p.177. Pale pink, some petals partly red, tubular to trumpet shaped single, medium size, cylindrical stamen column. Flowers mid-season. Leaves elliptic, medium size, curved outward. Upright growth. A cultivar at a private family in Mineyama, Takamatsu City. Considered to be a cross between **Gondô-shibori** and **Mineyama-shibori**. Discovered and named by Saneichi Koyama in 1997. From Kagawa Prefecture.

Mineyama-shibori. (Mineyama's White). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.251 with colour photo; English translation p.177. Small, changing to white, tubular single, slender and thick petals, cylindrical stamen column. Flowers early to mid-season. Leaves ovate, medium size, somewhat curved outward. Upright, vigorous growth. An old tree of this cultivar is growing at a private family in Mineyama. Named and released by Tetsurô Imayuki in 1997. From Kagawa Prefecture.

Ming Brocade. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.178. Synonym for **Taimin-nishiki.**

Ming Temple. *(C.reticulata), American Camellia Yearbook,* 1974, p.172, Reg. No.1270: An 8 year old seedling of *C.reticulata* **Damanao** that first bloomed 1968. Originated by David L. Feathers, Lafayette, California, USA. Plant growth is upright, dense and rapid with dark green leaves, 13 cm x 7 cm. The peony form, **Daikagura** type, bloom is deep, silvery pink, 13-15 cm across x 10 cm deep with 20-15 petals, yellow anthers and white filaments, petals creped. Blooms mid- season. See colour photo, front cover SCCS, 1973, *The Camellia Review*, vol.35, No. 1.

Mingetsu. (Sleeping Moon), *(C.hiemalis),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.29: Small size, pink, single with incurved petals. Seedling of *C.hiemalis* 'Showa-no-sakae Variegated'. Blooms early. Originated in the Niigata Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.256 with colour photo; English translation p.180. Palest pink, large, fragrant. Stated to be a cross between 'Shibori-shôwa-no-homare' and 'Dr Ackerman'. Named and released by Kaoru Hagiya in 1980.

Mini Alba. *(C.japonica). American Camellia Yearbook*, 1981, p.103, Reg. No.1758: A miniature white peony form *C.japonica* chance seedIng of **Imura** that blooms mid-season to late. Originated by T.E. Lundy, Pensacola, Florida, USA. The 8 year old seedling first bloomed 1978. Flower size is 5-6 cm across x 5 cm deep with 18-20 petals, 14-18 petaloids, yellow stamens. Plant growth is upright, dense and medium in rate with dark green leaves, 6 cm x 5 cm. Note: This name is illegal according to the Horticultural Code as containing latin after 1958.

Mini Faces. *(C.japonica),* SCCS *Camellia Nomenclature* 2009, p.89; Miniature, semi-double, white with rose and carmine stripes and specks. Average, spreading growth. Flowers mid-season. Originated in 1997 by Doug Mayfield, Baton Rouge, La., USA.

Mini Faces Blush. (*C.japonica),* SCCS *Camellia Nomenclature* 2009, p.89; A blush pink sport of **Mini Faces**. Other details the same. Originated by Art Landry, Baton Rouge, La., USA in 1999.

Mini Mint. *(C.x williamsii),* Smart, James, 1977, RHS., *The Rhododendrons with Magnolias and Camellias*, p.77: White, heavily striped pink. Small, formal double with high bud centre. Slow, bushy growth. Mid-season blooming. A seedling of **Donation** raised by David L. Feathers, Lafayette, California, USA. Orthographic variant: 'Minimint'. Orthographic error 'Mini Mist'.

Mini Mist. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.303 with colour photo. Orthographic error for **Mini Mint.**

Mini Pep. *(C.japonica),* Vi Stone, 1980, SCCS., *The Camellia Review*, vol.42, No.2, p.23: White, rose form double flower, with small, carmine streaks and also solid red blooms. Originated in USA by Tom Eagleson. ACS., 1989. *The Camellia Journal,* Vol.44, No.3, p.9, Reg. No.2136: Miniature. Colour varies from solid rose~pink to off-white with rose streaks to white blooms with red spots, formal double, *C.japonica* chance seedling. *American Camellia Yearbook*, 1989, p.126, colour photo, [p.135]: Average flower size is 3.8 cm across. Plant growth is upright, spreading and very slow. Leaves are mottled yellow and very light green below, measuring 6 cm x 3.2 cm. Orthographic errors: 'Mini Pop', 'Mini Putt'.

Mini Pink. *(C.japonica), American Camellia Yearbook*, 1972, p.133, Reg. No.1170: A 12 year old chance seedling that first bloomed 1963 and was first called by the invalid name of 'Pinkie'. Originated in USA by D.C. Strother, Massee Lane, Georgia. Plant habit is upright and rapid with dark green leaves measuring 7.5 cm long x 3.8 cm wide. The light pink bloom has yellow anthers and white filaments with 10-12 petals and measures 4 cm across x 2 cm deep.

Blooms early mid-season. See colour photo, *New Zealand Camellia Bulletin*, 1988, vol.XV, No.7, p.19.

Mini Pop. Cannon, 1979, ACS., *The Camellia Journal*, vol.34, No.4. Orthographic error for **Mini Pep.**

Mini Putt. Gentry, 1973, ACS., *The Camellia Journal*, vol.28, No.4. Orthographic error for **Mini Pep.**

Miniata. *(C.japonica)*, Costa, 1846, *Catalogue de la collection de Camellias présentée à sa majesté L'Imperatrice de toutes les Russies et Reine de Pologne*, p.6. No description. Paxton's *Botanical Magazine*, vol.14, Aug. 1848; van Houtte's *Flore des Serres*.---vol.3, Oct.1847; Harrison's *Floricultural Cabinet*, Nov.1847 and Verschaffelt, 1848, *Nouvelle Iconographie*, Book II, pl.IV all published descriptions and illustration: This variety adds to the family of the camellia with its perfect regularity and the double colour of the flowers. It was raised in England by the firm of Hugh Low & Co., Clapton. Paxton stated that it was raised from seed of **Myrtifolia** pollinated by **Incarnata** which produced some imperfect blooms with stamens. The flower shape is similar to **Myrtifolia** and it has some of the blush of **Incarnata** in the centre. In the early season the flower colour is crimson but later in the spring it has 3 or 4 rows of blush white with crimson again in the centre. Synonyms: 'Miniata de Low', 'Miniata Low's', 'Miniata di Low's'. Note: In William Paul's lecture "The Camellia and its Culture" printed in the *Journal of Horticultural and Cottage Gardening*, Jan. 23, 1871, pp.114-118, he states that Mr. Fielder informed him that he had raised **Miniata** from the cross of C.sasanqua x **Lepida.** However the origin of **Miniata** as it is known today is more likely as described in Paxton's Botanical Magazine.

Miniata de Low. Burdin Catalogue, 1856-1857. Synonym for **Miniata.**

Miniata de Low Striata. Lichtenthal, 1852, *Manuale botanico enciclopedico popolare.* Synonym for **Miniata Striata.**

Miniata di Low's. Luzzatti, 1851, *Collezione di Camelie*, p.28. Synonym for **Miniata.**

Miniata Low's. Franchetti, 1855, *Collezione di Camelie.* Synonym for **Miniata.**

Miniata Striata. *(C.japonica)*, Jacob Makoy et Cie Nursery Catalogue, 1842, p.9. No description. van Houtte Catalogue, 1843-1944, 12:aaa: Satiny, delicate pink, a white band separates each petal into two equal parts. Regularly imbricated with a white heart faintly tinged with pink. Verschaffelt, 1850, Nouvelle Iconographie, Book IV, pl.II. Orthographic errors: 'Miniana Striata', 'Miniata Stricta', 'Miniate Striata'. Originated by H. Low, London, England. Synonym: 'Alba Rosea Virginalis'.

Miniata Stricta. Del Lungo & Girardi, 1928, *Le Camelie*, p.103. Orthographic error for **Miniata Striata.**

Miniata Superba. *(C.japonica)*, Verschaffelt, 1854, *Nouvelle Iconographie*, Book I, pl.II: This camellia's violet carmine colouring may be observed in various degrees in **Arciduchessa Augusta, Robertsonii and Squamosa.** It was obtained from seed in Tuscany, Italy. The colouring and shape of the blossoms are like that of certain roses, but the compact, imbricated arrangement of the petals, outspread in the exterior rows, erect in the centre, are adorned with white fascia. Synonyms: 'Miniata Violacea', 'Miniata Violacea', 'Miniata Violacea Superba Nova', 'Superba Nova'.

Miniata Violacea. Ambroise Verschaffelt, 1854-1855, Catalogue, p.20. von Biedenfeld, 1856, *Practische Grundlehren der Cultur von Camellien*, p.47. Orthographic errors: 'Minuata Violacea', 'Miniata Violacae'. Synonym for **Miniata Superba.**

Miniata Violacea Superba Nova. Charles Vuylsteke, 1876-1877, Price List, p.20 as 'Miniata Violaci Superba Nova'. Synonym for **Miniata Superba.**

Miniata Violacae. Vervaene, J, Catalogue, No.11, 1888. Orthographic error for 'Miniata Violacea', synonym for **Miniata Superba.**

Miniate Striata. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic error for **Miniata Striata.**

Miniatura Portuensis. *(C.japonica)*, Louriero Catalogue, No.1, 1865, p.31 & No.9, 1872-1873, p.45: Vivid cherry, formal double. Originated in Portugal.

Miniature. *(C.japonica)*, Verschaffelt, 1855, *Nouvelle Iconographie*, Book XI, pl.IV: A charming miniature of flawless, floral form... relatively small size of the blossoms, a vivid crimson colouring with broad single or double white stripes. It was obtained from seed in Ghent, Belgium.

Miniature Elegans. Cannon, 1962, ACS., *The Camellia Journal*, vol.17, No.1, back cover. Orthographic error for **Elegans Miniata.**

Miniflora. *(C.japonica)*, *American Camellia Yearbook*, 1983, p.163, Reg. No.1918: A small, delicate, pink, two tone semi-double chance *C.japonica* seedling of 'Magnoliiflora' (**Hagoromo**) that blooms mid-season to late. Originated by David L. Feathers, Lafayette, California, USA. The 8 year old seedling first bloomed 1980. Flower size 7 cm across x 5 cm deep with 11-12 petals, yellow anthers, white filaments. Plant growth is spreading and dense with light green leaves, 7.5 cm x 4.5 cm.

Minima. *(C.japonica)*, Anonymous. 1830, *Annales de la Société d'Horticulture de Paris*, 7:280-281: Raised from seed sown in 1821 by M. Noisette of Paris and named by him. No description. (Believed extinct.)

Minima. *(C.japonica)*, *Jardim Portuense*, 1844, April, No.7, p.108; Semi-double, dark scarlet, in the shape of a small star, streaked white in the centre. Obtained by Mr. A.F. Pinto Basto Jr. Originated in Porto, Portugal.

Minimint. SCCS., 1984, *Camellia Nomenclature*, p.141. Orthographic variant for **Mini Mint.**

Minina. *(C.sasanqua)*, Vanderbilt, 1940, *Camellia Research*, p.6. No description. SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Light pink. Large single. Developed from seed imported from Japan by Coolidge Gardens, Pasadena, California. See black & white photo, p.311, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III.

Mini-no-yuki. De Vos, 1959, *List of Camellias at the National Arboretum.* Orthographic error for **Mine-no-yuki.**

Minister of Flame. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Hanadaijin.**

Minister of Flower. Yashiroda, 1950, *American Camellia Yearbook*, p.20. Synonym for **Hanadaijin.**

Minna Helms. *(C.japonica)*, *American Camellia Yearbook*, 1956, p.63, Reg. No.277: A 10 year old chance seedling, originated by C.G. Carter, Julington Nurseries Inc., Jacksonville, Florida, USA, that first flowered 1952. Plant growth is upright and rapid with long, oval, mid-green leaves, large serrations. The flowers, varying from 11-15 cm across, are incomplete double to loose, peony form, with crisp petals, incurved and wavy and an occasional petaloid. The brilliant, rose coloured flowers appear mid-season. Sport: **Minna Helms Variegated.**

Minna Helms Variegated. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1962, p.7, as 'Minna Helms Var.': A virus variegated form of **Minna Helms** - Brilliant rose, blotched with white. Originated in USA.

Minna Seidel. T. Humble, 1962, *Gardeners' Chronicle*, p.377. Abbreviation for 'Frau Minna Seidel', synonym for **Otome.**

Minnenoyuki. Yokohama Gardener's Association Catalogue, 1891. Different reading for **Mine-no-yuki.**

Minnie Beasley Smith. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1997, p.16, Reg. No.2420. A large, white, striped and blotched red, peony form chance seedling. Flowers early to mid-season. Originated by LaRose Smith, Beaufort, S.C., USA. *American Camellia Yearbook,* 1997, p.5, colour photo before p.1. The 8-9 year old seedling first flowered in 1993. Average flower size is 10.8 cm across x 7.5 cm deep, with 12 petals and 5 petaloids. Plant growth is upright, dense and vigorous with dark green leaves 9 cm long x 4.5 cm wide.

Minnie Bodeker. *(C.japonica), American Camellia Yearbook*, 1965, p.242, Reg. No.789: A 12 year old chance seedling that first bloomed 1959. Originated by Miss Minnie Bodeker, Augusta, Georgia, USA. The plant growth is upright and rapid with dark green leaves, 8 cm long x 5 cm wide. The semi-double flowers are bright red with yellow anthers and light yellow filaments. Blooms measure 11 cm across x 5.5 cm deep. Blooms early to mid-season.

Minnie Elizabeth. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Red. Medium semi-double with small petaloids. Vigorous, open, upright growth. Mid-season to late blooming. Originated in USA by Mrs W.W. Harman, Birmingham, Alabama. Reg. No.90. *American Camellia Yearbook,* 1954.

Minnie Hass. Sewell & Parks, 1981, *American Camellia Yearbook*, p.129. No description. Originated in USA. No valid listing located.

Minnie Maddern Fiske. *(C.japonica),* McIlhenny Catalogue, 1945-1946, p.12: Very large, rose-pink throughout; colour very uniform from base to tip of petal; semi-double; outer petals very broad and round; inner petals irregular and frilled; stamens in 4 or 5 irregular groups. Anthers golden yellow. Leaves medium green, slender, elliptic, 7.5 cm x 2.5 cm, apex slender and twisted, base tapered, serrations shallow and fine. A tall, stately grower. See Fendig, 1951, *American Camellia Catalogue*, colour plate. Originated in Jungle Gardens, Avery Island, Louisiana, USA. For black and white photo see p.238, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Minnie Nelson. *(C.japonica), Camellia Digest,* 1(3),1943, No description. Originated in USA. (Believed extinct.)

Minnie Pearl. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Red. Medium semidouble to peony form. Mid-season blooming. Originated in USA.

Minnie Ruth. *(C.japonica), American Camellia Yearbook*, 1977, p.216, Reg. No.1430: A medium to large, medium rose-pink, formal double. A 7 year old seedling of **Marie Bracey** that first bloomed 1973. Originated by Paul Gilley, Grandridge, Florida, USA. Flower has 60 petals, 9-11 cm across x 5 cm deep. Blooms early to late. Plant growth is upright, dense and medium with dark green leaves, 7.5 cm long x 5 cm wide.

Minnie Strother. *(C.japonica),* Dodd, 1968, *Adventure in Camellia Seedlings* p.11, colour photo: Star shaped, formal double; faint blush with colour deepening to faint pink at petal edges. A seedling of **Minnie Maddern Fiske,** originated by Richard Dodd, Marshallville, Georgia, USA.

Minnie Turner. *(C.japonica),* SCCS., 1956, *The Camellia. Its Culture and Nomenclature*, p.68: Rose-pink. Large, semi-double. Vigorous, pendulous growth. Blooms early to mid-season. Originated in USA by Weisner.

Minnie Warren. *(C.japonica),* Sheather's Nursery advert. Fullers, *Sydney Handbook* for 1877: Salmon rose, striped white, formal double. Originated in Australia. (Believed extinct.)

Minnie White. *(C.japonica),* Camellia Grove Nursery Catalogue, 1944: White, formal double with pink spots. Originated in Australia.

Minô. (A Mountain near Kurume) *(C.japonica), Kurume Camellia,* 1997, English translation, p.8; Medium size, white semi-double. A chance seedling of **Hatsu-arashi**. Flowers early season. Originated by T. Kunitake, named by M. Noto.

Mino-arashi. (obscure), *(C.japonica),* Anonymous, ca.1874, *Tsubaki Hyakuro no Zu,* vol.3, 3-17: A red single with white streaking. The flower has three large petals, obscuring 2 or 3 smaller ones. Originated in Japan.

Mino-bokuhan. ('Bokuhan' from Mino). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.252 with colour photo; English translation p.177. Small, deep vermilion with contrasting petaloids, anemone form. Flowers mid-season to late. Leaves elliptic, medium size, plicate. Upright, vigorous growth. The original tree is growing with a family in Kaizu Town. Named and released by Minoru Satô in 1970. From Aichi Prefecture.

Minobotan. (Beautiful Dark Peony), *(C.hiemalis),* Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû,* No.5, p.71: Flower sorber red, formal double. Plant habit upright. Hakoda, JCS., 1987, *Tsubaki*, No.26, p.49: Medium to large size, crimson double. Blooms early to mid-season. Originated in the precinct of the Nangû Shrine, Ichinomiya City, Aichi Prefecture, Japan. See Satô, 1975, *Chûbu no Tsubaki*, p.115.

Mino da Fiesole. *(C.japonica), R. Società Toscana di Orticultura Bollettino,* 6:297-300: Flower, large, imbricated; colour, clear amaranth rose; petals lanceolate and spiralled. Originated in Italy by Franchetti, Florence from seed of **Paeoniiflora.**

Minôhaku. (Minô White), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.19, colour photo and description: Medium size, white, cup-shaped single, with 5 rounded, overlapping petals and a central stamen cylinder with white filaments, joined for the lower half, and yellow anthers. Blooms early to mid-season. Leaves dark green, elliptic, apices long tapering acuminate, margins serrulate. Originated in Kurume, Fuku'oka Prefecture, Japan. "Minô" is the name of a mountain in Fuku'oka Prefecture.

Minoji. (Mino's Path), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.79, colour photo and description: Small to medium size, pale pink, cup-shaped single with 5-6 broad, rounded, overlapping petals and a central stamen column with white filaments, joined for the lower third, and yellow anthers. Blooms mid-season to late. Leaves dark green, elliptic to broad-elliptic, apices long acuminate, margins coarsely serrate. Originated in the Gifu Prefecture, Japan. "Mino" is an old place name for the Chûbu area. Named by Minoru Satô in 1984, released by Gifu Camellia Club.

Minô-no-haru. (C.japonica) Oita Agricultural Park, Japan, *Camellia List* May 2011 – Gardens of Excellence Application. No details.

Minô-no-hikari. (Minô's Brilliance), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.184, colour photo and description: Medium size, deep red, campanulate single with 6 round, overlapping petals and a central stamen column with pinkish filaments, joined for the lower half, and yellow anthers. Blooms early to mid-season. Leaves bright green, broad-lanceolate to broad-elliptic, apices acuminate, margins shallowly serrate. Originated in Kurume, Fuku'oka Prefecture, Japan.

Mino-no-homare. (Pride of Mino). *(C.vernalis). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.315 with colour photo; English translation p.222. Small, peach red single, cupped round, smooth petals, cylindrical stamen cluster. Flowers mid-season to late. Leaves elliptic, small, flat. Upright, vigorous growth. The original tree, growing in Gifu Prefecture, Japan, has a trunk 60 cm in circumference. It is considered to be a hybrid between a japonica and a sasanqua. Orthogaphic error 'Miho-no-homare'.

Mino-no-miyabi. (Mino's Elegance), *(C.japonica),* Yokoyama & Kirino, 1989. *Nihon no Chinka,* p.73, colour photo and description: Small size, pale pink, single with 6 petals, inner pointed, and a

pinched, central stamen cylinder with yellow anthers. Late blooming. Leaves mid-green, broad-lanceolate, apices acuminate, margins serrulate. Originated in Gifu Prefecture, Japan. "Mino" is an ancient name for Gifu Prefecture. Nippon Tsubaki - Sasanqua Meikan, 1998, p.252 with colour photo; English translation p.177. The original old tree grows on the right bank of the Kiso River, Hajima District. Named by Nagaharu Niwa in 1987, released by Gifu Camellia Club.

Mino-no-sasanaki. (Sounds of Bamboo Leaves in Mino). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.252 with colour photo; English translation p.177. Small red, tubular single, round petals. Flowers early to mid-season. Leaves broadly elliptic, medium size. Upright, vigorous growth. A wild japonica, history unknown. Named by Nagaharu Niwa in 1989, released by Gifu Camellia Club. From Aichi Prefecture.

Mino-no-yuki. Hume, 1931, *Azaleas and Camellias,* p.3. Orthographic error for **Mine-no-yuki.**

Minor League. *(C.japonica),* SCCS., 1976, *Camellia Nomenclature,* p.108: Rose-pink. Miniature, full peony flower. Medium, upright growth. Mid-season blooming. Originated by B.F. Seale, Sr., Birmingham, Alabama, USA. *American Camellia Yearbook,* 1975, p.239, Reg. No. 1373: A 15 year old chance seedling that first bloomed 1972. Formal double to **Debutante** style bloom, rosy pink with 67 petals, 5.5 cm across x 3.2 cm deep.

Minoshima. (Beautiful Island), *(C.japonica),* Yashiro, 1841, Ichijima, 1906, *Kokon Yôrankô,* reprint from vol.310, "Grasses and Trees", p.362, illustration. No description. Originated in Japan. (Believed extinct.)

Minosse. *(C.japonica),* Scarlatti Catalogue, 1888: Large, cup-shaped flower; colour deep violet, with some small and lighter coloured petals in the centre, resembling a velvet rose. Originated in Italy by Santarelli, Florence.

Mino-tsubaki. (Mino's Camellia), *(C.japonica),* Hino, Sukekatsu, 1637, *Sukekatsukyôki:* Red splashed white. Large, full double. Synonyms: 'Akasaka-futae', 'Akasaka', 'Asane-no-toko' in 1630, Sakuden *Hakuchishû.* (Believed extinct.) Originated in Japan.

Minotuke. *Gardeners' Chronicle,* Oct. 1974, p.561. "Award of Merit", from RHS. Orthographic error for **Mine-o-Tuke.**

Mi-no-wa. (Ring of Beauty). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.252 with colour photo; English translation p.177. Small, pale pink, sake cup-shaped single, round petals. Flowers early to mid-season. Leaves elliptic, medium size. Upright growth, somewhat weak. A natural seedling of unknown parentage. Originated and released by Mamoru Naitô in 1997. From Aichi Prefecture.

Minsi. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p.121. Chinese synonym for **Ming Temple.**

Minsure. *(C.japonica)* Robinson, 1967, *American Camellia Yearbook,* p.69: Red, anemone form with some white petals in the centre. Originated in USA by Wheeler's Central Georgia Nursery, Georgia.

Minuata Violacea. Vanderbilt, 1940, *Camellia Research,* p.6. Orthographic error for 'Miniata Violacea', synonym for **Miniata Superba.**

Minuet. *(C.japonica),* McIlhenny, 1937, 600 *Varieties of Camellia:* White with pink variegation. Originated in USA.

Minuet (Washburn). *(C.hiemalis), American Camellia Yearbook,* 1960, p.203, Reg. No.497, invalidly as 'Minuet': A 3 year old seedling that first bloomed 1959. Originated by Majorie Washburn, Port Arthur, Texas, USA., from seed of **Shishigashira.** Growth habit is average with mid-green leaves, 7.5 cm x 2.5 cm. The light pink, semi-double to peony form flowers are 6

cm across x 3.8 cm deep with 26-32 petals, up to 28 petaloids and yellow stamens. Flowers early.

Minuma-no-haru. (Minuma in Springtime), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.122, description, p.123, colour photo: Large to medium size, soft pink, single opening almost flat with 6-7 large, broad, overlapping petals with waved and crimped margins and central stamen cylinder with white filaments, joined for the lower half, and gold anthers. Leaves elliptic to oblanceolate, dark green, apices blunt acute. Originated in Saitama Prefecture, Japan.

Minuta. (*C.japonica*), Anonymous, Oct.1834, *Revue Horticole*, p.508-509. No description. Berlèse, 1837, *Monographie*, ed.1, pp.98, 129: Flower, 5 cm across, 8 rows, bright, cherry red, arranged in a perfect rose shape, regular, petals imbricated ... those in the centre, irregular, of vivid red. Originated in Belgium. Mertens & Fontaine, *Collection de cent espèces.....camellia*, 1845, pl. 43. Orthographic error: 'Minutae'.

Minuta Alterna. (*C.japonica*), Tagliabue, 1840, *Nomenclatore Camelliae...* No description. Originated in Italy. (Believed extinct.)

Mirandy. *(C.hiemalis), American Camellia Yearbook*, 1965, p.242, Reg. No.744: (SCCS.No.62-9). Female parent **Shishigashira,** male parent unknown. Rose-pink with white overtones. Semi-double with yellow stamens. Diameter 7.5 cm, depth 5 cm. First bloomed 1955. Flowers early. Originated in USA by McCaskill Gardens, Pasadena, California, USA.

Miren. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for Feather's *C.x williamsii* **Infatuation.**

Mirenda. (*C.japonica*), Burnier & Grilli Catalogue, 1846-1847. Scarlet red. Originated in Italy. (Believed extinct.)

Mirenda Rosea. (*C.japonica*), Verschaffelt Catalogue, 1844-1845, p.27. No description. 1851, *Nouvelle Iconographie*, Book VII, pl.IV: Of Belgium origin, this Camellia has rather large blossoms of rich rose colour; exterior petals are convex, outspread; the following ones are upright, more compact at the centre, forming a close, rounded heart. Orthographic error: 'Miranda Rosea'.

Miriam Harrison. (*C.japonica*), Cannon, 1962, ACS., *The Camellia Journal*, vol.17, No.1, back cover. No description. Originated in USA. No valid listing located.

Miriam Homeyer. (*C.reticulata* hybr.), *American Camellia Yearbook*, 1975, p.239, Reg. No.1375: A 10 year old hybrid of *C.reticulata* **Dataohong** x **Trewithen Pink,** that first bloomed 1971. Originated by Dr W.R Homeyer, Macon, Geogia, USA. Plant growth is upright, open and rapid in rate with dark green leaves, 12.5 cm long x 8 cm wide. The semi-double to peony form bloom, is glowing, lavender pink, RHS Fan Red Group, 54A-B-C with 25-27 petals, occasional petaloids, yellow anthers and white to pink filaments. Size is 14 cm across x 8 cm deep. Blooms mid-season. Sport: **Miriam Homeyer Variegated.**

Miriam Homeyer Variegated. (*C.reticulata* hybr.), Cannon, 1981, ACS., *The Camellia Journal*, vol.36, No.1 as 'Miriam Homeyer Var.'. A virus variegated form of **Miriam Homeyer** - Lavender pink and white. Originated in USA.

Miriam Stevenson. (*C.japonica*), Wheeler's Central Georgia Nurseries Catalogue, 1954-1955, p.5: Our seedling, 205-50, is an exquisite bloom of rare beauty. It is semi-double and a most beautiful shade of pink. This soft, blush pink has drawn attention by all who have seen it in bloom. Listed as 'Miriam Stevenson'- Miss Universe. *American Camellia Yearbook*, 1955, p.339,

Reg. No.226: A 12 year old chance seedling, originated by Wheeler's Central Georgia Nurseries, Macon, Geogia, USA, that first flowered 1950. Plant growth is upright and average with heavily textured, dark green leaves, oval, cuspidate and serrate, 10 cm x 5 cm. Flower buds are long pointed and light green. The light blush pink flowers, 10-12.5 cm across, are semi-double to incomplete double with 10-15 petals and petaloids. In some flowers stamens are central; in others they are in fascicles, mixed with twisted petals and petaloids. Flowers mid-season. Sport: **Miriam Stevenson Variegated.**

Miriam Stevenson Variegated. *(C.japonica),* SCCS., 1960, *Camellia Nomenclature*, p.81 as 'Miriam Stevenson Var.': A virus variegated form of **Miriam Stevenson** - Blush pink and white. Originated in USA.

Mirra. *(C.japonica),* Berlèse, 1840, *Monographie,* ed.2, p.134: Leaves of various forms, small and large, some round-oval, short acuminate; others recurved, well serrate, deep green; bud large, oblong, with green scales. Flower is over 9 cm across, double, cherry-red with a touch of carmine; exterior petals in the first row, are turned back to form a cup, imbricated with little regularity; those at the centre are small, long, upstanding, unequal, a few forming a rose-bud centre. Originated in Italy by Mariani. Orthographic error: 'Mira'. Synonyms: 'Mira Vera', 'Mira d'Italie', 'Myrrhe'.

Mirror of Age. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.159: Pale, cherry colour, peony form. Originated in USA.

Mirror of Justice. (*C.japonica*), *American Camellia Quarterly*, 1955, vol. 11, No.4: White to pink, marked deeper pink. Medium sized semi-double to anemone form. Blooms mid-season. Originated in USA by Baker.

Mirtifolia Rosea. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic error for 'Myrtifolia Rosea', synonym for **Myrtifolia.**

Mirtifolia Alba. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic error for 'Myrtifolia Alba', synonym for **Circe.**

Mirtyfolia Rosea Odorata. Trillon, Le Mans Nursery Catalogue, 1845, p.6. Orthographic error for 'Myrtifolia Rosea Odorata', synonym for **Myrtifolia.**

Misan. (obscure), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô*, #128; Yashiro, 1841, *Kokon Yôrankô;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium large, pure red flower, mixed with white spots in a splashed pattern. Originated in Japan. (Believed extinct.) Different readings : 'Miyama', 'Kensan'. Synonyms: 'Kyô-tsubaki', 'Hokutô', 'Oguruma'.

Misasaki. (Uncertain), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, #43: White double flower, medium size. Like a Chinese Bell-flower. Originated in Japan. Different readings: 'Misazagi', 'Misasagi', in Yashiro, 1841, *Kokon Yôrankô*, vol.306. (Believed extinct.)

Misazagi. Different reading for **Misasaki.**

Mischief. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature*, p.73: White, sometimes with a narrow stripe of pink. Large semi-double. Originated in USA by the Julington Nurseries, Jacksonville, Florida.

Misen. (Thousands of Beauties). *(C.x williamsii). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.250 with colour photo; English translation p.175. Large, peach red, formal double, round petals. Flowers mid-season to late. Leaves somewhat elliptic, medium size, somewhat flat, plicate. Upright, vigorous growth. A cross between *C.x williamsii* **Tulip Time** and *C.japonica* **Miyakodori.** Originated and released by Nobuo Sasai in 1982. From Okayama Prefecture.

Mishima. (Island Name), *(C.japonica),* JCS., 1984, *Tsubaki,* No.23, p.35: Flower colour, pale pink, small campanulate single with a compact stamen cylinder. Mid-season flowering. Leaves small. Good for Chabana (Tea ceremony). The name is taken from the fact that Ômishima was origi-

nally called "Mishima". Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.109, colour photo. Originated in the Ehime Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.249 with colour photo; English translation p.174. An old tree designated as a protected plant is growing in Ômishima Town. Named and released by Toshihiro Murakami around 1980.

Mishô. (The Seedling), *(C.japonica), Chinzu Byôbu* (Latter 17th Century), owned by Hirayama, Toku'o. No description. See: Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.48. Originated in Japan. (Believed extinct.)

Mishô. (Smile), (Wabisuke), Kyôto Engei Kurabu 1970, *Tsubaki Tokushû*, p.145 as 'Misyô. Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû*, No.10, pp.40, 42-44, for botanical drawings, colour photo and description; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.489, p.189, description, p.363: Very small, campanulate, irregular, soft pink single, occasionally with white spots, with 5 petals, each of a different size, and a central stamen group with yellow anthers and white filaments. Leaves, small, lightish green, elliptic, caudate, venation prominent, fine, shallow serrations. Originated in Doichô, Ehime Prefecture, Japan. Named by Yasuzô Kawabata in 1968, released by Osamu Suzuka. See colour photo: Tsutomu Suzuki, 1984, *Chabana Goyomi, vol.I, Tsubaki*, p.64. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.234. Different readings: 'Bishô', 'Misyô'. Synonym: 'Iso-seiôbo'.

Mishô-an. (Mishô Hermitage), *(C.japonica)*, Yokoyama & Kirino, 1989. *Nihon no Chinka*, pp.94, 95, colour photo and description as 'Mishôan': Medium to large size, pale peach pink, cup-shaped single with 5 broad, overlapping, emarginate petals and a broad, central stamen cylinder, pale yellow. Blooms very early to mid-season. Leaves shining, deep green, broad-ovate, apices blunt acute, margins obscurely serrate. Originated in the Chûbu area, Japan. A seedling of **Sekido-tarô'an,** which it resembles. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.249 with colour photo; English translation p.175. Named and released by Minoru Satô in 1968. From Aichi Prefecture.

Mishô-shirofu. (White Margined Seedling), *(C.japonica)*, Hantei, Kinta, 1827, *Sômoku Kihin Kogami:* White variegated leaves. Originated in Japan. (Believed extinct.)

Misoka. (Last day of the month), *(C.x vernalis)*, Itô Jukyû, 1739, *Honzô Hanamaki'e*, vol.15. Large size. White spots on red ground. Originated in Japan. (Believed extinct.) Different reading: 'Mitoka'

Misome. (Not Dyed), *(C.sasanqua)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.45; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.35: Medium size, single, white ground, shaded to light red at petal margins and reverses. Early blooming. The original tree is growing in Kumamoto City, Japan. Designated as a Higo by the Higo Sasanqua Society in 1968.

Misono. (Beautiful Garden), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.249: White whorls on peach pink ground. Medium sized campanulate single with cylindrical stamen column. Mid-season flowering. Leaves ovate, medium size, mid-green. Originated in the Chûbu area, Japan. A natural seedling, parentage unknown, originated and released by Kiraku Sakuragi in 1973.

Misono. Seibundo Shinkôsha, 1979 *Senchinshû*, p.201. Original name for **Ichibanhoshi.**

Miss Abby Wilder. Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*, vol.40, p.275. Orthographic error for **Mrs Abby Wilder.**

Miss Adelaide Cambell's Hybrid. *Floricultural Cabinet*, 1835. Synonym for **Adelaideae.**

Miss Adeline. *(C.x williamsii), American Camellia Yearbook*, 1977, p.216, Reg. No.1431: A small to medium white with varying width, pale pink stripes, petals crinkled towards the centre, semi-double. A 10 year old seedling of *C.x williamsii* **Donation**, that first bloomed 1972. Originated in USA by F.F. Becker II, Brookhaven, Mississippi, USA. The semi-double, **Frizzle White** type, bloom is white with 36-38 petals, 3-4 large, crinkled petaloids. Size is 7.5

cm across x 2.7 cm deep. Blooms mid-season. Plant growth is upright, open and medium with dark green leaves, 8cm x 5cm.

Miss Aiken. *(C.japonica), American Camellia Yearbook*, 1976. p.162: A 14 year old chance *C.japonica* seedling that first bloomed 1966; originated by G.M. Owens, Aiken, South Carolina, USA. Plant growth is average with dark green leaves, 8 cm x 3 cm. The 'Donckelaeri' (**Masayoshi**) type bloom is light pink with 21 petals, yellow anthers and crimson filaments. Average size 10 cm across x 5.5 cm deep. Petals slightly notched, faint stripes on lighter petals. Petals are hose-in-hose like 'Magnoliiflora', (**Hagoromo**). Blooms early to mid-season.

Miss America. *(C.japonica),* SCCS., 1958, *Camellia Nomenclature*, p.61: Rose-pink. Large, semi-double, sometimes with intermixed stamens and petaloids. Vigorous, upright growth, Blooms midseason. Originated in USA by Davis.

Miss Anaheim. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature*, p.73: Soft pink, medium to large, semi-double to loose, peony form. Vigorous, compact, upright growth. Mid-season blooming. Originated at the McCaskill Gardens, Pasadena, California, USA.

Miss Anne Marie Hovey. Wyatt Nursery Catalogue, 1886, p.37. Orthographic error for **Mrs Anne Marie Hovey.**

Miss Annemarie Hovey. Hillebrand & Bertolazzi, *Antiche Camelie del Lago Maggiore*, 2003, p.273. Orthographic error for **Mrs Anne Marie Hovey.**

Miss Annette. *(C.japonica),* SCCS., 1964, *Camellia Nomenclature*, p.87: Deep pink. Large, semi-double with upright petals. Upright, spreading growth. Mid-season blooming. Originated in USA at Jungle Gardens, Avery Island, Louisiana.

Miss Arcadia. *(C.reticulata x C.sasanqua)* Withers, 1979 ACRS., *Camellia News*, No.71, p.9: A cross between *C.reticulata* **Mouchang** and *C.sasanqua* **Bonanza** by Meyer Piet, California, USA. Synonym for **Arcadia.**

Miss Auburn. *(C.sasanqua),* Semmes Nursery Catalogue, 1941: Large single flower of deep rose, shading into a lighter coloured centre. Size 7-7.5 cm across. Leaves dark green, elliptic, apex blunt, recurved, margins coarsely serrate. Originated by T. Dodd, Semmes Nursery Alabama, USA.

Miss Audrey Hopfer. Fruitland Nursery Catalogue, 1951-1952, p.29. Synonym for **Adolphe Audusson.**

Miss Baba. *(C.japonica),* Auguste van Geert Nursery Catalogue, 1848, p.19. No description. (Believed extinct.)

Miss Bakersfield. *(C.japonica), American Camellia Yearbook*, 1982, p.176, Reg. No.1854: A large, bright red, peony form *C.japonica* (**Kramer's Supreme** x **All American**) seedling that blooms midseason to late, originated by Ted Alfter, Bakersfield, California, USA. The 14 year old seedling first bloomed 1973. Flower size, 11 cm across x 8 cm. deep with 50-60 petals. Plant growth is upright, dense and rapid in rate with dark green leaves, 10 cm. long x 5 cm wide. Sport: **Miss Bakersfield Variegated.**

Miss Bakersfield Variegated. (*C.japonica*), *American Camellia Yearbook*, p.176, Reg. No.1855 as 'Miss Bakersfield Var.': A virus variegated form of **Miss Bakersfield** - Bright red blotched white. Originated by Ted Alfter, Bakersfield, California, USA.

Miss Baoa. *(C.japonica),* Fratelli Rovelli Catalogue, 1852, p.22: Very large, peony form, white with some petals completely red. Originated in Italy by Ugoni.

Miss Baskerville Gregg. *(C.japonica),* D, R. 1868, *Florist and Pomologist*, 3rd. ser. 1:70, 71: White flowers, slightly flaked with rose. Originated in England at Withington Hall Gardens, Cheshire. See: *The Gardener*, 1868, p.134 as 'Miss Baskerville'.

Miss. Beauty. Gentry, 1968, ACS, *The Camellia Journal*, vol.23, No.1, p.26. Abbreviation for **Mississippi Beauty.**

Miss. Beauty Red. Gentry, 1968, ACS., *The Camellia Journal*, vol.23, No.1, p.26. Abbreviation for **Mississippi Beauty Red.**

Miss. Beauty Variegated. Gentry, 1968, ACS., *The Camellia Journal*, vol.23, No.1, p.26 as 'Miss. Beauty Var'. Abbreviation for **Mississippi Beauty Variegated.**

Miss. Beauty White. Gentry, 1968, ACS., *The Camellia Journal*, vol.23, No.1, p.26. Abbreviation for **Mississippi Beauty White.**

Miss Bess. (*C.x williamsii*), Gentry, 1980, ACS., *The Camellia Journal*, vol.35, No.4. No description. SCCS, 1984, *Camellia Nomenclature*, p.141: Light pink. Medium, anemone form to semi-double. Medium growth. Mid-season to late bloomong. A hyrid seedling originated by Ted Alfter, Bakersfield, California, USA from *C.x williamsii* **Donation** x *C.japonica* **J.J. Pringle Smith** about 1970.

Miss Bessie Beville. *(C.japonica), American Camellia Yearbook*, 1980, p.170, Reg. No.1602: A medium amaranth rose, shading to phlox pink with spirea red veining, formal double, *C.japonica* (**Marie Bracey** x **Mark Alan**), early to late blooming. Originated by W.F. Homeyer, Jr., Macon, Georgia, USA. The 14 year old seedling bloomed for the first time 1976. Flower size, 8 cm across x 2-2.5 cm. deep with 103 petals. Unique colouring, lighter shades of pink early in the season, becoming deeper as season advances, with lavender veining. Plant growth is spreading, open and medium with dark green leaves, 12.5 cm long x 5 cm wide. Chinese synonym 'Beiweili Xiaojie', changed from 'Beiwei Xiaojie' and 'Beivili Xiaojie'.

Miss Betty. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue:* A medium to large, white- variegated, incomplete-double (anemone form), 8-10.5 cm across. The colour is white variegated with crimson and blush pink. There are 28 petals. Stamens intermix with petaloids. Flower buds are large, round and almost white. Leaves lanceolate, dark green, margins holly-like serrations on a compact, pendulous plant. Originated by Elizabeth Councilman, El Monte, California, USA from chance seed. First bloomed 1950. Reg. No.139, *American Camellia Yearbook*, 1954. Sports: **Miss Betty Pink, Miss Betty Red.**

Miss Betty Pink. *(C.japonica)*, SCCS., 1960, *Camellia Nomenclature*, p.81: Blush pink sport of **Miss Betty.** Originated in USA by E. Councilman, El Monte, California.

Miss Betty Red. *(C.japonica).* SCCS., 1960, *Camellia Nomenclature*, p.81: Crimson sport of **Miss Betty.** Originated by E. Councilman, El Monte, California, USA.

Miss Biloxi. *(C.japonica), American Camellia Quarterly*, 1956, vol.11, No.4: White. Medium, rose form double to peony form. Medium, compact growth. Blooms mid-season. Originated in USA by R.H. Brodie, Biloxi, Mississippi, USA.

Miss California. *(C.japonica)*, River View Nursery Catalogue, 1957-1958. p.9. No description. Originated in USA.

Miss Charleston. *(C.japonica), American Camellia Yearbook*, 1962-1963, p.222, Reg. No.659: An 8 year old chance seedling that first bloomed 1958; originated by Bill McGill, Adams Run, South Carolina, USA. Plant growth, upright and medium with dark green leaves, 10 cm. long x 7 cm. wide. The rich red flowers with yellow stamens are semi-double to peony form, 15 cin across x 7.5 cm deep with 30-60 petals. Blooms mid-season to late. Sport: **Miss Charleston Variegated.** See colour photo, back page, ACS., 1962, *The Camellia Journal*, vol.17, No.4. Received the RHS "Award of Merit" 4th May 1988. See coloured illustration, p.149, David Joyce, ed., 1988, *The Chelsea Year*. Chinese synonym: 'Chalisidun Xiaojie'.

Miss Charleston Special. Bob Wine's Nursery Catalogue, 1985-1986, p.3. Synonym for **Miss Charleston Variegated.**

Miss Charleston Variegata. Hillebrand Catalogue, 1976. Invalid as it is part latin. See **Miss Charleston Variegated.**

Miss Charleston Variegated. *(C.japonica),* True's Camellias, 1962, ACS., *The Camellia Journal*, vol.17, No.4, p.33 as 'Miss Charleston Var'. No description. Pyron, 1964, *American Camellia Yearbook*, p.69, black and white photo: **Miss Charleston** has sported a variegated form with most of the red colour confined to the lower half of the petals. A virus variegated form of **Miss Charleston.** Originated in USA. See colour photo facing p.47, *American Camellia Yearbook*, 1983. Synonym: 'Miss Charleston Special'. Invalid orthography: 'Miss Charleston Variegata'. Chinese synonym 'Xin Chalisidun Xiaojie'.

Miss Clare. *(C.x williamsii),* Hilsman, 1966, *American Camellia Yearbook*, p.121: *C.saluenensis x C.japonica* 'Lady Clare', (**Akashigata**) seedling. Originated by Les Jury, New Zealand. No valid listing located.

Miss Clemson. *(C.japonica),* SCCS., 1972, *Camellia Nomenclature*, p.103: Cherry-red. Small, formal double. Medium growth. Late blooming. Originated by W.C. Bowen, Clemson, South Carolina, USA.

Miss Dallas. *(C.reticulata* hybr.), *American Camellia Yearbook*, 1982, p.176, Reg. No.1849: A very large, pink, semi-double *C.reticulata* hybrid ('Crimson Robe' [**Dataohong**] x **Jean Pursel**) that blooms mid-season to late. Originated in USA by Frank Pursel, Oakland, California. The 8 year old seedling first bloomed 1981. Flower size, 15 cm. across x 6 cm. deep. Plant growth is upright, spreading and medium with dark green leaves, 13 cm long x 7.5 cm wide.

Miss Dennison. *(C.japonica),* Baptiste & Son Nursery Catalogue, 1861, p.9. No decription. Originated in Australia. (Believed extinct.)

Miss Dora McCarter. *(C.japonica),* Vanderbilt, 1940, *Camellia Research*, p.6. No description. SCCS, 1947, *The Camellia. Its Culture and Nomenclature:* White. Medium sized, slightly cupped single. Vigorous, upright growth. Mid-season to late blooming. Originated in USA by G.G. Gerbing, Fernandina, Florida.

Miss Dorah. *(C.japonica),* Giles Nurseries Catalogue, ca.1930. No description. Originated in Australia. (Believed extinct.)

Miss Dot. *(C.japonica),* Sewell. 1956, *American Camellia Yearbook*, p.50: The seedling **Miss Dot** is reputedly similar to **Lila Rosa** in one of its forms, though a superior flower. Raised by Mr W. Turner Davis, Madison, Florida, USA. SCCS, 1958, *Camellia Nomenclature*, p.61: Pink. Large, peony form.

Miss Ed. *(C.sasanqua), American Camellia Yearbook*, 1958, p.290. Reg. No.314: A chance seedling, originated by Mrs T.K. McKnight, Baton Rouge, Louisiana, USA. First flowered 1954. Plant growth is upright and rapid. Colour is light pink with deeper pink and lavender tints. There are 30-36, wavy, notched petals, 6-10 small petals and 6-18 short stamens showing when the flower is fully open. Blooms are 5-7 cm across x 2.5 cm deep. Early flowering. Received the Ralph Peer Sasanqua Award in 1964. Chinese synonyms: 'Dexiaojie', 'Aide Xiaojie'.

Miss Elphinstone's. Sweet, 1830, *Hortus Britannicus.* Synonym for **Elphinstoniana.**

Miss E. Manning. Shepherd & Co. Nursery Catalogue, 1883-1884, p.37. Abbreviation for **Miss Emily Manning.**

Miss Emily Manning. *(C.japonica),* Guilfoyle, 1875, *Botanic Papers*, p.26. No description. Originated in Australia. (Believed extinct.) Abbreviation: 'Miss E. Manning'.

Miss Emma Ladd. Magnolia Gardens and Nursery Catalogue, 1942-1943. Orthographic variant for 'Emma Ladd', synonym for **Rose and Snow.**

Miss Ethel. *(C.japonica),* ACS, *The Camellia Journal,* June 2004, p.28, colour photo p.29, Reg. No.2616. A 23 year old seedling which first flowered in 1986. Discovered by Sen. George Hooks, Americus, Ga., USA. The 10 cm across, rose form double flower is soft pink/white flush with a special fluorescence, yellow anthers and white filaments. Flowers profusely. *American Camellia Yearbook,* 2004, p.94, colour photo p.c3. Flowers early to mid-season. Plant is upright, spreading and vigorous. Dark green leaves are 10.8 cm long x 5 cm wide.

Miss Fayetteville. *(C.japonica),* ACS 1991, *American Camellia Yearbook,* p.79, Reg. No.2211, colour photo between pp.80-81: Large, medium pink, peony form *C.japonica* chance seedling. Blooms mid-season. Originated by Dr J.M. Habel Jr, Suffolk, Virginia, USA. The 20 year old seedling first flowered 1971. Average flower size is 12.5 cm across x 5 cm deep with 45-50 petals and petaloids. Growth upright and medium in rate with dark green leaves 8 cm long x 5 cm wide.

Miss Fort Walton Beach. *(C.japonica),* ACS 1993, *American Camellia Yearbook,* p.70, colour photo p.73 as 'Miss Ft. Walton Beach', Reg. No.2278: A medium sized, rose pink, peony to rose form double *C.japonica* chance seedling, originated by Ed and June Atkins, Shalimar, Florida, USA. The 8 year old seedling first flowered 1990. Average flower size is 8-10 cm across x 7.5 cm deep with 12 petals and yellow anthers. Plant growth is upright, average and medium in rate with dark green leaves 7.5 cm long x 5 cm wide. Abbreviation 'Miss Ft. Walton Beach'.

Miss Frankie. *(C.japonica),* Nuccio's Nurseries Catalogue, 1957, p.2: Soft pink. Medium to large, peony form. Vigorous, upright growth. Mid-season blooming. Originated in USA by Nuccio's Nurseries, Altadena, California, USA. Wylam, 1957, *American Camellia Yearbook,* pp.27, 28: Amongst the seedlings released by the Nuccios is **Miss Frankie** (#515), named, at the request of Judge Solomon, in memory of his wife. The flowers are very large, clear salmon pink, semi-double with large petals and showy, gold stamens. A vigorous, upright grower that blooms in mid-season. This variety at its best is truly spectacular. Sports: **Miss Frankie Red, Miss Frankie Variegated.**

Miss Frankie Red. *(C.japonica),* Feray's Fine Flowers Catalogue, 1960: Solid red sport of **Miss Frankie.** Originated in USA.

Miss Frankie Variegated. *(C.japonica),* Cannon, 1962, ACS., *The Camellia Journal,* vol.17, No.1, back cover as 'Miss Frankie Var'. A virus variegated form of **Miss Frankie Red** - Red blotched white. Originated in USA.

Miss Ft. Walton Beach. ACS 1993 *The Camellia Journal,* vol.48, No.3, p.37. Abbreviation for **Miss Fort Walton Beach.**

Miss Georgia. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Variegated, pink, single, Mid-season. *American Camellia Yearbook,* 1954, p.324, Reg. No.176: A 10 year old chance seedling, originated by Hugh Shackelford, Albany, Georgia, USA, which first bloomed 1951. Plant growth is compact and rapid with medium, rounded, light green leaves. Flowers are single with 5 petals and two petaloids, 6-7 cm across. Colour, light pink with white edges. Flowers mid-season.

Miss Gladstone. *(C.japonica),* Guilfoyle 1875, *Botanic Papers,* p.26: Rose-pink. Large, formal double. Mid-season blooming. Originated in Australia by Guilfoyle.

Miss Gladys. *(C.japonica),* ACS, *The Camellia Journal,* June 2006, p.28, colour photo p.29, Reg. No.2680; A chance seedling that first flowered 2000. Originated by Gladys Weinspach, Ocala, Fla., USA. The 12.7 cm diameter, pale pink, rose form double flower has cupped petals. Plant is upright and flowers mid-season. *American Camellia Yearbook,* 2006, p.62 with colour photo; Dark green leaves are 10 cm x 5.7 cm.

Miss Glegg. *(C.japonica),* G.W. Johnson & R.Hogg, 1873, *The Journal of Horticulture…,* vol.XXIX, New Series, p.201. No description. Originated in USA. (Believed extinct.)

Miss Gracie. *(C.japonica),* Griffin, ed., 1956, *Camellian*, vol.VII. No description. Originated in USA.

Miss Grinley Manning. *(C.japonica),* Guilfoyle, 1875, *Botanical Papers*, p.26. No description. Originated in Australia. (Believed extinct.)

Miss Gunnell. Verschaffelt Catalogue, 1846, p.56. Orthographic variant for 'Mistress Gunnell', synonym for **Mrs Gunnell.**

Miss Henni. *(C.japonica),* ACS, *The Camellia Journal*, June 2006, p.28, colour photo p.29, Reg. No.2673. A chance seedling that first flowered 1946. Propagated by John Grimm, Metairie, La., USA. The 4.5 cm diameter, dark rose to violet rose, formal double flower has heavy petal texture. Plant is upright with slow growth rate. Flowers mid-season to late. *American Camellia Yearbook,* 2006, p.63 with colour photo; Leaf and bloom descriptions given are incorrect.

Miss Hollywood. *(C.japonica),* SCCS., 1958, *Camellia Nomenclature*, p.61: Light pink speckled with occasional, narrow stripes of darker pink. Medium sized, formal double. Medium, compact growth. Early blooming. Originated in USA by Carter.

Miss Houston. *(C.reticulata* hybr.*), American Camellia Yearbook*, 1982, p.176, Reg. No.1850: A very large, pink, semi-double *C.reticulata* hybrid (Crimson Robe' [**Dataohong**] x **Jean Pursel**), that flowers mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 15 year old seedling first flowered 1981. Flower size, 15.5 cm across x 5.5 cm deep. Plant growth is upright, dense and medium with dark green serrated leaves, 12.5 cm x 7.5 cm. Chinese synonym 'Haosidun Xiaojie'.

Miss Idah. *(C.japonica), American Camellia Yearbook*, 1984, p.180, Reg. No.1932: A medium, blush pink, semi-double to formal double *C.japonica* chance seedling, mid-season blooming. Originated by Mrs Herman Johnson, Madison, Florida, USA. The 6 year old seedling first bloomed 1981. Average size, 8 cm across x 2.5 cm deep with 24 petals and 6 petaloids. Plant growth is upright and medium with dark green leaves, 7.5 cm x 3.5 cm.

Miss Ima. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.159. No description. Originated in USA. No valid listing located.

Miss Irma. *(C.japonica),* Walter Allan Catalogue, 1948-1949. No description. Originated in USA.

Miss Jennie. *(C.hybrid), American Camellia Yearbook*, 1983, p.163, Reg. No.1867: A large, peach pink outer petals to almost white towards the centre, rose form double, *C.hybrid* (**Brigadoon** x **El Dorado**), early to mid-season flowering. Originated in USA by T.E. Lundy, Pensacola, Florida. The 10 year old seedling first flowered 1977. Flower size. 9.5 cm. across x 5 cm. deep with 64 petals and yellow stamens. Plant growth is spreading and rapid with dark green leaves, 12 cm. x 4.5 cm.

Miss Keiko. *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.145, colour photo, p.249, description: Medium sized, single to semi-double, 6-9 petals, notched or irregular at the apex, faintest, white blush; compact, central stamen column, yellow anthers, pale, creamy white filaments. Leaves elliptic, mid-green, finely serrate. A seedling of **Akebono** originated in Kansai area, Japan. Different reading: 'Misu Keiko'. Nippon Tsubaki - Sasanqua Meikan, 1998, p.249 with colour photo; English translation p.175. Stated to be a natural seedling bought at a nursery in Osaka, named by Kiyoshi Tarumoto, released by Mineko Itami.

Miss Knox. *(C.japonica),* Guilfoyle Nursery Catalogue, 1866, p.19. No description. Shepherd & Co Nursery Catalogue, 1883-1884, p.37: White striped carmine. Originated in Australia. (Believed extinct.)

Miss Lakeland. *(C.japonica),* ACS, *The Camellia Journal,* June 2005, p.8, colour photo p.9, Reg. No.2643; A chance seedling that first flowered 1980. Originated by Mrs Helen McDowell, Lakeland, Fla, USA, and propagated by Shirah's Camellia Nursery. The 5.7 cm diameter flower is rose form to formal double, with red striping on a pink background. Flowers early to mid-season. *American Camellia Yearbook,* 2005, p.45, colour photo p.C6; Plant is upright with vigorous growth. Dark green leaves are 9 cm x 3.8 cm.

Miss Leila. *(C.japonica), American Camellia Yearbook*, 1981, p.103, Reg. No.1755: A large, white with rose stripes, semi-double, *C.japonica* chance seedling, originated by Mrs Herman Johnson, Madison, Florida, USA. The 6 year old seedling first flowered 1979. Flower size, 12 cm. across x 3.8 cm deep, with 23 petals and 6 petaloids and rabbit ears, yellow anthers. Plant growth is dense and medium with light green leaves, 7.5 cm. long x 3.8 cm. wide.

Miss Lillian. *(C.japonica),* ACS, *The Camellia Journal,* Nov. 2001, p.21, colour photo p.20, Reg. No.2562. A formal double chance seedling, creamy white with petals bordered in pink. Plant is vigorous with upright growth, and flowers mid-season. Originated by Clarence Gordy, Ocala, Fla., USA. *American Camellia Yearbook,* 2001, p.96, colour photo p.c15. The 10 year old seedling first flowered in 1994. Flowers measure 7.5 cm across x 3.8 cm deep, with 132 petals. Dark green leaves are 5 cm long.

Miss Lillias. *(C.japonica), American Camellia Yearbook,* 1974, vol.II, p.238, Reg. No.1335: A 15 year old chance seedling that first bloomed 1970. Originated in USA by D.C. Strother, Massee Lane, Georgia. Plant growth is upright, open and medium with light green leaves, 7 cm x 2 cm. The semi-double, 'Herme' (**Hikarugenji**) style, bloom is moderate to strong pink. Size 7 cm. across x 4.5 cm. deep with 30 petals and 2 to 3 petaloids, with yellow anthers and pale yellow filaments. Blooms mid-season to late.

Miss Louisiana. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.159. No description. Originated in USA. No valid listing located.

Miss Lu-Ann. *(C.japonica), American Camellia Yearbook,* 1971, p.48, Reg. No.1128: A chance seedling that first bloomed 1960; originated in USA by Dennis Videll, Memphis, Tennessee. Plant growth is vigorous. open and upright with dark green leaves, 11 cm long x 6 cm wide. The flower is 14.5 cm. across x 7 cm. deep, heavy petalled, semi-double, colour clear coral red and variegated by grafting, with 34-36 wavy petals that stand apart and 4 erect inner ones. It has a circle of 120-130 stamens with pink filaments and golden anthers. Inside this circle is a cluster of 4-6 large and 6-8 smaller petaloids, which are twisted and notched and extend above the stamens. Blooms mid-season. Synonym: 'Miss Lu-Ann Variegated'.

Miss Lu-Ann Variegated. Gentry, 1972. ACS., *The Camellia Journal*, vol.27, No.4 as 'Miss Lu-Ann Var'. Synonym for **Miss Lu-Ann.**

Miss Lucy. *(C.japonica), American Camellia Yearbook*, 1976, p.162-163, Reg. No.1397: A 12 year old chance seedling *C.japonica* that first bloomed 1972. Originated by Dr T.E. Lundy, Pensacola, Florida, USA. Plant growth is average with dark green leaves, 10 cm. x 4.5 cm. The formal double type bloom is light pink flecked rose, 11-14 petals, 7 cm. across x 5 cm deep. Blooms mid-season to late.

Miss Lyla. *(C.japonica),* SCCS., 1964, *Camellia Nomenclature*, p.87: White marked pink. Large, semi-double to rose form double. with swirled, fluted petals and creped centre petals with white filaments. Slow, open, spreading growth. Late blooming. Originated in USA by Judge Solomon.

Miss Mandie. *(C.japonica), American Camellia Yearbook*, 1968, p.134. Reg. No.998: A 9 year old chance seedling that first bloomed 1963; originated by Neal Cox. Georgetown, South Carolina, USA. Plant growth is upright, dense and medium with dark green leaves, 10 cm. long x 5.5 cm wide. The semi-double to full peony form bloom, similar to **Tomorrow,** is

13-15 cm across. Deep red with golden anthers and white filaments. Broad guard petals, slightly crinkled, with twisted and curled petals interspersed with stamens forming a deep centre. Blooms mid-season. Sport: **Miss Mandie Supreme.** Chinese synonym 'Mandi Xiaojie'.

Miss Mandie Supreme. *(C.japonica)*, *American Camellia Yearbook*, 1970, p.167, Reg. No.1097: A virus variegated form of **Miss Mandie** - Red heavily variegated white. Originated by Neal Cox, Georgetown South Carolina, USA. See colour photo, pl.117, p.61, *Encyclopedia of Camellias in Colour*, Vol.II, 1978. Chinese synonym 'Chaoji Mandi Xiaojie'.

Miss Mary. *(C.japonica)*, McIlhenny, 1954, Introduction List: A full double, 7.5 cm across. Base of bloom has 4 rows of blush pink petals, cupped and slightly V'ed, from which extends from its centre, a few pinkish white petaloids and a few stamens tipped primuline yellow. The blossom also has a tightly cupped, rosebud-like centre. When opened one can see a group of white stamens, tipped wax yellow. Originated at Jungle Gardens, Avery Island, Louisiana, USA.

Miss McKennon. *(C.japonica)*, Wilmot, *Camellia Variety Classification Report*, 1943, p.12. No description. Originated in USA.

Miss Middleton. *(C.japonica)*, SCCS., 1956, *The Camellia. Its Culture and Nomenclature*, p.68: Pink and white, profusely moired. Very large, semi-double. Mid-season flowering. Originated in USA at the Middleton Gardens.

Miss Minnie Merritt. *(C.japonica)*, Linden Catalogue, 1873, p.38. No desription. André, 1874, *L'Illustration Horticole*, vol.XXI, pl.185, p.153: Foliage pendant, sharply acuminate; flowers large and superbly imbricated, petals well separated, orbiculate, reflexed; those at the centre, raised, micronate, the outer petals with small notches. The colour is a soft, salmon pink, recalling the variety 'Jubilee', deepening to the centre, white edged and covered by fine, longitudinal stripes of rose. Originated in Belgium. Orthographic errors: 'Miss Minnie Merrit', 'Miss Minnie Meret', 'Miss Minnie Moret', 'Miss Minie Merrith'.

Miss Minnie Moret. Vanderbilt, 1940, *Camellia Research*, p.6. Orthographic error for **Miss Minnie Merritt.**

Miss Mollie. *(C.japonica)*, SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* White with delicate pink tracing. Medium, formal double. Originated in USA by W.L. Ritchie, Milledgeville, Georgia.

Miss Moore. *(C.japonica)*, Guilfoyle, 1875, *Botanic Papers*, p.26. No description. Originated in Australia. (Believed extinct.)

Miss Mort. *(C.japonica)*, Guilfoyle Nursery Catalogue, 1866, p.19: Rose-red outer petals and soft pink centre petals. Medium sized, formal double. Blooms mid-season. Originated in Australia by M. Guilfoyle, Double Bay, N.SW. Orthographic errors: 'Mrs Mort', 'Miss Most'.

Miss Most. Eastwoodhill Arboretum, 1982, *A List of Trees, Shrubs and Climbers*, p.4. Orthographic error for **Miss Mort.**

Miss Muffet. *(C.japonica)*, *American Camellia Yearbook*, 1965, p.242, Reg. No.705: (SCCS.No.62-41). A rose-red miniature japonica; originated as a chance seedling by Estelle Lindsly, San Diego,

California, USA. First bloomed 1958 at 7 years. Flowers are 4-5 cm across, blooming early to late on an upright, vigorous, compact plant.

Miss Murray. *(C.japonica)*, Guilfoyle, 1875, *Botanic Papers*, p.26. No description. Newman Nursery Catalogue, 1886, pp.116-119: Fine shape, hardy. Lovely pink. Originated by Guilfoyle, Double Bay, N.S.W., Australia. Orthographic error: 'Mrs Murray'.

Miss Nora. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Mrs C. Henry Cohen.**

Miss Nova. *(C.japonica)*, Maupoil & Figlio Catalogue, 1847. No description. Originated in Italy. (Believed extinct.)

Miss Olga. *(C.japonica), American Camellia Yearbook*, 1970, p.167, Reg. No.1095: A chance japonica seedling, originated by J.R. Anderson, Apopka, Florida, USA. Plant growth is upright, medium with small, dark green leaves. The bloom is a very deep red, shading to a smoky purple. Almost a miniature. Blooms early to mid-season.

Miss Ollie. *(C.japonica), American Camellia Yearbook*, 1977, p.216, Reg. No.1416: A medium white, semi-double. An 18 year old chance *C.japonica* seedling that first bloomed 1966; originated by W.F. Freshwater, Fort Valley, Georgia, USA. The semi-double, 'Donckelaeri', (**Masayoshi**) type, bloom has 12 petals and 2-3 petaloids with bright yellow anthers and pale yellow filaments. Size 8 cm across x 4.5 cm deep. Blooms mid-season to late. Plant growth is spreading and rapid with dark green leaves, 7.5 cm long x 3.5 cm wide.

Miss Orlando. *(C.japonica), American Camellia Yearbook*, 1965, p.242, Reg. No.755: A 7 year old chance seedling that first flowered 1960; originated by W.H. Veo, Orlando, Florida, USA. Plant growth is upright, open and medium with light green leaves, 10 cm x 2.5 cm. The formal double flowers, 8 cm across x 2.5 cm deep, are blush pink, striped rose, with 80 petals. The petals curve in like **Lalla Rookh.**

Miss Pasadena. *(C.japonica)*, SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Clear pink. Large, anemone form. Vigorous, bushy growth. Mid-season blooming. Imported by the Star Nursery, California from Japan, as an unnamed variety. Synonym: 'Sally Huested'. See black and white photo, p.241, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

Miss Penderlea. *(C.sasanqua)*, Tammia Nursery Catalogue, 1960, p.5. No description. *American Camellia Yearbook*, 1960, p.203, Reg. No.471: A chance seedling that first bloomed 1950, propagated by Robbins Nursery, Willard, North Carolina, USA - Originator unknown. Plant growth is upright, dense and rapid with dark green leaves, 7 cm x 2.9 cm. The 8 petalled flower is white with coral pink margins and yellow stamens, 7.5 cm across x 2.5 cm deep. Early flowering.

Miss Penny Smith. Valdosta Nursery Nov.1978, ACS., *The Camellia Journal*, vol.42, No.4, p.19. Orthographic error for **Penny Smith.**

Miss Percival. *(C.japonica)*, Buist, 1852, *The American Flower Garden Directory*, p.215. Originated Buist, USA. Large flowers, pure white, very fine in bud, not fully double, foliage dark shinig green. Orthographic error 'Mrs Percival'.

Miss Price. Findlay, 1968, RHS., *The Rhododendron and Camellia Yearbook*, No.22, p.20. No description. Originated in England. No valid listing located.

Miss Rebecca. *(C.reticulata)*, ACRS, 1983, Adelaide Plains Branch, South Australia, *Newletter;* ACS., 1986, *American Camellia Yearbook*, p.93, Reg. No.1992: A very large, red, rose form double chance *C.reticulata* seedling of 'Purple Gown', (**Zipao**), originated by E. Kettle, Victoria, Australia that flowers mid-season to late. First bloomed 1968. Average flower size, 15 cm across x 3.8 cm deep. Plant growth is upright and medium with light green leaves. Chinese synonym 'Libeika Xiaojie'.

Miss Rosa. *(C.japonica)*, Berlèse, 1837, *Monographie*, ed.1, p.128: A vigorous shrub, leaves oval, 10 cm x 6 cm, acuminate, strongly serrate, thick, prominently veined; buds numerous and pointed. Flower, 6.5 cm across, semi-double, cherry-red; exterior petals 8-10, very broad; those of the centre, small, depressed and arranged in spirals. Originated in England. Orthographic error: 'Miss Rose'.

Miss Rose. *Catalogue des plantes la Société d'Horticulture de Belgique*, 1842, p.22. Orthographic error for **Miss Rosa.**

Miss Sacramento. *(C.japonica)*, SCCS., Bulletin, vol.11, No.2, p.17, 1949. No description. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.50: Red. Large single with rounded, velvety petals. Unnamed camellia, imported from Japan to Sacramento and named there. For black and white photo see p.241, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II. Sport: **Capitol City.**

Miss Sally. *(C.japonica)*, ACS, *The Camellia Journal*, June 2004, p.28, colour photo p.29, Reg. No.2619. A chance seedling, first flowered 2001. Originated by Capt. Doug Simon, Norfolk, Va., USA. The red, semi-double bloom is 15-16.5 cm across, with 26 fluted petals, yellow anthers and white filaments. Heavy petal texture, and a special fluorescence or sheen. Flowers mid-season. *American Camellia Yearbook*, 2004, p.94, colour photo p.c3. Plant is spreading with average growth rate. Dark green leaves are 10 cm long x 4.5 cm wide.

Miss Santa Clara. *(C.reticulata)*, *American Camellia Yearbook*, 1980, p.170, Reg. No.1687: A very large, hot pink with lavender tinge, semi-double, *C.reticulata* chance seedling that blooms mid-season to late. Originated by Matt Talia, Santa Clara, California, USA. The 10 year old seedling first bloomed 1975, size 13 cm across x 9 cm deep. Plant growth is upright, spreading and rapid.

Miss Savannah. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue*, colour pl. and description: Large, light blush pink, semi-double, 10-12.5 cm across x 6 cm deep. The colour is almost white with a blush tinge, particularly on the underside of the outer petals. The 24-28 round petals are waved and stand more or less upright towards the centre where they become fluted. The stamen column is circular, filaments cream-yellow, anthers golden. Several petaloids, occasionally apple green, may be intermixed with the stamens. The bud is soft pink as it opens. Leaves mid-green, ovoid to lanceolate, 10 cm x 5 cm. Texture coarse and leathery with ends turned down and coarse serrations. Plant habit is vigorous, upright with heavy twigs. A seedling of unknown parentage planted by the Savannah Park and Tree Commission about 1942. First bloomed 1948.

Miss Short. *(C.japonica)*, ACS, *The Camellia Journal*, Aug. 1998, p.23, Reg. No.2469. A medium to large, pink with white border and dark stripes, semi-double chance seedling. Flowers early to mid-season. Originated by Charles T. Elliott, Sr, Swainsboro, Ga., USA. *American Camellia Yearbook*, 1998, p.5, colour photo before p.1. The 20 year old seedling first flowered in 1983. Average flower size is 10-11.5 cm across x 2.5 cm deep, with 18 petals, 2 petaloids, golden anthers and light pink filaments. Plant growth is upright, dense and average with dark green leaves 10 cm long x 3.2 cm wide.

Miss Susanna Thompson's. Loudon, 1838, *Arboretum et Fructiceum Botannicum*, p.389: Synonym for **Susanna.**

Miss Tinytot Princess. *(C.x williamsii)*, *American Camellia Yearbook*, 1979, p.109, Reg. No.1546: A miniature, light pink, formal double *C.hybrid (C.japonica* **Dr Tinsley** x *C.saluenensis)*, originated by Kramers Bros. Nursery, Upland, California, USA. Mid-season blooms. Orthographic error: 'Tiny Tot Princess'.

Miss Tulare. *(C.reticulata)*, *American Camellia Yearbook*, 1975, p.239, Reg. No.1366: An 8 year old reticulata chance seedling that first bloomed 1973. Originated by M.W. Abramson, Tulare,

California, USA. Plant growth is upright and rapid with light green leaves, 12.5 cm. x 7.5 cm. The rose form double, opening to full peony form is bright red to rose-red with 50 petals and yellow anthers. Flower size, 12-13 cm across x 8-10 cm deep. Blooms early to mid-season. This was originally incorrectly stated to be a *C.japonica.* This was corrected on p.163 of the 1976, *American Camellia Yearbook.* It is a seedling of *C.reticulata* 'Crimson Robe', (**Dataohong**). Received the "Frank L. Stormont Reticulata Award" for 1979. For colour photos see: p.161, Macoboy, 1981, *The Colour Dictionary of Camellias;* front cover *New Zealand Camellia Bulletin*, vol.XII, No.8, 1982; front cover, SCCS, 1977, *The Camellia Review*, vol.38, No.5. Sport: Miss Tulare Variegated. Chinese synonym: 'Talier Xioajie'.

Miss Tulare Variegated. *(C.reticulata), American Camellia Yearbook*, 1977, p.217, Reg. No.1419, with colour photo facing p.50 as 'Miss Tulare Var.': A virus variegated form of **Miss Tulare** - A very large bright red, blotched white in varying degrees. Originated by M.W. Abramson, Tulare, California, USA. Chinese synonym: 'Xintalier Xiaojie'.

Miss Ubaldi. van Geert Nursery Catalogue, No.105, 1848, p.114. Orthographic error for **Mistress Uboldi.**

Miss Universe. *(C.japonica),* Kramer Bros. Nursery Catalogue, 1960. No description. *American Camellia Yearbook*, 1961, p.227, Reg. No.520: A 9 year old seedling of 'Purity', (**Shiragiku**), that first bloomed 1951. Originated by August Kramer, Upland, California, USA. Growth habit is vigorous, dense, erect and branching with oval, light green leaves, 11 cm x 4.5 cm. The white, incomplete double to rose form to peony form flower, has yellow stamens and is 11 cm across x 5.3 cm deep with 46, silky textured petals. The flower centre is an upright group of petaloids intermixed with stamens. Blooms mid-season to late. See colour photo, front page, SCCS, 1962, *The Camellia Review*, vol.23, No.4.

Miss Western Hills. (*C.japonica* hybrid). *New Zealand Camellia Bulletin*, March 2002, Issue No.141, vol.XXII, No.5, p.13, Reg. No.441. Registered by J.R. Finlay, Whangarei, New Zealand. A cross between C.hybrid **Fragrant One** x *C.japonica* **Tama-no-ura,** which first flowered in 1998. The flower is of peony to anemone form, 11 cm diameter x 5.5 cm deep, with 35 petals, and 35 petaloids which hide the stamens. The colour shades attractively from a medium pink (RHS.CC.55C) in the outer part of the flower to a light creamy pink (RHS.CC.27C) at the centre. The plant is floriferous, and the flowers are lightly scented. The rapid-growing bush is upright, of medium density, with dark green leaves 9 cm long x 5 cm wide. Flowers mid-season to late.

Mister George. *(C.japonica), American Camellia Yearbook*, 1974, p.173, Reg. No.1267: A 10 year old japonica seedling; originated by Mrs Walter McEachern, Wilmington, North Carolina, USA. Plant growth is upright, spreading, dense and rapid in rate with mid-green leaves, 7.5 cm x 1.5 cm. wide. The semi-double, **Frizzle White** type, bloom is rose-pink. It measures 12.5 cm across x 10 cm deep with 35 petals and 50 petaloids, white filaments and yellow anthers. Blooms early to late.

Mister John. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1964-1965, p.11. No decription. SCCS., 1966, *Camellia Nomenclature*, p.95: Blush pink. Large, semi-double. Originated in USA. Abbreviation: 'Mr John'.

Mister Sam. *(C.japonica), American Camellia Yearbook*, 1965, p.242, Reg. No.760: An 8 year old chance seedling that first bloomed 1962. Originated by Thomasville Nurseries Inc.,

Thomasville, Georgia, USA. Plant growth is upright, and of average denseness with dark green leaves 10 cm x 5 cm. The rose form double flower, similar to 'Mathotiana', (**Julia Drayton**), is soft, shell pink with golden anthers and white filaments. The bloom is 12.5 cm across x 3.7 cm deep with 40 petals and 8 petaloids. Blooms early to mid-season. See colour photo: ACS., 1965, *The Camellia Journal*, vol.20, No.3., inside back cover. Sport: **Mister Sam Variegated.**

Mister Sam Variegated. *(C.japonica),* Gentry, 1968, ACS., *The Camellia Journal*, vol.33, No.1, p.28, as 'Mr Sam Var.': A virus variegated form of **Mister Sam** - Red blotched with white. Originated in USA.

Mister Tim. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2009, p.29, Regn No. 2770; Originated by Webb Hart, Carriere, Miss., USA. *American Camellia Yearbook*, 2009, p.116 with colour photo; A chance seedling, first flowered in 1998. The semi-double flower is 9.5 cm diameter x 3.8 cm deep, dark red, with 23 petals. Yellow anthers and white filaments. Upright plant of average growth rate. Dark green leaves average 7.5 cm x 3.2 cm. Late flowering.

Mister William. *(C.japonica), American Camellia Yearbook*, 1970, p.167, Reg. No.1084: A 10 year old chance seedling that first bloomed 1965; originated by Mrs D.F. Miller, Augusta, Georgia, USA. Plant growth is upright, dense and rapid in rate with dark green leaves of small size. The semidouble 'Herme', (**Hikarugenji**) type, bloom is rose-pink with deep yellow anthers and blush pink filaments. It measures 10 cm. across x 3.7 cm deep with 23 petals and 4 petaloids. Some blooms have white streaks in one or two petals. Blooms mid-season.

Misteri. *(C.japonica),* Baumann & Baumann Catalogue No.39, 1835 as Camellia J.W. 'Misterii', a waratah form. The flower is beautiful, well formed ... in colour, deep crimson. The outer petals are oblong, cordiform, convex and reflexed. The inner petals are smaller but similar, marked with small, white flecks.

Misty. *(C.x williamsii)*, ACRS., 1986, *Camellia News*, No.99, p.22, Reg. No.340: Originated by Bill Hooper, Bexley North, N.S.W., Australia. A chance seedling of **Wynne Rayner,** that first flowered 1979. This multi-layered semi-double, 9.5 cm across x 3.6 cm deep, white flower that blooms mid-season on an upright, spreading plant, fluted petals, stamens in a column. Leaves elliptic, apex acute, glossy green, shallow serrations, 8.5 cm long x 3.9 cm wide.

Misty Moon. *(C.sasanqua)*, *American Camellia Yearbook*, 1980, p.170, Reg. No.1681: A small, light lavender pink, semidouble chance *C.sasanqua* seedling that first bloomed 1977, early to mid-season. Originated in USA by Nuccio's Nurseries, Altadena, California. Their #7702. Plant growth is upright, dense and rapid with dark green leaves, 3.8 cm. x 2 cm. Originally listed as a mutant, but corrected in ACS., 1987, *The Camellia Journal*, vol.42. No.1, p.17. Chinese synonym: 'Wuyue'.

Misty Morn. *(C.japonica)*, *New Zealand Camellia Bulletin*, 1982. vol.XII, No.7, p.52, Reg. No.187: A seedling of unknown parentage, originated by Mr & Mrs H. Peters, Tauranga, New Zealand. It first flowered, 1979 on a 10 year old plant. Leaves are dark green, 10 cm long x 4.3 cm wide. The formal double flower, 7.5 cm across x 3 cm deep has 55 petals; outer petals. pale pink on edges, fading to white towards the base. The inner petals are white and show a pale pink tinge. Outer petals rounded, inner more pointed. Blooms mid-season to late.

Misty Sunrise. *(C.japonica)*, *New Zealand Camellia Bulletin.* 1970, vol.VI, No.7, p.32, Reg. No.47: A chance *C.japonica* seedling, originated by B.J. Rayner, Stratford, New Zealand, that first flowered 1967. Plant habit is upright, dense and medium. The foliage is dark green. 9 cm long x 5 cm wide. The flower is "sweet pea" type. with the 28 petals from primrose yellow on the hafts to deep red on the outer edges. The flower form is peony, 9 cm across x 7.5 cm deep.

Misu Keiko. Different reading for **Miss Keiko.**

Misu-no-uchi. (see below), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* White splashed pink. Large. According to Satomi. 1958, the name means "The inside of a Bamboo Blind" and refers to ancient times when a bamboo blind was used to screen the seat of a sacred or holy person. Originated in Japan.

Misu-no-uchi. (Inside a Bamboo Blind), *(C.rusticana)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.145, colour photo, p.249, description: Soft pink semi-double, with 13-15 petals, oblong, channelled, slightly notched; outer rows reflexed, inner semi-erect with a small, compact

stamen column, deep yellow anthers, white filaments. Late blooming. See colour photo, p.300, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Kantô area, Japan.

Misu-no-uchi. (Inside a Bamboo Blind). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.249 with colour photo; English translation p.175. Large, palest pink, lotus-form semi-double. Late flowering. Leaves elliptic, medium to large, margins curved outwards. Upright, vigorous growth. Collected by Chôka Adachi, named by him around 1960. From Tokyo.

Misuzu. (Sweet Voiced Bell), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.102, colour photo and description: Small size, pale peach pink. wide campanulate single of 5 ovate petals, overlapping. reflexed. and a central stamen column with white anthers, joined for the lower third. and yellow anthers. Blooms mid-season to late. Leaves deep green, broad-ovate to elliptic, apices acute, margins shallowly serrate. Originated in the Okayama Prefecture, Japan. Collected by Seiichirô Sasai, released by Nobuo Sasai in 1978.

Misyô. Watanabe. 1970, Kyôto Engei Kurabu, *Tsubaki*, *Tokushû*, No.10, p.145. Different reading for **Mishô.** Synonym: 'Iso-seiôbo'.

Mitchell's White. *(C.japonica),* Fendig. 1953, *American Camellia Catalogue.* No description. Originated in USA.

Mitior. *(C.japonica),* Alex Verschaffelt, 1846, Catalogue, p.56. No description. Originated in Belgium. (Believed extinct.)

Mitissa. *(C.japonica).* Fendig, 1953, *American Camellia Catalogue.* White. Incomplete double. Mid-season. *American Camellia Yearbook*, 1954, p.325, Reg. No.153: A seedling of unknown parents. originated by Dr Gilbert E. Fisher, Birmingham, Alabama, USA, which first flowered 1949. Plant growth is upright and rapid. Flowers incomplete double, similar to **Nobilissima,** 11-12.5 cm. across. Colour white. Blooms mid-season.

Mitono. (Place Name). *(C.japonica),* Yamaguchi Tsubaki-en Catalogue, Kyôto, 1991-1992: Originated by Hiroshige Hayakawa, Aichi, Japan. Medium to large, cup-shaped single of light lavender pink, fading to white at the base. Leaves light green, similar to **Ballet Dancer,** of which is thought to be a seedling. Seibu Maizuru Institute of Botany, 1993-1994, *Seibu no Tsubaki:* Bright pink, fading to white at petal base. Single, cup-shaped. Blooms early.

Mitronessa Vera. Volonte Catalogue.1888, p.13. Orthographic error for **Mitronesson Vera.**

Mitronesson. *(C.japonica).* Van Houtte Catalogue. 1843-1844, 12:aa, as 'Metronesson': Globe-shaped. shell-like flower; Colla, 1843, *Camelliografia*, p.114. illustration: Originated by Burnier & David from seed obtained from Isola Bella. An irregular, complete double, 9-10 cm across, of intense rose colour. The flower consists of multiple petals, round-oval; the interior lightly margined, in multiple rows, those exterior, regular and somewhat convex, while the interior ones are small and in irregular tufts. Orthographic errors: 'Metronesson', 'Mitronessa', 'Metronessa', 'Metrone Son', 'Mitronessor', 'Metronessen'. Synonym: 'Mitronesson Nova'.

Mitronesson Nova. Burdin Maggiore & Co. Catalogue, 1856-1857. Synonym for **Mitronesson.**

Mitronesson Vera. *(C.japonica),* Isola Madre Catalogue, 1845. No description. Fratelli Rovelli, 1852, Catalogue, p.22: Large, imbricated, transparent, shining red with broad white border. A Rovelli introduction. Franchetti, 1855, *Collezione di Camelie*, p.46: Imbricated; light transparent red with wide, white stripes. Verschaffelt, 1858, *Nouvelle Iconographie*, Book VII, pl.IV as 'Metronesson'(Vera): Of Italian origin, its blossoms of medium size, present, in their most numerous and small, rounded petals, the most regular imbrication; they are of a vivid pink colour, somewhat paler in the intermediate part, with numerous, wide, pure white bands which form multiple rays. Orthographic errors: 'Metronsson Vera', 'Matronesson Vera', 'Metronessa Vera'.

Mitronessor. Torsanlorenzo Nursery, 1984-1985. Orthographic error for **Mitronesson.**

Mitsuhime. (Honey Princess), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.146, colour photo, p.250, description: Small, white, single, opening ball shaped with a solid, central stamen column. Leaves, broad-elliptic , glossy, dark green, prominent venation, apex, blunt acute, round base, shallow, obscure serrations. Blooms mid-season. See colour photo, p.15, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Hirado City, Nagasaki Prefecture, Japan. Discovered by Mamoru Oda in 1975, named and released by Saburô Kumazawa.

Mitsuo. (obscure), *(C.japonica)*, Okumura, ca 1810, *Chinka Hin'i.* No description. Originated in Japan. (Believed extinct.)

Mitt Carter. *(C.japonica)*, *American Camellia Yearbook*, 1986, p.93, Reg. No.1994: A medium to large, blush pink single *C.japonica* chance seedling, flowering early to mid-season. Originated by Mrs Herman Johnson, Madison, Florida, USA. The 9 year old seedling first flowered 1982. Average flower size is 8.5 cm across x 5 cm deep. Plant growth is upright and medium with dark green leaves, 10 cm x 4.5 cm.

Mittie Golden. *(C.japonica),* Griffin, ed., 1956, *Camellian*, 3:22. No description. Originated in USA.

Mitsu-no-shina. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki*, *Tokushû*, No.10, p.145. Different reading for **San-no-shina.**

Mittu-no-shina. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.57. Different reading for **San-no-shina.**

Mitzi. *(C.japonica)*, Camelliana Nursery Catalogue, 1961-1962, p.1: Full semi-double with blooms varying from blush to soft pink, deep pink and rose, with occasional markings of deep red. SCCS., 1964, *Camellia Nomenclature*, p.88: Blush, through soft pink, deep pink to rose-pink, occasionally marked dark red. Medium sized, semi-double. Originated in USA at Camelliana.

Miu. (Beautiful Wings. *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.160 with colour photo; Very pale pink bordered peach red. Large formal double, outer petals slightly reflexed, inner petals upstanding. Flowers mid-season to late. Leaves elliptic, somewhat large. Upright to spreading growth. A cross of **Prima Ballerina** x 'Princess Masako' (**Masakohime**), named and released by Soshin Hirai, Saitama Pref., Japan in 2003.

Miura-kazaguruma. (Miura Windmill), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.395, colour photo and description: Small to medium size, light red, spiral-shaped, formal double with 5 spiral arms like a windmill shape, and pointed petals with a touch of white at the point. Blooms mid-season to late. Leaves mid-green, elliptic. Originated by Miura, Kunio in Sakaiminato City, Tottori Prefecture, Japan. Synonym 'Hôkiguruma'.

Miura-otome. (Miura Maiden), *(C.japonica)*, Satomi, 1956, *Camellia Varieties of Japan*, p.9: Soft rose-pink, semi-double. Mid-season blooming. See colour illustrations: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.101, p.173. Tuyama, 1968, *Camellias of Japan*, pl.120, p.60. Satô, 1975, *Chûbu no Tsubaki*, p.86. Andoh, 1971, *Tsubaki*, *Meika no Shôkai to Saibai*, pl.104, p.37. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.402, p.169. Seibundô Shinkôsha, 1979, *Senchinshû*, p.144. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.392: Soft pink, (Camellia Rose 622/1-2) semi-double, with 4-5 rows of petals, rounded, slightly reflexed giving an hose-in-hose effect, the centre 4 or 5 petals, small, semi-erect, somewhat pointed, crinkled with faint, white streaks at the base. A small, irregular group of short stamens are exposed when fully open. Leaves, light green, thick, flat, ovate, slightly acuminate, margins crenate. Late blooming. (Tuyama, 1968). Said to have originated on the Miura Peninsula, Kanagawa Prefecture, Japan, and been named by Prince Chichibu around 1930. Chinese synonym 'Sanpu Yinü'.

Miura-wabisuke. (Miura's Wabisuke), (Wabisuke). Nagoya Camellia Society Bulletin, 1986, *Tsubaki*, No.19: Originated by Isamu Miura as a chance seedling of **Hagoromo** believed pollinated by

Tarôkaja. A wabisuke type, miniature single red flower with degenerate white stamens. Pubescent ovary. Resembles **Beni-wabisuke.** Blooms mid-season. Originated in Japan.

Miwo-tsukushi. Different reading for **Miotsukushi.**

Mixta Flore Plena Variegata. *(C.japonica),* Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani as 'Mixta. Fl. Pl. Variegato. No description. Originated in Italy. (Believed extinct.)

Mixue. (Rice Snow), Gao, Jiyin, 30 July 1990. Chinese synonym for the Caerhays hybrid **Cornish Snow.**

Miy Ako No Nishiki. Nobelius Nursery Catalogue, 1941. Corruption of the Japanese name **Miyako-nishiki.**

Miya. *(C.japonica),* Nuccio's Nurseries Catalogue, 1950-1951: Light pink, semi-double. Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I, pp.242, 243: Flower, semi-double, dawn pink 523/3; 8 cm across x 3 cm deep. Petals about 10, some folded almost double, irregular notching and marginal outlines, 4.25 cm long x 3-3.5 cm wide, crisp texture. The centre of the flower is a widespreading sunburst of long stamens, white filaments, large golden anthers. Leaves ovate, 6-7 cm long x 4-4.5 cm wide, dark, glossy green upper surface, lighter beneath, slightly stiff, leathery texture; broad, sharp, shallow serrations; short pointed apices, inconspicuous venation. Plant habit upright, loose branching. Mid-season blooms. Synonyms: 'Edith Nichols', 'Davis Pink', 'Pinkette'. An unnamed Japanese cultivar imported by Mr Uyematsu, Star Nursery, Montebello, California. It was also distributed under the name 'Edith Nichols'. See Williams & Thompson, 1950, *American Camellia Yearbook*, pp.45, 47, and, while it cannot positively be determined as to which name has priority, **Miya** has been selected due to wide-spread usage. No Japanese camellia of the name 'Miya' has been located.

Miya. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.421; Chinese synonym for the USA *C.japonica* **Cara Mia.**

Miyabi. (Elegance), *(C.rusticana),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.299, colour photo and description: Large size, white, with a very pale pink cast, hose-in-hose semi-double with 14-16 rounded petals in 3 rows, and a slender stamen column with white filaments and yellow anthers. Blooms mid-season to late. Leaves mid-green, elliptic, apices acuminate, recurved, margins serrate, rolled. Presumed to be a seedling of **Hagoromo.** Originated in the Ehime Prefecture, Japan. Named and released by Tokihiro Kôno in 1982.

Miyagii. van der Vis, Boskoop, Special Camellia List, 1964-1965. The species *Camellia miyagii* (Koidz.), Makino & Nemoto, (1931).

Miyagino. (Palace Courtyard), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Deep persimmon red with white dapples, large size, vase-shape. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû,* No.5, p.78. Originated in Japan. (Believed extinct.)

Miya-hime. (Princess Miya). *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.128. No description. From Kurume city, Japan.

Miyaka-dori. Fendig, 1952, *American Camellia Catalogue.* Corruption of Japanese name **Miyakodori.**

Miyake-chidori. (Miyake's birds), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.147, colour photo, p. 150, description: Medium sized, soft, pale pink single with 5 long, oblong, pointed petals, slightly notched at the apex, opening reflexed campanulate. Leaves dull, dark green, elliptic, shallowly crenate. Blooms mid-season. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.96, colour photo. Originated in Kantô, Japan. This was selected from wild camellias in Izu Miyake Isle. Named and released by Takeo Ogawa in 1979.

Miyake-kotohime. (Miyake's Harp Princess), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.162, colour photo and description: Small size, red, open, vase-shaped single, with 5 rounded, ovate petals and a central stamen column, ivory to pinkish filaments, joined for the lower third, and yellow anthers. Blooms early to mid-season. Leaves deep green, elliptic, apices caudate, margins serrate. Selected from wild japonicas growing on Miyake Island, Japan. Collected and released by Takeo Ogawa in 1979.

Miyake-kozakura. (Miyake's Small Cherry), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka* p.121, colour photo, p.120. description: Medium size, pale pink, open, cup-shaped single of 5 rounded emarginate petals with some crinkling at their apex, and central stamen cylinder with white filaments, joined for the lower half, and yellow anthers. Blooms mid-season. Leaves dark green, lanceolate, apices long-acuminate, recurved, margins shallowly serrulate. Selected from wild japonicas growing on Miyake Island, Japan. Named by Noboru Nagahama in 1985, released by Takeo Ogawa.

Miyake-murasaki. (Miyake's Purple). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.253 with colour photo; English translation p.178. Medium size, purplish red, tubular single, cylindrical stamen column. Flowers early to late. Flowers of mature trees on Izu Ôshima Island show fairly good purple colour for one day during their blooming period. Leaves ovate, medium size. Upright, vigorous growth. Selected from wild japonicas from Miyake Island. Named and released by Takeo Ogawa in 1985. From Miyake Island to Izu Ôshima.

Miyako. (Metropolis), *(C.japonica)*, Mizuno, Motokatsu, 1681, *Kadan Kômoku; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.252: Semi-double white with blush pink and red markings. Originated in Japan. (Believed extinct.)

Miyakobeni. (Red Metropolis), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô* Deep red, semi-double, with 3 rows of petals, vase-shape, medium to large size. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.78. Originated in Japan. (Believed extinct.)

Miyakobeni. (Red Metropolis), *(C.japonica)*, Takii & Co. Ltd. Mar.1955, *Engei Shinchishiki:* Large red. Originated in Japan.

Miyakodori. (Seagull), *(C.japonica)*, Yashiro, 1841, *Kokon Yôrankô*, vol.311; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* Itô, Ko'emon, 1879, *Chinkashû:* Snow-white, double, large size. Tuyama, 1966, *Camellia Cultivars of Japan*, pl.58, p.104: White. Large, hose-in-hose semi-double with long, channelled petals. Slow, upright growth. Stamen column, narrow, white filaments, pale yellow anthers. Leaves, long elliptic to lanceolate, shiny green, apex, reflexed acuminate, side folded under, serrations shallow and coarse. Originated in Kantô, Japan. This was one of the three birds with "Yobukodori" and "Inaoidori", from ancient times. For colour illustrations see: Satô, 1975, *Chûbu no Tsubaki*, p.82. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.125, p.42. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.239, p.114. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.105. Seibundô Shinkôsha, 1979, *Senchinshû*, p.147. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.296. Synonyms: 'Magnoliiflora Alba', 'Snowdrift', 'Magnoliaeflora Bianca', 'Yobukodori-Kansai'. Orthographic errors: 'Myako Dori', 'Mijako Dori', 'Miyaka Dori'.

Miyakodori-Nagoya. (Nagoya Gull), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.71, p.36, description, p.106 as 'Miyako-dori-Nagoya': Leaves narrowly elliptic or narrowly obovate-elliptic, suddenly acuminate; petals smooth. Flowers, white, double with rounded petals. Inner petals smaller and sub-erect with a shade of yellow at the base. Late blooming. Originated in the Aichi Prefecture, Japan.

Miyakohime. (Metropolis Princess). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.254 with colour photo; English translation p.179. Miniature, pink, semi-double. Flowers mid-season. Leaves elliptic, miniature size, dull. Upright growth, somewhat dwarf, vigorous. A cross between *C.japonica* **Miyakodori** and *C.hybrid* **Tiny Princess.** From Osaka.

Miyakomeguri. (Tour the Metropolis), *(C.japonica),* Iwasaki, 1828, *Honzô Zufu,* p.14: This flower has large, white petals with pink dapples. Double. Originated in Japan. (Believed extinct.)

Miyako-nishiki. (Brocade of the Capital), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* Large, light pink, single. Originated in Kumamoto Prefecture, Japan.

Miyako-nishiki. (Brocade of the Capital), *(C.sasanqua),* Chûgai Nursery Catalogue, 1938-1939, p.20: White with red vertical variegation. Early flowering. Originated in Japan.

Miyako-no-haru. (Metropolis Spring), (Higo), Yoshimura, 1961, *Higo Tsubaki, Meikan:* Light pink with medium sized leaves. Hiratsuka, 1964, *Higo Camellia,* pp.12, 14: Dark rose-pink, 8 cm across with 6 petals and 70 light yellow stamens in a circle. Blooms mid-season to late. Originated in Kumamoto Prefecture, Japan. Colour illustrations: Tuyama, 1968, *Camellias in Japan*, pl.168, p.84. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.157, p.54. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.34, p.49. Macoboy, 1981, *The Colour Dictionary of Camellias,* p.139. Seibundô Shinkôsha, 1979, *Senchinshû,* p.147. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.154. Resembles 'Higo-goshoguruma', **Sakuragari** and **Sakura-tsubaki.** Corruption of Japanese name: 'Miyaku-no-haru'.

Miyako-no-haru. (Metropolis Spring), *(C.sasanqua),* Sakata & Arisumi, 1983, *International Camellia Journal*, p.22. No description. Hakoda, JCS., 1987, *Tsubaki*, No.26, p.45; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.35: Medium size, vivid pink. single. Blooms early. Originated in Kumamoto Prefecture, Japan. Synonym: 'Miyako-sugata'. Corruption of the name: 'Miyakuno-haru'.

Miyako-no-nishiki. (Metropolis Brocade), *(C.japonica),* Itô, Ko'emon, 1879, *Chinkashû:* White, striped pink, single. Fendig, 1953, *American Camellia Catalogue:* Large, white, variegated, single, 10-11 cm across. The colour is variable, ranging from white with occasional pink stripe to rose. There are 5-6 irregularly shaped petals, which are notched and wavy. The central stamen cluster is small. Filaments are white and stamens yellow. Leaves, dark green, 8 cm, x 4 cm, glossy, margins wavy, tip reflexed on a plant of slow, bushy growth. Sports: **Miyako-no-nishiki Rosea, Shiro-ezo-nishiki.** Corruption of Japanese name: 'Miy Ako No Nishiki'. Originated in Kantô, Japan. A sport of **Ezo-nishiki.** For colour illustration see: Yokoyama, 1975, *Gendai Tsubaki Meikan,* p.221; Seibundô Shinkôsha, 1979, *Senchinshû*, p.147.

Miyako-no-nishiki Rosea. *(C.japonica),* SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.50: Light pink sport of **Miyako-no-nishiki.** Originated in USA. See black and white photo, p.242, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Miyako-ôji. (Prince of Metropolis), *(C.hybrid),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.29: Very small size, vivid pink, semi-double. A seedling of *C.japonica* **Miyakodori** x **Tiny Princess.** Originated in the Ôsaka Prefecture, Japan.

Miyako-osaraku. (Kyôto Pleasure of a Long Life), (Higo), Taniguchi, 1912, *Chinka Kôdkan;* Hiratsuka, 1964, *Higo Camellia,* pp. 12, 18: Light pink, medium sized single. Thick, fleshy petals, stamens wide spreading, filaments yellowish white, pistil pale red. Mid-season blooming. Originated in Kumamoto Prefecture, Japan.

Miyako-shibori. (The Capital, Dappled), *(C.japonica),* Katayama, Sadayuki, Kyôto Engei Kurabu, 1967, *Tsubaki Tokushû,* No.8: Very large size, single, with 6-7 petals; white with red dots, occasionally large spots. Late blooming. Originated in the Kansai area, Japan.

Miyako-sugata. (Metropolis Aspect). Hakoda, JCS., 1987, *Tsubaki,* No.26, p.45. Camellia Forest Nursery Catalogue, 1988, p.2. Synonym for **Miyako-no-haru.**

Miyako-tsubasa. (King of the Capital), (Higo), Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, p.59. No description. Originated in Japan.

Miyako-wasure. (Forgetting City Life). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.254 with colour photo; English translation p.179. Small, red single, cupped petals, cylindrical stamen column. Flowers mid-season to late. Leaves elliptic, small. Upright, vigorous growth. A natural seedling of unknown parentage. Originated and released by Fumio Naitô in 1997. From Aichi Prefecture.

Miyaku-no-haru. Nuccio's Nurseries Catalogue, 1974-1975. Corruption of Japanese name **Miyako-no-haru.**

Miyama. Different reading for **Misan.**

Miyama-benten. (Miyama's Benten), *(C.rusticana),* Inazawa Nurseries Co. Ltd Catalogue, 1986-1987, p. 10, A-486: Irregular, peony form, medium size, peach red. Leaves have a variegated margin. Originated in Japan. Different reading: 'Bizan-benten'.

Miyamagi. (Tree of Deep Mountains), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô;* Itô, Jukyû, 1739, *Honzô Hanamaki'e;* Yashiro, 1841, *Kokon Yôrankô,* vol.306; Kasuya Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Formal double, large red flower with some white spots like a paper cord. Originated in Japan. Different reading: 'Miyama-no-ki'. (Believed extinct.)

Miyama-no-hikari. (Brilliance of Deep Mountains), *(C.japonica),* Inazawa Nurseries Co. Ltd. Catalogue, 1986-1987, p.3, A-153: Dark red, single, tubular blossom. Small sized. Late blooming. Highly prized for cut flowers. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p. 162: Leaves mid-green, broad-ovate. Originated in Saitama Prefecture, Japan. Named and released by Yoshizawa Chinju'en Nursery around 1965.

Miyama-no-ki. Different reading for **Miyamagi.**

Miyama-sazanka. Japanese name for *C.gracilis*, Hemsl. Synonym: 'Shima-tsubaki'.

Miyama-shibori. (Deep Mountain Dapple), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki. Irohanayose Irotsuki:* Pink with red spots, single, early blooming; cylindrical stamens. See JCS., 1969, *Tsubaki*, No,7, p.31. Originated in Japan.

Miya-no-e. (Temple Inlet), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.250: Bright pink, single, spherical form bloom with stamens obscured by petals. Small size. Early to mid-season flowering. Leaves medium sized, oval to obovate, acuminate, undulate, apex recurved. Plant habit upright and vigorous. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.108 as 'Miyanoe'. Resembles **Dainichi-no-akebono.** Originated in the Ishikawa Prefecture, Japan. Named and released by Ishikawa Camellia Lovers Club.

Miya-no-ura. (Place Name – 'Shrine Bay'). *(C.macrocarpa). "Camellias in Kurume",* ICS Congress, Kurume 2010, p.115. No description. From Yakushima, Kagoshima Pref., Japan.

Miyarabi. (Sweetheart). *(C.japonica),* Hiroshi, Matsuda, Okinawa; JCS 1994, *Tsubaki*, No.33, p.35: Bright red, wabisuke-type, small campanulate single, rare in Okinawa. Blooms early. Leaves medium sized, elliptic. Shrub is spreading with average growth rate. Selected from *C.hozanensis* in the wild.

Miyasuhime. (Miyasu Princess), (*C.japonica* x *C.lutchuensis),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.148, colour photo and description: Small size, pink, veined deeper pink, single with 5 uneven, rounded petals and a central stamen cylinder, with ivory filaments joined for the lower half, and yellow anthers. Blooms mid-season to late. Leaves deep green, oblong-ovate to lanceolate, margins serrate. A seedling of *C.japonica* **Tôkai** x *C.lutchuensis.* Originated in the Niigata. Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.255 with colour photo; English translation p.179. Miniature, deep red (photo shows a pink flower), single, round petals, cylindrical stamens, fragrant. Stated to be a cross between **Kikôshi** and *C.hiemalis*. Named and released by Kaoru Hagiya in 1970.

Miyasuzume. (Palace Sparrow). *(C.japonica),* JCS, 1997, *Japan Camellia*, No.54, p.4, color illustration front page: Trumpet shaped, very pale pink, small single of 5 petals, often with edges folded in and a short, broad stamen column with yellow anthers. Pink buds. Leaves elliptic, deep green. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.254 with colour photo; English translation p.179. Flowers early to mid-season. Upright growth. A cross between **Momosuzume** and **Shibori-hatsu'arashi.** Originated by Nobuo Sasai in 1984, released in 1997.

Miyata-benten. (Miyata's Benten), (*C.japonica*), Itô, Ko'emon, 1879, *Chinkashû:* Pink. Small single with variegated leaves. Originated in Japan.

Miyata-maedachi-otome. (Miyata's Outstanding Maiden), Mizuno, 1829, *Sômoku Kinyôshû*, in the white variegated leaves section. Different reading for **Mumeimiyata-maetachi-otome.**

Miyiki. Hakoda, JCS., 1987, *Tsubaki*, No.26, p.49. Misprint for 'Miyuki' as synonym for the *C.hiemalis* **Hi-otome-sazanka.**

Miyilu. (Beautiful Girl). *(C.reticulata),* China Regn No.14. *China Flowers & Horticulture,* Apr 2007, No.14, p.50, with colour photo; Originated by Zhang Yuekun, Kunming, Yunnan, China. Selected from a group of *C.reticulata* seedlings in 1985 and propagated since.Flowers rose form double, deep peach red, 9-12 cm diameter. Petals flat, inner petals smaller and often with white stripes. Stamens as petaloids. Leaves long elliptic to broad lanceolate, 9-11 cm long x 4-5.5 cm wide, margins fine serrate, upper surface bubbled. Flowers mid-season to late.

Miyo-hagoromo (Miyo's 'Hagoromo') (*C.japonica*) from Ibaragi Pref. *Japan Camellia* No.81, August 2006: Pale pink, lotus form double, cylindrical stamens, diameter 13 cm, blooming in April. Named after an acquaintance of the originator. A crossing of **Lily Pons** × **Hagoromo.** First flower seen in 2001. Originated and named by Kunimitsu Suzuki.

Miyoko. (Female Given Name), (*C.rusticana*), Izu Ohshima Hawaii Botanical Gardens, 1980, List of plants, p.18. No description. Originated in Japan.

Miyo-nishiki. (Brocade of the Modern Reign), (*C.japonica*), Katayama, 1960, *Tsubaki to Ochabana:* Medium sized, campanulate single with flag-like petaloids. White, with cherry-red stripes, 6-7 petals, an irregular centre of petaloids and stamens. See pl.317, *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.141. Different reading 'Miyo-no-nishiki'. Originated in Kansai area, Japan.

Miyo-no-haru. (Spring of the Reign). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.107 with colour photo; Very large pink peony form, outer petals large, inner petals smaller. Flowers early to mid-season. Leaves broad-ovate, medium to large. Spreading, vigorous growth. Selected from seedlings of **Miyo-no-sakae.** Named and released by Shunsuke Hisatomi, Fukuoka Pref., Japan in 2007.

Miyo-no-homare. Different reading for **Miyo-no-sakae.**

Miyo-no-nishiki. Satomi, 1962, *Supplement to Camellia Varieties of Japan.* Same characters as **Miyo-niskiki.**

Miyo-no-sakae. (Prosperity of Modem Reign), *(C.japonica),* Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.222, black and white photo: Pale, blush pink, with deeper pink blotched, single, 6-7 large, overlapping, waved petals, the outermost with a pink reverse. Large cylinder of stamens, pale yellow anthers, whitish filaments. Leaves, small, lanceolate, finely, sharply serrate margins, acuminate apex and rounded base. Originated in Kurume, Fuku'oka Prefecture, Japan. Different reading: 'Miyo-no-homare'. Colour photos: Tsutomu Suzuki, 1984, *Chabana Koyomi, Vol.I, Tsubaki,* p.50. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.103. For botanical drawings, colour photo and description see pp.56-59, Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû,* No.11.

Miyo-no-sakae. (Prosperous Reign). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.256 with colour photo; English translation p.180. Medium size, pink with red shading on the outer petals, bowl-shaped single. Flowers early to mid-season. Leaves broadly elliptic, somewhat large, flat. Somewhat spreading growth, vigorous. A cultivar at a shrine in Kumamoto Prefecture. Named and released by Mikio Akashi in 1965. From Kurume.

Miyo-renji. Fendig, 1953, *American Camellia Catalogue.* Corruption of the Japanese name **Myôrenji.**

Miyoshino. (Place Name), *(C.japonica),* Okumura, ca.1810, *Chinka Hin'i; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.622: Medium sized, white, open peony form with erect centre petals. Originated in Japan. (Believed extinct.)

Miyue. Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for Nuccio's *C.nitidissima* hybrid **Honeymoon.**

Miyuki. Different reading for **Gokô.**

Miyuki. Synonym for **Hi-otome-sazanka.**

Miyuki. (Deep Snow), (*C.rusticana*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.147, colour photo, p.250, description: Semidouble, Palest pink changing to white, opening cup-shaped, 2-3 rows of rounded, crinkled petals, somewhat cleft at the apex. Leaves, dull, olive green, obovate, blunt acute, finely, shallowly serrate. Originated in Ôyama Town, Kamishinkawa District, Japan. Named and released by Mitsuroku Makino. Note: Characters different to 'Miyuki' above where they translate as "Imperial Visit".

Miyuki-nishiki. (Brocade for Imperial Visit), *(C.japonica),* Chûgai Shokubutsu Yen, 1934-1935, p.32: White and purplish crimson (Crimson 22-22/3) variegation on a pink ground, Single. Very early flowering. Central stamen column, yellow anthers, creamy filaments. Leaves elliptic, shiny dark green, finely acuminate, thick, serrulate. For colour photos see: Tuyama, 1968, *Camellias of Japan*, pl.322, p.163. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.14, p.6. Seibundô Shinkôsha, 1979, *Senchinshû* describes this as a synonymous with **Tatsuta-nishiki.** Originated in the Kansai area, Japan.

Miyuki-nishiki. (Brocade for Imperial Visit), *(C.sasanqua),* SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.70: Rose-red with purplish cast, white margins. Single. Medium size. Originated in Japan. Corruption of Japanese name: 'Myuki-nishiki'.

Miyuki-nishiki-Kansai. Yokoyama & Kirino, 1898, Nihon no Chinka, p.277. Synonym for **Tatsuta-nishiki.**

Miyuki-sarasa. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki, Tokushû*, No.10, p.145. Synonym for Edo-tsubaki. See Kyôto Engei Kurabu, 1965, *Tsubaki Tokushû*, No.6, p.127.

Miyukizakura. (Higo) C. Aust, *Camellia News*, No.180, Winter 2009, p.26. Colour photo, but no description.

Mizar. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.130 with colour photo; Medium to large, anemone to peony form, white with petaloids streaked and blotched with red (RHS.CC.53B). A seedling of 'Pomponia Semiplena' **(Pomponia Semi-duplex)** x **Alba Simplex,** first flowered in 1987. Originated by Dott. Guido Cattolica, Livorno, Italy.

Mizuchaya. (Water Teahouse), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Listed in early blooming section. True red, with white spots, occasionally self red, single. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.79. Originated in Japan. (Believed extinct.)

Mizuguruma. (Water Mill), *(C.sasanqua),* Itô, Ihei, 1695, *Kadan Chikin Shô* in section on sasanqua as white, small, single with 7 petals. Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.12 as 'Mizu-guruma': White. Small, single to semi-double. Originated in Japan.

Mizuguruma. (Water Mill), *(C.japonica)*, Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.15; Yashiro, 1841, *Kokon Yôrankô*, vol.310; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White, large size, semi-double, 3-4 rows of petals, crimson splashed variegation. Originated in Japan. Similar to 'Fukuyamagi'. (Believed extinct.)

Mizuhiki. (Paper cords for tying gifts), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.181, 296; Yashiro, 1841, *Kokon Yôrankô*, vol.310: Medium sized, red, peony form with white markings and a confused centre of stamens and petals. (Believed extinct.) Originated in Japan.

Mizu-no-de-hazama-no-hu. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, p.145. Different reading for **Mizunode-ai-no-fu.**

Mizunode-ai-no-fu. (see below), *(C.japonica)*, Mizuno, 1829, *Sômoku Kinyôshû:* Bluish leaves with white variegation. White flower with pink stripes, single. Large size. "Ai-no-fu" is old Japanese for marble-like variegation. The modern reading is 'Mizunode-hazama-no-fu'. (Believed extinct.)

Mizunode-idaten. Mizuno, 1829, *Sômoku Kinyô-shû.* See Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.164. Possibly synonymous with **Idaten-tsubaki.**

Mizunode-kifu. *(C.japonica)*, Mizuno, 1829, *Sômoku Kinyôshû:* Mizuno's yellow variegated leaf camellia. Large leaves with yellow variegation. Originated in Japan. (Believed extinct.) Different reading: 'Mizu-no-de-kihu'.

Mizu-no-de-kihu. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No,10, p.145. Different reading for **Mizunode-kifu.**

Mizu-no-de-mizulada-tsubaki. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.145. Different reading for **Mizunode-suichu-tsubaki.**

Mizunode-shuchûka. (Mizuno's Shuchûka), *(C.japonica)*, Mizuno, 1829, *Sômoku Kinyôshû*, in the section of margined leaves. Long leaves with bluish edges. Flowers white with red margins. Originated in Japan. (Believed extinct.)

Mizunode-suichu-tsubaki. *(C.japonica)*, Mizuno, 1829, *Sômoku Kinyôshû:* in the section on white, variegated leaves. Round leaves with small and large spots. White with a pinkish tinge flowers, single. "Mizuno, Tadakatsu" is the authors family name, "Suichû" is his calling according to himself. Originated in Japan. Different reading: 'Mizu-no-de-mizutada-tsubaki'. (Believed extinct.)

Mizushima. (Water Island), *(C.japonica)*, Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.145 as 'Mizu-shima'. No description. Originated in Japan.

Mizu-tada-tsubaki. Watanabe,1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.145. Abbreviation for 'Mizunode-mizutada- tsubaki', different reading for **Mizunode-suichu-tsubaki.**

Mizutama. (Water Treasure), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Single, sake-cup shape, white with red streaks. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.77. Originated in Japan. (Believed extinct.)

Mizuyoshi. (Place Name), (*C.rusticana*), Hagiya & Ishizawa, 1968, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.9, p.58, illustration, pp.9,10: White double to open peony form, 6-8 cm across, with 19-32 long, oval petals, slightly notched, both edges incurved inwards, in 3 rows with a small, slightly irregular stamen cluster, approximately 70, filaments yellow. Leaves, long, oval, dark green, acuminate and finely serrate. Fragrant. Collected at Nakakubiki-gun, Niigata Prefecture, Japan in 1960. Named and released by Kaoru Hagiya in 1968. For colour illustrations see: Andoh, 1971, *Tsubaki*, *Meika no Shôkai to Saibai*, pl.184, p.61. Seibundô Shinkôsha, 1979, *Senchinshû*, p.145. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.293.

Mlle Caroline. *(C.japonica)*, Cachet Catalogue, 1845-1846, p.3. No description. Originated in France. (Believed extinct.)

Mlle de Libert. Berlèse, 1840, *Monographie*, ed.2, p.196. Synonym for 'Sckrimakersii' (**Schrynmakersii**).

Modern Art. *(C.japonica)*, *New Zealand Camellia Bulletin*, 1973, vol.VIII, No.3, p.24, Reg. No.81: A chance seedling of *C.japonica* **Odoratissima** that first bloomed 1968. Originated by Ida Berg, Whakatane, New Zealand. The plant has a vigorous, dense habit with mid-green leaves, 8 cm x 4.5 cm. The bloom is anemone form with 16-18 petals and numerous petaloids. The flower is heavily variegated, RHS., 54A, with many long lines and spots of colour, some lighter. Stamens have gold anthers and white filaments. Chinese synonym: 'Xiandai Yishu'.

Modern Kumagai. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.138. Synonym for **Imakumagai.**

Modesta. *(C.japonica)*, Herbert, 1837, *Amaryllidaceae & Suppl.*, p.368: From Waratah'(**Anemoniflora**) x 'Striped' (**Variegata**). A flower nearly regular, of a delicate, purplish pink. Originated in England. Synonym: 'Hebe'.

Modesta Rosea. *(C.japonica)*, Oudin, Lisieux Nursery Catalogue, 1845-1846, p.46. No description. van Houtte Catalogue, 1845-1846, 219. No description. Originated in Germany by Gruneberg, Frankfurt. (Believed extinct.)

Modesta Rubra. *(C.japonica)*, Oudin, Lisieux Nursery Catalogue, 1845-1846, p.46. No description. van Houtte Catalogue, 1845-1846, p.218. No description. Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*, vol.40, p.129: Flower, 10-11 cm across, formal double, of bright rose-red with touches of the colour of **Andersonii.** Petals in 5-6 rows, thin, clear, notched, with fine veins of vivid red, not well imbricated; the centre consists of stamens and pistil. Originated by Gruneberg, Frankfurt, Germany.

Modestie Généreuse. *(C.hybrid)*, Originated and propagated by Alain Jouno. Registered by Parc Botanique de Haute Bretagne, Le Chatellier, France. A 4 year old plant, first flowered 2013. Parentage unknown. To be further propagated by a nursery. Single flower, 8cm diameter x

5cm deep, colour pink at edges, lighter at centre. Some white variegation patches. Stamens tubular, anthers yellow, filaments ivory. Flowers early and for a long season. Flowers fall whole. Plant is erect with rapid growth rate. Leaves dark green, flat, 8cm x 4cm.

Modesto. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue:* Pink. Incomplete double. Mid-season. *American Camellia Yearbook*, 1954, p.325, Reg. No.121: A 13 year old seedling of unknown parentage. Originated by the Riverbank Camellia Nursery, Riverbank, California, USA that first bloomed 1944. Growth is upright and compact with dark green leaves, rounded and serrated. Flowers are incomplete doubles with petaloids, similar to **Elegans,** with 11 petals and many petaloids; 8.5 cm across. Colour light rose. Flowers mid-season. Sport: **Modesto Rubra.**

Modesto Rubra. *(C.japonica)*, Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.161: Red, anemone form sport of **Modesto.** Originated in USA. The name is illegal according to the Nomenclature code as it uses Latin after 1958.

Modesty. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue, 1944-1945: Medium sized, imbricated, dark pink, opening with a rosebud centre. Originated in the USA at Magnolia Gardens, South Carolina. 'No.340 Tea Gardens'.

Modun Zhouzhang. Gao, Jiyin, Ltr, 25-5-1990. Chinese synonym for the USA *C.japonica* **Governor Mouton.**

Moensiana. Berlèse, 1843, *Iconographie*, vol.3, pl.258. Synonym for **Hellebuyckii.**

Moencii. Berlèse, 1837, *Monographie*, ed.1. Orthographic error for 'Moensii', synonym for **Cardinalis.**

Moensii. Courtois, 1833, *Magazine d'Horticulture*, 1 [pt.D]:314 as 'Moensi'. Synonym for **Cardinalis.**

Moffein's Variegated. (*C.japonica*), Vanderbilt, 1940, *Camellia Research*, p.6. No description. Originated in USA. (Believed extinct.)

Mogami. (Place Name), *(C.rusticana)*, Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.225, illustration and description; Seibundô Shinkôsha, 1979, *Senchinshû*, p.251: Peach pink, rose form with 8-10 rows of petals, 30 in all, imbricated, medium size. Centre consists of small, feathery petaloids when it is fully open. It is a cross between the snow and bush Camellias. Originated in Tsugawa-chô, Kanbara-gun, Niigata Prefecture, Japan. Named and released by Yaichi Kawamura in 1966.

Mogaribue. (Sound of the North Wind), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.251: Red, irregular peony form. It has confused stamens amongst the inner petals. Early flowering. Leaves, large, wide-ovate, keeled at midrib, coarsely serrate, yellow green. Plant habit is wide spreading, variable. Originated in Ishikawa, Prefecture, Japan. Resembles: **Benidaikagura.** Note: This is a flute-like sound caused by a severe north wind blowing through a bamboo hedge.

Mogoromo. (Waterweed Cloth), *(C.japonica)*, Yashiro, 1841, *Kokon* Yô*rankô*, vol.311. No description. Originated in Japan. (Believed extinct.)

Moguanjing. (Dark Shining Mirror), *(C.japonica)*, *Shanghai Botanic Garden List*, 1985: A dark scarlet, bud centered formal double with white markings. Leaves, broad-elliptic, blunt apex, fine serrations, shiny dark green. Originated in China.

Moira Reid. *(C.x williamsii)*, *International Camellia Journal*, 1986, No.18, pp.141, 142, Reg. No.10: Originated by Mr Charles Williams M.P., Caerhays Castle, St Austell, Cornwall, England. The flower is a small, campanulate single, 3 cm across x 2.5 cm deep with 6 petals; colour rose-pink (Red Group 55B), stamens yellow, filaments white. Mid-season flowering. Leaves,

dark green. matt, oval, 4.5 cm x 2.5 cm, finely, sharply serrate, sharply acute on a vigorous, upright, bushy plant of medium growth rate.

Moire. *(C.sasanqua)*, ACRS., 1980, *Camellia News*, No.74, p.24, Reg. No.244: Originated by Alice Spragg, Sutherland, N.SW., Australia. A chance seedling that first bloomed 1970. The rose--pink single, 9.5 cm across, flowers have broad, creped petals. Early to mid-season flowering. The upright plant has 5.5 cm x 2.7 cm, dark, glossy leaves with pronounced serrations.

Mokichi. (Male Given Name), *(C.japonica)*, Hino, Sukekatsu, 1632, *Sukekatsukyôki; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.656: Very deep red, rose form double, opening to display a row of erect petals around the central stamen cluster. Originated in Japan. (Believed extinct.)

Mokichi-tsubaki. Sakuden, 1630, *Hyakuchinshû.* Synonym for **Kiku-no-sakazuki.**

Mokkô. (Wood Worker), *(C.japonica)*, Sakuden 1630, *Hyakuchin-shû. Chinka Zufu*, (before 1700) Watanabe 1969, pl.121, 158. Synonym for Asahiyama. Different reading 'Mokkoh'. Note: The meaning of "Mokko" is obscure, but is thought to be an emblem design like a double flower.

Mokkô. (Wood Worker), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969: White, formal double, stamens in divided clusters. See: Kyôto Engei Kurabu, 1963, *Tsubaki Tokushû*, No.4, pp.102, 106. Originated in Japan. (Believed extinct.) Note: The meaning of "Mokkô" is obscure, but is thought to be an emblem design like a double flower.

Mokkô. (Wood Worker), *(C.japonica)*, Yashiro, 1841, *Kokon Yôrankô.* vol.310: A white, semi-double with cylindrical stamen group. Originated in Japan. Different readings: 'Moko', 'Mokkoh'. (Believed extinct.) Note: The meaning of "Mokkô" is obscure, but is thought to mean an emblem design like a double flower.

Mokkoh. Andoh, 1984, *International Camellia Journal*, No.16, p.46. Different reading for **Mokkô.**

Mokkô-tsubaki. *(C.japonica)*, Hino, Sukekatsu, 1632, *Sukekatsukyôki.* No description. Originated in Japan. (Believed extinct.) See JCS.. 1986, *Tsubaki.* No.25, p.14.

Moku. (Wood). *(C.sasanqua)*, Itô, Ihei, 1695, *Kadan Chikinshô.* Egg coloured, single; flower shape like wild camellia. Originated in Japan. (Believed extinct.)

Moku. (Wood). *(C.japonica)*, Hamamatsu. 1825, *Setsuyô Kikan*, vol.23. No description. Originated in Japan. (Believed extinct.)

Momachi. (obscure), *(C.japonica),* Yashiro, 1841, *Kokon Yôrankô*, vol.310. No description. Originated in Japan. (Believed extinct.)

Momiji. (Maple), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.705; Yashiro, 1841, *Kokon Yôrankô*, vol.306: The point of the corolla is slender. A white flower variegated with red like a splashed pattern. Eight-fold flower. Originated in Japan. (Believed extinct.)

Momiji. (Maple), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.110; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki: A* large single of 5 broad petals; white splashed and lined with crimson and a large, uniform stamen column. Originated in Japan. (Believed extinct.)

Momijigari. (Maple Viewing), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Vermilion red, large size. See JCS., 1969, *Tsubaki*, No.7, p.36. Itô, Ko'emon, 1879, *Chinkashû:* Castilian red. Large. Double. See colour photos: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.209, p.369; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.427, p.178; Seibundô Shinkôsha, 1979, *Senchinshû*, p.150, description, p.252 as 'Momiji-gari': A medium sized, deep red, rose form double to formal double. Leaves, elliptic, mid-green, serrate. Vigorous, upright growth. Mid-season blooming. Corruptions of name: 'Monijigari', 'Momo-Gi-Gari', 'Momigigari'. Different readings: 'Momiji Gari', 'Momijikari'. Originated in Kantô area, Japan. Similar to **Chitosegiku** but colour deeper.

Momijigari. (Maple Viewing), (Higo), SCCS., 1958, *Camellia Nomenclature*, p.62: Large single red with flared white stamens. Hiratsuka, 1964, *Higo Camellia*, pp.13, 30: Scarlet, 10 cm across, 7 petals, 140 pale red stamens; medium sized leaves. Originated in Kumamoto Prefecture, Japan. Corruption of Japanese name: 'Momojigari'.

Momiji-gasane. (Maple Double), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.489: Medium sized, thick double red with sparse white streaks, some flowers self red. Originated in Japan. (Believed extinct.)

Momojigari. Treseder's Nurseries (Truro), Ltd Camellia List, 1962-1963, p.3. Corruption of the Japanese name **Momijigari.**

Momijikari. Different reading for **Momijigari.**

Momijinoga. (Maple Celebration), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.675: Small, red, rose form double; white with splashes of crimson, with 4-5 rows of imbricated petals, opening to show stamens. Originated in Japan. (Believed extinct.) "Momijinoga" was the ancient word for the nobles picnicking under the maple trees and occurs in the 11th century book *Genji Monogatori.*

Momijinoga. (Maple Celebration), *(C.japonica)*, Himuro, 1982, *Murasuzume*, No.46: Dark red, double to peony, anthers deep yellow. Leaves thin. Originated in Japan.

Momiji-shibori. (Dappled Maple), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Large size, double, white with splashes. Petals fall one by one. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.78. Originated in Japan. (Believed extinct.)

Momijiyama. (Maple Mountain), *(C.japonica)*, Chûgai Nursery Co. Catalogue, 1938-1939, p.19 as 'Momiji-yama': Vermilion scarlet, double, large flower. Originated in Japan.

Momi-kô-nami. (Waves of Red Silk), *(C.japonica)*, Uesa, 1844, *Sômoku Benran:* Vermilion red, large sized single, opens flat. Originated in Japan. (Believed extinct.)

Momi-no-nami. Kyôto Engei Kurabu, Yashiroda, 1971, *Kyôto Engei*, No.65, p.7. Misprint for **Momi-kô-nami.**

Momo. (obscure), *(C.sasanqua)*, Yashiro, 1841, *Kokon Yôrankô*, vol.344: Egg colour, single, wild camellia form. See: Yashiroda, 1971, Kyôto Engei Kurabu, No.65, p.7. Note: Probably a corruption of **Moku.** Originated in Japan. (Believed extinct.)

Momochidori. (Thousands of Plovers), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pink with red streaks, medium size, single. See: JCS., 1969, *Tsubaki*, No.7, p.36; Itô, Ko'emon, 1879, *Chinkashû:* Medium sized, pink striped, white double. See colour photos: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.175; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.111, p.73; Seibundô Shinkôsha, 1979, *Senchinshû*, p.151: These all show a medium sized, single of 7-8 petals with a background of white to blush pink, with red streaks and a short, centre column of stamens. Originated in Kantô area, Japan. Resembles **Utamakura** and **Nukifude.**

Momochidori. (Pink Plover), *(C.japonica)*, Andoh, 1969, ACRS., *Camellia News*, No.36, p.22: (Pink Gull, not the same as the true **Momochidori,** an elegant name for Gull). Light pink single with narrow petals. Slender, bushy growth with narrow leaves. Early to mid-season blooming. A seedling of **Miyakodori.** The first character of this name translates as "peach". Originated in Kansai area, Japan. For colour photos see: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.44, p.53. Seibundô Shinkôsha, 1979, *Senchinshû*, p.151; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.125.

Momochidori. (Pink Plover), *(C.sasanqua)*, Kairyô-en, 1965, *Engei Annai:* Hakoda, JCS, 1987, *Tsubaki*, No.26, p.45; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.35: Small to medium size, clear pink, single. Blooms early to mid-season. Originated in Kumamoto Prefecture, Japan.

Momochinka. (Rare Peach Flower), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pink double with red and white spots. Originated in Japan. (Believed extinct.)

Momogiku. (Pink Chrysanthemum), *(C.japonica)*, Andoh, 1971, *Tsubaki Meika no Shôkai to Saibai*, p.213: Light red. Medium size with multiple rows of petals. Originated in Japan. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.209. A sport of 'Kikusarasa'.

Momohanadori. Yashiro, 1841, *Kokon Yôrankô*, vol.311. No description. Originated in Japan. Different reading for **Toki.**

Momohime. (Peach Princess), *(C.japonica)*, Yokoyama & Kirino. 1989, *Nihon no Chinka*, p.141, colour photo and description: Average size, deep pink, open, cup-shaped single of 5 broad, rounded, over-lapping petals and a central stamen column with ivory filaments, joined for the lower half, and yellow anthers, Blooms mid-season to late. Leaves mid-green, broad-lanceolate, apices blunt-acute, margins rolled under, serrate. Originated in Saitama Prefecture, Japan. A seedling of **Shunshokô.** Originated and released by Yoshizawa Camellia Nursery around 1970.

Momohôju. Seibundô Shinkôsha, 1979, *Senchinshû*, p.151. Different reading for **Momohôshu.**

Momohôshu. (Bud-centred Pink), *(C.japonica)*, *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.404, p.170, description, p.352: Medium sized, formal double, light red with bud centre. Leaves, large, elliptic, mid-green, bluntly acute, coarsely serrate. Blooms late to very late. See p.393, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Selected from cultivars at a private family in Kurobe City, Toyama Prefecture, Japan. Collected by Sadahiko Sakai in 1967, named and released by Hideo Hori. Different reading: 'Momohôju'.

Momoi. (100 Wells), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.229, colour photo and description: Medium size, dark red, tubular to campanulate single with 5 emarginate, overlapping petals, slightly pointed at the apex and with a central yellow, stamen column. Blooms mid-season to late. Leaves shining mid-green, elliptic, apices tapering acuminate, margins shallowly serrate. Originated in the Tottori Prefecture, Japan.

Momoiro-bokuan. Torsanlorenzo Catalogue, 1984-1985. Corruption of Japanese name Momoiro-bokuhan.

Momoiro-bokuhan. (Peach Coloured Anemone), *(C.japonica)*, Katayama, 1960, *Tsubaki Ochabana.* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.106 colour photo; *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.164, pl.387; Seibundô Shinkôsha, 1979, *Senchinshû*, p.150; Yokoyama et al., 1975, *Gendai Tsubaki Meikan*, p.227: Small, deep pink, anemone form with 5 irregular petals around a cushion centre of small, folded white petaloids, typical of the 'bokuhan' form. Originated in Kansai area, Japan. Corrupted forms; 'Momoro Bokuhan', 'Momoiro-bokuan'. This Japanese cultivar was registered in *American Camellia Yearbook*, 1986, p.93, Reg. No.2006, with the description: A miniature, dark rose outer petals with white petaloids streaked with rose, anemone form *C.japonica;* flowers early to mid-season. Average flower size 4 cm across x 2 cm deep with 10 petals, 102 petaloids and 8 anthers. Very cold hardy. Plant growth is dense and slow, dwarf in character with dark green leaves, 7.5 cm x 2.8 cm. Blooms mid-season to late.

Momoiro-daikagura. (Peach Coloured Daikagura), *(C.japonica)*, Wada Nursery Catalogue, 1941, p.28: One of the largest of all, full double, the type of **Emperor of Russia,** rosy pink. Originated in Kansai area, Japan. It is now generally known under its synonym, 'Momoiro-kagura', and also given as 'Kyôbotan' in Katayama. See colour photos under 'Momoiro-kagura' in: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.379, p.160; Seibundô Shinkôsha, 1979, *Senchinshû*, p.150, p.252.

Momoiro-kagura. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.379, p.160, description, p.348. Synonym for **Momoiro-daikagura.**

Momoiro-manyô. Seibundô Shinkôsha, 1979, *Senchinshû*, p.249. Synonym for **Manyô.**

Momoiro-midarezaki. (Peach coloured, disordered flower), *(C.japonica),* Izu Ohshima Hawaii Botanical Gardens, 1980, *List of Plants,* as 'Momoiromidarezaki'. No description. Originated in Japan.

Momoiro-nochiseyama. (Pink Nochiseyama), *(C.japonica),* Izu Ohshima Hawaii Botanical Garden, 1980, *List of Plants* as 'Momoironochiseyama'. No description. Originated in Japan.

Momoiro-otome. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.146. Synonym for **Otome** as 'Usu-otome'.

Momoiro-sazanka. (Peach Coloured Sasanqua), *(C.sasanqua), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.508: Large, semi-double with 8-10 petals of soft pink with white blotches and deep pink edges. Different reading 'Momoiro' in 1974 *Nôkôdai Nôjôhô*, No.6, p.48. Originated in Japan. (Believed extinct.)

Momoiro-shôwa-wabisuke. (Peach Colour, of Shôwa Wabisuke), (Wabisuke), Seibundô Shinkôsha, 1979, *Senchinshû*, p.150, colour photo, p.252, description: Small, peach pink single of 6-7 petals, opening campanulate; short, central stamen cylinder. Leaves, narrow-elliptic, mid-green, finely, sharply serrate, acuminate. Originated in Kantô area, Japan. Sport of **Shôwa-wabisuke.**

Momoiro-tsuratsura-tsubaki. (Pink Camellia), *(C.japonica),* Seibundô Shinkôsha, 1989, *Senchinshû*, p.150 colour photo, p.252, description: Medium size, bright pink, campanulate single, 5-6 broad, overlapping petals, a little crinkled around the margins. Leaves, broad- lanceolate, blunt acuminate, depressed venation, shallowly serrulate. Originated in Koseyama, Nara Prefecture, Japan. Note: "Tsuratsura-tsubaki" is a phrase from the novel *Man'yo-shu* meaning "rows of camellia trees".

Momoiro-wabisuke. Wada, 1941, *Japanese Garden Treasures*, p.28. Synonym for **Tarôkaja.**

Momoji. (100 paths), *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.303, p.136. Synonym for **Momoji-no-higurashi.**

Momoji-giku. (Chrysanthemums of Momoji), *(C.japonica),* Himuro, 1982, *Murasuzume:* Rose-pink. Formal double, chrysanthemum shape. Originated in Japan.

Momoji-no-ehigasa. (Colourful Sunshade of 'Momoji'), *(C.japonica),* Satô, 1975, *Chûbu no Tsubaki*, p.92 as 'Momijinoehigasa' with description and colour photo: Large, semi-double, 3-4 rows of pink petals with multiple crimson streaks, small, central stamen column, golden anthers, pale yellow filaments. Originated in Aichi Prefecture, Japan. A sport of **Ehigasa.** Named and released by Minoru Satô in 1974. Note: It is believed that **Ehigasa** is a form of **Fukiage-shibori.**

Momoji-no-higurashi. (An Evening in Momoji), *(C.japonica),* Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.56, p.20: Large, semi-double with 3 rows of deep pink petals, with crimson and white streakings. Irregular centre cluster of stamens, yellow anthers, creamy filaments, 15-17 petals, standing apart, emarginate. Leaves, elliptic, mid-green, crenate, apex acute. Blooms mid-season to late. See: Seibundô Shinkôsha, 1979, *Senchinshû*, pp.150, 252, and p.350, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Aichi Prefecture, Japan. Named by Minoru Satô in 1970, released by Shinichi Asai. Sport: **Chûbu-higurashi.** Chinese synonym 'Bailu Zhi Rimu'.

Momokawa. (Peach River), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.94, colour photo and description: Small size, pale peach pink, campanulate single with 5 wide, overlapping, somewhat crinkled petals and a central stamen column with white filaments, joined for the lower half, and pale yellow anthers. Blooms mid-season to late. Leaves deep green, broad oblanceolate to ovate, apices acuminate, margins serrate. Originated in Hirado City, Nagasaki Prefecture, Japan.

Momoko. (Female First Name). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.262 with colour photo; English translation p.185. Large, pale pink, bud-centred with petals in windmill shape, occasionally rose-form. Flowers mid-season. Leaves oblong, large. Spreading, vigorous growth. A natural seedling of **Akatsuki-no-kaori.** Originated and released by Shinichirô Kishikawa in 1990. From Osaka.

Momo-oka. (Peach Hill), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.122, p.61, description, p.123: Leaves, olive green, elliptic to narrowly elliptic, apex long acuminate and recurved, venation impressed towards margins, 6.6-8.3 cm long x 2.3-3.8 cm wide; petiole, pale green, hairy. Petals, 19-29, the largest, 4.3 cm x 4 cm, emarginate, accompanying small petals or petaloids, 1-3, variegated white. Stamens irregular and poor, 2.6 cm high, filaments pale creamy, Late flowering. Originated by Mr Chika, Kanazawa City, Ishikawa Prefecture, Japan.

Momo-otome. Sakata Shubyô Co, 1955, *Engei Tsûshin.* Synonym for **Otome** as 'Usu-otome'.

Momoro Bokuhan. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.161. Corruption of the Japanese name **Momoiro-bokuhan.**

Momorro Otome. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.161. Corruption of the Japanese name 'Momoiro-otome', synonym for **Otome.**

Momosato. (Peach Hamlet), *(C.sasanqua)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.45; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.35: Small size, pink, single. Early blooming. Originated in Kumamoto Prefecture, Japan.

Momosono-nishiki. (Peach Garden Brocade), *(C.sasanqua)*, Kondo 1978, *International Camellia Journal*, No.10, p.68. Different reading for **Momozono-nishiki.**

Momosuzume. (Pink Sparrow), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.79, p.40, description, p. 109: Leaves, small, pale green, broadly-elliptic, thin, 3.8-5.9 cm long x 2.2-3.1 cm wide with short, hairy petioles, 5 mm long. Flower, single, 4-6 petals, lateral margins incurved, pale rose, (Camellia Rose 622/3) with a nuance of yellow at the bottom of the flower. Stamen cluster 1.7 cm high and about 1 cm in diameter, filaments cadmium yellow. Flowers mid-season to late. Originated by Jirokichi Irii, in Yatsuo-chô, Toyama Prefecture, Japan. Released by Minoru Takeuchi in 1965. Synonym: 'Waraku'. See colour photos: *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.56, pl.58, description, p.299; Seibundô Shinkôsha, 1979, *Senchinshû*, p.150; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.73.

Momotarô. (Name of Hero in Fable), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.257, p.130, description, p.169: Leaves, elliptic to broadly-elliptic, margins crenate, 6.7-7.8 cm long x 3.4-3.8 cm wide; petioles 7-14 mm long, smooth. Flowers pendulous, tend to anemone form, rosy pink, (China Rose 024/2-1). Petals 10-15, largest 4.2 cm x 3.8 cm; inner smaller petals and petaloids, 11-65, including fan-shaped petaloids. Stamens in 5 fascicles, filaments pale yellow. Flowers mid-season to late. Originated in Momoyama, Fushimi-ku, Kyôto-shi, Japan. Momo also alludes to the place name where this camellia was collected.

Momotarô. (See above), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.308, colour photo and description: Large size, pale pink fading to white at the centre, semi-double with 9-10 rounded or pointed petals in 2-3 rows and a slender stamen column with white filaments, joined for the lower third and yellow anthers. Blooms mid-season to late. Originated in Kurume, Fuku'oka Prefecture, Japan. A natural seedling of **Shunshokô**. Named and released by Toshiharu Kobuku in 1965. Orthographic error: 'Momotaroô'.

Momotaroô. ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.16. Orthographic error for **Momotarô.**

Momotsukasa. (Pink 'Tsukasa'). *(C.sasanqua). "Camellias in Kurume"*, ICS Congress, Kurume 2010, p.63 with colour photo; Soft pink, shading slightly darker at petal edges. Medium size, wide open single. Vigorous upright growth. Leaves small, long elliptic, recurved at both

extremities. Normal sasanqua stamen cluster. Flowers early. A 100 year old tree in a private garden in Kurume, Kusano-machi, Japan.

Momotsuzumi. (Pink Hand Drum), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.105, p.53, description, p.118, as 'Momo-tsuzumi': A single pink camellia of pure snow camellia type. Leaves broadly-elliptic, wavy, thin, flat, venation impressed, 7.9-9.4 cm long x 3-4.3 cm wide, with petioles densely hairy, 5 mm long. Petals 4-6, largest 4.7 cm x 3.3 cm, narrowly incised. Stamens in a simple, narrow cylinder, cadmium yellow. Flowers mid-season to late. Originated by Mr Shôsaku Yoshida, Kanazawa City, Ishikawa Prefecture, Japan. Different reading: 'Momozutsumi'.

Momou. (obscure). *(C.japonica)*, *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.322. English translation p.240. Medium size, pink, long tubular single. Flowers mid-season. Leaves elliptic, medium size, flat. Upright growth. A natural seedling of unknown parentage. Originated and named by Tôhei Takahashi in 1988, registered to the Ministry of Agriculture and Fishery. From Aichi Prefecture.

Momoware. (Classic Hair Style for Girls), *(C.japonica)*, Andoh, 1971, *Tsubaki*, *Meika no Shôkai to Saibai*, p.213: Medium sized, light red. Irregular anemone form. Originated in Matsu'e City, Shimane Prefecture, Japan. Yokoyama & Kirino, 1989, *Nihon no Chinka* p.355, colour photo and description: Medium size, light red, anemone form with one row of rounded, outer petals and the centre a tight mass of light pink petaloids. Blooms early to mid-season. Leaves deep green, elliptic to broad-elliptic, apices acute, margins serrate. Selected from cultivars at a private family in Matsu'e City, named and released by Yoshiaki Andoh in 1970. "Momoware" was also an ancient hair style for girls in Japan.

Momo-wabisuke. Takii Catalogue, 1951. Synonym for **Tarôkaja.**

Momowasure. (Many Oversights), *(C.japonica)*, JCS., 1973, *Tsubaki*, No.12, colour photo, 28, p.7, description, p.15. A medium sized, peach pink, semi-double seedling of **Hototogisu** that first flowered 1972. Petals in 4-5 rows, the outer reflexed while the inner are semi-erect. Flowers mid-season. Leaves broad-ovate, dull, yellowish green, wavy, serrulate margins; apex acuminate. Originated in Japan by Totsurô Nakamura**.** See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.151, colour photo.

Momoyama. (Place Name), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.243, p.123, description, p.164: Leaves, broadly oblanceolate-elliptic, shortly acuminate, cuneate base, impressed venation, crenate margins, 7.3-8.4 cm long x 3.5-4.5 cm wide; petioles, 9 mm long, hairy. Flowers, peony type, deep red. (Currant Red 821/3). Petals 16-40, diminishing in size to the centre; outer petals, wavy and emarginate; inner much wavy and irregular, 9-39 petaloids. Flowers mid-season to late. Originated at Momoyama, Fushimi-ku, Kyôto-shi, Japan.

Momoyama. (Place Name), *(C.sasanqua)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.45; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.35: Medium size, pink fading to white a petal base, single. Blooms early to mid-season. Originated in Japan. Synonym: 'Kansai-hôô-nishiki'. Some old trees survive in Shizuoka and Fukuoka Prefectures.

Momozono. (Peach Garden), (*C.sasanqua*), Wada, Hakoneya, Nurseries Catalogue, 1937, p.37: The flowers are a large, beautiful rose, semi-double with wavy, broadly shaped petals, of great substance. colour photo see: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.572, p.220: A medium sized single, light pink, flat, 7.5 cm across with 8 round, notched and crêped petals. Blooms early to mid-season. Originated in Kumamoto Prefecture, Japan. A Higo sasanqua selected by Yajirô Shishido. Corruptions of the Japanese name: 'Monozono', 'Mono-gomo'.

Momozono. (Peach Garden), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.107: Pale pink, cup-shape, single to semi-double with 9-12 rounded, overlapping petals and a short sta-

men cylinder with yellow anthers and white filaments, small to medium size. Flowers early to mid-season. Leaves bright mid-green, broad-elliptic, apices acuminate, margins finely serrate. Originated in Okayama Prefecture, Japan. A seedling of **Hatsu-arashi.** Named and released by Nobuo Sasai in 1981.

Momozo-nishiki. Sandhurst Nurseries Catalogue, 1957. Corruption of the Japanese name **Momozono-nishiki.**

Momozono-nishiki. (Peach Garden Brocade), (*C.sasanqua*), Ashizawa, Yagorô, 1897, *Chabaika Taishû;* Nihon Shubyô Co. Catalogue, 1910: Pale pink, large. See colour photo: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.524, p.212: Rose, shaded white. Large semi-double with crinkled petals. Corruption of name: 'Momozo-nishiki', 'Monozono-nishiki'. Resembles **Shichifukujin.**

Momozono-nishiki. (Peach Garden Brocade), (*C.japonica*), *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.316, p.140, description, p.338: Large, semi-double with 2-3 rows of petals of soft pink, veined and streaked deeper pink to red, 9-11 cm across. Blooms mid-season to late. Floriferous. For colour photo see: Seibundô Shinkôsha, 1979, *Senchinshû*, p.151; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.344. Synonym: 'Heiwa-no-hikari'. Corruption of name: 'Mononona-nishiki'. Originated in Kurume, Fukuoka Prefecture, Japan.

Mona Freeman. (*C.japonica*), ACS., *Newsletter,* 1949, vol.4, No.3, Reg. No.12: A seedling of unknown parentage that first flowered 1942 at McCaskill Gardens, Pasadena, California, USA. Plant growth is average, upright and compact. Flower buds are long and blunt, light green in colour and petals extend weeks before blooming. Leaves are elliptic, 7.5 cm long, acute and slightly serrate. Flowers are incomplete double with large petaloids which are more or less erect, 8-10.5 cm across, with an average of 26 petals. Blooms early to late season.

Mona Harvey. *(C.japonica), New Zealand Camellia Bulletin*, 1995, Issue No.120, vol.XIX, No.1, p.47, Reg. No.365: Originated by V. & R. Bieleski, Manukau City, New Zealand. A white formal double, seedling of **Silver Cloud.** Flowers 12 cm across x 6 cm deep, 60 petals and 30 petaloids, all with incurved margins. Leaves dark green, 10 cm long x 6 cm wide. Blooms mid-season to late. Chinese synonym 'Hawei'.

Mona Jury. *(C.x williamsii*), *New Zealand Camellia Bulletin,* 1976, vol.IX, No.5, p.11, Reg. No.122: A seedling of 'Will's Hybrid 324', (*C.saluenensis x C.japonica* **Daikagura**) x **Betty Sheffield.** Originated by L. Jury, New Plymouth, New Zealand. First flowered 1971. The plant has an open habit with light green leaves, 9 cm x 4 cm. The flower is peony form with 16-22 heavily veined petals, yellow anthers, white filaments; colour of flower, apricot pink. Flowers early to

late. See colour photo, *New Zealand Camellia Bulletin*, 1982, vol.XII, No.7, p.25. Sport: **Mona Jury Variegated.** Chinese synonym: 'Mona Zhurui'.

Mona Jury Variegated. *(C.x williamsii*), Cannon, 1980, ACS., *The Camellia Journal*, vol.35, No.4 as 'Mona Jury Var.': A virus variegated form of **Mona Jury** - Apricot pink blotched white. Originated in USA.

Mona Lisa. (*C.japonica*), SCCS., 1981, *Camellia Nomenclature*, p.115: White. Large, peony form. Medium, upright growth. Mid-season blooming. Originated in USA by H. Shackelford, Albany, Georgia.

Mona Monique. (*C.japonica*), Dryden, 1963, SCCS., *The Camellia Review*, vol.25, No.1, p.18: The flower is a large formal double to irregular semi-double. pink with deeper shades towards the petal margin; white stamens and pink and white petaloids. Late flowering. Originated in Japan by Eikichi Satomi.

Mona Zhurei. Chinese synonym for NZ *C.x williamsii* **Mona Jury.** Later spelling 'Mona Zhurui'.

Monah Johnstone. *(C.x williamsii), American Camellia Yearbook*, 1980, p.170, Reg. No.1643: A medium to large, light pastel pink, irregular, semi-double, *C.hybrid*, *(C.saluenensis x C.japonica* **Princess Lavender**), flowering mid-season to late. Originated by Dr. Clifford Parks, Chapel Hill, North Carolina, USA. Average size, 10 cm. across x 4.5 cm deep with 21 petals. Flower has light brown anthers and pale lemon filaments, fluffy, wavy, irregular petals; slight fragrance. Plant growth is upright, open and medium with dark green leaves, 8 cm. x 3.8 cm.

Monan. *(C.japonica)*, Guilfoyle Catalogue, 1866, p.19. No description. Originated in Australia. (Believed extinct.)

Monday's Child. *(C.japonica)* ACS, *Yearbook*, 2013, p.128 with colour photo, Regn. No.2913; A 10 year old seedling, parentage unknown, first flowered 2008. Originated and registered by C.M. and Lillian Gordy, Ocala, Fla., USA, and propagated by Loch Laurel Nursery, Valdosta. Ga. Large size, 10.8cm diameter x 5cm deep flower is anemone form and deep pink. Bright gold anthers and pink filaments. Flowers fall whole. Upright plant with average growth rate. Mid-green leaves average 7.5cm x 3.8cm with medium serration. Flowers midseason to late

MonDel. ACS, *The Camellia Journal*, Mar. 2013, p.11. Patent No. 21687 for a pink sport of **Yuletide,** also trademarked as **Pink-A-Boo®**

Monettii. Downing Nursery Catalogue (before 1858). Orthographic error for **Manetti.**

Monforti di Sacco. Charles van Geert Nursery Catalogue, 1845. Synonym for **Monfortiana.**

Monfortia. Franco Agostoni, 1844, *Catalogo Plantarum* .... Orthographic variant for **Monfortiana.**

Monfortiana. *(C.japonica)*, Berlèse, 1843, *Iconographie*, pl.196 and facing p. Named by Sacco for Monforti Street, Milan where he founded his horticultural establishment. Medium sized, informal double, rounded, regular, 9-10 cm across and of a beautiful soft rose with touches of clear carmine. The exterior petals in 5-6 rows are oblong, very notched, thin, imbricated; those of the interior can be either regular or irregular. In the first case the corolla is well developed, elegantly imbricated, and in the other case, which is rare, it is always attractive and presented with the same symmetry. Originated by Sacco, Milan, Italy. Synonyms: 'Monforti di Sacco', 'Monfortiana de Naples', 'Monfortiana Nova', 'Monfortia'. Orthographic errors: 'Montfortiana', 'Montfortensis', 'Montfortii Nova', 'Monforziana', 'Monthoriana', 'Montifortiana'.

Monfortiana de Naples. Cachet Catalogue, 1845-1846, p.7. Synonym for **Monfortiana.**

Monfortiana Nova. Charles van Geert Nursery Catalogue, 1848, p.11. Synonym for **Monfortiana.**

Monforziana. Fratelli Rovelli Nursery Catalogue, 1852, p.22. Orthographic error for **Monfortiana.**

Monfredini. *(C.japonica)*, Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.13. No description. Originated in Italy. (Believed extinct.)

Monica. *(C.japonica)*, ACS, *The Camellia Journal*, Aug. 1998, p.23, Reg. No.2466. A miniature, white with pink and rose stripes, formal double chance seedling. Late flowering. Originated by Charles T. Elliott, Sr, Swainsboro, Ga., USA. *American Camellia Yearbook*, 1998, p.5, colour photo before p.1. The 10 year old seedling first flowered in 1996. Average flower size is 5.7-6.5 cm across x 2.5 cm deep with 42 petals. Plant growth is upright and slow, with dark green leaves 7-7.5 cm long x 3.8 cm wide.

Monica Dance. *(C.x williamsii*), Burncoose & Southdown Nursery Catalogue, 1984: New, semi-double, pink mottled white, Medium size. Mid-season blooming. Originated by Arnold Dance, Burncoose, Cornwall, England.

Monique Peer. *(C.japonica)*, McIlhenny Catalogue, 1950-1951: Pink with white stamens and pink and white petaloids. Medium, full peony form with compact growth. Late flowering. Fendig, 1952, *American Camellia Catalogue* with colour pl.: Large, spinel pink, incomplete double (Anemone form), 10 cm. across x 7.5 cm. deep. The outer petals are 5 cm across. Stamens are central and intermix with the centre mass of petals and petaloides Filaments are white, anthers antimony yellow. Similar in form to **Daikagura.** Leaves mid-green, 10 cm. x 5 cm, stiff, bending downwards, apex acute, serrations hair-like. Plant habit upright and vigorous. Originated by E.A. McIlhenny, Avery Island, Louisiana, USA from seed of unknown parents. Named for the wife of Ralph Peer of Hollywood, California. Sport: **Monique Peer Variegated.**

Monique Peer Variegated. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.8, as 'Monique Peer Var.': A virus variegated form of **Monique Peer** - Pink and white. Originated in USA.

Monjisu Variegated. Lindo Nurseries Price List, 1946. Synonym for **Monjusu.**

Monju. (Buddhist God of Intelligence), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.258: Medium size, incomplete double peony, with irregular edged petals, red with white blotches and a centre of petaloids and stamens intermixed with petals. Originated in Japan. (Believed extinct.)

Monjukai. (World of Monju), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Medium size, single, white. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.82. Originated in Japan. (Believed extinct.)

Monjusu. (Dappled Satin), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Large size, red with white spots. See: JCS., 1969, *Tsubaki*, No.7, p.33; Itô, Ko'emon, 1879, *Chinkashû:* Large, cherry red, marbled white. Yokohama Gardeners' Assocation Descriptive Catalogue, 1891 as 'Monjisu': Bright crimson, very clear white round spots. Fendig, 1949, *American Camellia Catalogue* with colour pl.: Deep scarlet, semi-double, variegated with white. Size, 9.5 cm across x 3.2 cm deep with 16 wavy petals about 4 cm long in 3 rows. The stamens are central and number about 80 with pink filaments. Blooms late to very late. Leaves glossy, deep green, sometimes variegated yellow, with sharp points and tapered bases; 8 cm x 3.8 cm. Plant habit, dwarf, compact, slow and bushy. Originated in Japan. For colour photos see: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.12, p.29. *Encyclopedia of Camellias in Colour*, vol.1, 1972, pl.256, p.120. Seibundô Shinkôsha, 1979, *Senchinshû*, p.152. **Monjusu** is the virus variegated form of **Shusugasane** and the white spotting is most variable, sometimes being almost completely masked, leading to considerable confusion in identification. Originated in Kantô area, Japan. Different readings: 'Monjisu', 'Monjishu'. Corruptions of the name includes: 'Monijishu', 'Monjisho'. Synonyms: 'Monjishu Variegated', 'Monjisu Variant', 'Monjisu Variegata', 'Variegated Monjisu', 'Californian Donckelari', 'Californian Donckelari Variegated', 'Shibori-jusu', 'Shusu', 'Shisu', 'West Coast Donckelari', 'Shibori-monjusu', 'Shibori-Shusu', 'Donckelarii California', 'Otome Red'. Chinese synonym: 'Jiaoruzi'. Similar, if not the same are the varieties **Rasenzome** and **Suzuka-no-seki.**

Monjusu-aka. Satomi, 1956, *Camellia Varieties of Japan*, p.10 as 'Mon-jusu Aka'. Synonym for **Shusugasane.**

Monjusu Red. Overlook Nursery Catalogue, 1943-1944. Synonym for **Shusugasane.**

Monjusu Variegated. McIlhenny, 1937, *600 Varieties of Camellias* as 'Monjisu Variegata'. Synonym for **Monjusu.**

Mon-nishiki. (Brocade Crest), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikishô*, vol.I, #219; Itô, Jukyû, 1739, *Honzô Hanamaki'e;* Yashiro, 1841, *Kokon Yôrankô*, vol.306; Kasuya, Kamegorô, 1859. *Tsubaki Irohanayose Irotsuki*. Variegated with red in various designs on a light coloured ground. Large, double flower. (Believed extinct.) Originated in Japan.

Mon-nishiki. (Brocade Crest), *(C.sasanqua)*, Brian D. Mulligarn, 1977, *Woody Plants in the University of Washington Arboretum*, p.36. Also *Inventory*, 1993, p.24. No description. Originated in Japan.

Mon-no-uchi. (Within the Gate), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.152, colour photo, p.252, description: Small, white, with a pink cast, tubular single of 5 petals with frilly margins. Leaves, light green, broad-ovate, apex blunt-acute, shallowly, bluntly serrate. Blooms early to mid-season. Believed to be a seedling of **Shikason.** Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.64, colour photo. Originated in Matsu'e City, Shimane Prefecture, Japan.

Mono Gomo. Hazlewood Nursery Catalogue, 1945, p.16. Corruption of the Japanese name **Momozono**.

Monogurui. (Frenzy), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.131: Medium sized, semi-double, whitish pink with shadings of deeper pink and crimson stripes and speckles. Originated in Japan. (Believed extinct.)

Monogurui-tsubaki. (Frenzied Camellia), *(C.japonica)*, Nakayama, 1847, *Senka'ôden:* Single, white with red spots and streaks. Early blooming. See Kyôto Engei Kurabu, 1963, *Tsubaki Tokushû*, No.4, p.79. Originated in Japan. (Believed extinct.)

Monokawa. (Mono River), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I, #160: Medium large, red flower, variegated with white spots, double, protruding centre. Originated in Japan. (Believed extinct.)

Monokawa. (Mono River), *(C.japonica)*, Yashiro, 1841, *Kokon Yôrankô;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Large size, open peony form, double, white with red streaks, fascicles of stamens in the centre. Originated in Japan. (Believed extinct.) Possibly the same as the Itô camellia above.

Mononofu-tsubaki. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.426, p.177. Different readings: 'Monofu-tsubaki', 'Bushi-tsubaki'. Synonym for 'Denkôji-chiri-tsubaki', itself a synonym for **Mononofu-tsubaki-Denkôji.**

Mononofu-tsubaki-Denkôji. (Warrior Camellia - Denkô Temple), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.263, p.133, description, p.171: Leaves elliptic, acute, margins minutely, crenateserrulate. Flowers, complete formal double, deep rose (Crimson 22/1), petals imbricated, slightly channelled, rounded apex, inner petals slightly lobate. Late flowering. Originated in the grounds of the Buddhist Temple - Denkôji, Nara Prefecture, Japan. The original old plant has recently died. Different readings: 'Mononohutsubaki Denkôji', Denkôjichiritsubaki', 'Mononofutsubaki'. See colour photos: Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.17, p.6; Seibundô Shinkôsha, 1979, *Senchinshû*, p.150 as 'Mononofu-tsubaki'.

Mononohu-tsubaki-Denkôji. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.10, p.146. Different reading for **Mononofu-tsubaki-Denkôji.**

Montfordii de Sacco. Charles van Geert Catalogue, 1845. Orthographic error for **Monfortiana.**

Montfortensis. (*C.japonica*), Jacob Makoy et Cie Nursery Catalogue, 1839, p.17. No description. Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.10 as 'Montfortii di Naples': Imbricated, deep cerise. Flowers over a long period. Originated in Italy. Synonyms: 'Montfortensis di Naples', 'Montfortii di Naples'.

Montfortensis di Naples. Verschaffelt Catalogue, 1844-1845, p.27. Synonym for **Montfortensis.**

Montfortiana. Berlèse, 1845, *Monographie*, ed.3, p.134. Orthographic error for **Monfortiana.**

Montfortii di Naples. Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.10. Synonym for **Montfortiana.**

Montfortii Nova. Charles van Geert Nursery Catalogue, 1845, p. 10. Orthographic error for **Monfortiana.**

Montgomery. *(C.japonica)*, Hovey, 1842, *Magazine of Horticulture*, 8:224: Originated by Richard Dick, USA. A seedling of **Coccinea.** It has broader foliage than its parent. The flower is a light cherry-red with 16 large guard petals and 26 smaller ones; in flower similar to 'Carnea', though a freer flowerer; it has a number of anthers and an imperfect style.

Monthoriana. Isola Madre Catalogue, 1845. Orthographic error for **Monfortiana.**

Monti. *(C.japonica)*, Jacob Makoy et Cie Nursery Catalogue, 1839, p.17. No description. Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.10: Glossy red. Charles van Geert, 1848, Catalogue No.105, p.115: Imbricated with clustered centre. Soft pink. Verschaffelt, 1853, *Nouvelle Iconographie*, Book I, pl.IV: Extremely large, regularly imbricated blooms, a rich vivid pink colouring, with violet tints towards the centre, a very full foliage will keep this camellia in collections, where it appeared 5 or 6 years ago. The amplitude of the petals corresponds to the size of the bloom, which measures not less than 12 cm across. From the first row to the centre, they are fully rounded, outspread, marked at the apex, and above the indentation by a small conical, raised fold. At the centre, where they are erect and form a large rose shaped heart, their edges are violet blue, and they are strewn with a few scarse, white splotches. Orthographic errors: 'Montii', 'Monty'.

Monti Nova. (*C.japonica*), van Houtte Catalogue, 1843-1844, 12aaa as 'Montii Nova': Imbricated rather than peony form, pure white and distinguishing it are crimson streaks, laid like a network on the soft white colour. Originated in Italy. Orthographic errors: 'Montii Nova', 'Montei Nova'.

Monti Rosea. (*C.japonica*), van Houtte Catalogue, 1843-1844, 12:aaa as 'Montii Rosea'. No description. Originated in Italy. (Believed extinct.)

Montiana. (*C.japonica*), van Houtte Catalogue, 1843-1844, 12:aaa. No description. Originated in Italy. (Believed extinct.)

Monticello. *(C.hybrid)*, *American Camellia Yearbook*, 1959, p.278, Reg. No.428: A 5 year old seedling of *C.hybrid* **Sylvia May,** originated by David L. Feathers, Lafayette, California, USA. Plant growth is upright and rapid with dark green leaves, 7 cm x 4.5 cm. The pink, peony form flowers, 10-11cm across x 6-7 cm deep, have 40 petals and golden stamens. Mid-season flowering.

Monticello Pink. *(C.japonica),* Vanderbilt, 1940, *Camellia Research*, p.6. No description. Originated in USA. (Believed extinct.)

Monticous. *(C.japonica),* Seidel, 1846, Pflanzen Catalog, p.9. No description. Originated in Germany. (Believed extinct.)

Montifortiana (Sacco). Del Lungo & Girardi, 1928, *Le Camelie*, p.103. Synonym for **Monfortiana.**

Montii. *Gardeners' Chronicle*, 1841. Orthographic error for **Monti.**

Montii Nova. van Houtte Catalogue, 1843-1844, 12:aaa. Orthographic error for **Monti Nova.**

Montii Rosea. van Houtte Catalogue, 1843-1844, 12:aaa. Orthographic error for **Monti Rosea.**

Montigue. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Scarlet. Medium, single with a mass of yellow, pink and white stamens in the centre. Originated in USA. Orthographic error: 'Montique'.

Montique. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Montigue.**

Montirioni. Hume, 1946, *Camellias in America*, p.335. Orthographic error for **Montironi.**

Montirona Vera. da Silva, 1880, *Forcing Varieties of Camellias in Oporto*, p.16. Orthographic error for 'Montironi Vera', synonym for **Montironi.**

Montironi. *(C.japonica),* van Houtte Catalogue, 1841, 7:13: 'This is the 'Nobilissima Nova' but more beautiful and more majestic'. (This is a formal double white with pink marks). Berlèse, 1845, *Monographie*, ed.3, p.289, No.608: C. 'Montironi' or 'Hélène Longhi'(Italie). Vigorous pyramidal shrub, sparsely branched, leaves 4-5 cm wide, about 9-10 cm long, rounded or oval, rough surface, deeply indented, dark green, bud is oblong with greenish scales; flower is 10-11 cm wide, full, ranunculiform, (formal double), soft white, delicate pink, about 9-10 rows of petals, 4 cm wide x 5 cm long, concave, numerous, converging together, some whole, others slightly emarginate and imbricated throughout. Originated in Italy by Casoretti. For illustration see Verschaffelt, 1850, *Nouvelle Iconographie*, Book VII, pl.III as 'Montironi Vera'. In USA this cultivar has been erroneously equated with **Elisabeth** and **Teutonia** and, in Australia, with 'Don Pedro', (**Dom Pedro V, Rei de Portugal**). Synonyms: 'Hélène Longhi', 'Montironi Alba', 'Montironi White', 'Montironi Vera', 'Montironi Alba Vera', 'Montironi Nova', 'Montironi'(Casoretti), 'Helena Longhi'. Orthographic errors: 'Montirioni', 'Monteroni', 'Monteroni Vera', 'Monteroni White', 'Montirona Vera', 'Montironi Araba', 'Montaroni', 'Mortorini', 'Montironii', 'Montironii Vera'. Sports: **Montironi Rubra, Tito Speri.**

Montironi Alba. Oudin, Paris Nursery Catalogue, 1844, p.12; Franco Agostoni, 1844, *Catalogo Plantarum....* Synonym for **Montironi.** Note. This name came into use as much of **Montironi** tended to have considerable pink in the background.

Montironi Alba Vera. Burnier & Grilli Catalogue, 1846-1847. Synonym for **Montironi.**

Montironi Araba. Mariotti Catalogue, 1924. Orthographic error for 'Montironi Alba', synonym for **Montironi.**

Montironi (Casoretti). Vervaenne, J. Catalogue No.11., 1888. Synonym for **Montironi.**

Montironi Nova. Catalogo della Stablimento Agrario-Botanico de Castagnola e Casabono, 1861-1862. Synonym for **Montironi.**

Montironi Pink. Lindo Nurseries Catalogue, [Ca.1945]. Pseudonym for **Elisabeth Pink.**

Montironi Rose. Nantes, *Services des Espaces, Collections*, 1980. Synonym for **Montironi Rubra.**

Montironi Rosea. Auguste van Geert, 1854, Catalogue, No.36, p.41. Carrière, 1865, *Production et Fixation.*---p.14. Synonym for **Montironi Rubra**. In the USA this name has been erroneously applied to **Elisabeth Pink.**

Montironi Rubra. *(C.japonica),* de Jonghe, 1851, *Traité de la Culture du Camellia*, p.115 as 'Montironi Rubra'(Casoretti). Perfectly imbricated, carmine pink base, petals with white lines running to the margins. A sport of **Montironi** originated in Italy by Casoretti. Synonyms: 'Montironi Rose', 'Montironi Rosea'.

Montironi Vera. Verschaffelt Catalogue, 1844-1845, p.27 and *Nouvelle Iconographie*, 1850, Book VII, pl.III. Synonym for **Montironi.** Orthographic error: 'Monteroni Vera'.

Montironi White. Portland Camellia Nursery Camellia Catalogue, 1848-1949, p.8. Synonym for **Montironi.**

Montironii. William Paul Nursery Catalogue, 1867, p.18. Orthographic error for **Montironi.**

Montironii Vera. William Paul Nursery Catalogue, 1867, p.18. Orthographic error for 'Montironi Vera', synonym for **Montironi.**

Montironii Vera (Casoretti). Verschaffelt Catalogue, 1847-1848, p.60. Synonym for **Montironi.**

Monton Bianca. Colla, 1843, *Camelliografia.* Synonym for **Welbankiana.**

Montrose. *(C.japonica),* Outtridge, 1962, *1000 Named Camellias in Australia*, p.13: White, formal double. Large. Mid-season flowering. Originated in Australia.

Montrose Rubra. *(C.japonica),* Treseder Nursery Catalogue, 1957: Very large, red, semi-double. Originated in England.

Monuoyi Shangxiao. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for the USA *C.japonica* **Commander Mulroy.**

Monzian. *(C.japonica),* Nobelius Nursery Catalogue, 1939, p.35. No description. Originated in Australia. (Believed extinct.) Orthographic error: 'Monzion'.

Monzion. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.162. Orthographic error for **Monzian.**

Monziana. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.13. No description. Originated in Italy. (Believed extinct.)

Monzonii. Trillon, Le Mans Nursery Caralogue, 1843, p.7. Orthographic error for **Manzoni.**

Moody Bozeman. *(C.japonica),* SCCS., 1981. *Camellia Nomenclature*, p.115: Light pink, dashed and striped rose. Medium, semi-double to loose, peony form, Vigorous, upright growth. Mid-season blooming. Originated in USA by M. Bozeman, Thunderbolt, Georgia. Sport: **Moody Bozeman Red.**

Moody Bozeman Red. *(C.japonica),* SCCS., 1981, *Camellia Nomenclature*, p.115: Red sport of **Moody Bozeman,** originated in USA by B.F. Sapp, Garden City, Georgia.

Moon at theWindow. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.176. Synonym for **Mado-no-tsuki.**

Moon of Autumn. *(C.japonica), Collected Papers*, ICS Congress, Jinhua 2003, *Naming new Cultivars* of *"Naidong" Camellias...*, Chen Junzhi and Chen Jinshui, p.47; Pink pendent form, bell or magnolia shape, mid-folia, mid-flora, leaves elliptic to broad-elliptic.

Moon Festival. *(C.sasanqua x C.reticulata).* Camellia Forest Nursery Catalogue, 1996, p.6, (CF.9): A well shaped shrub with the aspect of *C.sasanqua* and large, 12-15 cm diameter pink flowers produced in abundance. Blooms early to mid-season. Originated by Dr Clifford R. Parks, Chapel Hill, NC, USA as a seedling of *C.sasanqua* x *(C.sasanqua x C.reticulata).*

Moon Glow. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943: White, medium sized semi-double. Fendig, 1953, *American Camellia Catalogue* as 'Moonglow': A medium sized, pure white, semi-double, sometimes varying to incomplete double, 9.5 cm across. Outer petals are round. The centre of the flower consists of about 20 central stamens which intermix with 5-6 petaloids. The filaments are white and the anthers yellow. Leaves, dark green, narrowly-elliptic, 8cm x 3.2cm; stiff texture, apex long and thin, tapered base, obscure venation, shallow serrations. Plant habit, informal and willowy. Originated in the Magnolia Gardens, John's Island, South Carolina, USA. Orthographic variant: 'Moonglow'.

Moon Light on Tenrin Temple. *Camellias*, Y.C. Shen, 2009, p.219 with colour photo; Translation of the valid name **Tenrinji-gakkô.**

Moon Looking Through the Window. Newmans Nursery Catalogue, 1982-1983. Synonym for **Mado-no-tsuki.**

Moon Moth. *(C.sasanqua),* SCCS., 1952, *The Camellia Review*, vol.10, p.21: White, large single. Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III, pp.314, 315: Flower, single white with a flush of Rhodamine Pink 527/1 along some margins; to 9 cm broad. Buds, narrow elliptic; petals, 5-7, fair substance, undulated, almost spatulate if flattened, to 4.7 cm long x 2.5 cm wide, notched apices. Centre of flower: loosely arranged group of spreading stamens, greenish-yellow filaments, to 1.25 cm long, small, dull yellow anthers. Leaves: elliptic, channelled, dark glossy green, 6 cm x 3 cm; margins crenate, noticeable venation. Plant habit dense. Originated by McCaskill Gardens, Pasadena, California, USA. Orthographic variant: 'Moonmoth'.

Moon of Tago. Yashiroda, 1950, *American Camellia Yearbook.* p.15. Synonym for **Tago-no-tsuki.**

Moonbeam. *(C.pitardii.v. pitardii),* ACRS., 1988, *Camellia News*, No.107, p.10, Reg. No.361, color photo, p.12: Originated by Edgar R. Sebire, Wandin North, Victoria, Australia. A chance *C.pitardii* var. *pitardii* seedling that first bloomed 1982. The 10 cm x 5 cm, soft pink (RHS.CC.62D) flowers are incomplete double to rose-form double and are produced on a rapidly growing, upright, open plant, mid-season to late. Leaves elliptic, mid-green with a matt surface, fine serrations, acuminate apices, 6 cm x 3 cm. This has bud centre on opening, notched petals and is shed whole. Chinese synonym 'Yuexia'.

Moonglow. Magnolia Gardens and Nursery Catalogue, 1944-1945. Orthographic variant for **Moon Glow.**

Moonflower. *(C.japonica),* Outteridge, 1962, *1000 Named Camellias in Australia*, p.16: White, single. Large. Flowers mid-season. Originated in Australia, by E.G. Waterhouse, Gordon, NSW.

Moonlight. *(C.japonica),* McIlhenny Catalogue. 1941: White with pink overcast. Medium size, semi-double. Mid-season flowering. Originated by Domoto, California, USA.

Moonlight. (*C.sasanqua*), R.E.Harrison Nursery Catalogue, 1955-1956, p.37. A fine, creamy, ivory white, with semi-double, irregular petals, surrounded by a collar of outer petals. Early flowering. Mason's Nursery General Catalogue, 1959-1960: Large, white single. A synonym widely used in New Zealand for **Mine-no-Yuki.**

Moonlight Bay. *(C.japonica), American Camellia Yearbook*, 1982, p.176, Reg. No.1857: A very large, light orchid pink, semi-double, chance *C.japonica* seedling that blooms early to late. Originated by Nuccio's Nurseries, Altadena, California, USA. The 5 year old seedling first bloomed 1976. Flower size is 14.5 cm across. Plant growth is upright, dense and rapid with dark green leaves, 10cm x 5cm. Nuccio's Number 7628. See colour photo, front cover, SCCS., 1982, *The Camellia Review*, vol.44, No.l. Chinese synonym: 'Yueguangwan'.

Moonlight Sonata. *(C.japonica), American Camellia Yearbook*, 1961, pp.227, 228, Reg. No.586: A 12 year old chance seedling, originated by Andrew Surina, Sepulveda, California, USA. Plant

growth is dense and upright, partly spreading and rapid with medium, dark green leaves, 10 cm x 5.6 cm. The semi-double to loose peony flowers, 13 cm across x 6 cm deep, are soft, light pink with yellow stamens. Blooms mid-season to late. For colour photo see pl.118, p.61, *Encyclopedia of Camellias in Colour*, vol.II, 1978. Chinese synonym 'Yuiguangqu'.

Moonmoth. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.162. Orthographic variant for **Moon Moth.**

Moonrise. *(C.hybrid).* ACS, *The Camellia Journal*, Dec. 2002, p.20, Reg. No.2583. A hybrid of *C.granthamiana* x *C.reticulata* hybrid **Mouchang**, with white to blush pink semi-double blooms, pale yellow at the base. Originated by Nuccio's Nurseries, Altadena, Calif., USA, and introduced in their 2001 catalogue. Nuccio's #9606. *American Camellia Yearbook*, 2002, p.129, colour photo p.c10. The seedling first flowered in 1994. Flowers measure 14 cm across, with 12-15 petals. Plant is upright, open and vigorous, and flowers early to late. The dark green leaves are 10 cm long x 5 cm wide.

Moon's Reflection on Rice Fields. Yashiroda, 1950, *American Camellia Yearbook*, p.15. Synonym for **Tagato-no-tsuki.**

Moonsong. *(C.x williamsii). New Zealand Camellia Bulletin,* 1993, Issue No.114, vol.XVIII, No.1, p.33, Reg. No.331: Originated by N.G. Haydon, Papakura, New Zealand. Bloomed in 1984 at 4 years of age. A seedling of **Taylor Maid.** A plant of average growth habit and rate with mid-green leaves 9 cm long x 5 cm wide. Flowers formal double, 9 cm across x 3 cm deep, 68 petals, colour glowing coral red (RHS.CC.52A-B). Blooms from early to late season.

Moonstone. *(C.japonica)*, Wilmot, 1943, *Camellia Variety Classification Report* p.12: Large. Deep pink double. Originated in USA.

Moonstone Alba Plena. *(C.japonica)*, Wilmot, 1943, *Camellia Variety Classification Report*, p.12. No description. Originated in USA.

Moonstruck. (*C.cuspidata* hybrid). Nuccio's Nurseries Catalogue, 1996-1997, p.36. Nuccio's #8729. A *C.japonica* x *C.cuspidata* hybrid, originating at Nuccio's Nurseries, Altadena, Calif., USA. Striking red buds, opening to medium size single white blossoms, toned pink at the margins and near the centre. Medium, open, upright growth. Blooms mid-season to late.

Moore's Majestic. *(C.japonica)*, Cotten, 1948, *American Camellia Yearbook*, pp.50, 51: An unknown variety bought from Glen St Mary Nurseries about 1900 by Mrs Moore, Tylertown, Mississippi, USA. A large pink and white, incomplete double to rose form double. Blooms early to mid-season. Sport: **Emma Watkins.**

Mopsie. (*C.pitardii* hybrid), ACRS, 1987, *Camellia News*, No.103, p.22, Reg. No.351: Originated by Edgar Sebire, Wandin North, Victoria, Australia. A chance seedling from *C.pitardii* var. *pitardii* that first flowered 1982. The single to semi-double flower is small, pale pink, 5 cm across x 2 cm deep, and blooms early to mid-season. A dwarf, bushy, compact plant, colour RHS.CC.56C shading to 56D at the centre. Fluted petals, occasional petaloids and stamens in a column. Leaves, elliptic, flat with a matt green surface. acuminate apex and serrate margins, 6.5 cm long x 2.8 cm wide.

Moqiu. (Black Ink Ball), *(C.japonica)*, Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.84, colour photo [p.138]: Medium small, tight peony form of twisted and folded, red petals. No stamens visible. Leaves broad-ovate, mid-green, blunt acute apex, shallowly, coarsely serrate, yellow-ish midrib. Originated in China.

Moquin-Tandon. *(C.japonica)*, Le Texnier, 1911, *Le camellia, essais sur 1'histoire de quelques fleurs d'ornement*, p.29. Grown from seed by Goudet of Toulouse, France, after 1859. No description. (Believed extinct.)

Moragues. SCCS, 1958, *Camellia Nomenclature*, p.83. Orthographic error for 'Morange', synonym for **Grand Sultan** as 'Te Deum'.

Morange. Fruitland Nursery Catalogue, 1944-1945, p.27. Synonym for **Grand Sultan** as 'Te Deum'.

Moreana. *(C.japonica)*, Cachet Catalogue, 1840-1841, p.3. No description. Berlèse, 1840, *Monographie*, ed.2, pp.167, 232: Flower, small, double, cherry-red; the form and dimension of the flowers, similar to **Compacta Alba.** Originated in France. Orthographic errors: 'Morreana', 'Moreani'.

Moreani. Joseph Baumann, 1856, Prix Courant, p.4. Auguste van Geert Nursery Catalogue, No.65, 1869-1870, p.56. No description. Orthographic error for **Moreana.**

Moreira da Silva**.** *(C.japonica)*, Ferreira & Celina, 2000, *O Mundo da Camélia*, p.99 with colour photo; Bright red semi-double with broad, heavily fimbriated petals. Medium to large size. Flowers mid-season to late. Abbreviation and widely used name for **Alfredo Moreira da Silva.**

Morgan Elizabeth. *(C.japonica)*, ACS, *The Camellia Journal*, May 1998, p.18, Reg. No.2451. A small, pink, loose peony chance seedling. Flowers mid-season to late. Originated by Eileen C. Hart, Odessa, Fla., USA. *American Camellia Yearbook*, 1998, p.5, colour photo before p.1. The 12 year old seedling first flowered in 1992. Average flower size is 6.5 cm across x 3.8 cm deep, with 35-40 petals, 8-12 petaloids, white anthers and white filaments. Plant growth is spreading and average, with light green leaves 6.5 cm long x 3.2 cm wide.

Morgan Elizabeth. *(C.japonica)*, ACS, *The Camellia Journal*, May 1998, p.18, Reg. No.2451. A small, pink, loose peony chance seedling. Flowers mid-season to late. Originated by Eileen C. Hart, Odessa, Fla., USA. *American Camellia Yearbook*, 1998, p.5, colour photo before p.1. The 12 year old seedling first flowered in 1992. Average flower size is 6.5 cm across x 3.8 cm deep, with 35-40 petals, 8-12 petaloids, white anthers and white filaments. Plant growth is spreading and average, with light green leaves 6.5 cm long x 3.2 cm wide.

Morgan Whitney. *(C.japonica)*, Tammia Nursery Catalogue, 1969. No description. *American Camellia Yearbook*, 1971, p.48, Reg. No.1125: A 15 year old seedling of **Ville de Nantes,** originated by Ferol Zerkowsky, Slidell, Louisiana, USA. The plant growth is upright and rapid with dark green leaves, 9.5 cm x 3.2 cm. The semi-double to peony form bloom is peach pink with golden anthers and white filaments. Measured 10-12.5 cm across x 6 cm deep with 35 petals. Blooms early to mid-season. See colour photo, front cover, ACS., 1970, *The Camellia Journal*, vol.25, No.1.

Morgardi. *(C.japonica)*, Catalogo della Stablimento Agrario-Botanico de Castagnola e Casabono, 1867-1868. Originated in Italy. No description. (Believed extinct.)

Moribe-aka-yabu. (Crimson Wild Camellia from Moribe), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.193, colour photo and description: Medium size, deep crimson, campanulate single with 5 rounded, overlapping petals and a central stamen column with pink filaments, joined for the lower half, and yellow anthers. Blooms very early to mid-season. Originated in Moribe, Tanushimaru-chô, Kurume City, Fuku'oka Prefecture, Japan. Named and released by Tsutomu Sumi in 1985.

Morijiro. (Mori's White), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.3, p.2, description, p.84: Leaves dark green, undulate, elliptic to narrowly-elliptic, dull, venation somewhat impressed, 4.6-6.3 cm long x 1.7-3.3 cm wide. Petioles, pale green, hairy. Petals, 5-7, apex undulate and bilobate. Stamen cluster 2.4-2.8 cm high, 1.6 cm in diameter, filaments creamy with a touch of green. Late flowering. Originated by Mori, Yatsuo-machi, Toyama Prefecture, Japan.

Mori-no-hana. (Flower of the Woods), *(C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.16: Small to medium size, vivid red, tubular to campanulate single. Blooms mid-season.

Originated in the Tottori Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.264 with colour photo; English translation p.186. Leaves elliptic, medium size, flat. Upright, vigorous growth. Selected from wild japonicas by Nobuo Sasai in 1980, released in 1997.

Mori-no-hoshi. (Star in the Woods). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.264 with colour photo; English translation p.186. Miniature, dark red to purplish red, tubular to trumpet shaped single, thick petals, cylindrical stamen column. Flowers mid-season. Leaves elliptic, small, flat. Spreading, vigorous growth. Selected from wild japonicas growing in Shiroyama, Hamada City. Discovered by Toshiaki Nagahashi, named and released by Kôsaku Masuda in 1985. From Shimane Prefecture.

Môri-shiratama. (Môri's White Pearl), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.20, colour photo and description: Medium size, white, cup-shaped single of 5 irregular, crinkled petals and spreading stamen cluster with golden anthers. Blooms early to mid-season. Leaves deep green, broad-elliptic, apices acute, margins serrulate. Originated in Gifu Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.261 with colour photo; English translation p.184. Said to be a beloved camellia of Môri, the lord of Yagami Castle, Mino (old name of Aichi).

Môri-shiratama-shibori. (Môri's Variegated White Pearl), *(C.japonica),* Yokoyama. & Kirino, 1989, *Nihon no Chinka*, p.260, colour photo and description: Medium size, white to faint pink background with red streaking and peppering, cup-shaped single of 5-6 wide, rounded, overlapping petals, and a central, yellow, stamen cylinder. Blooms very early to mid-season. Leaves dark green, elliptic, apices acuminate, margins serrate, sometimes twisted. Originated in the Gifu Prefecture, Japan. A seedling of **Môri-shiratama.** Originated and released by Minoru Satô in 1972.

Môri-yobukodori. (Môri's 'Yobukodori'), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.65, colour photo and description: Medium size, white, with a pale pink cast, single with 5 emarginate petals of irregular form and a central stamen column with ivory filaments, joined for the lower half, and yellow anthers. Blooms mid-season to late. Leaves obolanceolate, dark green, apices acuminate, margins serrate. Originated in the Gifu Prefecture, Japan. A natural seedling of Môri-shiratama, named and released by Minoru Satô in 1960.

Morning Blush. *(C.japonica),* SCCS., 1942, *Classification of Camellias.* p.4: Pink, blotched white. Medium size, rose form double. Originated in USA by Hearn.

Morning Cloud. Yü & Bartholomew, 1980, *American Camellia Yearbook*, p.14. Synonym for **Zhaoxia.**

Morning Glory. *(C.japonica),* Nuccio's Nurseries Catalogue, 1957, p.11: White. Large, formal double, imbricated. Vigorous, upright, compact growth. Blooms early to mid-season. Originated in USA by Nuccio's Nurseries, Altadena, California.

Morning Glory. Bao, 1980, ACS., *The Camellia Journal*, vol.35, No.2, p.18. Invalid synonym for **Zhaoxia.**

Morning Glory. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.136. Invalid synonym for **Asagao.**

Morning Glow. *(C.japonica),* Fruitland Nursery Catalogue, 1948-1949, p.29: Medium white, formal double. Fendig, 1951, *American Camellia Catalogue:* Medium, porcelain white, formal double, 8-10 cm across x 5 cm deep with about 100 petals. Buds are round and light green. Similar to, but larger than 'Alba Plena'. Does not lie flat on opening. Leaves, medium, glossy green, lanceolate, 9 cm x 4 cm; texture thin, acuminate, deep serrations. Midrib light green. Plant habit compact, upright, columnar and vigorous. Originated by J.S. Bradford, Ocean Springs, Mississippi, USA from seed of unknown parents in 1928. First flowered 1943. Reg. No.77, *American Camellia Yearbook*, 1954, p.325. Synonym: 'St Mary'.

Morning Joy. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.163: Medium size, peony form, pale pink, striped crimson. Originated in USA.

Morning Mist. *(C.japonica),* Magnolia Gardens and Nursery, 1942-1943: White, medium large, semi-double. Originated at Magnolia Gardens, John's Island, South Carolina, USA.

Morning Sky. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.256. Synonym for **Asahi-no-sora.**

Morning Sun Piercing Through Rainbow. ACS, Yearbook 2011, p.13 with colour photo; Originated by John Wang, Calif., USA. Name invalid as too lengthy.

Morohito. (Master of an Art), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.151, colour photo, p.252, description: Small compact single with 4 white petals and a central column of stamens with yellow anthers and white filaments. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.34, colour photo and description: Leaves narrow-elliptic, dark green, apices tapering acuminate, recurved, margins serrulate. Blooms mid-season. Originated in Kantô area Japan. Named by Sae Suzuki, released by Hiroshi Suzuki around 1974.

Morokakeshiro. (Morokake's White), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.354: Large, white, open peony form with stamens and petals intermixed in the centre. Originated in Japan. (Believed extinct.)

Morreana. Cachet Catalogue, 1845-1846, p.4. Orthographic error for **Moreana.**

Morris Gwaltney. *(C.japonica),* Shackleford, 1971, ACS., *The Camellia Journal*, vol.26, No.4. No description. Originated in USA.No valid listing located.

Morris Mercury. *(C.japonica)* ACS, *Yearbook* 2011, p.105. Collected before 1986 as seed from South Korean islands by representatives of the Morris Arboretum, USA. Upright, open, arching growth habit. Autumn flowering plus some spring flowers. Cold hardy, but some foliar damage in severe winters. Red single flower.

Morris Moughon. *(C.japonica), American Camellia Yearbook*, 1966, p.97, Reg. No.905: An 8 year old chance seedling that first bloomed 1960. Originated by G.W. Moughon, Birmingham, Alabama, USA. Plant growth is upright, open and rapid with dark green leaves, 10.3 cm x 6 cm. The rose form double flower is light pink, moired with white and has yellow anthers and white filaments. It measures 13 cm across x 6.5 cm deep and has 30+ petals. Flowers mid-season to late. SCCS., *Camellia Nomenclature* says that it is reported to be the same as **Rosea Superba Variegated.** See colour photo, inside front cover, 1965, ACS., *The Camellia Journal*, vol.20, No.4.

Mortiana. *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1856-1857, No description. Originated in Italy. (Believed extinct.)

Moss Point Red. (*C.japonica*), Sunny Knoll Nursery & Orchard Co. Wholesale Price List, 1939. Red, large, loose peony form, open growth. Mid-season blooming. Originated in USA. Synonyms: 'Dolly Bowen'. 'Pride of Moss Point'.

Moss Point Variegated. (*C.japonica*), Vanderbilt, 1941, *Camellia Research, II,* p.5 as 'Moss Point Varie.'. No description. McIlhenny Catalogue, 1946-1947, p.9: Medium sized, rose colour, veined rosered and heavily mottled with white; double; the outer petals broad, inner petals irregular. Originated in USA by Woodland. Synonym: 'Cleopatra'(Anthony), 'Mark Anthony's Cleopatra'. Sports: **Moss Point Pink, Moss Point Red.**

Most Precious. (*C.japonica*), *American Camellia Yearbook,* 1960, p.203, Reg. No.486: An 11 year old chance seedling that first bloomed 1957; originated by E.S. Simpson, Pensacola, Florida, USA. Plant growth habit is upright and medium with light green leaves, 8 cm x 4.5 cm. The light, rose-pink, semi-double flowers, similar to 'Herme', (**Hikarugenji**) are 10.5 cm across x 5 cm deep with 28 petals and 12 petaloids mixed with yellow stamens. Blooms mid-season.

Mostruosa. Maupoil & Figlio Catalogue, 1847. Orthographic error for **Monstruosa.**

Mota Jiaoashou. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.308. Chinese synonym for the European hybrid **Professor Gianmario Motta.**

Mother of Pearl. (*C.japonica*), SCCS., Bulletin, vol.11, No.2, 1949: Light creamy white with lines of pink at base of petals. Large rose form double. Compact growth. Blooms mid-season to late. Fendig, 1951, *American Camellia Catalogue* with colour illustration: Medium to large white with pink streaks, complete double, incompletely imbricated (rose form) 8.5-10.5 cm across. The pure white petals are delicately marked at the base with very short streaks of soft pink, giving a pink glow to the flower centre. When fully open there is a cluster of short yellow stamens, sometimes intermixed with small white petaloids, which give a creamy tint. Leaves, dark green, oval, 7 cm x 3.2 cm, margins finely indented. Plant habit, compact, upright and profuse bloomer. Similar in form to 'Baronne de Bleichroeder' (United States), (**Otome-shibori**) of which it is a sport. It was imported from Japan to USA in 1937 by Camellia Hall, Sacramento, California and named by Roy Wilmot and registered with ACS. *American Camellia Yearbook*, 1954, p.325, Reg. No.46. It is possible that it has an older Japanese name. See p.246, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II for black and white photo.

Mothers Day. *(C.sasanqua). New Zealand Camellia Bulletin,* March 2001, Issue No.138, vol.XXII, No.2, p.20, Reg. No.420. Registered by G. & A.B. Reynolds, Hamilton, New Zealand. A sport of *C.sasanqua* **Plantation Pink,** first recorded and propagated in 1994. The flower is of single form, 9 cm diameter x 2 cm deep. The 8 petals are slightly waved and bilobed, white with a slightly uneven edge of mid-pink (RHS.CC.55B). The prominent stamens have butter yellow filaments with chrome yellow anthers, and the flower has a strong scent. The plant is upright, dense and of rapid growth with dark green leaves 5 cm long x 3.5 cm wide.. Flowers in autumn. Note: Mothers Day in New Zealand is held in mid-May, which is also autumn.

Mothers Day (Marian Grove). *(C.sasanqua)* C. Aust., *Camellia News,* Autumn 2011, No.185, p.20 with colour photo; Regn No.656-N. Chance seedling of **Jennifer Susan**, first flowered 2002. Originated by Justin O'Malley Jones, Marian Grove Nursery, Mangrove Mountain, NSW, Australia. Large semi-double to informal double, white to blush pink, in flower for the May Mothers Day. A few cream filaments with pollen which soon darkens. Strong upright grower. Being offered commercially as 'With Love'.

Mother's Red. *(C.japonica),* Orton Nursery Price List, 1947-1948. No description. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.51: Light red. Medium large, semi-double. Vigorous, compact growth. Originated in USA by the Orton Nursery.

Mrs. Abby Wilder. *(C.japonica),* Hovey, ed., 1846, *Magazine of Horticulture*, 12:108: Originated by Wilder. This name was given by the committee on flowers in honor of the lady of the President of the Massachusetts Horticultural Society. A vigorous shrub of upright growth; strong branches, large foliage. Leaves 10 cm. long x 6 cm wide, roundish oval, rather reflexed, coarsely dentated, acuminate, midrib and nerves pale and prominent, yellowish green, resembling the variety 'Lady Hume', (**Incarnata**); bud round with pale green scales; flower large, about 10 cm across, very circular, of great depth, full and perfect; petals very numerous, the exterior rows broad, circular. gradually diminishing in size to the centre, arranged with regularity; colour azure white, with an occasional suffusion of light rose, somewhat after the style of the **Duchesse d'Orleans**. Raised from seed of **Middlemist's Red,** fertilized by 'Pomponia' (**Pompone**) by Marshal P. Wilder, Massachusetts, USA. It was sold to James L.F. Warren, a Boston nurseryman, together with **Wilderi** for $1000 in 1846. Verschaffelt, 1848, *Nouvelle Iconographie*, Book XI, pl.II and ibid: 1853, Book V, pl.III as 'Mistriss Abby Wilder'. Being a very popular camellia, it received many orthographic errors and variants including: 'Abbie Wilder', 'Abby Wilder', 'Madame Abbey Wilder', 'Madame Abby Wilder', 'Miss Abby Wilder', 'Mistriss Abbey Wilder', 'Mrs Abbi Wilder', 'Mrs Abbie Wilder', 'Mrs Abby Wilver', 'Mrs Abbey P. Wilder', 'Mrs Abbey Wilders', 'Mme Abby Wilder', 'Mrs Abby P. Wilder', 'Abbey (Mrs) Wilder', 'Mrs Abby Wilder I', 'Mistriss Aby-Wilder', 'Addy Wilder', 'Mrs Abbey P. Wilder', 'Mistriss Alby Wilders'. Synonyms: 'Wilder's Alba', 'Wilderi Alba'. Sports: **Reine des Beautés, Paolina Armari.**

Mrs Anne Marie Hovey. *(C.japonica)*, Hovey's Catalogue of New Plants for 1872, p.43: Large, formal double. Its most remarkable character is its quality of producing flowers in many different colours. The prevailing colour is a clear, waxy white, delicately pencilled with crimson, but many are of darkest carmine. Some are of deep shades of blush; others blush striped carmine, some white tinted rose; others white stained and marbled carmine; some half white and half deep rose or occasionally pure white. Mid-season blooming. Plant habit is erect and symmetrical; leaves, medium size, deep green. Originated by C.M. Hovey, Boston, Massachusetts, USA. See black and white photo, p.163, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III. Orthographic variants and errors: 'Mrs A.M. Hovey', 'Madame Hovey', 'Souvenir of Mme Marie Hovey', 'Anamarie Hovey', 'Mme Hovey', 'Anna Maria Hovey', 'Lady Hovey', 'Miss Anne Maria Hovey', 'Mrs Anne M. Hovey', 'Mrs Hovey', 'Mrs Annie Maria Hovey', 'Anne Marie Hovey', 'Mrs A.W. Horveney', 'Miss Annemarie Hovey'. Sports: **Mrs Anne Marie Hovey White, Mrs Anne Marie Hovey Blush.** Received an RHS., First Class Certificate in 1897.

Mrs Fetters. *(C.japonica)*, Buist, 1852, *American Flower Garden Directory*, ed.5, p.214: Large, dark red, shading to rose in the centre, perfectly imbricated; fine, round petals, very regularly disposed; foliage dark green. Originated in USA. Orthographic errors: 'Madame Feters', 'Madame Feter', 'Mrs Tetters'. Orthographic variant: 'Madame Fetters'.

Mrs Fisher Simmons. *(C.japonica)*, McIlhenny Catalogue, 1946-1947, p.9: Medium sized, pure white, double; outer petals turned down; inner petals whirling in a compact ball. Blooms mid-season. Originated in USA at Jungle Gardens, Avery Island, Louisiana.

Mrs Francis Roberts. *(C.japonica)*, *American Camellia Yearbook*, 1980, p.171, Reg. No.1662: A medium, dark red, semi-double *C.japonica*, mutant of **Ville de Nantes** grafted onto 'Pope Pius IX' (**Prince Eugene Napoleon**) that blooms mid-season to late. Originated by O.D. Roberts, Tallahassee, Florida, USA. First observed 1968. Flower size 10 cm across x 4.5 cm deep. The flower has 4 rows of petals of 4-5 per row, with 4-5 upright petals in the 5th row. Anthers and filaments are yellow. Plant growth is average with light green leaves, 7.5 cm long x 3.2 cm wide.

Mrs Francis Saunders. Doty & Doerner Nursery Catalogue, 1942, p.24. Synonym for **Yukimiguruma,** erroneously as 'Amabilis'.

Mrs Frank Bisbee. *(C.japonica)*, *American Camellia Yearbook*, 1971, p.49, Reg. No.1149: A 3 year old chance japonica seedling that first bloomed 1969. Originated in USA by F.D. Bisbee, Jacksonville, Florida. Plant growth is spreading and rapid with dark green leaves, 12 cm x 3.8 cm. The peony form bloom is white with 23 rabbit ears, yellow anthers and white filaments. It measures 12.5 cm across x 8 cm deep with 35 petals and 8 petaloids. Blooms early to mid-season.

Mrs Frank Boykin. *(C.japonica)*, Harris' Longview Nursery Retail Price List, 1955-1956, p.12. No description. Originated in USA.

Mrs Fred Sanders. Lindo Nurseries Price List, 1941-1942. Orthographic error for 'Mrs Sander', synonym for **Gauntlettii.**

Mrs Fred Saunders. *Camellia Digest*, 1(1), 1942. Orthographic error for 'Mrs Sander', synonym for **Gauntlettii.**

Mrs Freeman Weiss. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue 1942-1943. No description. 1945-1946 Catalogue: A Magnolia Gardens seedling, semi-double pink, of loose construction with wavy petals and petaloids mixed with stamens. Foliage light green. Fendig, 1951, *American Camellia Catalogue:* Medium to large, soft pink, anemome form, 9.5-11 cm across. The flower is of loose construction, there being two tiers of outer petals and a centre, sometimes cup-shaped, of semi-erect petals and petaloids. The petals are obovate, 4 cm long, wavy and notched. Yellow anthers, stamens, mingle with central petals and petaloids. Leaves

medium to light green, oval, 8 cm x 4 cm. Plant habit is vigorous, compact and upright. Originated of seed of unknown parents and originated at Magnolia Gardens, John's Island, South Carolina, USA. Sport: **Mrs Freeman Weiss Variegated**. Synonym: 'Mrs Freeman Weiss Rosea'.

Mrs Freeman Weiss Rosea. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.165. Synonym for **Mrs Freeman Weiss.**

Mrs Freeman Weiss Variegated. *(C.japonica),* Fruitland Nursery Catalogue, 1946-1947, p.29 as 'Mrs Freeman Weiss Var.': A virus variegated form of **Mrs Freeman Weiss** - Rich pink and white. Originated in USA. Chinese synonym 'Fuse Weisi Nüshi'.

Mrs Fritz Saunders. The Pacific Camellia Society, 1946, p.26. Orthographic error for 'Mrs Fritz Sanders', synonym for **Triphosa.**

Mrs Fumiko. *(C.japonica),* JCS., 1973, *Tsubaki* No.12, p.3, colour photo: Medium size, 8-10 cm across, full peony, creamy white with some faint pink stripes. Mid-season flowering. Originated in the market garden of Haginuma, Kowasaki City, Japan by Morimoto Haru.

Mrs G.G. McLaurin. *(C.japonica), American Camellia Yearbook,* 1966, p.97, Reg. No.903: A 12 year old seedling of 'Donckelaeri', (**Masayoshi**) that first bloomed 1965. Originated by G.G. McLaurin, Dillon, South Carolina, USA. Plant growth is upright and average with dark green leaves, 9.5 cm x 4.5 cm and resemble those of 'Donckelaeri'. Blooms variable, semi-double or loose, irregular peony to anemone form. Size 11-15 cm across. Colour ranges from rose-pink to dark red, from the lighter colour of **R.L. Wheeler** to the dark red of 'Glen 40'. Flowers early to late. See colour photo: ACS, 1965, *The Camellia Journal,* vol.20, No.3, inside back cover.

Mrs General Lee. *(C.japonica), Gardeners' Monthly,* Oct.1875, p.297. Originated by John Feast, Massachusetts, USA. No description. (Believed extinct.)

Mrs Gentry Kidd. *(C.japonica), American Camellia Yearbook,* 1962-1963, p.222, Reg. No.594: A 6 year old chance seedling that first bloomed 1961. Originated by Dr Gilbert Fisher, Union Springs, Alabama, USA. Plant growth is upright and rapid with dark green leaves, 10 cm long x 3.8 cm wide. The peony form flowers, similar to **Daikagura,** are cerise-pink with no stamens, 13 cm across x 5.5 cm deep with 30 or more petals. Bloom has fluorescent sheen with petals in swirls. Flowers mid-season.

Mrs George Bell. (*C.japonica*), *American Camellia Yearbook,* 1979, p.109, Reg. No.1563: A large, sweet pea pink, loose peony form *C.japonica* chance seedling of **Tiffany.** Blooms mid-season. Originated by Clark Thomas, San Dimas, California, USA. The 8 years old seedling first bloomed 1978 and has 27-30 petals, 7 petaloids and yellow anthers. Average size, 11 cm across x 7.5 cm deep. Dark pink, lightening with age. Plant growth is upright and rapid. See colour photo, front cover, SCCS., 1980, *The Camellia Journal,* vol.41, No.4. Chinese synonym 'Beier Nüshi'.

Mrs Wood Supreme. Belle Fontaine Nursery Catalogue, 1961. Abbreviation for **Mrs Baldwin Wood Supreme.**

Mrs Woodrow Hathorn. *(C.japonica)*, *American Camellia Yearbook*, 1980, p.171, Reg. No.1614: A medium oxblood red, almost black at petal edge, semi-double to anemone to peony form, *C.japonica* chance seedling that blooms mid-season to late. Originated by Jon Laird Carvain, Dallas, Texas, USA. The 6 year old seedling first flowered 1976. Size is 9.5 cm across x 7 cm deep with 32-47 petals, 40-75 petaloids, red anthers and sulphur yellow filaments. Plant growth is upright, dense and rapid with dark green leaves, 8 cm x 4.5 cm.

Mrs Wright. *(C.japonica)*, Sheathers Nursery Catalogue, 1877: Crimson with some petals marked with white. Medium, formal double. Flowers mid-season. Originated in Australia by Silas Sheather, N.SW.

Ms Mo. (*C.pitardii* hybrid), Heartwood Nursery, Seedling List 2009; A 14 cm diameter, rich pink peony form. Flowers mid-season. Plant strong, upright and well branched. Every flower a little different. A cross of *C.pitardii* x **Tom Knudsen**. Originated by Heartwood Nursery, Fort Bragg, Calif., USA

Mss. of Exeter. Seidel, 1846, Pflanzen Catalog, p.9: Abbreviation for **Marchioness of Exeter**. See ICS Register, p.1171.

Mt. Shasta. Nuccio's Nurseries Catalogue, 1949-1950. Abbreviation for **Mount Shasta.**

Muaya-shibori. (Plain Variegation), *(C.japonica)*, Yashiro, 1841, Ichijima reprint, 1906, *Kokon Yôrankô*, vol.310, 'Grasses and Trees', 1789. No description. Originated in Japan. (Believed extinct.) Note: It is possible that this was a corruption of **Murui-shibori.**

Mucronata. *(C.japonica)*, J.E. von Reider, 1834, *Die Beschreibung und Kultur der Azaleen, Cactus, Camelien..*, p.182. No description. Originated in Germany. (Believed extinct.)

Mudan Cha. (Peony Camellia), *(C.reticulata)*, Fang, 1930. *Diannan Chahua Xiaozhu.* It has many petals and is as large as a peony. The colour is silver red and the stamens are very beautiful. The leaves are thick and deeply serrated. Feng et al, 1986, *Yunnan Camellias of China*, p.92, colour photo: Leaves elliptic-ovate, apices long-acute, bases cuneate, veins conspicuously sunken above, 6-9 cm long x 2.7-4.4 cm wide. Flowers light pink (RHS.CC.62A), lighter at maturity to nearly spinel pink, diameter 11-16 cm. Petals about 30 in 5-6 whorls; outer whorls ovate, flat; inner whorls folded, curved, sometimes 2-3 petals connate at the base, forming a typical globose camellia. Stamens numerous, divided into 2-3 whorls by curved petals. Pistils rudimentary, flattened. This cultivar has large flowers with folded and curved petals, and a raised centre. The flowers look like those of a tree peony. It is characterised by its deeply sunken veins, strongly growing buds, well-branched and well foliated growth habit, round crown, dwarf habit and few flowers. Flowers mid-season. Different readings: 'Moudan Cha', 'Mou-tan Ch'a', 'Moutancha'. Synonyms: 'Peony Camellia', 'Peony Flower', 'Peony Flowered'. For colour photos see: *American Camellia Yearbook*, 1980 facing p.14. Feng et al., 1981, *Yunnan Shanchahua*, p.133. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.161. Front cover, 1967, *New Zealand Camellia Bulletin*, vol.V, No.4.

Mudan Diaxue. (White Spotted Peony), *(C.japonica)*, Liu, 1959, *Chungkuo Mingti Chung Huahui:* Medium sized peony form with large petals, red with white spots. Different reading: 'Mou-tan Tien-hsueh'. Synonym: 'White Spotted Peony'.

Mudanhen. (Envy of Peony), *(C.reticulata)*, Gao & Zhuang, 1989, *The Camellia in China*, p.57, No.378, color photo, No.236: Medium size, 10-12 cm across, crimson, open peony form with 18-24 large, rounded petals, including a few folded, erect centre petals; stamens in 4-5 fascicles. Leaves midgreen, elliptic, 7.5-9.5 cm long x 4-4.5 cm wide. Blooms mid-season. Originated in Tengchong, Yunnan Province, China.

Mudankui. (Chief Peony), *(C.reticulata)*, CSC., June,1989, *Report of the Camellias of China*, p.3: Butterfly wings type. Pink, outer petals large and flat, inner petals becoming gradually smaller, upright like butterfly wings, 8-12 cm across, petals 60-100 (rarely 30-40). The outer margin of the petals is slightly lighter in colour, while the base is darker. Stamens are numerous, in several groups, mingling with the petals and giving the appearance of several clusters. Pistil degenerate; style flat and thin, cleft to the ovary. Blooms very early. Leaves ovate to ovate-lanceolate, incurved length-wise in a broad Vee; surface smooth in young plants and somewhat bullate when old trees, 8-11 cm long x 4.5-6 cm wide. Originated in the wild in Tengchong County, Yunnan, China.

Mudôka. (Flower of Mudo), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.112, colour photo and description: Medium size, soft pink, tubular to campanulate single with short, yellow stamen cylinder. Leaves deep green, broad-ovate, apices blunt-acute, margins serrate.

Blooms very early to mid-season. Originated in the precincts of the Mudo Temple, Gifu Prefecture, Japan. Collected and named by Minoru Satô in 1976.

Mueller's White. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Pax.**

Muhenkaku. (Legendary Chinese Palace), *(C.sasanqua),* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13 as 'Muhen-kaku': Pink, medium sized, double. Originated in Japan.

Muhonglian. Gao & Zhuang, 1989, *The Camellia in China*, p.60, No.401, colour photo No.258. Orthographic error for **Shuihonglian.**

Mukan. (Without Office), *(C.japonica),* Yashiro, 1841, *Kokon Yôrankô*, vol.209; *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.33: Deep red, rose form double. Different reading 'Bukan'. Originated in Japan. (Believed extinct.)

Mukashi-otoko. (See Note), *(C.japonica),* Sakuden, 1630, *Hyakuchinshû-:* Light pink, large single, petals thick and broad, opens flat; occasional blooms pure white. Originated in Japan. (Believed extinct.) Note: The name refers to Ariwara-no-Narihira, a famous poet and character in the classic literature *Ise-monogatari* as each chapter begins with "Mukashi otoko ari-keri", which means "once upon a time there was a man".

Mukôfue. (Japanese flute with no holes), *(C.sasanqua),* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Deep pink slightly splashed white on outer petals. Large, semi-double with round petals. Originated in Japan.

Mukuchijima. (Mukuchijima Island), *(C.japonica),* Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.206, p.65, description, p.213: Red, variegated white, formal double with large petals and a bud centre. Leaves, semi-glossy, dark green; broadly, shallowly serrate. Selected by Yoshiaki Andoh from wild japonicas on Mukuchijima Island, Okayama Prefecture, Japan.

Mukuge. (Rose of Sharon), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.115: Small, campanulate, single pink with a paler pink base. Originated in Japan. (Believed extinct.)

Mukuge. (Rose of Sharon), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.531: Medium sized, white, open peony form with gold anthers and white filaments. Originated in Japan. (Believed extinct.)

Mulanwang. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for the Japanese *C.japonica* **Hagoromo** as 'Magnoliiflora'.

Mulberry Number 11. *(C.japonica),* Slocum, 1949, *American Camellia Yearbook*, p.321 as 'Mulberry No.11': Pink, semi-double, originated by Lawrence Walker, Mulberry Plantation, Charleston, South Carolina, USA. Orthographic error: 'Mulberry Noll'.

Mulberry Noll. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Mulberry No.11.**

Mulinette. Rovelli Catalogue, 1874. Orthographic error for **Millinetti.**

Muller. Isola Madre Catalogue, 1845. No description. Synonym for **Muller d'Italie.**

Muller d'Italie. *(C.japonica),* van Houtte Catalogue, 1843-1844, 12:aaa: Deep glowing red, centre lined with white. van Houtte Catalogue, 1846-1847, 27:28: Beautiful flower, often 12 cm in diameter, deep, glowing red, with pure white central stripe. Obtained as a seedling by Rovelli Bros, Iles Borromees, Italy. Synonym: 'Muller'. Note: Rovelli, 1852, Catalogue description is "Very large, vivid pink, marbled white".

Mulligan's Pink. *(C.japonica),* Camellia Forest Nursery Catalogue, 2008, p.16; Found by John Weigel, Greensboro, N.C., USA, growing in the garden of a neighbour. Cold hardy. Medium size, pale pink, peony blooms. Late flowering. Leaves show considerable virus mottling.

Multiflora. Scheidweiler, 1833, *Horticole Belge Journal Jardin Amateurs*, 1:121, Expositions Horticoles, Louvain. Entered for 'Rarest Plant': *Camellia multiflora* (von Siebold), exhibited by M. Donckelaer, Chief Gardener for Botanic Gardens of Louvain. Berlèse, 1837, *Monographie*, ed.1, No.48 as *C.sasanqua rosea plena* or 'Multiflora'. From the description, this appears to be the species *C.maliflora*, however, according to Berlèse, 1843, this was received from Japan by Donckelaer at the same time as **Ochroleuca**, which makes this doubtful as *C.maliflora* originally came from China in 1816.

Multiflora. *(C.x williamsii)*, ACRS., 1971, *Camellia News*, No.43, p.34, reg. No.139: Originated by E.L. Ansell, Lilydale, Victoria, Australia. Parent is a *C.saluenensis* chance seedling, first bloomed 1967. Habit is compact, slightly spreading and vigorous. Flowers are 8 cm across, fuchsine pink, HCC.627/1 with deeper veining. Leaves, dark green, 10 cm x 7cm, broad-elliptic to lanceolate, base cute, apex acuminate, margins medium serrate. Note: According to the Horticultural Code, this is an illegal name, being of latin form after the cutoff date of 1958.

Multipetala. *(C.japonica)*, Felix & Dykhuis Nursery Catalogue, 1939: Dark red, formal double, cup shaped. Originated in Netherlands.

Multiplicata Incognita. *(C.japonica)*, Jules Menoreau, Nantes Nursery Catalogue, 1856, p.8. No description. (Believed extinct.)

Mumeimiyata-maetachi-otome. ('Otome' from Nameless Miyata's Garden), *(C.japonica)*, Aoyama, *Sômoku Kihin Kagami*, 1827, according to Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.147. White variegated leaves. See Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.162. Different reading: 'Miyata-maetachi-otome'. Originated in Japan. (Believed extinct.)

Mumei-tsubaki. (Nameless Camellia), *(C.japonica)*, Mizuno, 1829, *Sômoku Kinyôshû*, vol.5 in the section on white variegated leaves. Originated in Japan. (Believed extinct.) Synonym: 'Shôroku--tsubaki'.

Mume-Red Osmanthus Leaf. Yü & Bartholomew, 1980, *American Camellia Yearbook*, p.13. Synonym for **Meihong Guiye.**

Munayama Vera. Maupoil & Figlio Catalogue, 1853-1854, p.38. Orthographic error for **Murrayana Vera.**

Mundii. *(C.japonica)*, Verschaffelt Catalogue, No.50, 1844, p.21. No description. (Believed extinct.)

Mund's Camellia. *(C.japonica)*, Rehder, 1955, *American Camellia Yearbook*, p.240: An ancient Camellia in the Oakdale Cemetery, Wilmington, North Carolina, USA. Double, light pink, medium sized flower which blooms in mid-season and is not unlike **Brooklynia** but is lighter in colour. Planted about 1860.

Muon-no-yuki. (Silence of the Snow), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, pp.74, 75, colour photo and description: Small size, soft, apricot pink, wide, campanulate single, with 5-6 wide, overlapping, somewhat reflexed petals and a central stamen column with bright yellow anthers, and ivory filaments, joined for the lower half. Blooms early to mid-season. Leaves dark green, elliptic, apices long acuminate, margins serrate. Selected from wild japonicas in Hamada City, Shimane Prefecture, Japan. Named and released by Kôsaku Masadu in 1980.

Murage. (Ancient name for Master of Iron Refining), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.216, colour photo and description: Small size, bright red, campanulate single with 5 rounded, emarginate, overlapping petals and a central stamen column with pink filaments and pale yellow degenerate anthers like Wabisuke. Blooms mid-season. Originated in Matsu'e City, Shimane Prefecture, Japan. Named and released by Naruto Kaji in 1980.

Murajana Vera. Isola Madre Catalogue, 1845. Orthographic error for **Murrayana Vera.**

Murakumo. (Dense Cloud), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki*, *Irohanayose Irotsuki:* Soft pink with red spots. Large size. Stamens in divided clusters. Originated in Japan. (Believed extinct.)

Murakumo. (Dense Cloud), (Higo), Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.73: Light pink, splashed and dotted with white, irregularly margined white, single with 9 petals; stamens widely spread. See Seibundô Shinkôsha, 1979, *Senchinshû*, p.251. Originated in Kumamoto Prefecture, Japan.

Murakumo-Kansai. ('Murakumo' from Kansai), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.148, colour photo, p.251, description: as 'Murakumo': Red single, cup-shaped with 5 slightly cleft petals a litte reflexed; broad stamen column, anthers yellow, filaments pink. Leaves semiglossy, mid-green, elliptic to narrow-lanceolate, acuminate apex, margins finely, shallowly serrulate. Originated in Kansai District, Japan. Appeared in the lists of Katayama Juraku'en Nursery in 1960s.

Murakumo-kasuri. (Variegated 'Murakumo'), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.317: Medium sized, white with red dashes and lines and a few small, erect petals in the centre. Originated in Japan. (Believed extinct.) Different reading: 'Murakumono-kasuri', 'Murakumo-tobi'iri'.

Murakumono-kasuri. Watanabe, 1970. Kyôto Engei Kurabu, *Tsubaki*, *Tokushû*, No.10, p.147. Different reading for **Murakumo-kasuri.**

Murakumo-tobi'iri. Different reading for **Murakumo-kasuri.**

Muramatsu. (Place name), *(C.rusticana)*, Inazawa Nurseries Co. Pty. Ltd. Catalogue, 1986-1987, p.5, A-229: Pale peach pink. Medium sized single, tubular to cup-shaped blossoms with frilled petal edges. Blooms early to late. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.80. Originated in Muramatsu Town, Niigata Prefecture, Japan. Collected by Seiji Kabuto, named by Akira Haba. Orthographic error: 'Maramatsu' .

Muramusume. (Village Maiden), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.198, p.100, description, p.148 as 'Mura-musume': Leaves narrowly-elliptic, apices long-acuminate, petioles thin and glabrous. Flowers, double, dark rose (Spinel Pink 0023); petals small, incurved, emarginate; stamens intermingled with irregularly formed petaloids, streaked white. Late flowering. Originated in a Buddhist Temple, Hôkyôji, Kyôto-shi, Japan. For colour photos see: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.399. Andoh, 1971, *Tsubaki*, *Meika no Shôkai to Saibai*, pl.34, p.13. Seibundô Shinkôsha, 1979, *Senchinshû*, p.149.

Mura-odori. (Village Dance), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.146, p.73, description, p.131: Branches spreading, leaves dark green, elliptic or narrowly obovate-elliptic, crenate, 7.39.1 cm long x 2.9-4.2 cm wide; petioles 9-12 mm long, glabrous. Flowers, single, rosy pink (Rose Madder 23/1), when fully open, petals are strongly recurved, 5-6 in number, largest, 5.6 cm long x 3.6 cm wide. Stamens 4 cm high, filaments pink. Flowers mid-season. Collected at the University of Tokio, Garden of Useful Plants in Izu Peninsula, Shizuoka Prefecture, Japan.

Murasaka-tsubaki. Fendig, 1953, *American Camellia Catalogue.* Corruption of Japanese name **Murasaki-tsubaki.**

Murasaka-tsubaki-shibori. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Murasaki-shibori.**

Murasaki. (Purple), *(C.japonica)*, *Chinka Byôbu*, (Latter 17th Century), owner, Hirayama, Tokuo; Yashiro, 1841, *Kokon Yôrankô*, vol.309. Both no description. See Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.48. Originated in Japan. (Believed extinct.)

Murasaki. (Purple), *(C.japonica)*, Inazawa Nursery Co. Pty, Ltd, Catalogue, 1986-1987, p.7, A-334: Dark purple, peony form, medium sized bloom. Originated in Kurume City, Fuku'oka Prefecture, Japan. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.369, colour photo and description: Medium size, purplish, peony form with outer guard petals enclosing the centre of small, irregular petals, of more or less hemispherical form. Leaves mid-green, broad-elliptic, apices blunt-acute, margins serrate. Blooms mid-season to late. The depth of its purple colour depends on the climate and soil condition.

Murasaki-no-ue. (Lady Purple), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.233, colour photo and description: Medium size, purple colour, tubular to campanulate single with central stamen column and white filaments, joined for the lower third and yellow anthers. Blooms mid-season to late. Leaves dark green, broad-ovate, apices acuminate, margins serrate, rolled under. Originated in Okayama Prefecture, Japan. Found by Sasai Tsubaki-en. Note: The purple colour is more stable and constant than with other purplish camellias. Note: Murasaki-no-ue was one of the heroines of the classic Japanese novel *Genji-monogatari.*

Murasaki-ô-kasuri. (Purple with Large Patches), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.218: Large single with 6-7 large, irregular petals; white, washed with pink and streaked vermilion. Originated in Japan. (Believed extinct.)

Murasaki-shibori. (White Spotted Purple), *(C.japonica)*, Minagawa, 1933, *Chinkashû;* Wada, 1941, *Japanese Garden Treasures*, p.30 as 'Murasakitsubaki-shibori': (Marked Purple Camellia), light purple with white markings, fully double of the **Otome** class. Tuyama, 1966, *Camellia Cultivars of Japan*, pl.206, p.364: A variegated form of **Murasaki-tsubaki** - Violet rose, blotched with white, formal double with 6-7 rows of petals becoming pointed towards the centre. Originated in Kantô, Japan. Synonym: 'Murasaki-tsubaki-shibori'. For other colour photos see: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.424, p.177. Seibundô Shinkôsha, 1979, *Senchinshû*, p.148.

Murasaki-shikibu. (Name of famous Woman novelist of 11th Century), *(C.japonica)*, Inazawa Nurseries Co. Pty. Ltd. Catalogue, 1986-1987, p.4, A-193: Wisteria, peach pink, large, semi-double. Originated in Japan.

Murasaki-tsubaki. (Purple Camellia), *(C.japonica)*, Itô, Ko'emon, 1879, *Chinkashû*, under 'New Performance': Purplish red, medium, full double. For colour photo see: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.397, p.167, description, p.351: A medium sized, full, formal double with petals becoming pointed towards the centre, a deep, violet-rose colour with occasional vertical whitish stripes in the centre of the petals. Sport: **Murasaki-shibori**. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.251. Synonyms: 'Shikon-tsubaki', 'Murasaki'. Corruption of name: 'Murasaka-tsubaki'.

Murasaki-tsubaki-shibori. Wada, 1941, *Japanese Garden Treasures*, p.30. Synonym for **Murasakishibori.**

Murasaki-tsukuba. ('Murasaki' from Tsukuba), (*C.japonica)*, Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.223 with illustration: Bright crimson, semi-double, 3 rows of petals, broad, somewhat emarginate, central stamen column, yellow anthers, creamy filaments. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.148, colour photo. Originated in Japan by Minagawa, Jisuke.

Murasame. (Passing Shower), *(C.japonica)*, Mizumo, 1681, *Kadan Kômoku; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.103: Double, white with red freckles; stamens in fascicles. Originated in Japan. (Believed extinct.)

Murasame. (Passing Shower), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, #178; Yashiro, 1841, *Kokon Yôrankô*, vol.306: Variegated with red streaks on lighter coloured ground. Medium sized, anemone form flower. Originated in Japan. Synonym: 'Murashigure'. (Believed extinct.)

Murasame. (Passing Shower), *(C.japonica)*, Kasuya, Kamegorô, 1858, *Tsubaki Irohanayose Irotsuki:* Medium size, single, red with white moire, cylindrical stamen cluster. Originated in Japan. (Believed extinct.)

Murasame. (Rain in Town), *(C.japonica)*, Kasuya Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pale, pinkish white ground, with red spots, double with 3 rows of petals, large size, divided stamen cluster. Originated in Japan. (Believed extinct.) Note: Kanji characters and meaning different to the former **Murasame**.

Murasame-bori. (Passing Shower Moat), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Formal double, large size, red with white spots; lotus form. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.77. Originated in Japan. (Believed extinct.)

Murashigure. (Passing Shower in Village), *(C.japonica)*, Tateyama Nursery Catalogue, 1957: Single, large size, red spots on white ground. Originated in Japan.

Murasuzume. (Flock of Sparrows), *(C.japonica)*, Satô, 1975, *Chûbu no Tsubaki*, p.106: Brilliant crimson, hose-in-hose, semi-double, similar to **Moshio**, with a small, irregular stamen cluster. Petals about 18, channelled, oblong; paricularly the inner rows giving a pointed appearance. Originated in the Aichi Prefecture, Japan by Kiraku Sakuragi.. A seedling of **Bokuhan.** Different reading 'Muresuzume' in Seibundô Shinkôsha, 1979, *Senchinshû*, p.251.

Murasuzume. (Flock of Sparrows), *(C.japonica)*, Himuro, 1982, *Murasuzume:* Double, medium size, deep pink stripes on white ground. A seedling of **Aki-no-yama.** Originated in the Kanagawa Prefecture, Japan.

Murayana Vera. van Houtte Catalogue, 1839, 1:6. Orthographic error for **Murrayana Vera.**

Murchison Lady. *(C.japonica)*, ACRS, *Camellia News*, 1992, No.123, p.4, Reg. No.404: Originated by Keith Abbott, Rossmoyne, Western Australia. A chance seedling that first flowered 1986. A white formal double of 85 petals, 11 cm across x 5 cm deep. Flowers mid-season on a plant of dense, medium, upright growth. Leaves glossy green, oval, curled, finely serrate, blunt apices, veined surface, 10 cm long x 6 cm wide. Petals folded. Flowers abundantly. A perfectly even and close-packed flower of symmetrical shape.

Mure-akebono. (Mure's Dawn), *(C.japonica)*, Seibundô Shinkôsha, 1989, *Senchinshû*, p.149, colour photo, p.251, description: Soft fuchsine pink, single, 5-6 petals, opening cup-shaped with a central stamen column. Leaves, glossy mid-green, elliptic, acuminate, shallowly serrate. Originated in Mure Town, Kagawa Prefecture, Japan. Named and released by Saneichi Koyama in 1976.

Murechidori. (Flock of Plovers). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.260 with colour photo; English translation p.183. Miniature, deep pink, lotus-form to peony. Flowers mid-season. Leaves narrowly elliptic, small, recurved. Spreading growth with weeping branches. A cross between *C.rusticana* **Shimachidori** and *C.cuspidata.* Named and released by Kaoru Hagiya in 1982. From Niigata Prefecture.

Mure-goshiki-tsubaki. (Mure's Five Coloured Camellia). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.259 with colour photo; English translation p.182. Flowers of white, pale pink, peach red, deep red, striped etc come on the same plant. Small single with cupped petals, cylindrical stamen column. Flowers mid-season to late. Leaves narrowly elliptic, medium size. Upright growth. Selected from cultivars raised by a private family in Mure Town. Discovered and released by Osamu Mure in 1997. From Kagawa Prefecture.

Mure-haru-no-yuki. (Mure's 'Haru-no-yuki'). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.260 with colour photo; English translation p.183. Medium size, deep red mottled white, semi-double with some petaloids, split stamens. Flowers mid-season to late. Leaves ovate, medium size, flat. Upright growth. Selected from cultivars at a private family in Mure Town, Kagawa Prefecture. Named and released by Saneichi Koyama in 1976.

Mure-hinohakama. (Mure's Scarlet Skirt), *(C.japonica), Encyclopedia of Camellias in Colour*, vol.I, 1972, 367; and vol.II, 1978, pl.270, p.119, description, p.238: Red, single flower, about 10 cm across, opening cup-shaped with crinkled petals and a central stamen cluster of irregular lengths, with golden anthers. Leaves resemble 'Sodekakushi' (**Gauntlettii**) as it is thought to be a seedling of this cultivar. Used for the tea ceremony in Japan. Originated in Mure Town, Kagawa Prefecture, Japan. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.149, colour photo. Named by the chief priest of Kasuga Shrine, released by Saneichi Koyama in 1972.

Murejishi. (Pride of Lions), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.246, p.124, description, p.165: Leaves, broadly elliptic to oblong-elliptic, shortly cuspidate, flat, impressed venation. Flowers peony type, deep red (Currant Red 821/3); petals 8-12, largest 2.9 cm, long x 2.2 cm wide emarginate. Small, inner petals and petaloids 168-232, making a loose, central mass; stamens scanty. Flowers mid-season to late. Originated by Sekijirô, Kitao, Toyama Prefecture, Japan.

Murekochô. (Flock of Small Butterflies), *(C.hiemalis)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.49; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.39: Small size, deep pink, semi-double. Blooms early to mid-season. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.316 with colour photo; English translation p.222. Slender, raised petals. Leaves narrowly elliptic, small. Spreading, vigorous growth. Discovered and named by Katsuhiro Maeda in Hamamatsu City in 1970.

Murekochô (Okayama). (Flock of Small Butterflies). (Wabisuke). *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.259 with colour photo; English translation p.182. Miniature, red, tubular single, cylindrical stamens with retrogressive anthers. Flowers early to late. Leaves elliptic, medium size, somewhat plicate. Upright, vigorous growth. A natural seedling of **Kochô-wabisuke,** originated by Seiichirô Sasai in 1983, released by Nobuo Sasai in 1997.

Mure-kyokkô. (Mure's Morning Light). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.259 with colour photo; English translation p.182. Large, pale red, peony to lion form. Flowers mid-season to late. Leaves elliptic, medium size, thick. Upright growth. Selected from cultivars raised by a private family in Mure Town. Named and released by Saneichi Koyama in 1972. From Kagawa Prefecture.

Mure-oka. (Locality Name), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.216, p.109, description, p. 154 as 'Mureoka': Leaves, large, thin, ovate-elliptic, shortly acuminate, raised venation, 6.4-7.8 cm long x 3.1-4.1 cm wide; petiole, 4-5 mm long, very hairy; petals 17-28, largest 5.6 cm long x 5.1 cm wide. Flowers, rosy pink (Spinel Pink 0625/1) with reddish veining, peony type. Stamens 2-3 cm high, simple staminal ring or in 5 fascicles or in a double circle, filaments pinkish, often intermingled with small, lobed petals. Late flowering. Originated by Mrs Shirai, Fukushima Prefecture, Japan.

Mure-shiro-kumagai. ('Kumagai' from Mure). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.259 with colour photo; English translation p.182. Small, white, bowl shaped single, apricot stamens with anthers browning quickly after opening. Flowers early to mid-season. Leaves elliptic, small, somewhat plicate, waved. Upright growth. A cultivar at a private family in Mure Town. Selected, named and released by Saneichi Koyama in 1976. From Kagawa Prefecture.

Muresuzume. Seibundô Shinkôsha, 1989, *Senchinshû*, p.251, description. Different reading of **Murasuzume.**

Muriel Nathan. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1964-1965, p.12. No description. *American Camellia Yearbook*, 1974, p.173, Reg. No.1297: A 20 year old chance seedling that first bloomed 1959, originated by M.R. Murray, Fort Valley, Georgia, USA. Plant growth is upright, dense and medium in rate, with dark green leaves, 8 cm x 3.7 cm. The peony form

bloom is very light pink with 18 petals and 6 petaloids, orange-yellow anthers and yellow filaments. Average size, 10 cm across x 6 cm deep. Prolific bloomer. Late flowering.

Muriel Sweet. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue:* Medium sized, red, semi-double. Mid-season flowering. Originated in USA.

Muriel Tuckfield. *(C.hybrid)*, ACRS., 1974, *Camellias News*, No.55, p.36, Reg. No.165: Originated by F.S. Tuckfield, Berwick, Victoria, Australia. Seed parent *C.hybrid* **Cornish. Snow,** pollen parent unknown. First flowered 1970. Plant habit, upright, dense and vigorous. The 9.1 cm across, semi-double flowers have carmine (RHS.CC.21/3) buds. opening to ivory coloured flowers. Blooms mid-season to late. The 7.8 cm x 2.8 cm, dark green, lanceolate leaves are acuminate and finely serrulate.

Murillo. (*C.japonica*), Stefano Pagliai Catalogue. 1867: Large, imbricated flower; brilliant rose spotted white. A sport of **Madame Elisa Centurioni.** Originated in Italy.

Murillo (Tuckfield). (*C.reticulata*), ACRS., 1968, *Camellia News*, No.32, p.18, Reg. No.97, invalidly as 'Murillo': Originated by F.S. Tuckfield, Berwick, Victoria, Australia. A seedling of 'Crimson Robe' (**Dataohong**), that first flowered in 1966. It is up to 17 cm across, bright pink with dark pink veining, semi-double to incomplete double with flat petals. Blooms mid-season. Stamens are narrow at base, flaring to 2.5 cm at top. Leaves, 10-13 cm long x 5-6 cm wide. finely, sharply serrate, reticulate. A free bloomer on an open, bushy plant.

Muromachi-tsubaki. (Camellia of Muromachi Period). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.260 with colour photo; English translation p.183. Medium size, white, rose form to formal double, thick petals. Flowers mid-season to late. Leaves elliptic, medium size, thick. Upright, vigorous growth. A mutation of **Yae-shiratama** from Todaiji Temple. The original tree is growing at the Koboku family in Nara City. Named by Atsushi Watanabe, released by Ikuo Nishihata in 1970. From Nara Prefecture.

Muro-no-to. (Greenhouse Door), (*C.sasanqua*), Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Pink. Large, semi-double with round petals. Originated in Japan.

Murphy's Fragrant. (*C.japonica*), Hillcrest Nursery Catalogue, 1958. No description. Originated in USA.

Murray Pink. (*C.japonica*), Orton Nursery Price List, 1947-1948. No description. SCCS., 1950. *The Camellia. Its Culture and Nomenclature:* Salmon pink. Small, formal double. Originated in USA by the Orton Nursery.

Murray Shores. (*C.reticulata* hybrid), *American Camellia Yearbook*, 1983, p.164, Reg. No.1909: A very large, burgundy red, semi-double, *C.reticulata* hybrid, ([*C.japonica* 'Tinsie' (**Bokuhan**) x *C.reticulata* 'Cornelian'(**Damanao**)] x *C.reticulata* 'Cornelian'), that blooms early to mid-season. Originated by Frank Pursel, Oakland, California, USA. The 8 year old seedling first bloomed 1981. Average flower size 13 cm across. Plant growth is upright and medium with dark green leaves, 10 cm long x 7 cm wide.

Murrayana. Trillon, 1843, Catalogue, p.7. Mertains & Fontaine Catalogue, 1845, p.124; Cachet Catalogue, 1845-1846, p.4. Synonym for **Murrayana Vera.**

Murrayana Nova. *(C.japonica), Catalogue des plantes de la Société d'Horticulture de Belgique,* 1842, p.22. Charles van Geert, 1846, Catalogue Général, p.71: Imbricated with a central cluster. Bright cherry red. Originated in Italy.

Murrayana Vera. (*C.japonica*), van Houtte Catalogue, 1839, 1:6: Pink with a bluish cast. Imbricated. Originated in Italy. Synonyms: 'Murrayana'. Orthographic errors: 'Murayana Vera', 'Murayana', 'Murrayanan Vera', 'Murragana Vera', 'Murrajana Vera', 'Murragana Vera'.

Murrayanan Vera. Jacob Makoy et Cie Catalogue, 1839, p.17. Orthographic error for **Murrayana Vera.**

Murry. (*C.japonica*), Sanlando Nursery Catalogue, 1958. No description. Originated in Italy.

Murui. (Finest). (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Formal double, sake-cup shape, white with deep red stripes. large size. Originated in Japan. (Believed extinct.)

Murui. (Finest), (*C.japonica*), Uesa. 1844. *Sômoku Binran:* White streaked rose, large size peony. Sometimes its flowers are solid red, hence its synonym 'Monogurui' (Crazy). Originated in Japan. (Believed extinct.)

Murui. (Unique), (*C.japonica*), *Chinka Zufu,* (before 1700), Watanabe. 1969, pl.130: Large, white, semi-double, somewhat irregular with two rows of petals standing apart. Stamens golden, filaments white. Originated in Japan. (Believed extinct.)

Murui. (Unique), (*C.japonica*), Shirai-Bunko, 1812, *Tsubaki Nayosechô;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki*: Red, triple, white spots. Originated in Japan. (Believed extinct.)

Murui-shibori. (Unique Stripes), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Persimmon colour with red spots, medium size, petals incurved, stamens spread like a bamboo whisk. Originated in Japan. (Believed extinct.)

Murui-shibori. (Unique Stripes), *(C.japonica),* Itô, Ko'emon, 1879, *Chinkashû:* Light pink, striped and spotted rose-red. Medium size. For Colour photos see: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.199, p.350. *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.351, p.151; Adachi, 1960, *Camellia. Its Culture and Artistic Arrangements*, p.103; Seibundô Shinkôsha, 1979, *Senchinshû*, p.149; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.345: A medium to large, semi-double, 10 cm across, of 2-3 rows of petals; background white to blush pink with stripes of deeper pink and crimson in varying degrees. Some flowers develop small petals and petaloids in the centre, also in varying degrees. Originated in the Kantô District, Japan. Resembles **Edo-nishiki-Katayama** and **Chûbu-murui-shibori.**

Murui-shibori (2). *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Pink variegated with white. Complete formal double. Mid-season flowering. Originated in Japan.

Murui-shibori-Chûbu. Synonym for **Chûbu-murui-shibori.**

Murui-shibori-Kansai. (Unique Striped from Kansai), *(C.japonica),* Tuyama, 1968, *Camellias of Japan*, pl.360, p.182, description, pp.196-197: Leaves large, narrowly-oblong, acuminate, coarsely crenate-serrate. Flowers semi-double, white striped red and pink in varying degrees; petals rather narrow, inner petals wavy, stamens divided. Late flowering. Originated in Hyôgo Prefecture, Japan. Yokoyama & Kirino, 1989, *Nihon no Chinka* p.340 as 'Kansai-murui-shibori'. There are a number of cultivars in Japan called 'Murui-shibori'; those from Tokyo and Nagoya being different. To prevent confusion the names 'Kansai-murui-shibori' and **Chûbu-murui-shibori** are now generally used in Japan for these two cultivars.

Musashi-ga-tsuji. (Place Name), *(C.rusticana),* Tuyama, 1968, *Camellias of Japan*, pl.237, p.120, description, p.162: Leaves large, broadly elliptic, shortly acuminate, flat; margins depresso-crenate, 8.3-11.7 cm long x 4.4-6.6 cm wide; petioles 8-19 mm long, very hairy. Flowers, peony type with large, prominent anthers; colour, rose (Spirea Red 025/2-1); petals, 12-30, largest 5.8 cm long x 4.8 cm wide, rarely with a few fan-shaped petaloids, Stamens 3.5-4 cm tall, in a double circle. Late blooming. Originated at Musashi-ga-tsubaki, Ishikawa Prefecture, Japan.

Musashino. (Old Name for Tokyo Plain), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.283: Medium size, deep crimson, formal double with pointed petals. Originated in Japan. (Believed extinct.)

Musashino. (Old Name for Tokyo Plain), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.648; Itô, Toku'emon, 1788, *Tsubaki Hanagata Tsuki Obo'echô:* Pale red, triple, looks purple. Originated in Japan. (Believed extinct.)

Musashino. (Old Name for Tokyo Plain), *(C.hiemalis)*, Hakoda, 1987, JCS., *Tsubaki*, No.26, p.49; Inazawa Nurseries Co. Ltd Catalogue, 1988-1989, p.4, A:199: Bright, light pink, irregular, informal double. Blooms early to mid-season. Originated in the Tokyo Prefecture, Japan.

Musha-gaeshi. (See Note), (Higo), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.264, colour photo and description: Large size, faint pink ground with pink patches and red streaks and peppering, flat, higo-like single with 5-6 broad, rounded, overlapping, reflexed petals, some margins fluted and a widespread stamen cluster. Blooms mid-season to late. Leaves deep green, ovate. Originated in the Kumamoto Prefecture, Japan by Tsugio Ôta in 1980.. Note: Musha-gaeshi is a steep outward curve of castle walls to prevent invaders from climbing up.

Music City. *(C.japonica)*, *American Camellia Yearbook*, 1975, p.240, Reg. No.1371: An 8 year old chance *C.japonica* seedling from Gus Menard, that first bloomed 1973. Orginated by W.F. Wilson Jr., Hammond, Louisiana, USA. Plant growth is upright, dense and medium with mid-green leaves, 10 cm long x 6 cm wide. The formal double type bloom is soft pink with 65 petals. Average size is 10 cm across x 3.7 cm deep. Blooms early to mid-season. See colour photo, front cover ACS., 1976, *The Camellia Journal*, vol.31, No.l. Chinese synonym 'Yinyuecheng'.

Musii. *(C.japonica)*, Verschaffelt Catalogue, 1849-1850, p.48. No description. Origin unknown. (Believed extinct.)

Muskoka. *(C.x williamsii)*, Crown Estates, Windsor, Catalogue, 1979-1980, p.4. Medium size, semi-double, deep pink, striped deeper colour. Received an A.M. from the RHS in 1989 with the following description: Leaves up to 8 cm long x 4 cm wide, mid-green. Flowers up to 10.5 cm across, single with 2 rows of petals, strong purplish tint (RHS.CC.62C) with slightly darker veins and central cluster of stamens. Raised and introduced by J.Williams, Cornwall, England.

Musô. (Matchless Camellia). *(C.japonica)*, *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.257 with colour photo; English translation p.181. Medium to large, white semi-double with some petaloids, petals spoon-like and deeply emarginate. Flowers mid-season. Leaves elliptic, large, curved outward. Upright, vigorous growth. A natural seedling, discovered at a private family in Matsuyama City. Named and released by Tokihiro Kôno in 1979. From Ehime Prefecture.

Musô. Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû*, No.10, p.147. Different reading for **Busô.**

Musôka. (Dreaming of Flowers), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.220, colour photo and description: Medium size, bright red, campanulate single with 5 ovate, rounded, overlapping petals, and a long, central stamen cylinder with pinkish filaments, joined for their lower third, and yellow anthers. Leaves deep green, elliptic, apices acuminate, recurved, margins undulate. Originated in the Chûbu area, Japan. Parentage unknown, collected by Tatsumi Satô in 1976, Named and released by Minoru Satô.

Mussolini. (*C.japonica*), McEacharn, 1955, *American Camellia Yearbook*, p.215. No description. Originated in Italy.

Musume-zakari. (Prime of Young Womanhood), (*C.rusticana*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.148, colour photo, p.251, description: Medium size, palest pinkish white, double peony form, with a centre of small, erect petals and yellow stamens. Leaves small, lanceolate, olive green, acuminate, sharply serrate. Originated in Mishima-gun, Niigata Prefecture, Japan.

Mutabilis. Prince Nursery Catalogue, 1822, as a synonym for **Pompone**, the Chinese importation.

Mutabilis. Baumann & Baumann, 1835, pl.40 as a synonym for **Traversi.** An Italian variety.

Mutabilis. Paxton's *Magazine of Botany,* vol.II, 1836, p.122 as a synonym for **Cunninghamii,** a Scottish variety.

Mutabilis (USA) as 'Mutabilis'. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature*, p.78: White on opening, becoming pink with each petal bordered red and, at last, solid red. Medium peony form. Blooms mid-season to late. *Camellia Nomenclature* erroneously gives this camellia as Portuguese from da Silva, ca. 1880. However the da Silva Catalogues list the old 'Mutabilis' (**Pompone**) and the description gives different blooms of 3 colours – 'rosa carneo', rosa vivo au carmin. They do not mention blooms that change colour as they age, but the various coloured sports common to **Pompone.** Coghurst Nursery, 1994, lists a 'Mutabilis' as obtained from Leonardslee and uses the *Camellia Nomenclature* description, but it does not perform well and does not produce flowers which change from pink to red. Its origin and true nomenclaturein unclear.

Mutabilis Casoretti. *Magazine of Horticulture,* 1837. Synonym for **Traversi.**

Mutabilis Cunninghamii. Hazlewood & Jessep, 1972, Checklist - *Camellia Cultivars from Nursery Catalogues,* p.167. Synonym, for **Cunninghamii.**

Mutabilis de Londres. *(C.japonica),* Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.10: Regular double, deep brownish red with many white streaks and stripes. Originated in England.

Mutabilis Maculata. Mertens & Fontaine Nursery Catalogue, 1845, p.107. Synonym for **Oxoniensis**.

Mutabilis Maculata Exonii. Berlèse, 1843, *Iconographie*, p. facing pl.151. Synonym for **Oxoniensis.**

Mutabilis Plenissima. Baumann & Baumann, 1835, Collection de Camellias élèves à Bollweiller, pl.40. P.,1837, *Magazine of Botany and Gardening,* 3:153. Synonym for **Traversi.**

Mutabilis Traversi. Tourres, Macheteaux Nursery Catalogue, 1839, p.22. Synonym for **Traversi.**

Mutabilis Traversi Plenissima. (*C.japonica*), Jacquin, Paris Nursery Catalogue, 1845, p.12: Beautiful carmine with white tints. Originated in France.

Mutabilis Traversii. Buist, 1839, *American Flower Garden Directory.* p.244. Synonym for **Traversi.**

Mutabilis Traversis. Cels, Paris Nursery Catalogue, 1836-1837, p.9. Orthographic error for 'Mutabilis Traversii', synonym for **Traversi.**

Mutabilis Traversy. Rousseau, Angers Nursery Catalogue, 1842-1843, p.3. Orthographic error for 'Mutabilis Traversi', synonym for **Traversi.**

Mutabilis Vera. Leroy, André, Catalogue, 1847. Synonym for **Traversi.**

Mutabilis Violacea. (*C.japonica*), Porcher, Dec.1847, *Revue Horticole*, ser.3, vol.1, p.451. No description. Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*, vol.40, p.224: The flower is ranunculiform (formal double), 10-11 cm across, a bright, carmine, cherry-red or dark rose; the petals are in 6-7 rows, well imbricated, rounded at the apex, spread like a fan, cupped and veined blood red. See also Verschaffelt, 1860, *Nouvelle Iconographie*, Book I, pl. III. Originated by Boll, USA.

Mu-tan-cha. Watanabe & Andoh, 1980, *Hana to Kino Bunka Tsubaki,* p.155. Different reading for **Mudan Cha.**

Mutancha. Yü, 1964, *Camellian.* Different reading for **Mudan Cha.**

Muteki. (Invincible), (*C.sasanqua*), Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Deep pink. Large, semi-double with incurved petals. Originated in Japan.

Muteki. (Mist Droplets), (*C.japonica*), JCS., 1984, *Tsubaki*, No.23, p.37 with illustration: The flower is purple red with white streaks, 5 petals, very small cylindrical single. Stamens few, retrogressive. Blooms mid-season. Leaves long-oval, apices acuminate. Sometimes called 'Muteki' = 'Foghorn'. Selected from wild japonicas in Nagahama Town, Ehime Prefecture, Japan. Named and released by Ôzu Camellia Enthusiasts Club in 1983.

Mutong Zhishen. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **Elegans** sport, **C.M. Wilson.**

Mutsu-no-shima. (Six Islands), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.189 & 483: Medium sized, anemone centred, double white with pink and red streaks. Originated in Japan. (Believed extinct.) Different reading: 'Roku-no-shima'.

Mutsunoshima-kasuri. (Six Islands Variegated), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.231: Small to medium size, single, white with dark crimson streaks. Originated in Japan. Different readings: 'Mutsunoshima-tobi'iri', 'Rokunoshima-kasuri'.

Mutsunoshima-tobi'iri. Different reading for **Mutsunoshima-kasuri.**

Mutt's Watermelon Pink. Overlook Nursery Catalogue, 1942-1943. Renamed **Slenderlee** by the originator.

Muwu Qianniao. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.409; Chinese synonym for the Japan *C.vernalis* **Mennai-chidori.**

Muyû (No Worry), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.148, colour photo, p.251, description: Deep fuchsine pink, small size, single, 6-7 large, rounded, overlapping petals; opening wide campanulate, with a centre stamen column, yellow anthers, white filaments. Blooms mid-season. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.145. Originated in Hirado City, Nagasaki Prefecture, Japan. Discovered by Mamoru Oda in 1975, named and released by Saburô Kumagai.

Muzio Scevola. (*C.japonica*), Franco Agostoni, 1844, *Catalogo Plantarum....* No description. Originated in Italy. (Believed extinct.)

Muzuchelli. Frères Noisette, Nantes Nursery Catalogue, 1857, p.37. Orthographic error for **Mazzuchelli.**

My Bonnie Lassie. (*C.japonica*), *American Camellia Yearbook*, 1969, p.164, Reg. No.1060: A 10 year old chance seedling that first flowered 1962; originated by J.M. Haynie, Theodore, Alabama, USA. Plant growth is upright and medium, with light green leaves, 10.5 cm long x 5 cm wide. The open, peony type flower, averages 11 cm across x 6 cm deep. Light blush pink with deeper splashes. Petals 14 with 11 petaloids, golden anthers and white filaments. Blooms mid-season to late. Sports: **My Bonnie Lassie Pink, My Bonnie Lassie Variegated.**

My Bonnie Lassie Pink. (*C.japonica*), *American Camellia Yearbook*, 1969, p.164: A solid pink sport of **My Bonnie Lassie,** originated by J.M. Haynie, Theodore, Alabama, USA. Chinese synonym 'Fen Laxi'.

My Bonnie Lassie Variegated. (*C.japonica*), Woodland Acres Nursery, 1968, ACS., *The Camellia Journal*, vol.23, No.3, p.18 as 'My Bonnie Lassie V.': A virus variegated form of **My Bonnie Lassie Pink** - Pink blotched white. Originated in USA by J.M. Haynie, Theodore Alabama.

My Choice. (*C.japonica*), SCCS., 1968, *Camellia Nomenclature*, p.103: Cream white, delicately tinted on petal edges. Medium to large peony form. Vigorus, compact, upright growth. Mid-season blooming. Originated in USA by Harvey Short, Ramona, California.

My Darling. (*C.japonica*), SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Light pink. Small single. Vigorous, compact, upright growth. Mid-season blooming. Originated in USA by F.M. Uyematsu, Montebello, California. Chinese synonym 'Guaiguai'.

My Debbie. *(C.japonica),* ACS, *The Camellia Journal*, Sept 2005, p.28 with colour photo p.29, Reg. No. 2654. A chance seedling that first flowered in 1995. Originated and propagated By Jay Ellis Jr, Keystone Heights, Fla., USA. The 9 cm, light red to very dark red, formal double flower has heavy petal texture and a special fluorescence. Plant is upright with average growth rate. Won 11 best seedling awards over 4 seasons. Incurving petals. *American Camellia Yearbook*, 2005, p.45 and colour photo p.c7. Flowers early to mid-season. Dark green leaves are 6.5 cm x 3.2 cm.

My Debbie Variegated. *(C.japonica),* ACS, *The Camellia Journal*, Sept. 2005, p.28 and colour photo p.29, Reg. No. 2655. A virus variegated, red marbled white, form of **My Debbie**. Originated and propagated by Jay Ellis Jr. Other details as for **My Debbie.**

My Diane. *(C.x williamsii*), *New Zealand Camellia Bulletin*, 1975, vol.IX, No.1, p.28, Reg. No.95: *C.saluenensis* x *C.japonica* **Daikagura,** that first bloomed 1958. Plant habit, tall and spreading; leaves light green, 8 cm x 4 cm. Flowers, peony form, 3-5 rows of fluted petals with a centre bunch of numerous petaloids; colour deep pink; size, 12 cm across x 8 cm deep. Blooms mid-season to late. Originated by L.E. Jury, New Plymouth, New Zealand.

My Ernestine. (*C.japonica* x *C.reticulata*), *American Camellia Yearbook*, 1977, p.217, Reg. No.1412: A very large, medium rose, peony form from *C.japonica* 'Dr W.G. Lee' (**Doctor Lee**) x *C.reticulata* **Mouchang.** Originated by Mr Paul Gilley, Grand Ridge, Florida, USA. The peony form, 'Daikagura' type, bloom is medium rose with cream anthers and yellow filaments, 10 large petals and 40 petaloids. Average size, 13 cm across x 10 cm deep. Blooms mid-season. Plant growth is upright and spreading with dark green leaves, 10 cm long x 5 cm wide.

My Fair Lady. (*C.japonica*), Fendig, 1953, *American Camellia Catalogue.* Pink. Complete double. Mid-season. Sport of **Elizabeth.** SCCS., 1954, *The Camellia*. *Its Culture and Nomenclature*, p.68: Light pink with deeper pink centre and outer petals. Medium large, formal double. Vigorous, compact, upright growth. Mid-season blooming. A seedling raised by Harvey Short, Ramona, California, USA, according to Hertrich, 1959, *Camellias in the* Huntington Gardens, vol.III, pp.166, 169. Fendig's listing as a sport of **Elizabeth** is not believed to be correct.

My Honey. (*C.japonica*), Cannon, 1962, ACS., *The Camellia Journal*, vol.17, No.1, back cover. No description. Originated in USA. No valid listing located.

My Keley. *American Camellia Yearbook*, 1990, p.89. Orthographic error for **My Kelley.**

My Kelly. SCCS 1993, Camellia Nomenclature, p.83. Orthographic variant for **My Kelley.**

My Kelley. (*C.japonica*), ACS., 1989, *The Camellia Journal*, vol.44, No.4, front cover, colour photo and description: A camellia tribute to a college graduate. Large size, medium pink, formal to rose-form double with 11 rows of 80-85 large petals. Long lasting bloom. Mid-season flowering. Chance seedling originated by Ferol & Sam Zerkowsky, Tammia Nursery, Pearl River, Louisiana, USA. ACS, 1990. *The Camellia Journal*, vol.45, No.1, p.12, Reg. No.2187. *American Camellia Yearbook*, 1990, p.89, colour photo between pp.91-92, erroneously as 'My Keley'. The 10 year old seedling first bloomed in 1984. Average flower size 11 cm across x 7 cm deep with 80-85 petals and yellow anthers and filaments.

My Louise. *(C.japonica), American Camellia Yearbook*, 1977, p.217, Reg. No.1413: A very large, medium pink, semi-double. A 6 year old chance japonica seedling that first bloomed 1974. Originated by Paul Gilley, Grand Ridge, Florida, USA. The **Frizzle White** type bloom is medium pink with light pink filaments and yellow anthers, 12 petals and 4 large petaloids. Average size, 12.5 cm across x 6 cm deep. Blooms mid-season.

My Nancy. *(C.japonica)*, ACS., Aug.1987, *The Camellia Journal*, vol.42, No.3, p.6, Reg. No.2047: Medium pinkish purple to lavender, spotted white, semi-double to peony form, *C.japonica* sport of **Mark Alan.** Mid-season blooming. Originated by Dr Howard W. Ramsey, Gainesville, Florida, USA. *American Camellia Yearbook*, 1987, p.82, with colour photo between pp.60-65: A medium size, pinkish purple to lavender, spotted white, semi-double to peony form, *C.japonica* sport of **Mark Alan.** Flowers mid-season. This sport was first observed 1984. Average flower size, 9 cm across x 5 cm deep with 10-15 petals, 30-35 petaloids and gold anthers. Generally smaller over-all than its parent with shorter outer petals. Plant growth is upright and medium with dark green leaves, 6-8 cm long x 3.8 cm wide.

My Pet. *(C.japonica)*, ACS 1995, *The Camellia Journal*, vol.50, No.1, p.15, Reg. No.2309: Small size, pink, with deeper pink petaloids, anemone form *C.japonica* chance seedling, originated in USA by Peter Tedesco, Felton, California. Blooms early to late. ACS 1995, *American Camellia Yearbook*, p.8 with colour photo: The 12 year old seedling first flowered 1985. Average flower size is 7 cm across x 4.5 cm deep with 8 petals, 80-100 petaloids. Plant growth is upright and dense with dark green leaves 7.5 cm long x 5 cm wide.

My Ruth. *(C.japonica)*, SCCS., 1962, *Camellia Nomenclature*, p.78: Flame red, large semi-double with heavy, upright, crisp petals which stand apart and a tight group of stamens. Vigorous, open, upright growth. Mid-season blooming. Originated in USA by Dr R.T. Cale, Bessemer, Alabama.

My Sue. *(C.japonica)*, *American Camellia Yearbook*, 1962-1963, p.223, Reg. No.637: A 5 year old chance seedling that first bloomed 1961. Originated by Frank Watters, Aiken, South Carolina, USA. Plant growth is upright and rapid with dark green leaves, 7.5 cm long x 3.5 cm wide. The formal double flower, 9-10 cm across x 5 cm deep, is light blush with red stripes and 70+ petals, which curve upwards, cup-shaped and arranged in 10-11 rows, 6 petals to a row, giving a scalloped appearance. Blooms mid-season.

My Trula. *(C.japonica)* ACS, *The Camellia Journal*, Sept. 2012, p.26 with colour photo; Regn. No.2826; Regd by Mr. N.C. Barnard, St. Elmo, Ala. ACS, *Yearbook* 2012, p.18 with colour photo; A 15 year old chance seedling, first flowered 2006. Large, 12cm x 5.7cm, deep pink, semidouble to loose peony form flower has 27 outer petals and a variable number of inner petals, some folded and twisted. Numerous sprayed stamens with yellow anthers. Upright open plant, average growth rate. Flowers early to midseason.

Myako Dori. Torsanlorenzo Catalogue, 1984-1985. Corruption of the Japanese name **Miyakodori.**

Myal. *(C.japonica)*, *New Zealand Camellia Bulletin*, 1995, Issue No.120,, vol.XIX, No.1, p.46, Reg. No.354: Originated by A. & R. Hannam, Putaruru, New Zealand. Red (RHS.CC.50A), semi-double with yellow anthers and pink filaments, with 14 slightly reflexed petals. Flowers 11-12 cm across. Open, upright, slow growth with dark green leaves 10 cm long x 6.7 cm wide. Blooms mid-season to late. A chance seedling.

Myken. *(C.sasanqua)*, ACRS., 1980, *Camellia News*, No.75, p.24, Reg. No.232: Originated by Alice Spragg, Sutherland, N.S.W., Australia A chance seedling that first flowered 1972. The 8 cm across, single white, bordered red flowers are early blooming. The 3 cm x 1.6 cm leaves are lanceolate and variegated through gold to red.

Mykenjaku. Portland Camellia Nursery Camellia Catalogue, 1946-1947, p.7. Corruption of Japanese name **Mikenjaku.**

Mylene Wong. Gerbings Azalea Gardens Catalogue, 1958. Orthographic error for **Maylene Wong.**

Mynelle Hayward. *(C.japonica)*, Wheelers Central Georgia Nurseries Catalogue, 1955-1956, p.5; *American Camellia Yearbook*, 1955, p.339, Reg. No.228: A 9 year old chance seedling,

originated by Central Georgia Nursery, Macon, Georgia, USA, that first flowered 1949. Plant growth is upright, compact and rapid in rate, with mid-green leaves, similar to **Debutante,** oval, abruptcuspidate and serrate. The flowers are pink, 9-11 cm across, similar to **Debutante** in form with 10 regular and 17 irregular petals and 90 petaloids. Flowers early to mid-season. Sport: **Mynelle Hayward Variegated.**

Mynelle Hayward Variegated. *(C.japonica),* SCCS., 1968, *Camellia Nomenclature*, p.104 as 'Mynelle Hayward Var.': A virus variegated form of **Mynelle Hayward** - Pink blotched white. Originated in USA.

Myôgen. (Temple Name), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.252, colour photo and description: Medium size, faint pink to white background with a peppering of red, wide, campanulate single of 5 broad, rounded, overlapping petals with ruffled margins and a short, pinched in, yellow stamen column. Blooms early to mid-season. Leaves elliptic to broad-elliptic, deep green, apices acuminate, margins serrate. Originated in the precincts of the Myôgen Temple, the western part of the Hyôgo Prefecture, Japan. Resembles **Shibori-hatsu'arashi.**

Myôgi-in. Mizuno, 1681, *Kadan Kômoku:* Red spotted white. Full double. This cultivar was listed by Kaempfer, 1712 as 'Meokin'. Different reading 'Myôki-in'.

Myôhaku. (Wonderful White), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.146, colour photo, p.250, description: White, single of 6 petals, tubular to campanulate, irregular, broad, cleft apex; yellow anthers, white filaments. Originated in Takamatsu City, Kagawa Prefecture, Japan. Named and released by Saneichi Koyama in 1979.

Myohrenji. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, p.212. Different reading for **Myôrenji.**

Myôjô. (Morning Star), *(C.rusticana),* Minagawa, 1956, *Chinkashû;* Tuyama, 1968, *Camellias of Japan*, pl.140, p.70, description, p.129: Leaves broadly-elliptic, venation impressed, apex acute, margins acutely serrate, mid-green, variegated pale gold along the midrib, variegation sometimes reduced to small spots. Petiole, 4-6 mm long, hairy. Flower, single, red (Rose Opal 022), bell shaped; petals incurved on lateral margin, recurved at apex. Originated in Niigata Prefecture, Japan. Named and released by Jitarô Nagao. See also colour pl: Seibundô Shinkôsha, 1979, *Senchinshû*, p.147.

Myôjô. (Morning Star), *(C.japonica),* Satô, 1962, *Chinen*, and 1975, *Chûbu no Tsubaki*, p.52 with colour photo: Small single, red with clear white patches, compact, central column of stamens, slightly spreading at top, anthers old gold. Leaves dark green, ovate to broad-ovate, blunt-acute, serrulate. Originated in Japan by Satô from the cross **Benimyôrenji** x **Iwane-shibori.** Named and released by Minoru Satô in 1962.

Myôjô. (Morning Star), *(C.sasanqua),* Itô, Ihei, 1695, *Kadan Chikinshô:* Red single with white spots. Yashiro, 1841. *Kokon Yôrankô*, vol.344: Red single with white spots. Originated in Japan. (Believed extinct.)

Myôjô. (Morning Star), *(C.sasanqua),* Minagawa, Iza'emon, 1885, *Nisshô'en Chabaifu:* Small size, white with red moires. Synonym: 'E'awase'. Originated in Japan.

Myôjô. (Morning Star), *(C.x vernalis),* Satomi. 1958. *Nomenclature List of Sasanqua of Japan*, p.13: Pink dotted white. Medium size, single. Originated in Japan.

Myôjô. (Morning Star), (Higo), *Higo Rokka*, 1989, p.32: Large size, 11-12 cm across, pink ground with red variegation, 7-8 petals. A sport of **Yamato-nishiki.** Originated in the Kumamoto Prefecture, Japan.

Myôjôkô. (Red Morning Star), *(C.sasanqua),* Itô, Ihei, 1721, *Kôeki Chikinshô*, p.33: Red, single. Originated in Japan. (Believed extinct.)

Myôjyô. *Mainichi Shinbun*, 1971. Different reading for **Myôjô.**

Myôkenji. (Myôken Temple), *(C.japonica),* Yashiro, 1841, *Kokon Yôrankô*, vol.311, 'Grasses and Trees'. No description. Originated in Japan. (Believed extinct.)

Myôkakuji. (Myôkaku Temple), *(C.japonica),* Hamamatsu, 1825, *Setsuyô Kikan.* No description. Originated in Japan. (Believed extinct.)

Myôki-in. (Myôki Temple), *(C.japonica),* Mizuno, 1681, *Kadan Kômoku.* Red, formal double with white splashes. Itô, lhei, 1695, *Kadan Chikinshô;* Yashiro, 1841, *Kokon Yôrankô,* vol.306: Large red flower, variegated with a splashed pattern of white. Originated in Japan. For colour illustration see pl.422, *Chinka Zufu*, (before 1700), Watanabe, 1969. (Believed extinct.) This cultivar was listed as 'Meokin' by Kaempfer, 1712. Different reading: 'Myôgi-in'. (Believed extinct.)

Myôki-in. (Myôki Temple), *(C.japonica). Chinka Zufu*, (before 1700), Watanabe, 1969, pl.179: A medium sized, open peony, red, fading to light lilac on petal edges, white blotches. Originated in Japan. (Believed extinct.)

Myôkô. (Rare Red), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinchû*, p.146, p.250: Small size, dark red, cup-shaped single, good shaped cylinder of stamens. Originated in Kagawa Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.255 with colour photo; English translation p.180. Flowers mid-season to late. Leaves elliptic, medium size, thick, curved outwards. Upright, vigorous growth. Selected from wild japonicas in Mure Town. Named and released by Saneichi Koyama.

Myôkô. (Name of a Mountain), *(C.rusticana),* Tuyama, 1968, *Camellias of Japan*, pl.125, p.63, description, p.124: Leaves, dark green, thick, ovate-elliptic to lanceolate-elliptic, base obtuse, apex acute, venation impressed, depresso-serrate margins, 6.5-7 cm long x 2.4-3.4 cm wide, petioles about 6 mm long, very hairy. Flowers semi-double, pink (Neyron Rose 623), inner petals wrinkled, with a few irregular stamens. Petals 20-24, largest, 4.6 cm long x 3.8 cm broad. Stamens 2.6-3.9 cm high in 5 fascicles, creamy filaments. Late flowering. Originated in Niigata Prefecture, Japan.

Myôkokuji. (Myôkoku Temple), *(C.japonica),* Hamamatsu, 1825, *Setsuyô Kikan*, vol.23. No description. Originated in Japan. (Believed extinct.)

Myôkô-nishiki. (Myôkô Brocade), *(C.rusticana),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.250: Red vertical streaks on pale pink ground with white margins. Single, widely opening flower of 6 petals. Stamens spreading. Small size. Mid-season flowering. Leaves, small to medium, ovate, curved, keeled at midrib, prominent venation. Hirsute petiole. Plant habit, bushy and variable. Of snow camellia lineage, originated in Takada City, Niigata Prefecture, Japan. Named and released by Yaichi Kawamura.

Myôrenji. (Myôrenji Temple), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.687; Itô Tokuemon, 1788, *Tsubaki Hanagata Tsuki Obo'echô:* Single, blush pink with some red marks. There is a series of these medium sized singles, usually cupped, with long petals surrounding a boss of stamens. The modern **Myôrenji** is rose-red. Originated in Chûbu area, Japan. Different reading: 'Myohrenji'. Sport: **Shibori-myôrenji.** Synonyms: 'Myôrenji-tsubaki', 'Beni-myôrenji'. The modem 'Myôrenji' is also known as 'Beni-myôrenji'. See *Encyclopedia of Camellias in Colour*, 1982, vol.I, pl. 24, description p.294. Note: It is not certain that the modern **Myôrenji** is the same as the anciently listed cultivars.

Myôrenji. (Myôrenji Temple), *(C.japonica),* Nakayama, 1847, *Senka'oden*, 1st.ser. vol.5: Single, light red, with very small sepals. Originated in Japan. (Believed extinct.)

Myôrenji. (Myôrenji Temple), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.684: Medium sized, deep crimson, double with 5 rows of imbricated petals, some petals towards

the centre having a few white lines. Small stamen group in the centre when fully open. Originated in Japan. (Believed extinct.)

Myôrenji-tsubaki. Joshua Condor, 1893, *Landscape Gardening in Japan* as 'Miorenji-tsubaki'. Synonym for **Myôrenji.**

Myorenji White. SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* Synonym for **Hakumyôrenji.**

Myôren-no-an. Chûbu Tsubaki Kyôkai, 1960. Different reading for **Myôren-no-iori.**

Myôren-no-iori. (Hermitage of the Myôren), *(C.japonica), Chûbu Tsubaki Kyôkai*, 1960 as 'Myôren-no-an'; Satô, 1975, *Chûbu no Tsubaki*, p.26 as 'Myôrennoiori', colour pl: Leaves ovate-elliptic to broad-elliptic, gradually acute, minutely crenate, petioles a little hairy. Flowers single, broadly cup-shaped, petals wrinkled at apex, red (Carmine 21/1). Stamens, broad cylindrical. Flowers mid-season. Originated in the Chûbu area, Japan. For colour photos see: Tuyama, 1968, *Camellias of Japan*, pl.165, p.83. Seibundô Shinkôsha, 1979, *Senchinshû*, p.147. Different reading: 'Myôren-no-an'. A seedling of **Benimyôrenji.**

Myôshi. (Mysterious Purple), *(C.rusticana)*, Hagiya & Ishizawa, 1968, Kyôto Engei Kurabu, *Tsubaki*, *Tokushû*, No.8, p.11, illustration, p.58: A purplish, pale pink, rose form double to semi-double, 7-8 cm across, petals 14-17, stamens 10-20, filaments yellow. Leaves mid-green, ovate, 7-8 cm long, acuminate, coarsely serrate. Originated in Itoigawa City, Niigata Prefecture, Japan. Collected, named and released by Susumu Ishizawa in 1960

Myôshôji-akayabu. (Red Wild Camellia of Myôshôji Temple). *(C.japonica), "Camellias in Kurume"*, ICS Congress, Kurume 2010, p.23; A small vermilion single flower, wild type. A 250 year old tree in Tera-machi, Japan.

Myôtozaki. Yashiroda, 1950, *American Camellia Yearbook*, p.19. Different reading for **Meotozaki.**

Myôtoboshi. Different reading for **Meotoboshi.**

Myra. *(C.japonica), Australian Botanical and Horticultural Society Report*, 1849. A Camden Park seedling raised by Sir William Macarthur, N.S.W., Australia. No description. (Believed extinct.)

Myra D. *(C.japonica)*, SCCS., 1981, *Camellia Nomenclature*, p.120: Blush pink. Small, formal double with incurved petals. Mid-season blooming. Originated in USA by J.M. Haynie, Theodore, Alabama.

Myra Gerbing. *(C.japonica)*, ACS, *The Camellia Journal*, May 1997, p.21, Reg. No.2403. A very large, blush pink, anemone form chance seedling. Flowers early to late. Originated by G.C. Gerbing, Millwood, Ga., USA. *American Camellia Yearbook*, 1997, p.6, colour photo before p.1. The 10 year old seedling first flowered in 1989. Average flower size is 15 cm across x 6.5 cm deep, 8-10 petals, numerous petaloids, blush pink filaments and yellow anthers. Plant growth is upright and average, with dark green leaves 7.5 cm long x 5 cm wide.

Myra Price. (*C.reticulata* hybrid). *New Zealand Camellia Bulletin*, March 2003, Issue No.144, vol.XXIII, No.2, p.15, Reg. No.451. Registered by N. Haydon, Takanini, New Zealand. A distinctive sport of *C.reticulata* hybrid **Mouchang,** first observed by Myra Price, Manukau City, NZ, and propagated by Camellia Haven. The flower is of anemone form, 12 cm diameter x 6 cm deep, 9-10 petals and 230-240 flag petaloids which have pinkish-white filaments fused into a single white base. A few shorter anthers are hidden by the petaloids. Colour is orchid pink (RHS.CC.61D). The plant is upright and spreading, open in structure, and fast growing, with dark green leaves 12 cm long x 6 cm wide. Flowers mid-season to late.

Myra Wadsworth. *(C.japonica)*, Laurel Lakes Nursery Catalogue, 1958; *American Camellia Yearbook*, 1959, p.278, Reg. No.372: A 10 year old chance seedling; originated by S.L. Marbury, Wilmington, North Carolina, USA that first flowered 1955. Plant growth is upright, open and rapid. The dark green leaves are 12.5 cm x 5 cm. The semi-double flowers, off-white with pink stripes and yellow stamens, have 17 petals and are 11-12.5 cm across x 5 cm deep. Early to mid-season flowering. Orthographic error: 'Myra Woodsworth'.

Myrthyfolia. Berlèse, 1843, *Iconographie*, pl.199. Orthographic error for **Myrtifolia.**

Myrtiflora. Hazlewood Nursery Catalogue, 1962. Synonym for **Myrtifolia (Australia).**

Myrtiflora Elegans. *(C.japonica)*, Franchetti, 1855, *Collezione di Camelie*, p.47: Blossoms of the largest size, of uniform pink, composed of numerous, ovate, rounded petals, regularly imbricated. See pl.III, Book II, Verschaffelt, 1859, *Nouvelle Iconographie.* Originated in Italy by Franchetti, Florence. Orthographic error: 'Myrtifolia Elegans'.

Myrtifolia. *(C.japonica)*, Curtis's *Botanical Magazine*, 1814, vol.40, No.1670; Aiton's *Hortus Kewensis*, 1812, vol.4, p.235 as 'Myrtle Leaved Red'; Parmentier, 1818, Catalogue des arbres et plantes ... p.15. No description. Chandler & Booth, 1831, *Illustrations & Descriptions...* pl.14: Flowers rarely less than 7.5 cm across. On first opening they are a deep rose colour, but become paler. The flowers are numerous and regularly arranged, forming an even, compact flower, faintly veined red. The exterior petals are of roundish form, darker in colour than the interior ones. They are about 2.5 cm broad and become recurved as the flower has been open for some time. The interior petals are much smaller and pointed, of a pale rose colour; at first erect, concave and closely set; they afterwards expand almost flat and leave a little hollow place in the middle which is often hidden by small, narrow, irregularly formed petals, with a yellowish tip having the appearance of stamens. Scented. Early illustrations include: Chandler & Booth, 1831, *Illustrations & Descriptions.*---pl.14. Berlèse, 1843, *Iconographie,* vol.2, pl.199. Edwards *Botanical Register*, 1815, Vol.I, pl.22. Loddige's *Botanical Cabinet*, 1819, vol.IV, pl.354. This variety was originally imported from China by Kew Gardens and was brought in by Greville in 1806. Early synonyms were: 'Myrtifolia Plena', 'Myrtifolia Odorata', 'Hexangularis', 'Pendulata', 'Myrtifolia Pendula', 'Myrtifolia Rosea', 'Involuta', 'Starry Flowered', 'Myrtifolia Chinenza'. It was also called variously: 'Myrtle Leaved', 'Myrtle-leaved Red', 'Large Myrtle-leaves', 'Small Myrtle-leaved', 'Large flowering Myrtle-leaved', 'Myrtifolia Flore Plena', 'Myrtifolia Major' and 'Constellation'. Orthographic errors: 'Myrthifolia', 'Myrthyfolia', 'Myrthiflora', 'Myrtifolie', 'Myrthyfolia'. The old Chinese name is believed to be 'Liujiao Dahong'. In Australia the deep pink sport of

Madame de Cannart d'Hamale was erroneously known as 'Myrtifolia', until renamed **Myrtifolia (Australia).** In Portugal it is called 'Myrtifolia Chinesa'. In other countries **Cup of Beauty** has been mislabeled as **Myrtifolia.**

Myrtifolia (1). Fendig, 1953, *American Camellia Catalogue.* Synonym for Myrtifolia (Australia).

Myrtifolia (2). Fendig, 1953, *American Camellia Catalogue.* Synonym for Myrtifolia.

Myrtifolia Alba. van Houtte Catalogue, 1841, 7:14, who gave 'Albicans'as its synonym. However 'Albicans' was published by Buist in 1839, which would give it priority. Verschaffelt, 1850, *Nouvelle Iconographie*, Book XII, pl.II says it was also known as 'Myrtifolia Albicans', 'Schackkoenigen' and 'Princesse Royale de Gruneberg' and that it was named by Rev. Herbert. Van Houtte Catalogue, 1859, 77:53 equates 'Circe' with 'Myrtifolia Alba' and Herbert published 'Pumila'or 'Circe' in 1837, *Amaryllideae Suppl.,* p.367, which makes **Circe** the prior valid name.

Myrtifolia Albicans. Verschaffelt, 1850, *Nouvelle Iconographie*, Book XII, pl.II. Synonym for **Circe.**

Myrtifolia (Australia). *(C.japonica),* Hazlewood Nursery Catalogue, 1962: This is the deep pink to red sport of **Madame de Cannart d'Hamale** which had previously been erroneously known in Australia as 'Myrtifolia'. The flower form and plant habit is identical to the parent. Originated in Australia. Synonym: 'Myrtifolia Red', 'Cup of Beauty Rosea'.

Myrtifolia Chinesa. da Silva, 1880, *Forcing Varieties of Camellias in Oporto* as 'Myrtifolia Chineza'. Synonym for **Myrtifolia.**

Myrtifolia Chinenza. da Silva, 1880, *Forcing Varieties of Camellias in Oporto.* Synonym for **Myrtifolia.**

Myrtifolia Elegans. J. Linden Nursery Catalogue, 1878-1879, p.10. Orthographic error for **Myrtiflora Elegans.**

Myrtle Annis Cannon. (*C.japonica*), *American Camellia Yearbook*, 1978, p.133, Reg. No.1470: A large, white, peony form *C.japonica* chance seedling, that blooms mid-season. Originated by Mike Cannon, Covington, Louisiana, USA. First bloomed 1973. A deep, rounded flower with loose petals. Petals 44, with white filaments and yellow anthers. Size, 12 cm. across x 7 cm. deep. All blooms semi-double with rabbit ears like Guilio Nuccio. Plant growth is medium with dark green leaves, 9.5 cm long x 3.7 cm. wide.

Myrtle Icard. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1998, p.23, Reg. No.2456. A very large, pink, semi-double cross of **Nina Avery** x **Granada**. Flowers mid-season to late. Originated by Marvin Jernigan, Warner Robins, Ga., USA. *American Camellia Yearbook,* 1998, p.5, colour photo before p.1. The 20 year old seedling first flowered 1981. Average flower size is 14 cm across x 7.5 cm deep, with dark green leaves 30 petals, 100 petaloids, yellow anthers and white filaments. Plant growth is upright, dense and average, with light green leaves 10 cm long x 3.8 cm wide.

Myrtle McLeod. (*C.japonica*), ANZCRS., 1956, *Camellia Annual,* p.6, Reg. No.12: Originated by C.F. Cole, Canterbury, Victoria, Australia from an **Elegans** x **Spencer's Pink** seedling that first flowered 1955. The blooms are single, pure white, with a cluster of bright yellow stamens. Size 10-11 cm, across. Flowers early. Leaves are deep green, oval, 8 cm long x 5 cm wide.

Myrtle Monroe. (*C.japonica*), *American Camellia Yearbook*, 1975, p.240, Reg. No.1350: A 10 year old chance seedling that first bloomed 1967; originated by R.S. Monroe, Waycross, Georgia, USA. Plant growth is spreading, dense and medium with dark green leaves, 7.5 cm long x 5 cm. wide. The semi-double, **Frizzle White** type, bloom is pink with golden anthers, 43 petals, 11 petaloids. Size, 10-11 cm across and 4.5 cm. deep. Blooms mid-season.

Myrtle-leaved. Sweet, 1818, *Hortus Suburbanus Londinensis. Synonym* for **Myrtifolia.**

Myrtle-leaved Hexangularis. Curtis, 1814, *Botanical Magazine*, vol.40, pl.1670. Synonym for **Myrtifolia.**

Myrtle-leaved Red. Aiton, 1812, *Hortus Kewensis*, 4:235. Synonym for **Myrtifolia.**

Myrtyfolia. Claude Thoby, 1993, Camélias, pp.12, 18, 25, 49. Orthographic variant for **Myrtifolia.**

Mysterious. (*C.japonica*), Magnolia Gardens and Nursery Catalogue, 1942-1943. White striped pink. Large, full, peony form. Originated in the USA at Magnolia Gardens, South Carolina, USA.

Mystery. (*C.japonica*), Cannon, 1962, ACS., *The Camellia Journal,* vol.17, No.1, back cover. No description. Originated in USA. No valid listing located.

Mystic. (*C.japonica*), Fendig, 1953, *American Camellia Catalogue.* Pink variegated white. Medium sized semi-double. Mid-season blooming. Originated in USA.

Mystique. *(C.japonica), Camellias,* Y.C. Shen, 2009, p.153 with colour photo; White, with stripes of light purple on some petals. Semi-double to rose form double. Sprayed stamens mixed with central petaloids. Diameter 12 cm.

Mystre. (*C.japonica*), Gerbing Camellia Nursery, 1963, ACS., *The Camellia Journal,* vol.18, No.4, inside back cover. No description. Originated in USA. No valid listing located.

Myuki-nishiki. Vanderbilt, 1940, *Camellia Research,* p.6. Corruption of the Japanese name **Miyuki-nishiki.**

Mywoods. Tony Lord, ed. 1992-1993, *The Plant Finder,* p.95. Orthographic error for **Nywoods.**

N.

N.C. Madsen. Harris' Longview Nursery, Retail Price List, 1955-1956, p.7. Synonym for **Mrs. Baldwin Wood.**

Nabari. (Place Name), *(C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.16: Medium size, white ground with large and small red variegation, campanulate single. Late blooming. Originated in the Ôsaka Prefecture, Japan. A chance seedling, selected and released by Shinichirô Kishikawa in 1984.

Nabb. *(C.hybrid).* Heartwood Nursery, Seedling List 2009; A 6.5 cm diameter, white to blush pink flower. Flowers mid-season to late. Profuse, round and compact plant. A cross of *C.pitardii* x *C.fraterna.* Originated by Heartwood Nursery, Fort Bragg, Calif., USA (HW9613).

Nabeshima. (Nabe Island), *(C.japonica)*, Iwasaki, 1828, *Honzô Zufu*: Flower is single and white and petals are small and have narrow, pink dapples. See: Yokoyama, CS., 1981, *Tsubaki*, No.20, p.107. Originated in Japan. (Believed extinct.)

Nacionale. van Houtte Catalogue, 1857, 67:44. Synonym for **Nazionale Benucci.**

Nachi-no-taki. (Nachi Cascade), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.163, colour photo and description: Small size, deep red, wide, vase-shaped single, of 7 wide, overlapping petals with a central column of anthers, with pinkish filaments, joined for their lower half, and golden anthers. Leaves strong green, ovate, apices tapering acute, margins shallowly crenate. Late blooming. Originated in the Wakayama Prefecture, Japan. Selected from wild camellias near Nachi-Waterfall, in Wakayama Prefecture. Named and released by Minoru Satô in 1979.

Nada-no-hikari. (Ocean's Radiance). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.183 with colour photo; English translation p.127. Medium size, deep red, tubular single, cylindrical stamen column. Flowers mid-season to late. Leaves broadly elliptic, medium size, somewhat plicate. Upright, vigorous growth. A beloved camellia left by an enthusiast who lived by Lake Irakao. Propagated and released by Harumi Satô in 1981.

Nadeshiko. (Pinks), *(C.japonica)*, Hosaka, 1937, *Kamoku Zufu*. No description. Originated in Japan.

Nadina. *(C.japonica)*, Luzzatti, 1851, *Collezione di Camelie*, p.28: Very bright rose, with a tint of violet with irregular marks of white, both large and small, in almost all petals, which are round and disposed regularly to form a cup-shape, of a kind, quite new in imbrication, globose. Verschaffelt, 1855, *Nouvelle Iconographie*, Book X, pl.IV: A real miniature as to perfection, being composed of numerous, small petals, flawlessly imbricated, rounded in the exterior rows, the others oval, all of a vivid rose colour with a tint of violet; some broad, white streaks, themselves striped pink. Originated in Italy by Nencini, Florence.

Nadine Eshelman. *(C.japonica)*, *American Camellia Yearbook*, 1959, p.278, Reg. No.360: A 7 year old chance seedling, originated by R.W. Ragland, Orange, California, USA, which first bloomed 1955. Plant growth is medium with dark green leaves, 8 cm x 5 cm. The semi-double flowers are 10 cm across x 5 cm deep, of a shaded, soft pink. There are 20 petals, notched, with one or two fluted petals in the centre amongst the stamens. Flowers mid-season.

Nadomishiro. *(C.sasanqua)*, Fendig, 1953, *American Camellia Catalogue:* Medium, white, single. Probably a corruption of an unknown Japanese name.

Naidong. *Collected Papers*, ICS Congress, Jinhua, 2003, p.45, "Naming new cultivars of "Naidong" camellia…..; Chen Junzhi and Chen Jinshui". A group name for *C.japonica* from the Qingdao region, China, which have much higher than average cold hardiness.

Nafsika. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.8, No description. SCCS., 1964, *Camellia Nomenclature*, p.93: Shell pink with light fuchsia shading. Large, full, peonyform. Vigorous, upright growth. Mid-season blooming. Originated in USA by Malbis.

Nafu. Chinese synonym for USA *C.reticulata* hybrid **Lila Naff.**

Nagaba. (Long Leaf), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.101 & 696: Large, red, single, opening flat, 5 petals, surrounding a full stamen column. Leaves long and lanceolate with a long, acuminate apex. Originated in Japan. (Believed extinct.)

Nagaba-yamatsubaki. (Long Leaf Mountain Camellia), *(C.japonica)*, Miyazawa, 1954, *Kanshô Jumoku*, p.348. Common Japanese name for *C.japonica* var. *longifolia* Koidzumi. This group of camellias is found in Kyushû Island. See: Tuyama, 1966, *Camellia Cultivars of Japan*, p.6.

Nagao-beni-botan. (Nagao's Red Peony). *(C.sasanqua). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.307 with colour photo; English translation p.216. Medium size, peach red single. Very early flowering. Leaves narrowly elliptic, medium size. Upright, vigorous growth. Released by Nagao Sôsei'en Nursery around 1960. Flower typical, but named because of flowering earlier than other varieties.

Naga-oka. (Locality Name), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.132, p.66, description, p.127: Leaves, green to dark green, obovate-elliptic, suddenly acuminate, flat, coarsely denticulate, 7.4-9.5 cm long x 3.3-5 cm wide; petioles 6-7 mm long, very hairy. Flowers, pink (Rose Madder 23/2) with a few stamens; irregular, incomplete double, petals 15-32, diminishing towards the centre, with a few petaloids. Stamens poorly developed, if any. Gynoecium often absent. Flowers late season. Originated in the Buddhist Temple, Jôryûji, Toyama Prefecture, Japan.

Nagaoka-shibori. (Nagaoka Variegated), *(C.rusticana)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.106, colour photo, p.234 description: Large, semi-double, soft, blush pink ground with deep pink stripes and speckles; petals in 3 rows, outer broad, notched, rounded; inner oval, semi-erect, flared; stamens short, irregular. Leaves, broad, elliptic, serrulate, apices acute. Originated in Naga'oka City, Niigata Prefecture, Japan.

Nagara. (Name of originator), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.37, p.19, description, p.96: A bush Camellia, white, many petalled, tube-shaped flowers. Leaves broadly-elliptic, 7.6-8.6 cm long x 3.6-4.4 cm wide, green to dark green, dull, slightly recurved. Petals 13-18 with a few fan shaped petaloids, pure white to palest blush. Stamens in 4 or more fascicles, filaments, deep, creamy yellow. Late flowering. Resembles **Zansetsu.** Originated by Mr Nagara, Ishikawa Prefecture, Japan. See also: pl.252, pp.118, 328, *Encyclopedia of Camellias in Colour*, vol.I, 1972. Seibundô Shinkôsha, 1979, *Senchinshû*, p.234.

Nagarawaga. (River Nagara). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.183 with colour photo; English translation p.127. Small, pale pink, cup to trumpet shaped single, cylindrical stamen column. Flowers early to late. Leaves elliptic, medium size. Upright growth. The original tree was growing on the left bank of the Nagara river in Hajima City. Named and released by Nagaharu Niwa in 1989, released by Gifu Camellia Club. From Gifu Prefecture.

Nagareboshi. (Shooting Star), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.367, p.187, description, p.199: Leaves, olive green, oblong to broad-elliptic, shortly acuminate, dullish, obscurely crenate, 4.8-8.2 cm long x 2.4-3.9 cm wide; petioles, 3-7 mm long, very hairy. Flowers, rose

form to formal double, pink (Carmine 21/3), striped rose (Carmine 21/1), petals incurved and embracing, 34-44, sometimes with small accessory petals inside. Late flowering. Originated in the Buddhist Temple, Jôryûji, Toyama Prefecture, Japan.

Nagasaka Special. Central Georgia Nursery Catalogue, 1954-1955, p.6. Orthographic error for 'Nagasaki Special', synonym for **Mikenjaku.**

Nagasaki. Waller, 1889, *The Garden*, 36(930):247: This name is now regarded as a synonym for Mikenjaku, Itô, Ko'emon, 1879. It was widely distributed in the Western World from shortly after its receipt by the Caledonia Nursery, Guernsey, Channel Isles, in 1887 from Louis van Houtte, and it received a great number of synonyms which include: 'Nagasaki Special', 'Princess Nagasaki', 'Princess Nagaski', 'Candida Elegantissima', 'Lonjan', 'Lady Audrey Buller', 'S.Peter Nyce', 'Tennin-kwan', 'Marguerita', 'Veinveanna', 'Bikashi Bia', 'Conibere', 'Variegata Perfecta', 'Nagasaki'(Coe), 'Nagasaki Special'. In effect, these must now all be regarded as synonyms for **Mikenjaku.** There are also three other names which have been erroneously applied to **Mikenjaku** as 'Nagasaki' and must be regarded as pseudonyms. They are **Marguerita,** the solid red form of **Mikenjaku, Empress of Russia,** a variety released by McIlhenny in 1942 and **Adolphe Audusson Variegated**, the variegated form of the French variety, **Adolphe Audusson.**

Nagasaki (Coe). SCCS., 1954, *The Camellia. Its Culture and Nomenclature*, p.69. This was a heavily white variegated form of 'Nagasaki', (**Mikenjaku**), but being virus variegated, is most unstable and must be regarded only as a synonym for **Mikenjaku** as 'Nagasaki'.

Nagasaki Rose. Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I, pp.266, 269. Synonym for **Marguerita.**

Nagasaki Special ... SCCS., 1947, *The Camellia. Its Culture and Nomenclature.* Together with 'S. Peter Nyce' and 'Nagasaki'(Coe), this is an unstable, virus variegated form and is considered as a synonym for **Mikenjaku** as 'Nagasaki'. Orthographic error: 'Nagasaka Special'.

Nagasaki-kotarô. ('Kotarô from Nagasaki). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.182 with colour photo; English translation p.126. Small, white sake cup-shaped single, petal tips loosely waved, tubular stamen cylinder. Flowers early to mid-season. Leaves narrowly elliptic, small. Somewhat multi-stocked nature. Collected at a former samurai residence in Ômura City. Named and released by Tadanori Yoshioka in 1985. From Nagasaki Prefecture.

Nagasaki-tsubaki. Tuyama, 1966, *Camellia Cultivars of Japan*, p.372. Synonym for **Yuri-tsubaki.**

Nagashibina. (Drifting Doll), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.17. No description. Originated in Niigata Prefecture, Japan. Note: Following the Doll's Festival on 3rd March, paper or clay dolls were floated away on a stream to take away misfortune from girls.

Nagashima. (Personal name), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in the section for variegated leaves: Red, small size, single. See JCS., 1969, *Tsubaki*, No.7, p.37. Originated in Japan. (Believed extinct.)

Nagashima. (Personal Name), *(C.japonica),* Satomi. 1956, *Camellia Cultivars of Japan:* Red, small, single. Originated in Japan.

Nagashima-dora. (Nagashima Gong), *(C.japonica),* Mizuno, 1829, *Sômoku Kinyôshû* in the section on unusual leaves. Holly leaved. Flower purplish red, single, cup-shaped. See: Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.168. Originated in Japan. (Believed extinct.)

Nagashima-shirofu. (Nagashima's White variegated), *(C.japonica)*, Mizuno, 1829, *Sômoku Kinyôshû* in the section of white variegated leaves, thin, waved, lustrous; flowers semi-double, light red.. Different reading: 'Nagashima-shirohu'. See: Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.162. Originated in Japan. (Believed extinct.)

Nagashima-shirohu. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.148. Different reading for **Nagashima-shirofu.**

Nagatsuka. (Long Bundle), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.196, colour photo and description: Medium size, deep scarlet, single, with 6-7 petals, some pointed, and a central stamen column, long filaments pinkish, joined for their lower half, and golden anthers. Leaves broad-elliptic to elliptic, mid to light green, apices acute, margins serrate. Blooms midseason to late. Originated in the Hiroshima Prefecture, Japan. Named and released by Fumio Hironaka in 1981.

Naga-tsubaki. (Long Camellia), *(C.japonica). Chinka Zufu*, (before 1700), Watanabe, 1969, pl.223: White, semi-double with crimson streaks, 3 rows of petals and a small, compact cylinder of stamens. Originated in Japan. (Believed extinct.)

Nagi-no miya. Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû*, No.10, p.148. Different reading for **Naki-no-miya.**

Nagoriyuki. (Lingering Snow), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.57 colour photo and description: Small size, white, bowl-shaped single, with 5-6 concave, emarginate petals of unequal sizes and a central stamen column with white filaments, joined for their lower half, and light yellow anthers. Leaves mid-green, with pale yellow speckling, broad-elliptic, apices tapering acute, margins finely to obscurely serrulate. Late flowering. Originated in the Chûbu area, Japan. Selected and named by Toshiaki Kosaki in 1985.

Nagoya-kyokkô (Rays of Rising Sun at Nagoya), Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.176: Large sized white, semi-double with pink and red stripes and dashes. Central, small, stamen cluster. Petals, large, overlapping in 3 rows. Synonym for **Kyokkô.**

Nagoya-obi. (Nagoya Sash), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.235: Linear red spots on a light, peach pink ground with white whorls, single, campanulate form bloom with a cylindrical stamen cluster. Medium size. Mid-season blooming. Leaves medium size, wide--oval, blunt acute apex, undulate.A sport of **Chûkyôbijin.** Originated in the Chûbu area, Japan.

Nagoya-sazanka. Kondô, 1976, *American Camellia Yearbook*, p.11. Local Japanese group name for *C.hiemalis.*

Nagoya-shibori. (Nagoya Variegated), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.284, colour photo and description: Large size, white with red streaks and pink patches, saucer--shaped single with 7 large, rounded, overlapping petals and a large, circular burst of yellow stamens. Leaves mid-green, elliptic, apices acuminate, margins serrate. Blooms mid-season to late. Originated in the Chûbu area, Japan.

Naidong. (Winter Endurance), *(C.japonica)*, Gao & Zhuang, 1989, *The Camellia in China*, p.51, No.320, colour photo No.185: Medium size, 7-9 cm across, crimson, single of 5-6 petals. Blooms mid-season. Originated in China.

Nairniana. *(C.japonica)*, Loudon, 1839, *The Gardeners' Magazine*, vol.15, p.198. Exhibited before the Royal Caledonian Horticultural Society. No description. Imported from China by Mr James Nairn, Clermount. (Believed extinct.)

Naishi. (Ancient Imperial Female Court Rank), *(C.rusticana),* Tuyama, 1968, *Camellias of Japan*, pl.62, p.31, description, p.103: A snow camellia cultivar with bushy, dense foliage. Leaves, olive green, small, ovate. obtusely acute, undulate, impressed venation, 5.8-7.4 cm long x 3.5-4.2 cm wide; petioles 2.5 cm long, hairy. White, formal double with 60-75 petals, acutate at the apex and recurved. Late flowering. Originated in the Niigata Prefecture, Japan.

Naitô. (Personal Name). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.182 with colour photo; English translation p.126. Medium size, pale pink, bowl shaped single, cylindrical stamen column. Flowers early to mid-season. Leaves elliptic, medium size, somewhat curved outwards. Upright, vigorous growth. Selected from the wild japonica community in Shiroyama, Miyazaki City. Named and released by Shiroyama Camellia Lovers Club in 1996. From Miyazaki Prefecture.

Naitôde-makie-sakazuki. (Naito's Wine cup, decorated with Lacquer Work), *(C.japonica),* Mizuno, 1829, *Sômoku Kinyôshû:* Listed in section for camellias with dotted leaves. Leaves with large yellow spots which darken with age.. See: Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû*, No.10, p.148; ibid, No.7 1966, p.167. Different reading: 'Naitode-makie-sakazuki'. Originated in Japan. (Believed extinct.)

Naitômakie-sakazuki. Different reading: **Naitôde-makie-sakazuki.**

Naitong. Chinese group name for *C.sasanqua.*

Naitong Cha. Chinese group name for *C.sasanqua.*

Nakabijiro. (Nakabi's White), *(C.japonica),* Satô, 1975, *Chûbu no Tsubaki*, p.28, colour photo and description; Seibundô Shinkôsha, 1979, *Senchinshû*, p.106: A small, campanulate, single white, sometimes with a faint touch of blush pink, 6-7 rounded, emarginate, overlapping petals about a compact, central column of stamens, pinched in at the top, yellow anthers. Leaves, glossy green, broad-oval, blunt-acute apex, margins shallowly crenate. Originated in the Chûbu area, Japan. Named and released by Minoru Satô in 1970. Nakabi is the place where this cultivar originated. Different reading: 'Nakabishiro'.

Nakabishiro. Different reading for **Nakabijiro.**

Nakafuhiryû. (Hiryû with variegated leaves), *(C.sasanqua),* Ishii, Yûgi, 1933-1934, *Jissai Engei No.15*, *Chabai no Hinshu Kaisetsu:* Pink, small, double. Leaves mottle in the centre. Early flowering. Sport of **Hiryû.** Originated in Japan.

Nakagawa. (Middle River), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.270: Large, semi-double, white with pink and red stripes and central stamen column with yellow anthers and white filaments. Originated in Japan. (Believed extinct.)

Nakagara-sakura. (Cherry of Nakagawa River). *(C.japonica), Kurume Camellia,* 1997, English translation, p.9; Pink, fading to white at centre, single, tubular stamen cluster. Flowers early to mid-season. Named by T. Satô, Kurume, Japan.

Nakajiro. (White Centre), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I; Yashiro, 1841, *Kokon Yôrankô*, vol.306, p.341 (Ichijima reprint): Red, semi-double with 2 rows of petals and a white protruding centre of **Bokuhan** type, medium size. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Dark red with white spots, semi-double with 3-4 rows of petals, small size. Originated in Japan. (Believed extinct.)

Nakakan. Different reading for **Chûkan.**

Nakakane. (Place name), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.309: Small, deep scarlet, single, opening flat with large, golden, central stamens group. Different reading 'Chûkin'. Originated in Japan. (Believed extinct.)

Nakakane. (Place name), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.613: Small, crimson, single with a cushion centre of white petaloids, similar to **Bokuhan.** Different reading Chûkin'. Originated in Japan. (Believed extinct.)

Nakakuni. (Place name), *(C.japonica),* Okumura, [ca. 1810], *Chinka Hin'i.* No description. Originated in Japan. (Believed extinct.)

Naka-no-shima. (Place name), *(C.japonica),* ICS., Apr. 1990, *Japanese Camellia Cultivar List*, p.17. No description. Originated in the Ôsaka Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.183 with colour photo; English translation p.127. Pink, long tubular single, cylindrical stamen column. Flowers mid-season to late. Leaves elliptic, medium size, waved. Spreading growth, branch tips weeping. Named and released by Katayama Juraku'en Nursery in 1979.

Nakasumi. (Personal Name) *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.183 with colour photo; English translation p.126. Small, changing to white, tubular single, cylindrical stamen column. Flowers mid-season to late. Leaves elliptic to ovate, small, flat. Spreading growth, somewhat vigorous. A cultivar raised by a private family in Saba'e City. Named by Yoshizumi Hiyama in 1978, released by Tokuji Ôoka. From Fukui to Niigata.

Nakasumi. Different reading for **Nakazumi.**

Nakawa. (Uncertain), *(C.japonica),* Uekiya, Seigorô, 1874, *Tsubaki Hyakuro no Zu*, vol.1: Large, white, double with 6-7 rows of petals, imbricated, showing golden stamens when fully open. Originated in Japan. (Believed extinct.)

Nakayama. *(C.japonica), "Camellias in Kurume"*, ICS Congress, Kurume 2010, p.113. No description. From Kurume City, Japan.

Nakayoshi-sôshi-arai. (Cordial Terms - Washed book), *(C.japonica),* JCS., 1989, *Japan Camellia*, No.31, p.4: Medium size, semi-double of 14-16 rounded petals in 2-3 rows apart and a small, irregular stamen column with yellow anthers. Leaves glossy mid-green, elliptic, apices tapering acuminate, margins serrulate. Flowers are pure white or blush pink, densely speckled and striped red. The name Sôshi-arai, refers to an ancient Japanese story, when Komachi, a famous member of the Rokkasen (Six Poets) of the 9th century was accused of plagiarism by her rival during an Imperial poetry competition, who produced a copy of a book containing the poem she had just recited. Komachi established her innocence by washing the book in water, when the fresh ink of the poem disappeared, leaving the rest of the text intact. Sport of **Sôshi-arai.** Introduced by Tomoji, Kobayashi, Nagasaki Prefecture.

Nakazumi. (Place Name), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.106, colour photo, p.234, description: Small, soft pink, single with 5-6 rounded petals, compact opening, cup--shaped and a central, stamen column, slightly spreading, with yellow anthers. Mid-season blooming. Leaves, mid-green, lanceolate, apex long-acuminate, serrulate. Originated in Saba'e City, Fukui Precture, Japan. Different reading: 'Nakasumi'.

Nakifudi. Ackerman, 1971, *American Camellia Yearbook*, p.109. Synonym for **Nukifude.**

Naki-no-miya. (Uncertain), *(C.japonica),* Mizuno, 1681, *Kadan Kômoku*: Semi-double, white with red splashes. Originated in Japan. (Believed extinct.) Different reading 'Nagi-no-miya'.

Naknette. (*C.sasanqua*), SCCS., 1981, *Camellia Nomenclature*, p.188: Brilliant, deep pink. Large, rose form double. Originated in USA.

Nakoi-no-haru. (Higo) C. Aust, *Camellia News*, No.180, Winter 2009, p.26. Colour photo but no description. *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.247 with colour photo; Large, white bordered pale pink, flat single with ume-jin (apricot) flared stamens. Flowers mid-season to late. Leaves medium size, dark green. Upright, vigorous growth. A sport of **Ôkan** found by Yasuyuki Hifumi, Kumamoto Pref., Japan. Recognised by the Higo Camellia Society in 1999.

Nambamboshi. Tuyama, 1966, *Camellia Cultivars of Japan,* p.208. Different reading for **Nanbanboshi.**

Nambanboshi. Fendig, 1953, *American Camellia Catalogue.* Different reading for **Nanbanboshi.**

Namikawa. (Nami River), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.464: Medium size, white, semi-double with circular petals and a small stamen cluster, pale yellow anthers and white filaments. Originated in Japan. (Believed extinct.)

Nami-no-hana. (Flowers in Waves), (*C.rusticana*), Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.8, p.18, illustration: Medium sized, 8-9 cm across x 4 cm deep, light pink, incomplete double, peony form with fascicles of about 180 stamens amongst erect and twisted, inner petals, 5 large, outer petals, 50 inner petals and about 20 petaloids; filaments pale yellow. Collected from Mizuhara Machi, Kita-kanbara-gun, Niigata Prefecture, Japan in 1958 by Susumu Ishizawa. Named and released by Kaoru Hagiya in 1959. See: Seibundô Shinkôsha, 1979, *Senchinshû,* p.235. First character different.

Namiryômen. (Waves both sides), *(C.sasanqua),* Itô, Ihei, 1695, *Kadan Chikinshô;* Yashiroda, 1950, *American Camellia Yearbook*, p.13: Double pink, profusely dotted with white, somtimes with cross stripes. Flower shape the same as **Ryômen.** Originated in Japan. (Believed extinct.) Synonyms: 'Sarasa-ryômen', 'Uzuryômen'.

Namitensis. *(C.japonica),* J.E. von Reider, 1834, *Die Beschreibung und Kultur der Azaleen, Cactus, Camelien..*, p.219. Orthographic error for **Nannetensis.**

Nami-ura. (obscure). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.184 with colour photo; English translation p.128. Medium size, red stripes and white borders on pink ground, semi-double, split stamens. Flowers mid-season to late. Leaves narrowly elliptic, medium size. Upright, vigorous growth. A natural seedling of **Oki-no-nami**. Named and released by Totsurô Nakamura in 1994. From Tokyo.

Nampû. Kuriya, Tsuyoshi, 1968, *Higo Tsubaki.* Different reading for **Nanpû.**

Nan Crowell. *(C.japonica),* SCCS, Apr.1949, *The Camellia Review;* Fendig, 1953 *American Camellia Catalogue*: Large, pink, incomplete double, 10-11 cm across x 2.3-3.8 cm deep. Colour is a chromatic pink. There are about 38 petals, which average 5 cm long x 2.5 cm wide. A few small petaloids show when bloom is fully open. Leaves, medium, dull green, oval, 10 cm x 5 cm; texture stiff, curls downward, apex rounded, serrations shallow. Plant habit is open,

spreading and vigorous. Originated by Mrs Elizabeth Councilman, El Monte, California, USA from chance seed. First bloomed 1949. Reg. No.137, *American Camellia Yearbook*, 1954, p.326.

Nan Ford. *(C.japonica)* ACS, *The Camellia Journal*, June 2013, p.25 with colour photo; Regn No.2843; Originated, registered and propagated by Vernon E. Howell, Lucedale, Miss., USA. ACS, *Yearbook*, 2013, p.129 with colour photo; A 12 year old seedling, first flowered 2004. Very large, 14cm diameter x 6.5 cm deep flower is semidouble to loose or full peony, and dark pink with 9+ petals with heavy texture. Stamens are rarely shown, but have yellow anthers and yellow filaments. Upright, dense, vigorous growth. Dark green leaves average 10cm x 5cm with medium serration. Flowers early to midseason.

Nan Ford Variegated. *(C.japonica)* ACS, *The Camellia Journal*, June 2013, p.25 with colour photo; Regn No.2844; Originated, registered and propagated by Vernon E. Howell, Lucedale, Miss, USA. ACS, *Yearbook*, 2013, p.129 with colour photo; First flowered 2006. A red, variegated white, form of **Nan Ford**. Flower size 14cm x 7.5cm. Other details as for **Nan Ford**.

Nan Pickering. *(C.japonica), American Camellia Yearbook*, 1980, p.171, Reg. No.1613: A medium to large, very soft pink, formal double, *C.japonica* chance seedling. Mid-season blooming. Originated by Colin P.J. Pickering, Aldgate, South Australia. First bloomed 1975. Size 10 cm across, petals heavy texture. Plant growth upright and spreading with dark green leaves, 12.5 cm. x 6 cm.

Nan S. Dodd. *(C.japonica), American Camellia Yearbook*, 1977, p.218, Reg. No.1438: A medium, light blush, shading to pink at the edges, rose form double. A 17 year old chance japonica seedling that first bloomed 1968 of **Nina Avery,** formerly known as 2-2-9. Originated by Richard Dodd, Marshallville, Georgia, USA. The rose form double type bloom, shades pink at the edges with yellow anthers and filaments. Size is 8 cm across x 5 cm deep. Blooms mid-season. Plant growth is upright, dense and rapid with dark green leaves, 7.5 cm long x 5 cm wide.

Nancy Gunn. *(C.japonica),* SCCS., 1976, *Camellia Nomenclature*, p.116: Light red. Large, semi-double. Vigorous, upright growth. Mid-season blooming. Originated in USA by J.M. Haynie, Theodore, Alabama.

Nancy K. *(C.japonica), American Camellia Yearbook,* 1993, p.70, colour photo p.73, Reg. No.2269: A medium size pink with darker flecks and streaks, semi-double *C.japonica* chance seedling, blooming mid-season. Originated by Ed & June Atkins, Shalimar, Florida, USA. The 6 year old seedling first flowered 1989. Average flower size is 8.3 cm across. Plant has excellent growth habit and is cold hardy with long lasting flowers that do not shatter. Plant growth habit is upright, dense and rapid in rate with dark green leaves 7.5 cm long x 3 cm wide.

Nancy Kelly. *(C.japonica),* Cannon, 1962, ACS., *The Camellia Journal*, vol.17, No.1, back cover. No descripion. SCCS., 1966, *Camellia Nomenclature*, p.100: Red. Large, semi-double to peony form with loose petals. Mid-season blooming. Originated in USA by Mr Kelly, Hattiesburg, Mississippi.

Nancy Lee. *(C.japonica),* Vanderbilt, 1941, *Camellia Research, II*, p.5. No description. SCCS, 1947, *The Camellia. Its Culture and Nomenclature:* Pink. Small, miniature, formal double. Originated by C.S. Hearn, Arcadia, California, USA.

Nancy Lee Edwards. *(C.japonica),* ACS, *The Camellia Journal,* Mar. 2003, p.29 with colour photo, Reg. No.2591. A medium peach pink chance seedling with peony to rose form to formal double flowers with yellow anthers. Flowers mid-season to late. Plant is upright and dense. Originated by Marion S. Edwards, Jacksonville, Fla., USA. *American Camellia Yearbook*, 2003, p.65, colour photo p.c4. The 11 year old seedling first flowered in 1995. Flowers measure 7.5 cm across x 4.5 cm deep, with 46 petals and 30 petaloids. The dark green leaves are 7.5 cm long x 3.8 cm wide.

Nancy Lynn. *(C.japonica),* ACS., Nov. 1990, *The Camellia Journal*, vol.46, p.18, Reg. No.2192: Medium size, rich pink, formal double, *C.japonica* seedling. Blooms mid-season. Originated in USA by Bill & Alda Ball, Jacksonville, Florida. *American Camellia Yearbook*, 1990, p.90, colour photo between pp.90-91. The 12 year old seedling first bloomed 1985. Average flower size, 8 cm across x 2.5 cm deep with 48 petals. Plant growth is dense, spreading and rapid with dark green leaves, 10 cm long x 5 cm. wide.

Nancy Mandarich. *(C.japonica), American Camellia Yearbook.* 1961, p.228, Reg. No.572: An 8 year old chance seedling that first bloomed 1957; originated by Jack L. Mandarich, Menlo Park, California, USA. Plant growth is upright, dense and rapid with glossy, dark green leaves, 10 cm x 6-8 cm. The loose, semi-double flowers, 12.5 cm across x 6 cm. deep, are blush with golden stamens, 13 large, round, notched, outer petals with 15 upright, inner petals which are wavy and wrinkled. Mid-season blooming.

Nancy Raynes. *(C.hiemalis) New Zealand Camellia Bulletin,* Nov. 2008, p.18, Regn No. 482; A chance seedling of 'Hiryu' (**Kanjiro**), male parent unknown, raised by Mrs Bobby Hepworth, Auckland, NZ. A miniature semi-double, 4.5cm wide by 2 cm deep, with 25 – 30 soft petals and about 6 petaloids. It has a strong dusky scent. Cream filaments and yellow anthers. Flowers mauve pink, shading from purplish pink at the edges (RHS 80D) to RHS 70C at the centre. Flowers early to mid-season. Small light green leaves, 6 cm x 2.5 cm.

Nancy Reagan. *(C.reticulata), American Camellia Yearbook,* 1981, p.103, Reg. No.1721: A very large, medium rose-pink, semi-double hybrid *C.reticulata* chance seedling; originated by W.F. Goertz, San Marino, California, USA. The 11 year old seedling first bloomed 1975. Size, 15 cm across x 6 cm deep with 18-20 petals and gold anthers. Plant growth is upright and

medium with mid-green leaves, 10 cm. x 5 cm. See colour photo, Front cover, 1981, SCCS., *The Camellia Review*, vol.43, No.1. Chinese synonym 'Nanxi'.

Nancy van Heerden. *(C.sasanqua). Camellias,* Y.C. Shen, 2009, p.27 with colour photo; Crimson single to semi-double. Wide petals open to a flat form. Prominent tight column of yellow stamens. Originated by Jan van Bergen, Boskoop Nursery, South Africa from seed sown in 1988.

Nancy Weems. *(C.japonica),* SCCS., 1964, *Camellia Nomenclature*, p.94: White. Large, semi-double with yellow stamens and a few petaloids. Originated in USA by W.B. Weems, Ellisville, Mississippi.

Nancy's Choice. *(C.japonica),* Dodd, 1968, *Adventure in Camellia Seedlings*, p.12, colour photo: Large, pink, semi-double with a central column of stamens. A seedling of **Pink Star**, originated by Richard Dodd, Marshallville, Georgia, USA.

Nancy's Fancy. *(C.japonica), American Camellia Yearbook*, 1960, p.204, Reg. No.488: A chance seedling which first flowered 1954, originated by Mr & Mrs Charles G. Heflin, Marshallville, Georgia, USA. The shiny, dark green leaves average 6 cm long x 2.5 cm wide. The pure white, formal double flower, 7.5 cm across x 4.5 cm deep has 96 petals. Early flowering.

Nanetensis. Isola Madre Catalogue, 1845. Orthographic error for **Nannetensis.**

Nanette. *(C.sasanqua), American Camellia Yearbook*, 1980, p.171, Reg. No.1612: A miniature, brilliant deep pink, rose form double, *C.sasanqua* chance seedling; originated by Mrs L.V. Teeter, Fort Valley, Georgia, USA. The 10 year old seedling first bloomed 1976. Average flower size, 6 cm, across x 2.5 cm, deep, with 40 petals, yellow anthers and cream filaments. Plant growth is upright and rapid in rate with dark green leaves, 4.5 cm long x 2.5 cm wide.

Nanhai. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **South Seas.**

Nanine Simmons. McIlhenny Catalogue, 1952-1953. Synonym for **Mrs Charles Simons.**

Naniscah. *(C.japonica),* Dodd, 1968, *Adventure in Camellia Seedlings*, p.6, colour photo: Medium sized semi-double, deep, reddish pink with a double row of large guard petals and a shaving's brush centre of pink petaloids and stamens. A seedling of **Galilee,** originated by Richard Dodd, Marshallville, Georgia, USA.

Naniwa. (Ancient Ôsaka), *(C.sasanqua),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô*, according to Asai, Keitarô, 1964, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.5, p.82: Single, deep red with stripes of light red. Originated in Japan. The characters for 'Naniwa' also translate as 'Shipwreck' but are then written as 'Nampa'. (Believed extinct.)

Naniwabori. (Naniwa Moat), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô* according to Asai, Keitarô, 1964, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.5, p.77: Formal double, with

large petals having an equal proportion of red and white stripes. Originated in Japan. (Believed extinct.)

Naniwagata. (Naniwa Lagoon), *(C.japonica),* Sakuden, 1630, *Hyakuchin-shû-:* White, large, double, petals curled to outside, stamens degenerate. Looks like **Rôgetsû.** See: Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.95. Originated in Japan. (Believed extinct.)

Naniwagata. (Naniwa Lagoon), *(C.sasanqua),* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: White, shaded pink, deeper towards the margin. Medium, semi-double. Originated in Japan.

Naniwagata. (Naniwa Lagoon), *(C.japonica),* Tuyama, 1966, *Camellia Cultivars of Japan,* pl.182, description, p.318: Blush pink, semi-double, colour fading to petal edge, streaks of scarlet; 3-4 rows of irregular, emarginate petals about an irregular, central group of stamens and pinkish petaloids. See pl.321, p.142, *Encyclopedia of Camellias in Colour*, vol.I, 1972. Seibundô Shinkôsha, 1979, *Senchinshû*, p.228 as 'Naniwagata-Kansai'. Originated in Kansai area, Japan.

Naniwagata-Kansai. Synonym for **Naniwagata.**

Naniwa-no-tsu. (Naniwa Harbour), *(C.sasanqua),* Itô, Jukyû, 1739, *Honzô Hanamakie*, vol.16: Small size, semi-double, white with graduations of red towards the periphery. Different reading: 'Naniwazu'. Originated in Japan. (Believed extinct.)

Naniwa-sazanka. (Naniwa Sasanqua), *(C.sasanqua), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.515: White. Small single with strap-like petals, Some red spots. Originated in Japan. (Believed extinct.)

Naniwa-shibori. (Naniwa Variegated), *(C.sasanqua),* Itô, Jukyû, 1739, *Honzô Hanamakie*, vol. 16: Semi-double, white with small red streaks. Originated in Japan. (Believed extinct.)

Naniwazu. Different reading for **Naniwa-no-tsu.**

Nanjing Manao. (Nanjing's Agate). *(C.japonica),* Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.166 with colour photo; Originated in the Nanjing area, Jiangsu , China. Flowers red with white or pink patches, semi-double to peony, medium to large, petals broad

Nanjixing. Gao, Jiyin, Ltr, 5th August 1992. Chinese synonym for the New Zealand *C.japonica* **Antarctic Star.**

Nankin. (Chinese City Nanting), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Formal double, medium size, red and white streaks. Originated in Japan. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.78. (Believed extinct.)

Nankin. (Chinese City Nanting), *(C.japonica),* Yashiro, 1841, *Kokon Yôrankô*, vol.309, p.361. (Ichijima reprint, 1906): No description. Originated in Japan. (Believed extinct.)

Nankin. (Chinese City Nanting), *(C.reticulata), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.81: Large, deep crimson, semi-double, with large, fluted and waved petals. Originated in Japan.

Nankin. (Chinese City Nanting), *(C.reticulata), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.123; Kaempfer, 1712, *Amoenitatum Exoticarum.* Large, pink, semi-double with waved and fluted petals. Originated in China. It is thought that this cultivar may have been synonymous with **Captain Rawes.** See Andoh, 1989, JCS., *Tsubaki*, No.28, p.9.

Nankinchôji. (Nankin T), *(C.japonica),* Uesa, 1844, *Sômoku Benran:* White, single, moired with rose, anemone form. Medium size. Originated in China. See: Kyôto Engei Kurabu, 1961, *Kyôto Engei*, No.65, p.7. (Believed extinct.)

Nankinjiro. Sakata & Co. Catalogue, 1939. Different reading for 'Nankinshiro', synonym for **Alba Plena.**

Nankin-shibori. (Nankin Dappled), *(C.japonica)*, Uesa, 1844, *Sômoku Benran:* White, moired deep rose-red, cupped formal double. Originated in China. See: Kyôto Engei Kurabu, 1961, *Kyôto Engei*, No.65, p.6. (Believed extinct.)

Nankinshiro. Satomi, 1956, *Camellia Varieties in Japan*, p.10. Synonym for **Alba Plena**.

Nankin-tsubaki. Yashiro, 1841; Ichijima, 1906, *Kokon Yôrankô.* Reprinted. Cited from Kaibara, Ekken, 1708, *Yamato Honzô* Leaves, thick, slender and long, light green. Flowers large size, colour varies to white, red and pink. Japanese name for *C.reticulata*. Synonyms include: 'Karatsubaki', 'To-tsubaki', 'Nanshan Cha', 'Ta Cha Hua', 'Tien Shan Cha'. Also synonym for **Nankin**. The description could be for **Damanao.**

Nankin White. Waterhouse, 1962, ACRS., *Camellia News*, No.9, p.5. Synonym for **Alba Plena.**

Nanna Brown. Feray's Fine Flowers Catalogue, 1960. Orthographic error for **Nannie Brown.**

Nanna Simmons. Feray's Fine Flowers Catalogue, 1960. Synonym for **Mrs Charles Simons.**

Nannetensis. *(C.japonica)*, Anonymous, 1828, *Annales de la Société d'Horticulture de Paris*, 2:45, 46: Leaves, large, obtuse-ovate, reflexed, apex acuminate, venation prominent, pale green. Flower double, imbricated, 6.5 cm across, cherry red, sometimes darker; petals not numerous, arranged in a vase form, nearly all equal - Berlèse, 1837, *Monographie.* Originated in France by Jean Gouillon, Nantes. Orthographic errors: 'Nannettensis', 'Nantais', 'Nanetiensis', 'Nantensis', 'Nantesensis', 'Nanettensis', 'Nanetensis', 'Nanclensis', 'Nametensis'.

Nannetiana Alba. Berlèse, 1841, *Iconographie*, text facing pl.7. Synonym for 'Splendens Alba' (**Belle Nannette**).

Nannetiana Nova Alba. Berlèse, 1840, *Monographie*, ed.2. p.32. Synonym for 'Splendens Alba'.

Nannetiana Pulchra Alba. *Magazine of Horticulture*, 1839. Synonym for 'Splendens Alba'.

Nannettensis. Burdin Maggiore & Co. Catalogue, 1835, p.38. Orthographic error for **Nannetensis.**

Nannie Brown. *(C.japonica)*, *American Camellia Yearook*, 1957, p.302, Reg. No.294: A 10 year old chance seedling, originated by Mrs Sarah Jane Brown, Monticello, Florida, USA that first bloomed 1950. Plant growth is open and medium with dark green leaves, 8 cm long x 4.5 cm wide. The deep pink flowers have 16 petals, 12.5 cm across x 5.5 cm deep and resemble **Marian Mitchell** in form. Flowers early to mid-season. Orthographic error: 'Nanna Brown'.

Nannine Simmons. Deutch, 1950, *Camellian* (9)35. Synonym for **Mrs Charles Simons.**

Nanobotan. (obscure), *(C.japonica)*, Cho, Nisen, [ca.1800], *Chinkafu*, Illustr. p.18-19. Description not seen. Originated in Japan. (Believed extinct.)

Nanpû. (South Wind), (Higo), *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.369; Seibundô Shinkôsha, 1979, *Senchinshû*, p.107, colour photo, p.235, description: Large, scarlet, single, occasionally with white streaks, 6-7 petals, 10-12 cm across, petals broad, veined, emarginate and somewhat fluted. Stamens in a centre burst; anthers 150-180, antique gold, filaments yellowish. Leaves shiny, dark green. Originated in Kumamoto, Japan. Late flowering. A sport of **Shintsukasa-nishiki** approved by the Higo Camellia Society 1960. Different readings: 'Nampû', 'Minami-kaze'.

Nanpû (Soft Wind), *(C.hybrid)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.86, description, p.87, colour photo: Small size, pale pink, higo-like single, opening flat with 6-7 emarginate, ruffled,

overlapping petals and a large, central burst of numerous stamens with small, golden anthers. Leaves mid-green, lanceolate-elliptic, apices blunt acuminate, margins serrate. Fragrant. Originated in the Niigata Prefecture, Japan as a hybrid between *C.rusticana* **Kaonajimi** x *C.lutchuensis*. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.186 with colour photo; English translation p.129. White, or pink changing to white. Parentage stated to be *C.saluenensis* x *C.lutchuensis.* Originated and released by Kaoru Hagiya.

Nan Shan Cha. Urquhart, 1960, *The Camellia*, vol.II, p.9. Chinese name for *C.reticulata.*

Nanshan Xianggu. (Nanshan Fragrance Valley), *(C.hybrid).* China Regn No.56, *China Flowers & Horticulture,* Aug. 2009, No.16, p.51 with colour photo; Originated by John Wang, Orinda, Calif, USA. A hybrid between 'Camellia D(3)4' x **Superscent.** Flowers pink, single, 10-11 cm diameter x 3.5 cm deep. Petals tiled when fully open, margins rumpled. Anthers yellow, white filaments in cylinder form. Flowers fragrant at room temperature, weaker at lower temperatures. Flowers mid-season to late. Plant erect, average growth rate. Leaves dark green, elliptic, apices caudate, bases wide cuneate, flat, margin obtuse, 12-13 cm x 5.5-6.5 cm.

Nanshan Ziyu. (Nanshan Purple Jade). (*C.reticulata* hybrid), China Regn No.55, *China Flowers & Horticulture,* Aug. 2009, No.16, p.51 with colour photo; Originated by John Wang, Orinda, Calif, USA. Flowers rose form to formal double, 9-10 cm diameter, imbricate, pink-purple, apices of petals inward curved. A seedling of **Suzanne Withers** x **Nuccio's Jewel.** Plant erect, growth rate average. Leaves deep green, elliptic flat, 11.5-13.5 cm x 5.0-7.5 cm, apices acuminate, bases wide cuneate.

Nanshan Ziyu Southmountain Lavender. ACS, *Yearbook* 2011, p.14 with colour photo; Raised by John Wang, Calif., USA. Valid name **Nanshan Ziyu** plus English translation.

Nanshi-yucha. (Flexible Branched Oleifera). (*C.oleifera* hybrid). Seibu Maizuru Institute of Botany, 1993-1994, *Seibu no Tsubaki,* p.38. Single, white, small size. A local cultivar selected from *C.oleifera.* Originated in Japan.

Nantais. Anonymous, 1828, *Annales de la Société d'Horticulture de Paris*, 2:45-46. Synonym for **Nannetensis.**

Nanten Pink. *(C.x williamsii), American Camellia Yearbook,* 1961, p.228, Reg. No.535: An 8 year old hybrid *(C.saluenensis x C.japonica)* that first bloomed 1957. Originated by Mr K.M. White, Hazelhurst, Axminster, Devon, England. Growth is medium and open, with light green leaves, 8 cm x 3.7 cm. The soft pink, semi-double flowers are 10 cm across x 3.7 cm deep with yellow stamens, resembling **Salutation** but deeper coloured and fuller with 15 petals and 6 petaloids. Flowers mid-season to late.

Nantensis. Anonymous, 1828, *Annales de la Société d'Horticulture de France*, 2:45-46. Synonym for **Nannetensis.**

Nantesensis. Miller, John, Nursery Catalogue, 1838. Orthographic error for **Nannetensis.**

Nantian Wushi. Shao, Taichong, 1992, *The Observations from the Camellia World,* No.285, p.73. Chinese synonym for the USA *C.japonica* **Dixie Knight.**

Nanto-shibori. (Nanto Variegated), *(C.rusticana), Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.453, p.178, description, p.263: Small, anemone form, deep pink, with white moire, 6 cm across, outer guard petals 8-10; centre consists of a compact cushion of folded petaloids. Leaves, mid-green, lanceolate; apex long-acuminate, margins obscurely serrate. Blooms early to mid-season. See: Seibundô Shinkôsha, 1979, *Senchinshû*, pp.107, 235; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.360. Originated with a private family in Fukumitsu Town,

Nishi-tonami District, Toyama Prefecture, Japan. Named and released by Hideo Hori in 1980s.

Nanto-shirokarako. (Nanto White Anemone), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.352, description, p.353, colour photo, as 'Nanto-shiro-karako': Medium size. white, anemone form double with rounded, broad, overlapping outer guard petals, and a broad central boss of small, erect petals, petaloids and stamens. Leaves deep green, elliptic, apices tapering acuminate, margins sharply serrate. Blooms mid-season to late. Originated in the Minami-tonami district, Toyama Prefecture, Japan. Selected by Takashi Tsuchiya in 1960s, named by Takeo Ogawa.

Nanwang. Gao, Jiyin, Ltr, 5th August 1992. Chinese synonym for USA *C.japonica* **Unforgettable.**

Nanxi. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.419; Chinese synonym for the USA *C.reticulata* **Nancy Reagan.**

Nanzan-cha. Ono, 1803, *Honzô Kômoku Keimô.* Chinese reading: 'Nanshan Cha'. Synonym for *C.reticulata.*

Nanzezare. (No difficulty), *(C.japonica),* Sakuden, 1630, *Hyakuchin-shû:* Variable from single to double, like **Kikutoji,** light pink. Different reading: 'Bunan' in Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû,* No,10, p.112; 'Nanzezu' in Tomita, et al. 1980, *Tsubaki,* p.134. Originated in Japan. See: Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû,* No.2, p.112. (Believed extinct.)

Nanzihan. Chinese synonym for USA *C. japonica,* **Man Size.**

Naohime. (Princess Nao). *(C.japonica), Nagoya Camellia Society Bulletin,* 1992, No.25, p.9, colour photo No.27: Originated by Kôji Funakoshi, Nagoya, Japan. Chance seedling of **Kariginu.** Small size, 7 cm across, white single of 5-6 petals; a little larger than **Kiyoka** of Kurume with simila pleasant fragrance. Blooms mid-season. Named after the second daughter of the originator.

Naoibeni. (Naoi's red), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.199, colour photo and description: Small size, deep red, wide, campanulate single with 5-6 emarginate, overlapping, slightly reflexed petals, with a central column of stamens with pinkish filaments and yellow anthers. Leaves glossy, strong green, ovate, apices abruptly acute, margins shallowly serrate. Blooms early to mid-season. A seedling of **Iwane-shibori.** Originated in the Chûbu area, Japan by Haruichi Sakuragi. Named and released by Nagaharu Niwa in 1980.

Naomi. *(C.hybrid).* A 35 year old seedling of unknown parentage, but with some *C.x williamsii* characteristics. Originated by W. G. T. Hyde, Woodlands Nursery Gardens. Registered by Mrs Rosemary Legrand, West Moors, Dorset, UK. Plant is upright and bushy, with average growth rate. Leaves dark green, averaging 8cm x 3.8cm. The single, open trumpet shaped flower is 10cm x 6cm, (RHSCC 62C), blushed 62A on the edges of some petals. Central cylinder of stamens has yellow filaments and deeper yellow anthers. Flowers midseason to late.

Napa Pink. *(C.japonica),* Lindo Nursery Price List, 1941-1942. No description. Fendig, 1953, *American Camellia Catalogue:* Pink. Large, complete formal double, late blooming. Originated in USA.

Napa Red. McIlhenny, 1937, *600 Varieties of Camellias,* p.10. Synonym for **Elena Nobili** as 'Elena Nobile'.

Napaulensis. Tagliabue, 1840, *Nomenclatore Camelliae.* as *Camellia napaulensis;* synonym for *C.kissi.*

Napiniana. *(C.japonica)*, Baumann, Mulhouse Nursery Catalogue, 1841-1842, p.14. No description. (Believed extinct.)

Napoleon. *(C.japonica)*, Jacob Makoy et Cie Catalogue, 1842, p.9. No description. van Houtte Catalogue, 1843-1844 as 'Napoleon'(de Fresne's): Bright carmine, striated, imbricated at the circumference, peony form at the centre. Originated in Belgium by Mr Defresne, Liege. Trillon, Le Mans Nursery Catalogue, 1843, p.7: Blush pink variegated with white. Very large, magnificent flower. Synonyms: 'Napoleon de Fresne', 'Napoleon' (Defresne), 'Napoleon'(de Makoy). Orthographic error: 'Napoleone Makoy'. Orthographic variant: 'Napoleone'.

Napoleon Bonaparte. *(C.japonica)*, SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Rose-pink. Large, high-centered semi-double. Oregon Camellia Society Bulletin, 1955: A rose-pink seedling by Barney Goletto. The blossom is quite spherical, being almost as high centered as it is wide and ranges fron 10-14 cm across. The foliage is attractive and dark green. The growth is vigorous and upright. Originated by Barney Goletto, Oregon, USA. Sport: **Napoleon Bonaparte Variegated.**

Napoleon Bonaparte Variegated. *(C.japonica)*, SCCS, 1960, *Camellia Nomenclature*, p.86 as 'Napoleon Bonaparte Var.': A virus variegated form of **Napoleon Bonaparte** - Rose-pink blotched white. Originated in USA.

Napoleon d'Italia. van Houtte Catalogue, 1845-1846. Orthographic error for **Napoleone d'Italia.**

Napoleon d'Italie. Verschaffelt Catalogue, 1844-1845, p.27; Berlèse, 1849, *Annales de la Société Central d'Horticulture de France,* vol.40, p.133. Orthographic variant for **Napoleone d'Italia.**

Napoleon de Fresne. Cachet Catalogue, 1845-1846. Synonym for **Napoleon.**

Napoleon de Italy. Gerbing's Azalea Gardens Catalogue, 1938-1939. Orthographic variant for **Napoleone d'Italia.**

Napoleon (Defresne). Verschaffelt Catalogue, 1850, p.48. Synonym for **Napoleon.**

Napoleon (de Makoy). Franco Agostoni, 1844, *Catalogo Plantarum Cesarei Regii Horti Modician* as 'Napoleon'(de Mackoy). Synonym for **Napoleon.**

Napoleon II. Verschaffelt Catalogue, 1867-1868, p.45. Orthographic error for **Napoleone III.**

Napoleon III. Auguste van Geert, 1855, Catalogue No.38, p.27. van Houtte Catalogue, 1858. Orthographic variant for **Napoleone III.**

Napoleon-le-Grand. Franco Agostoni, 1844, *Catalogo Plantarum Cesarei Regii Horti Modician; Journal d'Horticulture Pratique la Belgique*, p.303, vol.6, No.10, Dec.1846. Synonym for **Napoleone d'Italia.**

Napoleone de Fresner. Fratelli Rovelli, 1852, Catalogue, p.23. Orthographic error for 'Napoleon' (Defresne), synonym for **Napoleon.**

Napoleone Superba. *(C.japonica)*, Ridolfi, Florence Nursery Catalogue, 1848, p.8 as 'Napoleona Superba'. No description. (Believed extinct.)

Napoleone. Isola Madre Catalogue, 1845. Orthographic variant for Napoleon.

Napoleone d'Italia. *(C.japonica)*, Burdin Maggiore & Co. Catalogue, 1845-1846, p.42. No description. Oudin, Paris Nursery Catalogue, 1845-1846, p.46: Very large, magnificent flower, vivid red embellished with large white blotches. van Houtte Catalogue, 1845-1846 as 'Napoleon d'Italia': Very large, clear red, large white spots. Verschaffelt, 1849, *Nouvelle Iconographie*, Book I, pl.IV: Imbricated, bright red with deeper veining and mottled with white; a small

white stripe at the summit of each petal, disappears towards the centre. The blossom is not less than 9-10 cm across. It is noticeable for its large, vigorous, glossy, elongated-oval, pointed leaves, regularly serrate and smooth venation. This variety from Italy, must not be confused with another under the name **Napoleon** obtained in Belgium a few years ago by Mr Defresne of Liege. Orthographic variants: 'Napoleon d'Italie', 'Napoleone' (d'Italia), 'Napoleon d'Italia', 'Napoleon de Italy'. Synonyms: 'Grand Napoleon', 'Napoleone il Grande', 'Napoleon-le-Grand'. Originated in Italy by Ridolfi, Florence.

Napoleone (d'Italia). Burdin Maggiore & Co. Catalogue, 1849-1850. Orthographic variant for **Napoleone d'Italia.**

Napoleone il Grand. de Jonghe, 1851, *Traité de la Culture du Camellia*, p.116. Synonym for **Napoleone d'Italia.**

Napoleone il Grande. Charles van Geert, 1850, Catalogue, No.117, p.11. Synonym for **Napoleone d'Italia.**

Napoleone Makay. Fratelli Rovelli Catalogue, 1852, p.23, Orthographic error for 'Napoleon' (de Makoy), synonym for Napoleon.

Napoleone III. *(C.japonica)*, Ambroise Verschaffelt, 1854-1855, Catalogue, p.21. No description. Franchetti, 1855, *Collezione di Camelie*, p.48: Petals white and red, and bright red, centre pale pink, magnificently imbricated. Originated in Italy by Mariani. Vervaene, J. Catalogue, No.1, 1875 lists 'Napoleon III'(Baumann) and van Houtte Catalogue, 1862-1863 lists 'Napoleon III'(from Baumann) but these would appear to be all the one variety. Synonym: 'Napoleon III d'Italie'. 'Napoleon II'. Orthographic variant: 'Napoleon III'. van Houtte Catalogue, 1870-1871 states that it is a sport of **Emelie Gavazzi.**

Napoleonia. Padova, 1855, Catalogi Plantarum Caesarei Regii Horti. Synonym for **Napoleone d'Italia.**

Napoleon III d'Italie. van Houtte Catalogue, 1859. Synonym for **Napoleon III.**

Nara. *(C.japonica)*, Williams Nursery Catalogue, 1891, p.42: This is a fine, large, bold petalled flower of soft rose colour; some of the petals entirely rose, while others irregularly mottled or striped with white. Imported from Japan.

Naranja. *(C.japonica)*, Wine, 1956, *American Camellia Yearbook*, p.41: A bright orange pink, incomplete double flower. Originated by Mrs R. Hayes, Thomasville, Georgia, USA. "Naranja" = orange in Spanish.

Nara-no-miyako. (City of Nara), *(C.japonica)*, Mizuno, 1681, *Kadan Kômoku:* White, spotted red. Double. Originated in Japan. See: JCS., 1965, *Tsubaki*, No.5, p.29. (Believed extinct.)

Nara-no-miyako. (City of Nara), *(C.hiemalis)*, Shimada, Yaichi, 1957, *Kumamoto no Sazanka ni Tsuite Dantairin;* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Light pink. Large, double. Early flowering. Leaves small and narrow. Originated by Yamazaki, Sadatsugu in Kumamoto Prefecture, Japan. For colour photo see pl.579, p.222, and description, p.396, *Encyclopedia of Camellia in Colour*, vol.I, 1972. Nara was the ancient capital of Japan.

Narara. *(C.japonica)*, ANZCRS., 1960, *Camellia Annual*, No.6, p.27: Loose, informal double white. Good clean colour and floriferous. A chance seedling from a cottage garden in Narara, N.S.W., Australia

Narasaka. (Nara Slope), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, #166; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White flower, variegated with red spots in various designs.

Formal double. Originated in Japan. Different reading: 'Narazaka'. See: JCS., 1969, *Tsubaki*, No.7, pp.27, 34. (Believed extinct.)

Nara-shichifukujin. (Nara's 7 deities of Good Fortune), *(C.japonica), Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.333, p.147, description, p.340: Campanulate, semi-double white with a few crimson streaks. Flower colour vary in many ways. The centre stamens group is broken into a number of fascicles by a few small, erect petals. Leaves, darkish green, elliptic, acuminate, shallowly, bluntly serrate. Originated in Kansai, Japan. Synonym: 'Byakugôji-goshiki--tsubaki'. The original tree is in the the precincts of the Byakugôji Temple, Nara City, Nara Prefecture, Japan. It is said to be one of the three notable camellia trees in the Nara Prefecture, together with **Chiri-Tsubaki** in the Denkôji Temple and **Norikoboshi** in the Tôdaiji Temple. See: Seibundô Shinkôsha, 1979, *Senchinshû*, pp.107, 235.

Naraumi-Gata. Coolidge Gardens Catalogue, 1955. Corruption of the Japanese name **Narumi-gata.**

Nara-wabisuke. (Wabisuke from Nara), (Wabisuke), Anonymous, [before 1868] *Tsubaki*, *Hachiboku Sanbokutsuki Nayose Hanagatatsuki Meisai;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pink, small size, like wabisuke. See JCS., 1969, *Tsubaki*, No.7, p.27. Originated in Japan. (Believed extinct.)

Naraya. (Possibly a Personal name), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.171: Small, deep red, somewhat irregular, formal double. Originated in Japan. (Believed extinct.)

Narayama. (Mount Nara), *(C.x vernalis)*, Kirino, 1972, JCS., *Tsubaki*, No.11, pp.50, 57; Kirino, 1976, *Nihon no Tsubaki*, pp.119, 236; Tanaka et al., Sept.1986, 'Cytogenetic Studies of Origin of *C.x vernalis', Journal of the Japanese Society of Horticultural Science*, vol.55, No.2, p.208; Hakoda, JCS., 1987, *Tsubaki*, No.26, p.50; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.41. Small size, pink single with spreading stamens. Leaves mid-green, 4.1 cm long x 2.1 cm wide. Blooms early to mid-season. The original tree is growing in Angyô, Saitama Prefecture, estimated age over 200 years. Named by Shûhô Kirino in 1971.

Narayama-ichigô. (Mount Nara No.1), *(C.japonica)*, Yokoyama & Kirino, 1989. *Nihon no Chinka*, p.199, Colour photo and description as 'Narayama-ichi-gô': Small size, deep crimson, campanulate single of 6 wide, overlapping, emarginate and serrate petals, and a central stamen column with pinkish filaments, joined for the lower half, and yellow anthers. Leaves bright mid-green, ovate to broad-ovate, apices abruptly acute, margins serrate. Late flowering. Selected from the wild camellias in the Saitama Prefecture, Japan. Named and released by Yoshizawa Camellia Nursery around 1980.

Narazaka. Different reading for **Narasaka.**

Narellan. Outteridge, 1962, *1000 Named Camellias in Australia*, p.13. A name applied to a Camden Park seedling by E.G. Waterhouse, Gordon, N.S.W., for what he thought may be Macarthur's 'Leila'. Synonym for **Leila (Australia).**

Naresome. (Loves Beginning), *(C.rusticana)*, Hagiya & Ishizawa, 1968, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.9, p.10 with black & white illustration: Light pink, occasionally with white variegation, rose form double to semi-double, opening to 4 rows of about a total of 20-22 circular petals with a centre of rare petaloids and 5-10 stamens with white filaments. Leaves, small, oval, 6-8 cm long, thick with blunt serrations. Originated in Naoetsu, Jo'etsu City, Niigata Prefecture, Japan in 1960. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.235.

Narida. *(C.x williamsii), New Zealand Camellia Bulletin*, 1975, vol.IX, No.1, p.29, Reg. No.102: *C.saluenesis x C.japonica* **Waiwhetu Beauty** seedling which first flowered 1959. Plant habit,

bushy and spreading with light green leaves, 9 cm x 4 cm. Flowers semi-double, with 12-15 petals and occasional petaloids; stamens yellow, filaments cream, 13 cm across. Flowers early to late season. Originated by L.E. Jury, New Plymouth, New Zealand.

Narihira. (Name of one of the Rokkasen), *(C.japonica)*, Okumura, [ca.1810], *Chinka Hin'i; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.266: Medium sized, white, semi-double, 3-4 rows of circular petals and a central stamen column. Originated in Japan. The 'Rokkasen' were six famous poets and artists of Japan, of the 9th Century AD. Ariwara, Narihira was a poet and the grandson of the Emperor Saga. (Believed extinct.)

Narihira. (Name of one of the Rokkasen), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.586: Red with pale edges to petals, semi-double with overlapping petals. Originated in Japan. (Believed extinct.)

Narrow Leaved Shot Silk. Peer, 1949, SCCS., *Bulletin*, 11(2):11. Synonym for **Liuye Yinhong.**

Narrow Osmanthus Leaf. Bao, 1980, ACS., *The Camellia Journal*, vol.35, No.2, p.18. Western synonym for **Xiguiye.**

Narukami. (Thunder), *(C.japonica)*, Himuro, 1982, *Murasuzume*, No.31: Deep rose with deep petal serrations, peony form. Originated in Japan. (Believed extinct.)

Narukami-murasaki (Purple Thunder) (*C.hybrid*) from Kodaira, Tokyo, *Japan Camellia* No.84, August 2007: Purplish red, single, cylindrical stamens, small, blooming in February to March. Tree spreading. A seedling of **Kurokami** and *C.saluenensis* hybrid **Bluebird.** Produced by Shinichi Noguchi and named in 2001.

Naruko Dori. Devonshire, 1969, RHS., *The Rhododendron and Camellia Yearbook*, No.23, p.2. Corruption of the Japanese name **Yobukodori.**

Naruko-shichihenge. (Bell Clapper - Seven Changes), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka.* p.152, description, p.152, colour photo: Small size, cherry red, tubular single with mid-green leaves, thick, concave, ovate, smooth margins, strongly deformed into various shapes, some leaves are vase shaped which make a noise like a clapper, as the name implies. Blooms midseason. Originated in Izu Ohshima, Japan as a mutation of a wild japonica. Named and released by Takeo Ogawa in 1989.

Naruma-Gata. Vanterbilt, 1940, *Camellia Research*, p.6. Corruption of the Japanese name **Narumigata.**

Narume-Gata. Vanderbilt, 1941, *Camellia Research, II*, p.5. Corruption of the Japanese name **Narumigata.**

Narumi Bay. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.176. Synonym for **Narumigata.**

Narumi Beach. Yashiroda, 1950, *American Camellia Yearbook*, p.22. Synonym for **Narumigata.**

Narumi Gaïta. A. Stervinou, Catalogue 2008, p.17. Different reading of **Narumigata.**

Narumigata. (Narumi Bay), *(C.sasanqua)*, Ashizawa, Yagorô, 1898, *Chabaika Taishû:* Large size, single to semi-double, white with a red margin; Chûgai Nursery Catalogue, 1935-1936, p.26: A small to medium single, cup-shaped. White with pink margins. Fendig, 1953, *American Camellia Catalogue* as 'Narumi-gata': Large to medium sized, white-variegated, single, 7-8 cm across, cupshaped. The colour is white with delicate magenta-pink margins. There are 6-8 notched and creped petals, 4.5 cm across. The yellow stamens are central and flare outwards. The flower has a musty fragrance. Leaves, dark, olive green, 6 cm x 3.2 cm; texture stiff, bends upward from the midrib, apex and base, bluntly rounded. Habit vigorous, spreading and

hardy. Imported to America in 1930 by the Star Nursery, Montebello, California as **Narumigata** and by McIlhenny in 1931 from Veitch & Son Ltd. Exeter, England, under the invalid name 'Oleifera', under which name it also became widely dispersed in Australia and New Zealand. It was originated by Ashizawa, Kantô district, Japan in 1898. Sport: **Covington.** For colour photos see plate facing p.50, *American Camellia Yearbook*, 1954 and pl.547, p.216, *Encyclopedia of Camellias in Colour*, vol.I, 1972, pp.216, 389. This cultivar has been established to be a pentaploid and was used in crossing with *C.reticulata* to produce the hybrids **Flower Girl, Show Girl** and **Dream Girl.** Corruption of the name: 'Naruma Gata', 'Narume Gata', 'Narumi-Nada', 'Narumijata', 'Nuramigata'. Synonyms: 'Narumi Bay', 'Narumi Beach' and erroneously 'Oleifera'. Different reading: 'Narumi-gata'. Received an RHS., Award of Merit in 1953. Chinese synonym 'Minghaixie'.

Narumi-gata. Margaret Tapley, 1996, "Growing Camellias", p.84. Corruption of the name **Narumigata**. See ICS Register, p.1339.

Narumigata. (Narumi Lagoon), *(C.oleifera)*, Yokoyama, 1955, *Engei Yôran*, p.16: Outer petals red, inner white. Large size, single. Originated in Japan. Possibly the same as the above.

Narumijata. Foss, 1963, *Gardeners' Chronicle*, p.447. Corruption of the Japanese name **Narumigata.**

Narumi-Nada. Semmes Nursery Catalogue, [before 1950]. Corruption of the Japanese name **Narumigata.**

Narumi-no-aki. (Autumn in Narumi) *(C.japonica)*, Nagoya Camellia Society Bulletin, 1990, *Tsubaki*, No.23: Found by Isamu, Miura in a deserted garden in Narumi, Nagoya, Japan, and named and introduced by Shinpei Takakawa. A small single red, cup-shaped flower, 5-6 cm across with cylindrical stamen column. Light pink shading to to white at the petal base. Blooms early to mid-season. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.185 with colour photo; English translation p.128. Medium size, pink shading to white at the centre, trumpet shaped single, glossy petals, cylindrical stamen column.

Narutaka. Stone, 1983, SCCS., *The Camellia Review*, vol.45, No.2, p.19. Corruption of the Japanese name **Narutaki.**

Narutaki. (Sound of Waterfall), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* Pure white. Very large, white, 5 petals, 9 cm across. Large stamen burst, yellow anthers, creamy filaments. Originated in the Kumamoto Prefecture, Japan. See colour photo: Seibundô Shinkôsha, 1979, *Senchinshû*, p.107, description, p.235. Corruption of name: 'Narutaka'.

Naruto. (Name of Straits in Japan), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, vol.1: Red flower mixed with many white spots, double. Itô, Jukyû, 1739, *Honzô Hanamaki'e* (See: JCS., 1983, *Tsubaki*, No.22, p.120.) and Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Red with white stripes, large size. Yashiro, 1841, *Kokon Yôrankô*, vol.306, (Ichijima reprint 1906), p.343; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Double with 3 rows of petals, large size, white spots and moires. See: JCS., 1969, *Tsubaki*, No.7, p.27. Originated in Japan. (Believed extinct.)

Naruto-hi-chô. (Scarlet Butterflies of Naruto), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.156, colour photo and description: Small size, red, uneven, wide, campanulate single of 6 rounded overlapping petals and a central stamen column with degenerate anthers like Wabisuke. Leaves dark green, narrow-lanceolate to elliptic, apex long tapering acuminate, margins bluntly serrate. Blooms mid-season. Selected from wild japonicas in Tokushima Prefecture, Japan. Collected and released by Nobuo Sasai in 1983. Resembles **Ichiko-wabisuke, Sayo-wabisuke.**

Naru-wabishin. (Naru, Degenerated Stamens), (Wabisuke), ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.17: Very small size, cup-shaped, single with a few infertile stamens, red. Blooms mid-season to late. Originated in Gotô Island, Nagasaki Prefecture, Japan.

Nasciniana. Anonymous, 1839, *Revue Horticole*, p.205-207.Orthographic error for **Nassiniana.**

Nashville. *(C.japonica)*, SCCS., 1976, *Camellia Nomenclature*, p.117: Deep red. Medium to large, semi-double. Medium, upright growth. Blooms mid-season. Originated by J.M. Haynie, Theodore, Alabama, USA.

Nassai. Platt, 1961, RHS., *The Rhododendron and Camellia Yearbook*, No,15, p.107. Third in the class for pink. Exhibited by the Crown Estate Commission. Corruption of the Japanese name **Hassai.**

Nassiana. Oudin Catalogue of Plants for the Conservatory, 1845, p.3. Orthographic error for **Nassiniana.**

Nassiniana. *(C.japonica)*, Jacob Makoy et Cie Nursery Catalogue, 1839, p.17. No description. Anonymous, Jun.1839, *Revue Horticole*, pp.205-207 as 'Nasciniana'. No description. van Houtte Catalogue, 1843-1844, 12:aaa: Magnificent pink camellia. Well imbricated, veined and magnificently spangled with small white spots. In 1841 van Houtte gave this name as a synonym for **Landrethii,** then in his 1843-1844 catalogue he rejects this. In his 1857 catalogue he gives **Ré, Bijou de la Garza** and **Il 22 Marzo** as synonyms. However **Ré** is a Mariani seedling, while **Bijou della Garzia** was raised by Ugoni and **Il 22 Marzo** came from Burdin and while they are somewhat similar it is most unlikely that they are synonymous. Franchetti, 1855, *Collezione di Camelie*, p.48: Bright pink, striped white at the centre of each petal, sometimes spotted, sometimes self coloured very pale pink; imbricated. Originated in Italy by Lechi. Orthographic errors include: 'Nasciniana', 'Nassinania', Nassiana', 'Nassiniano', 'Nastiniana', 'Nassiona', 'Nassisiana', 'Nassissiona', 'Nassinani'. Synonyms: 'Hearn's Ecstacy', 'Nassiniana Vera'. In America the name, at one time, became erroneously applied to **Madame Hovey.**

Nassiniana Vera. Cachet Catalogue, 1840-1841, p.2. Synonym for **Nassiniana.**

Nasu. (obscure), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.586: Medium sized, white, semi-double to rose form double with some pink shading and a few crimson streaks. Petals rounded in 3-4 rows and a small stamen column. Originated in Japan. (Believed extinct.)

Natalia. Vallon, Apr.1858, *Revue Horticole*, p.188. Orthographic variant for **Nathalia.**

Natalia dei Medici. *(C.japonica)*, Del Lungo e Girardi, 1928, *Le Camelie*, p.155: Of Italian origin. Flower regularly imbricated, vivid red ground, variegated or striped in white.

Natalia Naristkine. *(C.japonica),* Anonymous, 1879, *R. Società Toscana di Orticultura Bollettino,* 4:99-102. No description. Originated in Italy. (Believed extinct.)

Natalie Carol. *(C.hybrid). New Zealand Camellia Bulletin*, March 1998, Issue No.129, vol.XX, No.4, p.22, Reg. No.393. Registered by M.G.P Hurley, Manaia, Taranaki, New Zealand. A putative seedling of *C. x williamsii* **South Seas** x an unknown pollen parent, which first flowered in 1989. Flower is a medium size, 8 cm diameter x 5 cm deep, rose form double with about 60 narrow petals and about 10 small petaloids, all showing a little darker veining. Colour is mid-pink (RHS.CC. 62B) for the main outer petals, shading to 62D in the innermost small petaloids. Plant is upright and dense, with a long flowering season.

Natchez. *(C.japonica),* Vanderbilt, 1940, *Camellia Research*, p.6. No description. SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Red. Medium, swirled, semi-double. Late blooming. Originated in USA at the Fruitland Nursery, Augusta, Georgia.

Natchez Red. *Camellia Digest*, 1(3), 1943. Abbreviation for 'Bolen's Natchez Red', synonym for **Weatherby Red.**

Nathalia. *(C.japonica),* Verschaffelt, 1849, *Nouvelle Iconographie*, Book II, pl.I: This variety belongs to the perfection class, due to the regular imbrication of its petals, which are white with a yellowish tinge in the centre, distinctly undulate, with a great number at the centre, where they are slightly crêped. Originated at the Villa Quiete, Rome, Italy. Orthographic variant: 'Natalia'.

Nathan Humphrey. *(C.japonica), American Camellia Yearbook*, 1975, p.240, Reg. No.1348: A 10 year old chance japonica seedling that first bloomed 1964; originated by S.L. Marbury, Wilmington, North Carolina, USA. Plant growth is average with dark green leaves measuring 7.5 cm long x 3.7 cm wide. The rose form double bloom is dark red and white. Size is 10.5 cm across x 4.5 cm deep with 35 petals. The centre does not form a firm bud, but tends to twist and curl with no stamens. Mid-season blooming. Synonym: 'Nathan Humphrey Variegated'.

Nathan Humphrey Variegated. Gentry, 1980, ACS., *The Camellia Journal*, vol.35, No.4 as 'Nathan Humphrey Var'. Synonym for **Nathan Humphrey.**

National. *(C.japonica),* Joseph Baumann, 1856, Prix Courant, p.5. Orthographic variant for **Nationale.**

National Honour. *Camellias*, Y.C. Shen, 2009, p.217 with colour photo; Synonym for **Mikuni-no-homare.**

Nationale. *(C.japonica),* Auguste van Geert, 1854, Catalogue, No.36, p.41. No description. Originated in France. (Believed extinct.) Orthographic variant 'National'.

Native Dancer. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Pink variegated. Semi-double. Mid-season. SCCR, 1954, *The Camellia. Its Culture and Nomenclature*, p.69: Light pink with wide, heavy stripes of carmine. Large semi-double. Medium, compact growth. Mid-season flowering. Originated in USA by Jones.

Natori. (Professional Name Received from One's Teacher), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.169: Medium sized, semi-double, white with dark crimson streaks. Originated in Japan. (Believed extinct.)

Natsugoromo. (Summer Clothes), *(C.sasanqua),* Minagawa, Iza'emon, 1885, *Nisshô'en Chabaifu:* Large size, white with small red streaks. Originated in Japan.

Natsugumo. (Summer Clouds), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.209: Medium to small, semi-double, white with gold anthers and white filaments. Three rows of oval petals. Originated in Japan. (Believed extinct.)

Natsugumo. (Summer Clouds), *(C.japonica), Chinka Zufu,* (before 1700),Watanabe, 1969, pl.292, 523: Large, open, incomplete double, white, peony form. Originated in Japan. (Believed extinct.)

Natsukai. (obscure), *(C.japonica),* Yashiro, 1841, Ichijima, 1906, *Kokon Yôrankô* (reprint), vol.309, 'Grasses and Trees', p.361. No description seen. Originated in Japan. (Believed extinct.)

Natsuki. (Woman's Personal Name). *(C.japonica), Kurume Camellia,* 1997, English translation, p.9; Light pink, small to medium campanulate single with tubular stamen cluster. Originated by T. Kunitake, Kurume, Japan.

Natsuko '80. (Natsuko 1980), *(C.hybrid),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.29: Medium size, pink, semi-double. Early flowering. A seedling of **Show Girl** x *C.granthamiana.* Originated in Ôsaka Prefecture, Japan. Named and released by Kazuo Yoshikawa.

Natsuko '82. (Natsuko 1982), *(C.hybrid),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.29: Medium size, pink, single. Early flowering. A seedling of **Show Girl** x *C.granthamiana.* "Natsuko" is a personal name. Originated in the Ôsaka Prefecture, Japan. Named and released by Kazuo Yoshikawa.

Natsumi. (obscure), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.17: Medium size, white ground, finely variegated deep red, single. Originated in Ôsaka Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.184 with colour photo; English translation p.127. Trumpet shaped single, tubular stamen cluster. Flowers mid-season to late. Leaves narrowly elliptic, medium size. Spreading growth. A chance seedling of 'Ezo-nishiki' (**Tricolor**). Originated and released by Shinichirô Kishikawa in 1986.

Natsumigawa. (Natsumi River), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.17. No description. Originated in Tokyo Prefecture, Japan.

Natsu-tsubaki. (Summer Camellia) Satomi, 1946, *Camellia Varieties of Japan,* p.10. Japanese common name for *Stewartia psuedocamellia.* Synonyms: 'Sara-tsubaki', 'Sara-no-ki', 'Shara', 'Sharanôki', 'Shara-sôju', 'Sara-sôju'. The name of 'Sara-sôju' is famous in Buddhism in the history that refers to Sakyamuni who was said to have died under the Sara-sôju trees. Originated in India.

Natsuyama. (Summer Mountain), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.240, 488, 528: Large, variable, semi-double with 2-3 rows of petal, colour variable from light pink to pink fading to white at the petal margin, with crimson streaks. Anthers yellow, filaments white. The centre is usually broken by the odd, erect petal. Originated in Japan. (Believed extinct.)

Natsuyama-nishiki. (Summer Mountain Brocade), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.485: Sport of **Natsuyama** with deep pink ground, white petal edge and occasional crimson streak. Originated in Japan. (Believed extinct.)

Natsuyuki. (Summer Snow), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.293: Small to medium, white, with a few red stripes, single with 7-9 petals, urn-shaped with some guard petals, opening flat. Originated in Japan. (Believed extinct.)

Natsuyuki. (Summer Snow), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.385, 631: Medium sized, white, semi-double with 3 rows of oval, emarginate petals, outer rows

recurved. Stamens with yellow anthers and white filaments. Originated in Japan. (Believed extinct.)

Natta (Marchese). Isola Madre Catalogue, 1845. Orthographic variant for **Marchese Natta.**

Naughty Marietta. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1962, p.8. No description. SCCS., 1962, *Camellia Nomenclature*, p.79: Red blotched with white. Large peony form to almost formal double. Spreading growth. Mid-season blooming. Originated in USA by Monticello Nursery, Monticello, Florida.

Navajo. *(C.sasanqua)*, Wylam, 1956, *American Camellia Yearbook*, p.72: Sun tolerant. Intense red. Blooms appear all red on first opening but develop into a large white semi-double with a red border. Plant habit is vigorous, bushy and upright. This variety was purchased by Nuccio's Nurseries, Altadena, California in a collection of camellias which originally came from Japan, but the name was lost and it was renamed **Navajo**. See colour photo, front cover, *New Zealand Camellia Bulletin*, 1973, vol.VIII, No.3.

Navalis. Nairn & Son Nursery Catalogue, 1901, p.57. Orthographic error for **Nivalis.**

Synonym for **Shiragiku** as ‘Purity’. Synonyms: ‘Golden Snow’, ‘Japanese white’. ‘Japanese Perfection’. ‘Perfection White’, ‘White Japanese Purity’.

Neige Doree. McIlhenny Catalogue. 1940. Orthographic variant for ‘Neige d’Oree’, synonym for **Shiragiku** as ‘Purity’.

Neige Dorii. Sander, St. Albans Catalogue, [before 1914]. Orthographic error for ‘Neige d’Oree’, synonym for **Shiragiku** as ‘Purity’.

Neil Armstrong. *(C.japonica x C.reticulata), American Camellia Yearbook,* 1972, p.133, Reg. No.1222: A 9 year old chance hybrid seedling, that first bloomed 1965; originated by Dr R.K.Womack, Shreveport, Louisiana, USA. Plant growth is spreading and slow with light green leaves. 7.5 cm x 3.8 cm. The semi-double 'Donckelaeri', (**Masayoshi**) style bloom is dull pink with yellow anthers. It has 12 petals and 80-90 petaloids - 10 cm across x 2.5 cm. deep and has a bluish cast. Flowers mid-season to late. A seedling of *C.japonica* **Debutante** x *C.reticulata.* Orthographic error: 'Neal Armstrong'.

Neil Bernard. *(C.japonica),* Hillcrest Nursery Catalogue, 1958. No description. Originated in USA.

Neil Bernhard. *(C.japonica),* Charles van Geert, Catalogue No.117, 1850, p.112; Very double globular form, bright crimson edged and blotched white. Originated by A & N Baumann, Bollweller, France.

Neili Nüshi. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **Mrs Nellie Eastman.**

Neipergi. (*C.japonica),* Charles van Geert, 1850, Catalogue, No.117, p.112: Very double globular form, bright crimson, edged and blotched white. Originated in Belgium by A & N Baumann. Orthographic variant for **Neippergii.**

Neippergii. *(C.japonica),* Joseph Baumann, 1849, Prix Courant, p.6. No description. Charles van Geert, 1850, Catalogue No.117, p.11, as 'Neipergi'. Very double globular form, bright crimson, edged and blotched white. Originated in Belgium by Baumann.

Neippergii Major. *(C.japonica),* Joseph Baumann, 1849, Prix Courant, p.6. No description. (Believed extinct.)

Neisha Gamlin. *(C.saluenesis), New Zealand Camellia Bulletin,* 1979, vol.XI, No.3, p.22, Reg. No.151: A chance seedling of *C.saluenensis* which is a putative hybrid, originated by A.P. Gamlin, New Zealand that first flowered 1974. The plant has an open spreading habit of growth. The leaves are dark green, 9 cm x 5 cm. The blooms are peony form with up to 64 petals and petaloids, intermingling with golden stamens. Colour is rose-pink with some ruby outer edges, 13 cm across x 9 cm deep. Mid-season flowering. Orthographic error: 'Nechia Gamlin'.

Nekai. *(C.hiemalis),* Thoby et al., 1988, *Tsubaki - A Propos de Camellia,* p.45. A camellia in the Jardin des Plantes de Nantes. No description. A corruption of an unknown Japanese name.

Nel Prevatt. *(C.japonica), American Camellia Yearbook,* 1971, p.49, Reg. No.1135: A 6 year old chance japonica seedling that first bloomed 1963; originated by E.J. Prevatt, Bonneau, South Carolina, USA. Plant growth is upright and open with dark green leaves, 10 cm long x 5 cm wide. The rose form double flower is strong red, 13 cm across x 8 cm. deep with 51-55 petals. Mid-season blooming. Sport: **Nel. Prevatt Variegated.**

Nel Prevatt Variegated. *(C.japonica),* SCCS., 1978, *Camellia Nomenclature,* p.119 as 'Nel Prevatt Var.': A virus variegated form of **Nel Prevatt** - Red blotched white. Originated in USA.

Nelivetana. Fendig, 1963, *American Camellia Catalogue.* Synonym for **Genevensis.**

Nell Ashby. *(C.japonica),* Tammia Nursery Catalogue, 1958: White striped and blotched pink. Medium semi-double to loose peony form. Compact, upright growth. Mid-season blooming. Originated in USA by E.J. Prevatt, Charleston, South Carolina, USA.

Nell Chester Embrey. *(C.japonica), American Camellia Yearbook,* 1993, p.70, colour photo p.74, Reg. No.2275: A medium size, white with pink stripes, formal double, *C.japonica* chance seedling that blooms early to mid-season. Originated by Grover C. Chester, Augusta, Georgia, USA. The 20 year old seedling first flowered 1973. Average flower size is 8 cm across x 3 cm deep

with 80 petals. Plant growth is spreading and average with dark green leaves 10 cm long x 6 cm wide.

Nell Hooper. *(C.japonica),* ACRS., 1973, *Camellia News*, No.51, p.37, Reg. No.157: Originated by G.W. Hooper, Bexley North, N.SW., Australia. A chance seedling from **Great Eastern** that first bloomed 1970. It has a spreading, vigorous, dense, growth habit. The rose-red flowers, 10 cm across, are formal double and are produced early to mid-season. The deep green leaves, 8 cm x 5.5 cm, are lanceolate, acuminate and bluntly serrate.

Nell Prevatt. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1945-1946: Red. Large, semi-double with velvety texture. Medium, open, upright growth. Blooms mid-season. Originated by E.J. Prevatt, Bonneau, South Carolina, USA. Sport: **Nell Prevatt Variegated.**

Nell Prevatt Variegated. *(C.japonica),* SCCS, 1978, *Camellia Nomenclature*, p.119 as 'Nell Prevatt Var.': Virus variegated form of **Nell Prevatt.** Red with white variegation. Originated in USA.

Nell Reid. *(C.x williamsii x C.reticulata* Wild Form*),* ACRS., 1983, *Camellia News*, No.87, p.22, Reg. No.302, colour photo back cover: Originated by J.B. Reid, Castle Hill, N.S.W., Australia. A chance seedling of *C.x williamsii* **Lady Gowrie,** that first bloomed 1977. Flower 13-14 cm across, white to off-white in the centre, merging to light pink, with deeper pink edges; semi-double with some rabbit ears. Blooms mid-season. The upright, open plant has 9 cm x 3.2 cm mid-green leaves, narrowly elliptic, finely serrate. Note; Examination of the plant, flower and fruit indicate that the pollen parent was the *C.reticulata* Wild Form growing close to the seed parent.

Nell Watson. *(C.reticulata* hybr.), *American Camellia Yearbook*, 1981, p.103, Reg. No.1763: A very large, light pink, semi-double reticulata hybrid *(C.reticulata* 'Crimson Robe' [**Dataohong**] x **Jean Pursel**). Blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 7 year old seedling first bloomed 1980. Average flower size 15.5 cm across x 7, 5 cm deep.

Nellie Ann Phinizy. *(C.japonica),* Fruitland Nursery Catalogue, 1945-1946, p.26: A virus variegated form of **Pink Star** - Pink and white. Originated in USA. Synonym: 'Pink Star Variegated'. See black and white photo, p.263, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II. Orthographic error: 'Nellis Ann Phinizy'.

Nellie Bly. *(C.japonica),* Fendig, 1951, *American Camellia Catalogue* with colour pl.: Large, bright, deep pink with darker veins, incomplete double anemone form, 12 cm across x 3.8 cm deep. Small petaloids have replaced the usual stamens of 'Lady Clare' so that the flower resembles **Elegans** in form. Leaves are shiny, deep green, oval, 10 cm x 5 cm with thick texture and coarse serrations. Plant habit is vigorous, compact and spreading. A sport of 'Lady Clare', (**Akashigata**) observed in 1945 by R.C. Holt, Thomasville, Georgia, USA. It is Reg. No.81 in *American Camellia Yearbook*, 1954, p.326. However due to its lack of stability it is often considered as a synonym for **Akashigata.**

Nellie Cohen. *(C.japonica),* Gerbing's Azalea Gardens Catalogue, 1938-1939: (One of our hybrids), A semi-double to loose, peony form flowers of a pleasing shade of pink, 9-10 cm across with some golden stamens amongst twisted petals. The plant is a bushy grower, foliage is round and medium green. Vigorous, open, willowy grower. See colour pl. p.163, Gerbings, 1945, *Camellias.* A seedling of **Marchioness of Exeter** originated by G.G. Gerbing, Fernandina, Florida, USA. Reg. No.105, *American Camellia Yearbook*, 1954, p.326.

Nellie Eastman. Sanlando Nursery Catalogue, 1958. Abbreviation for **Mrs Nellie Eastman.**

Nellie Gray. *(C.japonica)*, Fendig, 1953, *American Camellia Catalogue*, Red variegated, irregular double. Mid-season blooming. SCCS, 1954, *The Camellia. Its Culture and Nomenclature*, p.69: Dark, blood red with spots of white. Large, loose peony form, Upright growth. Mid-season blooming. A sport of **Mrs Charles Cobb** originated. by Bradford's Wayside Nursery, Ocean Springs, Mississippi, USA. See Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III, p.172, black and white photo. Synonym: 'Mrs Charles Cobb Variegated', 'Mrs Charles Cobb Spotted'. Orthographic variant: 'Nellie Grey'.

Nellie Grey. Mark S. Cannon Scion Catalogue, 1962, p.8. Orthographic variant for **Nellie Gray.**

Nellie Jones. *(C.japonica)*, ACS., 1989, *The Camellia Journal*, vol.44, No.3, p.9, Reg. No.2139: Medium size, white, formal double *C.japonica*, chance seedling. Blooms mid-season to late. Originated by Johnny Aldrich, Brooklet, Georgia, USA. *American Camellia Yearbook*, 1989, p.126: The 15 year old seedling first bloomed 1977. Average flower size, 8 cm across x 3.2 cm deep with 70 petals. Plant growth is upright and medium with dark green leaves, 7.5 cm. long x 3.2 cm wide.

Nellie K. *(C.japonica)*, *American Camellia Yearbook*, 1972, p.134, Reg. No.1190: A 15 year old chance japonica seedling that first bloomed 1961; originated by Twin Pines Nursery, Theodore, Alabama, USA. Plant growth is upright and rapid in rate with dark green leaves, 12.5 cm long x 5.5 cm wide. The semi-double to peony form bloom is deep pink with yellow anthers, white filaments, 20-30 petals, 30-40 petaloids, 11 cm across x 7 cm deep. Blooms mid-season to late.

Nellie McGrath. *(C.japonica)*, *American Camellia Yearbook*, 1956, p.64, Reg. No.250: An 8 year old chance seedling, originated by Mrs B.J.Welp Jr., Jacksonville, Florida, USA, that first flowered 1954. Plant growth is rapid, dense and upright with mid-green leaves, 11 cm long x 5 cm wide, acuminate and heavily veined. The neyron pink to rose-pink blooms are incomplete double with 30 petals and a few petaloids, 13-15 cm across x 6-7 cm deep. Early flowering. Sport: **Nellie McGrath Variegated.**

Nellie McGrath Supreme. Shackelford, 1969, ACS., *The Camellia Journal*, vol.24, No.l. Synonym for **Nellie McGrath Variegated.**

Nellie McGrath Variegated. *(C.japonica)*, Cannon, 1962, ACS., *The Camellia Journal*, vol.17, No.1, back cover as 'Nellie McGrath Var'. A virus variegated form of **Nellie McGrath** - Rose-pink blotched with white. Originated in USA. Synonym: 'Nellie McGrath Supreme'.

Nellis Ann Phinizy. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Nellie Ann Phinizy**.

Nelly White. SCCS., 1946, *Camellias*, p.13. Synonym for **Finlandia.**

Nelson Doubleday. *(C.japonica)*, SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.53: Red to rose-red, Large, loose, irregular semi-double. Mid-season blooming. Originated at Middleton Gardens, South Carolina, USA.

Nicky Crisp. *(C.pitardii x C.japonica), New Zealand Camellia Bulletin,* 1979, Vol.XI, No.3, p.20, Reg. No. 143: A hybrid raised by Mrs A.B. Durrant, Rotorua, New Zealand from a cross *C.pitardii* var. *pitardii x C.japonica*, which first flowered 1972. The plant is compact, slow growing with dark green leaves, 8.5 cm x 3.5 cm., keeled and finely serrate. The flowers are an open semi-double, 11 cm across x 3.5 cm deep with 16 petals with deeply notched margins, cream filaments, gold anthers, which remain after the flower has fallen. The flower is pale lavender pink (RHS.CC. Red-Purple Group, 62C-D with 62B on reverse). Flowers early to late. Chinese synonym: 'Kelisibo'.

Nicky Rhodes. *(C.hybrid), New Zealand Camellia Bulletin.* 1975, vol.IX, No.3, p.20, Reg. No.115: A seedling from a saluenensis - reticulata seed parent crossed with *C.japonica* **Mahogany Glow.** Originated by Mrs I. Berg, Whakatane, New Zealand. First flowered 1972. Dense, upright growth with mid-green leaves, 12 cm x 4.5 cm. Flower is semi-double with 14-16 petals and some petaloids, group red, 52B, 9 cm across x 5 cm deep with yellow anthers and cream filaments.

Nicky Shuman. *(C.japonica),* SCCS., 1990, *Camellia Nomenclature*, p.84: Large size, white, anemone form. Medium, spreading growth. Blooms mid-season. Originated in USA by J. Aldrich, Brooklet, Georgia.

Nicola Bianchi. *(C.japonica),* Italian CS, *Notiziario*, 2008, No.1, p.6 with colour photo; Formal double, imbricated, diameter 9.5-10.5 cm x 5.5 cm deep. Petals 75, elliptic, outer petals convex and reflexed inner petals incurved, margins finely serrate. Outer petals dark pink (RHS.CC. 50B and 19D), inner petals colour 59. White patches of variegation on the outer petals but not on the inner. No stamens or petaloids. Leaves 9.5-10 cm x 4.5-5 cm, ovate, apex acuminate, margins finely serrate, upper surface dark green, lower surface light green. Raised by Vincenzo Bianchi, Zoverallo (VB), Italy, first flowered in 2000. A seedling of 'Magnoliaeflora White' **(Miyakodori)** x **General Colletti.** Flowers early to mid-season. Pyramidical growth.

Nicola Costaras. *(C.japonica),* ICS *Journal*, 2002, p.87, Reg. No.35: An open pollinated seedling of **Adelina Patti.** Originated in the UK by Mrs J.A. Newman. First flowered 1996 at circa 15 years. A dense bushy shrub with slow growth rate. Blooms mid-season to late. A red semi-double to anemone form, 7 cm across x 3 cm deep.

Night Rider. *(C.hybrid),* Koromiko Nursery Catalogue, 1984. *New Zealand Camellia Bulletin*, 1985, vol.XIV, No.2, p.28, Reg. No.227: *C.hybrid* **Ruby Bells** x **Kuro-tsubaki;** originated by O. Blumhardt, New Zealand. First flowered 1980. Plant upright and average with small, dark green leaves, narrow-elliptic, 7 cm x 2.5 cm. The semi-double flowers are very dark red (RHS.CC.187A-B) with 22 petals with yellow anthers and reddish filaments, heavy, waxy texture, narrow petals. New growth is shiny, purple red. Blooms mid-season to late. For colour photo see front cover, *New Zealand Camellia Bulletin*, 1986, vol.XIV, No.6. Chinese synonym: 'Heiqishi'.

Night Watchman. *(C.japonica), New Zealand Camellia Bulletin*, 1982, vol.XII, No.7, p.52, Reg. No.186: A seedling of unknown parentage, originated by Mr & Mrs W.H. Peters, Tauranga, New Zealand that first flowered 1978 at 10 years of age. Growth rate is medium with a spreading habit and dark green leaves, 10.5 cm x 5 cm. The rose form double blooms, 8.5 cm across x 3.7 cm deep with 40 petals, are cardinal red (RHS.CC.Red-Purple Group, 53B). Inner petals have a lighter shading; stamens yellow.

Nightfall. *(C.japonica)*, ACS, *The Camellia Journal*, Dec. 2013, p.29 with colour photo; Regn No.2898, Originated and registered by C.M. & Lillian Gordy, Ocala, Fla., USA. ACS, *Yearbook*, 2013, p.130 with colour photo; Propagated by Loch Laurel Nursery, Valdosta, Ga.; A 10 year old seedling of **Royal Velvet**, first flowered 2007. Medim size, 9.5cm diameter x 2.5cm deep, single flower has 7 petals, dark red with very dark veins. Central column of stamens with bright gold anthers and pink filaments. Heavy petal texture and flowers fall whole. Plant is upright with fast, vigorous growth. Dark green leaves average 9.5cm x 3.8cm with medium serration. Flowers early.

Nightingale. *(C.japonica)*, Armstrong Nurseries Catalogue, [before 1945] as 'Night-in-gale': Bright pink marked white. Large, informal semi-double with loose petals. Originated by Armstrong Nurseries, Ontario, California, USA.

Nightless Quarter. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.88. Synonym for 'Fuyajo' (**Kon-wabisuke**).

Nigitazu. (Place Name), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.227, colour photo and description: Small size, deep crimson, campanulate single of 5 petals, pointed due to lateral margins being rolled in, and a central stamen column with red filaments, joined for the lower half, and yellow anthers. Leaves mid-green, elliptic, apices acute, margins shallowly serrate, Mid-season to late flowering. Selected from wild japonicas growing in Takahama, Matsuyama City, Ehime Prefecture, Japan. Named and released by Tokihiro Kôno around 1980. The dark red colour of this flower is similar to **Kuro-wabisuke** or **Konronkoku.**

Nigiwai. (Jovial Crowd), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.375, p.191, description, p.201: Leaves, oval, rounded at base, shortly acuminate apex, minutely serrulate, petioles more or less hairy. Flowers double, white, striped rosy pink (Spinel Pink 0625-0625/1) with petals 40-54, largest 4.5 cm long x 4.1 cm wide, rounded at apex; inner petals suddenly diminished in size, 21-27 in number. Flowers mid-season. Originated in Fuku'oka Prefecture, Japan.

Nigra. Rollisson. Nursery Catalogue, 1871, p.133. Synonym for **Konronkoku.**

Nihonbare. (Radiant Weather), *(C.japonica)*, Satô, 1975, *Chûbu no Tsubaki*, p.76, colour photo and description; Seibundô Shinkôsha, 1979, *Senchinshû*, p.236: Large, 10 cm across, semi-double, white with rare pink markings. Petals about 18, large, overlapping, crimped and emarginate, opening wide, cup-shaped. Stamens, short, compact, cylindrical group, anthers dull yellow, filaments milk white. Mid-season blooming. Leaves, dusky green, large, broad-ovate, flat, serrations somewhat coarse. Growth vigorous and spreading. Late blooming. A sport of **Tamatebako**. Originated in Chûbu District, Japan. Named and released by Minoru Satô in 1967.

Nihong. (Neon Rainbow), *(C.reticulata)*, Gao & Zhuang, 1989, *The Camellia in China*, p.59, No.396, colour photo No.253: Leaves mid-green, broad-ovate, apices tapering acute, margins serrulate, 9.3-10.8 cm long x 5-5.7 cm wide. Flowers large size, 12-13 cm across x 8.2 cm deep red, peony form with 23-28 large, folded, waved and emarginate petals. Flowers mid-season. Originated in Tengchong, Yunnan Province, China.

Nihong. (Red Mud), *(C.japonica)*, Gao & Zhuang, 1989, *The Camellia in China*, p.51, No.322: Large size, 8-10 cm across, red with white spots, double with 4-6 rows of petals. Blooms mid-season. Originated in China.

Nihongami. (Japanese Hairstyle), *(C.rusticana)*, Andoh, 1971, *Tsubaki*, *Meika no Shôkai to Saibai*, pl.175, p.57, description, p.212: Small to medium, 8 cm across, rose form double, dusky red with white blotches; petals in 4-5 rows, rounded, slightly emarginate, opening to show a few

centre stamens mixed with small, erect petals. Leaves, yellowish green, elliptic, long-acuminate, medium serrate with pronounced venation. Tree is spreading, lacking in vigor. Originated in Ojiya-shi, Niigata Prefecture, Japan. Collected, named and released by Yaichi Kawamura in 1970. Seibundô Shinkôsha, 1979, *Senchinshû*, pp. 109, 236, and Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.333 for colour photos and description. Chinese synonym 'Ribenfa'.

Nihong Cha. (Red Mud Camellia), *(C.japonica)*, Liu, 1959, *Chungkuo Chuming Mingti Chichung Huahui:* Flowers are red, peony form, incomplete double. Originated in China. Sport: **Huanihong Cha.**

Nihonhomare. (National Honor), *(C.japonica)*, Nagao, Sôsei-en Catalogue,1959: A red flower with white at the base of the petals. Originated in Niigata Prefecture, Japan. Based on the same characters as **Nihon-no-homare.**

Nihonichi. Different reading for **Nippon-ichi-tsubaki.**

Nihon-ichi-tsubaki. Different reading for **Nippon-ichi-tsubaki.**

Nihonkai. (Sea of Japan), *(C.rusticana)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.109, colour photo, p.236, description: Medium sized, red, semi-double to loose, informal double with 2-3 rows of large, outer petals and a centre fascicle of golden stamens, divided by small, centre petals. Leaves, lanceolate, mid-green, long-acuminate, sharply serrate. Originated in Minami-kanbara-gun, Niigata Prefecture, Japan. Collected, named and released by Yaichi Kawamura in 1960.

Nihon-nishiki. Different reading for **Yamato-nishiki.**

Nihon-no-homare. (Praise of Japan), *(C.japonica)*, Tuyama, 1966, *Camellia Cultivars of Japan*, pl.187, p.326: Leaves broadly-elliptic, suddenly acuminate, crenate. Flowers, single, medium size, open, vase-shaped, pink (Carmine Rose 621/1-/2) with deeper pink veining, widely margined with white or palest pink, often striped shortly with red. Early to mid-season flowering. Originated in the Ikeda City, Ôsaka Prefecture, Japan as a sport of **Shibori-rôgetsu.** Discovered in the 1950s. See colour pls. Tuyama, 1968, *Camellias of Japan*, pl.328, p.166; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.145, p.83; Satô, 1975, *Chûbu no Tsubaki*, p,23 as 'Nihonnohomare'; Seibundô Shinkôsha, 1979, *Senchinshû*, p.109, and description p.236. Resembles **Sanpei-tsubaki.** Same characters as 'Nihonhomare'. Sport: **Kakure-iso.** Chinese synonym 'Riben Zhi Yu'.

Niigata. (Place Name), *(C.rusticana)*, Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.178, illustration and description: Medium red, single, 5-6 petals opening wide, cup-shaped edges usually somewhat emarginate. Yellow stamens widely spread. Leaves, light green, broad-ovate to broad-elliptic; blunt acuminate, depressed venation, serrulate. Typical wild rusticana form. Originated in Minami-kanbara-gun, Niigata Prefecture, Japan by Kawamura, Yaichi. See colour photo and description, Seibundô Shinkôsha, 1979, *Senchinshû*, pp.107, 235.

Niigata Number 1. *(C.rusticana)*, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.19 colour photo, as 'Niigata No.1': Pale pink, semi-double, 3 rows of slightly crumpled petals and an irregular stamen cluster. Originated in Niigata Prefecture, Japan.

Niigata Number 2. *(C.rusticana)*, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.20 colour photo as 'Niigata No.2': Semi-double, plum red with white markings, 15-17 petals, oval, emarginate, 3 rows. Originated in Niigata Prefecture, Japan.

Niigata Number 3. *(C.rusticana)*, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.23, colour photo, as 'Niigata No.3': Soft pink, rose form double, 5-6 imbricated, outer rows

of emarginate, cupped petals and an irregular centre of small, erect, irregular petals and yellow stamens. Leaves, yellowish green, broad-elliptic, blunt acute, wide, shallow serrations. Originated in Niigata Prefecture, Japan.

Niigata Number 4. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.23, colour photo as 'Niigata No.4': Rose form double. with 5 rows of white, rounded petals, outer edges recurved. Leaves, bright, shiny green, broad-oval, blunt acute, obscurely crenate. Originated in Niigata Prefecture, Japan.

Niigata Number 5. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.24, colour photo as 'Niigata No.5': Anemome form. Deep, purplish red with deeper coloured, fine veining. Outer row of guard petals, cordate, outspread; with irregular centre cushion of small, erect petals, twisted and folded. Leaves, bright green, obovate, blunt acuminate, base cuneate, coarsely, sharply serrate, Originated in Niigata Prefecture, Japan.

Niigata Number 6. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.25, colour photo as 'Niigata No 6': White, semi-double, opening more or less flat; stamens pale yellow, filaments white. Leaves, bright green, broad elliptic, long acuminate, sharply serrate. Originated in Niigata Prefecture, Japan.

Niigata Number 7. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.26, colour photo as 'Niigata No.7': Palest blush pink, rose form double to formal double with round petals. Leaves light green, broad-obovate, acuminate, obscurely serrate. Originated in Niigata Prefecture, Japan.

Niigata Number 8. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.28, colour photo as 'Niigata No.8': Semi-double, white with pink blush to petal base, variable, sporting white with pale pink base and solid red colour on the one bush. Small, twisted green leaves. Originated in Niigata Prefecture, Japan.

Niigata Number 9. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.29, colour photo as 'Niigata. No.9': A maroon red, anemone form with large, irregular guard petals and a centre of folded petaloids. Originated in Niigata Prefecture, Japan.

Niigata Number 10. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.30, colour photo as 'Niigata No.10': Plum red, anemone form with 9 large guard petals some notched, about a centre of petaloids. Leaves, light green, broad-elliptic, bluntly acute, shallowly serrate. Originated in Niigata Prefecture, Japan.

Niigata Number 11. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.30, colour photo as 'Niigata No.11': Medium sized double of large petals, silvery red, strongly veined crimson. Originated in Niigata Prefecture, Japan.

Niigata Number 12. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.32, colour photo as 'Niigata No.12': Light red, veined deeper, semi-double; outer petals, oval, cordate, inner pointed, Small yellow stamen cluster. Leaves elliptic, yellowish green, acuminate, serrate. Originated in Niigata Prefecture, Japan.

Niigata Number 13. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.32, colour photo as 'Niigata No.13': Soft pink, formal double with broad oval, yellowish green leaves. Originated in Niigata Prefecture, Japan.

Niigata Number 14. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.47, colour photo as 'Niigata No.14': Pink, double, smaller centre petals, sparse stamens. Originated in Niigata Prefecture, Japan.

Niigata Number 15. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.47 as colour photo 'Niigata No.15': Crimson veined with deeper colours, semi-double, stamens golden in small, compact clusters. Leaves elliptic, strong green, acuminate, serrate. Originated in Niigata Prefecture, Japan.

Niigata Number 16. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.36 as colour photo 'Niigata No. 16': Off-white, rose form double with a few lemon coloured stamens when fully open. Leaves light green, elliptic, serrate. Originated in Niigata Prefecture, Japan.

Niigata Number 17. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.37 as colour photo 'Niigata No.17': Soft peach pink, semi-double with 4-5 rows of small, imbricated petals with an irregular stamen cluster. Originated in Niigata Prefecture, Japan.

Niigata Number 18. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.37 as colour photo 'Niigata No. 18': A dark, black red single with small, golden anthers and red filaments. Originated in Niigata Prefecture, Japan.

Niigata Number 19. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.39 as colour photo 'Niigata No.19': Soft pale pink, rose form double, with broad, oval, mid-green leaves, blunt acute apex and bluntly, shallowly serrate margins. Originated in Niigata Prefecture, Japan.

Niigata Number 20. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.40 as colour photo 'Niigata No.20': Semi-double of the faintest blush white. Three rows of irregular, fluted, emarginate petals. Leaves, elliptic, strong green, acute, obscurely serrate. Originated in Niigata Prefecture, Japan.

Niigata Number 21. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.43 as colour photo 'Niigata No.21': Medium sized, open peony form double, pink with fascicles of stamens mixed with petaloids and small, folded petals. Leaves, elliptic, light green, obscurely crenate, apex acuminate. Originated in Niigata Prefecture, Japan.

Niigata Number 22. *(C.rusticana),* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.43 as colour photo 'Niigata No.22': Medium sized, deep crimson, irregular peony form with small yellow stamens mixed with small, folded and fluted centre petals. Leaves, light green, broad-lanceolate, apex blunt acute, serrate margins. Originated in Niigata Prefecture, Japan.

Niizuma. (New Wife), *(C.rusticana),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.235: Peach red, peony form, petals about 30; in the centre the petals are mixed, stamens are separate, filaments yellow. Medium size. Flowers mid-season. Leaves, medium sized, wide oval, margins coarsely serrate. Plant habit, somewhat erect, variable. Intermediate between *C.rusticana & C.japonica.* Originated in Japan at Nao'etsu City, Niigata Prefecture. Named and released by Yaichi Kawamura in 1968. Different reading: 'Nîzuma'.

Nijinski. *(C.reticulata* hybr.), Tregrehan Camellia Nursery Catalogue, 1973: Pale pink. (RHS.CC.Red Group, 55A) Medium sized semi-double, up to 12 cm across. Open, upright growth. A seedling of **Salutation** originated in England by Gillian Carlyon, Par, Cornwall. Received RHS, Award of Merit in 1986. See colour photo, rear cover, RHS., *Rhododendrons, 1987-1988 with Magnolias and Camellias.*

Nijinsky. Mount Congreve Gardens, 1995, *Computerised List of Camellias Grown in the Gardens,* p.5. Orthographic error for **Nijinski.**

Nijûbeni. Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Pink. Medium semi-double. Originated in Japan. Different reading for **Futaebeni.**

Nijû-benten. (Double Benten), *(C.sasanqua)*, Satomi, 1960, *Sazanka no Daihyô Hinshu Kaisetu*, *Engeitechô*, No.10: Pink, single, medium size, variegated leaves. See: JCS., ed., 1972, *Encyclopedia of Camellias in Colour*, vol.I, p.384, pl.520 and Hakoda, JCS., 1987, *Tsubaki*, No.26, p.45. Originated in Japan.

Nijû-benten. (Double Benten), *(C.japonica)*, *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.447, p.359; Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.42; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.108, 235: Small size, red, single, with leaves distorted, green with irregular white variegation on margin. Different readings: **Futae-benten**, 'Hutae-benten'. Originated in Japan.

Nijûisseiki Kanazawa-tsubaki. (21st Century's Camellia from Kanazawa) (*C.hybrid*). From Ishikawa Pref. *Tsubaki* No.40, Japan Camellia Society, 2001. Seed parent *C.japonica* **Kaga-wabisuke**, pollen parent *C.nitidissima*. Pale yellow, single, small to medium, blooms in mid-season. Tree vigorous, cold-hardy, can be cultivated outdoors in Kanazawa City with a simple snow protection. Originated by Seizô Matsui and released in 2001.

Nijû-kaku. (Double Crane), *(C.japonica)*, Katayama, 1963, *Jurakuen.* No description. Tuyama, 1968, *Camellias of Japan*, pl.341, p.172, description, p.191: Leaves oblong to oblong-elliptic, suddenly acuminate at the apex, depressed-crenate at the margin; petioles glabrous. Often flowering hose-in-hose form, pale pink, shaded and striped in various degrees of rosy pink (Rose opal 022-022/2), margined in part, paler pink. Flowers mid-season to late. Originated in Japan by Katayama, Ôsaka Prefecture. Different readings: 'Futae-kaku', 'Hutae-kaku', **Futae-zuru.** Thought to be a synonym for Genji-shibori.

Nijû-kuchibeni. Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: White edged pink. - Small, semi-double. Different reading for **Futaekuchibeni.**

Nijû-sokobeni. Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Creamy white with pink bottom. Small, semi-double. Different reading for **Futaesokobeni.**

Nijû-tairin. Different reading for **Futaetairin.**

Nijû-zuru. Different reading for **Nijû-kaku.**

Niobé. *(C.japonica)*, Berlèse, 1840, *Monographie*, ed.2, p.97: Large bright rose, rose form double, about 10cm across. Originated in Italy by Santarelli. Orthographic variants: 'La Niobe', 'Le Niobe'. Orthographic errors: 'Le Noile', 'La Niobée', 'La Niobés', 'Neobi'. Synonym: 'Le Niobé'.

Nioibeni. (Perfumed Red), (Higo), Oota, 1978, *Higo Tsubaki:* Brilliant red, fragrant, 11 cm across, single. Originated in Kumamoto Prefecture, Japan.

Nioi-Fibuki. Mount Congreve Wholesale Nursery Catalogue, 1991-1992, p.12. Corruption of the Japanese name **Nioi-fubuki.**

Nioi-fubuki. (Fragrant Snow Storm), (Higo), Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.166, p.57, description, p.212; JCS., ed., 1972, *Encyclopedia of Camellias in Colour*, vol.I, p.343, pl.348: Large, single Higo, light pink fading to white with a few crimson streaks, various colours appear on flowers; large, spreading, stamen cluster; sometimes a petaloid centre. Vigorous, upright growth. Midseason blooming. Fragrant. See colour photos: p.108, Seibundô Shinkôsha, 1979, *Senchinshû* and p.285, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Kumamoto Prefecture, Japan. Originated by Tsugio Ôta, named by Chôka Adachi in 1968. Sport: **Tama-ikari.** Chinese synonym 'Gouchuixue'.

Nioi-fubuki-beni. (Higo) Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.412; A red sport of **Nioi-fubuki.** Chinese synonym 'Hong Gouchuixue'.

Nioi-fukurin. (Perfumed Border), (Higo),, Stone, Vi, 1983, SCCS., *The Camellia Review*, vol.45, No.2, p.19: Deep pink, medium size, edged white, with an occasional red stripe and a spreading burst of yellow stamens. Fragrant. Leaves broad-elliptic, mid-green, apices acuminate to blunt acute, margins serrate. A sport of **Nioi-fubuki.** Has an occasional broad, pink stripe. Colour photo, p.270, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Kumamoto Prefecture, Japan.

Nioi-no-miya. (Prince of Fragrance). *(C.japonica), Nagoya Camellia Society Bulletin*, 1992, No.25, p.9, colour photo No.30: Originated by Kôji Funakoshi, Nagoya, Japan. A chance seedling of **Yuri-shibori.** Medium sized, 8-9 cm across, single, cup-shaped flower of 7 petals; white with one clear red stripe on each petal. Clean fragrance. Blooms mid-season. Named for Nioi-no-miya, Prince of fragrance in 42nd chapter of *Genji Monogatari.*

Nioi-otome. (Fragrant Maiden), *(C,rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.75, p.38, description, p.107: Leaves elliptic, shining dark green, venation impressed, 6-7.7 cm long x 2.6-4.1 cm wide; petioles 4-6 mm long, a little hairy. Flowers palest pink (paler than Rose-pink 427/3), petals 50-62, largest 4.1 cm long x 2.6 cm wide, bilobate at apex; inner ones smaller and irregularly wrinkled. Centre of flower, 7-9 petaloids and up to 15 stamens. Originated in Japan by Mr Keiji Matsui, Toyama Prefecture.

Nioumiya. (Prince of Fragrance), *(C.japonica)*, Himuro, 1982, *Murasuzume:* Rose-pink, semi-double, medium size, fragrant. Originated in Kumamoto Prefecture, Japan. Note: Niou-no-miya was Hikaru Genji's grandson.

Niova di Genova. Joseph Baumann, 1856, Prix Courant, p.6. Orthographic error for 'Nuova di Genoa', synonym for **Duchesse d'Orleans.**

Niphon. *(C.japonica)*, G.W.H., Garden Flora, 1889, *The Garden*, 36(930):247: White, splashed rose-pink, semi-double. Imported from Japan by Gerald Waller. Van Houtte Pere, 1898, Catalogue, 275:303: White, widely streaked with pink and carmine and completely spotted with flesh pink. Williams, B.S. Nursery Catalogue, 1891, p.43: A very distinct semi-double form, flowers about 12 cm across with oblong, irregular petals, white, broadly striped and

splashed with rosy purple and golden anthers. An unknown Japanese variety renamed in England. Different reading ‘Nippon’.

Nippon. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.171. Different reading for **Niphon.**

Nippon-ichi-tsubaki. (First in Japan), *(C.japonica)*, Aoyama, Kinta, 1827, *Sômoku Kihin Kagami:* Big and long leaves with variegation. Different reading: ‘Nihonichi’, ‘Nihon-ichi-tsubaki’. Originated in Japan. (Believed extinct.)

Nippon-nishiki. (Japanese Brocade), *(C.japonica)*, Settsu Raikoyen Co. Catalogue, 1938-1939, p.13: White with purplish crimson variegation, semi-double. Different reading: ‘Nihon-nishiki’. Originated in Japan.

Nippon-nishiki. Different reading for **Yamato-nishiki.**

Nirai-kanai. (Legendary Place Name), *(C.japonica)*, Yokoyama & Kirino, 1989, 1989. *Nihon no Chinka*, p.178, colour photo and description: Small size, deep crimson, star-shaped single with 5 long, ovate or pointed petals and a pinched in stamen column, joined for the lower third, and yellow anthers. Leaves linear to narrow-elliptic to narrow lanceolate with long, tapering acuminate apices and obscurely serrate margins. Blooms mid-season. Originated in Kagoshima Prefecture, Japan. The original tree is at the garden of the Agriculture Facility, Kagoshima University. Named and released by Kagoshima Camellia Society in 1985. ‘Nirai-kanai’ is the legendary utopian land under the sea. A legend told in the Okinawa and Amami Islands.

Nishenko. *(C.sasanqua)*, Anonymous, nd, *List of Camellias Grown at Kew*, No description. Corruption of unknown Japanese name.

Nishijin. (Place Name), Tuyama, 1966, *Camellia Cultivars of Japan*, p.56. This name ‘Nishijin’ is used in the Kyûshû area for **Kyôbotan.**

Nishiki. (Brocade), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.496: Peony form to semi-double, white base, red stripes. Originated in Japan. (Believed extinct.)

Nishiki. (Brocade), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.77: Small, 5 petalled single white with blush towards the petal base and dark crimson stripes. Originated in Japan. (Believed extinct.)

Nishikiba-fukurin-ikkyû. (Variegated Bordered ‘Ikkyû’). *(C.japonica)*, *"Camellias in Kurume"*, ICS Congress, Kurume 2010, p.83 with colour photo; A sport of **Fukurin-ikkyû,** with variegated leaves, selected and named by T. Kunitake, Kurume, Japan, in 2000. Soft pink ground, with crimson streaks, and bordered white. Small lotus form double. Tubular stamen cluster. Upright growth. Leaves small, oblong, with irregular yellowish-green margins. Late flowering.

Nishikiba-kuro-tsubaki. (Brocade Leaf, Black Camellia), *(C.japonica)*,Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.320, colour photo and description: Small to medium size, deep, dusky crimson, semi-double with 2-3 rows of emarginate petals, opening wide cupshape, and a central cluster of stamens with red filaments and golden anthers. Leaves elliptic, midgreen with wide, irregular golden margins. Flowers midseason to late. Originated in Kurume, Fuku’oka Prefecture, Japan. A sport of **Kuro-tsubaki.**

Nishikiba-mangetsu. *Kurume Camellia*, 1997, English translation, p.26. Synonym for **Mangetsu (Niigata)**’.

Nishikiba-seiôbo. (Brocade-leaved Seiôbo). (Wabisuke). JCS, 1997, *Japan Camellia*, No.54, p.10, colour illustration No.6: A genetically variegated leaf form of **Seiôbo.** Leaves matte green with

margins irregularly variegated white. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.187 with colour photo showing yellowish leaf variegation; English translation p.130 as 'Kinyô-seiôbo'. Discovered and named by Shunsuke Hisatomi in 1987. From Kurume, Japan.

Nishikiba-tama-ikari. (Variegated leaf Tama-ikari). *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.113. No description. From Kurume City, Japan.

Nishikiba-tsubaki. (Brocade Leaf Camellia), *(C.japonica),* Nagao, Sôsei-en Catalogue, 1956: Snowy white, large, with variegated leaves. Originated in Japan. Different reading: 'Kinyôtsubaki'.

Nishiki-benten. (Benten Brocade), *(C.sasanqua),* Hakoda, JCS., 1987, *Tsubaki,* No.26, p.45. ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.35: Small size, red, single with variegated leaves. Variegation is unstable and may disappear. Blooms early to mid-season. Originated in Niigata Prefecture, Japan.

Nishiki-bokuhan. Inazawa Nurseries Co. Ltd. Catalogue, 1980-1981. Orthographic variant for **Bokuhan-nishiki.**

Nishiki-bukuro. Different reading for **Kintai.**

Nishiki-gasane. (Double Brocade), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Red with white moires, large size, double; Itô, Ko'emon, 1879, *Chinkashû:* Large, semi-double, deep, reddish pink, spotted and moired white with central stamen column. See: Tuyama, 1966, *Camellia Cultivars of Japan,* pl.9; *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.263, pp.122, 330; Satô, 1975, *Chûbu no Tsubaki,* p.77; Seibundô Shinkôsha, 1979, *Senchinshû,* pp.108, 235. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.327. Originated in Kantô area, Japan. A sport of 'Ezo-nishiki' (**Tricolor**) and probably synonymous with **Lady MacKinnon.** Other sports in this group are **Miyako-no-nishiki, Shiro-ezo-nishiki,** 'Aka-ezo-nishiki', **Dainty, Cinderella** etc.

Nishiki-hatsugama. (Variegated 'Hatsugama'), *(C.hybrid),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.29 as 'Nisiki-hatsugama': Very small size, white ground with pink variation, campanulate single. Originated in the Ôsaka Prefecture, Japan as a seedling of *C.rusticana* **Kaonajimi** x *C.irrawadiensis*. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.187 with colour photo; English translation p.130. Parentage stated to be *C.rusticana* **Matsunami** x *C.irrawadiensis.* Named and released by Kazuo Yoshikawa in 1980s.

Nishikigi. (Brocade Tree), *(C.japonica),* Okumura, [ca.1810], *Chinka Hin'i; Chinka Zufu,* (before 1700), Watanabe, 1969, pl.567: Medium size, single, opening flat with petals of uneven size, white with pink towards the petal base, speckled, dashed and lined crimson. The centre consists of a double ring of stamens. Originated in Japan. (Believed extinct.)

Nishikigi. (Brocade Tree), *(C.saanqua),* Itô, Jukyû, 1738, *Honzô Hanamaki'e,* vol.16: Semi-double, white ground with pale pink streaks. Originated in Japan. (Believed extinct.)

Nishiki-kasane. Satomi, 1956, *Camellia Varieties in Japan,* p.10. Different reading for **Nishiki-gasane.**

Nishiki-kingyo. (Brocade Goldfish Leaf), Craig, 1972, *American Camellia Yearbook,* p.55: This is the 'fishtail leaf' camellia with heavy marbling of yellow on the leaves and the typical, single, red flower. Originated in Japan.

Nishiki Kiren. J.H. Newington Ltd., Dingley Dell Nursery Catalogue, 1980-1981, p.7. Corruption of the Japanese name **Nishiki-kirin.**

Nishiki-kirin. (Kirin Brocade), *(C.rusticana),* Selbundô Shinkôsha, 1966, *Garden Life,* No.17, p.37: Medium size, 8 cm across, peony to anemone form with a double row of large, outer petals

and an irregular centre of petaloids and small, erect, folded petals; blush pink with dense, deeper pink streaking and splashes. Leaves small, ovate with distinct venation. Originated in Higashikanbara-gun, Niigata Prefecture, Japan in 1958, the original tree was lost in a flood and the cultivar is now very rare. Collected, named and released by Yaichi Kawamura in 1966. See: Seibundô Shinkôsha, 1979, *Senchinshû*, pp.108, 235. Corruption of name: 'Nishiki Kiren'. Note: A Kirin is actually not a giraffe but an imaginary creature.

Nishiki-mino. (Straw Raincoat Brocade), Nippon Engei Kaisha Ltd., Catalogue, 1904, p.9: Medium sized, peony form of pale pink with deep pink markings. In 1935-1936, Chûgai Nursery Catalogue p.25, listed 'Nishiki-mino' as 'White with crimson variegations, full double at centre'. McIlhenny imported this to America and catalogued it with the same description in 1937. According to Satomi, 1956 **Gondo-shibori** and **Ezo-nishiki** are synonyms but this is rejected as they are both separate and distinct cultivars. Kanaoka Camellia Gardens Catalogue, 1963, listed the variety without description and Tuyama, 1968, *Camellias of Japan* pl.388, p.197 described and illustrated it. This cultivar produces many different colour types, and Tuyama's colour pl.388 is different from the colour photo in *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.163 as **Shibori-karako**, but they are the same variety. It was originally listed in Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* as **Shibori-karako** and it is known by this name in Kansai area and as 'Shibori-bokuhan' in the Chûbu area. For further comments see Tuyama, 1966, *Camellia Cultivars of Japan*, p.370.

Nishiki-no-aki. (Autumn Brocade). *(C.japonica)*, JCS, 1996, *Japan Camellia*, No.51, p.10 with colour plate: Palest pink colour base, speckled and dashed red. Single with 5-6 petals, trumpet shaped, small to medium size with tubular stamen cluster with yellow anthers. Blooms early. Originated in Fukuoka Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.187 with colour photo; English translation p.130. Leaves narrowly elliptic, medium size. Somewhat upright growth. A cross between **Aka-hatsu-arashi** and **Momosuzume.** Originated and released by Tomita Kunitake in 1994. From Kurume.

Nishiki-no-danjaku. (Decisive Measure Brocade), *(C.japonica)*, Sakuden, 1630, *Hyakuchin-shû:* Red. Medium sized semi-double to peony form, colour variable red and white with short stamens and pink and white petaloids. Originated in Japan. (Believed extinct.) Different readings: 'Nishiki-no-danjyaku', 'Nishiki-no-dansashi', 'Nishiki-no-tachizashi', 'Nishiki-no-kirehashi'. See Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.106.

Nishiki-no-danjyaku. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki, Tokushû*, No.1, p.60. Different reading for **Nishiki-no-danjaku.**

Nishiki-no-kirehashi. Andoh, 1984, *International Camellia Journal*, No.16, p.49. Different reading for **Nishiki-no-danjaku.**

Nishiki-no-dansashi. Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.106, Different reading for **Nishiki-no-danjaku.**

Nishiki-no-mai. (Dance Brocade), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.284, description, p.285, colour photo: Medium size, white with broad, deep deep scarlet stripes and pink patches, single, widely opening, of 5-6 large, rounded, overlapping petals and a central yellow stamen cylinder. Leaves deep green, broad-elliptic with acuminate apices and serrate margins, Blooms early to mid-season. Originated in the Gifu Prefecture, Japan.

Nishiki-no-tachizashi. Different reading for **Nishiki-no-danjaku.**

Nishiki-no-mine. (Brocade of the Peak), *(C.rusticana)*, JCS., ed., *Encyclopedia of Camellias in Colour*, vol.1, 1972, pl.453, p.185, description, p.360: Small, red, single, cup shaped. Leaves mid-green with golden speckling, broad-elliptic, blunt-acute, serrate. Originated in Niigata

Prefecture, Japan. Named by Tsugitarô Nagao. See colour photos: Seibundô Shinkôsha, 1979, *Senchinshû*, p.108. Yokoyama & Kirino, 1989, *Nihon no Chinka* p.209.

Nishiki-no-tsukasa. (Brocade of the Lord), *(C.japonica)*, Chûgai Nursery Catalogue, 1934-1935, p.32; Kyôto Engei Kurabu, 1960, *Tsubaki Tokushû*, No.1, p.60 & ibid, 1970, No.10, p.149: Light crimson, variegated a deep crimson. Large semi-double. Originated in Japan. Corruption of name: 'Nishiki-no-tsukasia'.

Nishiki-no-tsukasia. Fendig, 1953, *American Camellia Catalogue.* Corruption of Japanese name **Nishiki-no-tsukasa.**

Nishiki-shibori. (Dappled Brocade), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, No.73; Itô, Jukyû, 1739, *Honzô Hanamaki'e;* Yashiro, 1841, *Kokon Yôrankô*, vol.306; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Large double flower, light coloured with red splashes. Originated in Japan. (Believed extinct.) Synonym: 'Fuji-monogurui'. See: JCS., 1969, *Tsubaki*, No.7, p.23 & ibid, 1983, No.22, p.121.

Nishiki-shikô. (Superb, Fragrant Brocade), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* Pink ground striped white. Tuyama, 1968, *Camellias of Japan*, pl.284, p.143, description, p.176: Leaves narrowly oval elliptic, apex acuminate, flat, minutely crenate-serrulate at the margin, petioles more or less hairy. Flowers horizontally opened, petals about 7 in number, pale red, (Delft rose 020/1), nerved deeper red, and at the apex blotched or marbled white, stamens scattered, pollen fertile, filaments white, 100-130. Flowers late. Originated in Kumamoto Prefecture, Japan. See: Seibundô Shinkôsha, 1979, *Senchinshû*, pp.108, 235. Different reading: 'Kinshikô'.

Nishiki-shokkô (Shokkô Brocade), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô* No.181; Yashiro, 1841, *Kokon Yôrankô* vol.306, p.340, (Ichijima reprint 1906): Five-fold, round and beautiful flower, variegated in various designs. Originated in Japan. (Believed extinct.) Different readings: 'Kinshokkô', 'Shokkô-nishiki'.

Nishiki-tsubaki. (Brocade Camellia), *(C.japonica)*, Hino, Sukekatsu, 1637, *Sukekatsukyôki.* No description. Originated in Japan. See: Andoh, JCS., 1986, *Tsubaki*, No.25, p.14. (Believed extinct.)

Nishiki-wabisuke. Savige, 1974, *International Camellia Journal*, No.6, p.28. Synonym for **Wabisuke.**

Nishiki-yama. (Brocade Mountain), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pale white, single with red spots. Medium size. Originated in Japan. See: JCS., 1969, *Tsubaki*, No.7, p.23. (Believed extinct.)

Nishimura. (Personal name), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.187: Large, semi-double, dark red with lobed petals. Originated in Japan. (Believed extinct.)

Nishi-no-kyô (Western Kyôto), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.190, 228: Small, red, in some cases with white stripes, peony form with paler edges to petals, centre of small, hooded petaloids and stamens. Originated in Japan. (Believed extinct.) Different reading: 'Saikyô'.

Nishi-no-kyô (Western Kyôto), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.96: Lavender pink with a darker centre, semi-double, opening flat with an erect centre of stamens and petaloids. Originated in Japan. (Believed extinct.)

Nishoku. Different reading for **Futa-iro.**

Nisiki-hatsugama. ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.29. Orthographic error for **Nishiki-hatsugama.**

Nisshô. (Sunshine), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.218, description, p.219, colour photo: Medium size, deep scarlet, vase-shaped single with 5 wide, overlapping, emarginate petals and a central stamen cylinder with pinkish filaments, joined for their lower half, and golden anthers. Leaves glossy, deep green, elliptic, apices acuminate, margins shallowly serrate. Blooms mid-season to late. Originated in the Chûbu area, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.188 with colour photo; English translation p.130. A chance seedling of **Benimyôrenji.** Named and released by Minoru Satô in 1960.

Nissoniana. *(C.japonica),* A., J. Camellia Culture, 1866-1867, *Gardeners' Chronicle*, (28):126. No description. Originated in England. (Believed extinct.)

Nita McRae. (*C.reticulata* hybrid). ACS, *The Camellia Journal*, Aug. 2001, p.21, colour photo p.20, Reg. No.2553. A cross of **Suzanne Withers** x **Hulyn Smith,** with orchid pink, peony form blooms with golden anthers and white filaments. Flowers are long lasting with heavy petal texture. Plant is upright, vigorous and flowers mid-season. Originated by E. Hulyn Smith, Valdosta, Ga., USA. *American Camellia Yearbook*, 2001, p.96, colour photo p.c15. Flowers measure 16.5 cm across x 11.5 cm deep. Dark green leaves are 10 cm long x 6.5 cm wide.

Nithi-getsu-sei. Claude Thoby, 1993, *Camélias,* pp.12, 18, 55. A corruption of the Japanese name 'Nishigetsusei', different reading for **Jitsugetsusei.** However, from the descriptions it would appear that it is erroneous for **Jitsugetsusei.**

Nitida. *(C.japonica), The Florist's Journal,* vol.3, 1842, pp.115, 116, 132: At the Royal South London Horticultural show on April 20th, 1842, Chandler exhibited a new camellia; an imported one called **Nitida.** Its habit is dwarfish and branching out with small foliage, flowers of exquisite shape with great regularity. The colour is a shaded crimson with white stripes. Imported from China by J. Reeves. Trillon, Le Mans Nursery Catalogue, 1843, p.7. No description. Anonymous, 1844, Harrison, ed., 1844, *The Floricultural Cabinet*, p.118. Charles van Geert Nursery Catalogue, 1845, p.10: Perfect imbrication, bright currant red, finer than **Carswelliana.** Orthographic error: 'Nittida', 'Nitidi'. Synonym: 'Nitida Vera', 'Nitida' (de la Chine), 'Nitida de Chandler'.

Nitida de Chandler. *(C.japonica),* van Houtte Catalogue, 1842, 9:55. No description. Verschaffelt, 1849, *Nouvelle Iconographie*, Book XI, pl.I as 'Nitida': A small, pink formal double with petals crossed by a white streak. Auguste van Geert Nursery Catalogue, 1848, p.20: Very floriferous, perfect imbrication, very thick petals, pink veined and spotted white. Synonym for **Nitida.**

Nitida (de la Chine). Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.10. Synonym for **Nitida.**

Nitida Vera. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.171. Synonym for **Nitida.**

Nitidi. Joseph Baumann, 1856, Prix Courant, p.5. Orthographic error for **Nitida.**

Nitor. Herbert, 1837, *Amaryllidaceae & Suppl.*, p.367. Synonym for **Nivosa.**

Nittai. *(C.japonica x C.trichoclada). Nagoya Camellia Society Bulletin,* 1992, No.25, p.17, colour photo No.60: Originated by Kôji Funakoshi, Nagoya, Japan. A seedling of the cross *C.japonica* **Yobukodori** x *C.trichoclada* that first flowered at six years of age. The flower size is 4 cm across, neatly shaped, miniature single of 4-5 petals. Shaped like a plum blossom with notched pink petals, with a vague white margin. Intense fragrance inherited from *C.trichoclada*. Leaves like *C.trichoclada* but larger. Branchlets, buds and leaf midribs covered

with fine hair. Vigorous and profuse flowering. Its name comes from the combination of Nippon and Taiwan due to its origin of a Japanese camellia pollinated by one from Taiwan.

Nittan. Japanese for the Chinese name 'Ritan'.

Nitten. (Meanig Unknown) *(C.japonica),* Funaki-en Camellia Catalogue, 1986-1987, p.9, No.168: A *C.japonica* seedling originated by Totsurô Nakamura. White, striped and washed light pink, single, cup-shaped, medium sized flower with unstable, variegated leaves. Originated in Kantô, Japan.

Nittida. Fratelli Rovelli Catalogue, 1852, p.23. Orthographic error for **Nitida**.

Niukoujie. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.416; Chinese synonym for the USA *C.x williamsii* **Buttons'n Bows.**

Niushanhong. (A name of Mount Heiniu) *(C.reticulata) Records of Camellia Ancient Trees in Chuxiong*, p.69 with colour photos. The maternal tree is located at Xiajiachun of Jiufang Village, ZhongshanTown, Chuxiong, China. Named by Zhang Fangyu. Flowers semi-double, pink, 5.5-8 cm diameter with 14-18 petals. Leaves oblong-elliptic, 8.5-10.8 cm x 3.3-6.9 cm. Apices acuminate, bases cuneate, blade flat, margins serrate. Flowers early

Niuxiao Baoshihua. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **Nuccio's Jewel.**

Niuxiao Daioshi. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **Nuccio's Cameo.**

Niuxiao Hongbaoshi. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars*, p.123. Chinese synonym for **Nuccio's Ruby.**

Niuxiao Meiyu. Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **Nuccio's Gem.**

Niuxiao Xiansheng. Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for USA *C.japonica* **Joe Nuccio.** Later changed to 'Juanban Niuxi'ao'.

Niuxiao Xinhong Baoshi. Gao, Jiyin, Ltr, 30 July 1990. Chinese Synonym for **Nuccio's Ruby Variegated.**

Niuxiao Zhenzhu. Gao, Jiyin, 30 July 1990. Chinese synonym for **Nuccio's Pearl.**

Niuxiao Zhuanma. Gao, Jiyin, 30 July 1990. Chinese synonym for **Nuccio's Carousel.**

Niuzinü. (Heifer), Gao & Zhuang, 1989, *The Camellia in China*, p.78, No.597. Synonym for the *C.sasanqua* **Jennifer Susan.**

Nivalis. *(C.japonica),* Kamel, 1836, *The Floricultural Cabinet*, p.154: White. Medium large, formal double. Orthographic error: 'Navalis'. Synonyms: 'Nivalis de Loddiges', 'Nivalis'(Loddiges), 'Lactea Youngii', 'Nivalis Loddigesii', 'Lactea de Young', 'Lactea de Yung', 'Lactea de Jung'. Originated in England.

Nivalis de Loddiges. Berlèse, 1840, *Monographie*, ed.2, p.83. Synonym for **Nivalis.**

Nivalis (Loddiges). Warren's Descriptive Catalogue, 1845, p.52. Synonym for **Nivalis.**

Nivalis Loddigesii. Berlèse, 1841, *Iconographie*, p. facing pl.45 as synonym for 'Lactea Youngii', itsself a synonym for **Nivalis.**

Nivea. *(C.japonica),* Courtois, 1833, Jacob Makoy et Cie Nursery Catalogue, 1833. No description. Courtois, 1833, *Magazin d'Horticulture*, 1[pt.D]:316. No description. Berlèse, 1837, *Monographie*, ed.1: Large, white, irregular semi-double. Synonyms: 'Virginica Alba', 'Delectabilis', 'Nivea'(Loddiges).

Nivea de Caporelli. Cachet Catalogue, 1840-1841, p.3. Synonym for **Nivea Vera.**

Nivea (Loddiges). van Houtte Catalogue, 1844-1845, 18:16. Synonym for **Nivea.**

Nivea Nova. Jacob Makoy et Cie Nursery Catalogue, 1839, p.17. Synonym for **Nivea Vera.**

Nivea Vera. *(C.japonica),* Berlèse, 1840, *Monographie*, ed.2, p.83 and also pl.79. Berlèse, 1841, *Iconographie:* Flower about 7 cm across, semi-double, white; exterior petals broad, rounded, scallopped, anthers almost sterile, with a group of 5 or 6 central petals, very small, long, strap-like. Originated in Italy. Synonyms: 'Nivea Nova', 'Nivea de Caporelli'.

Nivelhema. *(C.japonica),* Mertens & Fontaine, 1845, *Collection de cent especes ou variétés du genre Camellia*, p.124, pl.85. The flower was first seen in 1838. Composed of 4 rows outside of petals rounded, curved, reflexed and enchancréd. The centre petals are deformed, curled and folded. Originated in Belgium. (Believed extinct.)

Nivenii. *(C.japonica),* Verschaffelt, 1844, Catalogue, No.50, p.22. No description. Originated in Italy. (Believed extinct.)

Niveus. *(C.japonica),* McIlhenny, 1935, *List of Camellias*, p.11: Creamy white, medium size, semi-double, almost full with reflexed petals; stamens prominent in centre, closely surrounded by petals. Originated at Jungle Gardens, Avery Island, Louisiana, USA. Orthographic errors: 'Nevius', 'Nivieus'. Synonyms: 'Alba Superba'(Magnolia), 'Northern', 'Tonnie Leche'.

Nivieus. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Niveus.**

Nivosa. *(C.japonica),* Herbert, 1837, *Amaryllidaceae & Suppl.*, p.367: From the white single (**Alba Simplex**) by the pollen of the **Pompone -** a double white, variable in form. Originated by Rev. W. Herbert, London, England. Synonym: 'Nitor'.

Niwatori-tamago. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No,1, p.60 & ibid, 1970, No.10, p.149. Different reading for **Toritamago.**

Nîzuma. Izu-Ohshima, 1980, Hawaii Botanic Gardens *List of Plants*, p.14. Orthographic error for **Niizuma.**

No Dami U Shiro. Coolidge Gardens Catalogue, 1952. Corruption of the Japanese name **Nodami-ushiro.**

No Hearts Purple Gown. Ikeda, 1976, *American Camellia Catalogue*, p.140. Synonym for 'Wuxin Zipao' (**Zipao**).

No Regrets. (*C.reticulata* hybrid) SCCS, *Supplementary List* 2011. Light orchid pink. Medium size, loose peony form with many petals upright, folded and with wavy margins. Slow but strong upright growth. {*(C.pitardii* var *yunnanica* x **Forty-Niner)** x [(*C.pitardii* var *yunnanica* x **Zipao** 'Purple Gown') x (*C.saluenensis* x *C.transnokoensis*)]}. Originated in 2006 by Daniel Charvet, Fort Bragg, Calif., USA.

Nob Hill. *(C.japonica), American Camellia Yearbook*, 1968, p.134, Reg. No.982: An 11 year old chance seedling that first bloomed 1958; originated by Harlan S. Entriken, Sacramento, California, USA. Plant growth is upright, dense and rapid in rate with dark green leaves, 13 cm long x 6 cm wide. The rose form double flower is 13-15 cm across x 8 cm deep with 28 petals and 4 petaloids. Clean white with vivid yellow anthers and light yellow filaments. Outer guard petals undulate. Mid-season blooming.

Nobblissima. Rubel, 1933, *Choice Pot Grown Camellias*, List No.63. Orthographic error for **Nobilissima.**

Nobelissima. Lindo Nursery Price List, 1940-1941. Orthographic error for **Nobilissima.**

Nobe-oka. (Place Name), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.17: Medium size, pink, campanulate to bowl shaped single. Blooms mid-season to late. Originated in the Miyazaki Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.190 with colour photo; English translation p.132. Tapered stamen cylinder. Leaves ovate to elliptic, medium size. Selected from a wild japonica community on Mt. Shiroyama, Nobeoka City. Named and released by Shûhô Kirino in 1983.

Nobiliesima. Jean Verschaffelt, 1876-1877, Catalogue, No.19. Orthographic error for **Nobilissima.**

Nobilisima. Sander & Fils Nursery Catalogue, 1928, 'Special Offer for Autumn'. Orthographic error for **Nobilissima**.

Nobilissima. *(C.japonica),* Loddiges Catalogue, 1836, p.25. No description. Cels, Paris Nursery Catalogue, 1836-1837, p.9. No description. Harrison, ed., 1837, *The Floricultural Cabinet*, vol.V, p.267 as 'Double White'. Berlèse, 1837, *Monographie*, ed.1, pp.55, 125: Leaves, 8.5 cm long x 6 cm wide, roundish-oval, a little acute, much dentated, green; bud, oval, obtuse, scales yellowish; flower, large, 7.5 cm across, full, white; exterior petals large, numerous, recurved; those of the interior, smaller, crowded, rumpled; in appearance like **Pompone.** In the synoptic tables Berlèse gives it as introduced from Belgium in 1834. There are two accounts of its origin. In Berlèse, 1841, *Iconographie*, p. facing pl.153, it is said to be raised from the same fruits as 'Madame la Duchess de Nemours' and **Lefévriana** while Le Texnier, 1911, p.21 says that it was introduced by Lefévre in 1835. On the other hand it is found to be similar, if not the same as a Japanese cultivar known in the USA as 'Fujiyama' and it has been considered by some authorities to have possibly been introduced by von Siebold together with **Tricolor,** 'Donckelaeri' and **Ochroleuca** 1829-1830. According to Schiavonne, 1981, *Il Giardino nell Camelie*, it was figured for Sacco, 1830-1833. However the evidence establishes that the valid cultivar of this name was raised as a seedling by Lefévre in Belgium about 1834. Mertens & Fontaine, *Collection de cent espèces.....camellia,* 1845, pl. 19. Orthographic errors: 'Noblissima', 'Nobillissima', 'Nobilisima', 'Nobelissima', 'Nobblissima', 'Noblessima', 'Nobiliesima'. Synonyms: 'Fostine', 'Fujiyama', 'Fugiama White', 'Maman Cochet'. Baumann, 1841 gives 'Waddi' as a synonym. For colour pl. see p.124, Fairweather, 1979, *Rhododendrons and Azaleas.* Chinese synonym 'Bainuobo'.

Nobilissima de Sacco. *(C.japonica),* Cachet Catalogue, 1840-1841, p.3. No description. Originated in Italy. (Believed extinct.)

Nobilissima Nova. van Houtte Catalogue, 1839, 13. Synonym for **Duchesse d'Orleans.**

Nobilissima Rose. Ouillon, Angers Nursery Catalogue, 1837, p.3. Orthographic variant for **Nobilissima Rosea.**

Nobilissima Rosea. *(C.japonica),* Bahuaud-Litou Nursery Catalogue, 1914-1920: A pink coloured form of 'Nobilissima'. Originated in France. Bahuaud, A.D., Nantes Nursery Catalogue, 1935, p.3 as 'Nobilissima Rosea'(Bahuaud): Peony form, pink edged white. Early blooming. Orthographic variant: 'Nobilissima Rose'. Synonym: 'Pink Nobilissima'.

Nobilissima Semiplena. *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1856-1857. No description. Originated in Italy. (Believed extinct)

Nobilissima Simplex. *(C.japonica),* van Houtte Catalogue, 1841, 7:14. No description. van Houtte Catalogue, 1844-1845, 18:16: Simple, single red streaked white. Originated in Italy.

Nobilissima Superba. *(C.japonica),* Vanderbilt, 1941, *Camellia Research. II,* p.5: A form of **Nobilissima,** larger and similar to **Frizzle White.** Originated in USA.

Nobilissima Supresse. *(C.japonica),* Vanderbilt, 1941, *Camellia Research, II* p.5. No description. Originated in USA. (Believed extinct.)

Nobilissima Vera. Burnier & Grilli Catalogue, 1846-1847. Synonym for **Duchesse d'Orleans.**

Nobillissima. de Bisschop Nursery Catalogue, 1937. Orthographic error for **Nobilissima.**

Noblessima. Marnock, 1839, *Floral Magazine*, 3(32)258. Orthographic error for **Nobilissima.**

Noble Flower. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.174. Synonym for **Hanadaijin.**

Noble Pearl. Peer, SCCS., *Bulletin*, 1949, 11(2):11. Western synonym for **Baozhu Cha.**

Noble Pearl Variegated. (*C.reticulata*), Tammia Nursery, 1988, ACS., *The Camellia Journal*, vol.43, No.4, p.3 as 'Noble Pearl Var.': A virus variegated form of 'Noble Pearl' (**Baozhu Cha**) - Bright purplish red blotched white. Originated in USA.

Noble Red. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.206. Synonym for **Tsukasabeni.**

Noblesse. *(C.japonica),* Denby, 1935, *Gardeners' Chronicle*, ser.3, 97:125, fig.52: No details obvious except light colour. Originated in England. (Believed extinct.)

Noblissima. Rollisson Catalogue, 1871. Orthographic error for **Nobilissima.**

Noborizuru. (Ascending Crane), *(C.hybrid),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.29: Medium size, white, peony form double seedling from the cross *C.oleifera x C.x vernalis* **Umegaka.** Blooms early. Originated in Niigata Prefecture, Japan. Named and released by Kaoru Hagiya in 1981.

Nôbotan. (Peony of Nô Plays), *(C.japonica),* Minagawa, 1933, *Chinkashû,* in the early blooming section; Sakata Catalogue, 1939: Large, deep pink, peony form. Originated in Kantô area, Japan. See colour pl.29, Tuyama, 1966, *Camellia Cultivars of Japan* and Seibundô Shinkôsha. 1979, *Senchinshû.* pp.110, 236. Solid colour flower mutation of **Yokogawa-shibori.** Different reading: 'Nohbotan'. Resembles **Kôkirin, Benibotan.** 'Nô' is Japan's traditional slow dance.

Nobuko-no-fu. (Higo) Ghiradi, 2000, *Higo Camellia.* Recognised by the Higo Camellia Society 27 Jan. 1999. A cross between the Higos **Asagao** x **Hatsuwarai** by Nishimura Tomoya. 6-7 purpley pink petals with occasional white speckles. 10-11 cm diameter, with about 160 stamens. Dark green oval leaves 10 cm x 5 cm. From Kumamoto Pref., Japan.

Noccious Gem. Baroncourt Nurseries Catalogue, 1986-1987, p.2. Orthographic error for **Nuccio's Gem.**

Nochino-mokkô. (Latter 'Mokko'), *(C.japonica), Chinka Zufu*. (before 1700), Watanabe, 1969, pl.339: Medium size, pale pink coloured, semi-double with the colour deepening towards the petal margins. Inner row of petals semi-erect. Originated in Japan. (Believed extinct.) Different reading: 'Atomokkô', 'Nochi-mokkô'. Resembles **Shuchûka.**

Nochino-mokkô. (Latter 'Mokko'), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe. 1969. pl.378: White. semi-double to open, peony form with irregular petals; small brown anthers and white filaments. Different reading: 'Atomokkô', 'Nochi-mokkô'. Originated in Japan. (Believed extinct.)

Nochiseyama. (Mount Nochise), *(C.japonica),* Kasuya, Kamegorô, 1859. *Tsubaki Irohanayose Irotsuki:* There are two different camellias named **Nochiseyama** in this publication. This one is a large size, white, lotus shaped sport of **Kara-nishiki.** See: JCS.. 1969, Tsubaki, No.7, p.28. Originated in Japan. (Believed extinct.)

Nochiseyama. (Mount Nochise), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* Itô, Ko'emon. 1879. *Chinkashû* as one of the five favourites: Pale pinkish white, large double. Tuyama, 1966, *Camellia Cultivars of Japan,* p.154, pl.92; Tuyama. 1968, *Camellias of Japan* pl.70, p.35, description. p.106: Branches of good growth and fasciculate. with dark green foliage. Leaves ovate or narrowly ovate, flat but a little plicate along the midrib near its base, veinlets impressed. Petioles glabrous. Flowers broadly cup-shaped, palest pink double (Rose-pink 427/3). petals broadly orbicular. slightly emarginate. incurved with a few stamens, irregular in shape and 1-2 petal-like petaloids. Late flowering. See: *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.221, p.108; Seibundô Shinkôsha., 1979, *Senchinshû*, pp.110, 236; Yokoyama and Kirino, 1989, *Nihon no Chinka*, p.302. Different reading: 'Atoseyama'. Corruptions of the name: 'Gozeyama', 'Goseyama', 'Grose Yama'. "Nochiseyama" was a famous mountain in ancient times in Wakasa, now the southern part of Fukui Prefecture. See: JCS., 1969, *Tsubaki*, No.7, p.37 for Kamegorô list.

Nochiseyama-Kansai. ('Nochiseyama' from Kansai), *(C.japonica)*, Tuyama, 1966, *Camellia Cultivars of Japan*, p.154. Similar to **Nochiseyama,** but flower colours a little deeper. Originated in Kansai, Japan.

Nochishôjô. (Latter 'Shôjô'), *(C.japonica), Chinka Zufu* (before 1700), Watanabe, 1969, pl.47: Medium sized, deep crimson spotted white, semi-double; three rows of petals and a small stamens duster. Originated in Japan. (Believed extinct.) Note: "Shôjô" are imagined creatures, fond of sake although the word has been used for the Orang Outang and for a heavy drinker.

Nochitorizome. (obscure), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White with red spots and flecks, 3-4 rows of petals. Originated in Japan. See JCS., 1969, *Tsubaki*, No.7, p.28 and ibid, 1982, No.21, p.104. (Believed extinct.)

Nocturne. *(C.reticulata),* JCS., 1987, *Japan Camellia*, No.23, p.13, Colour photo: A seedling from **Dr Clifford Parks** x 'Crimson Robe', [**Dataohong**]. Dark red with central petals having some white markings; open peony form, large. Early to mid-season blooming. Originated by Nagao Ryô, Tokyo, Japan. Diufferent reading: 'Nôkutân'.

Noda. (Place Name), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.359: Small, pink, open peony form, with the colour fading to petal margins. Originated in Japan. "Noda" is also a popular personal name in Japan. Resembles **Chiri-tsubaki.** (Believed extinct.)

Nodami Shiro. Hazlewood & Jessep, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.259. Corruption of the Japanese name **Nodami-ushiro.**

Nodami-ushiro. (obscure), *(C.sasanqua),* Olrick, 1945, *List of Camellias in Capitol Park, Sacramento.* No description. SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Rose-pink. Large, single. Imported from Japan by Domoto Nursery, Hayward, California about 1934. Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III, p.317, black and white photo, p.314, description: Flower, single to semi-double; China Rose 024/1 at margins, to 024/2 at centre and base; 9 cm across. Petals: 6-12, some obcordate, to 4 cm long x 4 cm wide, some apices notched, margins crimped and undulated. Stamens from compact to spreading, filaments 2 cm long, light yellow, anthers small, golden yellow. Leaves: oblong to broad-elliptic, dark glossy green, 7.5 cm x 3.5 cm, broad to coarse serrations, apices short pointed, venation obscure. Plant habit upright and vigorous, free flowering early. Corruptions of name 'No Dami U Shiro', 'Nodami Shiro'.

Nodosa. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie*, p.48: Vivid red formal double with reflexed petals. Originated in Italy.

Noel. *(C.japonica),* SCCS 1993, *Camellia Nomenclature,* p.85: Red with white border, medium size anemone form. Average, upright growth. Originated in USA by Piet & Gaeta, California.

Noela's Pick. *(C.hiemalis)* ACRS, *Camellia News,* 2000, No.154, p.18, colour photo front cover, Reg. No.531. Originated by Thomas J. Savige, Wirlinga, NSW, Australia. Seed parent *C.hiemalis* **Showa Supreme**, pollen parent unknown. First flowered 1996. The semi-double, bright pink (RHS.CC.55C – 55A) flower of 15-17 petals, is 8.5 cm across x 2 cm deep, and flowers moderately early in the season on an upright bushy plant. Leaves mid-green, slightly curved, broad ovate, 6.3 cm long x 4 cm wide. Centre variable, sometimes short twisted stamens, sometimes mixed with short twisted petals. Petals heart shaped.

Noguchi-murasaki. (Noguchi's Purple). *(C.japonica),* JCS., 1973, *Tsubaki.* No.12. p.5, pl.20, description, p.13: A small mauve-pink, semi-double of 4-5 rows of petals, becoming whitish towards the petal margins and a centre of irregular stamens and petaloids. Leaves large, wide-ovate, dark green. Mid-season flowering. Introduced by Yamazaki, Tarô; collected at the Noguchi Shrine. Noguchi-machi, Kagogawa City, Hyôgo Prefecture, Japan as a wild Yama-tsubaki.

Noguchi-seiôbo. (Noguchi's 'Seiôbo'), *(C.japonica),* Noguchi Nursery Catalogue, 1985. A sport of **Seiôbo.** Yellowish white variegated leaves. Flowers same as **Seiôbo**; single, soft pink, very early flowering. Originated in Tokyo, Japan.

Nôhime. (Personal Name). *(C.hybrid).* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.29: Very small size. campanulate single, crimson, fragrant. A seedling of *C.japonica* **Tôkai** x *C.oleifera.* Originated in Niigata Prefecture, Japan. Note: Nôhime was the wife of Oda Nobunaga, a 16th century hero who helped establish a unified Japan.

Nohkohmidarezaki. Izu-Ohshima, 1980, *Hawaii Botanic Gardens Catalogue*. Different reading for **Nôkô-midarezaki.**

Noisette. *(C.japonica),* Fréres Noisette. Nantes Nursery Catalogue, 1857, p.37: Orange-red blotched with white. Very broad. variegated form. Anonymous, Apr.1882, *Revue Horticole,* p.147: Cherry rose, spotted white, semi-double. Medium size. Blooms mid-season. Originated in France. Orthographic errors: 'Noisettii', 'Noisetti', 'Noisettiana'.

Noisetti. Paugaum & Blanchard, Oct.1884, *Revue Horticole.* p.450. Orthographic error for **Noisette.**

Noisettiana. Baumann. Mulhouse Nursery Catalogue, 1841-1842. p.14. Orthographic error for **Noisette.**

Noisettii. Waterhouse, 1952, *American Camellia Yearbook.* p.29. Orthographic variant for **Noisette.**

Nô-ishô (Nô Drama Costume), *(C.japonica),* Sakuden, 1630, *Hyakuchinshû:* Red with petaloids, red, white or pink; small to large with 5 thick, large, broad petals. Originated in Japan. Different reading: 'Nô-isyo'. (Believed extinct.)

Nô-isyo. Different reading for **Nô-ishô.**

Noiva Arraiana. *(C.japonica),* Loureiro Catalogue No.1, 1865, p.31, & No.9, 1872-1873, p.45: Vivid rose coloured formal double. Originated in Portugal.

Nokoensis. Hayata, 1919, *Iconographie Pl. Formos. viii*, t.2. The species *Camellia nokoensis* Hayata.

Nokogiba-tsubaki. Mainichi Shinbun, JCS., ed., 1971, *Tsubaki*, p.175. Same characters as **Nokogiriba-tsubaki.**

Nokogiriba. Ishii & Hosaka, 1954, *Genshoku Engei Shokubutsu Zufu*, Synonym for **Nokogiriba-tsubaki.**

Nokogiriba-tsubaki. (Serrated Leaves Camellia), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* (JCS., 1969, *Tsubaki*, No.7, p.37.); Itô, Ko'emon, 1879, *Chinkashû:* Small, single red flower, widely open. Leaves having very coarse, saw-like serrations on the margins. Originated in Kantô area, Japan. Synonym: 'Nokogiriba'. Different reading: 'Nokogiba-tsubaki'. Has sometimes been confused with **Hiiragi-tsubaki.** (Holly Leaf). For colour photos and descriptions see: Tuyama, 1966, *Camellia Cultivars of Japan*, pp.378, 379; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.110, 236; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.167. Chinese synonym 'Juyechun'.

Nôkô-midarezaki. (Dark Red Disordered Bloom), *(C.japonica)*, Izu Ohshima, 1980, Hawaii Botanic Gardens Catalogue, as 'Nohkohmidarezaki'. A dark red, irregular peony form bloom. Originated in Japan.

Nokorika. (Lingering Perfume), *(C.sasanqua)*, Kuriya, 1970. *Higotsubakito Higosazanka Engei Tsûshin*, No.20; Hakoda, JCS., 1987, *Tsubaki*, No.26, p.46; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.35: Medium size, red, single. Blooms early to mid-season. The original tree survives in Kumamoto City, Japan. Designated and named by the Higo Sasanqua Society in 1968.

Nokori-yuki. Different reading for **Zansetsu.**

Nôkutân. ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.30: Large to very large, vivid red, peony form double. Blooms mid-season. Synonym for **Nocturne.**

Nola Firth. *(C.japonica), American Camellia Yearbook*, 1980, p.171, Reg. No.1626: A large, pure white, formal double *C.japonica*, chance seedling. Originated by Paul Gilley, Grandridge, Florida, USA. The 5 year old seedling first flowered 1979. Average size, 11 cm. across x 6 cm deep with 50 petals. Plant growth is upright and medium with dark green leaves, 7.5 cm long x 3.7 cm. wide. Chinese synonym 'Luona Haiwan'.

Noli Me Tangere. *(C.japonica)*, Shepherd Nursery Catalogue, 1882, *Novelty List.* Dark rose. Medium sized semi-double. Medium, compact growth. Mid-season flowering. Raised by Father Ambrosoli, N.SW., Australia.

Nolwen. *(C.japonica)*, Originated by Roger Salaün, "Stervinou", Guipronvel, France. A seedling of unknown parentage, first flowered 2005. Plant is upright, dense and fast growing, with dark green leaves recurved at the apex, 8-9cm x 5cm. Young leaves lighter green. Flowers bright almond rose, semi-double to informal double, diameter 8-8.5cm, yellow stamens sometimes mixed with petaloids. Flowers late to very late.

Nomene. Nobelius Catalogue of Fruit. 1939, p.36. Synonym for **Fukuzutsumi.**

Nominoé. *(C.japonica)*, Pépinières Thoby, Carquefou, France, Plant List, 2003, p.18; Single pink.

Non Darcil. Peer, 1956, *American Camellia Yearbook*, p.55. Orthographic error for **Nonpareil.**

Non Plus Ultra. *(C.japonica)*, Burnier & Grilli Catalogue, 1846-1847. No description. van Houtte Catalogue, 1846-1847, 27:28: In the form of 'Pecchiolana' (**Contessa Nencini**), flowers very deep, very beautiful. Berlèse, 1849, *Annales de la Société Central d'Horticulture de Paris*, vol.40, p.132: Formal double, 10-11 cm across, colour light blush, streaked, spotted and tinted pink. Numerous petals in 8-9 rows, cup-shaped, slightly indented, perfectly imbricated from the circumference to the centre. Luzzatti, 1851, *Collezione di Camelie*, p.29: Magnificent flower of perfect imbrication, white lined with rose. Ridolfi, Florence Catalogue, 1848: Large double with perfect imbrication, very thin petals, often transparent, pure white with some pink

streaks. de Jonghe, 1851, *Traité de la Culture du Camellia*, p.116: Large imbricated flower, rounded petals, flesh pink spotted with white. Originated by the Marquis Ridolfi, Florence, Italy according to Roda, 1885.

Nonatensis. *(C.japonica)*, Warren's Descriptive Catalogue, 1844, p.38. No description. Originated in USA. (Believed extinct.)

Nonie Haydon. *(C.pitardii* hyb.), Valdosta Camellias, ACS., Nov.1990, *The Camellia Journal*, vol.46, No.4, p.22. No description. Camellia Haven Catalogue, 1991, p.12: Medium to large size, informal double. Larger flower and stronger growth than most *C.pitardii* hybrids, but free flowering with bright, long lasting pollen. *New Zealand Camellia Bulletin*, Mar.1991, vol.XVII, No.1, p.45, Reg. No.280: A seedling of *C.pitardii* raised by N.G. Haydon, Papakura, New Zealand. It is 8 years old and first flowered 1985. Growth habit average and of a medium rate, leaves 9 cm. long x 5 cm wide, mid-green. Flower pink, peony, 13 cm across x 6 cm, deep with 21-26 petals, cream filaments and golden anthers. Blooms mid-season to late, free flowering, bright pollen, firm texture. Chinese synonym: 'Haidun'.

Nôni-shiratama. (Nôni's White Jewel), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.490: Medium to small, irregular, open, peony form white. Originated in Japan. (Believed extinct.)

Nono-ichi. (Place Name), *(C.japonica)*, Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*. No.1, p.60. No description. *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.371; ibid. vol.II, 1978, pl.327: Small, soft pink, campanulate single, 7 petals, Early flowering. Leaves obovate elliptic, green, finely serrate, apex acuminate. It flowers from very early to late. For colour photos see: Seibundô Shinkôsha., 1979, *Senchinshû*, p.110, as 'Nonoichi'. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.70. Originated in Japan. This cultivar is an old variety from the vicinity of Nonoichi-chô of Ishikawa Prefecture and the flower was named for the district as associated with the flower trade. Large trees were cultivated by the Kaneko Ikebana shops of Hashiba-chô, of Kanazawa City and today, from the Nono-ichi to the Tsurugi area, there are many camellias of the same kind. This variety is quite distinct fron the single white **Nono'ichi-jiro.**

Nono'ichi-jiro. (Nono-ichi White), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.10, p.5, description, p.87: Leaves, thick, broad-elliptic to rhombeo-elliptic, coarsely serrate, 7.9-9.5 cm long x.2-4.9 cm wide; petiole short and hairy, obtusely acute. Flower broadly cup-shaped, lustreless white; petals 5, orbicular, manifestly incised, 6 cm x 5.7 cm, stamens 3.5 cm long x 3.3 cm across at the apex of the staminal ring, filaments thick, creamy. Early flowering. Originated in Ishikawa Prefecture, Japan. Note: No connection to **Nono-ichi.**

No-no-ka. (Fragrant of Field), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.202, description, p.203, colour photo as 'Nonoka': Medium size to small, red, wide campanulate single of 5-6 wide, rounded, emarginated, overlapping petals with a central stamen column having white filaments, joined for their lower half, and yellow anthers. Leaves deep green, elliptic-lanceolate with long, tapering, acuminate to caudate apices and serrate margins. Blooms mid-season to late. Originated in the Chûbu District, Japan. Nippon Tsubaki - Sasanqua Meikan, 1998, p.190 with colour photo as 'No-no-kaori'; English translation p.132. Named and released by Minoru Satô in 1986.

Nonomiya. (Title of Nô play), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.206: Small size, deep scarlet with white spots, open peony form with lobed petals. Originated in Japan. Nonomiya is also the name of an old sacred palace.

Nonose. (Personal Name), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.607: Small to medium size, deep crimson, single with a centre of small petaloids and stamens. Originated in Japan. (Believed extinct.)

Nonose-monogurui. (Insane 'Nonose'), *(C.japonica),* Shirai, Mitsutarô, 1926, *Tsubaki Kai:* Deep red, single with either a regular, cylindrical stamen cluster or petaloids forming an anemone centre. Originated in Japan.

Non Pareil. Jules Menoreau, Nantes Nursery Catalogue, 1886, p.13. Orthographic variant for **Nonpareil.**

Nonpareil. *(C.japonica),* Bull, W. Nursery Retail Price Lists, 1866, p.3. No description. Dombrain, H.H., 1866, *The Floral Magazine*, vol.5, pl.295: A medium sized flower of regular outline, (formal double) the colour is a delicate flesh, barred and irregularly striped deep pink. William Bull, 1867, Catalogue, p.74: The flowers of this variety have great regularity of outline, fine thick petals, colour a delicate flesh, barred, splashed and regularly striped a deep pink. Compact habit and a free bloomer. The name has been used erroneously for **Paeoniiflora Pallida.** Orthographic errors: 'Nonpariel', 'Non Pareil', 'Non Darcil'.

Nonpareil. Duncan & Davis Nursery Catalogue, 1949, p.21. Erroneously as a synonym for **Paeoniiflora Pallida.**

Nonpariel. Henderson Catalogue, 1867. Orthographic error for **Nonpareil.**

Noodie Dawson. *(C.japonica),* Dodd, 1968, *Adventure in Camellia Seedlings*, p.10, colour photo: A medium sized, semi-double to open, irregular, incomplete double; pink with some light red streaks. A seedling of 'Magnoliiflora', (**Hagoromo**), originated by Richard Dodd, Marshal-lville, Georgia, USA.

Noonie Carroll. *(C.japonica),* ACS., 1988, *The Camellia Journal*, vol.43, No.4, reg. No.2099, front cover colour photo: Nature creates imbricated petals in a 5 swirl design. Rosy pink lined lighter pink, 60 formal double petals, medium size. Mid-season blooming, long lasting, abundant bloomer. Chance seedling originated by Sam. & Ferol Zerkowsky, Tammia Nursery, Slidell, Louisiana, USA. *American Camellia Yearbook.* 1989. p.126: the 8 year old seedling first bloomed 1986. Average flower size, 9.5 cm across x 3.8 cm deep with 60 petals, all petals imbricated in 5 swirls. Plant growth is upright, average, open and medium in rate with light green leaves, 7.5 cm long x 3.8 cm wide.

No-otome. (Rustic Maiden), *(C.japonica),* Minagawa, 1956, *Tsubaki no Hinshu to Sono Saibai.* No description. Originated in Japan.

Nora. (*C.sasanqua*), *American Camellia Yearbook,* 1959, p.278, Reg. No.366: A 5 year old chance seedling *C.sasanqua*; originated by Henry B. Rehder, Wilmington, North Carolina, USA, which first bloomed 1956. Plant growth is rapid, upright and open with dark green leaves, 6 cm long x 2.5 cm wide. The rose-pink flowers, with pink tipped, yellow stamens, average 6 cm across x 2.5 cm deep, semi-double. The flowers open with a tight bud and then become fully blown. Early flowering.

Nora Lawson. *(C.japonica), American Camellia Yearbook*, 1970, p.167, Reg. No.1076: An 11 year old chance seedling that first bloomed 1962; originated by Dr John D. Lawson, Antioch, California, USA. Plant growth is upright, open and medium with small, dark green leaves. The anemone form flower is white, pink splashed, with yellow anthers and white filaments. It measures 13 cm across x 5 cm deep with 10 petals and 8-20 petaloids. Early blooming.

Nora's Choice. *(C.japonica), New Zealand Camellia Bulletin*, 1988, vol.XV, No.5, p.25, Reg. No.253: An 8 year old chance *C.japonica* seedling, originated by Miss K.N. Fergusen, Matamata, New

Zealand. First flowered 1984 and the plant shows slow, spreading growth with dark green leaves, 10 cm x 6 cm. The peony form flower is 12-13 cm across x 7 cm deep. Mid-season to late flowering. Buds show colour for some time before opening. There are about 30 petals and odd petaloids or pinky-red stamens. Colour is RHS.CC.Red Group, 52A. This plant produces very heavy blooms, often showing three distinct centres. Lasts well and falls clean.

Norbitonia Alba. *(C.japonica),* Verschaffelt Catalogue, No.50, 1844, p.22. No description. (Believed extinct.)

Nordmannii. G. Mariotti Nursery Catalogue, 1924 as 'Nordmanni': Pink, with large, regular, white blotches. Orthographic error for **Normanii.**

Noren. (Business Goodwill), (*C.rusticana*), Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.8, p.18, illustration: Small size, deep red, 4-5 cm across, semi-double with 3 rows of guard petals, 27 in number, and rare small, erect centre petals and petaloids, with 5-10 short stamens, lotus shape. Leaves elliptic, apex acuminate, margins serrulate, mid-green. See: Seibundô Shinkôsha, 1979, Senchinshû, pp.110, 236. Collected from Takada City, Niigata Prefecture, Japan in 1962.

Norfold Red. Shackelford, 1969, ACS., *The Camellia Journal*, vol.24, No.4. Orthographic error for **Norfolk Red.**

Norfolk Red. *(C.japonica),* Belle Fontaine Nursery Catalogue, 1961. Large, red, open peony form. Orthographic error: 'Norfold Red'. Originated in USA.

Norihime. (Nori Princess). *(C.japonica), Nagoya Camellia Society Bulletin,* 1992, No.25, p.11, colour photo No.39: Originated by Kôji Funakoshi, Nagoya, Japan. A chance seedling of **Seiôbo.** Resembles **Shôjô** in its darker petal edge. Sweet fragrance. First prize for seedling in the Nagoya Camellia Show, 1992. Named after originator's daughter.

Norikoboshi. (Spilt Paste), *(C.japonica),* Satomi, 1956, *Camellia Varieties of Japan*, p.10 as 'Norikoboshi': Pale, pinkish white, blotched pink. Medium single to semi-double. Early to mid-season blooming. Originated in Japan.

Norikoboshi. (Spilt Paste), (*C.rusticana*), Tuyama, 1966, *Camellia Cultivars of Japan*, p.238 as 'Norikoboshi'; Tuyama, 1968, *Camellias of Japan,* pl.280, p.141, description, p.175 as Norikoboshi-Tôdaiji'; Seibundô Shinkôsha, 1979, Senchinshû, pp.110, 236: Leaves elliptic to broad-elliptic, apex acute, minutely serrulate; petioles hairy. Flowers rosy (Rhodonite Red 0022), with smallish, white spots on the petals, single form. Late flowering. Originated in the garden of the Kaizandô Buddhist Temple, Tôdaiji, Nara, Japan. See: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.100, pp.69, 306 and Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.237. Resembles **Amagashita.** Regarded as identical with **Hakkan** and **Reikanji-maizuru.** Synonyms: 'Norikoboshi-Tôdaiji' and 'Rôben-tsubaki'. This cultivar is said to be one of the three notable trees of the Nara Prefecture, with **Nara-shichifukujin** of Byakugôji and **Chiri-tsubaki** of Denkôji.

Norikoboshi-Tôdaiji. Synonym for **Norikoboshi.**

Norina. (C.hybrid). *New Zealand Camellia Bulletin,* March 1999, Issue No.132, vol.XXI, No.1, p.14, Reg. No.401. Registered by N. Haydon, Takanini, New Zealand. A seedling of **Alpen Glo,** pollen parent unknown. It has small, perky, semidouble to anemone form flowers, 4 cm diameter x 2 cm deep, with 11-13 petals and 6-30 petaloids, the petaloid number being high mainly on the later-season flowers. Overall flower colour is a striking fuschia pink (RHS.CC. 61C) becoming lighter towards the petal bases and in the younger petals (RHS.CC. 61D). The

plant is very free-flowering, and is upright of medium growth rate and average density, with long, wandy branches. Leaves are mid-green, 5 cm long x 2 cm wide.

Norma. *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1849-1850. No description. Medici Spada. 1858, *Catalogo nel Giardino a Villa Quiete,* p.13. No description. Originated in Italy by Tagliabue. (Believed extinct.)

Norma. van Geert Nursery Catalogue. 1845. Abbreviation for **La Norma.**

Norma Borland. *(C.japonica), American Camellia Yearbook,* 1955, p.339, Reg. No.215: A 9 year old seedling of **Duchess of Sutherland;** originated by Julington Nurseries Inc., Florida, USA. First flowered 1952. Plant growth is average and compact with medium large, heavily textured, glossy, dark green leaves. The flowers are white with an occasional red dash, 11-15 cm across, incomplete double with mixed petaloids, similar to **Nobilissima,** with petals, petaloids and stamens intermixed. Early flowering.

Norma Knight. *(C.japonica), American Camellia Yearbook,* 1965, p.243, Reg. No.796: A 9 year old chance seedling of General George Patton that first bloomed 1961; originated by C.A. Knight, Beaumont, Texas, USA. Plant growth is slow with light green leaves, 8 cm long x 5 cm wide. The flower is anemone to peony form, 11 cm across x 6 cm deep; strong red with yellow anthers. It has 37 petals and 35 petaloids. Early blooming.

Norman Bolling. *(C.japonica),* Sewell & Parks, 1981, *American Camellia Yearbook,* p.130. No description. Originated in USA.No valid listing located.

Norman Edwards. *(C.japonica),* McCaskill Gardens Catalogue, 1957, Newest Camellias: Light pink shading to deeper pink. Medium, peony form. Medium, compact, upright growth. Blooms mid-season. Originated by V. McCaskill, Pasadena, California, USA from an open pollinated seedling.

Norman Mansfield. Cannon, 1978. ACS., *The Camellia Journal,* vol.33, No.4. Synonym for **Betty Sheffield Pink Variegated.**

Normandie. SCCS., 1942, *Classification of Camellias,* p.3. Orthographic error for 'Normandy', synonym for **Concordia.**

Normandy. SCCS., 1945, *Camellias,* p.20. Synonym for **Concordia.**

Normanii. *(C.japonica),* Verschaffelt, 1849, *Nouvelle Iconographie,* Book IV, pl.I: This variety was obtained from seed in England and named for Mr Norman of Hull. Leaves are 8-9 cm long x 5-6 cm wide, deep green, elongated-oval, apex acute, margins serrate. The flower is nearly 10 cm across, of soft pink, tinged a pale lilac shade towards the circumference and white near the centre, where the petals, which are emarginate at the apex, are smaller. Orthographic errors: 'Normanni', 'Normani', 'Nordmanii'. This cultivar is very similar to **Sacco** but, according to Verschaffelt, is a separate cultivar.

Normanni. de Varennes, Feb.1852, *Revue Horticole,* p.80. Orthographic error for **Normanii.**

Noroshi. (Signal Fire), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.577: Medium size, semi-double to open peony form, white. Originated in Japan. Different reading: 'Hôka'. (Believed extinct.)

North Augusta. *(C.japonica),* Griffith, ed., 1957, *Camellian.* No desciption. *American Camellia Yearbook,* 1965, p.243, Reg. No.793: A chance seedling that first bloomed 1948; originated by Dr & Mrs H.G. Mealing, North Augusta, South Carolina, USA. Flower is cream white with red stripes (Cardinal Red 822/3) with yellow stamens, however most variable, some with petaloids. Size, 12.5 cm across x 6 cm deep.

North Bay. (*C.reticulata* hybrid) SCCS, *Supplementary List* 2011. White with orchid blush. Medium size semi-double with fluted petals. Vigorous, upright open growth. Flowers midseason to late. {*C.pitardii* var *yunnanica* x [**Dataohong** 'Crimson Robe' x (**Dataohong** 'Crimson Robe' x *C.fraterna*)]} Flowers early to midseason. Originated in 1999 by Daniel Charvet, Fort Bragg, Calif., USA.

North Star. (*C.sasanqua*), Anonymous, 1948, *American Camellia Yearbook*, p.172 as 'North Star FN': Colour white tipped pink. Usually five petals, long and narrow, folding backwards slightly, ruffled tips, 7 cm across. Stamens 2.5 cm long in the centre. Foliage, dark green, 5 cm x 2.5 cm, apex acute. Plant habit upright and dense. Originated at Fruitland Nurseries, Augusta, Georgia, USA.

North Shore. *(C.japonica),* SCCS., 1970, *Camellia Nomenclature*, p.108: Pink. Large, peony form. Blooms mid-season. Originated by Miss W. Henderson. N.SW, Australia.

Northern. The Pacific Camellia Society, 1946, *Camellia Nomenclature*, Synonym for **Niveus** as 'Alba Superba'.

Northern Folk. SCCS., 1958, *Camellia Nomenclature*, p.35. Synonym for **Ezo.**

Northern Light. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943: Dark pink. Large semi-double to loose peony form with narrow petals. Originated in USA at Magnolia Gardens, John's Island, South Carolina, USA. Sport: **Northern Light Variegated.**

Northern Light Variegated. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* A virus variegated form of **Northern Light** - Dark pink blotched white. Originated in USA.

C.japonica chance seedling, blooms early to late; originated by Nuccio's Nurseries, Altadena, California, USA. The 8 year old seedling first bloomed 1977. Average size is 10-11 cm across. Plant growth is upright, dense and medium in rate with dark green leaves, medium sized. See colour photo: front cover, SCCS., 1984, *The Camellia* Review, vol.45, No.3 and p.32, Fischer, 1986, *Kamellien.* Chinese synonym: 'Niuxiao Daioshi'.

Nuccio's Cameo Variegated. *(C.japonica),* Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.420; A virus variegated form of **Nuccio's Cameo**. Chinese synonym 'Fuse Niuxi'ao Diaoshi'.

Nuccio's Carousel. *(C.japonica),* Nuccio's Nurseries Catalogue, 1988-1989, p.12: #8254 - Large, semi-double, tubular form. Soft pink toned deeper at edge. Medium, upright growth. Early to late blooming. Originated by Nuccio's Nurseries, Altadena, California, USA. ACS., May 1989, *The Camellia Journal* vol.44, No.2, p.9, Reg. No.2124; *American Camellia Yearbook.* 1989, p.126: The 10 year old seedling first bloomed 1982. Plant growth is upright, average and medium in rate. See colour photo, front cover, SCCS., 1988, *The Camellia Review,* vol.50, No.2. Chinese synonym: 'Niuxiao Zhuanma'.

Nuccio's Compacta. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.257. Synonym for **Compacta (Nuccio).**

Nuccio's Gem. *(C.japonica),* Nuccio's Nurseries Catalogue, 1970: #6506: Large formal double. White, Early to mid-season. *American Camellia Yearbook,* 1979, p.109, Reg. No.1531: A medium to large, white formal double *C.japonica* chance seedling that blooms early to mid-season; originated by Nuccio's Nurseries, Altadena, California, USA. The 13 year old seedling first bloomed 1965, Average flower size, 9-11 cm across. Plant growth is upright, dense and rapid with dark green leaves, 8 cm x 5 cm. Received the 'Margarete Hertrich Award', 1973 and the 'Illges Medal' in 1979; also the 'William E. Woodroof Camellia Hall of Fame Award' in 1981. See colour photos p.107, Macoboy, 1981, *The Dictionary of Camellias in Colour;* front cover, SCCS., 1970. *The Camellia Review,* vol.32, No.1; front cover, *New Zealand Camellia Bulletin*, 1983, vol.XIII, No.1. Orthographic errors: 'Noccious Gem', 'Nuccio's Grm'. Chinese synonym: Niuxiao Meiyu'.

Nuccio's Golden Anniversary. Nuccio's Nurseries Catalogue, 1984-1985, p.19. Synonym for **Dahlohnega.**

Nuccio's Grm. Duncan & Davies (UK) Catalogue, 1986. Orthographic error for **Nuccio's Gem.**

Nuccio's Jewel. *(C.japonica),* Nuccio's Nurseries Catalogue, 1978, p.12: (N #7403) -White shaded to orchid pink on edge. Medium loose to full peony. Slow, bushy growth. Midseason to late blooming. *American Camellia Yearbook*, 1979, p.109, Reg. No.1530: Originated by Nuccio's Nurseries, Altadena, California, USA. The 4 year old seedling first bloomed 1974. Average flower size, 9-10 cm across. Plant growth is dense and slow with 6 cm x 3.8 cm green leaves. For colour photo see: p. 108, Macoboy, 1981, *The Colour Dictionary of Camellias* and the front cover, SCCS., 1975, *The Camellia Review*, vol.40, No.l. Chinese synonym: 'Niuxiao Baoshihua'.

Nuccio's Number 105. Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II as 'Nuccio's No.105'. Synonym for **Primavera.**

Nuccio's 404. *(C.japonica),* Williams & Thompson, 1952, *American Camellia Yearbook,* p.6: Seedling of unknown parentage which produced 15 cm flowers of semi-double to incomplete double form; white with a few red stripes. It sports a pink, red and white form Originated by Nuccio's Nurseries, Altadena, California, USA.

Nuccio's 515. *(C.japonica),* Williams & Thompson, 1952, *American Camellia Yearbook,* p.6. A seedling of **Caprice,** 12.5 cm across, semi-double. Resembles a rose. Colour a pink shade with blush or lavender overcast. Originated by Nuccio's Nurseries, Altadena, California, USA.

Nuccio's Pearl. *(C.japonica),* Nuccio's Nurseries Catalogue, 1978, p.12: (N #730l): Medium semi-double with pointed petals. Blush white with both centre and outside petals toned a deeper pink. Blooms mid-season to late. *American Camellia Yearbook*, 1979, p.110, Reg. No.1529: A medium, blush white centre and outside petals toned deeper pink, formal double with pointed petals. *C.japonica* chance seedling; originated by Nuccio's Nurseries, Altadena, California, USA. The 5 year old seedling first bloomed 1973. Average flower size, 8 cm across. Plant growth is upright, dense and medium with dark green leaves, 6 cm long x 3.8 cm wide. For colour photos see p.108, Macoboy, 1981, *The Colour Dictionary of Camellias*, and the front cover, SCCS., 1977, *The Camellia Review,* vol.39, No.l. Chinese synonym: 'Niuxiao Zhenzhu'.

Nuccio's Pink Lace. *(C.japonica),* Nuccio's Nurseries Catalogue, 1988-1989, as 'Pink Lace'. ACS., 1989, *The Camellia Journal,* vol.44, No.2, p.9, Reg. No.2125: Medium to large, blush pink semi-double to anemone to peony form. Blooms early to late. Originated by Nuccio's Nurseries, Altadena, California, USA. *American Camellia Yearbook*, 1989, p.126: The 9 year old seedling first bloomed in 1983. Plant growth is upright and medium. Name changed to **Nuccio's Pink Lace** as 'Pink Lace' already used as a synonym for Hishi-karaito. See colour photo SCCS., Mar. 1990, *The Camellia Review*, vol.51, No.4.

Nuccio's Red Velvet. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.172. Orthographic variant for **Nuccio Red Velvet.**

Nuccio's Ruby. *(C.reticulata),* Nuccio's Nurseries Catalogue, 1974: (N #7017): Large to very large, darkest rich red, ruffled petals. Semi-double. Upright, bushy plant, Mid-season blooming. *American Camellia Yearbook*, 1979, p.110, Reg. No.1515: A large to very large, darkest red, ruffle petalled, semidouble chance seedling *C.reticulata*, mid-season flowering; originated at Nuccio's Nurseries, Altadena, California, USA, that first flowered 1970. Average flower size, 12.5 cm across. Plant growth is upright, dense and medium with dark green leaves, 10 cm. x 2 cm. Sport: **Nuccio's Ruby Variegated.**

Nuccio's Ruby Variegated. *(C.reticulata),* Nuccio's Nurseries Catalogue, 1984 as 'Nuccio's Ruby Var.' - A virus variegated form of **Nuccio's Ruby.** Dark red with white blotches. Blooms midseason. Originated by Nuccio's Nurseries, Altadena, California, USA. Chinese synonym: 'Niuxiao Xinhong Baoshi'.

Nuccio's White. (*C.reticulata* hybrid). Don Ellison, 1997, "Camellias - A Photo Dictionary", p.103 with colour illustration: A large, white semi-double, of 17 waved and crinkled petals and small, short centre stamen cluster with white filaments and yellow anthers. Originated by Nuccio's Nurseries, Altadena, Calif., USA.

Nuchunhong. (Furious Spring Red), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.51, No.321, colour photo No.186: Large size, 10-14 cm across, pink, open peony form with 3-4 rows of large outer petals and a centre of small, erect petals, petaloids and stamens. Blooms mid-season. Originated in China.

Nü'erhong. (Daughter's Red), *(C.hybrid).* China Regn No.40. *China Flowers & Horticulture,* July 2008, No.14, p.45 with colour photo; A cross between the Cutter hybrid 'D3[4]' with the hybrid **Superscent** as pollen parent. Originated by John Wang, Orinda, Calif., USA. First flowered in 2002. Flowers single, cup form, pink, 6-11 cm diameter, prominent veins, broad petals

Filaments bright. Fragrant. Leaves elliptic, deep green, apices acute, bases broad cuneate, flat prominent veins, 10.5 cm long x 6 cm wide. Flowers mid-season.

Nugatahime. *(C.lutchuensis* hybrid). *Camellia Photo Collection*, 1997 Japan, p.169. Miniature white single. Name may be a mis-spelling of 'Niigatahime' (Niigata Princess).

Nujiang Xianggu. (Fragrant Valley of River Nu). *(C.x williamsii).* Gao, Jiyin, Ltr, 22nd August 1994. Chinese name for John Wang's fragrant seedling, raised in California, USA. No description.

Nukadahime. (Princess Nukada), *(C.rusticana x C.lutchensis),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.54, colour photo and description: Small size, white, single with 5-6 ovate, somewhat reflexed petals and a short, spreading, light yellow stamen group. Fragrant. Leaves dark green, ovate, apices tapering acute, margins serrate. Plant habit drooping. Blooms mid-season. Originated in Niigata Prefecture, Japan. A hybrid between *C.rusticana* **Kazahana** x *C.lutchuensis.* Different reading: 'Nukatahime'. Nukadahime refers to Nukada-no-ôkimi in the *Manyô-shû;* a distinguished lady of the court and a poet of the 7th century. She was loved by both Tenchi and Tenmu Emperors and gave birth to a daughter by Tenmu while he was crown prince, but she was never an Empress as this was not possible for a lady of her class. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.189 with colour photo; English translation p.131. Parentage stated to be 'Hûka' x *C.lutchuensis.* Originated and named by Kaoru Hagiya in 1974.

Nukatahime. ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.30. Different reading for **Nukadahime.**

Nukifude. (Worn Paint Brush), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* JCS., 1969, *Tsubaki*, No.7, p.24; White ground, with many red stripes and flecks; looks like red with white streaks, single; Itô, Ko'emon, 1879, *Chinkashû:* Pink splashed rose red. Medium, single. Tuyama, 1968, *Camellias of Japan*, p.327, p.165, description, p.188: Leaves, elliptic to oblongelliptic, apex long-acuminate, margins coarsely crenate, venation slightly impressed. Flowers, single, vase shaped, white to blush pink, densely striped deep red. (Cardinal Red 822/3). Flowers mid-season. Originated in Japan. Different reading: 'Nuki-hude'. See: Adachi, 1960, *Camellia. Its Appreciation & Artistic...*, p.107; Tuyama, 1966, *Camellia Cultivars of Japan*, p.302, pl.174; *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.307, pl.110; Satô, 1975, *Chûbu no Tsubaki*, p.38; Seibundô Shinkôsha, 1979, *Senchinshû*, pp. 109, 336. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.283. Resembles **Sôshi-arai.**

Nukihude. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.60, as 'Nuki-hude'. Different reading for **Nukifude.**

Nukijiro. Different reading for **Nukishiro.**

Nukijiro-chiri-tsubaki. JCS., 1986, *Tsubaki*, No.25, p.14. Different reading for **Nukishiro-chiri-tsubaki.**

Nukijiro-tairin. Different reading for **Nukishiro-tairin.**

Nukijiro-yae. Different reading for **Nukishiro-yae.**

Nukijiro-yae-nagai-ichimasa. Different reading for **Nukishiro-yae-nagai-ichimasa.**

Nukishiro. (Fabric Design), *(C.japonica),* Mizuno, 1681, *Kadan Kômoku:* White streaked rose. Large double of sake cup form. Originated in Japan. See: JCS., 1965, *Tsubaki*, No.5, p.29. (Believed extinct.) Different reading: 'Nukijiro'

Nukishiro. (Fabric Design), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Single, pale pink with pink stripes and white petal edges. Originated in Japan. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.80. (Believed extinct.)

Nukishiro. (Fabric Design), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.703: Large, double pale pink with waved petals. Originated in Japan. (Believed extinct.) Different reading: 'Nukijiro'.

Nukishiro-chiri-tsubaki. (Petal Scattering 'Nukishiro'), *(C.japonica)*, Hino, Sukekatsu, 1637, *Sukekatsukyôki.* No description. Originated in Japan. (Believed extinct.) Different reading: 'Nukijiro-chiri-tsubaki' in JCS., 1986, *Tsubaki*, No.25, p.14.

Nukishiro-tairin. (Large flower of Nukishiro), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.320, 473: Large, very soft pink, paler towards the petal edge, open peony form. Originated in Japan. (Believed extinct.) Different reading: Nakijiro-tairin'. Thought to be the same as the *Chinka Zufu* 'Nukishiro', pl.703.

Nukishiro-yae. (Double Camellia of Nukishiro), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.371: Large white semi-double, with very irregular, waved and fluted petals, yellow anthers, white filaments. Originated in Japan. (Believed extinct.) Different reading: 'Nukijiro-yae'. Thought to be the same as the *Chinka Zufu* 'Nukishiro', pl.703.

Nukishiro-yae-nagai-ichimasa. (Nagai, Ishimasa's Double 'Nukishiro'), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.197: Medium size, blush pink, semi-double with small, brownish anthers and filaments. Originated in Japan. (Believed extinct.) Different reading: Nukijiro-yae-nagai-ichimasa'.

Number 1. Kiyono Nursery Catalogue, 1939-1940 as 'No.1'. Synonym for **Shell Pink.**

Number 2. Kiyono Nursery Catalogue, 1939-1940, as 'No.2'. Synonym for **Feastii.**

Number 2. M. Fruitland Nursery Catalogue, 1946-1947 as 'No.2-M'. Synonym for 'Sunny Knoll'.

Number 3. Kiyono Nursery Catalogue, 1941-1942 as 'No.3'. Synonym for **Tricolor.**

Number 4. Kiyono Nursery Catalogue, 1939~1940, p.25, as 'No.4'. Synonym for **Standard.**

Number 5. Kiyono Nursery Catalogue, 1939-1940, p.25, as 'No.5'. Synonym for **Cliveana.**

Number 6. *(C.sasanqua)*, Kiyono Nursery Catalogue, 1941-1942, p.31 as 'No.6': A very dwarf variety of *C.sasanqua* with narrow leaves and single, pink flowers. Growth low, bushy and very slow. Originated in USA.

Number 7. Fendig, 1949, *American Camellia Catalogue.* Synonym for **Daybreak.**

Number 8. Lindo Nursery Price List, 1941-1942 as 'No.8'. Synonym for **Number 8 Red.**

Number 8 Red. *(C.japonica)*, Lindo Nursery Price List, 1940-1941 as 'No.8 Red': Medium large, bright red, peony type. Originated in USA.

Number 10. *(C.japonica)*, Lindo Nursery Price List, 1941-1942 as 'No.10': Medium large, light pink, flecked deeper pink, peony type. Originated in USA. Sport: **Number 10 Variegated.**

Number 10 Variegated. *(C.japonica)*, Lindo Nursery Price List, 1940-1941 as 'No.10 Var.': Light pink and white. A variegated form of **Number 10.** Originated in USA.

Number 11. *(C.japonica)*, Lindo Nursury Price List, 1940-1941 as 'No.11': Peony type. Medium pink flecked with deep pink. Medium large. Originated in USA. Sport: **Number 11 Variegated.**

Number 11 Variegated. *(C.japonica),* Lindo Nursery Price List, 1940-1941 as 'No.11 Var.'- A virus variegated form of **Number 11** - Pink blotched with white. Originated in USA.

Number 14B. Blackwell Nursery Catalogue, 1947-1948, p.12 as 'No.14B'. Synonym for 'Hatsut-sura'.

Number 18. Malbis Nursery Catalogue, 1938-1939 as '#18'. Synonym for 'Crimson Robe'. (**Dataohong**).

Number 21. *(C.japonica),* Williams & Thompson, 1952, *American Camellia Yearbook*, p.7: A 12.5 cm diameter, light pink, semi-double to incomplete double; a shade lighter than **Virgin's Blush.** Large petals of good texture with a few stamens intermixed. Blooms mid-season to late. Originated by Mr Uyematsu, California, USA.

Number 26. *(C.japonica),* Stowe, 1981, *American Camellia Yearbook*, p.281: A semi-double, solid white with yellow stamens. Resembles **Snowdrift;** 8 cm across x 3.7 cm deep. Originated by Filo Turner, Pensacola, Florida, USA.

Number 27. *(C.japonica),* Williams & Thompson. 1952, *American Camellia Yearbook*, p.8 as 'No.27': An early white, semi-double with a long flowering season. Its 12.5 cm blooms have some stamens intermixed and are 5 cm deep. Flowers early to late. Originated by Mr Uyematsu, California, USA.

Number 32 Middleton Place. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1944-1945 as 'No.32 Middleton Place'. No description. Originated in USA.

Number 33. *(C.japonica),* Stowe, 1951, *American Camellia Yearbook*, p.281: A large, pure pink, like Enrico Bettoni in formation and colour. Blooms early to mid-season. Originated by Filo Turner, Pensacola, Florida, USA.

Number 41. *(C.japonica),* Williams & Thompson, 1952, *American Camellia Yearbook*, p.8, as 'No.41': White, semi-double with 12.5 cm. diameter ring of guard petals standing horizontally from a large centre of folded petals and stamens. Originated in USA.

Number 44 Tea Gardens. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.44 Tea Gardens'. Synonym for **Prima Donna Variegated.**

Number 45 Tea Gardens. Magnolia Gardens and Nursery Catalogue, 1947-1948 as 'No.45 Tea Gardens'. Synonym for 'Glen 40', synonym for **Coquettii.**

Number 55. *(C.japonica),* Malbis Nursery Catalogue, 1939-1940: A variegated red and white peony form. Originated in USA.

Number 75. *(C.japonica),* Williams & Thompson, 1952, *American Camellia Yearbook*, p.8 as 'No.75': A white, semi-double; shaped like **Blush Hibiscus** but with more petals; the flower is 12.5 cm across x 7.5 cm deep. Some petals are folded and upright, some are pinecone type. There are a few stamens. Blooms mid-season to late. Originated in USA.

Number 77. *(C.japonica),* Carter, 1953, *American Camellia Yearbook*, p.73 as 'No.77': Larger in size and more radiant than **Mrs Charles Cobb** and more densely petalled. A seedling of 'Aspasia Macarthur'originated by E.H. Carter, Monterey Park, California, USA.

Number 88. Fruitland Nursery Catalogue, 1944-1945, p.27 as 'No.88'. Synonym for **Julia Dray-ton.**

Number 101. Bolens, Florist & Camellia Garden Catalogue, 1940. Synonym for **Lady MacKinnon.**

Number 103, Tea Garden. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.103 Tea Garden': Medium to large, semi-double. Originated at Magnolia Gardens, John's Island, South Carolina, USA.

Number 105. *(C.japonica),* Gerbings Azalea Gardens Catalogue, 1938-1939 as 'No.105': Large, loose, peony form, rosy red flowers, similar to a *C.reticulata*. Foliage dark green, curved; tall, upright growth. Late flowering. Originated in USA by G.G. Gerbing, Florida, USA.

Number 106. *(C.japonica),* Bolens, Florist and Camellia Garden Catalogue, 1940 as 'No.106': Large, semi-double to peony type, soft salmon pink. Originated in USA by Bolens.

Number 107 Tea Garden. Magnolia Gardens and Nursery Catalogue, 1943 as 'No.107 Tea Garden'. Synonym for **Zenith.**

Number 113. Gerbings Azalea Gardens Catalogue, 1941-1942 as 'No.113'. Synonym for **Grandiflora Rosea.**

Number 113 Tea Garden. Magnolia Gardens and Nursery Catalogue, 1942-1943. Synonym for **Grandiflora Rosea.**

Number 135. *(C.japonica),* Wine, 1965, *American Camellia Yearbook*, p.44: Large, white, semi-double. Early blooming. Originated by H. Shackelford, Albany, Georgia, USA.

Number 138 Tea Garden. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1943 as '#138 Tea Garden'. No description. Originated at Magnolia Gardens, St John's Island, South Carolina, USA.

Number 140. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Cardinal Richelieu.**

Number 141. Wight, 1940-1941, *Planter's Guide* as 'No.141'. Synonym for **Julia Drayton.**

Number 143. *(C.japonica),* Wine, 1956, *American Camellia Yearbook*, p.44 as 'No.143': Very big, red flower. One of the largest of Shackelford's introductions. Originated by Hugh Shackelford, Albany, Georgia, USA.

Number 144. *(C.japonica),* Wine, 1956, *American Camellia Yearbook*, p.44 as 'No.144': Big, dark red, complete double, irregular flowers similar to **Woodville Red.** Originated in USA by Hugh Shackelford, Albany, Georgia.

Number 147. *(C.japonica),* Wine, 1956, *American Camellia Yearbook*, p.44 as 'No.147': Large, blush pink flowers. Better than **Virgin's Blush.** Originated in USA by H. Shackelford, Albany, Georgia.

Number 153. *(C.japonica),* Wine, 1956, *American Camellia Yearbook*, p.44 as 'No.153': Extra large, pink, semi-double flowers, similar to **Elegans.** Originated in USA by H. Shackelford, Albany, Georgia.

Number 156. Lindo Nursery Price List, 1940 as 'No.156'. Synonym for **Robert Norton.**

Number 156 Overlook. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Robert Norton.**

Number 174. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No. 174'. Synonym for **Lady de Saumarez.**

Number 181 Tea Garden. *(C.japonica),* Magnolia Gardens and Nursery Catologue, 1943 as '#181 Tea Garden'. No description. Originated at Magnolia Gardens, John's Island, South Carolina, USA.

Number 200. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Daisy Banks.**

Number 234 Tea Garden. Fendig, 1953, *American Camellia Yearbook*. Synonym for **Bonfire.**

Number 240. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.240'. Synonym for **Cavalcade.**

Number 243. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.243'. Synonym for **Bonfire.**

Number 245. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.245', Synonym for **Rose Royale.**

Number 245 Tea Garden. Magnolia Gardens and Nursery Catalogue, 1953, as '#245 Tea Garden'. Synonym for **Rose Royale.**

Number 283 Tea Garden. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.283 Tea Garden'. Synonym for **Prima Donna.**

Number 340. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.340'. Synonym for **Modesty.**

Number 383. Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.283'. Synonym for **Diadem.**

Number 400 Middleton Gardens. *(C.japonica),* Fruitland Nursery Catalogue, 1947-1948, p.30 as '#400 Middleton Garden': A deep, rose-pink, medium large, semi-double to peony form. Originated in USA at Middleton Gardens. Synonym: 'Middleton Number 400'.

Number 454. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.454': Double, light pink with white markings. Originated in USA.

Number 583. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943 as 'No.583': No description. Imported from Japan. (Believed extinct.)

Number S-40. *(C.japonica),* Stowe, 1951, *American Camellia Yearbook,* p.283 as 'S-40': Incomplete double white, with stamens intermixed with centre petals, 6 cm across x 6 cm deep. Very early flowering, slow growth. Originated by J.L. Kahn, Pensacola, Florida, USA.

Number S-46. *(C.japonica),* Stowe, 1951, *American Camellia Yearbook*, p.283 as 'S-46': Irregular complete double of soft pink, 10 cm. across x 6 cm deep. Originated by J.L. Kahn, Pensacola, Florida.

Number T-42. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Rose Queen Variegated.**

Number T-53. Fendig, 1953, *American Camellia Catalogue.* Synonym for 'Prince Eugene Napoleon Variegated'.

Number T-55. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Finlandia Red.**

Number T-114. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Finlandia** as 'Bleichroeder Pink'.

Number T-161. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Scarlett O'Hara.**

Number T-167. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Goddess of Fire.**

Number T-196. Fendig, 1953, *American Camellia Catalogue.* Synonym for **John Barber.**

Numpha del Tubro. de Bisshop Nursery Catalogue, 1937. Orthographic error for **Ninfa del Tebro.**

Numphea Egiria. de Bisschop Nursery Catalogue, 1935, p.10. Orthographic error for **Ninfa Egeria.**

Nunahime. (Princess Nuna). *(C.vernalis). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.308 with colour photo; English translation p.216. Medium size, pale pink, sake cup-shaped single. Flowers early to mid-season. Leaves ovate, flat, somewhat large. Upright, vigorous growth. Profuse blooming. A new seedling of **Yamato-hime.** Originated and named by Tokuji Ôoka. From Niigata Prefecture.

Nuova di Genoa. Ambroise Verschaffelt, 1853, Supplement to Catalogue Général, p.10. Franchetti, 1855, *Collezione di Camelie*, p.48. Synonym for **Duchesse d'Orleans.**

Nuova di Genova. Fréderic Bournier, 1853, Catalogue del l'Etablissement Agraire-Botanique. Synonym for **Duchesse d'Orleans.**

Nuova Iride. *(C.japonica),* Luzzatti, 1851, *Collezione di Camelie*, p.29: Beautiful flower, perfectly imbricated, the petals of the circumference, light rose, striped a whitish rose shade. Fratelli Rovelli, 1852, Catalogue, p.20, as 'La Nuova Iride': Imbricated, outer row of petals deep pink, intermediate petals pale pink, centre slightly deeper pink. Originated in Italy. Orthographic variant: 'La Nuova Iride'.

Nuova Marie Theresa di Lucca ... *(C.japonica),* Stefano Pagliai Catalogue, 1867. A sport of **Maria Teresa di Lucca.** Originated in Italy.

Nuova Mazzeppa. *(C.japonica),* Stefano Pagliai Catalogue, 1867. No description. Originated in Italy. (Believed extinct.)

Nuova Tricolor di Genova. Stefano Pagliai Catalogue, 1867. Orthographic variant for **Tricolor Nuova di Genova.**

Nouvissima. Giacomelli Catalogue, 1847. Orthographic variant for **Novissima.**

Nuoweike. Shao, Taichong, 1992, *The Observations from the Camellia World*, No.305, p.75. Chinese synonym for the USA *C.japonica* **Leonora Novick.**

Nuregarasu. (Drenched Crow), *(C.sasanqua),* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13 as 'Nure-garasu': Dark, purplish red. Large semi-double with rounded petals. Originated in Japan.

Nure-tsubame. (Drenched Swallow), *(C.x williamsii),* ICS., 1990, *Japanese Camellia Cultivar List.* p.30: Medium size. pink, campanulate single. A seedling of *C.japonica* 'Ezo-nishiki' (**Tricolor**) x *C.saluenensis.* Originated in Niigata Prefecture, Japan. Named and released by Kaoru Hagiya in 1984.

Nutrata. *(C.japonica).* Loddiges Catalogue, 1844, p.7. No description. Robert Tyas, *Popular Flowers*, 1843, p.86. No description. Originated in England. (Believed extinct.)

Nutrata Waratah. Jacob Makoy et Cie Nursery Catalogue, 1839, p.16 as 'Nutrata War.'. Synonym for **Augusta Rubra Aurantiaca.**

Nutruta Warrata. Berlèse. 1840, *Monographie*, ed.2, p.191. Synonym for **Augusta Rubra Aurantiaca.**

Nutrutah Waratah. Charles van Geert Nursery Catalogue, 1845. Synonym for **Augusta Rubra Aurantiaca.**

Nuxiucai. (Girl Student). Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for the USA *C.japonica* **Coed.**

Nylan Fran. *(C.japonica), American Camellia Yearbook*, 1960. p.204. Reg. No.477: A 7 year old chance seedling that first bloomed 1958; originated by W.F. Hutcheson, Texarkana, Texas, USA. Plant growth is upright, open and medium with mid-green leaves, 8 cm long x 4.5 cm wide. The orchid pink, peony form flowers, 10-12 cm. across x 6 cm deep have 8-10 petals, 140-160 petaloids and stamens with dark gold anthers. A few petals are lightly tinted white. Early blooming.

Nymph. *(C.lutchuensis x C.japonica*), *New Zealand Camellia Bulletin*, 1982, vol.XII, No.5, p.7, Reg. No.174: Originated by Darcy O'Toole, Christchurch, New Zealand from a cross of *C.lutchuensis* x *C.japonica* **Helen Metson,** which first bloomed 1974. Growth is spreading, open and rapid. The light green leaves are 3 cm long. The miniature, semi-double flowers are 5.5 cm across x 1.5 cm deep with 18 petals and a few petaloids. Stamens are cream. Flower is pale pink, flushed ivory (RHS.CC.Red Group,49D). It flowers early to late and is very floriferous. It has light perfume.

Nymph Egeria. Paul, 1889, *Gardeners' Chronicle*, p.427. Synonym for **Ninfa Egeria.**

Nympha de Fiaes. *(C.japonica),* Loureiro Catalogue No.1, 1865, p.34, & No.9, 1872-1873, p.45: Irregular rose form, virginal white with carmine stripes. Originated in Portugal.

Nympha del Tebro. da Silva, 1880, *Forcing Varieties of Camellias in Oporto.* Orthographic variant for **Ninfa del Tebro.**

Nympha Egeria. Verlot, May,1868, *Revue Horticole*, p.176. Orthographic variant for **Ninfa Egeria.**

Nymphae Flora. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Nymphaeiflora.**

Nymphaeflora. Verschaffelt, 1848, *Nouvelle Iconographie*, Book IV, pl.IV. Orthographic error for **Nymphaeiflora.**

Nymphaeiflora. *(C.japonica),* van Houtte Catalogue, 1839, 1:6: No description. Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.10: Very regular and very double red with 6-7 rows of petals; each petal often embellished with a white stripe. Verschaffelt, 1848, *Nouvelle Iconographie*, Book IV, pl. IV as 'Nymphaeflora': The shrub is bushy with well furnished branches and ovate-oblong, acuminate leaves of deep, glossy green with a few veins and small notching towards the apex. The blossom is large, 9-10 cm across, open and convex; the petals of vivid cherry-red fading to pink, are regularly imbricated, rounded; those of the interior, slightly emarginate, but full and pointed. The flower remains a long time on the plant and acquires a blue tint as it ages. Orthographic error: 'Nymphae Flora', 'Nymphaeflora'.

Nyogo-ga-shima. (Women's Island), Seibundô Shinkôsha, 1979, *Senchinshû*, p.219. Synonym for **Shibenashi-wabisuke.**

Nywoods. *(C.sasanqua).* Macpenny of Bransgore Catalogue, 1992: Dark red, single flower. Fragrant. Orthographic error 'Mywoods'. Originated in the UK.

O.

O.C. Cotton. (*C.japonica*), SCCS., 1958, *Camellia Nomenclature*, p.66: Dark velvety red, medium to large semi-double with very large petals and a large crown of pink stamens and yellow anthers, containing 1-3 petaloids. Vigorous, upright growth. Originated in USA by R.B. Ching, McComb, Mississippi. Sport: **O.C. Cotton Variegated.**

O.C. Cotton Variegated. (*C.japonica*), SCCS., 1962, *Camellia Nomenclature*, p.80 as 'O.C. Cotton Var.': A virus variegated form of **O.C. Cotton** - Velvety red blotched white. Originated in USA.

O.D. Fisher. *(C.japonica)*, Mulligan, Brian, *Woody Plants at the University of Washington Arboretum*, 1977, p.33. Also *Inventory*, 1993, p.24. No description. Originated in USA.

O.K. Bowman. (*C.japonica*), Tammia Nursery Catalogue, 1958; Hillcrest Nursery Catalogue, 1958: Orange red to orange red blotched white. Medium large, semi-double to anemone form with white stamens. Medium, compact growth. Mid-season blooming. Originated in USA by Bowman. Orthographic error: 'O.K. Boman'. Synonym: 'O.K. Bowman Variegated'.

O.K. Bowman Variegated. Cannon, 1965, ASC., *The Camellia Journal*, vol.20, No.1 as 'O.K. Bowman Var'. Synonym for **O.K. Bowman.**

O.K. Bowmans 96. (*C.japonica*), Mark S. Cannon Scion Catalogue, 1962, p.8. Originated in USA. No valid listing located.

O Kuntze. *(C.sinensis).* ACS, *Yearbook* 2011, p.133. Yellow variegated leaves. Offered by Camellia Forest Nursey, Chapel Hill, N.C., USA.

Oasa. Hazlewood & Jessep, 1972, *Check List - Camellia Cultivars in Australian Nursery Catalogues.* Corruption of the Japanese name **Ô-aso.**

Ô-aso. (Great Mount Aso), (Higo), JCS., *Nomenclature List of Higo Camellia Varieties*, 1958: Single Higo of 8 petals, 12 cm across, crimson spots on pink ground, fading at petal margins; about 120 light pink, spreading stamens. Flowers mid-season. A sport of **Shintsukasa-nishiki.** See colour photos and description: Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.165, p.56; Hiratsuka, 1964 *Higo Camellia*, pl.1 & pp.14, 37; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.149, p.85; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.25, 203. Different readings: 'Ohaso', 'Dai-aso', 'Ooaso', 'Oaso'. Corruption of name: 'Oasa'. Originated in Kumamoto Prefecture, Japan.

Oak Leaf. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.97. A synonym for **Quercifolia.**

Obaya. *(C.sasanqua).* University of Washington Arboretum *Inventory*, 1993, p.24. No description. Collected in Japan and named in the USA.

Ôbeni. (Large Red), Izu-Oshima Hawaii Botanic Gardens, 1980 as 'Ohbeni'. Originated in Japan. Synonym for **Ô-kurenai.**

Ôbenikarako. (Large Red Anemone), (*C.japonica*), Wilmot, 1943, *Camellia Variety Classification Report*, p.12 as 'Obeni Karako'. No description. Originated in Japan.

Obliging. (*C.japonica*), *American Camellia Yearbook*, 1965, p.64, Reg. No.282: A 7 year old chance seedling, originated by J.S. Gilder, San Fernando, California, USA, that first flowered 1952. Plant growth is upright and medium with heavy texture, dark green leaves, 6 cm long x 4.5 cm wide. The flowers, 11 cm across x 5-7 cm deep, are white with pink flecks, and range in

form from that of **Debutante** to **Kamo-honnami.** The number of petals, 11-15 and petaloids, 0-100. Early flowering.

Oblio.(*C.japonica*), Stefano Pagliai Catalogue, 1867, p.72. No description. Originated in Rome Italy. (Believed extinct.)

Oblonga. Veschaffelt Catalogue, 1844-18458, p.27. Abbreviation for **Oblongo Decurrens.**

Oblonga Decurens. Luzzatti, 1851, *Collectione di Camelie*, p.29. Orthographic error for **Oblongo Decurrens.**

Oblonga Decurrens. van Houtte Catalogue, 1846-1847, 27:38. Orthographic error for **Oblongo Decurrens.**

Oblongo. Verschaffelt, 1844, Catalogue, No.50, p.22. Abbreviation for **Oblongo Decurrens.**

Oblongo Decurrens. (*C.japonica*), Arnaud Catalogue, 1839-1840. No description. Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*, vol.40, pp.131-132: Flower about 10 cm across, formal double, of a brilliant carmine, softening to rose at centre. Petals in 8-9 rows, broad, rounded, notched, veined, cupped, numerous; the 2-3 rows forming the centre, rose or pink, sometimes divided by lines of white. From Burnier & Grilli. Originated by Guicciardini according to van Houtte, 1846-1847, 27:28. Orthographic errors: 'Oblonga Decurens', 'Oblonga Decurrens', 'Oblunga', 'Oblunga Decurrens'. Abbreviations: 'Oblonga', 'Oblongo'. Synonym: 'Florentina'.

Oblunga. Prudente Besson & Figlio, 1878, Catalogue, p.42. Abbreviation and orthographic error for **Oblongo Decurrens.**

Oblunga Decurrens. Burdin Maggiore & Co, 1849-1850, Catalogue Général. Orthographic error for **Oblongo Decurrens.**

Oboko. (Innocent Maiden), (*C.japonica*), JCS., 1987, *Japan Camellia*, No.25, p.13 with colour photo: Dark red colour, single with overlapping, incurved petals. Small size with thickly growing, large stamen cluster, yellow anthers. Mid to late season blooming. Originated in Tabira-machi. Nagasaki Prefecture, Japan. Yokoyama & Kirino, 1989, *Nihon no Chinka.* p.173, colour photo and description: Small size, red, spherical single with 5-6 incurved, concave petals and central compact cluster of stamens with yellow anthers, flowers do not widely open until the last. Leaves deep shining green, ovate with tapering acute apices and shallowly serrate margins. Synonym: 'Tama-akane'. Found by Urata in 1981, named by Kajikawa.

Oboro. (Vagueness), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pale pink, medium sized, single, columnar central stamen cluster. Originated in Japan. (Believed extinct.)

Oboro-sôtan. ('Sôtan' in Hazy Moon). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.164 with colour photo; Small single, trumpet shape, pale pink bordered white. Flowers mid-season. Leaves ovate. A cross of **Sôtan** x **Tama-no-ura.** Released by Tokuji Ooka, Niigata Pref., Japan, in 2008.

Oborotsuki. Different reading for **Oborozuki.**

Oboroya. (Misty Valley), (*C.japonica*), Okumura, [about 1810], *Chinka Hin'i.* No description. Originated in Japan. (Believed extinct.)

Oborozuki. (Hazy Moon), (*C.japonica*), Sakuden, 1630, *Hyakuchinshû:* White, slightly shaded pinkish. Large anemone double. Different readings: 'Oborotsuki', 'Rôgetsu'. Originated in Japan. (Believed extinct.) Synonym: 'Owari-tsubaki'. See Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, pp.94, 95.

Oborozuki. *(C.japonica),* (Higo) *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.235 with colour photo; Medium size flat single, Pale pink, shading to white at the petal edges. Stamens ume-jin (apricot form), widely flared. Flowers mid-season. Leaves elliptic, medium size. Vigorous, spreading growth. A cross of **Mangetsu** x **Osaruku,** made by Tomoya Nishimura, Kumamoto Pref., Japan, and registered in 1999.

Oborozuki. (Hazy Moon), (*C.japonica*), Satomi, 1956, *Camellia Varieties in Japan*, p.10: Dull white with cream coloured stamens. Medium large single with round petals, frilled at the margins. Early to mid-season flowering. Different reading: Rôgetsu'. It is uncertain that this is a synonym for **Rôgetsu,** Tuyama, 1966, *Camellia Cultivars of Japan*, p.90.

Oborozukiyo. (Misty Moonlight Night), *(C.x vernalis*), Hakoda, JCS., 1987. *Tsubaki*, No.26, p.50; ICS., 1990, *Japanese Camellia Cultivar List*, p.41: Small size, single, colour white merging to red at petal margins. Blooms early to mid-season. Originated in Shizu'oka Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.321; English translation p.242. Leaves elliptic, medium size. Upright, vigorous growth. A mutation of **Gaisen,** raised in the Mikawa District. Found in 1970s, named by Fusako Yamasaki.

Ô-botan. (Large Peony), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pls. 351, 442: Large, crimson, peony form, incomplete double with a centre consisting of fascicles of stamens amongst the petals. Originated in Japan. (Believed extinct.)

Obscure. *Camellias*, Y.C. Shen, 2009, p.322 with colour photo of **Nodami-ushiro.** The caption records that the meaning of the valid name is obscure. It does not provide a synonym.

Ocean Springs. (*C.sasanqua*), Wilmot, 1945, *Camellia Variety Classification Report,* p.7. No description. SCCS., 1956, *The Camellia. Its Culture and Nomenclature*, p.101: White with wide red border. Medium sized single. Early flowering. Originated in USA by Bradford's Wayside Nursery, Ocean Springs, Mississippi. See black & white photo, p.319, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III.

Ocean Sunrise. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.174. Synonym for **Hinode-no-umi.**

Ochinta. (*C.japonica*), Henderson, E.G., Nursery Catalogue, 1867, p.33. No description. Origin unknown. (Believed extinct.)

Ô-chirimen. (Large Crêpe), (*C.japonica*), Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.15; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium size, red, single. Stamens a columnar cluster. Different reading: 'Daichirimen'. Originated in Japan. (Believed extinct.) See: JCS., 1983, *Tsubaki*, No.22, p.133 & ibid. 1969, No.7, p.24.

Ô-chirimen. (Large Crêpe), (*C.japonica*), Uekiya Seigorô, 1874, *Tsubaki Hyakuro no Zu*, vol. 1: Medium size, white, five petalled single, with a central stamen column, white filaments. Different reading: 'Daichirimen'. Originated in Japan. (Believed extinct.) See Kyôto Engei Kurabu, 1975, *Kyôto Engei*, No.73, p.20.

Ochraleuca. Johnson, 1847, *Dictionary of Modern Gardening*, p.115. Orthographic error for **Ochroleuca.**

Ochra-lutia. Rule Nursery Catalogue, 1862. Orthographic error for **Ochroleuca.**

Ochreleuca. Loddige Catalogue, 1836, p.25. Orthographic error for **Ochroleuca.**

Ochrolema. Valon, 1856, *Revue Horticole*, p.187. Orthographic error for **Ochroleuca.**

Ochroleua. Maupil & Figlio Catalogue, 1853-1854. Orthographic error for **Ochroleuca.**

Ochroleuca. (*C.japonica*), Berlèse, 1835, *Annales de la Société, d'Horticulture de Paris*, vol.16, p.33: Leaves 8 cm long x 5.4 cm wide, oval, acuminate, prominent venation, finely serrate, dark

green; buds oblong with yellowish scales; flower over 10 cm across, full, yellowish with a tint of rose in the yellow; petals in 5-6 rows, oval, obtuse, sometimes round. imbricated. numerous, reflexed, serried, regularly forming a flared out shape. This was one of the varieties brought from Japan to the Netherlands by von Siebold about 1830. Orthographic errors: 'Ochraleuca', 'Ochreleuca', 'Ochroleua', 'Ochra-luria', 'Ocroleuca', 'Ochroleuce', 'Oeroleuca'. Synonym: 'Giallo Bianca', 'Ochroleuca'(Sieboldii)

Ochroleuca (Sieboldii). Burdin Maggiore & Co. Catalogue, 1845-1846, p.42 as 'Ochroleuca' (Sieboldtii). Synonym for **Ochroleuca.**

Ochroleuce. Rollison Nursery Catalogue, 1871. Orthographic error for **Ochroleuca.**

Ocroleuca. Auguste van Geert, 1848, Catalogue, pp.20. Luzzatti, 1851, *Collezione di Camelie*, p.29. Orthographic error for **Ochroleuca.**

Ocranauta. (*C.japonica*), Fratelli Rovelli Catalogue, 1852, p.23. No description. Originated in Italy. (Believed extinct.)

Octave Bernier. Hazlewood & Jessep, 1972, *Check List - Camellia Cultivars in Australian Nursery Catalogues.* Orthographic error for **Octave Burnier.**

Octave Burnier. (*C.japonica*), Franchetti, 1855, *Collezione di Camelie*, p.48: Bright carmine with wide streaks or stripes of white. Imbricated. Verschaffelt, 1860, *Nouvelle Iconographie*, Book IV, pl.VI: Blossoms of largest size with numerous petals, perfectly imbricated, small, rounded at the circumference, oval towards the centre, a vivid crimson, becoming a distinct, bright pink on the edges and intersected by a pale pink band. Originated in Italy by Burnier. Orthographic error: 'Octave Bernier'.

Octavia. (*C.japonica*), Waterhouse, 1947, *Camellia Quest*, p.16. Camden Park seedling 66/52, originated by W. Macarthur, Camden Park, N.SW, Australia. No description. Never released for sale. (Believed obsolete).

October Affair. (*C.japonica*), *American Camellia Yearbook*, 1982, p.177, Reg. No.1776: (60AG18). A medium, light cream shading to deep pink on the edges, formal double *C.japonica* (**Berenice Boddy** x 'Yoheihaku'). Blooms early to mid-season. Originated by Dr Clifford Parks, North Carolina, USA. The 16 year old seedling first bloomed 1975. Flower size 8-10 cm across x 3.7 cm deep with 100 petals. Plant growth is upright and average with dark green leaves. Chinese synonym 'Shiyue Yunshi'.

October Delight. (*C.japonica*), *American Camellia Yearbook*, 1970, p.168, Reg. No.1098: A 10 year old chance seedling that first bloomed 1962; originated by G.C. Comstock, Beaumont, Texas, USA. Plant growth is upright, compact and medium with average size, dark green leaves. The peony form, 'Daikagura' type, bloom is Neyron Rose (RHS. HCC. 623) with yellow anthers and ivory filaments. It measures 11-12 cm across x 7-7.5 cm deep with 15-18 petals and 25 petaloids. Flowers early. SCCS., *Camellia Nomenclature*, 1974 says see **Marie Bracey.** Sport: **October Delight Variegated.**

October Delight Variegated. (*C.japonica*), Gentry, 1969, ACS., *The Camellia Journal*, vol.24, No.4 as 'October Delight Var.': A virus variegated form of **October Delight** - Neyron rose blotched white. Originated in USA. Note: If *Camellia Nomeclature* above is correct, this would be a synonym for **Marie Bracey Variegated.**

October Glory. (*C.japonica*), Hume, 1946, *Camellias in America*, p.336. No description. Originated in USA.

October Joy. (*C.japonica*), Gerbing's Azalea Gardens Catalogue, 1939-1940: This Camellia is a fast, tall grower with large, round dark green foliage. The flower is 8-10 cm across; a deep, wine red to blue red. It is in full bloom in October, hence its name (very early). The form of its flowers

varies from a loose peony form with stamens to semi-double. See black and white photo, p.266, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

October Magic. *(C.sasanqua)* ACS, *Yearbook* 2011, p.41 with colour photo. A seedling of **Stephanie Golden**, originated and patented by Bobby Green, Fairhope, Ala., USA.

October Magic Bride. *(C.sasanqua)* SCCS, *Nomenclature, Supplementary List*, 2014. Originated by Bobby Green, Green Nurseries, Fairhope, Ala., USA. Small to medium size, white loose peony flower. Dense, semi-dwarf, conical growth. Introduced 1999.

October Magic Dawn. *(C.sasanqua)* SCCS, *Nomenclature, Supplementary List*, 2014. Originated by Bobby Green, Green Nurseries, Fairhope, Ala., USA. Medium to large size, soft peach pink, rose form double to peony form. Dense, conical to pyramidal growth. Introduced 1999.

October Magic Inspiration. *(C.sasanqua).* ACS, *Yearbook* 2011, p.40. Originated, patented and trademarked by Bobby Green, Fairhope, Ala., USA. SCCS, *Nomenclature, Supplementary List*, 2014. White, with pnkish-violet edges. Medium size, peony form. Seedling of **Mine-no-yuki**, pollen pollen parent unknown. Introduced 1997.

October Magic Orchid. *(C.sasanqua)* SCCS, *Nomenclature, Supplementary List*, 2014. Originated by Bobby Green, Green Nurseries, Fairhope, Ala., USA. Varying tones of white and orchid pink. Small to medium size semidouble. Dense, semi-dwarf growth. Flowers early to late. Introduced 2000.

October Magic Rose. *(C.sasanqua),* SCCS, *Nomenclature Supplement,* 2014. Originated by Bobby Green, Green Nurseries, Fairhope Ala., USA. Small, coral red, peony form flower. Columnar growth. Introduced 1999. Introduced 1999.

October Magic Ruby. *(C.sasanqua),* SCCS, *Nomenclature Supplement,* 2014. Originated by Bobby Green, Green Nurseries, Fairhope Ala., USA. Small to medium, red single. Dense, semi-dwarf growth. Flowers early to late. Introduced 2002.

October Magic Snow. *(C.sasanqua),* SCCS, *Nomenclature Supplement,* 2014. Originated by Bobby Green, Green Nurseries, Fairhope Ala., USA. A seedling of **Mine-no-yuki,** pollen parent unknown. White, often edged in pink,and a pink cast appearing in the centre. Medium, rounded form. Introduced 1994.

October Morn. (*C.sasanqua*), SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Roseine purple. Large, semi-double. Originated in USA.

Oculus Solis. (*C.japonica*), Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani. No description. Verschaffelt Catalogue, 1846, p.57. No description. Ridolfi Catalogue, 1848, p.8: Large size, dark red with attractive cluster. Originated in Italy by Ridolfi, Florence.

Oculus Veneris. (*C.japonica*), Ridolfi, Florence Catalogue, 1848, p.8: Roseform, well imbricated double, rounded, vivid pink petals, all strongly striped with silvery white. Franchetti, 1855, *Collezione di Camelie*, p.49: Imbricated formal double, rounded petals, deep rose, all deeply netted with metallic white. Originated in Italy by Ridolfi, Florence.

Ôdaira-kaori. (Ôdaira's Fragrant), (*C.japonica*), Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.80 with illustration: Blush pink, heavily freckled and finely striped with red, semi-double, 11-12 broad petals, the outermost notched. Fragrant. Discovered by Ôdaira, Kazutoshi in Tôshima-ku, Tokyo ca.1960. Leaves broad-oval, apex acute, recurved, glossy, deep green, wavy, margins shallowly serrulate. For colour photos see: *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.412, p.199; Seibundô Shinkôsha, 1979, *Senchinshû*, p.26 & description, p.204; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.341. Originated in Kantô, Japan with a private family, named by Ôdaira, Kazutoshi. Synonym: 'Ôdaira's Fragrant`.

Ôdaira's Fragrant. Macoboy, 1981, *The Colour Dictionary of Camellias* as 'Odaira's Fragrant'. Synonym for **Ôdaira-kaori.**

Odalisca. (*C.japonica*), Medici Spada, 1858, *Delle nuova Camellie, che si vengono ottenendo dalle Semine Romane*, p.7: Similar to many carnations. Obtained from the seed of **Tricolor** by Sig. Delgrande, Rome, Italy. Flower medium size, of the form of **Alba Plena,** petals in 8 rows, but are somewhat smaller, white, lightly coloured with rose, and netted with vivid carmine and various shades of rose. Orthographic error: 'Odescalchi'.

Oden Pink. (*C.japonica*), Sewell & Parks, 1981, *American Camellia Yearbook*, p.130. No description. Originated in USA. No valid listing located.

Ode of Edgewood. (*C.japonica*), SCCS., 1968, *Camellia Nomenclature*, p.106: Bright red. Large, semi-double with wavy, crinkled petals. Medium, compact, upright growth. Blooms early to mid-season. Originated in USA by Major R.F. Hightower, Ocala, Florida.

Odero. (*C.japonica*), Del Lungo e Girardi, 1928, *Le Camelie*, p.149: A bicolour camellia. Flowers white, spotted red with the centre pink shaded white. Originated in Italy by Odero.

Odeviske. (*C.japonica*), Peer, 1956, *American Camellia Yearbook*, p.53. No description.

Odescalchi. Burdin Maggiore & Co. Catalogue, 1880-1881, p.74. Orthographic error for **Odalisca.**

Odin. Herbert, 1837, *Amaryllidaceae & Suppl.*, p.368. Synonym for **Conferta.**

Odoardo Sala. (*C.japonica*), Stefano Pagliai Catalogue, 1867, p.66. No description. Originated in Italy. (Believed extinct.)

Odonidea. (*C.japonica*), Trillon, Le Mans Nursery Catalogue, 1845, p.6. No description. Originated in Italy. (Believed extinct.)

Odor Viola. Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.10. Orthographic error for **Odorosa Viola.**

Odora. *Catalogus Horto Aksakoviana Coluntur*, 1860, p.26. Abbreviation for **Odorata.**

Odorata. Courtois, 1833, *Magazin d'Horticulture*, l[pt.D]311 as a synonym for **Myrtifolia.**

Odorata. (*C.japonica*), Jacob Makoy Nursery Catalogue, 1842, p.10. No description. Colla, 1843, *Camelliografia*, p.111: Flower of many petals, irregularly disposed in several rows, rounded-ovate, emarginate in the interior, with the exterior open; the centre petals in various pleats and folds, forming an irregular tuft with stamens intermixed, similar to **Pallade Maculata** with which it has much affinity, except for the foliage which is a little paler and narrower. The flower is of a somewhat dark red, large and without any spots and is regular and full. Obtained by the Banker Negri of Milan in 1839. The name is inaccurate as there is no discernable odor. Abbreviation: 'Odora'. Synonym: 'Odorata Vera'.

Odorata (Wisley). (*C.sasanqua*), Amsler, 1948, *American Camellia Yearbook*, p.11, invalidly as 'Odorata': During a visit to Wisley I met ... a *C.sasanqua* named 'Odorata' and its scent was stronger than any of my own plants. The flowers of this plant were typical of a single *C.sasanqua*, nearly 7.5 cm across, the 6 or 7 petals of warm pink at their edges fade away to a faint blush at the bases, and the centre of the flower is adorned by a bunch of maize-coloured stamens.

Odorata Hyacinthii. (*C.japonica*), Loudon, 1840, *The Gardeners' Magazine*, vol. 16, p.307 as a seedling raised by Sacco, Milan, Italy. No description. (Believed extinct.)

Odorata Nova. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic variant for **Odorata Novissima.**

Odorata Novissima. (*C.japonica*), van Houtte Catalogue, 1841, 7:14: Paeoniforme. Oudin Nursery Catalogue, 1844, p. 12: Beautiful form, white base striped carmine. Pleasing fragrance. Originated in Italy. Orthographic variant: 'Odorata Nova'.

Odorata Paver. (*C.japonica*), Burnier & Grilli Catalogue, 1846-1847. No description. Originated in Italy. (Believed extinct.)

Odorata Vera. Verschaffelt Catalogue, 1844-1845, p.27. Synonym for **Odorata.**

Odorata Viola. Verschaffelt Catalogue, 1844-1845, p.27. Synonym for **Odoroso Viola.**

Odorata Violacea. Loudon, 1840, *The Gardeners' Magazine*, vol.16, p.307 as a seedling of Sacco, Milan, Italy. No description. Synonym: 'Odorata Viola'. Synonym for **Odorosa Viola.**

Odoratissima. (*C.japonica*), Guilfoyle Nursery Catalogue, 1866, p.19: Rose-pink. Large, semi-double to open peony form. Upright growth. Slight fragrance. Mid-season to late blooming. Originated in Australia by M. Guilfoyle. Synonym: 'La Graciola'. Sport: **Leverton's.** See colour photos: ACRS., 1977, *Camellia News*, No.66, p.21; *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.121, p.62.

Odoratissima Variegated. Sharp, 1957, *Camellias Illustrated*, *p.* 150. as 'Odoratissima Var'. Synonym for **Leverton's.**

Odoriko. (Girl Dancer), (*C.rusticana*), JCS., 1973, *Tsubaki*, No.12, colour photo, 8, p.2, description, p.10: Silvery pink veined deeper, semi-double to incomplete double, 6-7 cm across, with 2 rows of exterior petals, 13 in number, large, deeply cleft, and a centre of smaller, irregular petals, some erect, others flared or folded with a few stamens intermixed. When semi-double, stamens are about 50, filaments short and yellow. Flowers early to mid-season. Leaves small, long-elliptic, light green, apex acuminate, Margins serrulate. Resembles **Senbazuru.** Originated in Araya Jôetsu City, Niigata-ken, Japan. Collected in 1960 and named 1971 by Hagiya & Ishizawa. See: Seibundô Shinkôsha, 1979, *Senchinshû*, pp.29, 205.

Odorasa. Francesco Peluso, 1855, *Annual di Agricoltura.* Orthographic error for 'Odorata', synonym for **Myrtifolia.**

Odorosa Viola. (*C.japonica*), Sacco, 1830-1833 according to Schiavone,1981, *Il Giardino nell Camelie*, pl.38. Synonym 'Odorata Violacea'. Orthographic error 'Odor Viola'. Originated in Italy. (Believed extinct.)

Oedipus. (*C.japonica*), Dodd, 1968, *Adventure in Camellia Seedlings*, p.10, colour photo: Large, deep scarlet, anemone form, incomplete double with a centre a compact mass of small petals, petaloids and stamens. A seedling of **Mrs Maddern Fiske,** originated by Richard Dodd, Marshallville, Georgia, USA.

Ôedo. Local name in Shikoku district as synonym for Tsuzure-nishiki. See Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.171.

Ô-enji. (Ô-en Temple), (*C.japonica*), Himuro, 1982, *Murasuzume:* Scarlet, veined dark red, large single. Originated in Kanagawa Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.43 with colour photo; English translation p.28. Trumpet shape, roundly edged petals, fragrant, medium size. Flowers mid-season to late. Leaves ovate, large, recurved. Somewhat dwarf. A chance seedling of unknown parentage. Originated by Teiji Himuro. Registered in 1993 to the Ministry of Agriculture and Fishery, No.3497.

Oeroleuca. de Jonghe, 1851, *Beknopte Handleiding tot het Kweeken von Camellias*, p.130. Orthographic error for **Ochroleuca.**

Ô-eyama. (Place Name), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Double, light red, large size. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.79. Originated in Japan. (Believed extinct.)

Ô-eyama. (Place Name), (*C.japonica*), JCS., 1973, *Camellia*, No.12, colour photo, p.1, description, p.9: Medium size, irregular peony form, 8-9 cm across, outer petals are slender and twisted, inner centre cluster reaches a height of 5 cm, red with white streaking. Flowers mid-season to late. Different reading 'Oheyama'. Originated in Japan by Nishimura Nobuo. Sport of **Oimatsu.**

Ofê-ria. (Ophelia from 'Hamlet'), (*C.japonica*), ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.18. No description. Originated in Japan. Different reading for 'Ophelia'. Synonym for **Ophelia.**

Ô-fuji. (Great Fuji), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Medium size, single, deep red with white spots, long flowering season. See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû.* No.5, p.78. Originated in Japan. Different readings: 'Ohfui', 'Ohuji'. (Believed extinct.)

Offing Wave. Hazlewood & Jessep. 1972, *Check List - Camellia Cultivars in Australian Nursery Cata*logues. Synonym for **Oki-no-nami.**

Ô-fukurin. Different reading for **Daifukurin.**

Ogami-no-aki. (Autumn in Ogami), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.30, colour photo and description: Small size, white, single, opening through a spherical form with a short stamen column and light yellow anthers. Flower has thick petals, hardy to frost. Leaves light green, broad-elliptic, apices tapering acute, margins serrulate. Blooms early to mid-season. Originated in the Toyama Prefecture, Japan. Named and released by Yasufumi Fukuda in 1980s.

Ogasawara. (Possibly a Personal Name), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.682; Hamamatsu, 1825, *Setsuyô Kikan*, vol.23: Small, white, single with red streaks. Cylindrical stamens. Originated in Japan. Ogasawara is the name of an island located in the south of Izu and also the name of a family of Daimyôs descended from the Emperor Seiwa.

Ogawa. (Personal Name), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.128: Medium size ivory white becoming flush pink at the petal base, with red stripes; incomplete double peony form, stamens mixed with centre petals. Originated in Japan. (Believed extinct.)

Ogawa-mishô Sono 1. (Ogawa Seedling No.1), (Wabisuke), Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû*, No.11, pp.92, 94, 95: Small size, crimson, campanulate single with 5 overlapping, reflexed petals and central column of pale yellow stamens, united for their lower half. Leaves dark green, elliptic, apices long-acuminate, margins serrate. A seedling of **Tarôkaja.** Originated in Japan.

Ogawa-mishô Sono 2. (Ogawa Seedling No.2), (Wabisuke). Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû*, No.11, pp.92, 94, 95: Small size, pale pink, wide campanulate single of 4-5 petals and a central column of pale yellow stamens, joined for their lower half. Leaves deep green, narrow-elliptic, apices long-acuminate, margins serrulate. A seedling of **Tarôkaja.** Originated in Japan.

Ogawa-wabisuke. (Ogawa's Wabisuke), (Wabisuke), Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû*, No.11, pp.87, 89, 91; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.147, colour photo and description: Small size, deep pink, opening through campanulate to saucer-shape single with 5 wide, emarginate, rounded, overlapping petals and a small central cylinder of yellow stamens. Leaves deep green, broad elliptic, acuminate apices and serrulate margins. Blooms early to mid-season. Originated by Ogawa in Izu Island, Tokyo, Japan. A natural seedling of **Funatsu.** Originated and released by Takeo Ogawa in 1980.

Ôgi-no-mine. (Fan Peak), (Higo), SCCS., 1984, *Camellia Nomenclature*, p.83 as 'Ogi-no-mine': Medium size, single white with flared stamens. Originated in Japan.

Ôgon. (Cold), (*C.sasanqua*), Nakamura, Tsuneo, 1963, *Garden Life. Nihon no Kaboku Sazanka*, 8. Variegated leaves. Originated in Japan.

Ôgon-no-tô. (Gold Pagoda), (*C.japonica*), Andoh, 1974, *Tsubaki Nyûnum*, p.4, colour photo 4 as 'Ohgon-no-toh': Large, white, anemone form with 6-7 large, guard petals, irregular in shape, opening flat, and a central boss of buttercup yellow petaloids with a few stamens. Leaves glossy mid-green, broad-oval, apex short acute, margins finely serrulate. Resembles 'Kikarako'. Originated in Chûbu, Japan. See colour photo, p.25, Seibundô Shinkôsha, 1979, *Senchinshû.* Thought to be sport of **Chûjôhaku.**

Ogurakasuri. (Splashed Ogura), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.239, 298 as 'Ogura-kasuri': Medium size, peony form, white with red markings. Originated in Japan. (Believed extinct.)

Ogurakasuri. (Splashed Ogura), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.448 as 'Ogura-kasuri': Large, red and white, rose form to formal double. Originated in Japan. (Believed extinct.)

Ogura-no-hana. (Flower of Ogura), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.340, colour photo and description: Medium size, white with red stripes and ticks and light pink at the base, semi-double with 2-3 rows of rounded, slightly emarginate petals and a centre of yellow stamens with a few small, erect petals. Leaves mid-green, ovate-elliptic, apices acute, margins serrulate. Blooms mid-season to late. Plant habit diminutive and bushy. Originated in the Toyama Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.49 with colour photo; English translation p.32. A chance seedling of **Ogura-no-sato**. Named and released by Mitsuroku Makino in 1980s. Orthographic error: 'Ogura-no-hara'.

Ogura-no-hara. ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.18. Orthographic error for **Ogura-no-hana.**

Ogura-no-sato. (Ogura Village), (*C.rusticana*), *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.231, p.111, description, p.325: Pale blush pink, small, single, 7 cm across 8-9 broad, emarginate petals and a spreading cluster of stamens, dull yellow anthers, light yellow filaments. The thick petals hold the flower shape. Leaves mid-green, broad-elliptic, apex acute, margins serrate. For colour photo see p.28. Seibundô Shinkôsha, 1979, *Senchinshû.* Originated in Nei-gun, Toyama Prefecture, Japan. Named and released by Shûhô Kirino in 1964.

Oguruma. (Little Cart), (*C.japonica*), Hamamatsu, 1825, *Setsuyô Kikan*, vol.23; *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.23: Medium size, dark crimson, single with thick, spreading stamen cluster with rare petaloids. Originated in Japan. (Believed extinct.)

Ogyla-ôba. Different reading for: **Ogyûde-ôba.**

Ogyûmurui-tsubaki. (Rare Camellia from Ogyû), (*C.japonica*), Hantei, Kinta, 1827, *Sômoku Kihin Kagami:* Variegated leaves with white spots and green freckles. Ogyû was a nurseryman specializing in plants with variegated leaves. Originated in Japan. (Believed extinct.)

Ogyûde-ôba. (Ogyû's Large Leaf), (*C.japonica*), Mizuno, 1829, *Sômoku Kinyôshû*, vol.5: Listed in the section on yellow variegated leaves. Originated in Japan. See Kyôto Engei Kurabu., 1966, *Tsubaki Tokushû*, No.7, p.166. (Believed extinct.)

Oh Boy. (*C.japonica*), *American Camellia Yearbook*, 1966, p.97, Reg. No.861: 13 year old chance seedling. Originated by J.F. Marscher, Beaumont, South Carolina, USA that first bloomed 1958. Plant growth is upright, compact and medium in rate with light green leaves, 10.5 cm long x 5.5 cm. wide. The formal double flower is 10.5 cm across x 4.5 cm deep with 102

petals; Its colour is a strong, purplish pink (5 RP 7/9), sometimes with cupped petals. Mid-season flowering.

Ohajiki. (Children's Marbles), (*C.rusticana*), Hagiya & Ishizawa, 1968, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.9, p.59, illustration (11), p.60: A small, 5-6 cm, across, light red, formal double with about 70 emarginate petals, tipped a deeper red. A similar form to **Matsukasa.** Leaves mid-green, lanceolate-elliptic, undulate; apex acuminate, margins average serrate. Plant habit bushy and tends to be short. Originated in Mitsuke City, Niigata-ken, Japan, where it was collected in 1960 by Susumu Ishizawa. Named and released by Kaoru Hagiya. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.205.

Ôhakuren. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, as 'Ô-hakuren'. Different reading for **Ô-shirahasu.**

Ohara. (Possibly a Personal name), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pale pink, double, opens flat. Originated in Japan. (Believed extinct.) This may be the same as **Kohara** in *Chinka Hin'i* (before 1810). Note: *Tsubaki Hachiboku Sanboku Meisai* (before 1868) reads this as **Kohara.** See JCS., 1969, *Tsubaki*, No.7, p.33 & ibid., 1982, No.21, p.106.

Oharame. (Hawking Woman of Ôhara), (*C.japonica*), Usami, Naohachi, (ca.1910), *Nagoya Chinzu'e:* Medium size, white, double. See Kyôto Engei Kurabu, 1965, *Tsubaki Tokushû*, No.6, p.127; Ishi'i, 1932, *Genshoku Engei Shokubutsu*, according to Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.150. No description. Originated in Japan. Ôhara is the northern, rural part of Kyôto. Note: Oharame is a female pedlar from Ôhara, North Kyôto, who carried firewood or flowers on her head.

Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû*, p.150. Orthographic error for **Oharame.**

Ôhara-no-sato. (Ôhara Village), (*C.japonica*), Seibundô Shinkôsha,1979, *Senchinshû*, p.204: Peach pink, small, single of sake cup shape; 5 petals emarginate, some reflexed. Wabisuke style with central stamen cluster and pistil. Blooms mid-season. Leaves, small, long-oval, thin, undulate, mid-green; petioles hairy. The flower type is similar to Wabisuke. It has abundant blossoms but the branches are slender. See p.126, Yokoyama & Kirino, 1989, *Nihon no Chinka.* A selection from wild camellias from Ôhara-chô, Chiba Prefecture, Japan. Released by Noboru Nagahama. Very fragrant.

Ôhara-wabishin. (Ôhara Infertile Stamens), (Wabisuke), Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû*, No.11, pp.107, 109, 110, botanical drawings, colour photo and description: Small size, red, campanulate single with 5 incurved petals and a small, pale yellow column of infertile stamens, joined for the lower half. Leaves bright green, elliptic. Originated in Izumi-gun, Ôhara-chô, Chiba Prefecture, Japan.

Ohasa. Cannon, 1975, ACS., *The Camellia Journal*, vol.30. Corruption of the Japanese name **Ô-aso.**

Ô-hime. (Elder Princess), (C.*hybrid*), Hagiya, 1986, *Studies in Interspecific Hybridization of Camellias*, No.2, p.13, colour photo 28, p.12: A seedling of *C.japonica* **Tamagasumi** x *C.hybrid* **Dream**

Girl, that first flowered 1981. Originated by Kaoru Hagiya, Niigata University, Japan. Base colour is whitish with wisteria, light peach pink dominating. A semi-double of 10 overlapping petals: size 8-9 cm across. Petals large, rounded, emarginate, wavy; stamens about 40, filaments white, anthers yellow-brown, some changed to petaloids. Ovary densely tomentose. Flowers mid-season to late. Leaves wide-oval, margins sharply serrate, mid-green.

Ohinasama. (Dolls displayed on the Girls Festival Day) *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.81 with colour photo; A chance seedling, selected and named by T. Kunitake, Kurume, Japan in 1995. Small, peach pink, sake cup-shaped single. Short stamen cluster with yellow filaments. Growth vigorous and upright, heavily branched. Leaves small, elliptic. Flowers early to mid-season.

Ôhi-no-akebono. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.150 as 'Ô-hino-akebono'. Different reading for 'Dainichi-no-akebono'. See Kyôto Engei Kurabu, 1967, *Tsubaki Tokushû*, No.8, p.31.

Ôhi-no-de. (Appearance of a Great Day), (*C.japonica*), Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.60 as 'Ô-hinode'. No description. Originated in Japan.

Ohio. (*C.japonica*), Hogg, 1838, *Magazine of Horticulture*, 4:155. No description. Originated by Michael Floy, New York, USA. (Believed extinct.)

Ohioensis. (*C.japonica*), van Houtte Catalogue, 1841, 7:14: Exterior petals blood red, often streaked with white, pleasantly apart from petals of very pale salmon pink. Berlèse, 1845, *Monographie*, ed.3, p.316: Full, roseform, orange red streaked with white, with some petals of soft, clear orange red, sometimes in place of the white streaks, solid red. Orthographic errors: 'Ohionensis', 'Ohoiensis', 'Ohjoensis'.

Ô-i. (Great Boar), (*C.japonica*). Itô, Ihei. 1695. *Kadan Chikinshû*, #142: Medium size, eight-fold, white flower mixed with spots. Convex in shape. Originated in Japan. Different readings: 'Dai-i', 'Ô-inoshishi'. (Believed extinct.)

Oibane. (Battledore – Japanese Badminton type sport). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.220 with colour photo; Small, deep red single with channeled petals and tubular stamens. Flowers early. Leaves narrow-elliptic, medium size. Spreading growth. A cross between wild japonicas, originated, named and released by Shinichi Noguchi, Tokyo, Japan.

Oikasamatsu. (Old Spreading Pine Tree). (*C.rusticana).* Tuyama, 1968, *Camellias of Japan*, pl.234, p.118 description. p.160: Leaves broad-oblong to broad-elliptic, apex shortly acuminate. glossy light green, impressed venation, margins minutely denticulate; 6.1-7.7 cm long x 2.7-3.3 cm wide; petioles 4-5 mm long. copiously hairy. Flowers peony form, rose (China Rose 024/1), long stamens prominent amongst inner petals, 35-55, emarginate with the inner irregular. Stamens up to 2.3 cm long in 2-3 concentric circles, filaments pinkish yellow with a few petaloids. Late flowering. Originated in Himi City, Toyama Prefecture, Japan.

Oikaze. (Fair Wind), (*C.sasanqua*), Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.16: Very large, white, fine red speckles. Originated in Japan. (Believed extinct.)

Oimatsu. (Old Pine), (*C.japonica*), Yashiro, 1841, *Kokon Yôrankô*, vol.308. (Ichijima reprint, 1906). Description not seen. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Cardinal red with white spots, spherical shaped semi-double with 2-3 rows of petals, medium size, cylindrical stamens of good shape; Itô, Ko'emon, 1879, *Chinkashû:* Cardinal red mottled white, semi-double with irregular, fluted petals, medium size. Slow, spreading, bushy growth. Leaves deep green, elliptic, apex acuminate, margins finely serrulate. Blooms early to mid-season. Originated in Japan. See colour photos: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.147; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.260, description, p.329; Seibundô Shinkôsha, 1979. *Senchinshû*, p.24, description, p.203. Sports: **Matsuga-e, Matsu-no-yuki, Ô-eyama, Oimatsufu.**

Oimatsufu. (Old Pine Variegated), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki*, in section 'variegated leaves'. No description. Itô, Ko'emon, 1879, *Chinkashû:* 'Oimatsu' with variegated leaves. Different readings: 'Oimatsu-hu', 'Oimatsumadara'. (Believed extinct.) Synonym: 'Oimatsu-shibori'. See JCS., 1969, *Tsubaki:*, No. 7, p.37.

Oimatsu-hu. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.60, as 'Oi-matsu-hu'. Different reading for **Oimatsufu.**

Oimatsu-kasa. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki*, *Tokushû*, No.10, p.152. Orthographic error for **Oikasamatsu.**

Oimatsu-madara. Fendig, 1953, *American Camellia Catalogue.* Different reading for **Oimatsufu.**

Oimatsu-saki. Fendig, 1953, *American Camellia Catalogue.* Different reading for **Oimatsuzaki.**

Oimatsu-shibori. Katayama, 1960, *Tsubaki Ochabana;* Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.60. Synonym for **Oimatsufu.**

Oimatsuzaki. (Old Pine Form), (*C.japonica*), Itô, Ko'emon, 1879, *Chinkashû:* Cardinal red blotched white, medium size, single. Blooms early to mid-season. Originated in Japan. Different reading: 'Oimatsu-saki'.

Oi-nami. (Old and Wrinkled), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium sized single, pale pink variegated light red, columnar stamen column. Different reading: 'Oi-no-nami'. Originated in Japan.

Oi-no-mezame. (Awakening at an Old Age). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.43 with colour photo; English translation p.28. Small, pink, tubular single with cylindrical stamens. Flowers early to mid-season. Leaves elliptic, medium size. Somewhat upright, vigorous growth. A chance seedling originated and released by Shunsuke Hisatomi in 1994. From Kurume.

Oi-no-nami. *Tsubaki Hachiboku Sanboku Tsuki Meisai*, (before 1868), JCS., 1982, *Tsubaki*, No.21, p.100. Different reading for **Oi-nami.**

Ô-inoshishi. Different reading for **Ô-i.**

Oiran. *(C.reticulata* .hybrid*). Latest Illustrated Book of Japanese Camellias, (Camellias of Japan)*, 2010, p.281 with colour photo; Large, bright pink, peony to formal double with rather crimped and wavy edged petals. Flowers early to mid-season. Leaves elliptic, medium size. Upright growth. A cross of **Flower Girl** x **Silver Ruffles,** named by Kazuo Yoshikawa in 1990s.

Ô-isahaya. (Big Isahaya), (*C.japonica*), Mizuno, 1681, *Kadan Kômoku; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.154: Large sized single, 6-7 petals, crimson with moiring and flakes of white. Central stamen column, white filaments with light yellow anthers. Originated in Japan. Resembles: **Hakkan, Norikoboshi.** Some believe **Hakkan** is a synonym for **Ô-isahaya,** but this is not confirmed. 'Isahaya' is a place name in Nagasaki Prefecture, Japan. Note: The

Chinka Zufu of Watanabe 1969, has illustrations of 4 different camellias of this name. See: JCS., 1965, *Tsubaki*, No.5, p.28. (Believed extinct.)

Ô-isahaya. (Big Isahaya), (*C.sasanqua*), Itô, Ihei, 1695, *Kadan Chikinshô:* Red with white spots, single with widely spread petals, in the section sasanqua; Satomi, 1958, *Nomenclature List of Sasaqua of Japan*, p.13: Satomi says in correspondence: 'Isahaya' is a place name. Single, deep red mottled largely white. There are 4 Camellias named **Ô-isahaya.** These are different from each other in their appearance. It is not known if they are forms of the same variety or not. (Believed extinct.)

Ô-isahaya. (Big Isahaya), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.310: Large single of deep crimson with large, rounded, notched petals, blotched white and prominent central group of stamens with gold anthers and light yellow filaments. Originated in Japan. (Believed extinct.)

Ô-isahaya. (Big Isahaya), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.380: Large single white with feathers of crimson on the petals which have irregular, somewhat frilly margins. Central stamen column with yellow anthers and creamy filaments. Originated in Japan. (Believed extinct.)

Ô-isahaya. (Big Isahaya), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.690: Largest of all this group. A deep crimson single with white spots. The petals are irregular in size and waved and twisted. Central stamen column, compact with yellow anthers and filaments running from yellow at the top to white at the base. Originated in Japan. (Believed extinct.)

Ô-iso. (Place name), (*C.sasanqua*), Itô, Jukyû, 1839, *Honzô Hanamaki'e*, vol.16: Small size, single, white. Originated in Japan. (Believed extinct.)

Oitani-no-yabutsubaki. (Wild Camellia of Oitani), (*C.japonica*), JCS., 1972, *Encyclopedia of Camellias in Colour*, vol.I, p.30: This name was attached to a particular camellia tree in Ôitani, Himi-shi, Toyama Prefecture: Medium size, red flower. The tree is one of the biggest and oldest camellia trees in Japan, more than 700 years old and designated a national monument.

Ôiwa-fudô. (Ôiwa's Steadfast), (*C.japonica*), *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.32, p.48, description, p.296: Small scarlet, single, 5-6 cm across with 5 petals, opens cup-shaped, oval, with a small, compact centre of large yellow anthers or small, cream petaloids on red filaments. Leaves, dark glossy green, lanceolate to broad-lanceolate; apex acuminate, recurved, shallowly serrate, petioles hirsute. For colour photos see: Seibundô Shinkôsha, 1979, *Senchinshû*, p.25 & description, p.201. Originated in Kami'ichi-chô, Toyama Prefecture, Japan. 'Ôiwa' is the place name in Kami'ichi-chô where this cultivar originated. Named and released by Minoru Takeuchi in 1970.

Oiwake. (Forked Road), (*C.sasanqua*), Itô, Ihei, 1695, *Kadan Chikinshô* Large size, red, semidouble. Originated in Japan. (Believed extinct.)

Ojina-koroma. SCCS., 1947, *The Camellia. Its Culture and Nomenclature.* Corruption of the Japanese name **Okinagoromo.**

Ôjishi. (Great Lion), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Synonym for 'Myôki-in'. The Kanji characters for this name are written in two ways in Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.79. (Believed extinct.)

Okabe. (Meaning obscure. Probably a personal name). (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.405; Hamamatsu, 1825, *Setsuyô Kikan*, vol.23: Small, campanulate single white of 5 petals with some red markings. Originated in Japan. (Believed extinct.)

Okada-sarasa-hukurin. Different reading 'Okadade-sarasa-fukurin'. See: Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7,.1976. Synonym for **Sarasa-fukurin-tsubaki** in the *Sômoku Kihin Kagami*, 1827.

Okadade-sarasa-fukurin. (Okada's Margined Chintz), (*C.japonica).* Mizuno, 1829, *Sômoku Kinyôshû*, in the section on dotted leaves. Originated in Japan. Different reading; 'Okadade-sarasa-hukurin'. (Believed extinct.)

Ôkagura. (Great Shinto Dance), (*C.japonica*), Shirai-Bunko, 1789. *Shoshiki Hanagatachô.* Real red, double, peony form, large size, early flowering. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.80. Resembles **Daikagura.** Originated in Japan. (Believed extinct.)

Okamura. (Personal Name). (*C.japonica*), Watanabe, 1960, Kyôto Engei Kurabu *Tsubaki Tokushû*, No.1, p.61. Description not seen. Originated in Japan.

Ôkan. (Diadem), (Higo). JCS.. 1982, *Tsubaki*, No.21, colour photo on cover, description, p.1: Large size, single. white with crimson edging to petals. Stamens in a large, spreading cluster, gold anthers. yellow filaments. Mid-season blooming. Originated in Kumamoto Prefecture, Japan. See colour photo p.274, Yokoyama & Kirino. 1989. *Nihon no Chinka.* A sport of **Yamato-nishiki** (Higo). Sports to **Kyokkô-kan.** Different reading: 'Ohkan', 'Oukan'. Corruption of name: 'Wokan'. Chinese synonym 'Wangguan'.

Ôkan-nishiki. (Diadem Brocade), (*C.japonica*), Satô,1975, *Chûbu no Tsubaki*, p.49: Medium size, white with crimson stripes, semi-double. 15 petals, large, emarginate, overlapping in two rows, incurved cup-shape. Stamens in a cylinder, about 70, anthers yellow, filaments pale yellow. Leaves bright glossy green, elliptic, apex acute, base cuneate, margins finely serrulate. A chance seedling of **Esugata,** recognised by Chûbu Camellia Society in 1956, named by Minoru Satô. From Aichi Prefecture.

Ôkan-nishiki. (Diadem Brocade), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, colour photo, p.25, description, p.203: Flower blush pink. occasionally with crimson stripes, semi-double to peony form, in some cases, with divided stamens. Originated in the Chûbu area, Japan. Resembles Satô's **Ôkan-nishiki**, but said to be distinct.

Ôkappa. (Large Water Imp), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.173 as 'Ô-kappa': Large, white, rose form double to peony form, incomplete double with divided stamens with white filaments. Originated in Japan. (Believed extinct.)

Ôkappa. (Large Water Imp), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1968, pl.394 as 'Ô-kappa': Medium sized, white, semi-double with large, emarginate petals and divided stamen cluster with gold anthers and white filaments. Originated in Japan. (Believed extinct.)

Ô-karako. (Large Anemone), (*C.japonica*), Minagawa, 1933, *Chinkashû:* Medium size, 8 cm across, red, anemone form with about 12 wide spread guard petals and compact centre of folded petaloids. Leaves lanceolate, dull green, apex acuminate, raised venation, margins serrulate. Originated in Japan. It is a solid colour sport of **Kyôkarako** and sports itself to **Ôkarako-shibori** and is similar to **Kôjishi.** Synonym: 'Ôbenikarako'. Different readings: 'Daikarako', 'Ohkarako', 'Oo-karako'. See colour illustration, pl.36, p.68, Tuyama, 1966, *Camellia Cultivars of Japan* as 'Ookarako' and pl.367, *Encyclopedia of Camellias in Colour,* vol.1, 1972, p.157 & p.346, description, as 'Ô-karako'. Resembles: **Shûhô-karako.**

Ôkarako-shibori. (Large Anemone Dappled), (*C.japonica*), Yokoyama. 1975, *Gendai Tsubaki Meikan*, p.79, illustration and description: A virus variegated form of **Ô-karako** - A large petaloid centered, anemone form red, with white blotches. Large rounded, emarginate, overlapping outer petals, 12 in number, surrounding a central boss of petaloids. Leaves are the same as **Ô-karako.** Originated in Kantô, Japan. Synonym: 'Shibori-ôkarako'. See colour photo, p.69, Seibundô Shinkôsha, 1979, *Senchinshû*, as 'Shibori-ôkarako'.

Ô-kasuri. (Large Bordered), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.477 as 'Ôkasuri': Medium size, white, single with red streaks and a large, prominent stamen cluster. Originated in Japan. Different readings: 'Ô-tobiiri', 'Oh-tobiiri'. (Believed extinct.)

Okesa-bayashi. (Music on Sado Island), (*C.japonica*), *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.446, p.176, description, p.263: Large size, dark red, peony form, incomplete double, 12 cm across with 2-3 rows of large, emarginate petals surrounding a centre of smaller, twisted, erect petals mixed with stamens. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.28, colour photo, p.204 description. Originated in Sado Island, Niigata. Prefecture, Japan. Named and released by Tokuji Ôoka in 1970.

Okesa-nishiki. (Okesa Brocade), (*C.rusticana*), Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, p.127, pl.327: Medium size, double, light pink with small red streaks. Originated in Japan. Synonym for **Shima-no-nishiki**. See: Seibundô Shinkôsha, 1979, *Senchinshû*, p.220.

Oketuck. (*C.japonica*), Dodd, 1968, *Adventure in Camellia Seedlings*, p.8, colour photo: Medium size, light red, irregular, open anemone form, incomplete double with a centre of small, irregular, strap-like petals and petaloids mixed with stamens. A seedling of **Laura Walker,** originated by Richard Dodd, Marshallville, Georgia, USA.

Oki No Numi. *Collins Complete Book of House Plants*, 1991, p.98. Corruption of Japanese name **Oki-no-nami.**

Okide-hukurin. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.152. Different reading for **Okide-fukurin.**

Okide-fukurin. (Oki's Margined), (*C.japonica*), Mizuno, 1829, *Sômoku Kinyôshû:* A small pink single in the section on margined leaves. Originated in Japan. Different reading: 'Okide-hukurin'. See: Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.168. (Believed extinct.)

Okifukurin. Different reading for **Okide-fukurin.**

Okina. (Venerable Old Man), (*C.japonica*), Usami, Naohachi, (ca.1910), *Nagoya Chinzu'e:* White, single, medium size, cylindrical stamns. See: Kyôto Engei Kurabu, 1965, *Tsubaki Tokushû*, No.6, p.127. Williams & Thompson, 1950. *American Camellia Yearbook*, p.40. No description. Originated in Japan.

Okinagoromo. (Old Man's Coat), (*C.sasanqua*), Ashizawa, Yagorô, 1898, *Chabaika Taishû;* Leaves edged greyish yellow. A sport of Omigoromo. Wada, 1941, *Garden Treasures of Japan*, p.31 as 'Okinagoroma': White flushed rose, medium size. White edged leaves. Originated in Japan by Minagawa. See black and white photo, p.320, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III. Different reading: 'Okina-koromo'. Corruptions of Japanese name: 'Ojina-koroma', 'Ogina Koroma', 'Oking-Goroma'.

Okinakagura. (Old Man's Shinto Dance), (*C.japonica*), The Nihon Shokubutsu Kaisha Ltd., Catalogue, 1912-1913, p.27 as 'Okino-kagura': Pure white. Originated in Japan.

Okina-koromo. SCCS., 1958, *Camellia Nomenclature*, p.95. Different reading for **Okinagoromo.**

Okinasajiki. (Old Man's Gallery), (*C.japonica*), Cho, [before 1867], *Chinkafu*, illustr. (p.24-25). Description not seen. Originated in Japan. (Believed extinct).

Okinasarasa. (Old Man's Chintz), (*C.japonica*), Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.15: Large semidouble, red streaks on white ground with central bamboo-like stamens. Originated in Japan. See: JCS.. 1983, *Tsubaki*, No.22. p. 125. (Believed extinct.)

Okinasarasa. (Old Man's Chintz), (*C.japonica).* Kasuya, Kamegorô,1859, *Tsubaki Irohanayose Irotsuki:* White with red spots and streaks in various forms, semi-double with 3 rows of petals, large size. central cylinder of stamens. See: ICS., 1969, *Tsubaki*, No.7. p.24. Uekiya, Seigorô, 1874,

Tsubaki, Hyakuro no Zu, vol.I; Itô, Ko'emon, 1879. *Chinkashû:* White streaked red, incomplete double, large, irregular, open peony form. Late flowering. Leaves elliptic, curved outwards, clear venation. Originated in Kantô, Japan. Different reading: 'Okina-zarasa'. Corruption of name: 'Okinasasesa'. See: Tuyama, 1966. *Camellia Cultivars of Japan*, p.356 as 'Okona-zarasa'; *Encyclopedia of Camellias in Colour*, vol.I, p.364; ibid., vol.II, 1978, pl.407, p.164; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.27, 204. Resembles **Kikusarasa.**

Okina-zarasa. Tuyama, 1966, *Camellia Cultivars of Japan*, pl.202, p.356. Different reading for **Okinasarasa.**

Okinasasesa. Tokio Nurseries Catalogue. 1896. Coruption of name **Okinasarasa.**

Okina-shibori. (Old Man Variegated), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Light red, with streaks. cup-shaped single. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû.* No.5. p.78. Yashiro, 1841, *Kokon Yôrankô*, vol.311; (Ichijima reprint 1906). Originated in Japan. (Believed extinct.)

Okinawa-sazanka. Japanese group name for *Camellia miyagii.*

Oki-no-asahi. (Morning Sun in the Offing), (*C.japonica*), Katayama, Sadayuki, 1960, Juraku-en Nursery, *Tsubaki Ochabana:* Pink, medium size, full double, petals incurved cup-shape. See: *Encyclopedia of Camellias in Colour*, vol.I, 1972. pl.434, pp.179, 356; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.27, 204: Light pink. open peony, incomplete double with a fine peppering and flecking of deep pink. Originated in Kansai area, Japan. Nippon Tsubaki - Sasanqua Meikan, 1998, p.48 with colour photo; English translation p.31. Listed in the catalogue of Katayama Juaku'en Nursery in 1960.

Oki-no-ishi. (Rocks in the Offing), (*C.japonica*), Kasuya. Kamegorô, 1859. *Tsubaki Irohanayose Irotsuki:* Snow white. double with round petals, cylindrical stamens in good shape. *Tsubaki Hachiboku Sanbokutsuki Nayose Hanagata Irotsuki Meisai*, [before 1868]. Originated in Japan. See: JCS., 1969, *Tsubaki.* No.7. p.25 & ibid., No.21, p.102. (Believed extinct.)

Oki-no-ishi. (Rocks in the Offing), (*C.japonica*), Itô, Ko'emon, 1879, *Chinkashû:* White striped deep pink, semi-double, large, 10 cm. across with 16-18 petals in 3-4 rows and a small cylindrical to somewhat irregular stamen cluster. Leaves dark green, flat, lanceolate to long-ovate, apex long-acute to caudate, bluntly, finely serrulate. Originated in Japan. Corruption of the Japanese name: 'Oki-no-ise'. Synonym: 'Oki-no-ishi-Tokyo'. For colour photos & descriptions see: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.177 & p.308; Satô, 1975, *Chûbu no Tsubaki*, p.99; *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.409; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.27, 204. A posible sport of the former **Oki-no-ishi.**

Oki-no-ishi-Takarazuka. (Oki-no-ishi' from Takarazuka), (*C.rusticana*), Tuyama, 1968, *Camellias of Japan*, pl.353, p.179, description, p.195: Leaves rhombeo-elliptic to broad-elliptic, grossly serrate, undulate; petioles very hairy. Flowers semi-double, white striped red. Late flowering. Originated from the Aichi Prefecture, Japan.

Oki-no-ishi-Tokyo. Tuyama, 1968, *Camellias of Japan*, *p*.195. Synonym for **Oki-no-ishi.**

Oki-no-ise. Wada, 1941, *Japanese Garden Treasures*, p.30. Corruption of name **Oki-no-ishi.**

Oki-no-nami. (Waves in the Offing), (*C.japonica*), Itô, Ihei, 1710, *Zôho Chikinshô;* Itô, Jukyû, 1739. *Honzô Hanamaki'e*; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* Itô, Ko'emon, 1879, *Chinkashû:* Light pink, striped deeper pink. double. A semi-double, 9-10 cm across, of 14-16 petals in 3 rows, the light pink background covered with deeper pink. fine veining and fading to white at petal margins with random streaks of crimson. Blooms mid-season. Sports: **Moshio, Tsurikagari, Ama-obune.** Synonyms: 'Oki-no-nami-tsubaki', 'Oki-no-nami'(2). Different reading: 'Okinonami'. See: Tuyama, 1966, *Camellia Cultivars of Japan*, pl. 16 & p.34; Adachi. 1960. *Camellia. Its Appreciation and Artistic...*, p.100; Andoh, 1971, *Tsubaki*,

Meika no Shôkai to Saibai, pl.131, p.44; *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.357, p.153 & p.344; Satô, 1975, *Chûbu no Tsubaki*, p.103; Macoboy, 1980. *The Colour Dictionary of Camellias*, p.108; Seibundô Shinkôsha. 1979. *Senchinshû*, pp.28, 204. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.348. Originated in Kantô area. Japan. Chinese synonym: 'Chonglang' later amended to 'Chongzhilang'.

Oki-no-nami-tsubaki. Synonym for **Oki-no-nami.**

Oki-no-nami (l). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Moshio.**

Oki-no-nami (2). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Oki-no-nami.**

Oki-no-shima. (Off-shore Islands), (*C.japonica*), Chûbu Tsubaki Kyôkai, 1957-1969, *Tsubaki Meikan:* A light red single of 5-6 petals, about 8 cm across, opening campanulate; petals with fine veining of deeper red and ragged apices, central stamen cylinder, with stamens of unequal length. Leaves dull green, round oval, apices blunt acute, impressed venation and crenate margins. A seedling of **Tamatebako.** Originated in Chûbu area, Japan. See: Satô, 1975, *Chûbu no Tsubaki*, p.46. *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.289, p.124. Seibundô Shinkôsha, 1979, *Senchinshû,* pp.28, 204. Nippon Tsubaki - Sasanqua Meikan, 1998, p.48 with colour photo; English translation p.31. Stated to be a seedling of **Chûbu-tamatebako**. Named and released by Minoru Satô.

Okitsu. (Possibly a Place name), (*C.japonica*), Itô Toku'emon, 1788, *Tsubaki Hanagata Tsuki Oboechô:* Red semi-double with white spots and 3 rows of petals. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Red with white spots, semi-double with 3 tiers of petals. Originated in Japan. See: JCS., 1969, *Tsubaki*, No.7, p.24. (Believed extinct.)

Okitsu-shiranami. (White waves on the Sea), (C.*hybrid*), JCS., 1987, *Japan Camellia*, No.24, p.13, colour photo: A hybrid of **Barbara Clark,** (C.*saluenensis x C.reticulata* Captain Rawes) *x C.x vernalis* **Umegaka;** originated in Japan by Dr Kaoru Hagiya, Niigata. A large semi-double, pale pink, becoming white on opening, 3 rows of crêped and waved petals. Fragrant. Plant habit, open and spreading.

Okke's Delight. (*C.sasanqua*), Camellia Haven Catalogue, 1983; *New Zealand Camellia Bulletin*, 1984, vol.XIII, No.8, p.12, Reg. No.222: This 24 year old seedling of **Plantation Pink** x **Kanjiro** was originated by O.F. Over De Linden, Whangaparaoa, New Zealand. The plant has a dense, spreading habit, rapid growth and dark green leaves, 7 cm x 4.5 cm. The pink, anemone form flowers have a high petaloid centre, 10 petals and 30-40 petaloids with creamy filaments and yellow anthers. Size is 9 cm x 5 cm; colour RHS.CC.70C, Red purple group. Flowers very early. (Autumn).

Ôkoshimino. (Large, short straw Raincape), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.166, 549 as 'Ô-koshimino': Medium size, white, open peony form, incomplete double. Originated in Japan. (Believed extinct.)

Oku. (Place Name), (*C.japonica*), JCS, 1987, *Japan Camellias*, No.25, p.10, No.1 Clear, red, single with overlapping petals. Medium to large size, Central sheaf of stamens with protruding stigma. Blooms mid-season. The composition of the pigments of this flower is the same as the red in camellia Yucha *(C.semiserrata)* from China. Fertile. Selected from wild japonicas in Okayama Prefecture, Japan. Found and named by Seiichirô Sesai, released by Nobuo Sasai in 1978. See: Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.217.

Okume. Nuccio's Advert., ACS 1995, *The Camellia Journal*, vol.50, No.1, p.22. Corruption of the Japanese name **Okuni.**

Okuni. (Personal Name), (*C.japonica*), Izu-Ohshima Hawaii Botanic Gardens List, 1980. No description. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.116, colour photo and description: Medium size, pink, wide campanulate single, of 6 rounded, reflexed petals, slightly emarginate, and a

centre stamen cylinder with creamy filaments, joined for the lower third, and yellow anthers. Leaves dull mid-green, lanceolate-elliptic, apices long-acuminate, margins serrulate. Blooms mid-season to late. Originated in Matsu'e, Shimane Prefecture, Japan. Named and released by San-in Camellian Club. Okuni, Izumo was a famous dancer in 16th century in Izumo, now the Shimane Prefecture.

Oku-no-tani. (Back of Valley). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.334 with black and white photo; English translation p.227. Medium size, tubular to trumpet shaped single, red stripes and splashes on pale pink ground, cylindrical stamen column. Flowers early to mid-season. Leaves broadly elliptic, medium size. Upright, vigorous growth. Selected from cultivars raised by a private family in Matsu'e City. Named and released by San-in Camellian Club in 1975. From Shimane Prefecture.

Okura. (Meaning not confirmed), (*C.japonica*), Mizuno, 1681, *Kadan Kômoku:* White spotted pink, double. Originated in Japan. See JCS., 1965, *Tsubaki,* No.5, p.29, or ibid, 1976, No.15, p.47. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.61. Different reading: 'Ogura'. (Believed extinct.)

Ô-kurenai. (Large Scarlet), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon-no-chinka*, p.223 colour photo; p.222 description: Large deep scarlet, wide campanulate single with 5-6 broad, rounded, overlapping petals and a pinched stamen cylinder, yellow anthers and pinkish filaments, joined for the lower third. Leaves mid-green, ovate, tapering acute, serrulate, late flowering. Originated in the Kanagawa Prefecture, Japan. Released by Shûhô Kirino around 1980. Different reading: 'Ô-beni'. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.45 with colour photo; English translation p.29. Leaves elliptic, large, thick. Upright, vigorous, triploidy growth. The original tree is growing in Ebina City.

Okushimo. (Late Frost), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.28, colour photo, p.204, description: Red, rose form double with 6-7 rows of petals and small stamens cluster when fully open. Leaves, green to deep green, elliptic, apex acuminate, margins serrulate, raised venation. Originated in the Kansai area, Japan. Different reading: 'Bansô'. Resembles **Hatsushimo** but later blooming.

Oku-tsubaki. Charette, 1956, SCCS., *Camellia Review*, vol.17, No.8, p.11. Tuyama, 1966, *Camellia Cultivars of Japan*, p.10 and Seibundô Shinkôsha, 1979, *Senchinshû*, p.165. Synonym for 'Yuki-tsubaki' as *C.rusticana.*

Okuwabi. (Inner Wabisuke), (Wabisuke), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.99, colour photo and description: Small size, soft pink, campanulate single, with 5 reflexed, overlapping petals and a centre cylinder of stamens of uneven length, anthers yellow. Leaves bright green, elliptic, apices tapering acuminate, margins serrate. Blooms early to mid-season. Originated in the Chûbu area, Japan. Synonym: 'Oku-wabisuke'. A chance seedling of unknown parentage. Originated and released by Shigeru Okumura in 1975.

Oku-wabisuke. Inazawa Nurseries Co. Ltd. Wholesale Price List, 1986-1987, p.9, A-426. Synonym for 'Akuwabi'.

Okuyama. (Place Name), *(C.x vernalis),* JCS., 1987, *Tsubaki,* No.26, p.50: Medium size, pink, single. ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.41. Originated in Shizuoka Prefecture, Japan.

Okuyama-momo. (Mount Oku Peach), *(C.x vernalis*), Tanaka et al., 1965, *Journal of the Japanese Society of Horticultural Science*, 55(2)208: A tetraploid cultivar of *C.x vernalis.* Flower description not seen. Leaves deep green, 3.8 cm long x 1.4 cm wide.

Olaefera. Burdin, Chambery Catalogue, 1834, p.18. Orthographic error for the species *Camellia oleifera.*

Olaefera Latifolia. Burdin, Chambery Catalogue, 1834, p.18. Orthographic error for 'Oleifera Latifolia', synonym for *C.kissi.*

Old Capital. (*C.japonica*), Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.18. Originated in USA. No description.

Old Do. Vanderbilt, 1941, *Camellia Research, II,* p.5. Abbreviation for 'Old Double White', synonym for **Alba Plena.**

Old Double Red. *The Florists Journal,* 1843, p.74. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues.* Synonym for **Rubra Plena.**

Old Double Variegated. *The Florist's Journal,* 1842, vol.3, p.208,. Synonym for **Variegata.**

Old Double White. Breck, 1846-1847, Horticulturalist', 1:48. Synonym for **Alba Plena.**

Old Faithful. *(C.sasanqua).* ACRS, *Camellia News,* 2000, No.154, p.18, colour photo front cover, Reg. No.532. Originated by A. Schmierer, Nowra, NSW, Australia. Seed parent *C.sasanqua* **Plantation Pink**, pollen parent unknown. First flowered 1994. The semi-double to loose peony form flowers are deep pink to pale mauve pink (RHS.CC.62A to 69B and 75C), are 8 cm across x 4 cm deep, with 10-12 petals. Flowers abundantly early to mid-season on a vigorous, upright, open plant. Leaves dark green, matt, oval, apex pointed, serrate margins, 6.2 cm long x 1.8 cm wide. Unusual colour break.

Old Florêt. (*C.japonica*), Nantes, Services des Espaces, Collections, 1980. No description. Originated in France.

Old Glory. *(C.sasanqua).* SCCS, *Camellia Review,* Oct. 2009, inside front cover with colour photo; Wide open single, sprayed stamens, ruffled petals, white with dark pink edging.

Old Ivory. (*C.japonica*), SCCS., 1964, *Camellia Nomenclature,* p.96: Cream white. Medium, full, peony form. Originated in USA by O.H. Johnson, Hattiesburg, Mississippi.

Old Maid Taylor. SCCS., 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for **Fairhope.**

Old Pond Frog. (*C.japonica*), Griffin, ed., 1957, *Camellian,* vol.VIII, No.3, p.7. No description. Originated in USA.

Old Port. Sander, St Albans, Catalogue, [before 1914]. Synonym for **Konronkoku.**

Old Prints. (*C.japonica*), *American Camellia Yearbook*, 1973, p.194, Reg. No.1240: A 20 year old chance japonica seedling that first bloomed 1956. Originated by Mrs M.J. Witman, Georgia, USA. Plant is dwarf growing, spreading, with light green leaves, 6 cm long x 3.8 cm wide. The formal double, bright red flowers have some white striping and 52 petals. They measure 7.5 cm across x 1.3 cm deep and are quite flat with alternate rows of petals very tight, with the petal tips recurving towards the centre as seen in old flower prints. Early flowering.

Old Red. Booth, 1831, *London Horticultural Society Transactions, 7*:538. Synonym for **Rubra Plena.**

Old Rose. (*C.japonica*), SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.54: Rose-red. Medium large, semi-double. Originated in USA by the Flowerwood Nursery, Mobile, Alabama.

Old Savannah Tea. *(C.sinensis)* ACS, Yearbook 2011, p.133. Miniature, white, single flowers on vigorous, upright, spreading plant with large leaves. Offered by CamelliaShop, Savannah, Ga., USA.

Old Stripe. *The Florist's Journal,* 1841, vol.2, p.271. Synonym for **Variegata.**

Old Striped. *The Florist's Journal,* 1841, p.272. Prince & Co. Nursery Catalogue, 1844. Synonym for **Variegata.**

Old Timer. (*C.sasanqua*), Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.257. Pink, single, medium size. Originated in USA.

Old Virginia. (*C.japonica*), G.N.F., 1839, *Magazine of Horticulture*, 6:210: Originated in USA by Gunnell, Washington, D.C. A seedling of the old striped (**Variegata**) ... the shape and size of the flower is as perfect as the old double white (**Alba Plena**) or **Landrethii;** the ground colour is pink and most petals have an irregular white stripe. Synonym: 'Old Virginica'.

Old Virginica. Jacob Makoy et Cle Catalogue, 1849, p20. Orthographic error for **Old Virginia.**

Old White. *The Florist's Journal,* 1841, vol.2, p.271. Hume, 1946, *American Camellia Yearbook*, p.81. Synonym for **Alba Plena.**

Oldburnea. (*C.japonica*), Cachet Catalogue, 1840-1841, p.3. No description. Originated in France. (Believed extinct.)

Ole. (C.*saluenensis* hyb.), Nuccio's Nurseries Catalogue, 1980: Rich orchid pink. Small to medium, rose form double. Compact growth. Late flowering. Originated in USA by H. Fish, Santa Cruz, California. See colour photo, front cover, *New Zealand Camellia Bulletin*, vol.XIII, No.8, 1984.

Ole Miss. (*C.japonica*), *American Camellia Yearbook*, 1969, p.165, Reg. No.1042: A 13 year old chance seedling that first bloomed 1959; originated by R.N. Campbell, Mobile, Alabama, USA. Plant growth is upright and rapid with dark green leaves, 10 cm x 6 cm. The semi-double flower, similar in form to 'Donckelaeri' (**Masayoshi**), is 9-11 cm across with 20 pale pink crêpe petals. Blooms mid-season.

Oleaefolia Latifolia. Baumann & Baumann, 1831, *Collection de Camellias élevés à Bollwieler.* Orthographic error for 'Oleifolia Latifolia', synonym for *C.kissi.*

Oleaefolia. Berlèse, 1837, *Monographie*, ed.1. Orthographic error for 'Oleifolia', synonym for *C.kissi.*

Oleafolia Latifolia. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for 'Oleifolia Latifolia'. Synonym for *C.kissi.*

Oleander. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue, p.27. No description. Originated in Italy. (Believed extinct).

Oleander Flore Rubra. *(C.japonica),* Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani. as 'Oleander Fl. Rubro'. No description. Originated at Bibbiani, Italy. (Believed extinct).

Oleatara. (*C.japonica*), Valley Garden Supply Co. Catalogue, 1951, p.25. No description. Originated in USA.

Oleifera. Veitch Nursery Catalogue, 1931. Synonym for **Narumigata.**

Oleifera. Loddiges Botanical Cabinet, vol.11, 1825, t.1065; Lindley, 1825, *Botanical Register*, t.942. Described as the species *Camellia oleifera* by Abel in 1818.

Oleifera Latifolia. Jacob-Makoy, 1828, Catalogue, p.5. Burdin Catalogue, 1835. Orthographic error for 'Oleifolia Latifolia'. Synonym for *C.kissi.*

Oleifera Plena. (C.*oleifera*), Berlèse, 1840, *Monographie*, ed.2, p.84: Leaves similar to *C.oleifera;* buds pointed, small; flowers about 5.6 cm. across, semi-double, white, petals 9-10, deeply notched at the apex, stamens central. Originated in Italy by Rovelli. Synonym: 'Oleifera Semi-plena'.

Oleifera Special. River View Nursey Catalogue, 1957-1958, p.5. Synonym for **Narumigata.**

Oleifolia. Anon, 1830, "Ueber die Cultur der Kamellien" in *Der Blumen Gaertner*, p.53. Orthographic error for *C.oleifera.* Hillier Nursery Catalogue, 1933-1934, p.4. Orthographic error for 'Oleifera', synonym for **Narumigata.**

Oleferne. Burdin Maggiore & Co. Catalogue, 1863. Orthographic error for **Oloferno.**

Oleosa. Booth, 1830, *Transaction of the Horticultural Society of London*, 7:522, 561. This name has been applied to forms of *C.sinensis* and *C.oleifera* and is regarded as a *nomen confusum.*

Oleosa Shanga. *(C.oleifera). International Camellia Journal*, 1995, No.27, p.73. Jean Claude Rosmann, "Camellias of the 21st Century". No description. Originated in Vietnam.

Olga Anderson. (*C.japonica*), Platt. 1970, RHS., *The Rhododendron & Camellia Yearbook*, No.24, p.161: Medium size, rose form double, rose-pink with a few white markings. Originated in England.

Olga Leach. (*C.japonica*), *American Camellia Yearbook*, 1958, p.290, Reg. No.346: A 10 year old chance seedling, originated by Dr Gilbert E. Fisher, Union Springs, Alabama, USA. Plant growth is upright and rapid with leaves, 7.5 cm long x 3.2 cm wide. The loose, semi-double flowers, 11-12.5 cm across x 6 cm deep, are pale pink variegated white with 14-16 petals and 3-4 petaloids. There is unusual, deeper pink on outer quarter of petal, shading to almost white on inner third. Blooms early to mid-season.

Olifera. Clibrans Altrincham Catalogue, 1957-1958, p.3. Orthographic error for 'Oleifera', synonym for **Narumigata.**

Olimpica. (*C.japonica*), Burdin Maggiore & Co. Catalogue, 1856-1857. No description. Van Houtte Catalogue, 1858, 72:20: Bright pink towards the circumference, shading paler to the centre, purplish veining with streaks of white. About 10 cm across. Perfectly imbricated. Originated in Italy by Negri, Milan. Orthographic variant: 'Olympica'. For colour illustration see Verschaffelt, 1860, *Iconographie*, Book VIII, pl.II.

Olinda. (*C.japonica*), Camellia Grove Nursery Catalogue, 1954, p.23: A small, pure white, formal double of fine, at times almost transparent texture. Full, blows to show minute stamens. Medium, bushy growth. Mid-season blooming. Originated in Australia.

Olive Barrett. (*C.japonica*), Fendig, 1950, *American Camellia Catalogue*, with colour pl.: Rose-pink semi-double, 10-11 cm across x 7-8 cm deep. The few central stamens are mixed with petals; filaments cream, anthers yellow. First flowered 1947. Leaves mid-green, 7.5 cm long x 5 cm wide, thin, glossy, margins shallowly serrate, apex blunt. A slow growing plant, spreading with flowers on long, thin stems. Originated by Mr & Mrs T.S. Clower, Gulfport, Mississippi, USA and Reg. No.50 with ACS.

Olive Elizabeth. (*C.japonica*), Fendig, 1951, *American Camellia Catalogue* with colour pl.: Large carmine-red, incomplete double, anemone form, 10-12.5 cm across. Stamens intermixed with petals. Large petaloids. Buds, light green, long and pointed. Leaves light green, obovate, 10 cm long x 5 cm wide, texture thin, apex acuminate, margins shallowly serrulate. Rapid, compact growth. Originated by T.S. Clower, Gulfport, Mississippi, USA and registered with the ACS. as No.52. First flowered 1944. Blooms early to mid-season.

Olive Honnor. (*C.japonica*), *New Zealand Camellia Bulletin*, 1976, vol.IX, No.5, p.11, Reg. No.119: A 9 year old chance seedling *C.japonica* which first flowered 1971; originated by Mrs O. Honnor, New Plymouth, New Zealand. The plant has an upright habit with dark green leaves. The flower form is anemone with 9-10 guard petals and up to 60 petaloids. It is crimson with yellow anthers and white filaments and is up to 14 cm across and has some fragrance. Orthographic error: 'Olive Honor'. See colour photo: *New Zealand Camellia Bulletin*, 1987, vol.XV, No.4, p.18.

Olive Honor. Duncan & Davies (UK) Catalogue, 1986. Orthographic error for **Olive Honnor.**

Olivelana. Henderson Nursery Catalogue, 1867. Orthographic error for **Olivetana.**

Olive Lee. (*C.japonica*), SCCS, 1942, *Classification of Camellias*, p.2: Variegated semi-double, 10cm across. Blooms mid-season. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.54, as 'Olive Lee Shepp': White marked deep red, Medium semi-double. Vigorous, upright growth. Mid-season blooming. Originated in USA. Generally known by the synonym 'Olive Lee Shepp'. Sports: **Arlene Lee Shepp, Raymond Beales.** Orthographic error: 'Ollie Lee Shepp'.

Olive Lee Shepp. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.54. Synonym for **Olive Lee.**

Olivensis. (*C.japonica*), Rovelli Catalogue, 1874. Vivid red. Originated in Italy.

Olivetana. (*C.japonica*), Luzzatti, 1851, *Collezione di Camelie*, p.29: A formal double of soft rose with lines of white. Franchetti, 1855, *Collezione di Camelie*, p.49: Soft pink, petals arranged like Incarnata, often with delicate, white stripes; large size, imbricated. Synonyms: 'Chichizola', 'Incomparabile', 'Olivetana Nova'. Orthographic errors: 'Olivettana', 'Olivetiana', 'Olivelana'. For colour illustration see Verschaffelt, 1856, *Nouvelle Iconographie*, Book IX, pl.IV. Originated in Italy by the Marquis Spinola.

Olivetana Nova. Verschaffelt, 1856, *Nouvelle Iconographie*, Index. Synonym for **Olivetana.**

Olivetiana. Burnier Catalogue, 1855-1856. Orthographic error for **Olivetana.**

Olivettana. Del Lungo e Girardi, 1928, *Le Camelie*, p.105. Orthographic error for **Olivetana.**

Olivia. (*C.japonica*), Waterhouse, 1947, *Camellia Quest*, p.16. A Camden Park seedling, 47/52 raised by Sir William Macarthur, NSW, Australia. This was not described or distributed and is considered extinct.

Olivia. (*C.japonica*), *American Camellia Yearbook*, 1970, p.168, Reg. No.1086: A 12 year old chance seedling that first bloomed 1963; originated in USA by G.R. Howard, Charlotte, North Carolina. Plant growth is upright, open and rapid in rate with medium size, dark green leaves. The semi-double, **Frizzle White** type, bloom is white with yellow anthers and white filaments. It is 11-12.5 cm across x 6 cm deep with 28-36 petals. Blooms early to mid-season.

Olivoefera. André Leroy, Angers Nursery Catalogue, 1833, p.13. Orthographic error for *Camellia oleifera.*

Ollie Lee Shepp. Fruitland Nursery Catalogue, 1949-1950. Orthographic variant for 'Olive Lee Shepp', synonym for **Olive Lee.**

Oloferne. Verschaffelt Catalogue, 1849-1850, p.48. Orthographic error for **Oloferno.**

Oloferno. (*C.japonica*), Verschaffelt Catalogue, 1850, p.48 as 'Oloferne'; ibid, 1852, *Nouvelle Iconographie*, Book IV, pl.II: Received from Mr Mariani, Milan, Italy ... It is distinguished by its lanceolate petals, all mucronate-apiculate by a pure white point ... against the cerise-rose background. The imbrication is somewhat irregular and in broken serries. Orthographic errors: 'Oleferne', 'Oloferne'. 'Ologerno'.

Ologerno. Ellis, 1953, *Old Camellia Varieties*, p.251. Orthographic error for **Oloferno.**

Oltonii. *(C.japonica),* Cachet, 1840-1841, Catalogue, p.3 as 'Oltoni'. No description. Originated in France. (Believed extinct).

Olympia. Jean Verschaffelt, 1863-1864, Price List, p.40. Orthographic error for **Olimpica.**

Olympic Gold. (C.*chrysantha*), SCCS., *The Camellia Review*, 1984, vol.45, No.4, colour pl. front cover, description, p.1,8: A small, 5-6 cm across, bright yellow, single form with golden stamens

that first bloomed in 1984. Originated by Piet & Gaeta, California, USA. Plant Patent No. 5682.

Olympica. Jean Verschaffelt, 1861-1862, Price List, p.23. Real Campanhia Horticolo-Agricola Portuensis Catalogue, No.29, 1895-1896, p.60. Orthographic variant for **Olimpica.**

Ôma. (Place Name), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.63, colour photo and description: Small size, faintest pink. cup-shaped single of 6 petals, with lateral margins having a tendency to incurve; a short, central stamen centre with white filaments, joined for the lower third, and yellow anthers. Leaves, small, bright green, ovate, apices blunt acute, margins serrate. Blooms early to late season. Originated in Ôma, Tottori Prefecture, Japan. An old tree of about 400 years survives at the garden of the Kubota family in Ôoke, Tottori City. Note: Although the name of this cultivar was decided by the place of origination, it has different Kanji characters to the name place.

Ômatsugasa. Different reading for **Ômatsukasa.**

Ômatsukasa. (Large Umbrella Pine), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.95: Large size, red formal with pointed petals. Originated in Japan. Orthographic variant: 'Omatsugasa'. (Believed extinct.)

Ombonii. (*C.japonica*), Jacquin, Paris Nursery Catalogue, 1845, p.13. No description. Burdin Maggiore & Co, 1849-1850, Catalogue General as 'Omboni': Beautiful red, cupped peony form. Originated in Italy.

Omega. (*C.japonica*), SCCS., 1968, *Camellia Nomenclature*, p.107: Blush white, edged coral. Large, semidouble. Flowers mid-season. Originated in USA by Wilson. See colour photo facing p.22, *American Camellia Yearbook*, 1969.

Omega Red. *(C.japonica),* ACS, *The Camellia Journal*, June 2008, p.32 with colour photo, Regn No. 2714. A solid coloured sport of **Omega.** First observed and propagated in 1994 by Jerry Hogsette of Gainesville, Fla., USA. A 12.7 cm diameter x 6.5-7.5 deep, light red with darker undertones (veining), semi-double flower with a few petaloids. Yellow anthers and pink filaments. Heavy petal texture and flowers mid-season. Plant is upright, spreading and vigorous. *American Camellia Yearbook*, 2008, p.123 with colour photo; Dark green leaves are 10 cm x 3.2 cm.

Omegi. (*C.japonica*), Portland Wholesale Nursery Price List, 1949, p.25. No description. Originated in USA. (Believed extinct.)

Omer Baschia. Ambroise Verschaffelt, 1857, Catalogue, No.63, p.27. Orthographic error for **Omer Pacha.**

Omer Pacha. (*C.japonica*), Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.13. No description. van Houtte Catalogue, 1858, 72:20: Lilac pink, spotted with white. Imbricated. Orthographic variant: 'Omer Pascia'. Orthographic error 'Omer Baschia'. Originated in Italy by Chiesa, Milan.

Omer Pascia. Mercatelli Catalogue, 1881. Orthographic variant for **Omer Pacha.**

Ômi. (Place Name.) (C.japonica), *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.73 with colour photo; Small, deep red single trumpet shape. Pinched yellow anthers on tubular white filaments. Flowers early to mid-season. Upright, vigorous growth. Leaves ovate, medium size. Selected in 2006 by Toshiharu Hiino from a wild population at the seaside near Izumo Taisha Shrine, Shimane Pref., Japan. Named for an old document *Izumo Fudoki.*

Ômi-akebono. (Morning in Ômi)., (*C.vernalis* hybrid) *"Camellias in Kurume",* ICS Congress, Kurume 2010, p.109. No description. From Kurume, Japan.

Ômidare. (Great Confusion), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, #144: Red spotted with white. Large size single to irregular, peony form double. Mid-season flowering. Leaves large, blunt apex, oval, wavy with wide, shallow serrations. Itô, Ko'emon, 1879, *Chinkashû:* Red, with white spots, large size. Resembles **Ranbyôshi.** See: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.155 & p.270; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.269, p.124 & p.331. These modern bibliographies describe this as a double flower, but it is thought to be the same as the old Itô cultivar, because peony forms appear both as double and single flowers. Different readings: 'Ohmidare', 'Oomidare', 'Dairan', 'Tairan'. Originated in Japan. Possible synonym for **Ranbyôshi**. See Seibundô Shinkôsha, 1979, *Senchinshû*, p.161 & p.256.

Ômidare. (Great Confusion), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White with large red spots, single, balloon flower shape. Originated in Japan. See: JCS., 1969, *Tsubaki*, No.7, pp.25, 33; ibid., 1982, No.21, p.101. (Believed extinct.)

Omigoromo. (Beautiful Kimono), (*C.sasanqua*), Minagawa, Iza'emon, 1887, *Nisshôen Chabaifu;* Nihon Shubyô Co. Catalogue, 1910: White with red graduations to periphery. Large size. Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: White shaded pink. Medium, single, Very early. Originated in Tokyo, Japan. Sport: **Okinagoromo.** Synonym: 'Ômigoromo'(Edo). Different readings: 'Omikoromo', 'Mibigoromo', 'Omi-no-koromo'. Note: This cultivar has been published with three different Kanji characters, but with the same meaning and pronunciation. Corruption of Japanese name: 'Omi-goronio'. See colour photo, pl.544, *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.215 & p.389.

Ômigoromo. (Garment of Ômi), *(C.x vernalis*), Wada, 1941, *Japanese Garden Treasures*, p.31 as 'Ohmigoromo': White, flushed with rose. Medium size. Kirino, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.37; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.558, p.218: Soft pink, with white spots, single about 7 cm across, of 6-7 petals and a small cylinder of stamens. Leaves pale, yellowish green, apex blunt acute, margins finely serrate. Note: The first two characters are different to those of the sasanqua above. The Wada variety is different to that in the Encyclopedia which did not originate until 1965 and was called 'Yobukodori' in the Chûbu area until 1965. Originated in the Chûbu area, Japan. Synonyms: 'Yobukodori', 'Ômigoromo'(Chûbu). Chinese synonym: 'Jinjiangyi'. Different reading: 'Ômi-no-koromo'.

Ômigoromo (Chûbu). Hakoda, JCS., 1987, *Tsubaki*, No.26, p.50. Synonym for the *C.x vernalis* **Omigoromo.**

Omigoromo (Edo). Hakoda, JCS., 1987, *Tsubaki*, No.26, p.46. Synonym for the *C.sasanqua* **Omigoromo**.

Ômi-haku. (White flower from Ômi). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.44 with colour photo; English translation p.28. Miniature, white, small sake cup-shaped single with cylindrical stamens. Flowers mid-season to late. Leaves elliptic, small, slightly wavy, recurved. Spreading growth. Selected from wild camellias growing in Ômi, Tsushima Island. Named and released by Tokuji Ôoka in 1980. From Nagasaki Prefecture.

Omikoromo. Different reading for **Omigoromo.**

Ominaeshi. (See Note), (*C.japonica*), *Chinka Zufu*, (Before 1700), Watanabe, 1969, pl.116: Light red, large single of 7 obcordate petals about a very large boss of stamens. Originated in Japan. (Believed extinct.) Note: This is one of the seven wild flowers of Autumn.

Ominaeshi. (See Note), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.447: Medium size, red, single of 5 petals and small, spreading golden stamens. Originated in Japan. (Believed extinct.) Note: This is one of the seven wild flowers of Autumn.

Ominaeshi. (See Note), (*C.japonica*), *Chinka Zufu,* (before 1700), Watanabe, 1969, pl.560: Small, single of 5 petals of purplish red fading towards the petal edge. Large spreading stamen centre, white filaments. Originated in Japan. May be the same as the above. (Believed extinct.) Note: This is one of the seven wild flowers of Autumn.

Ominaeshi. (See Note), (*C.japonica*), Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium size. red, cup-shaped semi-double with three rows of petals, with white spots. Originated in Japan. See: JCS., 1969, *Tsubaki.* No.7. p.24. (Believed extinct.) Note: This is one of the seven wild flowers of Autumn.

Ômine. (Large Peak), (*C.japonica*). Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* White, double, large size. cup-shaped. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.79. Originated in Japan. (Believed extinct.)

Ômino. (Large Straw Raincoat), (*C.japonica).* Tuyama, 1968, *Camellias of Japan,* pl.249, p.126, description, p.166 as 'Oo-mino': Leaves broad-elliptic, dark olive green, thick, venation impressed, manifestly denticulate on margins, 5.1-8.5 cm long x 3.1-4.5 cm wide. An incomplete double flower, with a large, densely packed centre of petals and petaloids, deep pink (Rose Madder 23/2). Guard petals, 6-10; inner petals and petaloids. 224-283 in number, intermingled with a few normal stamens. Inner petals narrowly oblong and undulated; petioles thinly stalked, fan shaped. Mid-season to late flowering. Originated by Mr Shigenobu Takano, Yatsuo-machi, Toyama Prefecture, Japan.

Ômi-no-koromo. Based on the same character as **Ômigoromo.** Different reading for **Ômigoromo.**

Omishima-yabutsubaki. (Group name for wild Camellias from Omishima). (*C.japonica*), JCS., 1984, *Tsubaki*, No.23, p.35. Originated in Ehime Prefecture. Japan.

Omiyaguro. *(C.japonica), Camellia Photo Collection*, 1997 Japan, p.32 with colour photo; Small vase shaped red single, columnar stamen cluster.

Ômiyahime. (Name of a Princess). (*C.japonica*), Yokoyama & Kirino. 1989. *Nihon no Chinka*, p.365. colour photo and description: Large size. white with the occasional red streak, incomplete. informal double to semi-double. with 4-5 rows of roughly imbricated emarginate petals, and a centre of yellow anthers with some small, erect centre petals. Leaves dark green, broad-elliptic, apices acute, recurved. Mid to late blooming. Originated in the Kagoshima Prefecture, Japan, and old trees survive with private families in Kagoshima and Tarumizu Cities.. 'Ômiyahime' is a legendary princess born from a deer at the foot of Mount Kaimon in the Kagoshima Prefecture.

Omoiba. (Overlapping Leaves), (*C.japonica*), *Chinka Zufu,* (before 1700), Watanabe, 1969, pl.140: Medium size, white, with light red to red markings. Irregular semi-double with a ring form stamen centre, with white filaments. Originated in Japan. (Believed extinct.)

Omoibane. (Wings of Desire), (C.*hybrid*), ICS.. Apr. 1990, *Japanese Camellia Cultivar List,* p.30: Medium size, pale pink ground with pink and red variegation. A seedling of *C.sasanqua* **Hitomaro** x *C.reticulata* **Craig Clark**. A double with embracing petals. Originated in the Niigata Prefecture, Japan. Named and released by Kaoru Hagiya in 1983.

Omoikurenai. (Burning Affection), (*C.reticulata* hyb.), Hagiya. 1986, *Studies in Interspecific Hybridization of Camellias,* No.2, p.213, colour photo 25, p.12: A seedling of *C.hiemalis* 'Rikkan' x [(*C.reticulata* 'Crimson Robe' [**Dataohong**] x *C.japonica* **Tiffany**) x **Milo Rowell**] that first flowered 1982. Originated by Dr Kaoru Hagiya, Niigata University, Japan. Flower, red with about 15 petals, semi-double, sometimes open peony form, 8-9 cm across; petals oval, edges wavy and curved; stamens less than 30, dark yellow; ovary densely tomentose. Early flowering. Slight perfume. Leaves medium size, oval, apex tapering acuminate, venation and serrations obscure. Plant habit, upright and bushy.

Omoi-no-mama. (As You Like It), (*C.japonica*), *Encyclopedia of* Camellias *in Colour*. vol.I. 1972, pl.339, p.148, description. p.341: Medium size, semi-double to open, incomplete double. 24-28 petals, variable in colour from white with pale red and pink streaks to self pink or pale red. Centre consists of a few aborted stamens. Leaves mid-green, thin, elliptic to broad-elliptic, apex shortly acute, margins crenate. For colour photos and descriptions see: Satô, 1975, *Chûbu no Tsubaki*, p.71; Seibundô Shinkôsha, 1979. *Senchinshû*, pp.29, 205. Originated in the Chûbu district, Japan.

Omoi-no-mama. (As You Like It). (*C.sasanqua*), Hakoda, 1973, *Garden Life* Dec. pp.34.44; ICS., Apr. 1990, *Japanese Camellia Cultivar List*, p.35: Medium size, white graduating to red at petals tips, single, early blooming. Originated in Saitama Prefecture, Japan. Released by Yoshizawa Chinju'en Nursery in 1970s.

Omokage. (Visage), (*C.japonica).* Itô Ihei, 1695, *Kadan Chikinshô:* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Large, formal double, to peony form, white with a pinkish cast. Petals long slender. Flower form convex. Originated in Japan. (Believed extinct.) See Kyôto Engei Kurabu, 1969, *Tsubaki*, No.7, p.33.

Omokage. (Visage), *(C.x vernalis*), Tanaka et al., 1986, *Journal of Japanese Society of Horticultural Science*, 55(2):208: A triploid cultivar originated in Japan. Peach red, semi-double, medium size. ICS., Apr. 1990, *Japanese Camellia Cultivar List*, p.41*:* Medium size, blush pink, semi-double. Blooms early to mid-season. Originated in Kakegawa City, Shizu'oka Prefecture, Japan. Discovered by Katsuhiro Maeda in 1977, named and released by Fusako Yamasaki. See: JCS., 1987, *Tsubaki*, No.26, p.50.

Omokage. (Name of Mountain), (*C.japonica*), Yokoyama and Kirino, 1989, *Nihon no Chinka*, p.391, colour photo, p.390, description: Medium size, soft pink, formal double, with 5-6 rows of rounded petals, the exterior rows reflexed, becoming erect and concave towards the centre. Leaves glossy, deep green, apices tapering, blunt acuminate, margins serrulate. Blooms mid-season. The original tree is at Shiogama Shrine, Tottori City, Tottori Prefecture, Japan. Found by Yoshio Takada, released by Yoshio Yamada in 1979. Resembles **Kikuhikari.**

Ô-mokkô. (Large Mokkô), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.192: Pink, semi-double of 3 petal rows and a central stamen group. Originated in Japan. Different reading: 'Dai-mokkô'. (Believed extinct.)

Ô-mokkô. (Large Mokkô), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.372. Medium size, pink, irregular peony form, incomplete double. Originated in Japan. Different reading: 'Dai-mokkô. (Believed extinct.)

Ô-momiji. (Large Maple), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, #21: Large, double white with red spots and central column of stamens. Kasuya, Kamegorô,1859, *Tsubaki Irohanayose Irotsuki:* Round petals, bamboo whisk stamens. See: JCS., 1969, *Tsubaki*, No.7, p.24 & Tuyama, 1966, *Camellia Cultivars of Japan*, p.16. Originated in Japan. (Believed extinct.) Different reading: 'Ohmomiji', 'Oo-momiji'.

Ômon. (Royal Crest), (*C.rusticana*), Hagiya & Ishizawa, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.8 p.18: Medium size, 9-10 cm across, light red peony to rose form double of 3-4 rows of petals of irregular shape, 9-10 outer petals and 24 inner petals, long and slender, 150 stamens mixed with small, twisted centre petals. Leaves bright green, 10 cm long, elliptic, apex acute, margins finely, shallowly serrulate. Originated in Japan in Muramatsu-chô, Naka-kanbara-gun, Niigata Prefecture in 1958. For colour photo & description; see: Seibundô Shinkôsha, 1979, *Senchinshû*, p.27 & p.203.

Ômori. (Place Name), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.75; Hamamatsu, 1825, *Setsuyô Kikan*, vol.23: Medium size, white, single with fine crimson streaking. Originated in Japan. (Believed extinct.)

Ômura. (See below), (*C.japonica*), Monk Hôrin, 1639, *Kakumeiki; Sukekatsukyôki*, 1637; *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.4 & 692: Small, dark crimson, single, with white spots. Originated in Japan. Resembles **Amagashita.** Ômura is the name of a town in the Nagasaki Prefecture, and also the name of a Daimyô family from Hizen who are descendents of the Fujiwara clan. See: Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.47. (Believed extinct.)

Ônami. (Large Wave), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô* #28; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki.* See: JCS., 1969, *Tsubaki*, No.7, p.33: Large, single, red with white spots and splashes. Originated in Japan. (Believed extinct.)

Ônami. (Large Wave), (*C.japonica*), Kasuya, Kamegorô,1859, *Tsubaki Irohanayose Irotsuki:* Very large size, single, white with red spots and good shaped stamen cluster. Synonymous with **Isomakura.** Originated in Japan. (Believed extinct.) Note: Kasuya, Kamegorô lists two distinct **Ônami** camellias; one above the other in his list.

Ô-naruto. (Great Naruto), (*C.sasanqua*), Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13 as 'Oh-naruto': Deep pink. Large, double with narrow petals. Originated in Japan. 'Naruto' is the name of sea straits in Japan. Different reading: 'Oh-naruto'.

Oncydium Perfectum. (*C.japonica*), Burdin Maggiore & Co. Catalogue, 1856. No description. Originated in Italy. (Believed extinct.) Orthographic error: 'Oneydium Perfectum'.

Ondiniana. (*C.japonica*), Burdin Maggiore & Co. Catalogue, 1845. No description. Originated in Italy. (Believed extinct.)

One Alone. (*C.japonica*), Cannon,1962, ACS., *The Camellia Journal*, vol.17, No.1, back cover. No description. *American Camellia Yearbook*, 1965, p.243, Reg. No.754: A 12 year old chance japonica seedling that first bloomed 1957. Originated by H.E. Ashby, Charleston, South Carolina, USA. The plant growth is upright and rapid with light green leaves. The semi-double flower, similar to **Frizzle White,** is 12.5 cm across x 5 cm deep. Colour is blush pink with gold anthers and white filaments. Blooms mid-season. Orthographic variant: 'One-A-Lone'. Chinese synonym 'Dute'.

One Pleasure. *Camellias,* Y.C. Shen, 2009, p.129 with colour photo; Synonym for **Ichiraku**.

One-A-Lone. Mark S. Cannon Scion Catalogue, 1962, p.8. Orthographic variant for **One Alone**.

Oneydium Perfectum. Burdin Maggiore & Co. Catalogue, 1863. Orthographic error for **Oncydium Perfectum.**

One Line. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Hitosuji.**

Oneta Holland. Masons Nursery Catalogue, 1959-1960. Orthographic error for **Onetia Holland.**

Oneth Holland. Davis Nurseries Catalogue, 1986-1987, p.4. Orthographic error for **Onetia Holland.**

Onetia Holland. (*C.japonica*), Tourje, 1955, *American Camellia Yearbook*, p.37: This white seedling was developed by J.A. Holland, Upland, California. Big, 12-16 cm across, this hemispherical semidouble flower with tiers of outer petals surrounding 7 cm high petaloids interspersed with golden stamens, makes impressive showing. Blooms early to mid-season. Growth is vigorous and compact with large glossy green foliage. See colour photo facing p.176, *American Camellia Yearbook*, 1957. It is Registration No.387 with the ACS. Orthographic errors: 'Oneta Holland', 'Oneth Holland'. Chinese synonym: 'Helande'.

Ongyoku. (Music), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Double, cherry pink, medium size with convex flower centre. Originated in Japan. (Believed extinct.)

Onigaromo. Ghislane, Pier Luigi, 1982, *Le Camelie,* fig.26, pp.45,77. Corruption of the Japanese name **Onigoromo.**

Onigorome. Nobelius Nursery Catalogue, 1939, p.36. Corruption of the Japanese name **Onigoromo.**

Onigoromo. (Devil's Coat), (*C.sasanqua*), Yokohoma Nurseries Catalogue, 1891; Kajitsu-en, 1905, *Chabaika Meikan:* Medium size, white, variegated single, 7.5-8 cm across; white at the centre shading to rose-pink towards the margins and petal reverse. Petals, 6-9 in number, fluted and crinkled with a large central cluster of golden stamens. Leaves dark, glossy green with a red tone, elliptic, 6 cm long x 2.5 cm wide. Tall, strong grower. Flowers early. Orthographic errors: 'Onigorono', 'Onigorome', 'Onigaromo', 'Onigosomo'. Synonyms: 'Fiend's Coat', 'Onigoromo (Apple Blossom). See illustration xi, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III.

Onigoromo (Apple Blossom). Andersons Camellia Nursery, 1967, Catalogue, p.32. Synonym for **Onigoromo**

Onigorono. Duncan & Davies Nursery Catalogue, [before 1945], p.20. Corruption of the Japanese name **Onigoromo.**

Ô-niji. (Large Rainbow), (*C.japonica*), Ishii, Yûgi, 1932, *Genshoku Engei Shokubutsu Zufu*; Chûgai Nursery Catalogue, 1938-1939, p.19 as 'Oh-niji': A variegated form of 'Lady Clare' (**Akashigata**). A large, semi-double, deep pink marbled white. A triploid camellia that does not set seed. Resembles **Taiyô-nishiki** from Chûbu. Different readings: 'Oo-niji', 'Oh-niji'. Corruption of name: 'Ouiji'. Synonyms: 'Lady Clare Variegated', 'Empress Variegated', 'Mrs H.L.Windbigler', 'Variegated Lady Clare', 'Akashigata Variegated'. See: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.5 as 'Ooniji'; Tuyama, 1968, *Camellias of Japan*, pl.287 as 'Ooniji'; Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai*, pl.88, p.32 as 'Ohniji'; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.272 and p.331 as 'Ooniji'; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.27, 204 as 'Ôniji'; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.321 as 'Ôniji'. Originated by Jisuke Minagawa in 1929. From Saitama Prefecture. Chinese synonym 'Dahong'.

Ô-nishiki. (Large Brocade), (*C.sasanqua*), Shimada, Yaichi, 1957, *Kumamoto no Sazanka ni Tsuite. Dantairin;* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13 as 'Oh-nishiki': White shaded pink towards the edge. Large single to semi-double. Originated in Kumamoto Prefecture, Japan. Named by Yamazaki, Sadatsugu in 1879. A typical Higo sasanqua. See pl.582 & p.396, *Encyclopedia of Camellias in Colour*, vol.I, 1972. Different readings: 'Oo-nishiki', 'Oh-nishiki'.

Ô-nishiki. (Large Brocade), (*C.japonica*), Uekiya Seigorô, 1874, *Tsubaki Hyakuro no Zu*, vol.I: Medium size, red, single with white spots. Originated in Japan. Different readings: 'Oo-nishiki', 'Oh-nishiki'. See: Kyôto Engei Kurabu, 1975, *Tsubaki Tokushû*, No.73, p.20.

Oni-tsubaki. (Demon Camellia), (*C.japonica*), *Encyclopedia of Camellias*, *in Colour*, vol.I, 1972, p.367: Large, semi-double, red, 13 cm across with crinkled and creped petals and a centre of yellow stamens in 5 fascicles. Leaves broad-elliptic, apices abrupt acute, margins serrate, mid-green, fleshy. Blooms mid-season. The original tree is in the precincts of the Myôkaku Temple, Kagawa Prefecture, Japan. See *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.377, p.155; p.29 & p.205 for description. Seibundô Shinkôsha, 1979, *Senchinshû*, for colour photo. Named and released by Saneichi Ogawa in 1972.

Oniwarai. (Devil's Smile), (*C.japonica*), Tuyama, 1968, *Camellias of Japan*, pl.196, p.99, description, p.147: Leaves broad-elliptic, dark green, thick, suddenly long acuminate, margins coarsely serrate, 9.5-11.2 cm long x 4-6.5 cm wide. Flowers, irregular double, red (Claret Rose 021). Petals 18-24, roundish and convex; inner petals much smaller than exterior and slightly streaked white. Stamens few and intermingled with from 4-44 small petaloids. Flowers mid-season to late. Synonym: 'Benkei'. Originated by Mr Hamada, Tôji-in, Kyôto-shi, Japan. See JCS., *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.158 Orthographic error p.314 and Seibundô Shinkôsha, 1979,:-*Senchinshû-*, p.246, both as 'Benkei'.

Oniyuri. (Tiger Lily), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.30: Medium size, dark red, double. Seedling of *C.japonica* 'Kujaku-tsubaki' (**Hakuhan-kujaku**) x **Mark Alan.** Originated in Ôsaka Prefecture, Japan. Named and released by Kazuo Yoshikawa in 1980s.

Onjôji. (Onjô Temple), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.98: Small, white. single with dark, purplish crimson steaks, opening flat. Originated in Japan. (Believed extinct.)

Onjôji. (Onjô Temple), (*C.japonica*), ICS, Apr.1990, *Japanese Camellia Cultivar List*, p.18: Large size, deep red, peony form. Blooms mid-season to late. Originated in the Aichi Prefecture, Japan. The original tree survives in Kasamatsu Town. Named by Minoru Satô in 1976. Note: The kanji characters of this cultivar are different to those for that above.

Ôno. (Large Field), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pls.254, 517: Large, deep crimson, single with irregular petals and a central stamen column. Originated in Japan. (Believed extinct.)

Onoe. (Uncertain), (*C.japonica*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White, semi-double with three rows of petals and red spots, spherical shaped flower, medium size. Originated in Japan. (Believed extinct.) See: JCS., 1969, *Tsubaki*, No.7, p.25.

Ôno-kasuri. (Ôno Variegated), (*C.japonica*), *Chinka Zufu* (before 1700), Watanabe, 1969, pl.400: Large deep crimson, single with white blotching, opens flat. Originated in Japan. (Believed extinct.)

Onoji. (Ono Trail). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.50 with colour photo; English translation p.33. Small, vermilion mottled white, tubular single with cylindrical stamens. Flowers mid-season to late. Leaves narrowly elliptic, small. Upright, vigorous growth. Variegated form of **Kon-wabisuke,** named and released by Totsurô Nakamura in 1994. From Tokyo.

Onoji-kasuri. (Onoji Variegated), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe 1969, pl.148, Small, blush pink, semi-double with colour deepening to base of petals and crimson streaks. Originated in Japan. (Believed extinct.)

Onoji-shirakumo. (Onoji White Clouds), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.427: Small, roseform double, white with pink deepening to petal base and broad, crimson white stripes. Originated in Japan. (Believed extinct.)

Onono-komachi. (Beautiful Komachi from Ono), (*C.japonica*), Tateyama Nursery Catalogue, 1957: A very large red semi-double. Originated in Japan.

Opal Hearne. (*C.japonica*), *American Camellia Yearbook*, 1970, p.168, Reg. No.1091: An 8 year old chance seedling that first bloomed 1967; originated by Hollis Hearne, Rushton, Louisiana, USA. Plant growth is upright, open and average with large, dark green leaves. The loose, peony form flower is oriental red with yellow stamens, 13 cm across x 7 cm deep with 38 petals and 49 petaloids. Early blooming.

Opal Princess. *(C.x williamsii). New Zealand Camellia Bulletin*, March 1992, Issue No.111, vol.XVII, No.4, p.46, Reg. No.299: Originated by Les Jury, New Plymouth, New Zealand as a seedling of **Berenice Boddy** x **Mona Jury.** The 11 year old seedling first bloomed 1988. Upright, dense growth with dark green leaves 10 cm long x 5 cm wide. Very pale flower, 8 cm across x 4 cm deep with 96+ petals; formal double. Blooms mid-season to late. White with an undertone of pale, orient pink (RHS.CC.36D), deepening to light chartreuse at base.

Opalina. (*C.japonica*), van Houtte Catalogue, 1846-1847, 27:28. No description. Originated by J. Ketele, Belgium. (Believed extinct.)

Opelon's Peony. Lindo Nursery Catalogue, 1941-1942. Synonym for 'Opelousas', itself a synonym for **Duchesse Decazes.**

Opelousa Peony. Vanderbilt, 1940, *Camellia Research*, p.6. Orthographic error for 'Opelousas', synonym for **Duchesse Decazes**.

Opelousa Pink. Vanderbilt, 1940, *Camellia Research*, p.6. Synonym for **Rubra Virginalis.**

Opelousas. Gerbing's Azalea Gardens Catalogue, 1938-1939. Synonym for **Duchesse Decazes.** Orthographic errors: 'Opelon's Peony', 'Opelousas Peony', 'Opelousa Peony', 'Opolousas'.

Opelousas Peony. Overlook Nursery Catalogue, 1939-1940, p.21. Synonym for **Duchesse Decazes.**

Opelousa's Peony. The Pacific Camellia Society, 1946, *Camellia Nomenclature*, p.27. Synonym for **Duchesse Decazes.**

Opelousas Pink. McIlhenny Nursery Catalogue, 1945-1946, p.9. Synonym for **Rubra Virginalis.**

Opera Pink. (*C.reticulata* hybrid). *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan)*, 2010, p.282 with colour photo; Peach red, semi-double with wavy petals, medium size. Flowers mid-season. Leaves elliptic, medium size. Upright growth. A cross of **Kanjiro** x **Lasca Beauty,** originated by Kazuo Yoshikawa, Osaka, Japan, and released in 2009.

Ophelia. (Ophelia of Hamlet), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.205: Red spots on a light red ground. Sometime the red and the light red blend. Semi-double with squarish petals. Outer petals small to medium size. Originated in Kansai area, Japan. Mid-season flowering. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.50 as 'Ofê-ria', with colour photo; English translation p.33. Leaves narrowly elliptic, medium size. Upright growth, soft branches, somewhat frail. Named and released by Yoshiaki Andoh.

Ophelia Dent. (*C.japonica*), Fendig, 1956, *American Camellia Yearbook*, p.31: Originated by Miss Miriam Dent, Brunswick, USA. A medium to large semi-double, about 10 cm across. A little darker in colour than 'Magnoliiflora', (**Hagoromo**), and similar to **Smiling Beauty.**

Opisina. Catalogo della Stablimento Agrario-Botanico di Castagnola e Casabono, 1867-1868. Orthographic error for **Opizina.**

Opizina. (*C.japonica*), Burnier & Grilli Catalogue, 1846-1847. No description. Verschaffelt, 1849, *Nouvelle Iconographie,* Book IX, pl.IV: This variety received from Milan, Italy ... is recommended for its regularly imbricated blossoms, which are a vivid pink with veins of a deeper shade; broken by a white or rosy streaking in the centre of each petal, the same colouring appearing on the edge and tip. Medium size (10 cm across), the petals are large; they are oval in shape and slightly emarginate. Originated by Negri, Italy. Orthographic errors: 'Opizzina', 'Opisina'.

Opizzina. Luzzatti, 1851, *Collezione di Camelie,* p.29. Orthographic error for **Opizina.**

Opolla. Waterer Sons & Crisp Nursery Catalogue, 1936-1937. Orthographic error for 'Apollo', synonym for **Apollo (Pauls).**

Opollo. Waterer Sons & Crisp Nursery Catalogue, 1931-1932, p.35. Orthographic error for 'Apollo', synonym for **Apollo (Pauls).**

Opolousas. Gerbings Azalea Garden's Catalogue, 1938-1939. Orthographic error for 'Opelousas', synonym for **Duchesse Decazes.**

Optima. (*C.japonica*), Verschaffelt, 1850, *Nouvelle Iconographie,* Book III, pl.IV: Recently released by Low & Co, Clapton, England. The blossom resembles a large, hundred petalled rose; the petals being ample, rounded, the interior ones spread out, the others erect and clustered, all of a bright pink streaked with numerous crimson stripes. Synonyms: 'Optimus', 'Low's Optima', 'Optima Low's'. Orthographic errors: 'Optime', 'Optima Law'. Has been confused with **Helenor** and **Roma Risorta** in Australia. Sport: **Optima Rosea.** Chinese synonym 'Oubodima'.

Optima Law. Burnier Catalogue, 1855-1856. Orthographic error for **Optima.**

Optima Low's. Franchetti, 1855, *Collezione di Camelie,* p.49. Synonym for **Optima.**

Optima Mauve Pink. Hazlewood & Jessep, 1972, *Check List - Camellia Cultivars from Nursery Catalogues*. Synonym for **Optima Rosea.**

Optima Pink Sport. Treseder, Truro Camellia List, 1970, p.21. Synonym for **Optima Rosea.**

Optima Rosea. (*C.japonica*), Hazlewood's Nursery Catalogue, 1945, p.12: A self rose coloured sport of Optima. Originated in Australia. See p.108, Macoboy, 1981, *The Colour Dictionary of Camellias* for colour photograph. Believed Wally Abbiss is a synonym. Other synonyms: 'Optima Mauve Pink, 'Optima Pink Sport'.

Optima Rose Sport. Treseder Nurseries (Truro) Ltd, Camellia List, 1962-1963, p.3. Synonym for **Optima Rosea.**

Optima White. (*C.japonica*), Hazlewood & Jessep, 1972, *Check List - Camellia Cultivars from Nursery Catalogues:* White, rose form double. Originated in Australia.

Optime. Baxter & Wooster, 1850, *Supplement to Loudon's Hortus Britannicus,* p.508. Orthographic error for **Optima.**

Optimus. Duncan & Davies Catalogue, 1924, p.31. Orthographic error for **Optima.**

Ora Pro Nobilis. (*C.japonica*), Dodd, 1968, *Adventures with Camellia Seedlings*, p.4 colour photo: Medium size, red, irregular, full peony form double with some stamens visible. A seedling of 'Donckelaeri'(**Masayoshi**) raised by Richard Dodd, Marshallville, Georgia, USA.

Ôrai-no-seki. Different reading for **Yukiki-no-seki.**

Ôran. (Cherry Orchard), *(C. japonica*), Inazawa Nurseries Co. Ltd, Wholesale Price List, 1986-1987, p.11, A-536: Medium size, tubular single of clear peach pink, fading to white at petal base. Early blooming. Originated in Japan.

Oranda Gasa (1). Fendig, 1953, *American Camellia* Catalogue. Synonym for **Orandagasa.**

Oranda Gasa (2). Fendig, 1951, *American Camellia* Catalogue, erroneously as 'Oranda Gasa' and, in 1953 as 'Oranda Gasa (2)': Large, light rose-pink, darker at centre of flower, fluted single, 10 cm across. There are 6 almost round petals about 5 cm in diameter with wavy margins and crêpe texture. The central stamens, occasionally replaced in part by petaloids, are in a central wreath nearly 5 cm. across. Filaments are slim with yellow anthers.Leaves, medium dark green, 8 cm x 3.7 cm; apex short acute, recurved; base cuneate; venation recessed; closely and shallowly serrate. Erect, vigorous growth. Mid-season blooming. Note: This Camellia was imported to America by McIlhenny and listed in his 1937 catalogue as 'Orando-gasa'. However it appears to be a pink sport of the original cultivar.

Orandabeni. Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû*, No.10, p.153. Different reading for **Orandakô.**

Orandagasa. (Dutch Umbrella), (*C.japonica*), Chûgai Nursery Catalogue, 1934-1935, p.32 as 'Oranda-gasa': Crimson variegation on white. Single. In 1937 McIlhenny released in USA, what appears to be a rose-pink form of the cultivar under this name. To separate the two forms Fendig in 1953 listed them as 'Oranda Gasa (1)' and 'Oranda Gasa (2)'. Synonym: 'Oranda Gasa (1)'.

Orandahaku. (Holland White), (*C.japonica*), Itô, Ihei, 1733, *Chikinshô Furoku*, vol.III; Itô, Jukyû, 1739, *Honzô Hanamaki'e;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Small size, white, formal double with pink vertical stripes on most petals. Different readings: 'Orandashiro', 'Orandajiro'. See: JCS., 1969, *Tsubaki*, No.7, p.25 & ibid. 1983, No.22, p.122. (Believed extinct.)

Orandahaku-tsubaki. Synonym for **Orandashiro-tsubaki.**

Orandajiro. Different reading for **Orandahaku.**

Orandakô (Holland Red), (*C.japonica*), Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.15; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki*; See: JCS., 1983, *Tsubaki*, No.22, p.124 & ibid, 1969, No.22, p.25: Purplish red double, thick petals with white streaks. Vigorous, upright growth. Leaves elliptic to oblong, flat, venation slightly impressed, margins coarsely crenate-serrate. Flowers mid-season to late. Different readings: 'Orandabeni', 'Orandakoh', 'Oranda-kou'. Note: Although 'Orandabeni' was first listed as a transliterated name by Chûgai Nursery Catalogue, 1934-1935, p.32, **Orandakô** is accepted as the correct transliteration by JCS. See: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.207 & p.364; Tuyama, !968, *Camellias of Japan*, pl.390; *Encyclopedia of Camellias in Colour*, vol.I, 1973, pl.429 & p.355; Macoboy, 1981, *The Colour Dictionary of Camellias*, p.109; Seibundô Shinkôsha, 1979, *Senchinshû*, p.29 & p.205. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.401. Originated in Kantô, Japan. Similar to **Hitosuji, Chitosegiku, Momijigari** and **Gochi-no-musume.** Synonym: 'Orandakô-tsubaki'. Chinese synonym 'Helanhong'.

Orandakô Tsubaki. (Holland Red Camellia), (*C.japonica*), Itô, Ihei, 1733, *Chikinshô Furoku*, vol.III: Deep pink, striped white, small formal double. Originated in Japan. Thouht to be synonym of **Orandakô**. See Kyôto Engei Kurabu, 1960, *Tsubaki Tokushû*, No.1, p.83.

Orandakoh. Different reading for **Orandakô.**

Orandashiro-tsubaki. (Holland White Camellia), (*C.japonica*), Itô, Ihei, 1733, *Chikinshô Furoku;* Yashiro, 1841, *Kokon Yôrankô:* Flower small size, white, thick, double. Synonym: 'Orandahaku-tsubaki'. Originated in Japan. (Believed extinct.) It is not certain but it may have

been the same as **Orandahaku.** See: Kyôto Engei Kurabu, 1960, *Tsubaki Tokushû*, No.1, p.83.

Orandashiro. Different reading for **Orandahaku.**

Orange Home Pink. (*C.japonica*), Wilmot, 1943, *Camellia Variety Classification Report,* 1943, p.12. No description. Originated in USA. (Believed extinct.)

Orange Red. (*C.reticulata* hybr.), Dryden, 1970, SCCS., *The Camellia Review*, vol.31, No.6, p.23: A true orange-red, regular semi-double with 13-16 cm flowers of good substance. Originated by Frank Maitland, California, USA.

Orchid. (*C.sasanqua*), Fruitland Nursery Catalogue, 1949-1950, p.30: Medium to large, lavender-pink, single. 9 cm across with 6 petals, tips indented. Stamen cluster up to 2.5 cm in diameter. Upright, compact growth. Early flowering. Originated by Fruitland Nurseries, Augusta, Georgia, USA from seed of an unknown parent. First listed in Fruitand's catalogue of 1948-1949 as 'Lavender Queen', but, as this name had previously been used, it was changed to **Orchid** in their following catalogue.

Orchid Beauty. *(C.x williamsii).* ACS, *The Camellia Journal*, Dec. 2002, p.20, Reg. No.2584. A *C.saluenensis* x *C.japonica* seedling with light orchid pink, formal double flowers edged in darker pink. Originated by Nuccio's Nurseries, Altadena, Calif., USA, and introduced in their 2001 catalogue. Nuccio's #9406. *American Camellia Yearbook,* 2002, p.129, colour photo p.c10. The seedling first flowered in 1987. Flowers measure 10-11.5 cm across with 80 petals. Plant is upright and open, with dark green leaves light green leaves 5.7 cm long x 3.2 cm wide.

Orchid Mist. *(C.sasanqua).* ACS, *Yearbook*, 2013, p.131 with colour photo, Regn. No.2911; Originated and registered by C.M. and Lillian Gordy, Ocala, Fla., USA. Propagated by Loch Laurel Nursery, Valdosta, Ga. A 10 year old seedling, parentage unknown, first flowered in 2009. Small to medium size, 7.5cm diameter x 1.3cm deep, flower is single with 6 petals, colour soft orchid. Soft gold anthers and cream filaments. Upright, vigorous growth. Dark green leaves average 5cm x 2.5cm with medium serration. Flowers early.

Orchid Pink. (*C.japonica*), SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* A sport of **Colonial Lady** - Light pink centre petals with considerable orchid pink and bordered pink, sometimes white spotted; otherwise flower form and plant habit the same as **Hikarugenji.** See illustration, p.270, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II. Originated by E.H. Carter, California, USA. Synonyms: 'Dolly Madison', 'Orchid Pink Fragrance'. Chinese synonym: 'Zifen'.

Orchid Pink Fragrance. Overlook Catalogue, 1948-1949. Synonym for **Orchid Pink.**

Orchid Princess. *(C.x williamsii*), Nuccio's Nurseries Retail Price List, 1987-1988, p.19: Pale orchid pink. Large semi-double. Bushy, vigorous, upright growth. Blooms mid-season to late. ACS., May, 1989, *The Camellia Journal*, No.2, vol.44, p.9, Reg. No.2132. *American Camellia Yearbook*, 1989, p.126: 13 year old seedling that first bloomed 1980. Originated by Nuccio's Nurseries, Altadena, California, USA.

Orcival. *(C.sasanqua).* Claude Thoby, 1993, *Camélias*, pp.12, 15, 16, 65, colour photo p.33: Single to semi-double with petals creped and undulate. White with a large group of stamens. Scented. Small, deep green, elliptic leaves. Originated in France. Blooms very early to early.

Orcraluca. Guilfoyle Nursery Catalogue, 1866, p.19. Orthographic error for **Ochroleuca.**

Ordino-nishiki. McIlhenny 1935, *List of Camellias....* Corruption of the Japanese name **Oridono-nishiki.**

Oregon Donckelaarii. Oregon Camellia Society, 1945, *Camellias as a Hobby*, p.15. Synonym for **Finlandia.**

Ôrenge. (Large Lotus Flower), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, #36: Large, snow-white, full double, convex in shape. Yashiro, 1841, *Kokon Yôrankô*, vol.306; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayaose Irotsuki:* Snow-white, double, protruding, large size. Originated in Japan. (Believed extinct.) Different readings: 'Ôrenka', 'Dairenge'. See: JCS., 1969, *Tsubaki*, No.7, p.24 and Kyôto Engei Kurabu, 1960, *Tsubaki Tokushû*, No.1, p.77.

Orenka. Different reading for **Ôrenge.**

Orfeo. (*C.japonica*), van Houtte Catalogue, 1841, 7:14. No description. van Houtte Catalogue, 1844-1845, 18:16: Imbricated, bright red. Berlèse, 1843, *Iconographie*, pl.271 as 'Orphêe': Deep rose with white blotches. Imbricated. Originated in Italy by Mariani. Franchetti, 1855, *Collezione di Camelie*, p.49: Vivid red, streaked with white. Spiral imbrication. Orthographic variants: 'Orpheo', 'Orphèe', 'Orphee', 'Orphea'. Synonyms: 'Orfeo Nova', 'Orpheu Nova', 'Orphan Nova'.

Orfeo Nova. van Geert Nursery Catalogue, 1845. Synonym for **Orfeo.**

Ôri. (Cherry Village), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.25 colour photo, p.203, description: Small, pink, tubular, single with 5 petals of irregular sizes, notched. Compact central stamen column. Leaves bright green, broad lanceolate to elliptic; apex blunt acute; base cuneate; margins finely crenate. Originated in Kantô area, Japan.

Oribe. *(C.japonica),* Hamamatsu, 1825, *Setsuyô Kikan*, vol.23. No description seen. Originated in Japan. (Believed extinct.)

Orido. (Folding Doors), (*C.rusticana*), Seibundô Shinkôsha, 1973, *Garden Life*, No.5, colour photo, p.12. Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.84: White, rose form to peony form double, a little irregularly imbricated with wavy petals. Large size, up to 12 cm across. See colour photos: *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.388; Seibundô Shinkôsha, 1979 *Senchinshû*, p.30 & description p.205. Named by Kawamura, Yaichi. Released by Susumu Ishizawa in 1972. Originated in Higashi-kanbara-gun, Niigata Prefecture, Japan. Different reading: 'Orito'.

Oridono-nishiki. (Weaving Hall Brocade), (*C.japonica*), Chûgai Nursery Catalogue, 1934-1935, p.32: Crimson variegation on white, double. Giant sized flower. Tuyama, 1968, *Camellias in Japan*, pl.330, p.167, description, p.188: Leaves elliptic, shortly acuminate, serrulate; petioles a little hairy. Flower single, white, cup-shaped, a few striped red in various degrees. Petals broad, over-lapping. Flowers mid-season to late. The same tree can bear white striped red, solid red or red striped with white. Originated in the Hyôgo Prefecture, Japan. Corruption of name: 'Ordono-nishiki', 'Oridino-nishiki'. Synonym: 'Dainiji'. See Seibundô Shinkôsha, 1979, *Senchinshû*, pp.30, 205. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.258. Resembles **Shiratama-shibori, Shibori-rôgetsu.**

Orient. Gerbing's Azalea Garden Catalogue, 1938-1939. Synonym for **Rose Amenone** as 'Rose Emery'.

Oriental. (*C.japonica*), Alex Verschaffelt, 1847, Catalogue, p.60. No description. Fruitland Nursery Catalogue, 1941-1942, p.27: Deep red, medium size, peony form. Flowers mid-season. Originated in USA at Fruitland Nursery, Augusta, Georgia.

Oriental Bride. (*C.japonica*), Fruitland Nursery Catalogue, 1944-1945: Pinkish red. Medium size, peony form. Vigorous growth. Originated in USA by Malbis.

Oriental Echo. (*C.reticulata*), *American Camellia Yearbook*, 1972, p.134, Reg. No.1196: Clear pink with misty silver overcast and centre petals edged and moired white. Medium to large formal to

rose form double with petals rounded at edge, slightly notched and waved, and small, upright centre petals. Upright but pendulous growth. Mid-season flowering. Originated by C.W. Lattin, Lauderdale, Mississippi, USA as a seedling of *C.reticulata* 'Crimson Robe', (**Dataohong**).

Oriental Light. Huang, 1979, *American Camellia Yearbook*, p.119. Synonym for **Dongfangliang.**

Oriental Red. (*C.japonica*), Vanderbilt, 1940, *Camellia Research,* p.6. No description. Originated in USA. (Believed extinct.)

Orientala. Rubel, 1936, *Wholesale Price List*, No.74, p.4. Synonym for **Rose Anemone** as 'Rose Emery'.

Orientale. (*C.japonica*), Fratelli Rovelli Catalogue, 1852, p.23: Very large, imbricated, red. Luzzatti Catalogue, 1853. No description. Verschaffelt, 1855, *Nouvelle Iconographie*, Book VI, pl.I. Received from Mr Burnier, Florence, Italy. Larger than average blooms, formed of regularly imbricated petals, rounded in the exterior rows, lanceolate acute towards the centre, all of a uniform cherry-red. Orthographic variant 'Orientalis'.

Orientalis. Verschaffelt Catalogue, 1849-1850, p.48. Orthographic variant for **Orientale.**

Original La Peppermint. Lindo Nursery Catalogue, 1940-1941. Synonym for **La Peppermint.**

Origlomana. Hazlewood & Jessep, 1972, *Check List - Camellia Cultivars from Nursery Catalogues.* Orthographic error for **Oxriglomana.**

Origlomana Superba. Hazlewood & Jessep, 1972, *Check List - Camellia Cultivars from Nursery Catalogues.* Orthographic error for **Oxriglomana Superba.**

Orihime. (Weaving Princess), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.30, colour photo, p.205, description: Small size, single, white with broad streaks of red and a large, compact stamen column. Leaves broad-lanceolate, wavy at the edge, bright green, apex acuminate, margins finely serrulate. Originated in Yonezawa City, Yamagata Prefecture, Japan. Named and released by Tokuji Ôoka in 1972.

Oriole. *(C.japonica),* Galleotti, M. 1852, *Journal d'Horticulture Pratique de la Belgique ou Guide des Amateurs et Jardiniers*, vol.10. p.12: Double, pink. Originated in Belgium.

Orito. Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.84; *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.388. Different reading for **Orido.**

Orizuru. (Folded Paper Crane), (*C.sasanqua*), Minagawa, Iza'emon, 1885, *Nisshô'en Chabaifu:* Small size, spiral petals. Originated in Japan.

Orizuru. (Folded Paper Crane), (*C.rusticana*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.30, colour photo, p.205, description: Medium size, red, semi-double with 3 rows of elliptical petals, a small centre of stamens with one or two small, erect petals in a lotus shape. Leaves mid-green, broad-ovate, margins finely serrulate, apices acuminate. Plant habit bushy. Originated in Tochio City, Niigata Prefecture, Japan. Synonym: 'Orizuru-Niigata'.

Orizuru (Chubu). (Folded Paper Crane). *(C.japonica),* Nippon Tsubaki - Sasanqua Meikan, 1998, p.52 with colour photo; English translation p.34. Medium size, pink, tubular to cup-shaped single, cylindrical stamen column. Flowers mid-season to late. Leaves narrowly elliptic, medium size, plicate at centre rib, wavy. Upright, tends to grow on multiple stocks. The original tree is growing at a temple in Inazawa City. Collected and named by Ayaon Satô around 1952.

Orizuru (Kansai). (Folded Paper Crane). *(C.x williamsii). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.52 with colour photo; English translation p.34. Medium size, brilliant pink semi-double. Flowers mid-season. Leaves elliptic, medium size. Upright, vigorous growth. A chance *C.saluenensis* seedling, named and released by Kazuo Yoshikawa in 1980s.

Orizuru-Kantô (Folded Paper Crane from Kantô), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.29, colour photo, p.205 description: Large, semi-double, white finely speckled and streaked crimson, opening bell-shaped with petals reflexed. Central stamen cluster with stamens of unequal length. Leaves mid-green, small, elliptic, apex acute, margins serrulate. Originated in Kantô, Japan.

Orlanda. Lunaret, 1879, *Revue Horticole*, p.168. Orthographic error for **Orlando.**

Orlando. (*C.japonica*), Cachet Catalogue, 1840-1841, p.2. Red. Van Houtte Catalogue, 1841, 7:14. No description. Trillon, 1843, Catalogue, p.7: Imbricated, bright red. Van Houtte Catalogue, 1844-1845, 18:16: Imbricated. A striking red. Originated in Italy. Orthographic error: 'Orlanda'.

Ornata. (*C.japonica*), Jacob-Makoy, 1828, Catalogue, p.5. No description. Sweet, 1830, *Hortus Britannicus*, ed.2, p.74: Pink waratah. Berlèse, 1837, *Monographie*, ed.1, 82.128: Leaves medium, horizontal, green; bud large, scales almost black; flower large, broad, double, of a cherry-red, mixed with a delicate violet, well formed having some resemblance to that of Camellia Rosa Sinensis. Synonyms: 'Ornata Coccinea', 'Venusta Coccinia'.

Ornata Coccinea. van Houtte Catalogue, 1842, 955. Synonym for **Ornata.**

Ornata Elegans. (*C.japonica*), Verschaffelt Catalogue, No.50, 1844, p.22. Originated in Italy. No description. (Believed extinct.)

Ornata Rosea. (*C.japonica*), Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani. Ridolfi, Florence Nursery Catalogue, 1848, p.8. Originated in Italy. No description. (Believed extinct.)

Ornata Rubra. (*C.japonica*), Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani. Verschaffelt Catalogue, 1847-1848, p.60. Originated in Italy. No description. (Believed extinct.)

Ornata M. (*C.japonica*), Shneiderff, Enrico, ed., 1841, *Catalogo delle piante che si Trovano nel Giardino del Sig. Shneiderff.* p.9. No description. Originated in Italy. (Believed extinct.)

Ornata T. (*C.japonica*), Shneiderff, Enrico, ed., 1841, *Catalogo delle piante che si Trovano nel giardino del Sig. Shneiderff.* p.9. No description. Originated in Italy. (Believed extinct.)

Ornata Variegata. (*C.japonica*), Auguste van Geert Nursery Catalogue, No.74, 1876-1877, p.32: No description. Auguste van Geert Nursery Catalogue, No.83, 1882-1883, p.93: Attractive, medium sized foliage. crenate. glossed, with a lightly yellowish white, blotched or spotted with diverse shades of green. Flower single red. (Possible synonym for **Benten**).

Ornata Vera. *(C.japonica)*, Berlèse, *Monographie*, ed.2, pp.97-98: This is the second camellia to carry the name 'Ornata'. The flower is 11 cm across, of dark rose to clear cherry-red. The exterior petals are in a single row, large and overlapping. Those at the centre are gathered in a bunch, forming a globe over 8 cm across and separate from the guard petals. Originated in England.

Orphalia. Fréres Noisette, Nantes Nursery Catalogue, 1857, p.37. Orthographic error for **Orsphalii.**

Orphan Nova. da Silva. 1880. *Forcing Varieties of Camellias in Oporto*, p.16. Orthographic variant for 'Orfeo Nova', synonym for **Orfeo.**

Orphea. Seidel, 1846, Pflanzen Catalog, p.9. Orthographic error for **Orfeo.**

Orphee. Jacob Makoy et Cie Nursery Catalogue, 1841, p.11; Cachet Catalogue, 1840-1841. p.2. Orthographic error for **Orfeo.**

Orphèe. Berlèse, 1843. *Iconographie.* pl.271. Orthographic variant for **Orfeo.**

Orpheo. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic error for **Orfeo.**

Orpheu Nova. Loureiro Catalogue No.9. 1872-1873. Orthographic error for 'Orfeo Nova', Synonym for **Orfeo.**

Orsolina. Harrison, ed., 1846, *Floricultural Cabinet*, 1846, p.90. Orthographic error for **Orsolini.**

Orsolini. (*C.japonica*), Van Houtte Catalogue, 1841. 7:14. No description. *Floricultural Cabinet*, 1845, p.90: Delicate pink, very large double. Berlèse, 1849, *Annales de la Société Central d'Horticulture, de France.* vol.40. p.313: Flower ranunculiforme (formal double), perfect, 10 cm across. of deep orange red with nuances similar to 'Princesse Baciocchi' which it resembles, only without the rays of white. Petals in 7-8 rows, broad, rounded, emarginate, some entire with deep red at the base. Originated in Italy. Orthographic error: 'Orsolina'.

Orsonnii. (*C.japonica).* Verschaffelt Catalogue, No.50, 1844, p.22. No description. (Believed extinct.)

Orsphalii. (*C.japonica*), *Catalogue des plantes la Société Royale de Belgique*, 1842, p.23. No description. Orthographic error: 'Orphalia'. (Believed extinct.)

Ortensia Franchetti. (*C.japonica*), Anonymous, 1876. *R. Società Toscana di Orticultura Bollettino.* A very large, pink, formal double. Originated in Italy by Franchetti, Florence.

Ortensia Luzzati. Mercatelli Catalogue. 1881. Orthographic error for **Ortensia Luzzatti.**

Ortensia Luzzatti. (*C.japonica*), van Houtte Catalogue, 1860-1861, 83:50: Shaped like an immense hundred-petalled rose; splendid pink with unusually large, round petals, lightly notched. Tirocco, 1928, *La Camellia*: Camellia red at the circumference, centre rose, imbricated and cup-shaped. Originated in Italy by Luzzatti, Florence. Orthographic errors: 'Ortensia Luzzati', 'Ortenzia Luzzati', 'Ortenzia Luzzati', 'Ortenzia Luzatti', 'Ortensis Luttzati'.

Ortensis Luttzati. Louis Leroy, 1862, Catalogue, p.124. Orthographic error for **Ortensia Luzzatti.**

Ortenzia Luzatti. van Houtte Catalogue, 1871-1872, 140:368. Orthographic error for **Ortensia Luzzatti.**

Ortenzia Luzzati. van Houtte Catalogue, 1869-1870, 129:173. Orthographic error for **Ortensia Luzzatti.**

Ortenzia Luzzatti. van Houtte Catalogue, 1868. 123:57. Orthographic error for **Ortensia Luzzatti.**

Orthello. (*C.japonica*), *Catalogue des plantes la Société Royale d'Horticulture de Belgique*, 1842, p.23. No description. Charles van Geert, 1850, Catalogue, No.117, p.12: Peony form, transparent white, streaked and sprinkled with bright pink. Van Houtte Catalogue, 1851, 44:20: Soft white, streaked with carmine red, three rows of imbricated petals, centre tufted. Originated in Italy. Orthographic error: 'Othello'.

Orton Centerbell. (*C.japonica).* Orton Price List, 1947-1948. No description. Originated in USA.

Orton Number 75. (*C.japonica*), Orton Price List, 1953-1954 as 'Orton No.75'. No description. Originated in USA.

Orton Pink. Orton Price List, 1947-1948. Synonym for **Brooklynia.**

Orton's Pride. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Dixie.**

Ô-sado. (Great Sado Island), (*C.japonica*), *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.392, p.159, description, p.255: Large, white, semi-double to incomplete peony form double, 11 cm across with 12 large petals in 2-3 rows, with a centre of large, spreading stamens with some small erect, twisted petals intermingled; anthers pale yellow, filaments creamy. Leaves elliptic, dark green; apex acute, recurved; margins serrulate. Originated in Sado Island, Niigata Prefecture, Japan. For colour photo see: Seibundô Shinkôsha, 1979, *Senchinshû*, p.26. Collected, named and released by Tokuji Ôoka in 1970. Note: This is part *C.rusticana.*

Ô-sagara. (Big Sagara), (*C.japonica*), Hirayama, Tokuo, (late 17th century), *Chinzu Byôbu'e.* See Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, p.48; Hamamatsu, 1825, *Setsuyô Kikan*, vol.23; *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.665: Large, dark crimson, cup-shaped single with a spreading stamen cluster and a few, small petaloids. Originated in Japan. (Believed extinct.)

Osage-gami. (Hair Style for Young Girls), (*C.rusticana*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.28, colour photo, p.204, description: Small, bright red, semi-double to open, incomplete, rose form double. The centre consists of a few infertile stamens and small petals. Leaves, yellowish green, elliptic, apex blunt acute, margins serrulate, petioles tomentose. Originated in Kariba-gun, Niigata Prefecture, Japan. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1969.

Ôsaka. (Place Name). (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.3: Large, white, single with a large, central stamen ring and 2-3 erect petals on edge of stamens; opens flat. Originated in Japan. (Believed extinct.)

Ôsaka. (Place Name), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.591: Medium size, white, semi-double with compact stamen column, yellow anthers and white filaments. Originated in Japan. (Believed extinct.)

Ôsaka-daihannya. (Ôsaka Great Demoness), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.589: Medium size, open peony form, white with a pink flush at the base of the petals and fine, crimson striping. Originated in Japan. (Believed extinct.)

Osakadzuki. Chûgai Nursery Catalogue, 1935-1936, p.26. Different reading for **Ôsakazuki.**

Osaka-dzuki(2). Fendig, 1953, *American Camellia Catalogue.* Different reading for the *C.sasanqua* **Ôsakazuki.**

Ôsaka-mikuni. (Ôsaka - Three Provinces), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.572: Small, fuchsine pink, open peony form, incomplete double with white borders and deep crimson streaks. Resembles **Hikarugenji**. Originated in Japan. (Believed extinct.)

Ôsaka-mokkô. ('Mokkô' from Osaka), (*C.japonica*), *Chinka Zufu*, (before 1700), (*C.japonica*), Watanabe, 1969, pl.27: Large, single. white with large diameter stamen column. Originated in Japan. (Believed extinct.)

Ôsaka-shiratama. (Osaka White Jewel), (*C.japonica*), Izu-Ohshima 1980, *Hawaii Botanic Gardens List* as 'Osakashiratama'. No description. Originated in Japan.

Ôsakazuki. (Large Cup), (*C.japonica*), Uekiya, Seigorô. 1874, *Tsubaki Hyakuro no Zu*, vol.1, No.40: Large. semi-double, deep pink with white spots, opening flat with a central stamen column. Originated in Japan. (Believed extinct.) See Kyôto Engei Kurabu, 1975, *Tsubaki Tokushû*, No.73, p.40.

Ôsakazuki. (Large Cup), (*C.sasanqua*), Minagawa, Iza'emon, 1885, *Nisshô'en Chabaifu;* Nihon Shubyô Co. Catalogue, 1910: Deep pink. Large. single to semi-double. Vigorous, compact growth. Flowers mid-season. Originated in Kantô area, Japan. Different reading: 'Taihai', 'Osakadzuki', 'Ohsakazuki'. Synonyms: 'Daishuhai', 'Ôsaka-dzuki (2)', 'Ôsakazuki'(Edo). Sport: **Taishô-nishiki.**

Ôsakazuki (Edo). Hakoda, 1987, *Tsubaki.* No.26, p.46. Synonym for **Ôsakazuki.**

Ôsakazuki-Kumamoto. (Large Cup from Kumamoto), (*C.sasanqua*), JCS., 1987, *Tsubaki*, No.26, p.46: Medium size, deep red, semi-double. Originated in Kumamoto Prefecture, Japan.

Ôsakazuki. Seibundô Shinkôsha, 1979, *Senchinshû*, p.233. Synonym for **Dewatairin.**

Osakazuki. SCCS, 1960, *Camellia Nomenclature*, p.88. A synonym for **Dewatairin** as 'Daitarin'.

Osake-dzuki. (*C.japonica*), SCCS., 1954, *The Camellia. Its Culture and Nomenclature*, p.70: White and rose-red. Medium formal double. A corruption of the Japanese name 'Ôsakazuki'; however the description does not apply to any of the Japanese cultivars of this name and would seem to have originally been based on erroneous identification, therefore it is let stand to distinguish this particular cultivar.

Ôsaki. (Large Promontory), (*C.rusticana*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.25, colour photo, p.203, description: Medium size, semi-double, soft orchid pink fading almost to white at the centre. Widespread stamens with some white petaloids intermixed. Leaves dull, dark green, obovate to broad-ovate, apex blunt acute, margins shallowly serrate, petioles tomentose. Originated in Minani-uonuma-gun, Niigata Prefecture. Japan with a private family. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1967..

Osaraku. (Pleasure of a Long Life), (Higo), Taniguchi, 1912. *Chinka Kyôkan:* Very light pink with spreading stamens; large, 9-10 cm across with 6-7 wide, overlapping petals with crinkled edges. 130 stamens, pale yellow anthers, white filaments. Mid-season blooming. Originated in Kumamoto Prefecture, Japan. See: Adachi, 1960. *Camellia. Its Appreciation and Artistic ...* p.61; Hiratsuka. 1964, *Higo Camellia*, p.16; *Encyclopedia of Camellias in Colour.* vol.I. 1972, pl.53, p.299; Seibundô Shinkôsha, 1979. *Senchinshû.* pp.28, 204; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.118. Synonym: 'Osoraku'. Note: It is said that the name 'Osoraku' was popular in the Edo era. It means 'perhaps', implying that 'perhaps this is the best camellia'.

Ô-sarasa. (Large Patterned Calico). (*C.japonica*), *Uekiya Bunsuke Hikki.* 1830; *Chinka Zufu*, (before 1700), Watanabe, 1969. pl.26: Very large, semi-double to rose form double of 4 rows of imbricated petals, white with a close pattern of red stripes and a small, central stamen column. Originated in Japan. (Believed extinct.) See: Hiratsuka, Taizô, 1964, *Higo Camellia*, p.124.

Ôsarasa. (Old Man Calico). (*C.japonica).* Shirai-Bunko, 1789. *Shoshiki Hanagatachô* Double, pinkish white with broad red stripes. See: Kyôto Engei Kurabu, 1964. *Tsubaki Tokushû*, No.5, p.80. Kasuya, Kamegorô, 1859. *Tsubaki Irohanayose Irotsuki.* See JCS., 1969. *Tsubaki*, No.7, p.25. Originated in Japan. (Believed extinct)

Osbernea. L.L. Liebig, 1839, *Verzeichnis von Warmen und Kalten Hauspflanzen...,* p.10. Orthographic error for **Osburnea.**

Osbornea. Burdin Maggiore & Co. Catalogue. 1835, p.38. Orthographic error for **Osburnea**.

Osbornia. Seidel, 1846, Pflanzen Catalog, p.9. Orthographic error for **Osburnea.**

Osburnea. (*C.japonica*), Courtois. 1833. *Magazin d'Horticulture.* l(pt.D):316. No description seen. Berlèse, 1837, *Monographie.* ed.1. pp.82, 128: Leaves, 8 cm x 3.5 cm. oblong. glossy, flat. acuminate, recurved. serrulate. Flower large. cherry-red, like 'Coniophyllaeflora' . that is. composed of 8 petals in the circumference. many single or petaloid stamens, short, united in a fascicle, striped with pale red and forming a depressed. bowl formed corolla. Originated in England. Orthographic errors: 'Osbornia', 'Osbornea', 'Osbernea', 'Osburnia'.

Osburnia. Verschaffelt, 1844, Catalogue, No.50, p.22. Orthographic error for **Osburnea.**

Oscar B. Elmer. (*C.japonica*), *American Camellia Yearbook*, 1978. p.133, Reg. No.1493: A very large. dark velvet red, semi-double. *C.japonica* seedling of **Dr Burnside** x **Reg Ragland.** Flowers mid-season. Originated by Jack Mandarich, Menlo Park, California. USA. The 6 year old seedling bloomed in its fourth year. Flower has 40 petals, 20-30 petaloids, yellow anthers. Size is 15 cm across x 7 cm deep. Plant growth is upright. dense and medium in rate with dark green leaves, 15 cm x 10 cm. See colour photo on the front cover, ACS., 1979, *The Camellia Journal.* vol.34, No. 1. Abbreviation: 'Oscar Elmer'. Sport: **Oscar B. Elmer Variegated.** Chinese synonym 'Aosika'.

Oscar B. Elmer Variegated. (*C.japonica*), Bob Wine's Nursery Catalogue, 1985-1986, p.3 as 'Oscar B. Elmer Var.': A virus variegated form of **Oscar B. Elmer** - Dark velvet red blotched with white. Originated in USA.

Oscar Borrini. (*C.japonica).* Scarlatti Catalogue, 1888: White. formal double. very large. streaked pink and red. Originated in Italy by Borrini. Florence. See colour photo, *International Camellia Journal.* No.20, 1988, between p.48 and 49. Chinese synonym 'Bolini'.

Oscar Elmer. Cannon, 1978, ACS., *The Camellia Journal,* vol.33. Abbreviation for **Oscar B. Elmer.**

Oscar Ullrich. Seidel, 1870, Pflanzen Catalog, p.10. Orthographic error for **Oscar Ulrich.**

Oscar Ulrich. (*C.japonica).* Anonymous. 1857, *Giardiniere.* No description. Mercatelli Catalogue, 1881, p.31: Bright violet rose. lighter in the centre with a few white stripes, Imbricated. Originated by Sangalli, Milan. Italy. Orthographic error 'Oscar Ullrich'.

Osceola. (*C.japonica*), Hogg. Thomas, 1838, *Magazine of Horticulture*, vol.4, p.155. No description. Originated by M. Floy, New York. USA. (Believed extinct.)

Ôsezaki. (Place Name). (*C.japonica*), Yokoyama & Kirino, 1989. *Nihon no Chinka.* p.228. colour photo and description: Medium size, dark red, with some fine purple veining, vase-shaped single, of 5 rounded, overlapping petals and a central stamen column with pinkish filaments, joined for the lower half, and yellow anthers. Leaves pale green, broad ovate, apices abrupt acute, margins serrate. Blooms mid-season. Originated in Gotô Island, Nagasaki Prefecture, Japan.

Ôshamu. (Magna Siamensis), (*C.japonica*), Kaempfer, 1712, *Amoenatatum Exoticarum* as 'Osjam'. No description. Originated in Japan. (Believed extinct.) See Andoh, 1989, *Tsubaki*, No.28, p.13, as 'Osjam'.

Oshidori-tsubaki. (Mandarin Duck Camellia), (*C.japonica*), Hino, Sukekatsu, 1632, *Sukekatsukyôki.* No description. Originated in Japan. (Believed extinct.) See: JCS, 1986, *Tsubaki*, No.27, p.14.

Oshima. (Male Island), (*C.japonica*), SCCS., 1951, *Camellia. Its Culture and Nomenclature:* Light pink striped deeper pink. Large semi-double. Vigorous, bushy growth. Originated in Japan.

Oshima Pink. *(C.japonica),* Nuccio's Nurseries Catalogue, 1995-1996: Light pink, single, small size. Medium, upright growth. Blooms mid-season. A selection from the wild camellias from Ôshima Island, made by Sostoshi Kimura, Hideo Shimizu and Hiroshi Terada, Japan.

Oshima Red. *(C.japonica),* Nuccio's Nurseries Catalogue, 1995-1996: Rose-red single. Small size flower. Shrub has medium, upright growth. Typical colour and form of **Yabu-tsubaki.** Selected from the wild by Sostoshi Kimura, Hideo Shimizu and Hiroshi Terada from Ôshima Island.

Oshima Variegated. *(C.japonica), Camellias,* Y.C. Shen, 2009, p.58 with colour photo as 'Oshima Var'; Single flower, about 4 cm diameter, colour not given. Leaves medium size, long-elliptic, bordered in light green. Growth dense, spreading and vigorous. Imported from Japan by Nuccio's Nurseries.

Oshima White. *(C.japonica),* Nuccio's Nurseries Catalogue, 1995-1996: White, single, small size flower that blooms mid-season. A shrub of medium, upright growth. Selected from the wild on Ôshima Island by Sostoshi Kimura, Hideo Shimizu and Hiroshi Terada.

Ôshimanioi. (Ôshima Fragrant), (*C.japonica*), Hagiya, JCS., 1982, *Tsubaki,* No.21, p.4; Hagiya, 1984, ACS., *The Camellia Journal*, vol.39, No.2, p.18 as 'Oshimanioi No.4': No description seen. Originated in Japan. Different reading: 'Oshimanioi'.

Oshima-sazanka. Satomi, 1958, *Nomenclature List of Sasanqua of Japan,* p.6. Japanese common name for *C.biflora* Makino.

Ô-shin. (Yellow Centered), (*C.rusticana*), Tuyama, 1968, *Camellias of Japan*, pl.115, p.58, description, p.121 as 'Oo-shin': Leaves olive green to green, oblong-elliptic, recurved; venation impressed, 6-7.7 cm long x 2.9-4.8 cm wide; petioles yellowish green, very hairy. Flowers thinly semi-double, widely cup-shaped, 7-10 petals, pink, (Rose-pink 427/2) but deeper pink (Rose-pink 427/1) in the centre, waved and wrinkled. Staminal tube with large anthers and cadmium yellow filaments. Flowers mid-season to late. Originated at Shinbô, Kanazawa-shi, Ishikawa Prefecture, japan.

Oshio. (Place name), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pls. 346 & 635: Soft pink, softening to petal edge, informal, incomplete double with outer guard petals and a fountain of tall, erect, centre petals. Originated in Japan. (Believed extinct.) Different reading: 'Koshio'. Resembles Hagoromo. See: Kyôto Engei Kurabu, 1970. *Tsubaki Tokushû*, No.10, p.153.

Ôshiradama. Different reading for **Ô-shiratama.**

Ô-shiragiku. (Large White Chrysanthemum), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, #26; Yashiro, 1841, *Kokon Yôrankô*, vol.306, (Ichijima reprint, 1906): Large, snow-white flower with a red splash. Kasuya, Kamegorô,1859, *Tsubaki Irohanayose Irotsuki:* Large size, white, double, like **Shiragiku.** Originated in Japan. (Believed extinct.) See: JCS., 1979, *Tsubaki*, No.7, p.33.

Ô-shirahasu. (Large White Lotus), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, #99; Yashiro, 1841, *Kokon Yôrankô*, vol.306. (Ichijima reprint, 1906, p.341.): Large, white, semi-double flower with pointed petals. Kasuya, Kamegorô,1859, *Tsubaki Irohanayose Irotsuki:* Large size, white, lotus shape. See JCS., 1969, *Tsubaki*, No.7, p.27 which reads this as 'Daihakuren'. Different readings: 'Daihakuren', 'Ôhakuren', 'Daibyakuren', 'Taihakuren'. Originated in Japan. (Believed extinct.)

Ô-shirakumo. (Large White Cloud), (*C.japonica*), *Chinka Zufu*, (before1700), Watanabe, 1969, pl.668: Large, single, white flushed pink towards the centre with deep pink and crimson stripes. Originated in Japan. (Believed extinct.) There are several cultivars with this name.

Ô-shiratama. (Great White Jewel), (*C.japonica*), Mizuno, 1681, *Kadan Kômoku:* A large, white single flower. See JCS., 1965, *Tsubaki*, No.5, p.29. Originated in Japan. This cultivar name is in Hôrin's Diary, 1642, *Kakumeiki*, and it is illustrated in *Chinka Zufu* (before 1700). Watanabe, 1969, pl.142 as well as Mizuno, 1681. It is not certain if this is identical to the modern cultivar listed below. Different readings: 'Oo-shiratama', 'Oh-shiratama', 'Daishiratama'.

Ô-shiratama. (Great White Jewel), (*C.japonica*), Minagawa, 1933, *Chinkashû.* Colour plates and descriptions are given in: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.50, p.92, as 'Oo-shiratama'; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.66, p.59; Seibundô Shinkôsha, 1979, *Senchinshû*, p.26, description, p.204; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.49; Katei Gahô, ed. 1984, *Chabana Koyomi*, *vol.I. Tsubaki:* Large, white, cup-shaped single of 7 petals, 10 cm across with broad, round, overlapping petals, slightly crinkled on outer half, and a large stamen cylinder with yellow anthers and white filaments. Blooms early to mid-season. Originated in Kantô area, Japan. Synonym: 'Large Shiratama'. Different readings: 'Oo-shiratama', 'Oh-shiratama', 'Daishiratama'.

Ô-shirobotan. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, as 'Ô-shiro-botan'. Orthographic error for **Shiro-ô-botan.**

Ôshiro-tsubaki. (Large White Camellia), (*C.japonica*), *Jikeikyôki*, 1621. Andoh, JCS., 1986, *Tsubaki*, No.25, p.14. No description. Originated in Japan. (Believed extinct.)

Ôshô. (Royal Commander), (*C.japonica*), Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Semi-double, opening wide, with two tiers of outer petals, white with red streaks. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.77. (Believed extinct.)

Oshô. (Chief Buddhist Priest), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.421: Small, semi-double, white flushed pink in centre with crimson stripes. Originated in Japan. (Believed extinct.)

Ôshô. (Royal Commander), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.262, description, p.263 colour photo, as 'Ousho'; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.18: Large size, pink, bowl-shaped, single. Spreading Higo like stamens. Blooms mid-season to late. Originated in Chûbu area, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.44 with colour photo; English translation p.28. A chance seedling of **Surusumi.** Leaves broadly elliptic, large. Upright growth. Named and released by Minoru Satô in 1972.

Ôshôhai. Different reading for **Daishôhai.**

Oshô-kasuri. (Oshô Variegated), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.156: Medium size, semi-double, white with pink and crimson streaks. Originated in Japan. (Believed extinct.)

Ôshôkun. (Personal Name), (*C.japonica*), Kanaoka Camellia Garden, 1966; Tuyama, 1968, *Camellias of Japan*, pl.378, p.192, description, p.202 as 'Oo-shôkun': Believed to be a sport of **Shuchûka.** Leaves oblong to narrow-elliptic. Flowers complete formal double, pale pink, scantily striped rosy red (Spinel red 0023/1), petals narrowly obovate, emarginate. Mid-season to late flowering. Originated by Kanaoka-Chinju-en, Takarazuki-shi, Hyôgo Prefecture, Japan. 'Ôshôkun was a beautiful, tragic princess of old China. See: pl.403 & p.352, *Encyclopedia of Camellias in Colour*, vol.I, 1972; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.26, 203 as 'Osyôkun'; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.391 as 'Oushôkun'. Different readings: 'Ôsyôkun', 'Oo-shôkun', 'Ohshohkun', 'Oushôkun'. Chinese synonym 'Wangzhaojun'.

Ôshû-gasumi. (Mists of Ôshû), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki.* See: JCS., 1969, *Tsubaki*, No.7, p.34; ibid, 1982, No.21, p.102: Large, double flower. Corolla wide and variegated in various designs. Originated in Japan. Different reading: 'Ôsyûgasumi', 'Ôshûkasumi'. (Believed extinct.)

Osiride. (*C.japonica*), Anonymous, 1876, *R. Società Toscana di Orticultura Bolletino.* No description. Originated in Italy. (Believed extinct.)

Osmanthus. Lammerts, 1954, *American Camellia Yearbook*, p.5. Synonym for **Xiaoguiye.**

Osmanthus Leaf. SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* Synonym for **Xiaoguiye.**

Osmanthus Leaf Carmine. Bao, 1980, ACS., *The Camellia Journal*, vol.35, No.2, p.18. Western synonym for **Guiye Yanghong.**

Osmanthus Leaf Crimson. Yü & Bartholomew, 1980, *American Camellia Yearbook*, p.13. Synonym for **Guiye Taohong.**

Osmanthus Leaf Spinel Pink. Bao, 1980, ACS., *The Camellia Journal*, vol.35, No.2, p.18. Synonym for **Guiye Taohong.**

Osoman. Try, 1963, RHS., *Rhododendron & Camellia Yearbook*, No.17, p.136. Exhibited by Waterers in class 17 for any semidouble, self coloured variety, not red or white. No description. No valid listing located.

Osomomiji. (Late Maple Leaf), (*C.japonica*), Sakuden, 1630, *Hyakuchinshû:* Large, double, deep red of mounted form. Leaves not dense. Early flowering. Originated in Japan. See Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû.* 2, p.99. Originated in Japan. (Believed extinct.)

Osoraku. (Perhaps), (*C.sasanqua*), Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Deep pink. Large semi-double with long petals. Originated in Japan. Implies 'perhaps this is the best'. Name sometimes used as a synonym for the higo **Osaraku.**

Osoraku. (Perhaps), (*C.japonica*), *Uekiya Bunsuke Hikki*, 1830. Described only as a single flower. See Hiratsuka, Taizô, 1964, *Higo Camellia,* p.123. *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.301: Large size, semi-double with irregular petals, white with some crimson streaks. Originated in Japan. (Believed extinct.) Name sometimes used as a synoym for the higo **Osaraku.**

Osoraku-tsubaki. (Perhaps Camellia), (*C.japonica*), Watanbe, Takeshi, 1977, *Kyôtsubaki*, pp.73, 133. *Kyô no Tsubaki to Tera*, 1981, p.44-45: Very similar, if not the same as **Goshiki-chiritsubaki.** Originated in Japan. In the Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.20 it is stated that this camellia was the favorite of Kobori, Enshû, the Grand Master of the Tea Ceremony. This cultivar name was said to allude to 'Perhaps the Number 1 Camellia'.

Osore. (Fear), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.407: Medium size, semi-double, white with flecks of crimson and stamens in 4-5 fascicles. Originated in Japan. (Believed extinct.) There is a possibility that this is a synonym for **Osoraku.**

Osotake. (*C.japonica*), Ackerman, 1971, *American Camellia Yearbook*, p.113. No description. Originated in Japan. No valid listing located.

Ossolini. (*C.japonica*), von Biedenfeld, 1856, *Practische Grundlehren der Cultur von Camellien...*,p.49. No description. (Believed extinct.)

Osterfreude. *(C.japonica), Kamelien, 75 Years of Camellia*, Catalogue 2008, p.30 with colour photo. A chance seedling of a Higo parent, first flowered 2003 at 3 years old. A wide open, single flower, 6.5cm diameter, with 8 petals. Originated by Peter Fischer, Wingst, Germany. White, with some bright red patches and stripes. Deep green, glossy leaves, 6cm x 3cm, curved and lightly serrated. Main nerves slightly depressed. Average upright growth. Note; Although from a Higo parent, the stamen cluster in the published photo is not widely enough spread for this cultivar to be classified as a Higo.

Osterschnee. *(C.japonica), Das Deutsche Kamelien Buch*, 2014, Lucas Dhaeze-Van Ryssel; A seedling of **Snow Chan**, first flowered 2010. Originated by Peter Fischer, Wingst, Germany. A white, rose form flower, 8cm diameter, with a few yellow stamens mixed with the central petals and petaloids. Deep green, glossy leaves, 9.5cm x 6cm, main nerves depressed. Strong, upright growth.

Osterstrahlen. *Kamelien, 75 Years of Camellia,* Catalogue 2008 p.30 with colour photo. Originated by Peter Fischer, Wingst, Germany. A chance seedling of a Higo parent, first flowered before 2008. A single flower with wide open form, 7.5cm diameter. Base colour white, but heavily covered with bright red peppering and striping, giving an overall pink to red appearance. Leaves bright deep green, 7cm x 3.5cm, lightly serrated, and main nerves depressed. Vigorous, upright growth. Note; Although from a Higo parent, the stamen cluster in the published photo is not widely enough spread for this cultivar to be classified as a Higo.

Ôsuga. (Place or Personal name), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, pls.524, 561, 633, 710: These illustrations all show a medium size, single, white bloom with crimson streaks. Originated in Japan. (Believed extinct.) A possible synonym for **Ôsuka-tsubaki** in Kakumeiki, 1639.

Ôsugi. (Place or Personal name), (*C.japonica*), *Chinka Zufu,* (before 1700), Watanabe, 1969, pl.201: Medium size, single, white with compact stamen column, yellow anthers, white filaments. Originated in Japan. (Believed extinct.)

Ôsuka-tsubaki. (Ôsuka Camellia), (*C.japonica*), Monk Hôrin, 1639, *Kakumeiki.* No description. Originated in Japan. See Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû,* No.2, p.47. (Believed extinct.) Different reading: 'Ohsuka', 'Ôsuga-tsubaki'. Synonym: 'Ôsuka' in Hamamatsu, 1825, *Setsuyôkikan.*

Ôsumi. (Personal Name), (*C.japonica*), *Chinka Zufu,* (before 1700), Watanabe, 1969, pl.7, 699: Large, single with 6 petals, white with a pink blush at the base of the petals. A large diameter, compact, stamen column. Originated in Japan. (Believed extinct.)

Ôsumi-no-atai. (Personal Name), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.394, colour photo and description: Large size, bright crimson, formal double with 5-6 rows of long-ovate, channelled petals, with the row set apart dahlia-like. Leaves light green, obovate, apices long tapered acuminate, recurved, margins serrate. Late flowering. Originated in Kagoshima Prefecture, Japan. Ôsumi-no-Atari was a legendary person who lived near Shibushi-shore, Kagoshima Prefecture in ancient times. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.46 with colour photo; English translation p.29. The original trees are growing with private families in Tarumizu City and Kobuku City. Named and released by Kagoshima Camellia Society in 1980. Regarded as being the same variety as **Satsuma-kurenai** from Kurume.

Ôsyôkun. Satô, 1975, *Chûbu no Tsubaki*, p.78. Different reading for **Ôshôkun.**

Ôsyugasumi. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.10, p.152 as 'Ô-syu-gasumi'. Different reading for **Ôshû-gasumi.**

Ôta. (Personal Name), *(C.x williamsii*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.134, colour photo and description: Small size, pink, with a purplish cast, wide campanulate single, with 6-7 emarginate, overlapping petals of unequal length, and a centre cylinder of stamens with yellow anthers. Leaves ovate, mid-green, apices tapering acute, margins serrulate. Blooms early to mid-season. Originated in Saitama Prefecture, Japan as a natural seedling of a *C.x williamsii*. Ôta is the name of the originator. Named and released by Yoshizawa Camellia Nursery.

Otafuku-benten. (Fortune Goddess White Edges Leaves), (*C.japonica*), Mizuno, 1829, *Sômoku Kinyôshû*, vol.5 in the section on margined leaves. Originated in Japan. (Believed extinct.) Different readings: 'Otahuku-benten'. Synonym: **Tafuku-benten.** Corruption of Japanese name: 'Tahaku-benten'. See: Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû,* No.7, p.168.

Ôtagawa. (Ôta River), (*C.japonica*), Yokoyama & Kirino, 1989. *Nihon no Chinka*, p.69, colour photo and description: Medium size, faintest pink, single of 5 ovate, emarginate petals, opening wide cup-shaped with a central column of stamens with yellow filaments, joined for the lower third, and yellow anthers. Leaves glossy, dark green, elliptic to broad-elliptic, apices acuminate. Blooms mid-season. Originated in the Hiroshima Prefecture, Japan with a private family. Found and named by Fumio Hironaka, released by Nobuo Sasai in 1972.

Ôtahaku. (Ôta's White), (Higo), *Uekiya Bunsuke Hikki*, 1830, Best white, single flower. See: Hiratsuka, Taizô,1964, *Higo Camellia*, p.11, 123. Taniguchi, 1912, *Chinka Kyôkan:* Large, single, white, 7-9 cm across with 7-9 petals and 120 stamens in a circular formation, filaments white. Leaves, medium size, mid-green, oblong-elliptic. Originated in Kumamoto Prefecture, Japan. See colour photos and description: Tuyama. 1966, *Camellia Cultivars of Japan*, p.136 as 'Ootajiro'. Tuyama, 1968, *Camellias of Japan,* pl.30 as 'Oota-haku'; Seibundô Shinkôsha, 1979, *Senchinshû,* pp.26, 204. Different readings: 'Oota-haku', 'Ohta-haku', 'Ohta-shiro', Ôtashiro'.

Otahuhu Beauty. (*C.japonica*), Gibbon's Nursery Catalogue, 1904: Rose pink sport of **Aspasia Macarthur**, originated by the nurseryman Lippiatt, Otahuhu, New Zealand. See colour photos: Macoboy, 1980, *The Colour Dictionary of Camellias*, p.109; *Encyclopedia of Camellias in Colour* vol.II, 1978, pl.122, p.62. Synonyms: 'Aspasia Rosea', 'Duke of York', 'Rich Pink Paeoniaeflora' 'Paeoniaeflora Rosea', 'Gilbeau's Pink', 'Stiles Perfection Pink'(South), 'Pink Aspasia'. Chinese synonym: 'Yanaota'.

Otahuku-benten. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.153. Different reading for **Otafuku-benten.**

Ôtairakaori. Different reading for **Ôdaira-kaori.**

Otakechaya. (Place Name), (*C.japonica*), ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.18. No description. Originated in the Ehime Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.334. English translation p.227. Small to medium, pale pink, tubular to trumpet shaped single, cylindrical stamen cluster. Flowers mid-season. Leaves elliptic, somewhat large. Upright, vigorous growth. A wild japonica discovered by Satsuki Shinozaki in 1985, named and released by Harumi Tachibana.

Ôtama-tsubaki. (Large Noble Camellia), (*C.japonica*), Andoh, 1969, ACRS., *Camellia News*, No.36, p.22: Light pink, double, but the unusually large flower but, of a ball-shape, does not open completely. Such a habit is valued for flower arrangements. Leaf veins are in relief, bushy growth, late blooming. Originated by Ishikawa, Kiyoshi, Tokyo, Japan.

Ôtani-no-magatama. (Otani Jewels), (*C.japonica*), ICS., Apr. 1990, *Japanese Camellia Cultivar List*, p.18: Small size, dark vermilion red, campanulate single. Late blooming. Originated in the Shimane Prefecture, Japan. Possible synonym for 'Lionhead' as 'Shishigashira'.

Ôtani-tô-tsubaki. (Ôtani's Reticulata), (*C.reticulata*), Tuyama, 1968, *Camellias of Japan*, pl.414, p.210, description, p.212 as 'Ootani-tô-tsubaki': Leaves broadly oblong-elliptic to narrow obovate-elliptic, apex acuminate, margins strongly serrulate, venation impressed. Flowers semidouble to open peony form, bright rose-red. Late flowering. Introduced from China by Dr Tameto Okanishi, Shionogi Pharmaceutical Co., Ôsaka, Japan. Ôtani was a famous Buddhist priest. This cultivar is believed to be the Chinese reticulata **Shizetou.** Different reading: 'Ootani-tô-tsubaki'.

Otara Rose. *(C.saluenensis x C.reticulata*), Doak, 1958, *South Auckland Camellia Society Bulletin*, (3):11: Medium to large flowers, 11 cm across, bowl shaped, colour phlox-pink shading HCC.625/1 on petal edge to HCC.625/3 at centre. About 20 cupped, obovate petals. Originated by Dr. B. Doak, Papatoetoe, New Zealand from the cross *C.saluenensis x C.reticulata* **Captain Rawes**. Reg. No.4 with the New Zealand Camellia Society. See colour photo, front cover: *New Zealand Camellia Bulletin*, 1964, vol.III, No.6.

Ôtashiro. Satomi, 1956, *Camellia Varieties in Japan*, p.16 as 'Ohta-shiro'. Different reading for **Ôtahaku.**

Ôteki. Different reading for **Yokobue.**

Otha Shaffer. *(C.japonica),* ACS, *The Camellia Journal*, Nov.2000, p.28 with colour photo. A loose peony to double form, orchid to deep pink chance seedling. Flowers have 13 petals and 197 petaloids. The plant has a spreading dense growth and blooms early to late. Originated by Otha Shaffer, Madison, Fla., USA. *American Camellia Yearbook*, 2000, p.5, colour photo p.c12. Average flower size is 9 cm across x 5 cm deep. Light green leaves are 11.5 cm long x 5.7 cm wide. Note: The published photo shows an anemone to tight peony flower.

Othello. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic error for **Orthello.**

Otobehaku. (Otobe's White), (*C.japonica*), ICS., Apr,1990, *Japanese Camellia Cultivar List*, p.18: No description. Originated in the Shimane Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.50 with colour photo; English translation p.32. Small, white, sake cup-shaped single, pinched stamen cylinder. Flowers mid-season to late. Leaves elliptic, small to medium size, almost no serrations. Upright, vigorous growth. Selected from wild japonicas in the suburbs of Matsu'e City. Named and released by Shigeaki Takano in 1989.

Ôtôbeni. (Ôtô Red), (*C.japonica*), ICS., Apr. 1990, *Japanese Camellia Cultivar List*, p.18: Very small size, deep red, tubular to campanulate single, Late blooming. Originated in Nagasaki Prefecture Japan.

Ô-tobi'iri. Different reading for **Ô-kasuri.**

Otogibanashi. (Fairy Tale), (*C.rusticana*), Hagiya, 1982, JCS., *Tsubaki*, No.21. p.4. No description. Hagiya, 1984, ACS, *The Camellia Journal*, vol.39, No.2, p.18. No description seen. Originated in Japan.

Otohime. (Younger Princess), (*C.sasanqua*), Ashizawa, Yagorô, 1898, *Chabaika Taishû*: Pink with red graduations. Medium size. Originated in Japan.

Otohime. (Younger Princess), *(C.x vernalis x C.lutchuensis*), Hagiya, 1986, *Studies on Interspecific Hybridization of Camellias*, No.2, p.5, colour pl.6, p.4: A seedling of *C.vernalis* **Umegaka** x *C.lutchuensis.* Originated by Dr Kaoru Hagiya, Niigata University, Niigata Prefecture, Japan. Flower light peach pink, 18-20 petals, semi-double, 5-6 cm across; towards the centre the petals become smaller and more upright, generally of an ovate shape, emarginate, the colour fading towards the petal base. Stamens about 25 scattered, filaments white; fragrant. Flowers in the leaf axils. Leaves small, ovate, venation and serration obscure. Plant habit, spreading, branches slender.

Otohime. (Princess of Legendary Undersea Palace), (Wabisuke), JCS., 1988, *Japan Camellias*, No.27, p.4, colour photo: Small, single of 5 pointed, channelled and reflexed petals, some red, some white or red and white. Short, compact, infertile stamen column with protruding style. Originated in Aichi Prefecture, Japan. A virus variegated form of **Mikawa-sukiya.** See colour pl., p.235, Yokayama & Kirino, 1989, *Nihon no Chinka.*Found and named by Toshiaki Kosaki in 1980.

Otoko-ishi. (Male Stone), (*C.sasanqua*), Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13: Light pink. Large, semi-double with rounded petals. Originated in Japan.

Otokoyama. (Mount Otoko), (*C.sasanqua*), Minagawa, Jisuke, 1933, *Kaboku Toshiteno Chabai no Saibai*, *Jissai Engei*, No.16, p.7; Chûgai Nursery Catalogue, 1935-1936, p.26 as 'Otoko-yama': Light pink edged deeper pink. Medium size, semi-double. Originated in Japan.

Otome. (Maiden), (*C.rusticana*), Itô, Ihei, (Late 18th century), *Hyakka Tsubaki Nayose Irotsuki;* Pale cherry pink, formal double, many petals arranged in order, beautiful colour, medium size. See: Tuyama, 1968, *Camellias of Japan*, Appendix, p.11. Iwasaki, 1828, *Honzô Zufu*. This flower has many pink petals. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium size, formal double, pale pink, cup-shaped, blooms mid-winter. See: JCS, 1981, *Tsubaki*, No.20, p.118 & ibid. 1968, No.7, p.24. Tuyama. 1966, *Camellia Cultivars of Japan*, p.174; Tuyama, 1968, *Camellias of Japan*, pl.104, p.52, description, p.117: Very common garden camellia, especially in Kantô District. Leaves broadly elliptic, densely branched. Petioles a little hairy. Flowers pink (Rose Madder 23/3), formal double, keeping a bud centre for a considerable period. Size 6-7 cm across with about 60 petals. Flowers mid-season to late. The name 'Otome' has been used in Japan for a group of small to medium sized formal double camellias so that, to prevent ambiguity the names 'Otome-tsubaki' and 'Usu-otome' have been used as synonyms for this cultivar in Japan. It is also said that the name 'Otome' means 'stop' in Japanese, implying that it was too beautiful to sell or give away. Synonyms

include: ‘Pink Perfection’, ‘Frau Minna Seidel’, ‘Lee E. Markley’, ‘Pink Pearl’, ‘Badgen’s Beauty’, ‘Burgdorf Beauty’, ‘Hime-otome’, ‘Momoiro-otome’, ‘Awa-otome’, ‘Virgin’. Also the names ‘Goishi’ and ‘Otome Pink’ have been erroneously applied to this Camellia. See: JCS., 1972, *Encyclopedia of Camellias in Colour*, vol.I, pl.405, pp.170, 352. Seibundô Shinkôsha, 1979 *Senchinshû*, pp.29, 205 as ‘Otome-tsubaki’; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.390 as ‘Otome-tsubaki’; Katei Gatô, ed., 1984, *Chabana Koyomi, vol.1, Tsubaki.* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.390 as ‘Otome-tsubaki’; Katei Gatô, ed., 1984, *Chabana Koyomi, vol.1, Tsubaki.* Amongst its awards are “The William E. Wylam Miniature Award” for 1982 and the “National Hall of Fame Award” for 1978 as ‘Pink Perfection’, and the ‘Award of Merit’ by the RHS, 1950 as ‘Pink Pearl’. Chinese synonyms: ‘Fenshi Shimei’, ‘Kwongtungfen’, ‘Kwangtongfen’, ‘Quangchoufen’, ‘Xiaotaohong’, ‘Yuchun’. Note; *Chinese Camellia Culture* 2003, p.216, and *Camellias,* Y.C. Shen, 2009, p.190, state that cultivar traces back to the Ming Dynasty.

Otome. (Maiden), (*C.sasanqua*), Satomi, Eikichi, 1960, *Sasanqua no Daihyôhinshu no Kaisetsu.* Hakoda, JCS., 1098, *Tsubaki*, No.26, p.49; Different reading for **Otome-sazanka.**

Otome-hi. Saitama Engei, 1920-1921. Synonym for ‘Beni-otome’.

Otome-no-inori. (Maiden’s Prayer), (Wabisuke), ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.18: Very small size, crimson, tubular single with infertile stamens. Blooms early to late. Originated in Gotô Island, Nagasaki Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.50 with colour photo; English translation p.32. Leaves narrowly elliptic, medium size, gently wavy. Selected at a wild camellia forest in Tamanoura Town. Found by Tetsutoshi Fujiwara in 1982, named and released by Tomoichi Fujita.

Otome Pink. SCCS., 1942, *Classification of Camellias*, p.4. This is an ambiguous name that has been erroneously applied to **Otome** as well as to **Otome-shibori** and its pink sport. Synonyms are ‘Otome Rose’, ‘Otome Rosea’, ‘Bleichroeder Pink’, ‘Pink Bleichroeder’, ‘Baronne de Bleichroeder Pink’, ‘Huntington Pink’, ‘Anne Galli’ and, ‘Casablanca’. Because of the confusion all these other names are rejected in favour of **Casablanca.**

Otome Red. McIlhenny, 1937, *600 Varieties of Camellias.* This name has been used as a synonym for **Cheerful** and **Shusu-gasane** as ‘Monjusu Red’.

Otome Rose. McIlhenny Catalogue, 1947-1948. Synonym for **Casablanca** as ‘Otome Pink’.

Otome Rosea. Griffith, 1958, *American Camellia Yearbook*, p.5. Synonym for **Casablanca** as ‘Otome Pink’.

Otome Rosea Variegated. (*C.japonica*), James Rare Plant Nursery California Catalogue, 1954-1955, p.10: A virus variegated form of **Casablanca** as ‘Otome Rosea’- Soft rose pink blotched white. Originated in USA.

Otome-sazanka. (Maiden Sasanqua), (*C.sasanqua*), Yamato Nô-en, 1956, *Shinshubyô:* ‘Pink’. Satomi, Eikichi, 1960, *Sazanka no Daihyô Hinshu Kaisetsu Engei Techô* No.10; Tuyama, 1968, *Camellias of Japan,* pl.410, p.208, description, p.211: Leaves elliptic to broad-elliptic, apex obtuse, margins crenate; petioles very hairy. Flowers double, 20-30 petals, pale pink, short, emarginate, inner petals incurving, 6-7 cm across. Flowers early. Originated in Kansai District, Japan. See pl.527, p.385, *Encyclopedia of Camellias in Colour*, vol.I, 1972 for colour photo. Abbreviation: ‘Otome’. Chinese synonym: ‘Yinü’. Synonyms: Shôwa-otome’, ‘Momo-otome’, ‘Usu-otome’.

Otome-shibori. (‘Otome’ variegated), (*C.japonica*), Yokohama Gardener’s Association Catalogue, 1891, p.8: Pink ground with carmine stripes, 8-10 cm across. Medium size, rose form double. Mid-season blooming. Slow, compact growth. Originated in Japan. Synonyms: ‘Baronne de Bleichroeder’(United States), ‘Bleichroeder’, ‘Otome Variegated’. Sports: **Mother of Pearl,**

Otome White, Casablanca, Sweetheart. See colour photo, Macoboy, 1981, *The Colour Dictionary of Camellias*, p.109. Note: **Shibori-otome** is a different cultivar.

Otomeshiro. Saitama Engei, 1920-1921. Different reading for 'Shiro-otome' (**Haku-otome**).

Otome-tsubaki. Satomi, 1956, *Camellia Varieties in Japan*, p.11. *Encyclopedia of Camellias in Colour*, 1972, vol.I, p.395; Seibundô Shinkôsha, 1979, *Senchinshû;* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.390. All these modem Japanese bibliographies use 'Otome-tsubaki' for **Otome.**

Otome Variegated. Domoto Nursery Price List, 1932. Synonym for **Otome-shibori.**

Otome White. (*C.japonica*), Domoto Nursery Catalogue, 1935. A self white sport of **Otome-shibori** as 'Huntington'. Gerbing's Azalea Gardens Catalogue, 1938-1939: A full double flower, pure white. When fully open shows some stamens, rose-bud formation while opening. Mid-season blooming. Slow, bushy growth. Synonyms: 'Mrs Helen Reynolds', 'Mrs Helen W. Reynolds', 'White Otome', 'White Bleichroeder', 'Bleichroeder White', 'Virgin White'. See Hertrich, 1964, *Camellias in the Huntington Gardens*, vol.I, p.273.

Otome-yuri. (Maiden's Lily). (C.japonica), *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.220 with colour photo; Small single, pink shading to white, with long, narrow petals, trumpet to almost closed form. Tubular stamens. Flowers mid-season to late. Leaves lanceolate, medium size. Spreading growth. A descendant of a 'Kujaku-tsubaki' **(Hakuhan-kujaku)** crossing, originated and named by Shinichi Noguchi, Tokyo, Japan. Released in 2003.

Ôtomo-sazanka. (Ôtomo's Sasanqua). *(C.hiemalis). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.294 with colour photo; English translation p.206. Small, peach red, single to semi-double with raised petals. Flowers early to mid-season. Leaves narrowly elliptic, small. Spreading, vigorous growth, dense branches. A very popular variety selected by Sachiro Ôtomo, considered to be a natural seedling of a *C.hiemalis* variety. From Aichi Prefecture.

Otonashi. (obscure), (*C.japonica*), Itô, Ihei, 1695, *Kadan Chikinshô*, #58; Yashiro, 1841, *Kokon Yôrankô*, vol.306 (Ichijima reprint, 1906, p.338); Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* see: JCS., 1969, *Tsubaki*, No.7, p.25: Medium large flower with 4 rows of petals; white with red splashes, sometimes totally pink. Originated in Japan. (Believed extinct.)

Ôtori.(Great Phoenix), (*C.japonica*), Satomi, 1956, *Camellia Varieties in Japan*, p.10: Pink blotched white, medium, cup-shaped single. Blooms early to mid-season. Originated in Japan.

Ôtori.(Great Phoenix), (*C.japonica*), Satô, 1975, *Chûbu no Tsubaki*, p.85, colour photo and description: Dark red, semi-double, 10 cm across, with 15-18 petals in 2-3 rows, reflexed when fully open. Central stamens, yellow anthers, pinkish filaments. Leaves mid-green, lanceolate, apex acuminate, margins serrulate. See: Seibundô Shinkôsha., 1979, *Senchinshû*, pp.27, 204. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.47 with colour photo; English translation p.30. Upright, vigorous growth. The original tree survives in Seki City. Named and released by Minoru Satô.

Oudiniana. (*C.japonica*), Jacob Makoy et Cie Nursery Catalogue, 1841, p.11. No description. *Catalogue de la Société Royale d'Horticulture de la Belgique*, 1842, p.23. No description. Burnier Catalogue Supplement, 1842-1843: Large, scarlet, formal double. Charles van Geert Catalogue, 1845, p.11: Form of **Imbricata** but more double, deep cherry-red. Orthographic errors: 'Oudii', 'Oudinii', 'Oudianina'. Originated in France by M. Tourres.

Oudinii. Trillon, Le Mans Nursery Catalogue, 1843, p.7..Orthographic error for **Oudiniana.**

Oudissima. *(C.japonica),* Verschaffelt, 1844, Catalogue, No.50, p.22. No description. Originated in Italy. (Believed extinct).

Ouhate. Shao, Taichong, 1992, *The Observations from the Camellia World*, No.455, p.63. Chinese synonym for the USA *C.japonica* **Bob Ehrhart.**

Ouida Maffett. (*C.japonica*), Fendig, 1952, *American Camellia Catalogue:* Medium to large, incomplete double, 9-10 cm across, light red with blue tinge. Similar to **Enrico Bettoni** in formation and size. Filaments and anthers yellow. Buds medium to large, elongated, green. Leaves medium dark green, broad-obovate, 8 cm long x 7 cm wide, apex short acute, venation raised, margins serrulate. Originated in USA by D.S. McCarthy, Florence, South Carolina from seed of a single red. First bloomed 1949.

Ouiji. McIlhenny Catalogue, 1947-1949. Corruption of the. Japanese name **Ô-niji.**

Oujindi. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.416; Chinese synonym for the USA *C.japonica* **Diddy's Pink Organdie.**

Oukan. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.274. Different reading for **Ôkan.**

Oumihaku. (Oumi's Sea), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.46, colour photo and p.48, description: Small size, white, single, opening cup-shaped, with 5 irregular shaped, overlapping petals and a central stamen column with pale yellow filaments, joined for their lower half, and yellow anthers. Leaves small, variable from narrow-elliptic to broad-ovate, dark green. Blooms mid-season. Originated in Tsushima Island, Nagasaki Prefecture, Japan.

Oumihime. (Oumi's Princess), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.185, colour photo and description: Small size, deep red, vase-shaped single, with 6 broad, rounded, over-lapping petals and a central stamen cylinder, with pinkish filaments, joined for the lower third, and yellow anthers. Leaves yellowish green, broad-ovate, apices blunt acute, margins shallowly serrate. Blooms mid-season. Originated in Tsushima Island, Nagasaki Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.335. English translation p.227. Named and released by Tokuji Ôoka in 1979.

Ou-no-sato. (Place Name), *(C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.91, colour photo and description: Medium size, soft pink, fading to the centre, wide, cup-shaped single of 6 broad, overlapping, emarginate petals with a central column of yellow stamens. Leaves dark green, elliptic, apices acuminate, margins serrulate. Flowers early to mid-season. Originated in Matsu'e City, Shimane Prefecture, Japan. A natural seedling of **Shunshokô.** 'Ou' is a place name in Shimane Prefecture. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.44 with colour photo; English translation p.28. Named and released by Tomohisa Arikawa in 1975.

Ou-no-shirayuri. (White Lily of Ou), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.22, colour photo and description: Medium size, white, vase-shaped single with petal apices rather pointed, due to incurved lateral margins. A central stamen column with yellow anthers. Leaves elliptic-lanceolate, deep green, apices tapering acute, margins serrate. Blooms mid-season. Plant habit pendant. Originated in Matsu'e City, Shimane Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.335 with black and white photo; English translation p.227. Named and released by Yoshi'e Oshida in 1980.

Our Age. (*C.japonica*), Hazlewood & Jessep, 1972, *Check List - Camellia Cultivars from Nursery Catalogues:* 'White'. Originated in USA.

Our Betty. *(C.x williamsii*), *American Camellia Yearbook*, 1981, p.103, Reg. No.1703: A medium to large, light pink, tulip form chance *C.saluenensis* hybrid seedling. Mid-season blooming. Originated in USA by Kramer Bros Nursery, Uplands, California. The blooms have two distinct rows of long, slim petals. Sport: **Our Betty Variegated.**

Our Betty Variegated. *(C.x williamsii*), Camellia Haven Nursery Catalogue, 1988: Two hose-in-hose rows of long, tubular petals. Pink splashed with white. Very free flowering. Quick, upright growth. Flowers mid-season to late. A virus variegated form of **Our Betty.** Originated in New Zealand. Chinese synonym: 'Fuse Dabeidi'.

Our Bill. *(C.japonica),* ACS, *The Camellia Journal,* June 2004, p.28, colour photo p.29, Reg. No.2623. A chance seedling which first flowered in 2000. Originated by Dr Howard Smith, Gainesville, Fla., USA. The white blush, semi-double flower is 11.5 cm across, with 22 petals and yellow anthers. *American Camellia Yearbook,* 2004, p.94, colour photo p.c3. Plant is upright and dense, with average growth rate. Dark green leaves are 11.5 cm long x 5.7 cm wide.

Our Granddaughters. (*C.reticulata* hybrid). ACRS, *Camellia News*, Autumn 2005, No.167, p.17, colour photo p.19, Reg. No.559. Originated by Colleen Sherrington, Balwyn North, Vic, Australia. A cross between a wild form of *C.reticulata* as seed parent x an unnamed seedling (**Suzanne Withers** x *C.nitidissima*) as pollen parent. First flowered in 2000. A raspberry pink, semi-double flower of 17-20 petals shading to a deeper colour on the petal edges (RHS.CC.57D to 57B), and 15 cm diameter x 7.5 cm deep. Flowers freely over a long season on an open growing, upright plant. Leaves dark green, glossy, ovate, acute base, mucronate apex, serrate margins, 10 cm long x 7 cm wide. Glowing unusual colour, robust petal and long-lasting flower.

Our Julia. (*C.japonica*), Mark S. Cannon Scion Catalogue, 1964-1965, p.12. No description. SCCS., 1966, *Camellia Nomenclature*, p.104: Deep pink. Large, semi-double with fluted petals. Vigorous, upright growth. Mid-season blooming. Originated in USA

Our Kerry. (*C.reticulata*), *American Camellia Yearbook*, 1980, p.171, Reg. No.1646: A very large, deep pink, semi-double *C.reticulata* (Crimson Robe' [**Dataohong**] x **Jean Pursel**). Blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 6 year old seedling first bloomed 1979. Average flower size 15 cm across x 8 cm deep with 10-15 petals, yellow anthers and pinkish filaments. Petals are veined deep red with heavy texture. Plant

growth is upright, open and rapid with dark green, heavy-leathery, deep veined leaves, 12.5 cm x 7.5 cm. See colour photo, front cover, ACS., 1983, *The Camellia Journal*, vol.38, No.1.

Our Kim. (*C.reticulata* hybrid). ACRS, *Camellia News*, 1996, No.139, p.10, Reg. No.480. Originated by Dr R.M. Withers, Donvale, Victoria, Australia. Across between *C.reticulata* hybrid **Suzanne Withers** as seed parent x *C.reticulata* hybrid **Jean Pursel,** which first flowered 1994. An informal double flower of 38 petals, pink to neyron rose in colour, RHS.CC55B, fading to 55C at the base of the petals, 12 cm diameter x 5.5 cm deep. Free flowering mid-season on a rapid growing, upright, open plant. Leaves olive green, glossy, keeled, elliptic, acuminate apex, serrate margins, 10 cm long x 5.5 cm wide. Petals folded flat, filaments in groups. Very floriferous and attractive new colour.

Our Linda. (*C.sasanqua*), *American Camellia Yearbook*, 1979, p.110, Reg. No.1534: A medium size, rosepink, rose form double chance *C.sasanqua* seedling, early blooming. Originated in USA by Lester O. Wood, Virginia Beach, Virginia. The 10 year old seedling first bloomed 1971 Flower has 23 petals, 3-5 petaloids, yellow anthers and white filaments, 8 cm across x 3.7 cm deep. Plant growth is upright, dense and medium with dark green leaves, 5.5 cm x 2.6 cm.

Our Melissa. *(C.pitardii* hyb.), ACRS., 1986, *Camellia News*, No.99, p.22, Reg. No.342: Originated by E.R. Sebire, Wandin North, Victoria, Australia. A chance *C.pitardii* var. *pitardii* seedling that first flowered in 1984. A rapid growing plant of a weeping habit, producing an anemone form flower, 5 cm across (MHB. 13A2, Colour Chart). Leaves olive green, matt surface, apex acute, margins serrulate, 6 cm x 3 cm. See colour photo, back cover of *Camellia News*, No.99.

Our Nancy. *(C.japonica)*, ACS, *The Camellia Journal*, Nov. 2000, p.29 with colour photo. A semi-double white chance seedling with occasional light pink stripes. Heavy petal texture. The plant has an upright, dense growth. Flowers mid-season to late. Originated by Dr Howard Smith, Gainesville, Fla., USA. *American Camellia Yearbook*, 2000, p.6, colour photo p.c13. The 20 year old seedling first flowered in 1990. Flower has 9 petals, 10 petaloids, and yellow anthers. Average flower size is 10 cm across x 6.5 cm deep.

Our Number 7. (*C.japonica*), Gerbing's Azalea Gardens Catalogue, 1938-1939 as 'Our No.7': A fluffy peony form, medium sized bloom. Soft pink with dull green foliage. Late flowering, Slow, bushy growth. Originated by G.G. Gerbing, Florida, USA.

Our Number 156. (*C.japonica*), Gerbings Azalea Gardens Catalogue, 1938-1938 as 'Our No.156': An immense, loose peony form flower of deep red. Fast, tall growth with large, dull green foliage. Blooms mid-season. Originated in USA by G.G. Gerbing, Florida.

Our Selection. (*C.reticulata*), ACRS., 1984, *Camellias News*, No.91, p.22, Reg No. 321: Originated by Edgar Sebire, Wandin North, Victoria, Australia from a seedling of 'Lion Head', (**Shizetou**) that first flowered 1981. The 14 cm across, dark pink to red, informal double flowers open in mid-season. The upright, open plant has dark green leaves, 12 cm x 5.2 cm, prominently veined, apex acute, base cuneate, margins serrulate.

Ourika. (*C.japonica*), Verschaffelt, 1944-1845, Catalogue, p.28, as 'Ourica'. No description. Burnier & Grilli Catalogue, 1846-1847: Small formal double flower, dark carmine, some petals traversed by a ribbon of pure white. Originated in Italy by Freppa.

Ourselli. (*C.japonica*), Baumann, Mulhouse Nursery Catalogue, 1841-1842, p.14. No description. Orthographic variant: 'Oursellii'. Originated in Italy. (Believed extinct.)

Oursellii. Trillon, Le Mans Nursery Catalogue, 1843, p.7. Orthographic variant for **Ourselli.**

Oushô. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.262, description, p.263, colour photo. Different reading for **Ôsho.**

Oushôkun. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.391, colour photo and description: Different reading for **Ôshôkun.**

Ô-usuiro. (Large Pale Colour), (*C.japonica*), Sakuden, 1630, *Hyakuchinshû:* Large, light pink with thick petals. Thought to be synonymous with **Hiroshima-sôzen-usuiro** in *Chinka Zufu*, (before 1700). (Believed extinct.)

Outland Piper. (*C.japonica*), Dodd, 1968, *Adventures in Camellia Seedlings*, p.6, colour photo: Large, deep pink, rose form double, seedling of **Galilee**. Originated by Richard Dodd, Marshallville, Georgia, USA.

Ô-utsubo. (Large Moray), (*C.japonica*), *Chinka Zufu*, (before 1700), Watanabe, 1969, according to Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû*, No.10, p.152. No description. (Believed extinct.)

Ouwen. Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for the USA *C.japonica* **Owen Henry.**

Ovate Leaf Pink. Dryden, 1982, SCCS., *The Camellia Review*, vol.44, No.1, p.17. Western synonym for **Luanye Yinhong.**

Ovate Leaf Spinel Pink. Bao, 1980, ACS., *The Camellia Journal*, vol.35, No.2, p.18. Synonym for **Luanye Yinhong.**

Ovation. *(C.reticulata* hybrid) C.Aust., *Camellia News,* Autumn 2007, No.173, p.6, colour photo p.19, Reg. No. 571. Originated by Norm Prentice, and registered by Judy Prentice, Garfield, Vic, Australia. A chance seedling of *C.reticulata* hybrid **Ovation.** First flowered in 2000. A large, semi-double, mauve pink (RHS.CC. 75C) flower, 15 cm across x 4 cm deep. Flowers mid-season on a bushy upright, rapid growing plant. Leaves dark green, lanceolate to oblanceolate, flat with a slight curl, 11 cm x 5 cm. Flowers fall whole.

Over Novarro. (*C.reticulata* hybrid) SCCS, *Supplementary List* 2011. Silvery light pink. Large semi-double to rose form. Strong well-branched growth. Flowers midseason. [(*C.pitardii* var *yunnanica* x **Forty-Niner**) x **Coral Delight**]. Originated in 2009 by Daniel Charvet, Fort Bragg, Calif., USA.

Overlook. (*C.japonica*), *Garden Gateways*, vol.7, 1955, p.26. No description. Originated in USA.

Overlook Number 12. Fendig, 1949, *American Camellia Catalogue*, as 'Overlook No.12'. Synonym for **Imura.**

Overlook Number 17. Fendig, 1949, *American Camellia Catalogue*, as 'Overlook No.17. Synonym for **Mrs K. Sawada.**

Overlook Number 119. Fendig, 1949, *American Camellia Catalogue*, as 'Overlook No.119'. Synonym for **Sarasa.**

Overlook Number 172. Fendig, 1949, *American Camellia Catalogue*, as 'Overlook No.172'. Synonym for **Lurie's Favorite.**

Overlook White. (*C.japonica*), *American Camellia Yearbook*, 1961, p.228, Reg. No.580: A 13 year old chance seedling of **White Empress** that first bloomed 1953. Originated by K. Sawada, Mobile, Alabama, USA. Plant growth is dense and upright with medium size, thick, glossy, dark green leaves, 11 cm x 5 cm. The semi-double flowers, 12.5-13 cm across x 5.5 cm. deep are white with 20-21 petals and a few petaloids. Flowers mid-season.

Overture. (*C.reticulata*), ACRS., 1971, *Camellia News*, No.43, p.36, Reg. No.150: Originated by F.S. Tuckfield, Berwick, Victoria, Australia from a seedling of 'Crimson Robe', (**Dataohong**). First flowered 1968. The plant has upright, dense, vigorous growth. Flowers very large, 15 cm across - bright red with luminous overtones. The leaves, 11 cm x 5 cm, are dark olive green,

elliptic, acuminate and sharply serrate. For colour photos see: Macoboy, 1981, *The Colour Dictionary of Camellias*, p.162; Front cover. 1983, *New Zealand Camellia Bulletin*, vol.XIII, No.4. Chinese synonym: 'Qianzouqu'.

Owari. (Old name for Aichi Prefecture), (*C.japonica).* Hirayama, Tokuo, (Late 17th century), *Tsubaki Byobu.* See: Watanabe, 1961, Kyôto Engei Kurabu. *Tsubaki Tokushû*, No.2. p.48. No description. Originated in Japan. (Believed extinct.)

Owarichiri. (Scattered Owari), (*C.japonica*), Iwasaki, 1828, *Honzô Zufu:* This flower has many slender, narrow, pink petals which taper off to a point. Originated in Japan. JCS, 1981, *Tsubaki.* No.20. p.119. (Believed extinct.)

Owaridairin. Watanabe, 1960. Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1. p.62. Different reading for **Owaritairin.**

Owaritairin. (Large flower from Owari), (*C.japonica*), Itô. Ihei. 1695. *Kadan Chikinshô*, #207; Yashiro. 1841. *Kokon Yôrankô* vol.306, (Ichijima reprint, 1906), p.342. A large. red, double flower. Different reading: 'Owaridairin'. Originated in Japan. (Believed extinct.)

Owarifuji. (Fuji in Owari), (*C.japonica*), Satô, 1975, *Chûbu no Tsubaki.* p.67 colour photo and description: Small. single, campanulate with 6 emarginate petals, soft pink, white at the base, with a compact stamen cylinder; anthers yellow, filaments creamy. Flowers mid-season. Leaves lanceolate. dark green, venation prominent, apex acuminate, margins shallowly serrate. See p.205, Seibundô Shinkôsha, 1979, *Senchinshû;* Colour pl.306, *Encyclopedia of Camellias in Colour*, vol.II, 1978. Originated in Chûbu, Japan. A chance seedling of unknown parentage, originated and released by Yoshiyasu Wakayama in 1974. Resembles **Kayoiji.**

Owarigoshiki-tsubaki. Satô,1975, *Chûbu no Tsubaki.* p.25. Synonym for **Chûbu-goshiki-tsubaki.**

Owari-no-sato. (Owari Hamlet), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.30, colour photo, p.205, description: Small, soft pink, campanulate single, about 3.5 cm across, with a small stamen column. Leaves shining, strong green, elliptical, apex acuminate, margins finely, shallowly serrulate. Originated in Chûbu area, Japan. Named and released by Fumio Naitô in 1973.

Owari-otome. (Owari Maiden), (*C.japonica*), Seibundô Shinkôsha, 1979, *Senchinshû*, p.30, colour photo, p.205, description: Large size, white, formal double with rounded petals with a creamy tint at the base. Originated in Chûbu area, Japan. Sport of **Hakuhô.**

Owarisangai. (Three layered Camellia from Owari), (*C.japonica*), Hino, Sukekatsu, 1637, *Sukekatsukyôki.* Description not seen. Originated in Japan. See: JCS, 1986, *Tsubaki*, No.25, p.14. (Believed extinct.)

Owari-tsubaki. (Owari Camellia), (*C.japonica*), Sakuden, 1630, *Hyakuchinshû*; Hino, Sukekatsu, 1632, *Sukekatsukyôki*, describe as a synonym for **Oborozuki**. Originated in Japan. See: JCS., 1986, *Tsubaki.* No.25, p.14 & Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû*, No.2, pp.94, 95. (Believed extinct.)

Owari-wabisuke. (Owari Wabisuke), (Wabisuke), *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.462, p.187, description, p.362: Pink to light red, very small, campanulate single with small abortive stamen cluster. Leaves, strong, glossy green, obovate to broad-obovate, apex shortly acuminate, margins finely serrulate. Originated near Kiso river bank in Chûbu, Japan. Resembles **Kanzaki-awa-wabisuke** and **Beni-wabisuke**. See colour photos and descriptions: Satô, 1975, *Chûbu no Tsubaki*, p.44; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.30, 205. Katei Gahô, ed., 1984, *Chabana Koyomi vol.1, Tsubaki*, p.55; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.147; Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû*, No.11, pp.13-16, for colour photo, botanical drawings and description. Found by Shinichi Asai, released in 1971.

Owari-yobukodori. Seibundô Shinkôsha, 1979, *Senchinshû*, p.231. Synonym for **Chûbu-yobukodori.**

Owen Henry. (*C.japonica*), Novak, 1965, ACS., *The Camellia Journal*, vol.20, No.4, p.22: Sport of **Sunset Glory.** Light orchid pink with strawberry undertone. Large, 13 cm across. Early to mid-season flowering. Originated in USA by H. Short, Ramona, California. See colour photo, front cover, SCCS., 1966, *The Camellia Review*, vol.27, No.4. Chinese synonym 'Ouwen'.

Owl Eyes. Griffiths & Strother, 1954, ACS., *Nomenclatural Cross Reference List*, pp.9, 11. Synonym for **Sarah Frost.**

Owl Face. McIlhenny, 1937, 600 *Varieties of Camellia.* p.10. Synonym for **Sarah Frost.**

Oxoniensis. (*C.japonica*), Anon, 1830, "Ueber die Cultur der Kamellien" in *Der Blumen Gaertner*, p.53. No description. Burdin Catalogue, 1834, p.16. No description. Baumann & Baumann, 1835, *Collection de Camellias élevés à Bollwieler*, pl.43, as Camellia J.W. Oxonensis: Without doubt the most beautiful of the pink camellias. They are 10 cm across and form a full crown. The outside petals, usually numbering 24, are regularly arranged, forming 4 crowns, heart-shaped, recurved and contracted. The centre petals are irregular, spotted with rose and white. There are 2 or 3 stigma and a large number of stamens, but others are changed to petals (petaloids) of diverse, irregular form of a pale pink tint and striped white. Berlèse, 1837, *Monographie*, ed.1, p.82, 128: Leaves round-ovate, apex acuminate, margins serrate; flowers large, 10 cm across, double, of an intense rose; exterior petals arranged around and towards the centre, recurved and narrowed towards the base, regularly inserted in a vase-form; those of the centre small, straight and irregularly marked with rose and white. Stamens and pistil apparent, with some petaloids. Synonyms: 'Mutabilis Maculata Exonii', 'Oxoniensis de Knight', 'Oxoniensis Vera'. A sport of 'Variegata Plena' (**Variegata**) according to Berlèse, 1841. *Iconographie*, pl.20.

Oxoniensis de Knight. Jacob Makoy Nursery Catalogue, 1838. Synonym for **Oxoniensis.**

Oxoniensis Vera. Charles van Geert Nursery Catalogue, 1845, p.10. Synonym for **Oxoniensis**.

Oxriglomana. (*C.japonica*), Berlèse, 1840, *Monographie*, ed.2, p.210: Flowers of over 9 cm across, full, deep rose punctuated and striped with red; petals numerous, large, rounded, scalloped at the apex and well imbricated from the exterior to the centre in the form of 'Imbricata'. Originated in Germany. Orthographic errors: 'Oxiglomania', 'Origlomana', 'Onriglomana'.

Oxriglomania Superba. (*C.japonica*), Cachet Catalogue, 1840-1841, p.2: Striped.. Berlèse, 1840, *Monographie*, ed.2, pp.135, 230: Leaves large, long, venation prominent, of an obscure green; flower 8 cm across, deep, brilliant rose with multiple stripes of clear, shining cherry-red; petals in 6-7 rows, rounded, little scalloped, tight packed, regularly imbricated from the circumference to the centre; somewhat resembling **Sweetii Vera.** Introduced in France by Cachet, Angers. Orthographic errors: 'Oxriglomaua Super', 'Oxriglomana Superba', 'Oxryglomana Superba', 'Oxyglomana Superba', 'Onriglomana Superba', 'Oxriglomaria Superba', 'Oxriglomma Superba'. See colour pl.54, Berlèse, 1841, *Iconographie.* Originated in Germany, may be the same cultivar as **Oxriglomana.**

Ôyamashiro. Different reading for **Daisenhaku.**

Oyler's Carolynmarie Variegated. *(C.japonica),* ACS, *The Camellia Journal,* June 2010, p.29 with colour photo; Regn No.2788; Originated by Donald R. Oyler, Mobile, Ala., USA. ACS, *Yearbook* 2010, p.79 with colour photo; A 15 year old chance seedling, first bloomed 2002. Slow, upright, open growth. Dark green leaves are 9.5 cm x 5.7 cm. Medium size flower is 9 to 10 cm diameter x 5 cm deep, semi-double form 21 to 24 petals, and 16 petaloids among the gold anthers. A true red, with white splotches. Flowers midseason.

Oyler's Christina Marie. *(C.japonica),* ACS, *The Camellia Journal*, June 2010, p.29 with colour photo; Regn No.2789; Originated by Donald R. Oyler, Mobile, Ala, USA. ACS, *Yearbook* 2010, p.80 with colour photo; A 30 year old chance seedling, first flowered in 1987. Plant is upright and has average growth. Dark green leaves are 10.3 cm x 5 cm. Medium size, white, formal double flower is 8.2 to 9 cm diameter x 2.5 to 3.2 cm deep, with 73 petals, mainly incurving. Flowers midseason.

Oyler's Rachel Marie. *(C.japonica),* ACS, *The Camellia Journal*, June 2010, p.29 with colour photo; Regn. No. 2790; Originated by Donald R. Oyler, Mobile, Ala., USA. ACS, *Yearbook* 2010, p.90 with colour photo; A 30 year old chance seedling, first flowered 1987 Upright, with average growth rate. Dark green leaves are 10 cm x 4.8 cm. Medium size, semi-double flower is 7.5 to 9 cm diameter. Light pink, with deeper pink on the petal undersides. Gold anthers. 21 to 24 petals. Flowers early to midseason.

Ôyodo. (Place), (*C.sasanqua*), Murayama, Takeshi, Dec. 1971, *Garden Life*, as an ancient cultivar name with no details. Originated in Japan. (Believed extinct.)

Oza Shirah. *(C.japonica),* ACS, *The Camellia Journal*, June 2005, p.8, colour photo p.9, Reg. No. 2644. A sport of **Borom's Gem,** first observed in 1997, and propagated in 1999 by Shirah's Camellia Nursery, Lakeland, Fla, USA. The 12.7 cm diameter, semi-double flower is light pink, feathering to white at the edges. Heavy petal texture. Anthers and filaments golden

yellow. Flowers mid-season. *American Camellia Yearbook*, 2005, p.45 colour photo p.C7. Plant is upright, spreading and vigorous. Dark green leaves are 10 cm x 5 cm.

Ozackia. (*C.japonica*), Cachet Catalogue, 1840-1841, p.2: Red.

Ôzeki. (2nd Rank Sumo Wrestler), (*C.japonica*), Minagawa, 1959, *Chinkashû.* Description not seen. Tuyama, 1966, *Camellia Cultivars of Japan*, pl.117 as 'Oozeki'; *Encyclopedia of Camellias of Japan*, 1972, vol.I, p.363: Medium size, single to semi-double, dark red with irregular stamen cluster, broken by the odd, small erect petal and a few petaloids. Petals are rounded and concave. Blooms mid-season. Leaves, medium sized, long-ovate to ovate, apex acuminate, margins sharply serrate. See colour photo and description; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.26, 204; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.80. Resembles **Shûhô-karako.** A seedling of **Arajishi** originated by Minagawa, Jisuke, Kantô area, Japan. Different readings: 'Oozeki', 'Ohzeki'.

Ozeki. (Small Barrier), (*C.japonica*), ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.19: Very small size, vivid red, tubular to campanulate single. Blooms mid-season to late. Originated in Shizuoka Prefecture, Japan.

Ozeki (Higo). Stone, Vi., 1983, SCCS., *The Camellia Review*, vol.45, No.2, p.20. Synonym for **Higo-ôzeki.**

Ozonran. RHS., 1955, *The Rhododendron & Camellia Yearbook*, No.9, p.78. Corruption of the Japanese name **Kokinran.**

Ô-zora. (Vault of Heaven), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* Blush pink, medium. Hiratsuka, Taizô, 1964, *Higo Camellia*, pp.12, 17. Tuyama, 1968, *Camellias of Japan*, pl.114, p.57, description, p.121 as 'Oo-zora': Higo Camellia, pink (Rose Madder 23/3). Leaves ovoid-elliptic to broadly elliptic, rounded at the base; petioles glabrous; petals about 6, incurved and strongly wavy. Staminal tube very broad with stamens in a circle. About 8 cm across with 120 stamens with white filaments. Colour photos and descriptions, see: Adachi, 1960, *Camellia. Its Appreciation & Artistic* .... p.65; Seibundô Shinkôsha, 1979, *Senchinshû*, pp.26, 204. Corruption of Japanese name: 'Ozorah'. Different reading: 'Oo-zora', 'Oh-zora'. Originated in the Kumamoto Prefecture, Japan.

Ô-zora. (Vault of Heaven), (*C.sasanqua*), Shimada, Yaichi, 1957, *Kumamoto no Sazanka ni Tsuite*, *Dantairin;* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.13 as 'Oh-zora': White shaded deeper pink at edge. A large, single Higo type sasanqua that originated in Kumamoto, Japan. Different readings: 'Oo-zora', 'Oh-zora'.

Ozorah. Lock, 1982-1983, *Rhododendrons with Magnolias and Camellias*, p.77. Corruption of the Japanese name **Ô-zora.**

Ôzu-amagashita. (Amagashita from Ôzu), (*C.japonica*), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.239, colour photo and description: Medium size, deep red with clear white blotches, wide campanulate single with 6 notched, reflexed petals and a central stamen column with whitish filaments, joined for the lower half, and yellow anthers. Leaves deep green, elliptic, recurved, apices acute. Blooms mid-season to late. Originated in the Ehime Prefecture, Japan. Resembles **Amagashita.**

Ôzu-kochô. (Ôzu Butterfly). (*C.japonica*), JCS., 1984, *Tsubaki*, No.23, p.37, colour photo, p.36: The flower has cloudy white variegation over a dark red background; a small, campanulate bloom with a compact stamen cylinder. Blooms mid-season. Leaves small, long-ovate, apices acuminate, recurved. Originated in Ôzu, Ehime Prefecture, Japan.

Ôzu-yabu. (Ôzu Bush Camellia), (*C.japonica*), ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.19. No description. Originated in the Ehime Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.46 with colour photo; English translation p.29. Small, white, occasionally red

splashes and stripes on pink ground, tubular to trumpet shaped single, cylindrical stamen column. Flowers early. Leaves narrowly elliptic, small. Upright to spreading growth. Selected from wild japonicas growing in Yawatahama City. Named by Ôzu Camellia Enthusiasts Club in 1984.

Pacific Beauty. (*C.x williamsii*), *New Zealand Camellia Bulletin*, 1989, vol.XVI, No.1, p.27, Reg. No.263: Originated by Les Jury, New Plymouth, NZ. Its is a 12 year old seedling of *C.japonica* **Waiwhetu Beauty** x *C.x williamsii* **Elsie Jury.** Leaves are light green, averaging 7 cm x 3 cm. The flowers are large size, rose form to formal double, 11-12 cm across x 5 cm deep with 55-60 petals. Some flowers have a few petaloids, up to 15-20 in number, and sometimes there are a few stamens with lemon coloured filaments and creamy yellow anthers. The mid-pink (RHS.CC.55B-C) blooms appear mid-season, paling with age and sometimes show a symmetrical star form.

Pacific Coral. SCCS, *Supplementary List* 2011. Coral pink, small peony form. Slow, upright, very compact growth. Flowers early to midseason. {[(*C.pitardii* var *yunnanica* x **Zipao** 'Purple Gown) x (**Buddha** x **Tiny Princess**)] x (**Buddha** x **Forty-Niner**)}. Originated in 2009 by Daniel Charvet, Fort Bragg, Calif., USA.

Pacific Star. (*C.reticulata* hybrid). Heartwood Nursery, Seedling List 2009; A 3.8 cm diameter, single, medium pink flower with star shaped petals. Often without central stamens. Plant resembles a dwarf peach. Flowers mid-season. A cross of 'Crimson Robe' **(Dataohong)** x *C.fraterna* either open pollinated or selfed. Originated by Daniel Charvet, Fort Bragg, Calif., USA (HW9103).

Paço de Santo Antonio. (*C.japonica*), Camillo Aureliano 1881, *Jornal de Horticultura Pratica*, 12:183-184: This camellia has the shape of a large rose, notched and imbricated, with petals of a bright cherry colour. The smaller petals near the centre are a light rose with a tendency to light purple close to the centre. The leaves are long, light green and very acuminate. Its properties can be compared with **Regina dei Giganti.** Originated in Portugal by Joaquim Albino Dias de Castro and given the name of his wife. Originated in Portugal.

Pacquetti. (*C.japonica*), Cachet Catalogue, 1845-1846, p.7. No description. Originated in Italy. (Believed extinct.)

Paddy's Perfumed. *(C.hybrid). New Zealand Camellia Bulletin,* 1992, vol.XVII, No.5, p.37, Reg. No.314. Originated by J.R. Finlay, Whangarei, New Zealand. It is a seedling of *C.japonica* **Tama-ikari** x *C.hybrid* **Esme Spence**. It has a spreading, open growth of medium rate with dark green leaves 9 cm long x 5 cm wide. The pink (RHS.CC.52B-D), anemone form blooms are 8 cm across x 3 cm deep with 14 petals and 12 petaloids. The stamens are made up of parchment coloured filaments and yellow anthers. Flowers mid-season. Fragrant.

Padeira d'Aljubarrota. (*C.japonica*), José Marques Loureiro Catalogue No. 1 1865, p.31, & No.9, 1872-1873, p.45: Peony form, (similar to **Pompone**), pale rose colour, very full.. Originated in Portugal.

Padre Malhão. (*C.japonica*), José Marques Loureiro Catalogue No.1, 1865, p.35, & No.9, 1872-1873, p.46: Formal double. Pale rose with stripes of white. Originated in Portugal.

Paeoniiflora. (*C.japonica*), Aiton 1812, *Hortus Kewensis*, vol.4, p.235, as 'Paeony-flowered'; Seidel, 1816-1817, *Allgemeinen Deutschen Gartenmagazins*, 2:VIII-X as 'Paeoniflora'; Curtis, Samuel, 1819, *Monography on the Genus Camellia:* 'Camellia flore pleno paeoniaeflora', Paeony-Flowered camellia introduced into the Kew Gardens about 1812. Chandler and Booth, 1831, *Illustrations and Descriptions of Camellias...*, pl.19: In our account of the **Pompone** we mentioned three varieties of the paeony-flowered and hinted at the probability of the whole having been obtained from the 'Various-flowered', ('Variabilis') ... which continue to produce flowers of the **Pompone** and red (**Paeoniiflora**) and blush (**Paeoniiflora Pallida**) paeony flowered, upon separate plants without returning to the changeable character of the plant from which they were grafted. The flowers only differ in colour. Those of the present variety are a bright rose, marked with darker-coloured veins. Their sizes, forms and arrangement of the petals are in every way similar to that of **Pompone**. It is believed to have been imported by Captain Welbank for Charles Hampden Turner of Rooksnest, Surrey about 1810. The flowers measure 8-10 cm across and consist of 10-12 large, outer petals arranged in two rows around a considerable number of smaller ones that arise in the centre in an irregular mass. It is a sport of **Pompone.** Synonyms include: 'Paeony-flowered', 'Paeonia Moutan Rosea', 'Paeonia Arborea Rosea', 'Paeoniiflora Rosea', 'Paeoniiflora Rubra', 'Red Paeony Flowered', 'Paeoniiflora Plena', 'Milton Late Red', 'Pomponia Rosea', 'Pomponia Rubra', 'Gilbeau Pink', 'Paeoniiflora Rosea Amplissima', 'Red Paeony Flowered', 'Double Peony Flowered'. Orthographic errors: 'Paeoniflora', 'Paeoneflora', 'Paeoniaflora', 'Paeoniaeflora', 'Paeonaflora', 'Peonaflora', 'Peoneflora', 'Poeoniflora', 'Peoniflora', 'Peonaeflora', 'Poeneflora', 'Paeoniae Florae', 'Paeoniaeflorus', 'Paeniflora', 'Pionaeflora', 'Poeoneflora Rosea', 'Paeone fl. plena', 'Peonaeflora', 'Paeoneaeflora'. For colour illustration see pl.19, Chandler & Booth, 1831, *Illustrations and Descriptions of Camellias* ... Note: The name **Paeoniiflora** and many of the variants and synonyms listed above have been erroneously applied, in America, to the Australia cultivar **Aspasia Macarthur** and its sports.

Paeoniiflora Alba. (*C.japonica*), Booth, 1830, *Transactions of the Horticultural Society of London*, vol.7, p.548 as 'Paeoniflora Alba' or 'White Paeony-flowered': A medium sized, white, peony form sport of **Pompone** - generally cultivated under the name of 'White Waratah' or 'White Anemoneflowered'. It was presented by Loddiges as 'White Pompone'. A plant was brought from China by Mr Potts in 1822, but was supposed to have been introduced to Kew in 1810. Synonyms: 'White Waratah', 'White Anemoneflowered', 'White Pompone', 'Pomponia Semiplena Alba', 'Pomponia Bianca', 'Pomponia Gallica Alba', 'Harlequin White', 'White Peony', 'Waratah Flore Pleno', 'Paeoniiflora Southern', 'White Anemone Mutabilis'. Orthographic errors: 'Paeoniaeflora Alba', 'Paeniaeflore Alba', 'Paeonyflora Alba', 'Paeoniflora Alba', 'Peoniflora Alba', 'Poeoneflora Alba'.

Paeoniiflora Atrorubens. *(C.japonica)*, Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani as 'Paoneflora Atrorubens'. No description. Originated at Bibbiani, Italy. (Believed extinct).

Paeoniiflora Aurea. van Houtte Catalogue, 1844-1845 as 'Paeoniflora Aurea'. Synonym for **Venosa.**

Paeoniiflora Flore Pleno. Anonymous, 1830, *Annales de la Société d'Horticulture de Paris*, 7:416-417 as 'Paeoniae flor. pleno', Synonym for **Paeoniiflora.**

Paeoniiflora Grandiflora. (*C.japonica*), Jacob Makoy et Cie Nursery Catalogue, 1839, p.17. No description. Cachet, 1840-1841, Catalogue, p.1, as 'Paeoniflora Grandiflora': Pink. Castagnola & Casadona Catalogue, 1861-1862: Firey red, large peony form. Originated in Italy. Orthographic errors: 'Paeoniflora Grandiflora', 'Poeniflora Grandiflora'.

Paeoniiflora Grandiflora Nova. (*C.japonica*), Berlèse, 1843, *Iconographie*, pl.250 as 'Paeoniaeflora Grandiflora Nova': Flower 10-11 cm across, full, peony form, irregular, of vivid rose with a wash of carmine. The exterior petals, in 5 rows, are large, 4 cm broad, x 5 cm long, thin, transparent, notched, outspread, without order, cup-shaped; the others are twisted, with lines and marks of white; those of the centre are bunched and sometimes imbricated. Originated in Italy.

Paeoniiflora Imperalis Punctata. Berlèse, 1849, *Monographie*, ed.2, p.98 as 'Paeoniaeflora Imperalis Punctata'. Synonym for **Gray's Invincible.**

Paeoniiflora Intermedia. (*C.japonica*), Vanderbilt, 1941, *Camellia Research, II*, p.6, as 'Paeoniflora Intermedia' as Herbert, 1839, semi-double. Originated in England. Orthographic error: 'Paeoniaeflora Intermedia'. (Believed extinct.)

Paeoniiflora Monstrosa. (*C.japonica).* Verschaffelt Catalogue, 1850, p.48 as 'Paeoniflora Monstre'. No description. Verschaffelt, 1853. *Nouvelle Iconographie*, Book.VII, pl.IV as 'Poeoniflora Monstrosa': ... the considerable reduction of petals at the centre, their number, their serried and compact arrangement. The colouring is a deep cherry-red. Originated by Mr Louis Sada. Lake Como. Italy. Orthographic errors: 'Paeoniflora Manstre', 'Paeoniaeflora Monstre', 'Paeoniaeflora Monstrosa', 'Poeoniflora Monstre'.

Paeoniiflora Monstrosa (Pfingstl). (*C.japonica*), SCCS. 1954. *The Camellia. Its Culture and Nomenclature.* p.70 invalidly as 'Paeoniaeflora Monstrosa': Deep red. Very large, loose, rose form double to loose peony form. Originated in USA by Pfingstl, California.

Paeoniiflora Pallida. (*C.japonica*), Booth, 1830. *Transactions of the Horticultural Society of London*, vol.7. p.547-548 as 'Paeoniflora Pallida': Intermediate in colour between **Paeoniiflora** and **Pompone,** being darker than **Pompone,** yet not so dark as the 'Red Peony-flowered'. The whole of the petals are veined and of a deep blush colour, except the edges which are almost white. It was first imported from China by the Society in 1820. A sport of **Pompone.** Synonyms: 'Blush Peony-flowered', 'Non Pareil', 'Pomponia Blush', 'Pomponia Nova', 'Pallida (Pinck)'. Orthographic errors: 'Paeoniflora Pallida', 'Paeonyflora Pallida', 'Paeoniaeflora Pallada', 'Poeoneflora Nova'.

Parade. *The Gardeners' Chronicle and Agricultural Gazette,* No.12, Mar. 24 1856, p.208. Orthographic error for **Paride.**

Paradise Ann. *(C.sasanqua).* C. Aust, *Camellia News*, No.182, Autumn 2010, p.6 with colour photo; Regn No.586-N.; Deep pink informal double flowers up to 7 cm diameter. Strong tidy, upright growth. Branches dense and wavy. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Audrey. *(C.sasanqua).* Paradise Nursery 1995, Paradise Plants List, p.2: An upright, compact grower, producing pastel pink to peach coloured flowers, medium sized, 6.1 cm across, informal double. Flowers early over a long season. Leaves are dark glossy green on upper surface and lighter below. Elliptic shape. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia. To be released 1996.

Paradise Baby Jane. *(C.sasanqua).* ACRS, *Camellia News*, 1997, No.143, p.15, colour photo p.13, Reg. No.477. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. A seedling of *C.sasanqua* **Jane Morgan,** pollen parent unknown. Flower is white with pink margins, semi-double, 4.5 cm diameter x 3 cm deep. Flowers early to mid-season on a compact, upright, conical plant of very slow growth. Leaves are dark green, glossy, elliptic, margins serrulate, apex acuminate, 4.5 cm long x 1.5 cm wide. Petals obcordate. Chinese synonym 'Aotong'.

Paradise Barbara. *(C.sasanqua).* ACRS, *Camellia News*, 1997, No.143, p.15, colour photo p.13, Reg. No.481. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Seed parent *C.sasanqua* **Gulf Glory,** pollen parent unknown. First flowered 1990. The large single white (RHS.CC.155B) flower can have some petals with an occasional faint pink edge. Diameter is 9 cm x 1.6 cm deep, and it flowers early to mid-season on a vigorous dense plant. Leaves are green, glossy, elliptic, margins serrulate, apex acuminate, 6.6 cm long x 3.2 cm wide. Petals are wavy and thick, and the plant is very floriferous. Synonym 'White Ribbon". Used for a special promotion by the White Ribbon Foudation, Australia, 2010.

Paradise Belinda. *(C.sasanqua). Australian Gardening Guide,* 1995, vol.14, No.167, p.4 with colour photo: Large flowers, 11 cm across, of glowing pink with petaloid anthers. Long flowering, early to mid—season. Compact bush of shining green leaves and medium growth rate. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Betty Lynda. *(C.sasanqua).* ACRS, *Camellia News*, 1997, No.143, p.11, Paradise Nursery advert. Colour photo p.12. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Flowers single large white, reverse of petals crimson. A vigorous upright habit. Chinese synonym 'Aolinda'.

Paradise Beverly. *(C.hiemalis).* ACRS, *Camellia News,* 1997, No.143, p.16, Reg. No.488. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Seed parent *C.hiemalis* **Shôwa-no-sakae**, pollen parent unknown. First flowered 1990. The informal double flower is deep pink (RHS.CC.63A), with many petaloids and stamens, fading to RHS.CC.63D with age, and is 6.2 cm across x 2.5 cm deep. Flowers heavily early to mid-season on a compact, rounded plant of moderate growth. Leaves are deep green, glossy, elliptic, margins serrulate, apex acuminate, 5.5 cm long x 3.4 cm wide. Petals twisted and wavy.

Paradise Blush. *(C.sasanqua). Australian Gardening Guide*, 1995, vol.14, No.167, p.5 with colour photo: Upright, neat, quick grower. Ideal for screens and hedges. Long flowering period from early to late. Deep pink buds, opening to small formal double flower, with petals incurved likea small waterlily, pure white with pink reverse. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Caroline. *(C.hiemalis).* ACRS, *Camellia News,* 1997, No.143, p.17, colour photo p.12, Reg. No.490. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Seed parent *C.hiemalis* **Shôwa-no-sakae,** pollen parent unknown. First flowered 1990. An informal double flower, deep pink (RHS.CC.63A to 63B), with many petaloids, 7 cm diameter x 3 cm deep. Flowers early to mid-season on a compact bushy plant of moderate, spreading growth. Leaves mid-green, smooth, elliptic, serrulate margins, acuminate apex, 6 cm long x 2.7 cm wide. Petals flat, heart-shaped. Chinese synonym ‘Aokalin’.

Paradise Christine. *(C.sasanqua).* Paradise Plants Nursery, 1995, Plant List: Medium sized, semi-double with petaloids and a few small petals in the centre. 13-15 rounded petals, pink fading almost to white in the centre. Flowers 9 cm across x 4 cm deep. Leaves deep glossy green, elliptic with blunt-acute apices, 6.5 cm long x 3 cm wide. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Diana. *(C.sasanqua).* ICS Congress, Auckland, NZ, 1997. Technical Papers, R.J. Cherry, Paradise Plants, Kulnura, NSW, Australia: “The Paradise Sasanquas” with colour slides. Previously known as ‘Big Pink”. A robust, vigorous grower with a very large single pink flower. Originated in Australia by R.J. Cherry.

Paradise Donna. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.15, Reg. No.480. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. a chance seedling, parentage unknown, that first flowered in 1992. The semi-double to informal double flower has many petaloids, and is mid-pink (RHS.CC.61D), shading to dark pink (RHS.CC.60D) on the edge of the petals. Diameter is 9 cm x 4.6 cm deep. Leaves are green, glossy, elliptic, margins serrulate, apex acuminate, 6 cm long x 3 cm wide. Petals wavy, ovate and slightly notched.

Paradise Gillian. *(C.sasanqua).* ACRS, *Camellia News*, 1997, No.143, p.15, colour photo p.13, Reg. No.478. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. A seedling of *C.sasanqua* **Jane Morgan,** pollen parent unknown, which first flowered in 1990. An informal double flower, occasionally opening formal double, white (RHS.CC.155D) edged faintly red (RHS.CC.63B), 9.5 cm diameter x 3.5 cm deep. Flowers early to mid-season on an upright, vigorous plant. Leaves are dark green, glossy, elliptic, margins serrulate, apex acuminate, 6.5 cm long x 3.5 cm wide. Petals obovate, top emarginate. Chinese synonym ‘Aojilian’.

Paradise Glow. *(C.sasanqua). Australian Gardening Guide*, 1995, vol.14, No.167, p.5 with colour photo: Vigorous, upright growing *C.sasanqua* with large single bloom, pink with yellow anthers. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia. Chinese synonym ‘Aohui’.

Paradise Helen. *(C.sasanqua).* Paradise Plants Nursery, 1995, Paradise Plants List, p.2: A free flowering *C.sasanqua*, with an elegant upright growth habit. It produces masses of brilliant pink buds, opening to a dazzling white with delicate, soft pink shading. Flowers average size, 7.7 cm across, informal doubles displaying golden yellow anthers amongst the centre of small petals and petaloids. Flowers early and over a long period. Leaves are elliptic, dark glossy green on

upper surface, lighter below. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia. Chinese synonym ‘Aohailun’.

Paradise Hilda. *(C.sasanqua). Australian Gardening Guide,* 1995, vol.14, No.167, p.5 with colour photo: An upright growing *C.sasanqua* with medium sized, semi-double flowers, mid-pink. Floriferous. Long flowering period from early to mid-season. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia. Chinese synonym ‘Aoxier’.

Paradise Illumination. *(C.hybrid).* C. Aust, *Camellia News,* No.182, Autumn 2010, p.6 with colour photo; Regn No.588-N.; Semi-double, thick petalled flowers. Colour an unusual reddish-purple, glows in deeply shaded situations. Compact growth with shiny dark green leaves. Flowers late winter and spring. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Janell. *(C.sasanqua).* C. Aust, *Camellia News,* No.182, Autumn 2010, p.6 with colour photo; Regn No.589-N.; Very large, pure white flowers up to 12 cm diameter. Bright yellow stamens. Vigorous, upright, open growth, with large dark green leaves. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia and named for the owner’s sister.

Paradise Jenni. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.16, colour photo p.13, Reg. No.483. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. A seedling of *C.sasanqua* **Exquisite,** pollen parent unknown, which first flowered 1990. The informal double flower is white with pink petaloids that occasionally deepen to red (RHS.CC.64A), 9 cm diameter x 4.5 cm deep. Flowers heavily early to mid-season on a vigorous upright plant. Leaves are deep green, glossy, smooth, elliptic, margins serrulate, apex acuminate, 5.2 cm long x 4 cm wide. Petals obovate with undulations.

Paradise Jennifer. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.16, colour photo p.13, Reg. No.482. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. A seedling of *C.sasanqua* **Jane Morgan,** pollen parent unknown. A semi-double, white (RHS.CC.155D) shading to pink (RHS.CC.64D) at the margins, 7 cm across x 3 cm deep. First flowered 1990. Flowers early to mid-season on an upright, slender, vigorous plant. Leaves are dark green, glossy, elliptic, margins serrulate, apex acuminate, 6.5 cm long x 2.5 cm wide. Petals orbicular. Chinese synonym ‘Aojieni’.

Paradise Jessica. *(C.sasanqua).* C. Aust, *Camellia News,* No. 180, Winter 2009, p.10 with colour photo, Regn. No.580-N; Very showy, large informal double flowers, mid-pink similar to **Jennifer Susan.** Long flowering autumn to winter. Dense, strong, upright growth. Originated by Paradise Plants, Kulnura, NSW, Australia.

Paradise Jill. *(C.hiemalis).* ACRS, *Camellia News,* 1997, No.143, p.16, colour photo p.12, Reg. No.487. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Seed parent *C.hiemalis* **Shôwa-no-sakae,** pollen parent unknown. First flowered 1990. A white informal double flower (RHS.CC.155D) that occasionally has a pink edge underneath each petal (RHS.CC.64D), and is 5 cm across x 2 cm deep. Flowers heavily early to mid-season on a compact spreading plant of moderate growth. Leaves mid-green, glossy, smooth, elliptic, serrulate margins, acuminate apex, 5.5 cm long x 2.5 cm wide. New growth slightly bronze. Petals obcordate.

Paradise Joan. *(C.sasanqua).* Paradise Plants Nursery, 1995, Paradise Plants List, p.2: An extra-showy, large, red, loose informal double flower with golden stamens interspersed. Flowers similar to **Bonanza** in colour, but plants more upright and have vigorous growth. An open habit when young, becoming dense with age. One of the earliest *C.sasanqua* to flower. Leaves are dark, glossy green on the upper surface. Has a good resistance to dieback. Leaf shape elliptic. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Joy. *(C.sasanqua).* C. Aust, *Camellia News,* No.180, Winter 2009, p.10 with colour photo, Regn. No.581-N; Large informal double flowers up to 10 cm diameter. Soft to mid-pink, dark

green, glossy foliage. Fast upright growth. Originated by Paradise Plants, Kulnura, NSW, Australia.

Paradise Leonie. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.15, colour photo p.13, Reg. No.479. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. A seedling of *C.sasanqua* **Jennifer Susan**, pollen parent unknown, which first flowered 1990. The informal double flower is white (RHS.CC.155A), with a pink (RHS.CC.64C) edge, 9 cm diameter x 3.5 cm deep. Plant growth is vigorous and upright. Leaves are green, glossy, elliptic, margins serrulate, apex acuminate, 5.5 cm long x 3.5 cm wide. Petals orbicular.

Paradise Little Jen. *(C.rosiflora x C.sasanqua). Queensland Camellia Society Newsletter,* May 1994, vol.4, No.3, p.2, erroneously as 'Paradise Little Gem': Small pink flowers with small elliptic leaves. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Little Liane. *(C.sasanqua). Australian Gardening Guide,* 1995, vol.14, No.167, p.5 with colour photo: Slow compact growing sasanqua with small leaves and semi-double to informal double white flowers. Ideal for topiary and hedge borders. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Louise. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.16, colour photo p.12, Reg. No.485. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Seed parent *C.sasanqua* **Jennifer Susan,** pollen parent unknown. First flowered 1990. The light pink (RHS.CC.68D) informal double flower, 9.5 cm across x 3.5 cm deep, flowers early to mid-season on an upright plant with arching branches. Leaves mid-green, glossy, smooth, serrulate margins, acuminate apex, 5.5 cm long x 3 cm wide. Petals obcordate.

Paradise Odette. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.16, colour photo p.12, Reg. No.484. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Seed parent *C.sasanqua* **Jennifer Susan,** pollen parent unknown. First flowered 1991. A pink formal to informal double flower (RHS.CC.62B fading with age to 62D), 7 cm diameter x 2.5 cm deep. Flowers heavily early to mid-season on an upright vigorous plant. Leaves mid-green, glossy, elliptic, serrulate margins, acuminate apex, 6.5 cm long x 2.5 cm wide. Petals ovate and notched.

Paradise Pastel. *(C.hybrid). Queensland Camellia Society Newsletter,* May 1994, vol.4, No.3, p.2: No description. C. Aust, *Camellia News,* No.182, Autumn 2010, p.6 with colour photo; Regn No590-N.; Small, semi-double, pastel pink, cupped flowers, borne in clusters along arching branches. Strong upright growth. Flowers mid-season to late. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Pearl. *(C.sasanqua). Queensland Camellia Society Newsletter,* July 1992, vol.2, No.5, p.10: Pink bud that opens semi-double to informal, white with rear of outer petal showing pink. Growth is vigorous and bushy with shining dark green leaves. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia. Chinese synonym 'Aozhenzhu'.

Paradise Petite. *(C.sasanqua). Queensland Camellia Society Newsletter,* June 1994, vol.4, No.4, p.3: Soft pink, semi-double with frilled appearance. Small growing, small leaved compact growing miniature that is ideal for tubs or can be used for clipped hedges. Soft pink, informal double flowers to 5 cm across. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia. Chinese synonym 'Aobaite'

Paradise Pixie. *(C.sasanqua).* ICS Congress, Auckland, NZ, 1997. Technical Papers, R.J. Cherry, "The Paradise Sasanquas", with colour slides: Pink, fading to white, bicolour single. Originated at Paradise Plants, Kulnura, NSW, Australia.

Paradise Plum. *(C.hybrid). Queensland Camellia Society Newsletter,* May 1994, vol.4, No.3, p.2: Originated by Bob Cherry, Paradise Plants Nursery, Kulnura, NSW, Australia. A small leafed hybrid. Flowers similar in shape to *C.rosiflora,* a deep plum coloured pink with a centre of golden stamens. Growth slightly cascading.

Paradise Rebecca. *(C.sasanqua).* C.Aust., *Camellia News,* No.180, Winter 2009, p.10 with colour photo p.11, Regn. No.582-N; The flower has a double row of large deep pink petals, surrounding a smaller informal double centre of paler pink petals. Autumn flowering. Vigorous, dense, upright growth, with large glossy green leaves. Ideal for sun or shade. Originated by Paradise Plants, Kulnura, NSW, Australia.

Paradise Roxanne. *(C.hybrid). Queensland Camellia Society Newsletter,* May 1994, vol.4, No.3, p.2. No description. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Sandra. *(C.hiemalis).* ACRS, *Camellia News,* 1997, No.143, p.16, Reg. No.489. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. Seed parent *C.hiemalis* **Kanjiro**, pollen parent unknown. First flowered 1990. The deep pink (RHS.CC.63A) single flower has a few petaloids and fades with age to a lighter pink (RHS.CC.63C). Diameter is 9 cm x 2.8 cm deep. Flowers heavily early to mid-season on an upright, vigorous plant. Leaves are deep green, glossy, elliptic, margins serrulate, apex acuminate, 5 cm long x 2.2 cm wide. Petals obovate and notched, with lighter shading in the centre.

Paradise Sayaka. *(C.sasanqua).* Paradise Plants Nursery, 1995, Paradise Plants List, p.2: Single to semi-double with a pure simple form. Flowers are white, broadly edged salmon pink. Flowers early and over a long period. Plant habit is upright and dense with long, elliptic, dark green leaves. Suitable in sun or shade. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Simone. *(C.sasanqua).* C. Aust, *Camellia News,* No.182, Autumn 2010, p.6 with colour photo; Regn No.587-N.; Bright mid-pink single flowers with a prominent central spray of golden stamens. Slow growing, with compact, upright growth. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Snowflake. *(C.hybrid).* C. Aust, *Camellia News,* No.182, Autumn 2010, p.6 with colour photo; Regn No.591-N.; Profusion of small white flowers borne in clusters along arching stems. Vigorous growth, with long, narrow, glossy green leaves. Originated at Paradise Plants Nursery, Kulnura, NSW, Australia.

Paradise Susan. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.11, Paradise Nursery advert. Colour photo p.12. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. A vigorous upright grower with dark green foliage. Flowers are large single, white, broadly edged magenta purple, ideal as a specimen plant or a hedge.

Paradise Sweetheart. *(C.hybrid).* C. Aust, *Camellia News,* No.180, Winter 2009, p.11 with colour photo, Regn. No.583-N; A cross of *C.sasanqua* x a small flowered species. Small anemone form, with pink outer petals, and a tight central cluster of pink and white petaloids. Dense, compact and spreading growth, forms a mound 1 metre tall x 2 metres across. Flowers autumn to spring. Originated by Paradise Plants, Kulnura, NSW, Australia.

Paradise Sylvia. *(C.sasanqua).* ACRS, *Camellia News,* 1997, No.143, p.15, Reg. No.476. Originated by Mr R.J. Cherry, Kulnura, NSW, Australia. A seedling of *C.sasanqua* **Yuletide,** pollen parent unknown, that first flowered 1993. The deep red (RHS.CC.60A) single flower is 5.5 cm across x 1.5 cm deep, and flowers early to mid-season on a plant with a dense, miniature growth habit and moderate growth rate. Leaves are deep green, glossy, elliptic, margins serrulate, apex acuminate, 5.5 cm long x 1.5 cm wide. Petals obovate undulate.

Paradise Tinkerbell. *(C.sasanqua).* C. Aust, *Camellia News,* No.180, Winter 2009, p.11 with colour photo, Regn. No.584-N; Delicate white semi-double flowers in autumn. Shiny dark green leaves and bronze new foliage. Miniature growing, suitable for low hedges.

Paradise Venessa. *(C.sasanqua). Queensland Camellia Society Newsletter,* June 1994, vol.4, No.4, p.3: Very large bloom, semi-double to peony form, white flushed pink at the petal edges. Prominent yellow petaloid stamens. Growth vigorous, upright and strong. Originated at

Paradise Plants Nursery, Kulnura, NSW, Australia. C. Aust, *Camellia News*, No.180, Winter 2009, p.11 with colour photo, Regn. No.585-N. Narrow upright growth.

Paradisea. Sacco, 1830-1833, according to Schavionne, 1981, *Il Giardino nell Camelie,* pl.31. Orthographic error for **Paradisiaca.**

Paradisiaca. (*C.japonica*), Loudon, 1840, *The Gardeners' Magazine,* vol.16, p.307 as 'Paradisaica' as a seedling raised by Dr Sacco, Milan, Italy. No description. Orthographic variant: 'Paradisea'.(Believed extinct.)

Paradoxa. (*C.japonica*), Jacob-Makoy, 1828, Catalogue, p.5. No description. Anonymous, 1832, *Annales de la Société d'Horticulture de Paris,* 10:312. No description. Berlèse, 1837, *Monographie,* ed.1, pp.83, 128: Leaves 8.5 cm x 5 cm, roundish-oval, prominent venation; flowers large, single, regular, of clear red, petals slightly undulate, crenate. Filaments of the stamens united half their length. Originated in England. Orthographic error 'Parodoxa'.

Paralida. Henrincq, Apr.1850, *Revue Horticole,* p.135-140. Orthographic error for **Paralide.**

Paralide. (*C.japonica*), Rousseau, Angers Nursery Catalogue, 1842, p.3: Imbricated, cherry pink. Exhibited by M. Paillet at the Exposition de la Société Nationale d'Horticulture, Paris. Frères Noisette Nursery Catalogue, 1857, p.37: Imbricated pink. Originated in Belgium. Orthographic error: 'Paralida'.

Paralide Nuova. van Houtte Catalogue, 1858, 72:20: Formal double, bright pink with white spots. Andrè Leroy, 1868, Catalogue, p.133, as 'Parolide Nuova': Imbricated pink, blotched white. Orthographic error: 'Parolide Nuova'.

Parathan. *(C.japonica),* Jose Maria Serra Establecimiento de Horticultura 1855, Catalogue, p.7. No description. Originated in Spain. (Believed extinct).

Parc Botanique de Haute Bretagne. *(C.japonica),* Originated and propagated by Alain Jouno. Registered by Parc Botanique de Haute Bretagne, Le Chatellier, France. A 4 year old plant, first flowered 2014. Seed parent assumed to be **Mark Alan.** To be further propagated by a nursery. A semidouble with separated, strap-like petals, 13cm diameter x 6.5 cm deep, salmon pink. Occasional pink petaloids, anthers yellow, filaments pink. Plant is upright with average growth rate. Leaves are clear green, flat, 8cm x 4.2cm.

Parc de Sacremento. *(C.japonica),* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.18. Pink, imbricated.

Parc de Saumarez. Claude Thoby, 1993, *Camélias*, pp.12, 18: Blooms mid-season. Small anemone form flowers, pink to coral red with pale pink petaloids and stamens mixed with the petaloids. Originated in France.

Parckerii. Berlèse, 1841, *Iconographie.* Synonym for **Rawesiana.**

Parcksii. Berlèse, 1843, *Iconographie,* pl.149. Orthographic error for **Parksii.**

Parcksii Striped. Berlèse, 1837, *Monographie* ed.1, p.84. Orthographic error for 'Parksii Striped', synonym for **Parksii.**

Parcksii Vera. Cels, Paris Nursery Catalogue, 1836-1837, p.9. Berlèse 1837, *Monographie,* ed.1, index, p.129. In the text it is correctly 'Parksii Vera'. Synonym for **Rawesiana.** Berlèse in his 1841 *Iconographie* facing pl.97 says that it should not be confused with 'Parksii Striped'.

Parckstriped. Trillon, Le Mans Nursery Catalogue, 1843, p.8. Orthographic error for 'Park's Striped', synonym for **Parksii.**

Parepa. (*C.japonica*), Luzzatti, 1851, *Collezione di Camelie,* p.30: Blossoms of medium size, of vivid carmine pink, with a few white stripes or stains towards the centre, ovate-oblong petals, rounded or slightly emarginate; rather irregularly imbricated. Franchetti, 1855, *Collezione di Camelie,* pp.49, 50: Large, flat flower, not reflexed, deep pink with one broad stripe on the

central petal, sometimes the peak of the central petals are incurved and of a slightly deeper pink, sometime with a pale centre. Imbricated. Originated in Italy by Savi, Florence. See pl.IV, Book II, Verschaffelt, 1856, *Nouvelle Iconographie.*

Pareto. (*C.japonica*), de Jonghe, 1851, *Traité de la Culture du Camellia*, p.117 as 'Paretto'. No description. Verschaffelt, 1854, *Nouvelle Iconographie*, Book IV, pl.I: The blooms, above average in size, are composed of numerous, rounded petals, slightly emarginate, sometime laciniate; becoming more lanceolate the nearer the centre. Their colouring is a vivid cherry-red with veining of a deeper shade. Originated in Italy.

Paretto. de Jonghe, 1851, *Traité de la Culture du Camellia*, p.117. Orthographic error for **Pareto.**

Paride. (*C.japonica*), Jacob Makoy et Cie Nursery Catalogue, 1839, p.17. No description. Berlèse, 1840, *Monographie*, ed.2, p.98: Leaves large, oblong and lanceolate, pendant. Buds, round with a flattened summit, similar to **Florida;** flower full, over 8 cm across, soft rose-pink; petals in 5 rows, well imbricated, very wide, forming a cup; those at the centre are smaller in number, of different shapes, irregularly placed and often marked by white lines. Orthographic error 'Parade'. Originated in Italy by Mariani.

Parini. (*C.japonica*), Berlèse, 1840, *Monographie*, ed.2, p.205: Leaves 12.2 cm x 8 cm, long-lanceolate, recurved at apex, large, regular serrations, dark green; buds round, flattened tip, large, scales greenish at base and whitish at tip; flower about 10 cm across, petals in 4-5 rows, wide-oval, reflexed, regularly placed, notched, imbricated, soft pink, irregularly marked with dark red vertical lines or streaks; those at the centre very small, numerous, unequal, erect, others bent, long-oval, in groups. Originated in Italy by Mariani. Synonyms: 'Lechi' (according to Burdin); 'Parini Vera', 'Parini Mariani', 'Parini A', 'Parini M', 'Parini de Mariani'. Orthographic errors: 'Parrini', 'Parinii'.

Parini A. van Houtte Catalogue, 1841, 7:15. Synonym for **Parini.**

Parini B. van Houtte Catalogue, 1841, 7:15. Synonym for **Parini Casoretti.**

Parini C. van Houtte Catalogue, 1842, 9:55. Synonym for **Parini Casoretti.**

Parini Casoretti. Oudin, Lisieux Catalogue, 1844, p.12 as 'Parini': Perfect form, snow-white, regularly ribboned and streaked vivid carmine; Auguste Van Geert Nursery Catalogue, No.105, 1848, p.116: Peony form, sometimes white streaked lilac, sometimes pure white, sometimes lilac pink all over and all on the same bush. Verschaffelt Catalogue, 1847-1848, p. 60 as 'Parini'(Casoretti). No description. van Houtte Catalogue, 1849-1850, 38:48: Well rounded white petals, splashed with soft pink. Originated in Italy by Casoretti. Synonyms: 'Parini B', 'Parini C', 'Parini Florentina', 'Parini Nova'(Casoretti).

Parini de Mariani. Jacob Makoy et Cie Nursery Catalogue, 1842, p.10 as 'Parinii de Mariani', synonym for **Parini.**

Parini M. van Houtte Catalogue, 1842, 9:55. Synonym for **Parini.**

Parini Grandiflora. (*C.japonica*), Verschaffelt Catalogue, 1849-1850, p.48. No description. Originated in Italy. (Believed extinct.)

Parini Florentina. Costa, 1846, *Collection de la collection de camellia présentée à sa majesté L'Imperatrice de toutes les Russies et Reine de Pologne*, p.5. Synonym for **Parini Casoretti.**

Parini Mariani. Auguste van Geert Nursery Catalogue, 1848, p.20. Synonym for **Parini.**

Parini Nova. Oudin, Lisieux Catalogue, 1845-1846, p.46: 'From Casoretti'. No description. Synonym for **Parini Casoretti.**

Parini Nova. Jacob Makoy et Cie Nursery Catalogue, 1842, p.10 as 'Parinii Nova'. Charles van Geert Nursery Catalogue, 1846, p.72. Synonym for **Marguerite Gouillon.**

Parini Nova (Casoretti). Verschaffelt Catalogue, 1847-1848, p.60. Synonym for **Parini Casoretti.**

Parini Vera. Rousseau, Angers Nursery Catalogue, 1842-1843, p.3. Synonym for **Parini.**

Paris Almond. (*C.sasanqua*), ACRS., 1980, *Camellia News*, No.74, p.24, Reg. No.238: Originated by Alice Spragg, Sutherland, N.S.W., Australia. A chance seedling that first flowered 1973. The upright, spreading plant has 6.5 cm x 3.5 cm very dark green leaves with distinct serrations. The flowers are a bluish pink, paler inside petals which reflex to give an oval appearance. Blooms early to mid-season.

Paris Pink. (*C.japonica*), *American Camellia Yearbook*, 1960, p.205, Reg. No.472: An 8 year old chance seedling, originated by W.V. Lytle, Glendale, California, USA, that first bloomed 1955. Growth habit is upright and rapid with light green leaves averaging 8 cm x 4.5 cm. The pink, rose form double flowers are 10 cm across x 4.5 cm deep with 60-70 petals and 5-15 petaloids with occasional yellow stamens. Early blooming.

Parisienne. *(C.hybrid). New Zealand Camellia Bulletin,* March 1992, Issue No.111, vol.XVII, No.4, p.46, Reg. No.303: Originated by Les Jury, New Plymouth, New Zealand as a seedling of *(C.saluenensis x C.granthamiana)* **Grannie** x *C.x williamsii* **Jury's Yellow.** The 11 year old plant first bloomed in 1988. Upright growth with dark green leaves 9 cm long x 4.5 cm wide. The flowers are semi-double, 11 cm across x 4 cm deep with 18 petals. Colour cherry red (RHS.CC.45C), with an occasional rose shade (RHS.CC.55B) stripe, and flared stamens with yellow anthers and filaments. Blooms mid-season.

Park Avenue. Belle Fontaine Nursery, 1967, ACS., *The Camellia Journal*, vol.22, No.3, p.20. No description. Originated in USA. No valid listing located.

Park Hill Tomorrow. Mark S. Cannon Scion Catalogue, 1964-1965, p.12. Orthographic error for **Tomorrow Park Hill.**

Parker Connor. *(C.japonica).* ACS *The Camellia Journal*, June 2012, p.30 with colour photo; Regn No. 2819; Originated by Parker Connor, Edisto Island, SC, USA. ACS, *Yearbook* 2012, p.179 with colour photo; A 10 year old chance seedling, first flowered 2005. Registered and propagated by Richard C. Mims, Lugoff, SC.; Medium size, 9cm x 5cm, semidouble flowers. Inner petals shade from palest blush pink at centre to pale pink (RHS49C) at tips. Outer petals shade from pale pink centre to deep pink (RHS52B) at tips. Petals are shovel-shaped. Upright, vigorous growth. Flowers midseason.

Parkeri. (*C.japonica*), Berlèse, 1840, *Monographie*, ed.2, p.216 as 'Parkerii': Flower, 9 cm across, rose form double, clear cherry red, often mottled milky white; petals wide, numerous, unequally imbricated. Originated in England. Note: It is not synonymous with 'Parckerii' which is a synonym for **Rawesiana.**

Parkes Red Glow. (*C.reticulata* hybrid), ACRS, 1980, *Camellia News*, No.75, p.25, Reg. No.255: Originated by Edna Parkes, East Brighton, Victoria, Australia. A seedling of 'Cornelian', (**Damanao**) that first bloomed 1976. Upright, open growth habit with mid-green, lanceolate, 12 cm x 5 cm to ovate, 8.5 cm x 6.5 cm leaves with numerous, small serrations. Flower, semi-double, dark red, 15 cm across x 7 cm deep. Late flowering. See colour photo, p.40, ACRS., *Camellia News*, No.79. Chinese synonym 'Hongxiyue'.

Parkhill Pink. Gentry, 1972, ACS., *The Camellia Journal*, vol.27, No.2. Abbreviation for **Tomorrow Park Hill Pink.**

Park's Vera. Tagliabue, 1840, *Nomenclatore Camelliae* .... Synonym for **Rawesiana.**

Parkside. (*C.x williamsii*), RHS., 1959, *The Rhododendron and Camellia Yearbook*, No.13, p.129: A *C.x williamsii* exhibited by the Crown Estate Commissioners. Originated at Windsor Great Park, Berkshire, England. Vigorous, erect, spreading habit, free flowering. Leaves 10 cm x 4 cm, slightly glossy, medium green. Flowers 8.5 cm across, single to semi-double with two rows of petals, slightly brighter than RHS.CC.Red Group 55B veined 55A. Scented. Flowers late. Received an RHS Highly Commended Certificate, 1986.

Parksii. (*C.japonica*), Loddiges Catalogue, 1830, p.22; Booth, 1830, *Transactions of the Horticultural Society of London*, 7:556: Named for John Dampier Parks, a collector for the London Horticultural Society for whom it was imported by him from China in 1824. Strongly reticulated, thin, round leaves. Flowers, 10 cm across, the outer petals large, about 5 cm in diameter, slightly cordate. Centre petals erect and irregular, many of them twisted and disposed similarly to **Variegata**, making the flowers confused in the centre with a few imperfect stamens. Fragrant, pale to deep cerise, irregularly blotched or striped white. Synonyms: 'Park's Striped'. 'Park's Rose Striped', 'Park's Striped Rose', 'Parksii Striped', 'Rosa Odorata', 'Striped Park's', 'Rosea Odorata'. Orthographic errors: 'Parckstriped', 'Parkii'. 'Parcksii Vera', 'Parcksii Stripes'.

Parksii. Buist, 1845, *The American Flower Garden Directory*, p.223: There is a French **Parksii**; single, crimson. (Believed extinct.)

Party Dress. (*C.japonica*), *American Camellia Yearbook*, 1959, p.279, Reg. No.394: A 9 year old chance seedling, originated by Caesar Breschini, San Jose, California, USA that first bloomed 1956. Plant growth is upright and medium rapid, with dark green leaves, 8 cm long x 5 cm wide. The semi-double flowers, 11 cm across x 5 cm deep, resemble **Frizzle White** in form with 25 petals, 5 rabbit ears and numerous stamens. The colour is creamy white, shading to pale pink in the centre, then deepening to lavender pink at the petal edge. Flowers mid-season to late.

Party Girl. (*C.japonica*), Outteridge, 1962, *1000 Named Camellias in Australia*, p.14: Pink, large, semi-double. Fragrant. Late blooming. Originated in Australia by H.K.C. Dettman, Wahroonga, N.S.W

Parviflora. (*C.japonica*), Courtois, 1833, *Magazin d'Horticulture*, 1[pt.D]313: Semi-double, rose-red, oblong petals, few flowers. Berlèse, 1840, *Monographie*, ed.2, pp.193, 234: Leaves lanceolate, oblong, very acuminate, 8 cm x 5 cm, almost flat, finely and irregularly serrulate, of a dull green; bud large, oblong with blackish scales near the base and yellowish at the tip; flower 8 cm across, full, regular, deep orange-red, petals imbricated, numerous, with a depressed heart, containing 2 or 3 infertile stamens. Originated in France by Cachet, Angers. No connection to the species *C.parviflora.*

Parviflora Striata. (*C.japonica*), Isola Madre Catalogue, 1845. No description. Fratelli Rovelli Catalogue, 1852, p.24: Same type as 'Imperialis' (**Gray's Invincible**). Originated in Italy. Synonym: 'Waratah Parviflora Striata'. (Believed extinct.)

Parvifolia. Nakai, 1940, *Journal of Japanese Botany*, 16(12):13. Synonym for *Camellia transarisanensis.* Japanese common name 'Taiwan-hime-sazanka'.

Parvula. (*C.japonica*), Verschaffelt, 1853, *Nouvelle Iconographie*, Book XII, pl.IV: A miniature formal double; the petals, although regularly imbricated, form a series radiating from the centre to the circumference; they are rounded and slightly emarginate. A beautiful pink, some tipped a paler pink contrasting with the centre. Franchetti, 1855, *Collezione* di *Camelie*, p.50: Small, perfectly imbricated flower. On the same plant, flowers of a different form and colour appear. For instance, completely cherry-red deep outer petals with the centre very pale, almost whitish or red with petals striped white. Originated in Florence, Italy.

Pasadena Hovey. *Camellia Digest*, 1(2), 1943. Synonym for **Mrs Anne Marie Hovey.**

Paschucha. Gallagher, 1966, *Gardeners' Chronicle*, pp.297-198. Orthographic error for 'Pao-chu-cha'. Different reading for **Baozhu Cha.**

Pasha of Persia. Fendig, 1949, *American Camellia Catalogue.* Synonym for **Grand Sultan** as 'Te Deum'.

Passimiana. (*C.japonica*), William Paul Nursery Catalogue, 1871, p.16. No description. (Believed extinct.)

Passing Cloud. (*C.japonica*), Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.179: Soft rose colour. Originated in USA.

Passos Manoel. (*C.japonica*), José Marques Loureiro Catalogue, No.1 1865, p.37, & No.9, 1872-1873, p.46: Rose form double, regular, vivid cherry with splashes of white in the centre. Originated in Portugal.

Pastel Shades. *(C.japonica),* ICS *Journal,* 2002, p.87, Reg. No.37: A chance seedling originated in the UK by Dr J.A. Smart, Marwood Hill, Devon. First flowered 1985 at circa 2 years. An upright shrub of medium growth rate. Flower buds deep pink. Blooms floriferously mid-season. Deep pink on petal margins, fading to light pink at the petal base (RHS.CC.58C shades to 62D). A

hose-in-hose semi-double with a column of yellow stamens. Flower size is 10 cm across x 10 cm deep. RHS Award of Merit (AM).

Pat Guernsey. Cannon, 1985, ACS., *The Camellia Journal*, vol.40, No.4, p.13. Orthographic error for **Pat Gurnsey.**

Pat Gurnsey. (*C.reticulata*), *New Zealand Camellia Bulletin*, 1973, vol.VIII, No.3, p.25, Reg. No.88: An 8 year old seedling of *C.reticulata* 'Tali Queen' (**Dalicha**) which first flowered 1972, raised by Mrs A.B. Durrant, Rotorua, New Zealand. The plant is upright, sturdy with tough, leathery, mid-green leaves, 8-10 cm long x 5-6 cm wide. The flower is semi-double, with 16 petals of solid texture, orbicular and up to 8 cm in diameter, with deep, marginal notching and heavy veining. The colour is RHS.CC. Red Group 52A-54A with pale, almost white, edges, 16 cm across x 7 cm deep.

Pat K. (*C.japonica*), SCCS., 1981, *Camellia Nomenclature*, p.126: White flecked lavender pink, shading to lavender pink at the edge. Medium, rose form double. Medium, open, upright growth. Flowers early to mid-season. Originated by L.E. Knupp, Shreveport, Louisiana, USA.

Pat La Motte Jones. (*C.japonica*), Cannon, 1966, *American Camellia Yearbook*, p.73: A new seedling from Carolina, that blooms mid-season, glowing pink and dark green foliage. Blooms full peony to incomplete double up to 15 cm across. Originated in USA. Sport: **Pat La Motte Jones Variegated.**

Pat La Motte Jones Variegated. (*C.japonica*), Gentry, 1969, ACS., *The Camellia Journal*, vol.24, No.1 as 'Pat La Motte Jones V.'. A virus variegated form of **Pat La Motte Jones** - Glowing pink blotched white. Originated in USA.

Pat Nelson. (C.hybrid). *New Zealand Camellia Bulletin*, March 2004, Issue No.147, vol.XXIII, No.5, p.8, Reg. No.457. Registered by I. Wills, Matamata, New Zealand, and named for the originator, Mrs P. Nelson, Tauranga, NZ. A chance seedling which first flowered in 1999. The flower is peony form, drifting to anemone form in late season, 10-12 cm diameter x 5-6 cm deep, having about 50 petals and no petaloids. There is some fusing of the petal bases, while the light yellow anthers are held on dark filaments and form a broad mass that is reasonably distinct from the petals. Flower colour is pink to mauve (RHS.CC.62C to 73C). The plant is upright, and of average density and growth rate with light green leaves 8 cm long x 4.5 cm wide. Flowers mid-season to late.

Pat Nixon. (*C.japonica*), *American Camellia Yearbook*, 1974, p.173, Reg. No.1265: A sport of **Richard Nixon** that first bloomed 1965. Plant growth is upright and average with light green leaves. Originated by Kramer Bros. Nursery, Upland, California, USA. The large, anemone form bloom is blush pink, veined deeper pink, 10 cm across. Blooms early to late. See colour photo, front cover, ACS, 1972, *The Camellia Journal*, vol.27, No.l.

Pat Pinkerton. (*C.reticulata* hybrid). ACS, *The Camellia Journal*, Aug. 1997, p.16, Reg. No.2417. A very large, dark red, semi-double cross of **Arch of Triumph** x a seedling ('Crimson Robe' [**Damanao**] x *C.lutchuensis*). Flowers mid-season to late. Originated by Frank Pursel, Oakland, Calif., USA. *American Camellia Yearbook*, 1997, p.6, colour photo before p.1. The 18 year old seedling first flowered in 1988. Average flower size is 14 cm across x 7.5 cm deep with 10 petals, 8 fluted petaloids, golden anthers and filaments. Plant growth is upright, open and slow, with dark green leaves 7.5 cm long x 2.5 cm wide.

Pat Poyner. (*C.japonica*), *American Camellia Yearbook*, 1960, p.205, Reg. No.454: An 8 year old chance seedling that first bloomed 1954. Originated by Dr Arthur Mazyck, Dotham, Alabama, USA. Plant growth is upright and open with light green leaves, 5 cm long x 4.5 cm wide. The rosepink, anemone form flower, 12.5 cm across x 7 cm deep, has two rows of outer petals - 14 in number - and 100 or more petaloids and yellow stamens. Blooms early to mid-season. Sport: **Pat Poyner Variegated.**

Pat Poyner Variegated. (*C.japonica*), Cannon, 1967, ACS., *The Camellia Journal*, vol.22, No.1 as 'Pat Poyner Var.': A virus variegated form of **Pat Poyner**. Rose-pink blotched white. Originated in USA.

Pat Summer. (*C.japonica*), SCCS., 1978, *Camellia Nomenclature*, p.124: Dark red. Medium, full peony form. Slow, spreading growth. Blooms mid-season to late. Originated in USA by R.M. Murray, Fort Valley, Georgia.

Patelixia. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p.152. Chinese synonym for **Bettie Patricia.**

Patersonii. Jacob Makoy et Cie Nursery Catalogue, 1849, p.20. van Houtte Catalogue, 1849-1850, 38:48. Orthographic error for **Pattersonii.**

Patezzi. *(C.japonica*), Anderson & Co. Nursery Catalogue, 1887, p.70. No description. Originated in Australia. (Believed extinct.)

Patience. (*C.japonica*), Griffin, ed., 1958, *Camellian*, 92: Light pink. Medium size, full peony form. Upright growth. Mid-season flowering. Originated in USA at Woodlawn.

Patrice Munsel. (*C.japonica*), Oregon Camellia Society Bulletin, 1955: A new seedling by Barney Goletto from seed of **Christine Lee.** It is a medium to large semi-double, red, with 3 rows of petals that open out and slightly curl back. It is upright with dark green foliage. Originated by Barney Goletto, Oregon, USA.

Patricia Ann. (*C.japonica*), *American Camellia Yearbook*, 1981, p.103, Reg. No.1729: A very large, soft pink, semi-double *C.japonica* (**Berenice Boddy** x **Mrs D.W Davis**), mid-season blooming. Originated by Howard Asper, Escondido, California, USA. Average flower size is 13 cm. across x 6 cm deep with 20 petals in 3 rows, 30 white petaloids and yellow anthers and a large sunburst of stamens. Growth is upright and medium with dark green leaves, 10 cm. x 6 cm. Chinese synonym 'Andaren'.

Patricia Burks. (*C.japonica*), SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Sport of **Duchess of Sutherland**, white with irregular edges and markings of red. Originated in USA.

Patricia Coull. (*C.reticulata* hybr.), *New Zealand Camellia Bulletin*, 1970, vol II, No.7, p.32, Reg. No.50: A chance seedling of **Buddha,** its male parent is considered to be a *C.japonica.* Originated by B. Rayner, Stratford, New Zealand. First flowered 1969. Habit is open, upright and rapid with dark green leaves, 13 cm. x 4.5 cm. The flower is a very large semi-double, with 14 petals, very soft pink, 15-20 cm. across x 7-8 cm. deep. See colour photo, front cover, *New Zealand Camellia Bulletin*, 1979, vol.XI, No.1.

Patricia Haskee. *(C.reticulata* hybrid). ACS 1995, The Camellia Journal, vol.50. No.2, p.15, Reg. No.2318: Very large size, pink, rose form double *C.reticulata* hybrid **Lilette Witman** x *C.reticulata* x *C.japonica* **Hulyn Smith**. Blooms early to late. Originated by Jack L. Mandarich, California, USA.

Patricia Kooney. (*C.japonica*), ACS, Aug.1987, *The Camellia Journal*, vol.42, No.3, p.5 and colour photo front cover: Brilliant, light pink, star crowned beauty. Large to very large, semi-double to double. Freckled all over with white high lights. Mid-season flowering. Blooms are 13 cm. across x 8 cm deep with 60 petals in 8 rows. Plant growth is spreading, dense and medium with dark green leaves, 8 cm x 6 cm. A chance seedling originated by Ferol & Sam Zerkowsky, Slidell, Louisana, USA.

Patricia M. Bates. *(C.hybrid*), *New Zealand Camellia Bulletin*, Mar.1991, vol.XVII, No.1, p.46, Reg. No.285: A 15 year old seedling of unknown parentage which first bloomed 1976, and was originated by P.M. Bates, New Zealand. It has upright, dense growth at a medium rate, with dark green leaves, 6.5 cm long x 3.5 cm. wide. Peony to semi-double flowers, 7-9 cm across x 4 cm, deep, with 16-20 petals and up to 30 petaloids. Filaments are pink and anthers yellow.

Blooms from early to late season. Dark red flowers with deeper veining on the petals, good texture, self grooming. See RHS.,CC, 46A.

Patricia Mary. (*C.japonica*), *New Zealand Camellia Bulletin*, 1972, vol.VII, No.4, p.6, Reg. No.60: A chance seedling, originated by Mrs R. Woodrow, Gisborne, New Zealand. The plant has a rapid, open, spreading habit with mid-green leaves, 9 cm x 6 cm. The flower is semi-double to loose peony with 20 petals and a varying number of elongated petaloids. The colour is a medium pink (RHS.CC.62A) and the size is 10-11 cm. across x 5 cm. deep.

Patricia Mealing. (*C.japonica*), ACS., 1949, *News Letter*, vol.4, No.3, Reg. No.7: Large, orchid pink, varying in form from semi-double to peony to anemone incomplete double, 10-12.5 cm. across. The petals shade from darker base to lighter tips. Leaves are medium green, acuminate; growth is compact. Blooms early to mid-season. Originated in USA by Dr & Mrs H.G. Mealing, Augusta, Georgia from chance seed. First bloomed 1945. See illustration, p.127, *American Camellia Yearbook*, 1950.

Patricia Mountbatten. (*C.japonica*), Magnolia Gardens and Nursery Catalogue, 1943: A Magnolia Garden's original, a little similar to the **Reverend John Drayton.** A rather flat flower of loose peony formation. Colour is a medium pink with a purple cast. Large, light green foliage. Originated in USA by Magnolia Gardens, John's Island, South Carolina. Synonym: 'Lady Patricia Mountbatten'.

Patricia Peck. *(C.japonica),* ICS *Journal*, 1997, p.86, Reg. No.29. Originated by Mr. David A.C. Peck, Aldershot, Fordingbridge, U.K. A 15 year old chance seedling of **Sylva** that first flowered 1990. A red single, opening flat with a prominent higo-like cluster of pale yellow stamens. Late flowering. Flower size 11 cm across. Leaves mid-season-green, flat, 8-10 cm long x 3-5 cm wide, lanceolate, acuminate. Flower buds globular.

Patrician. (*C.japonica*), McCaskill Gardens Catalogue 1947: A large, open, pink single, 10-11 cm across. The colour is plum pink. There are 5 irregularly shaped petals and a central cluster of golden stamens. Plant habit is compact and upright with dark green elliptic leaves, acuminate and slightly serrate. Flowers mid-season. Originated by McCaskill Gardens, Pasadena, California, USA. First flowered 1944.

Patrick Henry. (*C.japonica*), Gunnell, 1843, *Magazine of Horticulture* p:261: A seedling of 'Splendens', free growth, foliage like the old double white (**Alba Plena**) buds round, calyx short; the flower of a deep cherry-red colour, with 25 large, round petals, and 168 smaller ones, filling up the centre and forming a ranunculus shaped flower; no anthers or style. Originated by Dr J.S. Gunnell, Washington, D.C., USA.

Patrizia Ferrari. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.133 with colour photo; Medium size, anemone form, pink to red (RHS.CC.63B and 66A). Petaloids are fimbriated and variegated with white. A seedling of **Rubina** x 'Rosa Simplex' **(Aitonia),** first flowered in 1980. Originated by Dott. Guido Cattolica, Livorno, Italy.

Pat's Prize. *(C.japonica),* ACS, *The Camellia Journal*, May 1997, p.21, Reg. No.2404. A medium size, deep red/pink, formal double chance seedling. Flowers early to mid-season. Originated by W. Pat Brown, Montgomery, Ala., USA. *American Camellia Yearbook,* 1997, p.6, colour photo before p.1. The 5 year old seedling first flowered in 1994. Average flower size is 9.5 cm across x 1.8 cm deep, with 60 petals. Plant growth is upright and average, with dark green leaves 8.2 cm long x 4.5 cm wide.

Patsy Cline. (*C.reticulata* hybr.), Valdosta Camellias, 1986, ACS., *The Camellia Journal*, vol.41, No.4, p.9: Clear pink. Large to very large, semi-double to peony form. Medium growth. Flowers midseason to late. Originated by Frank Pursel, Oakland, California, USA from the cross 'Crimson Robe', (**Dataohong**) x **Jean Pursel.**

Patsy O'Neal. (*C.japonica*), SCCS., 1981, *Camellia Nomenclature*, p.126: Clear pink. Medium formal double. Medium, upright growth. Mid-season to late blooming. Originated in USA by Haynie.

Patsy Rish. (*C.japonica*), Belle Fontaine Nursery, 1967, ACS., *The Camellia Journal*, vol.22, No.3, p.20: Pink with deeper pink overtone. Large to very large, loose peony form. Originated in USA by W.H. Rish, Winnsboro, North Carolina.

Patsy Smith. (*C.japonica*), ACS, Aug.1987, *The Camellia Journal*, vol.42, No.3, p.6, Reg. No.2054: Medium size, blood red, semi-double, *C.japonica* chance seedling. Blooms early to mid-season. Originated in USA by Walter L. Smith, Tylertown, Mississippi. *American Camellia Yearbook*, 1989, p.83 with colour photo between pp.60-61: A seedling that first bloomed 1980. Average flower size 8 cm across x 5 cm deep with 12 petals and 2-3 petaloids. Plant growth is upright, average and medium with dark green leaves 8 cm x 4.8 cm.

Pattersonii. (*C.japonica*), Buist Nursery Catalogue, 1844-1845, p.12: Large, rosy crimson. Originated by Robert Buist, Philadelphia, USA. Orthographic error: 'Patersoni'.

Patti Perkins. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2005, p.13 with colour photo; Reg. No. 2692. A chance seedling that first flowered in 2001. Originated by Hyman R. Norsworthy, Beaumont, Tex., and propagated by Glenn Read Nursery, Lucedale, Miss., USA. The 7 cm diameter, loose peony to rose form double flower is stated to be rose red with white variegation. Plant is upright with average growth rate, and flowers early to mid-season. *American Camellia Yearbook*, 2006, p.64 with colour photo; Dark green leaves are 7.5 cm x 3.8 cm.

Patti Sue. (*C.pitardii* hybrid). *New Zealand Camellia Bulletin*, March 2004, Issue No.147, vol.XXIII, No.5, p.9, Reg. No.458. Registered by Kathlyn Craig, Havelock North, New Zealand. A chance seedling of the *C.pitardii* var. *pitardii* hybrid **Prudence** that first flowered in 1999. The flower is small, 5 cm diameter x 3-4 cm deep, a single of 6 petals, quite deep and trumpet-shaped. Colour is mainly light pink (RHS.CC.62A) darkening slightly to the flower centre. The stamen mass is small and compact, with lemon coloured filaments and anthers. Plant is of average height and form, and slow growth rate, with dark green leaves 6 cm long x 2.5 cm wide. Flowers mid-season to late.

Pattie Ann Vorce. (*C.japonica*), Marshall's Camellia Nursery Catalogue, 1963. Description not seen. *American Camellia Yearbook*, 1965, pp.243-244, Reg. No.728: (SCCS. No.63-14), A 4 year old chance *C.japonica* seedling that first bloomed 1960. Originated by M.L. Marshall, San Gabriel, California, USA. Flower is light pink, rose form double with yellow anthers, 10-11 cm across x 6cm deep. Blooms early to mid-season on a plant of vigorous, upright, open growth. Orthographic error 'Patty Ann Vorce', 'Peggy Voyce'.

Patty Ann Vorce. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.179. Orthographic error for **Pattie Ann Vorce.**

Patty Bengston. (*C.japonica*), *American Camellia Yearbook*, 1981, p.172, Reg. No.1580: A small, white, spotted light red, formal double *C.japonica* chance seedling. Blooms mid-season. Originated by Louis W. Strohmeyer, San Gabriel, California, USA. The 8 year old seedling first bloomed 1961. Average flower size is 7.5 cm wide, x 2.5 cm deep. Plant grwth is upright, dense and medium with dark green leaves.

Patty Skinner. (*C.japonica*), Julington Nurseries Inc. Catalogue, 1965. Description not seen. *American Camellia Yearbook*, 1967, pp.231-232, Reg. No.936: An 8 year old chance seedling that first bloomed 1960; originated by Julington Nurseries Inc., Jacksonville, Florida, USA. Plant growth is average and open with acuminate and serrate, dark green leaves, 7.5 cm. x 3.8 cm. The peony form flower, similar to **Daikagura,** is 12.5 cm across x 6 cm deep and has 44-48 petals. Colour is bright pink with lemon yellow anthers and pink filaments. Three rows of

long petals with 6-8 groups of 3.7 cm long stamens, interspersed with rabbit ears. Mid-season blooming.

Patun. (Patton), Gao, Jiyin, Ltr, 30 July 1990. Chinese synonym for **General George Patton.**

Pauciflora. (*C.japonica*), Cachet Catalogue, 1840-1841, p.3. No description. Originated in France. (Believed extinct.)

Paugham. Nantes, *Services des Espaces, Collections,* 1980. Abbreviation for 'Monsieur Paugham', (**Surpasse Nobilissima**).

Paul e Virginie. Mariotti Catalogue, 1924. Orthographic error for **Paul et Virginie.**

Paul et Virginia. James Veitch Jr, 1853, Catalogue of Select Stove Plants…, p.14. Scott & Sons Nursery Catalogue, 1868. Orthographic variant for **Paul et Virginie.**

Paul et Virginie. (*C.japonica*), Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*, vol.40, p.128: Flower 10 cm across, waratah form or peony form, of a greenish white or pink. Exterior petals 1-2 rows, large and flat; those of the interior, very numerous, unequal, varied, some elongated and narrow, others short and wide, nearly all ovoid, disorderly and forming a large protruding centre. Originated by Gruneberg. Orthographic variants: 'Paul e Virginie', 'Paul et Virginia' 'Paola e Virginia'.

Paul Harkey. (*C.reticulata* hybr.), *American Camellia Yearbook*, 1982, p.177, Reg. No.1822: A very large, dark red, semi-double, *C.reticulata* hybrid (*C.reticulata* 'Crimson Robe' x [5x = (*C.reticulata* 'Cornelian' x *C.japonica* **Mrs D.W. Davis**) x *C.reticulata* 'Cornelian']). Blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 9 year old seedling first bloomed 1979. Average flower size, 17 cm across x 6 cm deep. Heavy veining on the petals, showing little flecks of white. Plant growth is upright, average and rapid with dark green, heavily serrated leaves, 12.5 cm long x 7.5 cm wide. Chinese synonym 'Hakeyi'.

Paul Harvey. (*C.reticulata*), Kramer Bros. Nursery Catalogue, 1975: Orchid pink, shaded lavender, large, semi-double. Vigorous, open, upright growth. Blooms mid-season to late. A chance reticulata seedling raised by Kramer Bros Nursery, Upland, California, USA.

Paul Haskee. *(C.japonica),* ACS 1995, *The Camellia Journal,* vol.50, No.3, p.36, Reg. No.2337: Very large size red, anemone to peony form *C.japonica* **Elsie Ruth Marshall** x **R.L. Wheeler**. Blooms early to late season. Originated by Jack Mandarich, Grants Pass, Oregon, USA. ACS 1995, *American Camellia Yearbook*, p.9 with colour photo: the 19 year old seedling first bloomed 1982. Average flower size is 13 cm across x 4.5 cm deep with 90+ petals and golden anthers. Plant growth is upright, dense and average in rate with dark green leaves 10 cm long x 5.5 cm wide.

Paul Howard. Fruitland Nursery Catalogue, 1947-1948, p.29. Abbreviation for **Paul Howard's White.**

Paul Howard's White. (*C.japonica*), Wilmot, 1944, *Camellia Variety Classification Report*, 1944, p.29, as 'Paul Howard White'. No description. SCCS, 1947, *The Camellia. Its Culture and Nomenclature:* White. Large, formal double to rose form double. Vigorous, upright gowth. Pure white, imbricated formal double of **Alba Plena** form. Synonyms: 'Late Alba Plena', 'Paul J. Howard's White'. Abbreviations: 'Paul Howard', 'Paul J. Howard'. For illustration see p.273, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Paul J Howard. River View Nursery Catalogue, 1957-1958, p.9. Abbreviation for **Paul Howard's White.**

Paul J. Howard's White. Coolidge Rare Plants Garden Camellia Catalogue, 1949. Synonym for **Paul Howard's White.**

Paul Jones. (*C.japonica*), Hazlewood Nursery Catalogue, 1949, p.11: White or pale pink, pencilled pink. Large single to semi-double. Mid-season flowering. The flower is 10-12 cm across with an odd petaloid. Petals are large and notched at the apex. For illustration see pl.XV, Waterhouse, 1952, *Camellia Trail.* A seedling from Rookwood Cemetery, N.SW., Australia. See illustration, front cover ACRS, 1960, *Camellia News*, No.7. Sport: **Roberta.** Chinese synonym 'Baoer'

Paul Jones Supreme. (*C.japonica*), Waterhouse, 1968, ACRS., *Camellia News,* No.32, p.23: A large, flattish, semi-double, flushed white background with vivid carmine stripes. A seedling of **Paul Jones** originated by E.G. Waterhouse, Gordon, N.S.W., Australia. First flowered 1958. See illustration front cover, ACRS., 1974, *Camellia News,* No.55. Chinese synonym 'Chaoji Baoer'.

Paul Maymou. *(C.japonica),* Claude Thoby, 1993, *Camélias,* pp.12, 18, 25: Flowers mid-season. Medium size, clear red semi-double. Originated in France at the Paul Maymou Nursery.

Paul Plantiveau. *(C.japonica),* Claude Thoby, 1993, *Camélias,* pp.12, 16, 18, 50, colour photo p.7: Blooms early to mid-season. Medium size, single, pink flower, very bright to the centre and to the petal borders. Lightly scented. 5 round petals. Compact bush, abundant flowering, self grooming. Leaves dull green, lanceolate to broad-lanceolate, apices acuminate, margins serrulate. A seedling of *C.japonicas* **Jenny Jones** x **Berenice Boddy**, originated by Dr Clifford Parks, USA.

Paul Reid. (*C.japonica*), Hillcrest Nursery Catalogue, 1958. Description not seen. Originated in USA.

Paul Sérusier. *(C.reticulata),* Originated by Roger Salaùn, "Stervinou", Guipronvel, France. A 16 year old seedling, parentage unknown, first flowered 2008. Plant is upright and fast growing, with flat, leathery, dark green leaves, 15cm x 7cm. Flowers are single, cupshaped, bright rose, 13-15cm diameter x 3-4cm deep. Stamens columnar, anthers yellow, filaments white. Long mid-season flowering. Flowers fall whole.

Paul Sherrington. *(C.japonica),* ACRS, *Camellia News,* 1995, No.135, p.13, Reg. No.458: Originated by Colleen Sherrington, North Balwyn, Victoria, Australia. A chance seedling of the *C.japonica* **Chô-chô-san.** First flowered 1991. White, semi-double flower of 17 petals with an occasional petaloid, 12 cm across x 6 cm deep. Flowers freely over a long season on a slow growing upright plant. Leaves glossy green, elliptic, flat with serrate margins and acuminate apices, 7 cm long x 5 cm wide. Petals flat, filaments columnar. Attractive flower with white filaments and porcelain petal texture.

Paul Tulane. (*C.japonica*), McIlhenny Catalogue, 1945-1946, p.12. A variety originated at Jungle Gardens, Avery Island, Louisiana, USA. Medium size, spinel red, lined rose and purple; irregular peony form; central petals upright and interspersed with small groups of white stamens.

Paul William Jannoch III. (*C.japonica*), SCCS., 1949, *The Camellia. Its Culture and Nomenclature:* Dark red. Medium, formal double. Medium, compact, upright growth. Late flowering. A chance seedling originated by Jannoch Nurseries, Altadena, California, USA. See illustration, p.180, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III. Abbreviation 'Paul Wm. Jannoch III'.

Pax. (*C.japonica*), Rhodellia Nursery Catalogue [before 1945]: Description not seen. SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* White. Large, formal double. Medium, compact, upright growth. Fendig, 1953, *American Camellia Catalogue:* A medium sized, white, complete double (formal), 8-10 cm across. Petals are small, about 2 cm wide and notched. Bloom is flat and resembles a gardenia. There are no stamens. Leaves are light green, narrowly elliptic, 10 cm long x 3.2 cm wide, apex long cuspidate, raised venation, serrations wide and shallow. Growth medium, compact, upright. The origin of this cultivar is doubtful. J.E.Youtz of Pasadena, California, is said to have imported it from France about 1930, while it is also thought to have come from Japan as one of its synonyms is 'Yukidaruma'. However no evidence has been located of its previous existence in either country. Synonyms: 'Yukidaruma', 'Snow Doll', 'White Laurel Leaf', 'Mueller's White', 'White II Tramonto'. See illustration, p.275, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

Paxtonii. (*C.japonica*), Anonymous, 1839, *Floral Magazine*, p.221 as 'Paxtoni': Medium size, scarlet, peony form. Originated in England.

Paxtonii Vera. (*C.japonica*), Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France*, vol.40, p.310: Flowers up to 9 cm across, regular rose form, of dark, velvety orange red, like a poppy. Petals not very numerous, in several rows, shell-like, entire, rounded. Originated in England.

Pay Day. (*C.japonica*), Cannon, 1966, *American Camellia Yearbook*, p.81: This pink, **Reverend John Bennett** type, will grow to 15 cm. It was named by Ann Hackney, Charlotte, North Carolina, USA. A large, semi-double with occasional petaloids. Blooms mid-season.

Payne's Red. Griffiths & Strothers, 1954, ACS., *Nomenclatural Cross Reference Lists*, pp.10,11. Synonym for Vedrine.

Peace. (*C.japonica*), Fendig, 1956, *American Camellia Yearbook*, p.33: Originated by Charles S. Tait, Sr., Brunswick, Georgia, USA from seed on unknown parents. The medium white, semi-double flower is 7.5-8 cm across.

Peach Blossom. (*C.sasanqua*), SCCS., 1958, *Camellia Nomenclature*, p.95: Soft pink. Medium to large. Originated in USA. Chinese synonym 'Taohua'.

Peach Blossom. W.C. Slocock, Woking Nursery Catalogue, 1938-1939, p.74. Orthographic variant for 'Peachblossom', synonym for **Fleur Dipater.**

Peach Blow. (*C.japonica*), Vanderbilt, 1941, *Camellia Research, II*, p.6 as pink. SCCS., 1950 *The Camellia. Its Culture and Nomenclature:* Pink. Medium, semi-double. Vigorous, upright growth. Originated in USA by Domoto, California. For illustration see p.275, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Peach Blush. *(C.japonica)*, ACRS, *Camellia News*, 1998, No.147, p.13, Reg. No.511. Originated by Bernice Joy West, Carrum Downs, Victoria, Australia. Seed parent 'White Waratah' (**Anemoniflora Alba**), pollen parent unknown. First flowered 1996. The Elegans-form flower has 14 very pale peach guard petals and 230 light peach petaloids (RHS.CC.69D – 65D) 8.8 cm across x 3.5 cm deep. Flowers appear mid-season on an upright plant of medium growth.

Leaves dark green, glossy, curled and flat, oval, fine serrations, 6 cm long x 4 cm wide. Petals notched and fluted, petaloid centre stands up in a tight bunch.

No description. Charles van Geert, 1850, Catalogue, No.117, p.12: Peony form, white washed with lilac. Orthographic variant 'Pearle'. Originated in Belgium.

Pearl Burson. (*C.japonica*), *American Camellia Yearbook*, 1969, p.165, Reg. No.1015: A 12 year old chance seedling that first bloomed 1963; originated by Mrs M.J.Burson, Long Beach, Mississippi, USA. Plant growth is upright, dense and rapid, with dark green leaves, 10 cm x 4.6 cm. The formal double flower, similar to **Elizabeth Arden,** is 7.5 cm across x 3.7 cm deep with 45 petals. Red and white. Very long flowering season.

Pearl Cooper. Bob Wine's Nursery Catalogue. 1985-1986, p.3. Orthographic error for **Pearle Cooper.**

Pearl Dooley. (*C.japonica*), Belle Fontaine Nursery Catalogue, 1962, p.4. No description. Originated in the USA. No valid listing located.

Pearl Harbor. (*C.japonica*), Magnolia Gardens and Nursery Catalogue, 1945-1946; Fruitland Nursery Catalogue, 1945-1946, p.27: An enormous, late blooming, rose-red semi-double; one of the finest new seedlings we have seen. Mag. Gard. 1948. Fendig, 1951, *American Camellia Catalogue:* Large, bright crimson red, incomplete double (anemone form) to complete double (incompletely imbricated), 10-12.5 cm across. Petals slightly smaller and more numerous than 'Mathotiana' (**Julia Drayton**). Stamens interspersed among the inner petals. Leaves medium green, broad-oval, 8 cm x 5.5 cm; short, prominent apex, venation indistinct, shallow, broad serrations. Habit, vigorous, compact, upright and stocky. Originated in the Middleton Gardens, John's Island, South Carolina from seed of unknown parents. First bloomed 1941. Synonym: 'Middleton Number 40'. Sport: **Pearl Harbor Variegated.**

Pearl Harbor Variegated. (*C.japonica*), Fendig, 1951, *American Camellia Yearbook as* 'Pearl Harbor Var.': A virus variegated form of **Pearl Harbor** - Crimson red blotched white, Originated in USA.

Pearl Isobel. *(C.japonica),* ACRS, *Camellia News*, 1997, No.143, p.17, Reg. No.493. Originated by Brian W. Flanagan, Eagle Heights, Queensland, Australia. A chance seedling that first flowered 1989. The informal double flower of 80 petals and petaloids is pale blush pink (RHS.CC.69C) fading to 69D on outer edges, 9.5 cm across x 4.8 cm deep. Free flowering on an open upright plant of medium growth rate, flowering mid-season to late. Leaves mid-green, glossy, flat, elliptic, serrate margins, acuminate apex, 8.4 cm long x 4.8 cm wide. Outer petals reflex back, inner petals upstanding. Anthers few and rarely showing.

Pearl King Tait. (*C.japonica*), Flanders, 1969, *American Camellia Yearbook.* p.108. Originated by Charles S. Tait Sr., Brunswick, Georgia, USA. No description. No valid listing located.

Pearl Marginata. Camellia Hall Nursery Catalogue, 1955. Listed as a sport of 'Horkan'. however too unstable and reverts back, so reduced to a synonym of **Pompone** as 'Horkan'.

Pearl Maxwell. (*C.japonica*), Doty et al., 1948, *American Camellia Yearbook***,** 250: A 10 year old seedling of **Enrico Bettoni,** originated by Mrs C.O. Maxwell, Reno, Georgia, USA. A hardy, vigorous plant producing complete double, regularly imbricated, 9-10 cm across flowers, mid-season to late. See p.241 for illustration. Colour photo facing p.27, *American Camellia Yearbook***,** 1950 and Fendig, 1951, *American Camellia Catalogue.* Registration No.26, *American Camellia Yearbook***,** 1954. Awarded a Preliminary Certificate by the RHS, 1960. Chinese synonym: 'Beihong Boer'.

Pearl of China. Vanderbilt, 1941, *Camellia Research, II*, p.5. Synonym for **Semi-double Blush.**

Pearl (Rollisson). *(C.japonica),* van Houtte Catalogue, 1859, 77:65 as 'Pearl': Pearly white. Petals round and of good substance and perfection in form, one of the whitest. Originated in England by Rollisson.

Pearl S. Buck. (*C.reticulata* hybrid). *American Camellia Yearbook*, 1991, p.79, Reg. No.2212: Very large size, dark red with frosting, semidouble, *C.reticulata* 'Cornelian' (**Damanao**) x **James McCoy.** Blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 16 year old seedling first flowered 1980. Average flower size is 17.5 cm across x 7.5 cm deep with 25 petals and red filaments. Growth is upright and medium in rate with dark green leaves 10 cm long x 4.5 cm wide. See colour photo between pp.80-81.

Pearl Scruggs. (*C.japonica*), *American Camellia Yearbook***,** 1968, p.135, Reg. No.978: A 10 year old chance seedling that first bloomed 1963. Originated by Pearl Scruggs, Hahira, Georgia, USA. Plant growth is upright and rapid with light green leaves, 9.5 cm x 5 cm. The rose form double flowers, similar to 'Purity', (**Shiragiku**) are 11 cm across x 6 cm deep with 36 petals and 8-10 petaloids. White with yellow anthers and white filaments. Blooms mid-season.

Pearl Terry. *(C.reticulata x C.japonica). American Camellia Yearbook,* 1992, p.37, Reg. No.2295: Very large size, rose pink, formal double opening to rose form double. Blooms early to late. A seedling of *C.reticulata* hybrids **Buddy Bills** x **Jean Pursel.** Originated by Frank Pursel, Oakland, California, USA. The 15 year old seedling first flowered 1982. Average flower size is 15 cm across x 7.5 cm deep with 40-45 petals. Plant growth is upright and vigorous with dark green leaves 15 cm long x 6 cm wide. See colour photo between pp.40-41. Chinese synonym 'Mingzhu'.

Pearle. L.L. Liebig, 1839, Verzeichnis von Warmen und Kalten Hauspflanzen..., p.10. Orthographic variant for **Pearl.**

Pearle Camellia. Jacob-Makoy, 1828 Catalogue, p.5. Synonym for **Perle des Camellia.**

Pearle Cooper. (*C.japonica*), Gerbings Camellia Nursery, 1968; ACS., *The Camellia Journal***,** 1968, vol.23, No.4, inside back cover. No description. *American Camellia Yearbook,* 1969, p.165, Reg. No.1064: A 10 year old seedling of 'Elizabeth Bowman' x **Adolphe Audusson** that first bloomed 1964. Originated by Ralph E. May, Fernandina Beach, Forida, USA. The camellia has light green leaves, 11 cm x 6 cm. The semi-double flowers, similar to **Frizzle White,** are 13 cm across, deep pink and white with yellow anthers and white filaments. Flowers mid-season to late. Orthographic error: 'Pearl Cooper'.

Pearl's Best. (*C.japonica*), Gentry, 1972, ACS., *The Camellia Journal*, vol.27, No.4. No description. Originated in USA. No valid listing located.

Pearl's Pet. (*C.japonica*), Hillcrest Nursery Catalogue, 1958; Robinson, 1958, *American Camellia Yearbook*, p.62: Rose red. Miniature, anemone form. Vigorous, compact, upright growth. Flowers early to mid-season. Originated by Mrs P. Chicco. Charleston, South Carolina, USA. See colour photo, pl.124, p.63, *Encyclopedia of Camellias in Colour*, vol.II, 1978.

Pearly Cascade. (*C.pitardii* hybrid). *New Zealand Camellia Bulletin*, March 2003, Issue No.144, vol.XXIII, No.2, p.14, Reg. No.447. Registered by Mark Jury, Tikorangi, New Zealand. A chance seedling of *C.pitardii* var. *pitardii* which first flowered in 1990. The flowers are semi-double, 7 cm diameter x 3 cm deep, and are bright pink in colour (RHS.CC.62B-65B) with about 15 spatulate petals and a small compact central group of stamens. The plant has a spreading, open growth habit and is slow growing, with a mass of cascading flowers on a groundcover type plant. The dark green leaves are 6 cm long x 3 cm wide. Flowers mid-season.

Pearly Gates. (*C.japonica*), Fendig, 1953, *American Camellia Yearbook:* Pink. Complete double. Mid-season. SCCS, 1954, *The Camellia. Its Culture and Nomenclature*, p.71: Shell pink with pearl coloured bud in the centre. Medium formal to rose form double. Originated in USA at the Fruitland Nursery, Augusta, Georgia.

Pearly Shells. (*C.x williamsii*), *New Zealand Camellia Bulletin*, 1984, vol.XIII, No.6, p.22, Reg. No.203: Originated by F. Jury, Tikorangi, Taranaki, New Zealand. This *C.saluenesis x C.japonica* **K.Sawada** seedling, first flowered 1978 and has formal double flowers of pearly pink, up to 12 cm across x 4 cm deep with about 45 petals, inclined to be spoon shaped. The plant has an upright, open form. The leaves are light green, 7.5 cm x 3.5 cm. Flowers mid-season to late.

Pearsoniana. (*C.japonica*), Marnock, 1841, *Floricultural Magazine***,** 6(61). Originated in the UK. No description seen. (Believed extinct.)

Peart. *(C.japonica),* J.E. von Reider, 1834, *Die Beschreibung und Kultur der Azaleen, Cactus, Camelien...,* p.219. No description. (Believed extinct).

Pecchiolana. Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de Paris*, vol.40, p.131. Orthographic variant for 'Pecchioliana', synonym for **Contessa Nencini.**

Pecchioliana. van Houtte Catalogue, 1846-1847, 27:29. Orthographic errors: 'Pecchiolana', 'Peccholana'. Synonym for **Contessa Nencini.**

Pectinata. (*C.japonica*), Loudon, 1842, *The Gardener's Magazine*, vol.18, p.530. No description. Originated in England. "In the conservatory of Cowly House, Devonshire there are fine plants of C.j. **Pectinata**." (Believed extinct.)

Pedro C. Guerra. (*C.japonica*), José Marques Loureiro Catalogue, No17, 1881-1882, p.72: Formal double. White striped vermilion. Originated in Portugal.

Pee Wee. (*C.japonica*), SCCS., 1960, *Camellia Nomenclature*, p.90: Red. Miniature, anemone form. Vigorous, open, upright growth. Blooms mid-season to late. Originated in USA by W. Wylam, California.

Peeble's Variegated. (*C.japonica*), Griffin Nursery Catalogue, 1945. No description. Originated in USA.

Peekaboo. *(C.pitardii* var. *pitardii* hybrid*). New Zealand Camellia Bulletin,* March 1996, Issue No.123, vol.XIX, No.4, p.47, Reg. No. 370: Originated by N.G. Haydon, Papakura, New Zealand. A bright pink (RHS.CC.68A-D), small formal double, 7.5 cm across x 3 cm deep with 88 petals. The plant has a dense, spreading, compact habit with medium growth rate and mid-green leaves 7.5 cm long x 3.5 cm wide. A chance seedling of *C.pitardii* var. *pitardii* **Fairy Bouquet.**

Peer Hybrid. Hilsman. 1966, *American Camellia Yearbook*, p.139. Collective epithet for *C.pitardii x C.cuspidata* hybrids.

Peerless. (C.*hiemalis*), ACRS., 1975, *Camellia News*, No.58A, p.9, Reg. No.167: Originated by Edgar R. Sebire, Wandin North, Victoria, Australia. Seed parent **Shôwa-no-sakae,** first bloomed 1970. The bright, rose-pink, irregular, double, 9 cm flowers are produced on a vigorous, spreading, dense plant. Very early flowering. The olive-green ovate-elliptic, 7 cm x 5 cm leaves have blunt apices and fine serrations.

Peg O' My Heart. (*C.japonica*), SCCS., 1962, *Camellia Nomenclature*, p.83: White, washed and shaded orchid pink. Large peony form. Vigorous, compact growth. Mid-season blooming. Originated in USA by Hugh Shackelford, Albany, Georgia.

Peggy Burton. (*C.pitardii* hybrid). *New Zealand Camellia Bulletin,* March 1999, Issue No.132, vol.XXI, No.1, p.14, Reg. No.399. Registered by N. Haydon, Takanini, New Zealand. A seedling of **Nicky Crisp,** pollen parent unknown. Flower is semi-double, and similar in properties to **Nicky Crisp** but is larger, 10 cm diameter x 4 cm deep, flatter, and with more petals (20-25) than the parent. Colour is mid-pink (RHS.CC. 73D) shading from a darker colour at the tips (RHS.CC. 68C) to lighter at the flower centre. The dense, spreading and slow-growing plant first flowered in 1995, and has mid-green leaves 8 cm long x 3.5 cm wide.

Peggy di Russia. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.134 with colour photo; Small to medium size, informal double, white (RHS.CC.156D). A seedling of **Alba Simplex** x 'Giorgia Bianca', first flowered in 1987. Originated by Dott. Guido Cattolica, Livorno, Italy.

Peggy Hopkins Joyce. SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.55. Synonym for **Peggy Joyce.**

Peggy Howard. (*C.japonica*), Hillcrest Nursery Catalogue, 1958. Description not seen. Originated in USA.

Peggy Joice. Portland Camellia Nursery Camellia Catalogue, 1946-1947, p.7. Orthographic error for **Peggy Joyce.**

Peggy Joyce. (*C.japonica*), Portland Camellia Nursery Camellia Catalogue, 1946-1947, p.7. Description not seen. SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Red marbled white.

Medium rose form double. Mid-season blooming. Originated by the Portland Camellia Nursery, Portland, Oregan, USA. Synonym: 'Peggy Hopkins Joyce'. Orthographic error: 'Peggy Joice'.

Peggy Miller. *(C.japonica),* ACS, *The Camellia Journal*, June 2013, p.25 with colour photo; Regn No.2838; ACS, *Yearbook*, 2013, p.132 with colour photo; Originated, registered and propagated by Vernon E. Howell, Lucedale, Miss., USA. A 12 year old seedling, parentage unknown, first flowered 2004. A medium size, 9-10cm diameter x 5cm deep, formal double flower with 20+ petals, which are large, slightly pointed and slightly incurved. Colour light pink. Heavy petal texture, and flowers fall whole. Spreading, open growth at a slow rate. Mid-green leaves average 7.5-10cm x 5cm with medium serration. Flowers early to midseason.

Peggy Stewart. (*C.japonica*), *American Camellia Yearbook*, 1956, p.64, Reg. No.283: A 7 year old chance seedling; originated by John S. Gelder, San Fernando, California, USA that first flowered 1953. Plant habit is upright, dense and medium with leaves 8 cm x 5 cm.The flowers, 6-7.5 cm across x 3.8-5 cm deep, are a clear, brilliant red and, in form, resembles **Professor Sargent,** but are peony centered with 7-11 petals and 30-50 petaloids. Flowers mid-season to late.

Peggy Sykes. (*C.japonica*), Gentry, 1964, ACS., *The Camellia Journal*, vol.19, No.4, p.30. No description. Originated in USA. No valid listing located.

Peggy Voyce. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.180. Orthographic error for **Pattie Ann Vorce.**

Peggy's Blush. *(C.japonica), American Camellia Yearbook*, 1991, p.79, Reg. No.2220: Medium size, white with peach blush, formal double *C.japonica* chance seedling that blooms mid-season to late. Originated by Don Applegate, Pensacola, Florida, USA. The 9 year old seedling first flowered 1985. Average flower size is 8 cm across x 3.8 cm deep with 85 petals. Growth is upright, dense and rapid with dark green leaves 7.5 cm long x 3.8 cm wide. See colour photo between pp.40-41.

Percivalii. Anonymous, 1839, *Magazine of Horticulture*, 5:154. Originated in USA by Mrs Hibbert. No description. Orthographic errors: 'Percevalii', 'Percivalli'. (Believed extinct.)

Percivalli. Auguste van Geert, 1848, Catalogue, p.21. Orthographic error for **Percivalii.**

Perclata. (*C.japonica*), Jean Verschaffelt Catalogue, 1867-1868, p.45. No description. (Believed extinct.)

Perc'yae. (*C.japonica*), Sweet, 1830, *Hortus Britannicus*, ed.2, p.74 as the 'Duke of Northumberland's Camellia'. Berlèse, 1837, *Monographie*, ed. 1, p.83 as 'Percyae': Leaves large, wide-oval, still of blackish green; bud oblong, scales greenish; flower large, single, cherry-red; stamens numerous, dispersed, recurved, confined in a fascicle as in **Aitonia** giving the interior of the bloom the form of a passiflora - curious. Originated in England. Orthographic errors: 'Percyvalli', 'Perceya'. Orthographic variant: 'Percyae'.

Percyae. Berlèse, 1837, *Monographie*, ed.1, p.83. Orthographic variant for **Perc'yae.**

Percyvalli. Trillon, Le Mans Nursery Catalogue, 1843, p.8. Orthographic error for **Percivalii.**

Perdita. *(C.japonica), Australian Botanical & Horticultural Society Report.* 1849. Camden Park Seedling 7/50, raised by Sir William Macarthur, Camden Park, N.S.W., Australia. Waterhouse, 1947, *Camellia Quest*, p.17: Red, with a few white stripes, very double, incurved like 'Myrtifolia'. Orthographic errors: 'Perditti', 'Perditta', 'Perpeta'. Sport: 'Perdita Rosea'. Chinese synonym: 'Peidida'.

Perdita Rosea. (*C.japonica*), Brunnings & Son Catalogue, 1886; Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues.* p.181: Pink, formal double, sport of **Perdita.** Originated in Australia.

Perditta. Brunnings & Son Nursery Catalogue, 1882, p.71. Orthographic error for **Perdita.**

Perditti. Wyatt Nursery Catalogue, 1886, p.37: Crimson, white stripes. Orthographic error for **Perdita.**

Perdix. *(C.japonica), Jardim Portuense*, 1844, April, No.7, p.103; Commonly known as 'Olho de Perdiz' (Partridge Eye) amd 'Cabeça de Perdiz' (Partridge Head). It has five regular petals, dark scarlet, and in the centre a cluster of stamens, or rather petals striped white. Obtained by Father José d'Almeida in Porto, Portugal. Identified 2009 growing at Fiaes.

Pere Antoine. (*C.japonica*), McIlhenny, 1948, *Introduction List:* Blossom measuring 10 cm across, full, double, large petals which swirl and turn down, some pinched; centre composed of lemon yellow stamens, tipped cinnamon buff, some of the stamens interspersed with petaloids, same colour as bloom which is solid white. A seedling originated at Jungle Gardens, Avery Island, Louisiana, USA.

Peregalli. (*C.japonica*), Oudin, Lisieux Catalogue, 1845-1846, p.47: Very delicate pink, circumference imbricated, centre very fine cluster. We have submitted this flower for examination by Abbe Berlèse - it has his approval. Burdin Maggiore & Co. Catalogue, 1845, p.42. No description. Verschaffelt, 1853, *Nouvelle Iconographie*, Book VI, pl.I as 'Peregallii': A fine, uniform pink, sometimes with a few sparse, white streaks, petals biformed, the interior lanceolate, all emarginate. Originated in Italy by Conte B. Lechi. Orthographic errors: 'Peregallii', 'Peregralli'.

Perego. (*C.japonica*), Isola Madre Catalogue, 1845. A seedling of **Camille Brozzoni,** originated in Italy by Brozzoni. No description. (Believed extinct.)

Peregralli. van Houtte Catalogue, 1847-1848, 31-34. Orthographic error for **Peregalli.**

Peregrina. (*C.japonica*), Harrison, ed., 1838, *The Floricultural Cabinet*, vol.6, p.149 as 'Pelegrina'; Jacob Makoy et Cie Catalogue, 1839, p.17. No description. Van Houtte Catalogue, 1842, 9:56: White funnel shaped streaked with carmine. Its leaves are extremely pointed. Franchetti, 1855, *Collezione di Camelie*, p.50: Blush white streaked pink and carmine red; it resembles a pink in form and colouring. Orthographic errors: 'Perezina', 'Pelegrina'.

Peregrina Vera. *(C.japonica),* Berlèse, 1849, *Annales de la Société Central d'Horticulture de France*, vol.40, p.76. Berlèse states that there is another camellia in commerce under this name, of which the flowers are waratah form, red, and the plant very tender.

Pereya. (*C.japonica*), Tagliabue, 1840, *Nomenclatore Camelliae...*, No description. Originated in Italy. (Believed extinct.)

Perezina. Pacific Nursery Catalogue, 1893. Orthographic error for **Peregrina.**

Perfecta. (*C.japonica*), Loddiges Catalogue, 1836, p.25. No description. Berlèse, 1843, *Iconographie*, pl.285: Flower 10 cm across, a full, irregular peony form of clear orange red with a blend of carmine and a touch of rose. The petals, in 4 rows, are rounded, slightly emarginate, imbricated, reflexed; the interior, strap-like, erect, crowded into a cluster forming an hemisphere about 4 cm across. Charles van Geert, 1847, Catalogue, No.101, p.12: Very large and well constructed flower. Strong, deep pink, variegated and marbled with white. Originated in France by Cachet of Angers. Orthographic error: 'Perfecto'.

Perfecta. (*C.japonica*), Oudin. Lisieux Catalogue, 1844, p.12: (New from Italy). Perfect imbricated form; bright carmine red with a rosy white centre. Originated in Italy.

Perfecta. van Houtte Catalogue, 1846-1847, 27:29. Synonym for **Chalmer's Perfection.**

Perfecta Alba. (*C.japonica*), Auguste van Geert, 1854, Catalogue No.36, p.42. No description. Verschaffelt, 1860, *Nouvelle Iconographie*, Book VI, pl.I: This variety is of Belgium origin. The blossoms of perfect imbrication, are large, convex and pure white. The numerous petals are large, well rounded with a sinus at the summit.

Perfecta Carminea. (*C.japonica*), Baumann, Mulhouse Nursery Catalogue, 1841-1842. No description. (Believed extinct.)

Perfecta Chalmer. Auguste van Geert Nursery Catalogue, 1848, p.20. Synonym for **Chalmer's Perfection.**

Perfecta Chalmers. Jacob Makoy et Cie Nursery Catalogue, 1849, p.20. Synonym for **Chalmer's Perfection.**

Perfecta (Chalmer's). van Houtte Catalogue, 1846-1947, 27:29. Synonym for **Chalmer's Perfection.**

Perfecta Chalmers Maculata. Lichtenthal, 1852, *Manuale botanico enciclopedico popolare*. Synonym for **Perfecta Maculata.**

Perfecta Dilecta. (*C.japonica*), Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.14. No description. Originated in Italy. (Believed extinct.)

Perfecta Globosa. (*C.japonica*), Verschaffelt Catalogue, 1844-1845, p.28. No description. de Jonghe, 1851, *Traité de la Culture du Camellia*, p.117: Imbricated; pure white. Originated in Italy.

Perfecta (Jury). (*C.x williamsii*), Trehane Camellias, 1980, p.4 invalidly as 'Perfecta'. Raised by Les Jury, New Zealand. A distinct formal double of medium size, 6-9 cm across, rich rose, with 60 petals, all incurved, all terminating in a white point in a notch. The leaves are dark green, curved and corrugated, 7-8 cm long x 4-5 cm wide. The plant is bushy with dense, rigid branching. The use of the latinised name 'Perfecta' is also illegal according to the Horticultural Code.

Perfecta Maculata. (*C.japonica*), Burdin Maggiore & Co. Catalogue, 1845. No description; 1849-1850, Catalogue: Dark red, speckled white, inconstant; imbricated. Originated in Italy. Synonyms: 'Perfecta Chalmers Maculata' ' 'Perfecta Striata', 'Perfection Variegata', 'Perfection Variegated'. Orthographic errors: 'Perfecto Variegata', 'Perfetta Maculata'.

Perfecta Rosea. (*C.japonica*), Verschaffelt Catalogue, 1844-1845, p.28. No description. Originated in England. (Believed extinct.)

Perfecta Striata. Verschaffelt Catalogue, 1849-1850, p.48. Synonym for **Perfecta Maculata.**

Perfetta Marginata. (*C.japonica*), Stefano Pagliai Catalogue, 1867. No description. Originated in Italy. (Believed extinct.)

Perfumed Pearl. (*C.japonica* hybrid). *New Zealand Camellia Bulletin*, March 1999, Issue No.132, vol.XXI, No.1, p.16, Reg. No.408. A cross between C.hybrid **Scented Sun** and *C.japonica* **Kramer's Supreme**. Registered by J.R. Finlay, Whangarei, New Zealand which first flowered in 1989. Flowers are anemone form, 10 cm diameter x 4.5 cm deep with about 13 petals and 30-40 petaloids. The large outer petals are mid-pink (RHS.CC.62B), lightening towards their base, while the central mass of petaloids is a lighter colour (RHS.CC.49D). The flowers have a light honeyvomb scent. The plant is upright, and of average density and growth rate with dark green leaves 9 cm long x 4 cm wide.

Pergia. (*C.japonica*), Anonymous, 1873, *The Garden*, p.200: '..for forming a tree or covering a wall with the utmost despatch. It also bears a noble flower'. No description. Originated in England.

Perhaps. Macoboy, 1981, *The Colour Dictionary of Camellias*, pp.136-139. Synonym for **Osaraku.**

Perky. (*C.sasanqua*), SCCS., 1968, *Camellia Nomenclature*, p.153: Pink. Large, loose, peony form with long, narrow, twisted petals, notched at the end. Originated in USA.

Perla. (*C.japonica*), Medici Spada, 1858, *Della Nuova Camellie che si vengono ottenendo dalle Semine Romane*, p.7: Large flower, with 12 or more rows of petals, perfectly imbricated, those internal a spiral form, colour a flat pearl. Originated in Italy by Delgrande, Rome.

Perla (Blanchard). (*C.japonica*), *American Camellia Yearbook*, 1968, p.135, Reg. No.1012, invalidly as 'Perla': An 8 year old chance seedling that first bloomed 1961; originated by C.E. Blanchard III, Carthage, Texas, USA. Plant growth is upright, spreading and medium with dark green leaves averaging 10 cm x 5 cm.The semi-double bloom, similar to 'Donckelaeri' (**Masayoshi**), is 11 cm across x 7 cm deep with 10-14 petals and 1-4 petaloids. Colour is light pink with yellow stamens. Petals very thick. Blooms early to mid-season.

Perla delle Camelie. Del Lungo e Girardi, 1928, *Le Camelie*, p.106. Orthographic variant for **Perle des Camellia.**

Perlata. *(C.japonica*), Jean Vervaene Fils, 1864, Price List No.1, p.7. No description. Originated in Italy.

Perle de Neige. (*C.japonica*), McEarcharn, Neil, 1963, *Catalogue of the Plants in the Gardens of the Villa Taranto*, p.60. No description. No valid listing located. Originated in Italy.

Perle des Camellia. (*C.japonica*), Berlèse, 1837, *Monographie*, ed.1, pp.61-62: Leaves 7.5 cm x 5 cm, ovate-lanceolate, of a pale green; flower medium size, double, rose coloured with the form, colour and disposition of the petals similar to 'Paeoniiflora'. Originated in Italy. Orthographic variant: 'Perla delle Camelie'. Orthographic error: 'Pearle Camellia'.

Permuttkelch. *(C.sasanqua). Kamelien, 75 Years of Camellia*, Catalogue 2008, p.30 with colour photo; A chance seedling from one of the 'Paradise' range, first flowered 2009. Originated by Peter Fischer, Wingst, Germany. A single flower, 5cm diameter, with 8 wide open petals, pearl pink with a touch of salmon. Creamy white filaments and orange-yellow anthers. Glossy, dark green leaves, 6cm x 3cm, lightly serrated. Upright growth at medium rate.

Pernosa. (*C.japonica*), Peer, 1956, *American Camellia Yearbook*, p.56. No description.

Perola de Villar d'Allen. (*C.japonica*), Real Companhia Horticolo-Agricola Portuense Catalogue, No.27, 1892, p.66: Formal double. Rose spotted white, with a lighter centre. Originated in Portugal.

Perpenta. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.181. Orthographic error for **Perpenti.**

Perpenti. (*C.japonica*), van Houtte Catalogue, 1842, 9:56: Good imbricated pink, flecked with white. Berlèse, 1849, *Annales de la Societe Central d'Horticulture de Paris*, vol.40, p.310: Perfect formal double, 9-10 cm across, rarely larger, soft pink with a few white stripes. Petals in 7-8 rows, average size, rounded, indented at apex, recurved at edges, reddish veins, closely imbricated. Verschaffelt, 1853, *Nouvelle Iconographie*, Book V, pl.I: Thus variety could be mistaken for a tea rose such as 'Comte de Paris'. The form of the petals of the periphery are outspread, sub-revolute; the others erect, compact with recurved edges in the intermediate rows, upright at the centre, of a vivid pink with crimson tints and a few white flecks. Originated in Italy. Synonyms 'Perpenti d'Italia', 'Perpenti d'Italie', 'Perpenti Peterson'. Orthographic error: 'Pertenta'.

Perpenti d'Italia. Franchetti, 1855, *Collezione di Camelie*, p.50. Synonym for **Perpenti.**
