A Feuilles Panaché. André, Edouard F., 1864, *Plantes de terre de bruyéres, descriptions...*, p.249. A new introduction from Japan by J.G. Veitch who listed it as 'Japonica Variegata'. Synonym for **Benten-tsubaki.**

A Fleur Simple. *(C.japonica)*, André Leroy, Angers Nursery Catalogue, 1823, p.12. No description but believed synonymous with **Rubra.**

A.I. Downing. Stefano Pagliai, Firenze Catalogue, 1867, p.67. Orthographic error for **A.J. Downing.**

A.J. Downing. *(C.japonica)*, Mead, 1861, *The Horticulturalist and Journal of Rural Art.* 16:464 . . . the flower is large and full, the colour is a rich glowing rose, exquisitely shaded off to a silvery rose at the edge of the petals. The foliage and habit is good. See illustration opposite p.439. A *C.japonica* raised in USA by N. Becar, Brooklyn. Abbreviation: 'Downing'.

A.J. Downing (Buist). Buist, 1868, probably the same camellia as **A.J. Downing.**

A.J. Pink. *(C.japonica)*, Wilmot, 1945, *Camellia Variety Classification Report*, p.7. No description. Hertrich,1955, vol.2, p.12, *Camellias in the Huntington Gardens:* Flower: complete double, formal type; Camellia Rose 622/self to/1 towards haft; to 8 cm broad by 4 cm high. Calyx: to 4 cm across, flattened against corolla, spherical segments, split margins, medium light to dark green, wide translucent margins. Petals: about 45 segments, near-spatulate, to 3.5 cm by 3 cm wide, progressively smaller towards the centre, deep single cleft, if any, fairly firm texture. Centre of flower: about 25 additional segments forming a centre rosette of proportionally smaller petals, stamens visible only when fully opened, crimped white filaments, light golden stamens, fusion with a few petaloids sometimes noted. Buds: globular. Leaves: broad elliptical, downward-curving tips, 10 cm long by 5 cm wide; dark semi-glossy, very slightly lighter on the underside, heavy leathery texture; serration, crenulate from base almost to the coarsely serrate tips. Apices: medium to long-pointed to tapering. Petioles: stout, 13 to 17 mm long; venation, pronounced on both surfaces. Habit: upright in tendency. Originated from an old plant growing in the Capitol grounds, Sacramento, California, USA prior to 1945 (Olrich, 1945. 'Camellias in Capitol Park').

A.L. Rowse. *(C.reticulata* × *C.japonica*), Treseder and Hymans, 1975, *Growing Camellias*, p.141: A hybrid between *C.reticulata f. simplex* and *C.japonica* **Jupiter (Pauls)** as 'Juno', producing a most unusual stamenless flower of a deep pink shade. Raised by Gillian Carlyon, Cornwall, England.

A. Markley Lee. *(C.japonica)*, Fruitland Nursery Catalogue, 1943-1944, p.20: Imbricated pink similar to 'Pink Perfection' (**Otome**). Raised in USA.

A.O. Ellison. *(C.japonica)*, Hazlewood Catalogue, 1945, p.4: A large single light red with a bunch of stamens. Very free flowering and early. An old local seedling of unknown origin raised in Australia.

A.P. Fatheree. SCCS, *Camellia Nomenclature*, 1981, p.170. Orthographic error for **A.P. Fatherree.**

A.P. Fatherree. *(C.reticulata* hybrid), *American Camellia Yearbook*, 1980, p.159, Reg. No.1651: A very large, deep red veined deeper red, semi-double, *C.reticulata* hybrid 'Cornelian' ('Damanao'), openpollinated seedling, mid-season to late, originated by Frank V. Pursel, Oakland, California, USA. The seven-year old seedling first bloomed in 1979. Average size flower, 15.5 cm wide by 7.5 cm deep with yellow anthers. Heavy textured petals, abundance of blooms, good lasting quality. Plant growth is upright, open, rapid in rate, with dark green, heavy textured, leathery, serrated edged leaves, 10.5 cm long by 7 cm wide. Orthographic error: 'A.P. Fatheree'.

A. Pètelot. *(C.oleifera x C.hiemalis).* J.C. Rosmann, March 1993, "Histoire d'une passion", *Jardins de France*, p.33, colour plate: Originated by J.C. Rosmann, Boucau, France. A seedling of *C.oleifera* **Jaune** x *C.hiemalis* **Shishigashira.** Deep pink, semi-double of 10-11 emarginate petals and centre stamens with a few petaloids.

A.W. Jessep. (*C.japonica)*, Merrillees, Shere Camellia List, 1950, St Kilda, Victoria, Australia. No description. Merrillees, Shere Catalogue, 1951, p.4: (Botanic Gardens, Melbourne). Incomplete long tiered (hose-in-hose), perfect white, very large, of good substance. Jessep, 1955 ANZCRS, *Camellia Annual*, p.6, Reg. No.8: Published *Camellia Trail*, 1950, p.30. Parent: **Gauntlettii,** ('Sodekakushi'). The seed was obtained from under a plant of 'Gauntlettii' in the garden of Dr Clendinnen, Kallista, Victoria, Australia, and planted in Melbourne Botanic Gardens. First flowered 1948. Won blue ribbon for best seedling at the Camellia Show of the RHS (Vic.) in Melbourne in 1952. Habit of growth, vigorous, slightly pendulous. Leaf large, broad, obovate,11 cm by 6 cm, bright green, and resembling the leaf of the female parent. Flower bud pointed, with long, dark green bracts. Semi-double, inclined to be hose-in-hose. Diameter 12.5 cm. Pure ivory white. Petals 15 to 20, large with firm texture. Blooms mid-season to late.

A.W. Mohr. *(C.japonica)*, NCCS, *Camellia Bulletin*, vol.17, No.2, Feb.1964, back page, black and white photo. Semi-double, light red veined deeper, large flower. Originated in USA.

Aaron's Ruby. *(C.japonica)*, *American Camellia Yearbook*, 1956, p.58, Reg. No.251: A 9-year- old chance seedling originated by Ruby Aaron (Mrs B.A.), Lake Charles, Louisiana, USA. The slender, slightly pendulous plant is said to be very hardy and vigorous in manner of growth. New growth is red in colour. Mature leaves are dark green, large and twisted. The semi-double flowers, similar to 'R.L. Wheeler', are from 12.5 to 15 cm in diameter and are a brilliant metallic red. The large, thick petals are inter-mixed with little flags and large trumpet-like cups around a mass of golden stamens. The flower has a spicy fragrance and remains on the plant for two weeks or more. Flowering season, mid-season to late. Colour photo in Sharp's *Camellias Illustrated*, 1957, p.165 and the *American Camellia Yearbook*, 1958 facing p.18. Sport: 'Aaron's Ruby Variegated'.

Aaron's Ruby Variegated. *(C.japonica)*, Griffin Jr. ea., Sept. 1959, *Camellian*, p.8, as 'Aaron's Ruby Var.': A virus variegated form of **Aaron's Ruby.** Metallic red and white. Originated in USA.

Abbot Turner. *(C.japonica)*, ACS, *Quarterly*, 6(2):9, 1951, Reg. No.118. Seedling of unknown parentage, age 9 years. First flowered 1949. Originated by Mrs D.A. Turner, Georgia, USA. Plant growth is open and rapid. Colour is about the shade of red of the 'Lindsay Neill' rose but has red and white stamens tipped with gold and a number of petaloids. The leaves are dark green...Flower buds are round and large, colour is brown tipped with red. The flower is incomplete double, with small petaloids resembling **Aunt Jetty,** colour is red, 10-12.5 cm in diameter. Flowers early to mid-season. Abbreviation: 'Abbot'.

Abbot's Dawn. Griffiths, ACS, *Quarterly*, 8(1):4, 1955. Orthographic variant of 'Dawn'(Abbot).

Abbotts Folly. (C.hybrid). ACRS, *Camellia News*, 1997, No.143, p.15, colour photo p.2, Reg. No.475. Originated by F.K. Abbott, Rossmoyne, West Australia. A cross between *C.x williamsii* **Margaret Waterhouse** as seed parent, and *C.hiemalis* **Kanjiro,** which first flowered 1989. A formal double flower of 53 petals, light lavender pink (RHS.CC.63D), diameter 7 cm x 3.5 cm deep. Flowers mid-season to late on a compact plant of medium growth. Leaves matt green elliptic, fine serrations, apex pointed, 8 cm long x 4 cm wide. Petals firmly overlaid, and the plant flowers prolifically.

Abbotsleigh. *(C.japonica)*, ACRS, *Camellia News*, No.87, Dec.1983, p.22, Reg. No.296: Originated by Cecil Blumenthal, St Ives, NSW, Australia. A chance seedling from *C.japonica* **Tiffany,** obtained in 1976, bloomed 1980. The 10 cm by 6 cm acuminate leaves are light green. The 13

cm wide by 7 cm deep, informal double, white flowers bloom mid-season. The plant has an open, spreading habit of growth.

Abbott's Special. *(C.sasanqua)*, Smart, RHS, *Rhododendron and CamelliaYearbook*, 1977, p.77: Seen in the United States was a very slow growing sasanqua with a weeping habit, which should prove useful for hanging baskets. This was being grown by Mr W. Goertz of San Marino, California and is called 'Abbott's Special'.

Ack-Scent. *(C.japonica* hybrid), *American Camellia Yearbook*, 1979, p.101, Reg. No.1532: A large, shell pink, peony form hybrid *(C.japonica* **Kramer's Supreme** x **Fragrant Pink Improved**), mid-season flowering; originated by Dr W.L. Ackerman, Washington, DC, USA. The 8-year-old seedling first bloomed in 1974. The flower has 18 petals, 16 petaloids, yellow-orange anthers and creamy white filaments. Average flower size is 10.5 cm wide by 5 cm deep. Deep spicy fragrance; floriferous, blooms hold well and shed from the plant at senescence. Commercially introduced 1977. Plant growth is upright, average and medium in rate with dark green leaves 8.5 x 4.8 cm.

Ack-Scent Pink. *(C.lutchuensis* hybrid), Ackerman, *American Camellia Yearbook*, 1981, p.115: (76-126). Flowers rose pink, 8.5 cm wide, rose form double, petals narrow, long, regularly twisted and notched, thick, good substance, tipped, edged or streaked white, veined in darker pink, strong sweet fragrance. Mid-season to late flowering. A seedling of **Fragrant Pink Improved.** Colour photo facing p.13, *American Camellia Yearbook*, 1981.

Ack-Scent Red. *(C.lutchuensis* hybrid), Ackerman, *American Camellia Yearbook*, 1981, p.115, colour photo facing p.5: (77-126). Flowers bright red, 7.5 cm across, semi-double to peony form, petals ruffled and notched at margin. Some rabbit ears, large centre cluster of yellow stamens, good substance, good spicy fragrance. Mid-season to late. Plant spreading, medium green foliage. A seedling of **Fragrant Pink Improved.** Originated in USA.

Ack-Scent Sno. *(C.lutchuensis* hybrid), Ackerman, *American Camellia Yearbook*, 1981, p.115, colour photo No.5 facing p.13: (75-460). Flowers white, 9.5 cm across, semi-double to anemone form, 12 petals, 28 petaloids mixed with stamens, sweet fragrance. Mid-season blooming. Upright plant with dark green foliage. A seedling of **Fragrant Pink Improved.** Orthographic error: 'Ack-Scent Snow'. Originated in USA.

Ack-Scent Snow. Cannon, 1985, ACS, *The Camellia Journal*, vol.40, No.4, p.13. Orthographic error for **Ack-Scent Sno.**

Ack-Scent Spice. *(C.japonica x C.lutchuensis*), Ackerman, *American Camellia Yearbook*, 1981, p.115, colour photo No.4 facing p.13: (76-165). Flowers bright red, 7.5 cm across, anemone form, lemony to spicy fragrance. ACS, Sept.1995, *The Camellia Journal*, vol.50, No.4, p.28, Reg. No. 2360: Medium size, deep rose red, peony to anemone form c.hybrid, (*C.japonica* **Fragrant Star** x *C.lutchuensis*). Mid-season to late flowering. Originated in USA By Dr. William L. Ackerman, Ashton, Maryland. ACS, 1995, *American Camellia Yearbook*, p.1: The 19 year old seedling first bloomed 1981, Average flower size is 9 cm wide x 5 cm deep with 18 petals, 22 petaloids, yellow anthers and cream filaments. Blooms have lemony to spicy fragrance and a long blooming season. Plant growth is spreading, dense and medium with dark green leaves 10 cm long x 4 cm wide. Orthographic error: 'Ack-Scent Spico'.

Ack-Scent Spico. Trewidden Estate Nursery, 1995, Catalogue, p.1. Orthographic error for **Ack-Scent Spice.**

Ack-Scent Star. *(C.lutchuensis* hybrid), Ackerman, 1981, *American Camellia Yearbook*, p.114, colour photo No.3 facing p.13: (76-66). Flowers, white, 8 cm across, anemone to rose form double, petals ruffled at the margin, creamy white centre, sweet fragrance. Mid-season to late flowering. Plant vigorous, upright, mid-green leaves. Originated in USA.

Ack-Scent White. (*C.lutchuensis* hybrid), Ackerman, 1981, *American Camellia Yearbook*, p.114: (75-461). Flowers white, 10 cm across, peony to anemone form, 20 petals, 24 petaloids, good substance, mild sweet fragrance. Early to mid-season flowering. Plant, upright with dark green foliage. Colour photo No.1 facing p.13, 1981 Yearbook. Originated in USA.

Açoreana. *(C.japonica)*, José Marques Loureiro, Catalogue No.1, 1865, p.30 and No.9, 1872-1873: Pure white formal double. Imbricated in a spiral form. From Loureiro Catalogue No.19, 1883-84, p.77, until Real Companhia Horticolo-Agricola Portuense, Catalogue No.36, 1902, p.47, described as perfectly imbricated. Orthographic error 'Açorneana'. Originated in Portugal.

ACS Jubilee. *(C.japonica)*, ACS, 1994, *The Camellia Journal*, vol.49, No.4, text inside front cover, colour photo front cover. This name was given to the winner of a competition for a flower to commemorate the 50th anniversary of the American Camellia Society. Originated at Nuccio's Nurseries, Altadena, California, USA. Large, light pink, formal double to rose form double. Blooms early to late. See also ACS, 1995, *The Camellia Journal*, vol.50, No.1, p.15, Reg. No. 2310, and ACS, 1995, *American Camellia Yearbook*, p.1: The 12 year old seedling first bloomed in 1988. Average flower size is 10 cm across x 5 cm deep with 65 petals, light yellow anthers and filaments. Plant growth is upright, dense and average with dark green leaves 10 cm long x 5.5 cm wide. Similar in form to 'Mathotiana' (**Julia Drayton**). Chinese synonym 'Huadu Jinian'.

Acteon (Fiaes). *(C.japonica)*, José Marques Loureiro, Catalogue No.1, 1865, p.31, and No.9, 1872-1873, p.40: Vivid crimson, formal double; perfectly imbricated. From Loureiro Catalogue No.19, 1883, p.77, onwards it is described as imbricated in a spiral form. Orthographic variant 'Acteon'. Originated in Portugal by Fiaes.

Acutopetala. Verschaffelt, 1844, Catalogue, No.50, p.17. Orthographic error for **Acutipetala.**

Ada Bird. *(C.japonica)*, *American Camellia Yearbook*, 1968, p.128, Reg.983: An 8-year old seedling that first bloomed 1962; originated by Ada Bird McDaniel, Eastman, Georgia, USA. Growth habit is dense and rapid. The dark green leaves average 10 cm long by 4.5 cm wide. The semi-double flower is 12.5 cm across, 7.5 cm deep and has 15 petals and 8 petaloids, white with yellow anthers and white filaments. Long lasting. Blooms mid-season.

Ada Emily. *(C.reticulata* hybrid), ACRS, 1984, *Camellia News*, No.91, p.22, Reg. No.314: Originated by Dr T.E. Pierson, Hurstville, NSW, Australia. A chance seedling from *C.reticulata* **Balderdash,** first flowered 1982. Flowers semi-double to informal double, 12.5 cm wide by 8 cm deep; scarlet flowers with scarlet filaments. Midseason to late flowering. The open, spreading plant has dark green, ovate, lightly reticulate 10.5 cm x 4.8 cm leaves.

Ada Hewitt. *(C.japonica)*, Magnolia Gardens and Nursery Catalogue, 1950-1951. No description. Fruitland Nursery Catalogue, 1950-1951: Light pink, medium sized, formal double. Early to late flowering. Originated by A.D. Hewitt, McComb, Mississippi, USA.

Ada Pieper. *(C.japonica)*, SCCS, 1954, *The Camellia. Its Culture and Nomenclature*, p.23: Coral rose. Large semi-double; vigorous, compact growth. Mid-season blooming. A seedling originated by Vern McCaskill, California, USA. Orthographic errors: 'Ada Piper', 'Adah Pieper', 'Adam Pieper'. Sport: **Ada Pieper Variegated.**

Ada Pieper Variegated. *(C.japonica)*, Cannon, 1965, ACS, *The Camellia Journal*, vol.20, No.1, p.16 as 'Ada Pieper Var.': A virus variegated form of **Ada Pieper.** Coral rose, blotched white. Originated in USA.

Ada Piper. Belle Fontaine Nursery Catalogue, 1961. Orthographic variant for **Ada Pieper.**

Ada Sebire. *(C.reticulata* hybrid), ACRS, *Camellia News*, No.66, Dec. 1977, p.27, Reg. No.201: Originated by E.R. Sebire, Wandin North, Victoria, Australia from chance seed of *C.reticulata* 'Tali Queen' (**Dali Cha**). Seed planted 1969 and first bloomed 1973. The vigorous, upright plant produces deep rose, 15 cm wide, incomplete double to round, informal double flowers in midseason. Leaves are mid-green, lanceolate, 11.5 cm long by 6.5 cm wide. Chinese synonym 'Aida'.

Ada Wilson. Abbot's Sunny Knoll Nursery Catalogue, 1950, p.3. Synonym for **Rosea Superba.**

Ada Wilson Variegated. Abbot's Sunny Knoll Nursery Catalogue, 1950, p.3 as 'Ada Wilson Vari.' Synonym for **Rosea Superba Variegated.**

Adachi. (Personal name), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.12, colour photo, description, p.198: A pink, semi-double with an irregular stamen cluster, with petaloids and slender petals; magnolia form. Flower, medium small. Mid-seasonblooming. Leaves, medium size, oval, prominent venation, concave. Plant habit, erect and vigorous. Originated in Kantô District, Japan.

Adah Pearl. *(C.japonica)*, SCCS, 1942, *Classification of Camellias*, p.1: Pink, semi-double, 12.5cm across. Early blooming. SCCS, 1950, *The Camellia. Its Culture and Nomenclature*, p.22. Originated by J.E. Youtz, Sr, Pasadena, California, USA.

Adelaide. *(C.japonica)*, Cachet, 1840-1841, Catalogue, p.3. No description. Rousseau, Angers Nursery Catalogue, 1842-1843, p.1: Cherry pink. Verschaffelt, *Nouvelle Iconographie*, 1848, Book X, pl.II and facing page as 'Adelaide':...obtained in Paris 5 or 6 years ago...dedicated to Mademoiselle Adelaide, sister of Louis-Philipe. The leaves of this variety, 9-10 cm long by 5-6 cm wide, are elongated ovals, regularly notched and pointed. The buds are large with greenish scales and produce regularly imbricated blooms, 9-10 cm across, full, anemone formed, of a deep red colour, with numerous petals arranged in 8-10 rows, ample, rounded, some slightly emarginate. The centre of the bloom is quite full and the petals overlap...Another variety of the same name was obtained a long time ago in Belgium, but is inferior to this one. Originated in France. Synonym: 'Adelaide Red'.

Adelaide. *(C.japonica)*, Gheldorf, Const., 1844, Catalogue of Plants and Price List, p.2: Large, imbricated flower of 6 rows of petals. Outer petals deep pink, those of the centre almost white. Originated in Belgium. This is apparently the form indicated by Verschaffelt as inferior.

Aizawa. (Family name of originator), *(C.japonica),* Tuyama, 1968, *Camellias of Japan*, pl.144, p.72, description, p.130: Branches decumbent, with dense foliage. Leaves, green, broadly elliptical to narrowly ovoid-elliptic, acute at apex, veinlets impressed; 5-8.1 cm long by 2.5-4.3 cm wide; petioles short, 4-5 mm long, glabrous. Flowers, reddish pink (Camellia Rose 622), single, petals horizontally spreading, but apex suddenly and shortly incurved. Hairy petals 1-2, normal petals 3-4. Androecium, small, 12-16 mm high with few stamens. Gynoecium, 14-20 mm high with 3-4 stylar arm, pale yellow. Late flowering. Originated by Mr Takeshi Aizawa, Kotani, Higashi-kubiki-gun, Niigata Prefecture, Japan.

Aizen-tsubaki. Watanabe, Takeshi, 1962, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.3, p.46. Not a varietal name but a particular name for the thicket camellias besides the Shrine of Aizen, (Ragaraja), god of marriage in Kishiwada, Mizuma Kannon, Ôsaka, Japan. There is a legend that, if a young man gives a leaf from these camellias to a girl, he will win her heart.

Aizhanni. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.423; Chinese synonym for the USA *C.japonica* **Dear Jenny.**

Aizome. (First Rendezvous). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.10 with colour photo; English translation p.5. Pale pink, tubular single, cylindrical stamens, thick petals, miniature, early to mid-season. Leaves narrowly elliptic, small size. Tending to bushy growth. Selected and named by Tadanori Yoshioka from wild camellias growing in Southern Aso, Kumamoto Prefecture.

Ajiko. (obscure), *(C.japonica),* Kaoru, Hagiya, JCS., 1982, *Tsubaki*, No.21, p.4: 1984, ACS, *The Camellia Journal*, vol.39, No.2, p.18. No description. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.20 with colour photo; English translation p.12. Medium size, red single, embracing petals, fragrant, stamens protruding, believed to be triploid. Flowers early to mid-season. Leaves broadly elliptic, large, thick. Upright, vigorous growth. Selected from wild japonicas. Named and released by Takeo Ogawa. From Izu-Ôshima Island.

Ajursii. *(C.japonica),* Fraser & Langton Catalogue, 1874-1875: Light medium double. Originated in USA. (Believed extinct.)

Aka-asukagawa. (The red Asuka River), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinchô*, vol.1: A medium size camellia, dark red with white spots or dark pink semi-double with central divide stamens. Thought to be synonym for **Asukagawa** in 1789, *Shoshiki Hanagatachô* and 1859, *Tsubaki Irohanayose Irotsuki.* (Believed extinct.) Originated in Japan.

Akabeni. (Vermilion Red), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* True red, double, medium size, cylindrical stamen cluster. Thought to be synonym for **Shakkô** in Itô, Ihei, 1695, *Kadan Chikinshô.* Originated in Japan. Different reading: 'Shakkô'. (Believed extinct.)

Aka-bokuhan. Nihon Shokubutsu Kaisha Catalogue, 1912-1913, p.27: Synonym for **Benikarako.**

Akachirimen. (Red Crêpe), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I; Yashiro, 1841, *Kokon Yôrankô*, vol.306: Large 8-fold flower, red, flat flower. (Believed extinct.) Originated in Japan.

Akadaikagura. Satomi, 1956, *Camellia Varieties of Japan*, p.4. Different reading for **Benidaikagura.**

Akadama. (Red Jewel), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû* p.6, Colour photo, description, p.196: Flower, deep crimson double with stamens split into fascicles. It is a long period in state of bud to bud-centered, to full bloom, 8-10 cm across. Leaves, medium to large,

elliptical, slightly keeled and reflexed, defined midrib. Plant habit, erect, of poor vigour. Blooms midseason. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.12 with colour photo; English translation p.7. The original tree survives since ancient times at a private garden in Nara City. Named by Ikuo Nishihata.

Akadiya. Chinese synonym for USA *C. reticulata* **Arcadia.**

Akadera. (Red Temple), *(C.japonica), Encyclopedia of Camellias in Colour*, vol.II, 1978, colour plate No.265, p.116, description, p.238; Seibundô Shinkôsha, 1979, *Senchinshû*, p.6, colour plate, description, p.196: Flower, single, open trumpet-shaped, vivid crimson, 5-7 petals, 6-8 cm across; stamens in central cylindrical cluster, filaments white. Mid-season flowering. Leaves, narrow-elliptic, small, thin texture, fine serrations. Plant habit, strong and erect. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.13 with colour photo; English translation p.7. Selected from wild japonicas, named by Tadaichiro Ogawa, released by T. Ogawa and Yoshiyuki Nakajima. From Kagawa Prefecture.

Aka-e. (Red Petiole), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, pl.139, p.72, description, p.129: Leaves broadly elliptic, rounded at base, very dark green and shiny on the upper face, 5.2-7.3 long by 2.3-2.6 wide, petioles 5-9 mm long, dark purplish red up to the basal part of the midrib, slightly hairy. Flowers, single, rose, (Rose opal 022), hairy petals 2-3, normal petals, 3, largest, 6.3 cm long by 4.7 cm. Androecium, 3.8-4 cm long, normal. Gynoecium, 3-3.2 cm long with 3 stylar arms, pale pink. Late flowering. Originated at Nagao Chôsei-en, Koai, Niizu-shi, Niigata Prefecture, Japan.

Aka-egao. (Red 'Egao'). *(C.x vernalis). "Sasanquas, The Winter Flowers"* ICS Congress, Kurume 2010, English translation p.66; Deep red double, large, early. From Kurume, a new cultivar.

Akafu. (Red Variegation), *(C.sasanqua)*, Itô, Ihei, 1695, *Kadan Chikinshô;* Yashiro, Kôken, 1841, *Kokon Yôrankô:* Soft pink blending to rose pink, small. Originated in Japan. Different reading 'Akô'. (Believed extinct.)

Aka-fûsha. Different reading for **Akakazaguruma.**

Akagi. (Mountain Name), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.237, colour photo and text: Medium size, campanulate single, with 5 overlapping, somewhat emarginate petals; red with irregular white blotching. Stamens cylindrical, anthers yellow. Leaves obovate to broad-obovate, dark green, apices acute, margins serrate, waved. Late flowering. Originated in Gumma Prefecture, Japan. A seedling of **Hakkan.** Named and released by Yoshizawa Camellia Nursery in Kawaguchi City in 1970.

Akagoma. (Red Chessman), *(C.japonica)*, Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.57, black and white photo: Large, light red semi-double; narrow pinched in stamen cluster. Leaves large, ovate, acute apex, shallow serrations. A seedling of **Ama-obune.** Different reading 'Akakoma'. Originated in Japan. Named and released by Totsurô Nakamura in 1980.

Akagoyô. (Red Five Petals), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.185: Deep red semi-double with cordate petals and white stamens. Originated in Japan. (Believed extinct.)

Akaguma. Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.110. Different reading for **Shaguma.**

Akahachiman. (Red Hachiman-shrine). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.13 with colour photo; English translation p.7. Red, lotus-form double, medium size with cylindrical stamen tube. Flowers mid-season to late. Leaves elliptic, medium size. Upright and vigorous. Selected from wild japonicas growing at Hachiman Shrine in Yamato-Kôriyama City, Nara Prefecture. Released by Ikuo Nishihata in 1970.

Aka-hagoromo. (Red 'Hagoromo'). *(C.japonica), Kurume Camellia,* 1997, English translation, p.6. Large, lotus form semi-double. Flowers mid-season. A chance seedling raised by M. Kunitake, Japan.

Akaharu-no-utena. (Scarlet Haru-no-utena). *(C.japonica),* Kurume Shibu colour poster, 1997, illustration: Medium size, scarlet semi-double sport of **Haru-no-utena,** with 15 petals. Late blooming. Originated in Kurume, Japan.

Akahassaku. (Red Hassaku), *(C.japonica),* Kamo, Zenji, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.8, p.119-120: Deep crimson, early flowering, single, large size. A seedling of **Hassaku,** originated by Kamo, Zenji, Toyama Prefecture, Japan. Synonym: 'Yabu-rôgetsu'.

Akahata. (Red Flag), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.324: Red semi-double, deep red veining, central stamen column. Originated in Japan. (Believed extinct.)

Aka-hatsu-arashi. (Red Hatsu-arashi). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.14 with colour photo; English translation p.7. Deep red single, tubular to trumpet shaped with cylindrical stamen tube, medium size. Flowers early to mid-season. Leaves narrowly elliptic, small. Upright growth. A mutation of **Shibori-hatsu´arashi** ('Variegated Hatsu-arashi'). Named and released by Tomita Kunitake in 1985. Synonym 'Chikushi-no-aki'. From Kurume, Fukuoka Prefecture.

Aka-ise. (Red of Ise), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.418: Deep red with 5 outer petals and a central cushion of red petaloids. Originated in Japan. (Believed extinct.) Thought to be a synonym for **Iseya, Ise-tsubaki** and **Ise.**

Aka-ishisan. (Produced in Aka-ishi), *(C.japonica),* Mizuno, Taka'aki, 1829, *Sômoku Kinyô Shû:* Listed in the section for yellow variegated leaves. Large, round leaves with yellow blotches. See Kyôto Engei Kurabu, 1966, *Tsubaki Tokushû*, No.7, p.166. Originated in Japan. (Believed extinct.)

Akai-tsubasa. (Red Wings), *(C.rusticana),* Watanabe, Kyôto Engei Kurabu, *Tsubaki Tokushû*, 1967, No.8, p.4, black and white photo; Seibundô Shinkôsha, 1979, *Senchinshû*, p.5, colour photo, description, p.196: Flower, red, finely veined deeper, 8-10 cm across, open peony, of up to 40 petals, outer ones cup shaped, some erect petals amongst scattered stamens; filaments yellow. Leaves, narrow elliptical, small, recurved, petioles, short and hairy. Growth habit, strong and dense. Mid-season flowering. Similar to cultivar **Fukuwara.** Originated in the Higashi-kanbara-gun, Niigata Prefecture, Japan.

Akajishi. (Red Lion). *(C.hiemalis). "Sasanquas, The Winter Flowers"* ICS Congress, Kurume 2010, English translation p.66; Crimson, double to peony form, small, early. From Shizuoka (Shimizu).

Aka-kagurajishi. (Red Lion Dance), *(C.japonica),* Himuro, 1982, *Murasuzume:* A red sport of **Kagurajishi.** Red peony form. Originated in Kanagawa Prefecture, Japan by Shôji Himuro.

Aka-kamo-honnami. (Red Kamo-honnami). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.11 with colour photo; English translation p.6. Deep red, bowl shaped single, tips of pistils stick out from buds, tubular stamens. Flowers early to mid-season. Leaves large, broadly elliptic. Upright growth. A mutation which appeared at the rootstock of a plant of **Kamo-honnami** at an old family home in Komatsu Town, Ehime Prefecture.

Akakarako. (Red Anemone), *(C.japonica),* Chûgai, 1936-1937, Catalogue as 'Aka-karako'. Tuyama, 1966, *Camellia Cultivars of Japan*, p.72: Red anemone form. Resembles 'Jikkô' as synonym for **Benikarako,** but centre petals are looser. Originated in the Kansai District, Japan. A different cultivar to 'Benikarako'. Invalidly equated with 'Arajishi' in USA. Corruptions of Japanese name: 'Aka-korako', 'Aka-koroko'.

Aka-kasenzan. (Red Mt Kasen), *(C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.3. No description. Originated in Tamayu Town, Shimane Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.6 with colour photo; English translation p.11. A chance seedling of **Kasenzan.** Small to medium, peach red, trumpet shaped single, tubular stamens. Flowers mid-season to late. Leaves narrowly elliptic, small. Spreading growth.

Aka-kazaguruma. (Red Windmill), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.196: Irregular double red, with large outer petals and small, ragged, inner petals, with divided stamens surrounded by petaloids. Synonym: 'Kazaguruma'. Originated in Japan. Different reading: 'Akafûsha'. (Believed extinct.)

Akakenkyô. Different reading for **Aka-miodoroki.**

Akakenna. (obscure), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagata Chô:* Deep red double with petals standing apart in a magnolia flower form. Originated in Japan. (Believed extinct.)

Akakeshi. (Red Poppy), *(C.japonica)*, Nakayama, Yûhei 1847, *Senkaôden:* Medium size, red anemone form, single. Early blooming. Resembles **Aka-koshimino.** See Kyôto Engei Kurabu, 1963, *Tsubaki Tokushû*, No.4, p.81. Originated in Japan. (Believed extinct.)

Aka-kikugasane. (Red double Chrysanthemum), *(C.japonica)*, Katayama, 1957, *Tsubaki Ochabana*, Different reading 'Aka-kiku-gasane'. Originated in Japan.

Akakikuzuki. Katayama, 1960, *Tsubaki Ochabana*, p.2. Tuyama, 1966, *Camellia Cultivars of Japan*, p.180. Synonym for **Kikuzuki.**

Akakikyô. (Red Chinese Bell Flower), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I;Yashiro,1841, *Kokon Yôrankô*, vol.306: Small size, double red flower; resembling a Chinese Bell Flower. Originated in Japan. (Believed extinct.)

Akakoda-no-yuki. (Snow of Akakoda). *(C.japonica)*, *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.12 with colour photo; English translation p.6. White, tubular to trumpet shaped single, cylindrical stamen column. Flowers mid-season to late. Leaves broadly elliptic, small to medium. Upright growth. Selected by Kazuo Nishio from a wild japonica community on a hill in the suburbs of Tottori City. Released by Iwao Kobashhi in 1991.

Akakogama. Different reading for **Akagoma.**

Akakorako. Fendig, *American Camellia Catalogue.* Corruption of the Japanese name **Akakarako.**

Akakoroko. McIlhenny, 1941, *700 Varieties of Camellias*, p.1. Corruption of the Japanese name **Akakarako.** Erroneously equated with 'Arajishi' by McIlhenny.

Aka-koshimino. (Red Skirt), *(C.japonica)*, Nihon Shokubutsu, 1912-1913, Catalogue: Flower, small to medium size, crimson anemone form with outer row of 6-7 petals surrounding a raised central cushion of petaloids; 7-9 cm across. Early flowering. Leaves, small to medium sized, narrowly elliptic with apex and base acute, reflexed, venation impressed, some petiole hair. Plant habit, erect, of average vigour. A sport of **Koshimino** according to Satomi. Orthographic error: 'Akakossimino'. Flower is similar to the cultivars, **Chûbu-hayazaki, Benikarakô.** Sports: **Shiro-koshimino, Nishiki-mino.** Originated in Kansai District, Japan. For colour plates and description see: Tuyama, 1966, *Camellia Cultivars of Japan*, pl.228, p.220; *Encyclopedia of Camellias in Colour* vol.I, 1972, pl.366, p.157 & 346; Seibundô Shinkôsha, 1979, *Senchinshû*, p.5 & 196; Adachi, 1960, *Camellia. Its Appreciation...*, p.106; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.357. Koshimino is an ancient straw rain shirt implying, in this case, raised central petaloids like the anemone form.

Aka-kossimino. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Akakoshimino.**

Akamakuri. (Red with Rolled Edges), *(C.japonica),* Hino, Sukekatsu, 1632, *Sukekatsukyôki.* No description. Originated in Japan. (believed extinct.)

Akamidori. (Vermilion Bird), *(C.japonica),* Himuro, 1982, *Murasuzume:* Medium sized scarlet semidouble, waterlily form. Originated in Kanagawa Prefecture, Japan by Shôji Himuro. A seedling of **Setsugekka.**

Aka-miodoroki. (Red Surprising Sight), *(C.japonica).* Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I: Double, the corolla is pink, the inside petals more finely variegated than the outside. Different readings: 'Akakenkyô', 'Aka-mi-odoroki'. Originated in Japan. (Believed extinct.)

Aka-miyakodori. (Red Seagull), *(C.japonica),* Alpen, 1977, ACRS, *Camellia News*, No.63, p.9: Deep red without any blue tint. Medium sized semi-double of lotus form. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.14 with colour photo; English translation p.8. Large, deep rose pink, lotus form. Flowers mid-season to late. Leaves narrowly elliptic, large, plicate at the centre rib. Uprightgrowth, multi-stock type, sparsely branching. A plant about 150 years old is growing in the suburb of Sofu'e Town. Named by Minoru Satô in 1976.

Akamokkô. (Red Mokko), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.557: Deep red, hose-in-hose semi-double, with irregular, twisted petals and a central column. Originated in Japan. (Believed extinct.)

Akananban. (Red, Nanban), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.214: Semidouble red with outer petals large and flat, inner petals cupped; central stamen column. Originated in Japan. (Believed extinct.) "Nanban" was the ancient name for South East Asia which implies "exotic".

Akanegumo. (Dark Red Cloud). *(C.japonica), Kurume Camellia,* 1997, English translation, p.6; Small, deep crimson, campanulate single. Flowers mid-season. Originated by T. Kunitake, Kurume, Japan.

Akane-seiôbo. (Dark-red **Seiôbo**) (*C.japonica*) from Chiba Pref., *Japan Camellia* No. 59, May 1999: A natural seedling of **Seiôbo.** Bright pink striped red, single, tubular, medium, blooms in autumn to mid-season. Leaves lanceolate, medium. Tree somewhat upright, vigorous. Bloomed firstly and named in 1993. Found by Atsushi Itoh.

Aka-no-genshu. (Original red wild variety), *(C.japonica),* Seibundô, Shinkôsha, 1973, *Garden Life*, No.5, p.15, illustration: A general term for the primitive, wild camellia. Red veined deeper. 5 petalled, irregular single, burst of short stamens in centre, as a typical form for the red, wild camellias of Japan.

Aka-owari. Shirai, Mitsutarô, 1926, *Tsubaki kai.* Synonym for **Hana-no-sakari** in Sakuden, 1630, *Hyakuchinshû.*

Aka-owari. (Red Nagoya Camellia), *(C.japonica), Chinka Zufu*, (before 1700) Watanabe, 1969, plate 661: Large red with long, slender, tiered petals. Thought to be synonymous with **Hana-no-sakari, Owaritairin.** Originated in Japan. (believed extinct.)

Aka-owari-no-chiri-tsubaki. Synonym for **Hana-no-sakari.**

Akaro. (Red Oar), Yashiro, Kôken, 1841, *Kokon Yôrankô*, vol.310. Different reading for **Akayagura.**

Akaroa Rouge. *New Zealand Camellia Bulletin*, vol.VI, No.7, 1970, p.32, Reg. No.46. Synonym for **Madame Picouline.**

Aka-rôgetsu. (Red December), *(C.japonica),* Tuyama, 1966, *Camellia Cultivars of Japan*, p.90; *Camellias of* Japan, plate 112, p.56, description p.120; *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.366: Leaves broadly elliptical to ovate-elliptic, finely acuminate. Petioles more or less hairy. Flowers, single, pink (Neyron Rose 623/1 or Spinel Red 0023/1-3). Petals very

broad and widely opened, strongly wavy at apex. Staminal tube a little widened at apex with delicate wavy filaments. Early to mid-season blooming. Its name alludes to its early flowering, pink blossoms. An old cultivar of the Kansai District, Japan. Note: This is not a sport of **Rôgetsu** in spite of its name.

Akasaka. (Place Name), *(C.japonica)*, Yashiro, Kôken, 1841, *Kokon Yôrankô*, vol.309: Medium size, red, anemone form with a centre of white streaked erect petaloids. Synonymous with **Akasaka-kasuri,** which is thought to be a sport of **Akasaka** from the *Chinka Zufu*. Originated in Japan. (Believed extinct.)

Akasaka. Hamamatsu, 1825, *Setsuyô Kikan*, vol.23, as a synonym for **Mino-tsubaki.**

Akasaka. (Place Name in Tokyo), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, plate 12: Medium size, red anemone form with a high centre of erect petaloids mixed with a few stamens. Originated in Japan. (Believed extinct.)

Akasaka-futae. Hino Sukaketsu, 1628, *Sukekatsukyôki*, as a synonym for **Mino-tsubaki.**

Akasaka-kasuri. (Akasaka variegated), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, plate 686: Red rose form double opening to exhibit centre petals splashed with white. Originated in Japan. (Believed extinct.)

Aka-sazanka. (Red Sasanqua), *(C.sasanqua)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, plate 514: A single of 5-6 petals of deep rose fading to pale rose towards the centre of the petals. Originated in Japan.

Akaseiôbo. (Red Seiôbo), *(C.japonica)*, Inazawa Nurseries Co. Ltd Catalogue, 1986-1987, p.11, A-545: Red, vase-shaped single, small to medium size with overlapping petals. Early flowering. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.211, colour photo and description: Petals, 6-7 rounded, overlapping, stamens cylindrical, filaments pale cream, joined for lower third, anthers golden. Leaves glossy mid-green, elliptic, apices acuminate, margins serrate. A seedling of **Seiôbo** that originated in Toyama Prefecture, Japan. Named and released by Zenji Kamo.

Akashi. Wilmot, 1946, "Camellia Growing", *University of Florida Bulletin*, 130:1-19 as ‘Akasi’. An abbreviation for **Akashigata.**

Akashi. (Place name), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, plate 558: A medium sized, open, irregular white peony form with some intermixed stamens with white filaments. Originated in Japan. (Believed extinct.)

Akashi. (Place name), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, plate 587: A medium sized semi-double with three rows of irregular petals and a centre column of stamens with white filaments. White colour. Originated in Japan. (Believed extinct.)

Akashi Bay. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.68. Synonym for **Akashigata.**

Akashigata. (Akashi Bay), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* Itô, Ko’emon, 1879, *Chinka Shû:* Deep pink, large semi-double, 12-14 cm across, with 13 wide petals. Stamens small cylindrical cluster, filaments yellow, reddish at root. Leaves, large, elliptical; apex, caudate; base, obtuse,; surface smooth, reflexed and slightly keeled. Vigorous, bushy growth. Early to mid-season blooming. Synonyms: ‘Lady Clare’, ‘Pink Czar’, ‘Empress’, ‘Nellie Bly’, and erroneously, ‘Akasi-gata’. Pseudonym:- ‘Grandiflora Rosea’. For other forms of this cultivar see **Ôniji, Destiny, Linda Laughlin,** and **Mrs Leroy Epps.** It was imported into Europe by van Houtte who sold it to the Caledonia Nursery where it was named ‘Lady Clare’. It received the National Hall of Fame Award, 1978 as ‘Lady Clare’. The RHS Award of Merit in 1927. For colour photos and descriptions see: *Camellias - A Wisley Handbook*, 1985, plates p.53, 57. Fairweather, 1979, *Rhododendrons and Azaleas in your*

Garden, p.120. Hume, 1946, *Camellias in America*, p.177. Tuyama, 1966 *Camellia Cultivars of Japan*, pl.4, p.12; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.173, p.316. Seibundô Shinkôsha, 1979, *Senchinshû*, p.5 & 196. Originated in Kanto District, Japan.

Akashigata. (Akashi Bay), *(C.sasanqua)*, Minagawa, Iza'emon, 1885, *Nisshô'en Chabaifu:* Large size, white with pale red graduation. Chûgai Nursery Co., 1935-1936 Catalogue, p.26 as 'Akashigata': White variegation, large flower. Yashiroda, 1950, *American Camellia Yearbook*, p.22: Large size, white with shades and stripes of pink, 12-13 petals, broad, thick and of good texture, creping towards the apex and inner petals somewhat curled or twisted; leaves fine, glossy green, slightly cup-shaped. Habit upright, vigorous, fast grower; resembles **Narumigata,** but differs in having curling petals. Early flowering. See: Colour photo and description *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.546 & p.389. Originated in the Kantô District, Japan.

Akashigata Variegata. Camellia Grove Nursery, 1948, Catalogue, p.8. Synonym for **Oniji.**

Akashi-no-umi. (Sea of Akashi), *(C.sasanqua)*, Chûgai Nursery Co., 1938-1939, Catalogue, p.20: White with light red shading variegation. Originated in Japan.

Akashiren. (Akashi Lotus), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagata Chô:* Flower, 10-12 cm across, deep rose pink, double, magnolia flower form. Originated in Japan. Nippon Tsubaki - Sasanqua Meikan, 1998, p.12 with colour photo; English translation p.6. An old tree of 200 estimated years growing at Busshiji Temple in Komatsu Town was designated as a Town's protected plant. There is an opinion that this is the same variety as 'Ganjitsu-tsubaki' (**Ganjitsu**).

Akashiren. Seibundô Shinkôsha, 1979, *Senchinshû*, pp.5, 196. Synonym for **Ganjitsu.**

Akasi. Wilmot, 1946, *American Camellia Yearbook*, p.27. Corruption of Japanese name 'Akashi'; abbreviation for **Akashigata.**

Akasi Gata. Wilmot, 1946 *American Camellia Yearbook*, p.27. Corruption of Japanese name **Akashigata.**

Akasigata. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.3. Corruption of the Japanese name **Akashigata.**

Aka-sodekakushi. (Red 'Sodekakushi'), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, colour plate, p.6, description, p.196: Flower, bright red, rose form double, large size, 11-13 cm across with small fascicles of stamens, sometimes with a few small centre petals. Leaves, deep green, narrowly elliptical, medium sized. Apex, acute, clear veined and rough serrations. Flowers mid-season to late. Growth habit, strong, erect and open. A seedling from **Sodekakushi** originated in Kansai District, Japan. Similar to 'Tôtenkô' from Chûbu.

Aka Suki No Kaori. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.3. Corruption of the Japanese name **Akatsuki-no-kaori.**

Akasumi. Nippon Engei Kaisha Ltd. Catalogue, 1904 as 'Aka-sumi'. Abbreviation for **Aka-suminokura.**

Aka Sumikara. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.3. Corruption of Japanese name **Aka-suminokura.**

Akasumikura. Chugai Nursery Catalogue, 1934-1935. Different reading for **Aka-suminokura.**

Akasumiguro. McIlhenny, 1941, *700 Varieties of Camellias*, p.1. Different reading for **Aka-suminokura.**

Akasumijura. Fendig, 1953, *American Camellia Catalogue*, as 'Aka-sumijura'. Corruption of Japanese name **Aka-suminokura.**

Akasu Makura. Vanderbilt, 1940, *Camellia Research.* Corruption of Japanese name **Aka-suminokura.**

Aka-suminokura. (Red 'Suminokura'), *(C.japonica),* Nihon Shokubutsu Kaisha Ltd., Catalogue, 1912-1913, p.27, as 'Aka-sumi-no-kura': Flower, red formal double, 10-11 cm across, opening to show some stamens. Similar to **Coquettii.** Leaves, broad elliptical, medium sized with acute apex and rounded base, recurved; surface sparsely hairy. Habit, slow growing, erect. Flowers mid-season. Abbreviation: 'Akasumi'. Different readings: 'Akasumikuro', 'Akasumiguro' 'Akasumikura'. Corruption of name: 'Akasumijura', 'Akasu Makura', 'Aka Suki No Kura', 'Aka Suimikara' 'Akasumikara'. An old cultivar from the Kansai District, Japan. For colour photos and descriptions see: *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.366 and vol.II, 1978, pl.455, p.179. Seibundô Shinkôsha, 1979, *Senchinshû,* p.5 & 196. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.393.

Akatakukai. McIlhenny, 1941, *700 Varieties of Camellia*, p.1. Corruption of the Japanese name **Aka-wabisuke.**

Akatomoe. (Swirl Pattern), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* Itô, Toku'emon, 1788, *Tsubaki, Hanagata Tsuki Obo'echô:* Medium sized, rose red, spiral formed double. Originated in Japan. (Believed extinct.)

Akatsuki. (Dawn), *(C.japonica),* Wada Nursery Catalogue, 1938: Flower, 5-6 cm across, pale pink single, petals with wavy edges, campanulate with central cylinder of stamens. Flowers mid-season. Leaves, narrowly elliptic, small; apex caudate; base obtuse; waved and twisted. Growth habit, erect and vigorous. Seibundô Shinkôsha, 1979, *Senchinshû,* pp.68, 196. Used in Japan for Ikebana and Chabana. Originated in Kagawa Prefecture, Japan. Named and released by Saneichi Koyama.

Akatsuki-no-kaori. (Dawn Fragrance), (Higo), Hiratsuka, Taizô 1964, *Higo Camellia*, colour photo No.25, p.12, 16: Flower, pale, soft pink, becoming white with age, semi-double Higo with 13-14 petals, creped and waved, 8-10 cm across, stamens, spreading apricot form, joined at base, yellowish white filaments. Faintly fragrant. Mid-season flowering. Leaves, narrow elliptic, medium size, deep green. Growth habit vigorous and erect. Suitable for a seed parent. A seedling of **Osaraku.** Corruption of Japanese name: 'Aktsuki-no-kaori'. See: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.229, p.324; Yokoyama et al., 1975, *Gendai Tsubaki Meikan,* p.58; Seibundô Shinkôsha, 1979, *Senchinshû,* p.6, 196; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.301. Originated and named by Kiichiro Shimotake, Kumamoto Prefecture, Japan in 1962.

Akatsuki-no-yume. (Waking Dreams), *(C.rusticana),* Hillier Arboretum, 1987, Hampshire County Council Catalogue, p.1. No description. Originated in Japan.

Akatsu-nishiki. (Akatsu Brocade). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.13 with colour photo; English translation p.7. Crimson stripes and splashed patterns on pale pink ground. Medium size, tubular single, cupped petals, flowers early to late. Leaves elliptic, medium size. Vigorous, upright and bushy. The original tree survives at the garden of Shuntô Katô, in Seto Town, Aichi Prefecture.

Akatsuru-no-minato. (Harbour of Akatsuru). *(C.japonica), Kurume Camellia,* 1997, English translation, p.18; Small, campanulate single, red. Flowers mid-season.

Aka-wabisuke. (Red Wabisuke), (Wabisuke), Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Deep red, cup-shaped, early blooming. Originated in Japan. Possible synonym for **Beni-wabisuke.** See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.80.

Aka-wabisuke. (Red Wabisuke), *(C.japonica),* Chûgai Nursery Co., Catalogue, 1935-1936, p.26: White blotches on red, single cup-shaped flower. Tuyama, 1966, *Camellia Cultivars of Japan*,

pl.226, p.398; Seibundô Shinkôsha, 1979, *Senchinshû*, p.7, colour photo, p.197 description: Flowers, vivid red, campanulate single with 7 petals, 6-7 cm across; central column of stamens with white filaments; colour dull and purplish during cold weather. Early to mid-season flowering. Leaves, medium sized, narrow elliptic; apex and base, acute; deep green, edges slightly rolled, shallowly serrate. Average upright growth. Although called a 'Wabisuke' it is member of the thicket (wild) camellia group and originated in Kansai District, Japan. Synonym: 'Koi-akabana-no-wabisuke'.

Aka-wabisuke Winter Flowering. Chûgai Nursey Co., Catalogue, 1936-1937. Synonym for **Kanzaki-aka-wabisuke.**

Akayae. (Red Double), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagata Chô:* Medium size, rose coloured semidouble. Opens flat. Originated in Japan. (Believed extinct.) See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.81.

Akayae-chirikasuri. (Double Red - Scattered Patterns), *(C.japonica): Chinka Zufu*, (before 1700), Watanabe, 1969, plate 207: Red formal double. Petals fall one by one. Originated in Japan. (Believed extinct.)

Akayae-eigen. (Red Double form of 'Eigen'), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.463 as 'Akayaeeigen': Medium size, deep red, cupped semi-double. Originated in Japan. (Believed extinct.)

Akayae-kasuri. (Double red with Splashed Pattern), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe,1969, plates No.199 and 603 as 'Aka-yae-kasuri': Medium size, rose red semi-double opening to show a design of splashes of white on the inner petals. Originated in Japan. (Believed extinct.)

Akayae-kingyoba-tsubaki. (Red Double Goldfishtail Leaved Camellia), *(C.japonica)*, Seibundô Shinkôsha, 1979. *Senchinshû*, p.7, colour photo, p.196, description: Flower, deep rose pink, semi-double to open peony form, 8-10 cm across, stamens in central column to divided fascicles. Mid-season flowering. Leaves, apex divided into 3-5 like a goldfish tail. Growth habit open, upright and average. Originated in Kantô District, Japan.

Akayagura. (Red Tower), *(C.japonica)*, Yashiro, Kôken, 1841, *Kokon Yôrankô*, vol.310. No description. Originated in Japan. (Believed extinct.) Different reading 'Akaro'. An ancient cultivar in Japan use the word 'Yagura', meaning 'tower' for the form with erect centre petals.

Akayagura. (Red Tower), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, plate 222 as 'Akayagura': Large red, semi-double with compact central stamen cluster. Originated in Japan. (Believed extinct.)

Akayama-shiratama. (Akayama White Jewel), *(C.japonica)*, Tuyama, 1966, *Camellia Cultivars of Japan*, p.88: Small, white single; early blooming. Suitable for Chabana. Akayama is a place name in Angyô, a cut flower growing district in Saitama Prefecture, Japan.

Akayamato-sangai. (Red Three Layered Camellia from the Nara Province), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium size, deep red, hose-in-hose double. Centre petals erect in three tiers. Synonym: 'Yamato-sangai'. Originated in Japan. (believed extinct.)

Aka-yobukodori. (Red 'Yobukodori'), *(C.japonica)*, Satomi, 1956, *Camellia Varieties in Japan*, as 'Akayobuko-dori'. *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.366: Flower, deep, rose pink single to semi-double, 9-12 keeled petals, 11-13 cm across, tight central stamen column. Blooms mid-season to late. Leaves, narrow elliptic, medium size; apex acute; base obtuse; slightly keeled and reflexed. Average, upright growth habit. A sport of **Yobukodori** Orthographic errors: 'Aka Yobuku Dori', 'Akayobuokodori'. Different reading: 'Aka Yobuko Dori'. No connection with 'Yobukidori'. For colour photos and descriptions see *Encyclopedia of Camellias in Colour*, vol.II, 1978, plate 374; Seibundô Shinkôsha, 1979, *Senchinshû*, p.7,

197 and p.312, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Kansai District, Japan. Chinese synonym 'Chi Huziniao'.

Aka Yobuku Dori. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.3. Corruption of the Japanese name **Aka-yobukodori.**

Aka-yobuokodori. Watanabe, 1970 Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.111. Orthographic error for **Aka-yobukodori.**

Akebono. (Dawn), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, plate 40: A medium sized, open peony, white with irregular petals and intermixed stamens. Originated in Japan. (Believed extinct.)

Akebono. (Dawn), *(C.japonica), Chinka Zutu*, (before 1700), Watanabe, 1969, plate 579: Medium size, white semi-double with two rows of petals and a central column of stamens with white filaments. Originated in Japan. (Believed extinct.)

Akebono. (Dawn), *(C.japonica)*, Minagawa, 1931, *Chinkashû;* Wada, 1941, *Japanese Garden Treasures*, p.28: Single, widely opened, large flowers, very pale, flesh pink, slightly paler at edge and base, a leafy, compact grower; early blooming. Tuyama 1966, *Camellia Cultivars of Japan*, pl.98, p.166; Tuyama, 1968, *Camellias of Japan*, pl.84, p.111: Light pink, medium size, single, 6-8 petals, cupped form, large cylindrical stamen cluster, a little spreading, filaments light yellow. Early flowering. Introduced to USA where its translated name 'Dawn' was invalidly used as a synonym, causing confusion with the *C.x vernalis* **Ginryu,** which was also known as 'Dawn'. See 'Dawn' for details. In the USA the name 'Akebono' was given to another cultivar, originally listed as 'Akebono Pink'. The true **Akebono** was then given the synonym 'Shin-akebono' to distinguish it from the invalidly named 'Akebono'. For colour plates of the valid **Akebono** see: *Encyclopedea of Camellias in Colour*, vol.I, 1972, pl.43, p.52. Seibundô Shinkôsha, 1979, *Senchinshû*, p.9. Originated in Kyôto Prefecture, Japan. It is the seed parent of **Showa-no-akebono.** Chinese synonym: 'Fuxiaohong'. Resembles **Tarô'an** but flowers are larger and more widely open.

Akebono. (Dawn), *(C.sasanqua)*, Itô Ihei, 1695, *Kadan Chikinshô* in the section on sasanquas: Medium size, pale pink, red at the base. Originated in Japan. (Believed extinct.)

Akebono. (Dawn), *(C.sasanqua)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* White with pink edges, medium size, some stripes. Originated in Japan. (Believed extinct.) See: Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû*, No.5, p.82.

Akebono. (Dawn), *(C.sasanqua)*, ICS., Apr.1990. *Japanese Camellia Cultivar List*, p.32: Medium size, white ground with light red reverse, semi-double. Originated in Kumamoto Prefecture, Japan. A Higo sasanqua selected and named by Kiyofusa Saitô.

Akebono-azuma. (Eastern Dawn), *(C.japonica)*, Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.62, black and white photo. Soft pink single, medium size, with a cylindrical stamen cluster. Early to midseason. Originated in Japan.

Akebono-beni. Synonym for **Akebono Pink.**

Akebono Double. Synonym for the *C.sasanqua* **Akebono (Higo).**

Akebono-fuji. Hakoda,JCS., 1987, *Tsubaki*, No.26, p.47. Synonym for **Asakura.**

Akebono-Higo. (Higo), (Dawn Higo), Uekiya Bunsuke, 1830, *Uekiya Bunsuki Hikki*, as 'Akebono': A white, single of Higo form. Originated in Japan. (Believed extinct.)

Akebono (Higo). *(C.sasanqua)*, Shimada, Yaichi, 1957, *Kumamoto no Sazanka ni tsuite*, *Dantairin:* White ground, pale pink graduation, semi-double, small size. See JCS., ed., *Encyclopedia of Camellias in Colour*, pl.569, p.394. Synonyms: 'Higo-akebono', Satomi's

'Akebono' and 'Akebono Double'. Hakoda, JCS., 1987, *Tsubaki*, No.26, p.43. Synonym for **Akebono,** the sasanqua from Kumamoto.

Akebono-hitoe. (Dawn Single), *(C.sasanqua)*, Satomi.1960, *Engei Techô*, No.10: Pale pink, single, large size. Originated in Japan. Synonym: 'Akebono'.

Akebono (Kurume). (Kurume Dawn), *(C.hiemalis)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.47: Rose-pink, medium size, double with many rows of petals. Originated in Kurume, Fukuoka Prefecture, Japan.

Akebono Number 2. Lindo Nursery Catalogue, 1947, p.7 as 'Akebono No.2'. Synonym for **Akebono Pink.**

Akebono Pink. *(C.japonica)*, McIlhenny Catalogue, 1937, p.7; Garden Club of America, Bulletin, 6th series,1:66, 1937: A semi-double, salmon pink flower, of exquisite formation with petals standing apart. Mid-season flowering. Deep green, glossy foliage, bushy growth. Introduced from Japan to USA by T. Domoto, California, in 1917 according to Hume (1955). Synonyms: 'Dawn', 'Bettie', 'Betty', 'Valentine', 'Bonnie Jean', 'Sankô-nishiki'. Pseudonyms: 'Chiffon', 'Akebono'. Colour photo *American Camellia Yearbook*, 1953, facing p.114 and on p.7, *Camellias* by G.G. Gerbing,1945. A sport of **Akebono-shibori.**

Akebono Pink (Sasanqua). *(C.sasanqua)*, SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* Clear pink. Medium sized single. Listed as 'Akebono Pink'. Originated in Japan. Synonym: 'Akebono-beni'. See Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.7.

Akebono-nishiki. (Dawn Brocade), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.9, colour photo, p.197, description: Small, campanulate single. Soft pink ground with deep pink streaks, tubular stamen cluster. Mid-season blooming. Originated in Japan.

Akebono (Single). Satomi, 1958, *Nomenclature List of Sasanqua in Japan*, p.7 as 'Akebono'(Sgl.). Synonym for **Akebono-hitoe.**

Akebono-shibori. (Dawn Dappled), *(C.japonica)*, Tokyo Kono-en, 1928: White lined pink, medium size, single. Synonyms: 'Dawn Variegated', 'Queen of Hearts' 'Akebono Variegated'. Sport: **Akebono Pink.** Originated in Japan.

Akebono-shibori. (Dawn Dappled), *(C.sasanqua)*, Minagawa, 1930, *Jissai Engei*, No.9; Chûgai Nursery Catalogue, 1937-1938: Creamy white, semi-double, odorous, large cup-shaped flower with petal edges and backs, pink. Spreading growth and elliptic, light green leaves. Originated in Saitama Prefecture, Japan.

Akebono Variegated. McIlhenny Catalogue, 1937, p.3 as 'Akebono Var.' Synonym for **Akebono-shibori.**

Akebono-yuri. (Lily at Dawn). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.17 with colour photo; English translation p.10. Pale pink, shading off to white at the centre. A long tubular single, medium size. Flowers mid-season. Leaves elliptic, medium size, flat. Upright, vigorous growth. A chance seedling of **Yuri-shibori**, named and released by Kan Utsugi, Chiba Prefecture, in 1987.

Akegumo. (Cloud in Morning Glow), *(C.japonica)*, Hiroshi Matsuda, Okinawa; JCS *Tsubaki*, 1994, No.33, p.35, illustration p.34: Bright pink, small, cup-shaped single with thick petals. Blooms January. Leaves elliptical, medium size. Habit, spreading and sturdy. Said to be a chance seedling of **Goeku-shirotama.**

Ake-no-hoshi. (Stars at Dawn), *(C.sasanqua)*, Kuriya, Tsuyoshi, 1970, *Engei Tsushin*, No.20; ICS, Apr.1990, *Japanese Camellia Cultivar List*, p.32: Large size, white with pale pink graduations. single; early blooming. See Hakoda, JCS., 1987, *Tsubaki*, No.26, p.43. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.290 with colour photo; English translation p.203. Leaves narrowly elliptic, medium size. Upright, vigorous growth, dense branches. The original tree,

aged about 130 years, is growing in Kumamoto City. Recognised by the Higo Sasanqua Society in 1968.

Akeyukusora. (Dawning), *(C.sasanqua),* Shimada, Yaichi, 1957, *Kumamoto no Sazanka ni Tsuite*, *Dantairin*, p.7 as 'Akeyuku-sora': The flower blooms in November (early) and is about 13 cm in diameter. It has 7 petals with white shading to pink at petal edge which is curled. Originated in Kumamoto Prefecture, Japan. Selected and named by Sadatsugu Yamasaki in 1902.

Akezuki. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.2: Synonym for **Meigetsu.**

Aki. (Personal name). *(C.hybrid). Latest Illustrated Book of Japanese Camellias, (Camellias of Japan), 2010,* p.293 with colour photo; Pinkish yellow, bud centred to lotus formed double, large. Flowers mid-season to late. Leaves elliptic, medium size. Vigorous, upright growth. A cross of **Hagoromo** x *C.flava*. Originated by Soshin Hirai, Saitama Pref., Japan around 2005.

Akibare. (Fine Autumn Day). (*C.reticulata* hybrid). *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.17 with colour photo; English translation p.10. A medium size, deep pink, sake-cup-shaped single with cylindrical stamens. Fragrant. Flowers early. Leaves elliptic, medium size. Spreading fat branches. A cross between *C.hiemalis* x **Show Girl.** Named and released by Kaoru Hagiya, Niigata Prefecture, in 1979.

Aki-botan. (Autumn Peony). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.122 with colour photo; Purplish pink, peony form ovaries densely pilose, large. Flowers early to mid-season. Leaves elliptic, somewhat small. Upright growth. A seedling of unknown parentage, selected and grown by Soshin Hirai, Saitama Pref., Japan in 2006.

Aki-gashika. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for: **Akigeshiki.**

Akigeshiki. (Uncertain), *(C.sasanqua),* McIlhenny, 1937, *600 Varieties of Camellias*, p.14 as 'Akigeshiki': Single. Rose red tipped, shading to white at the centre. Imported from Japan by McIlhenny, Avery Island, Louisiana, USA in 1934.

Akigusa. Different reading for **Akikusa.**

Akihime. (Autumn Princess), *(C.sasanqua x C.fraterna),* ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.27: Small corolla, white, trumpet to cup-shaped single. Flowers mid-season. A seedling from *C.sasanqua* **Shôwa-nishiki** x *C.fraterna.* Originated in Niigata Prefecture, Japan. Originated and released by Kaoru Hagiya in 1984.

Aki-ichiban. (First Flowering of Autumn), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.7, colour photo, description, p.197: Flower, 5-6 petals, single, 8-10 cm in diameter, trumpet shaped with a central cylindrical stamen cluster; colour variegated with rare, broad, red streaks on a white background; occasionally red with white borders or self red or self white, all mixed on the one plant. Very early flowering. Leaves: elliptical, medium sized, apex acute, base cuneate, venation depressed. Strong, upright growth habit. Resembles **Aki-no-yama.** The name 'Aki-ichiban' means that the flowering season is very early and ends before the time of hoar frost. See colour photo, p.256, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Imported from Niigata Prefecture to Kantô. Named and released by Yoshizawa Camellia Nursery around 1965.

Akikaze. (Autumn Breeze). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.14 with colour photo; ; English translation p.8. Deep red single, cupped petals, cylinindrical stamen tube, small size. Flowers early to mid-season. Leaves elliptic, medium size, slightly plicate along the centre rib. Spreading to upright growth. A chance seedling of **Hatsu-arashi,** named and released by Shinichi Noguchi in 1994. From Tokyo.

Aki-komachi. (Beautiful Hiroshima), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.114, colour photo and text: Medium size, pale peach pink, cup-shaped single, of 5-6 wide, overlapping petals with slightly irregular margins. A large cylinder of stamens, creamy filaments, joined for the lower third, and yellow anthers. Blooms very early to mid-season. Dark green, lanceolate leaves, acuminate apex, obscure serration. Originated in Hiroshima Prefecture, Japan. A seedling of **Hatsuarashi-shiratama.** *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.15 with colour photo; English translation p.8. Name translated as 'Quiet Beauty'. A chance seedling of **Shiratama**. Originated and released by Nobuo Sasai in 1971.

Akimba. *(C.japonica),* ACS, 1963, *The Camellia Journal,* vol.18, No.1, p.7.: Longwood Garden List. No description. Originated in USA

Akimiko. (God's Child in Autumn), *(C.japonica),* Himuro, 1982, *Murasurume:* Pale pink, medium size with small leaves. Originated in Japan. A seedling of **Aki-no-yama.**

Aki-no-asahi. (Autumn Morning), *(C.japonica),* Satomi, 1956, *Camellia Varieties in Japan:* Light rose pink, slightly streaked pink. Medium sized single. Vigorous, dense and upright growth. Originated in Japan.

Aki-no-hana. (Autumn Flower). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.16 with colour photo; English translation p.9. Pale pink, tubular single with cylindrical stamens, small size, early flowering. Leaves narrowly elliptic, small, recurved. Spreading, vigorous growth. A chance seedling originated by Shunsuke Hisatomi, Kurume, Fukuoka Prefecture, in 1994.

Aki-no-homare. (Autumn Glory), (*C.rusticana*), Katayama, Sadayuki, 1957, *Tusbaki Ochabana;* Yokoyama, 1975, *Gendai Tsubaki Meikan*, black and white photo, p.61; *Encyclopedia of Camellias in Colour*, vol.II, 1978, colour photo No.435, p.172; Seibundô Shinkôsha, 1979, *Senchinshû,* p.9, colour photo, description, p.197: Flower: white background with various sized vertical stripings of pale red, mutates to self red or red with white spots; outer petal rows imbricated; the centre consists of scattered fascicles of stamens mixed with small, erect petals. The flower is 11-13 cm across and opens early to mid-season. Leaves: Light green, medium sized, elliptical with acute apex and base, sharply serrate, leaf stalk hairy. Strong, erect, densely furnished growth. The cultivar, **Gondô-shibori,** also known as 'Aki-no-homare' in Kansai is a different cultivar. Originated in Chûbu, Japan. Synonym: 'Aki-no-homare (Chûbu)'. A chance seedling originated and released by Kôji Yamada in 1969. Chinese synonym 'Qiuzhiyu'.

Aki-no-homare(Chûbu). Synonym for **Aki-no-homare.**

Aki-no-kaze. (Autumn Wind). *(C.hybrid), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.15 with colour photo; English translation p.9. Wide red stripes on white ground, trumpet shaped single with cylindrical stamen tube. Miniature size, flowers early and profusely. Leaves narrowly elliptic, small. Spreading, cespitose, weeping growth. A cross between **Aki-no-yama** and *C.cuspidata*. Named and released by Kaoru Hagiya, Niigata Prefecture, in 1989.

Aki-no-niji. (Autumn Rainbow). (*C.reticulata* hybrid). *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.16 with colour photo; English translation p.9. Pink shading at edges, on white ground. A large size semi-double with cupped petals and scattered stamens, fragrant. Early flowering. Leaves medium size, elliptic. Upright and dense growing. A cross of *C.sasanqua* **Shôwa-nishiki** x *C.reticulata* hybrid **Show Girl,** named and released by Kaoru Hagiya, Niigata Prefecture, in 1979.

Aki-no-nishiki. (Autumn Brocade). (*C.reticulata* hybrid) *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.16 with colour photo; English translation p.9. Obscure blotches and stripes on pink ground. A medium size bud-centred double with split stamens. Flowers early. Leaves elliptic, small size. Spreading growth. A cross between **Dot Spengler** x **Umegaka.** Named and released by Kaoru Hagiya, Niigata Prefecture, in 1990.

Aki-no-sarasa. (Autumn Chintz), *(C.japonica)*, Williams & Thompson, 1950, *American Camellia Yearbook*, p.40: Imported from Japan to America by the Star Nursery about 1933. Satomi, 1956, *Camellia Varieties in Japan*, p.4 as 'Akinosarasa': Light pink, striped deeper pink, medium large size, semi-double. Early blooming. Originated in Japan.

Aki-no-sato. (Village in Autumn), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.69, colour photo and description: Flowers medium size, palest pink at first stage, later becoming white on fully opening, opening to wide campanulate with 5 large, rounded, overlapping petals, slightly wavy. Stamens in a large cylinder, pinched in at top, filaments joined for the lower half, anthers light yellow. Leaves bright mid-green, obovate, apices acuminate to long acuminate, margins shallowly serrate, somewhat undulate. Early to mid-season flowering. Originated in Yonago-shi, Shimane Prefecture, Japan. Named and released by San-in Camellia Club in 1977.

Aki-no-shirabe. (Autumn Melody). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.15 with colour photo; English translation p.9. Pink graduation at edges on white ground, cupped petals, semi-double, fragrant, medium size. Flowers early. Leaves small, elliptic. Upright growth. A cross between *C.sasanqua* x *C.hybrid* **Tiny Princess.** Named and released by Kaoru Hagiya, Niigata Prefecture in 1978.

Aki-no-sora. (Autumn Sky). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.16 with colour photo; English translation p.9. White spotted pink, tubular single with cylindrical stamen cluster. Small size, flowers early to mid-season. Leaves narrowly elliptic, medium size. Vigorous and upright. A virus variegated variety obtained by grafting **Aki-no-yama** onto a **Kochô-wabisuke** understock. Named and released by Totsurô Nakamura, Tokyo, in 1994.

Aki-no-tomo. *(C.sasanqua)*, (Autumn Companion), Itô, Jukyû, 1739, *Honzô Hanamakie*, vol.16: Large size. White ground with graduations of light pink. Originated in Japan. (Believed extinct.)

Aki-no-tsuki. (Autumn Moon), *(C.japonica)*, *Encyclopedia of Camellias in Colour*, vol.II, 1978, colour photo, No.311, p.131; Seibundô Shinkôsha, 1979, *Senchinshû*, p.8 colour photo, p.197, description: Flower, pale pink with shading, 7 petalled single, opening flat with a triangular shape, like a Higo form, 9-11 cm across. Early to midseason flowering. Leaves elliptical, medium size, apex caudate, base obtuse, shallowly serrate. Spreading pendulous growth of average vigour. See colour photo, p.116, Yokoyama & Kirino, 1989, *Nihon no Chinka* and p.50 Kirino, 1984, *Chabana Koyomi, vol.I, Tsubaki.* Different reading: 'Akitsuki'. Originated in the Chûbu area, Japan. Released by Haruichi Sakuragi in 1970.

Aki-no-ume. (Autumn Plum), *(C.sasanqua)*, ICS., Apr. 1990, *Japanese Camellia Cultivar List*, p .32: Medium size, white with red margins, single. Early blooming. Originated in Kumamoto Prefecture, Japan. See Hakoda, JCS., 1989, *Tsubaki*, No.26, p.43. Selected by Tsugio Ôta from natural seedlings in 1970s.

Aki-no-utage. (Banquet in Autumn). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan)*, 2010, p.164 with colour photo; A wide border of white around a red base. Single, small size, tubular to trumpet shape, tubular stamen ring. Flowers early to mid-season. Leaves elliptic, upright growth. A seedling of 'Tama-hibiki', originated by Soshin Hirai, Saitama Pref., Japan, in 2009.

Aki-no-yama. (Mountains in Autumn), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô* given as large flowers, somewhat different to the modern cultivar. Nakayama, 1851, *Senkaôden*, 1st. ser. vol.5; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irostuki:* Single white with red streaks. Very early blooming. Itô, Ko'emon, 1979, *ChinkaShû:* Tuyama, 1966, *Camellia Cultivars of Japan*, pl.16, p.284; Tuyama, 1968, *Camellias of Japan*, pl.317, p.185 as 'Aki-no-yama - Tokyo': Flowers single, widely cup shaped, waved and creped at the petal margin, white, narrowly striped rosy red; long, narrow, cylindrical stamen cluster, about 8 cm in diameter. Leaves, small, narrowly elliptic; apex long acuminate; base cuneate, reflexed,

green. Strong, upright, spreading growth habit. See colour photo and description: p.9 & 197, Seibundô Shinkôsha, 1979, *Senchinshû* and p.255, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Similar to **Shibori-rôgetsu.** Corruption: 'Aki-n-yana'. Mutation: **Fukurin-aki-no-yama.** Synonym: 'Aki-no-yama-Tokyo', 'Aki-no-yama-Edo'. An old cultivar from the Edo era. Originated in Kantô District, Japan.

Aki-no-yama-Edo. Andoh, 1971, *Tsubaki Meika no Shôkai to Saibai*, p.219. Synonym for **Aki-no-yama.**

Aki-no-yama-Kansai. ('Aki-no-yama' from Kansai), (*C.rusticana*), Kanaoka, 1959, *Tsubaki no Nashi;* Tuyama, 1968, *Camellias of Japan*, pl.181, p.142: Branches erect, leaves elliptical, base rounded, slightly acuminate. Petioles hairy. Flowers semi-double, rose red (Spinel red 0023), petals obovate, rounded and deeply incised at the apex, margins locally, sharply serrate, especially on inner areas. According to Mr. Katayama this cultivar was once known as 'Kamiyo-tsubaki'. See also p.39, Seibundô Shinkôsha, 1979, *Senchinshû*, and Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.311, as 'Kansai-aki-no-yama'. Originated in Kansai District, Japan. This seems similar to the Camellia listed by the Chûgai Nursery 1934-1935, and distributed by McIlhenny in the USA from 1937 as **Aki-no-yama.**

Aki-no-yama-Tokyo. Tuyama, 1968, *Camellias of Japan*, pl.317, p.160, description, p.185: Synonym for **Aki-no-yama.**

Aki-no-yosooi. (Autumn Adornment), *(C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.3. No description. Originated in Kurume-shi, Kumamoto Prefecture, Japan.

Aki-no-yuki. (Autumn Snow), *(C.sasanqua)*, Camellia Forest Nursery, 1988, p.2: Light pink, single, Higo sasanqua. Originated in Kumamoto Prefecture, Japan.

Aki-n-yana. A.J. Mackie Nursery Catalogue, 1963, p.18. Corruption of the Japanese name **Aki-no-yama.**

Aki-otome. Wada, 1941, *Japanese Garden Treasures*, p.28: Synonym for **Otome.**

Akisanzan. Turner, 1963, RHS, *The Rhododendron and Camellia Yearbook*, p.93. Corruption of the Japanese name **Aki-no-yama.**

Akita. (Place Name). *(C.rusticana).* Claude Thoby, *Camélias*, 1993, pp.10, 16, 19, 23, 57: Medium to late blooming; semi-double, bright flesh pink; very floriferous. Collected in Japan and named in USA from wild material collected in Akita.

Akitsuki. Different reading for **Aki-no-tsuki.**

Akitsushima. (Akitsu Island), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*, vol.I: Small, incomplete double, outer rows of petals imbricated, a few petals hose-in-hose and central petaloids, erect like a pine cone. White with a pattern of short pink dashes. Originated in Japan. (Believed extinct.) Note: "Akitsushima" which means "Dragonfly Island" was an old name for Japan.

Akitsushima. (Akitsu Island), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Deep red with pure white dots and moires, semi-double. Originated in Japan. (Believed extinct.)

Akitsushima. (Akitsu Island), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* Red with moires of white, semi-double with 3 rows of petals, cylindrical stamen cluster. Originated in Japan. (Believed extinct.) Note: Kasuya lists two 'Akitsushima'. The kanji characters are different but they may be the same cultivar.

Akitsu-shiratama. *(C.japonica)*, (Dragonfly 'Shiratama'), Yokoyama, 1975, *Gendai Tsubaki Meikan*, black and white photo, p.60; *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.319, p.135; Seibundô Shinkôsha, 1979, *Senchinshû*, p.8, description p.197: Flower, snow white single of 7 petals with waved and fluted edges, opening flat, and a vertical cylinder of stamens; size

10-12 cm across; early to mid-season flowering. Leaves, oblong elliptical, medium to large, raised surface, margins shallowly serrate and inclined to be turned under; deep green. Erect, vigorous growth habit with pendulous branches. The name of this cultivar was changed from 'Shinshiratama' in 1975 by Hiroshige Hayakawa. Originated by Giichiro Kouzu.

Akiyoshihime. (Princess Akiyoshi), *(C.hybrid)*, Hagiya, 1986, *Studies on Interspecific Hybridization of Camellias*, No.2, p.7, colour photo 10, p.6: A seedling of *C.japonca* **Aki-no-yama** x **Tiny Princess.** Originated in Japan by Dr Kaoru Hagiya, Niigata University. First bloomed 1982. Flower, light peach pink, 6-7 petals, single campanulate blooms about 6 cm across, petals oval and wavy, tubular stamens, white filaments, early flowering in leaf axils. Leaves, small oval, golden dark green, venation and serration obscure. Habit spreading, branches slender.

Akizaki-aka-wabisuke. Katayama, 1957, *Tsubaki Ochabana. Encyclopedia of Camellias in Colour*, vol.I, 1972, p.362. Synonym for **Hina-wabisuke.**

Akizaki-amagashita. (Autumn Flowing 'Amagashita), *(C.japonica)*, Satomi, 1956, *Camellia Varieties in Japan*; Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.60; Seibundô Shinkôsha, 1979, *Senchinshû*, p.7, colour photo, description, p.197: Flower, single, red, moired with white, opening almost flat; stamens in central cylinder; petals broad and rounded, 5-7, 8-10 cm across. Early flowering. Leaves, elliptic to wide elliptic, apex obtuse, sometimes with leaf variegation. Habit, spreading, of average vigour. No relationship with **Amagashita.** Originated in Kansai District, Japan. Different reading: 'Akizaki-ama-ga-shita', 'Akizaki-amegashita'.

Akizaki-ama-ga-shita. Different reading for **Akizaki-amagashita.**

Akizaki-amatsu-otome. (Autumn Flowering, Heavenly Maiden), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.78, colour photo and text: Blush pink, small size, single, opening widely campanulate with 5-6 long petals, rounded, emarginate, overlapping. Stamens cylindrical, filaments pale cream, united for their lower half, anthers pale yellow. Leaves elliptic to oblong-elliptic, mid-green, margins undulate, bluntly serrate, apex acuminate. Early flowering. Originated in the Hiroshima Prefecture, Japan. A seedling of **Amatsu-otome.**

Akizaki-amegashita. Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.60. Different reading for **Akizaki-amagashita.**

Akizaki-benibokuhan. Seibundô Shinkôsha, 1979, *Senchinshû*, p.197: Synonym for **Akizaki-benikarako.**

Akizaki-benikarako. (Autumn Flowering Red Anemone), *(C.rusticana)*, Yokayama, 1975, *Gendai Tsubaki Meikan*, black and white photo, p.5; Seibundô Shinkôsha, 1979, *Senchinshû*, p.8, colour photo, p.197, description: Flower, crimson, anemone form, sometimes becoming paler coloured, depending on season; 5-6 large, rounded petals and a large boss of small central petals, 11-13 cm in diameter. Early to mid-season flowering. Leaves, broad-elliptic, medium size, apex caudate, base obtuse, deep green. Petioles hirsute. Strong upright growth. Synonyms: 'Hayazaki-benikarako', 'Akizaki-benibokuhan', 'Hayazaki-beni-wabisuke'. Resembles **Akakoshimino.** Originated in Chûbu District, Japan.

Akizaki-bokuhan. (Autumn Flowering 'Bokuhan'), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.8, colour photo, p.197, description: A small red single with one row of 5 irregular outer petals, surrounding a central cushion of pale red and white petaloids. Leaves, narrowly elliptical, medium sized, apex acute, reflexed. Strong upright growth. Very early flowering. See colour photo and description, p.356, 357, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Similar to or the same as **Hayazaki-bokuhan.** Originated in Kansai District, Japan. A seedling of **Bokuhan.** Named and released by Shûhô Kirino.

Akizaki-hakubotan. (Autumn Flowering White Peony), *(C.japonica)*, Satomi, 1956, *Camellia Varieties in Japan*, as 'Akizaki-haku-botan'; Seibundô Shinkôsha, 1979, *Senchinshû*, p.8, colour photo,

p.197, description: Flower, white, anemone form with raised central cushion of small petals and petaloids, occasionally peony form, flower shape unstable; 8-10 cm in diameter. Early blooming. Leaves, large, elliptical with acute apex. Average, upright growth. Flowers easily damaged by cold. Originated in Kansai District, Japan. Different reading: 'Akizaki-shirobotan'.

Akizaki-shirobotan. Satomi, 1956, *Camellia Varieties in Japan.* Different reading for **Akizaki-hakubotan.**

Akizaki-pinku-wabisuke. *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.362. Synonym for **Hina-wabisuke.**

Akizaki-wabisuke. (Wabisuke), (Autumn Blooming Red Wabisuke), Satomi, 1956, *Camellia Varieties in Japan*, p.5: Red, small, single, campanulate. Very early flowering. Originated in Japan.

Akizaki-yobukodori. (Autumn Blooming Yobukodori), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.8, colour photo, description, p.197: Flowers. small sized, soft lilac pink, campanulate single, 6-7 cm across; large, columnar stamen cluster. Early flowering. Leaves, medium sized, elliptical with an acute apex and base and shallow but sharp serrations, slightly reflexed and twisted. Strong, upright growth. Originated in Kantô District, Japan.

Akizaki. (Autumn Moon), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Red with splashes, single, small cup-shape. Originated in Japan. Different reading: 'Shûgetsu'. See Asai, 1964, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.5, p.76. (Believed extinct.)

Akizuki. (Autumn Moon). *(C.hiemalis). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.290 with colour photo; English translation p.203. Large, formal double to peony, outer petals red and inner petals peach white. Very early. Leaves narrowly elliptic, medium size, flat. Upright, vigorous growth, dense branches. Red borders deeper colour than **Asakura.** From Fukuoka Prefecture.

Akô. Hakoda, 1974, *Nôkôdai Nôjôhô*, No.6, p.36. Different reading for **Akafu.**

Akogare. (Yearning), *(C.rusticana)*, Hagiya and Ishizawa, 1968, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.9, p.54, illustration (1), description, p.53; Seibundô Shinkôsha, 1979, *Senchinshû*, p.9, colour photo, description, p.197: Flower, medium size, red, semi-double to rose form double, opening to show small, disordered inner petals with some white markings, 9-11 cm across; outer petals about 20 in 2 rows, large, rounded, undulate; inner semi-erect; stamens, over 100, short, irregular, in fascicles; filaments, dark yellow. Mid-season flowering. Leaves, elliptic to narrow elliptic, slightly reflexed, short hairy petiole. Strong, densely furnished habit. Originated in Higashi-kubiki-gun, Niigata Prefecture, Japan. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1960.

Aktsuki-no-kaori. Nantes, *Services des Espaces, Collections*, 1980. Corruption for the Japanese name **Akatsuki-no-kaori.**

Akyô. (Beautiful Lady), *(C.rusticana)*, Tuyama, 1968, *Camellias in Japan*, pl. 213, p.108, description, p.153: Leaves, narrowly elliptic, long acuminate, thin texture, acutely serrate, veinlets flat or a little impressed, size 8.3-8.6 cm long by 3.8-4.1 cm wide; petioles, 5 mm long, very hairy. Flowers, double, deep rose (Rose madder 23). Hairy petals 2-3, normal petals, 24-34, wavy and irregular, largest, 4 cm long by 3.6 cm wide. Stamens about 2 cm long, a little irregular, filaments yellow, small winged petaloids amongst stamens. Originated in Kotani, Matsunoyama-mura, Niigata Prefecture, Japan.

Al Ewan. *(C.japonica), American Camellia Yearbook*, 2009, p.106 with colour photo; Regn No.2762; An 18 year old chance seedling, first flowered 1993 Originated by Albert Ewan, Charleston, S.C., USA, registered and propogated by Robert L. Williams, Charleston. Large, bright red semi-double, 12.7 cm diameter x 5 cm deep. Yellow anthers and filaments in an upright column. 16 petals, slightly reflexed, in 3-4 separated layers. Heavy petal texture, and flower falls in one piece. Average upright growth. Dark green leaves average 10 cm x 5 cm. Flowers mid-season.

Al Gunn. *(C.reticulata* hybrid), *American Camellia Yearbook*, 1979, p.101, Reg. No.1558: A very large, rich medium pink, semi-double, *C.reticulata* chance seedling, mid-season flowering, originated by Al Gunn and W.F. Goertz, San Marino, California, USA. The 6 year old seedling first bloomed 1976. The flower has 30 petals and gold anthers. Average size, 13 cm across by 8 cm deep. Sets flowers profusely. Flower petals are curled and incurved. Plant growth is upright, spreading and rapid with medium sized green leaves, 11 cm long by 5 cm wide. See colour photos back, inside cover, ACS, *The Camellia Journal*, vol.34, No.4, Nov. l979 and frontispiece, SCCS, *The Camellia Review*, vol.41, No.3, 1980. Chinese synonym 'Aer'.

Alabama. *(C.japonica),* Lindo Nursery retail price list, 1941-1942: Pink flecked, white formal double. Originated in USA. Invalidly used as a synonym for 'Glen 40'.

Alabama. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.416; Chinese synonym for the USA *C.japonica* **Alabama Tide.**

Alabama Dawn. *(C.japonica), American Camellia Yearbook*, 1966, p.82, Reg. No. 815: A 12 year old chance seedling that first bloomed 1958, when 6 years old. Originated by Robert W. Wilder, Fairhope, Alabama, USA. Plant growth is vigorous, upright, open and rapid with dark green leaves, averaging 10 cm x 5 cm. The anemone form flower is 10 cm across by 7.5 cm deep, red coloured with yellow anthers and white filaments. A red anemone with a small group of stamens in the centre, surrounding taller, light red petaloids, which are surrounded by a row of shorter, red and white striped petaloids, encircled by a row of shorter stamens then 2 rows of fluffy petals. Mid-season blooming.

Alabama Glen 40. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.4. Synonym for 'Glen 40', itself a synonym for **Coquettii.**

Alabama Number 13. Lindo Nursery retail price list, 1940-1941, as 'Alabama No.13'. No description. Originated in USA.

Alabama Number 14. Lindo Nursery retail price list, 1940-1941, as 'Alabama No.14'. No description. Originated in USA.

Alabama Number 33. Hume, 1946, *Camellias in America*, p.327, as 'Alabama No.33'. No description. Originated in USA.

Alabama Number 37. Hume, 1946, *Camellias in America*, p.327 as 'Alabama No.37'. No description. Originated in USA.

Alabama Number 54. Hume, 1946, *Camellias in America*, p.327 as 'Alabama No.54'. No description. Originated in USA.

Alabama Pink. *(C.japonica),* Hume, 1946, *Camellias in America*, p.327. No. description. Originated in USA.

Alabama's Lurleen. *(C.japonica),* Pyron 1969, *American Camellia Yearbook*, p.103: "Mr Steindorff has a fine 5" peony form blush pink seedling which he has named in honour of the late Governor Lurleen Wallace". Medium growth. Early to mid-season blooming. Originated by W.W. Steindorff, Greenville, Alabama, USA.

Alabama Tide. *(C.japonica), American Camellia Yearbook*, 1980, p.159, Reg. No.1644: A large, deep, rich red, semi-double, *C.japonca* chance seedling, blooms mid-season to late. Originated by C.C. Crutcher, Theodore, Alabama, USA. The 11 year old seedling first bloomed 1973. Average flower size, 11 cm across by 5 cm deep. Plant growth is upright and rapid with dark green leaves, 8 cm long by 3.2 cm wide. Chinese synonym 'Alabama'.

Alabamian. *(C.japonica),* SCCS, 1954, *The Camellia. Its Culture and Nomenclature*, p.24: A sport of **Hanafuki.** White shaded pink, sometimes with a small, pink streak. Large formal double. Originated in USA by G. Fisher.

Alabaster. *(C.japonica), American Camellia Yearbook*, 1958, p.285, Reg. No.323: A 10 year old seedling of 'Magnoliiflora', (**Hagoromo**) originated by Julington Nurseries, Jacksonville, Florida, USA. Plant growth is rapid and average in type. The dark green leaves are large, slightly wavy, ovate, margins medium serrated and apex acute. The semi-double, white flowers, 8-10 cm across, resemble 'Hagoromo', but the blooms are larger with an added row of petals. The petals are heavy in texture and hold up well. A profuse bloomer; mid-season to late. Orthographic error 'Alabastor'.

Alabastor. Mark S. Cannon Scion Catalogue, 1964-1965, p.1. Orthographic error for **Alabaster.**

Alain Claude. *(C.japonica),* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.16; Single, pink.

Alan. Gao, Jiyin, *The Observations from the Camellia World*, 1993, p.36. Chinese synonym for USA *C.japonica* **Mark Alan.** Later changed to Jiahong Alan.

Alan Davis. *(C.japonica), American Camellia Yearbook*, 1974, p.167, Reg. No.1279: A large, 12 year old *C.japonica* seedling of **Gaiety** x **Frizzle White,** that first bloomed, 1965, originated by Norman M. Davis, Charlotte, North Carolina, USA. Plant growth is average, medium in rate with dark green leaves, 8 cm x 5 cm. The peony form bloom is rose pink, with 29 petals and 45 petaloids with yellow anthers and white filaments. It measures 8 cm across by 6 cm deep. Lower petals have a tendency to reflex and there are 4-5 groups of stamens and petaloids in its formation. Blooms early to mid-season.

Alan Raper. (*C.reticulata* hybrid). Bob Withers; "A Mother Superior", ACRS *Camellia News*, No.131, 1994, p.9: A seedling of **Suzanne Withers** x **Arcadia.** High white petals in the centre, deepening to deep pink petals on the outside of the flower. Originated in Australia by Dr. R. Withers, Donvale, Victoria. Orthographic error 'Allan Raper'.

Alan Walton. ACRS, *Camellia News,* No.135, p.9, Mildorrie Camellia Scions advert. Orthographic error for **Allan Walton**. See "International Camellia Register", p.75.

Alarm. *(C.japonica),* van Houtte, 1844-1845, Catalogue, 18:7: Flesh white petals, veined, transparent. (Believed extinct.)

Alarni. *(C.japonica),* ACRS, *Camellia* News, No.36, 1969, p.14, Reg. No.110: Originated by Mrs Alice W. Walker, 1/24B Forsyth Street, Willoughby, NSW, Australia. A chance seedling of *C.japonica* **Mrs. Swan.** The seed was planted in 1953 and it first flowered 1960. The petalloid single, white flowers are produced on a dense, upright, vigorous plant, flowering mid-season to late and with large, dark green leaves.

Alasijian-Huanghou. *American Camellia Yearbook,* 1993, p.36. Chinese synonym for Australian *C.reticulata* hybrid **Alaskan Queen.**

Alaska. SCCS, 1951, *The Camellia. Its Culture and Nomeclature:* White, medium size, semi-double with fluted petals. Vigorous, upright growth. Mid-season flowering. Originated in USA by Carleton.

Alaskan Belle. *American Camellia Yearbook*, 1966, p.82, Reg. No.881: A 10 year old chance seedling that first bloomed 1959, originated by George S. Clarke, Savannah, Georgia, USA. Plant growth is compact, upright and rapid, with dark green leaves averaging 10.5 cm by 7 cm. The semi-double flower is white with bright yellow stamens in clusters. It measure up to 15 cm across by 7 cm deep and has 14 petals and 11 rabbit ears and flowers mid-season.

Alaskan Queen. *(C.reticulata* hybrid), ACRS, *Camellia News*, No.99, 1986, p.22, Reg. No. 339: Originated by Bill Hooper, Bexley North, NSW, Australia. A chance seedling of **Lasca Beauty,** first flowered in 1980. The semi-double flower, 14.5 cm x 7 cm, is blush pink, fading

to white. Flowers mid-season. The tall, strong growing plant has clearly veined, reticulata leaves with coarse serrations, ovate with an acute apex, 13 cm long by 6.9 cm wide.

Alata. *(C.japonica),* Tourres, Macheteaux Catalogue, 1839, p.21. No description. Originated in England by Harrisson. Synonym 'Alata Harrissonii'. (Believed extinct)

Alata Harrissonii. Costa, *Catalogue de la collection de camellias présentée à* sa *majesté L'Imperatrice de toutes les Russies et Reine de Pologne*, 1846, p.15. Synonym for **Alata.**

Alba. Curtis *Monograph*, 1819 as 'flore Albo simplici'. A seedling of **Variegata.** A medium sized single white. First named 'Alba' by Loddige's *Botanical Cabinet*, 1822. Synonym for **Alba Simplex.**

Alba Briantea. Ambroise Verschaffelt, 1851-1852, Catalogue Général, p.13. Synonym for **Brillante.**

Alba Brianti. Sewell Catalogue, 1878, p.43. Orthographic error for 'Alba Briantina', synonym for **Brillante.**

Alba Briantina. *Journal d'Horticulture Pratique de la Belgique*, 1848-1849, p.302. Verschaffelt, 1848, *Iconographie*, index with ref.1 (2): pl.2 as 'Brillante' ('Alba Briantina').

Alba Brilliantea. André Leroy Catalogue, 1868, p.135. Synonym for **Brillante.**

Alba Burnieri. *(C.japonica)*, Loddige's Catalogue, 1849, p.33. No description. Originated in England. (Believed extinct.)

Alba Candidissima. Martin y Giraud, 1978-1979, Gran Jardin de la Bomba, No.4, p.39: Synonym for **'Candidissima'.**

Alba Casareto. G. Mariotti, Nervi Nursery Catalogue, 1924, p.14. Orthographic error for 'Alba Casoretti', synonym for **Alba Plena di Casoretti.**

Alba Casoretti. van Houtte, 1845, Catalogue, No.18:7. Synonym for **Alba Plena di Casoretti.**

Alba Casoretto. von Biedenfeld, 1856, *Practische Grundlehren der Culture von Camellien...*, p.31. Orthographic error for **Alba Plena di Casoretti.**

Alba Cassoretti. Hovey & Co. Catalogue, 1852, p.2. Orthographic error for **Alba Plena di Casoretti.**

Alba Chandleri. *(C.japonica)*, Seidel, 1847, Pflanzen Catalog, p.5. No description. (Believed extinct).

Alba Cocleata. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.7. Orthographic error for **Alba Cochleata.**

Alba Cochleata. *(C.japonica)*, Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.7 as 'Alba Cocleata; Burdin Maggiore & Co. Catalogue, 1880-1881, p.72. No description. Originated in Italy. (Believed extinct.)

Alba Compacta. *(C.japonica)*, *The Gardener's Chronicle and Agricultural Gazette,* No.12, 24th Mar. 1856, p.232. No description. Rollisson Catalogue, 1871, p.128: A pure white of fine shape, being well imbricated; an improvement on the old **Alba Plena.** Originated in England.

Alba Coronata Nova. *(C.japonica)*, Verschaffelt Catalogue, 1849, p.44. No description. Originated in Italy. (Believed extinct.)

Alba Coronata Vera. *(C.japonica)*, Linden Catalogue, No.94, 1875, p.20. No description. Originated in Italy. (Believed extinct.)

Alba Crispa. *(C.japonica)*, van Houtte, 1839-1840, Catalogue, 1:1. No description. Originated in Italy. (Believed extinct.)

Alba de Casoretti. de Jonghe, 1851, *Traité de la Culture du Camellia.* Synonym for **Alba Plena di Casoretti.**

Alba di Boutourlin. Del Lungo & Girardi, 1928, *Le Camelie*, p.86. Orthographic variant for **Alba Bouturlin.**

Alba di Casoretti. Del Lungo & Girardi, 1928, *Le Camelua*, p.88. Synonym for **Alba Plena di Casoretti.**

Alba Delecta. *(C.japonica)*, Verschaffelt, 1859, *Nouvelle Iconographie*, Book 12, pl.3: Obtained from seed in our establishment, this variety has bloomed for two or three springs. It belongs to the class of pure white perfections. The numerous petals which compose the bloom, characteristically have three different forms; they are rounded at the exterior, ovate-obtuse in the interior; lanceolate at the centre, forming a star with 6 rays, each with perfect imbrication. At the centre they are grouped in a serried heart. Originated in Belgium. Orthographic error: 'Alba Dilecta'.

Alba di Cassoretti. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.4. Orthographic error for **Alba Plena di Casoretti.**

Alba di Casoretti. *(C.japonica),* Hillebrand, *Antiche Camelie del Lago Maggiore,* 2003, p.63. Medium size, rose form double is pure white and rather spherical. A shrub of medium growth, with small elongated leaves. Note: The flower pictured and details given are quite different from **Alba Plena di Casoretti** as pictured in Verschaffelt, 1849, and it is therefore recognised as a separate cultivar.

Alba Dilecta. da Silva, 1880, *Forcing Varieties of Camellias in Oporto.* Orthographic error for **Alba Delecta.**

Alba Distincta. *(C.japonica),* Auguste van Geert, 1857, Catalogue, No.43, p.32 as 'Alba Distinta'. No description. Auguste van Geert Nursery Catalogue, No.52, 1862, p.38. Magnificent white. Originated in Italy.

Alba Distinta. Auguste van Geert, 1857, Catalogue, No.43, p.32. Orthographis error for **Alba Distincta.**

Alba Double White. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.4. Synonym for **Alba Plena.**

Alba Dunlaps. Medici Spada, 1858, *Catalogue nel Giardino a Villa Quiete*, p.4. Synonym for **Dunlop's White Waratah.**

Alba Elegans. van Houtte, 1839-1840, Catalogue,1:1. Synonym for **Claritas.**

Alba Elegant. Cachet Catalogue, 1840-1841, p.2, Synonym for **Claritas.**

Alba Elegantissima. *(C.japonica),* Verschaffelt, 1855, *Nouvelle Iconographie*, Book 4, pl.2: Most beautiful amongst the perfectly imbricated white varieties, due to the correct imbrication of its numerous, small, well-shaped petals of purest white, forming blooms larger than average. We obtained it from seed ourselves and seen it bloom in the spring of 1853. Its profuse flowering is especially remarkable, our parent plant had about 50 blooms at one time, which opened easily and contrasted with the dark green of its medium size, compact foliage. Originated in Belgium, by Verschaffelt.

Alba Eleonora. *(C.japonica),* Jose Maria Serra, 1855-1856, Catalogue, p.3. No description. Originated in Spain. (Believed extinct).

Alba Elisa. van Houtte, 1848-1849, Catalogue, 35:33. Orthographic error for **Alba Elysia.**

Alba Elisea. Jean Verschaffelt, 1860-1861, Price List, p.11. Orthographic error for **Alba Elysia.**

Alba Elysii. de Jonghe, 1851, *Traité de la Culture du Camellia.* Orthographic error for **Alba Elysia.**

Alba Elysia. *(C.japonica),* van Houtte, 1847, Catalogue, 30:14, No description. van Houtte, 1848, Catalogue,33:14: Beautiful white, well imbricated. Originated at the Jardin d'Hivers, Paris, France. Orthographic errors: 'Alba Elisa', 'Alba Elysii', 'Alba Elysiensis', 'Alba Elisea'.

Alba Fenestrata. *(C.japonica),* Jacob Makoy et Cie Catalogue, 1839, p.16. No description. van Houtte, 1839, Catalogue, 1:1. No description. Berlèse, 1840, *Monographie* p.78, as 'Fenestrata Alba': Flowers of over 10 cm in diameter, of pure, milk white and very full, petals very numerous, many broad and long, thin and spoon shaped, in 6-7 rows, displayed more or less regularly, forming a cup. Those at the centre are compact, erect and crinkled. Charles van Geert, *Annotations*, 1847-1850: Perfectly imbricated. Large size, flat flower, white; similar to **Sulcata.** A yellowish stripe at the centre of each petal, the edges of the petals are transparent. Verschaffelt, 1851, *Nouvelle Iconographie*, Book II, pl.V. Synonyms: 'Alba Nova Plena', 'Alba Plena Nova', 'Fenestrata Alba'. Orthographic error: 'Alba Finestrata'. Originated in Italy.

Alba Ficheri. *(C.japonica),* Verschaffelt Catalogue, 1849-1850, p.44. No description. Originated in Italy. (Believed extinct.)

Alba Fimbriata. Henderson & Son, 1868, Catalogue, p.70. Seidel Catalogue, 1911. Orthographic variant for **Fimbriata.**

Alba Fimbriata Nova. Verschaffelt, 1844-1845, Catalogue, p.22. Sprenger Catalogue, 1906. Synonym for **Fimbriata.**

Alba Fimbriato. Nuccio's Nurseries Catalogue, 1949-1950. Orthographic error for **Fimbriata.**

Alba Finestrata. Contini & Nava Catalogue, 1900. Orthographic error for **Alba Fenestrata.**

Alba Fiorentina. *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1845-1846, p.41. No description. Ibid, 1849-1850, Catalogue Général: Pure white often with stripes of res. Peony form. Lichtenthal, 1852, *Manuale botanico, enciclopedico popolare:* Pure white, sometimes with streaks of red. Peony form. Originated in Italy. Orthographic variant: 'Alba Florentina'.

Alba Flore Plena. Chandler & Booth, 1831, *Illustrations and Descriptions....* Orthographic variant for **Alba Plena.**

Alba Flore Simplici. Burdin Catalogue, 1822 as 'Albo flore simplici'. Synonym for **Alba Simplex.**

Alba Florentina. August van Geert Catalogue, 1848, p.14. Orthographic variant for **Alba Fiorentina.**

Alba (Floy). *(C.japonica),* Floy, 1838, *Magazine of Horticulture,* invalidly as 'Alba': Semi-double, white. Originated in the USA. (Believed extinct.)

Alba Foliis Argenteis. *(C.japonica),* Cels, Paris Nursery Catalogue, 1836-1837, p.8. No description. (Believed extinct.)

Alba Formosissima. *(C.japonica),* de Jonghe, 1851, *Traité de la Culture du Camellia*, p.94. No description. Originated in Italy. (Believed extinct.)

Alba Fonsetrata. Trillon, 1845, Catalogue, p.3. Orthographic error for **Alba Fenestrata.**

Alba Frieze. Clower, 1950, *America Camellia Yearbook*, p.119. Synonym for **Clower White.**

Alba Gemelli. *(C.japonica),* Longone Catalogue, 1891: Large white Flowers often twins. Originated in Italy.

Alba Gigantea. *(C.japonica),* Linden Catalogue, No.94, 1875, p.20. No description. Originated in Belgium. (Believed extinct.)

Alba Gigantea. *(C.japonica),* Wada, 1941, *Japanese Garden Treasures*, p.28: The biggest white single in existence, introduced by Wada; flowers pure white, broadly campanulate, with many imbricated petals of great substance and perfect beauty. Flowers mid-season. Originated in Japan by Wada. It was listed in the Wada, 1937 catalogue, p.37, as a sasanqua with the description: Large flowering, single white, with waxy, broad, thick, well shaped petals. Leaves and habit like a *C.japonica.*

Alba Grandeflora. Trehane Camellia Nursery Catalogue, 1970. Orthographic error for 'Alba Grandiflora', synonym for **Gauntlettii.**

Alba Grandiflora. *(C.japonica),* Jacob Makoy Catalogue, 1836, p.15. No description. Harrison ed., 1843, *The Floricultural Cabinet*, vol.II, p.51: White, sometimes with a pink tint. It has a confused centre. Charles van Geert Catalogue, 1845, p.1: Peony form, seried and globular, very large flower. White with yellowish tint. Originated in Belgium.

Alba Grandiflora. *(C.japonica),* Wada, 1935, *Japanese Garden Treasures*, p.26: Immense, pure white. Synonym for **Gauntlettii.**

Alba Grandiflora Semiplena. Courtois, 1833, *Magasin D'Horticulture*, (l,pt.D):309. Synonym for **Weimarii.**

Alba Grandiflora Simplex. *(C.japonica),* Scarlatti Catalogue, 1856. No description. Originated in Italy. (Believed extinct.)

Alba Grandiflora Superba. *Camellia Digest*, 1(1),1942. Synonym for **Gauntlettii** as 'Lotus'.

Alba Grandifolia. *(C.japonica),* Warren's Descriptive Catalogue, 1844, p.37: Very large white. Fine form. Originated in USA.

Alba Grandissima. *(C.japonica),* Costa, 1846 *Catalogue de la Collection de Camellia présentée à sa majesté l'Imperatrice de toutes les Russies et Reine de Pologne*, p.4. No description. Originated in Italy. (Believed extinct.)

Alba Hector. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.53. No description. Originated in Belgium. (Believed extinct.)

Alba Horrida. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.53. No description. Originated in Italy. (Believed extinct.)

Alba Illustra. Jacob Makoy & Co. Catalogue, 1849, p.19. Orthographic error for 'Alba Illustrata', synonym for **Waltonensis.**

Alba Illustrata. van Houtte Catalogue, 1844-1845, 18:7. Synonym for **Waltonensis.**

Alba Imbricata. *(C.japonica),* van Houtte Catalogue, 1848-1849, 35:33; Paxton's *Magazine of Botany*, 1848, vol.XIV, p.60: "At the nursery of Mr Low, Clapham, are two seedlings of excellent qualities. One, a pure white, (**Alba Imbricata**) of large size, petals round, of good substance, well filled up and without the ochre colour so common in the centrepetals of the old double white (**Alba Plena**); the whole flower lying quite flat on the bud scales." See pl.II, Book I, Verschaffelt,1848, *Nouvelle Iconographie.* Originated in England. Synonyms: 'Alba Imbricata di Low', 'Alba Imbricata Nova'.

Alba Imbricata di Low. Burdin Maggiore & Co. Catalogue, 1849-1850. Synonym for **Alba Imbricata.**

Alba Imbricata Lilliputiana. *(C.japonica),* Lichtenthal, 1852, *Manuale botanico enciclopedico popolare:* Deep flesh white, large flower of the *C.sasanqua*, perfectly imbricated. Abbreviation: 'Alba Lilliputiana'. Note: This is a *C.japonica* as sasanquas were not introduced to Europe at the above date.

Alba Imbricata Nova. Louise Leroy, 1868, Catalogue, p.132. Synonym for **Alba Imbricata.**

Alba Imperialis. *(C.japonica),* Louis Leroy, 1868, Catalogue, p.122: Imbricated, white lined with pink. Originated in France.

Alba Insignia. Anderson & Co. Catalogue, 1887, p.69. Orthographic error for **Alba Insignis.**

Alba Insignis. *(C.japonica),* Verschaffelt, 1849, *Nouvelle Iconographie*, Book III, pl.I: This Italian variety is remarkable amongst the white blossomed varieties on account of the size of its blooms, the large number of petals, their perfect imbrication and double shape. The exterior petals are round-ovate and hooded, pure white with a soft yellowish tinge at the centre. For colour photo see: *New Zealand Camellia Bulletin,* vol.XIV, No.3, p.17, 1985. The synonym of 'Il Cygno' given by van Houtte is considered erroneous.

Alba Jean. *(C.japonica),* Feray's Fine Flowers Catalogue, 1960. No description. Originated in USA. No valid listing located. Also illegal according to the Horticultural Code as the use of Latin is barred from 1959.

Alba Laccina. *(C.japonica),* Auguste van Geert Catalogue, 1848. No description. Berlèse, 1849, *Annales de la Société d'Horticulture de France,* vol.40, p.224 as 'Alba Lacina': Flower, regular rose

form or formal double, 9-10 cm across. Sometimes the flower is greenish white when first opening, becoming pure white. Petals numerous, medium size, cup-shaped, notched, irregular, some time crinkled, crêped and twisted. Others are entire, well imbricated, forming a graceful flower. Synonyms: 'Alba Pleno Lacina', 'Alba Laccina Novissima'. Orthographic error: 'Alba Lacina', 'Alba Lascente'. Originated in Italy by Mariani.

Alba Laccina Novissima. *(C.japonica),* Auguste van Geert Catalogue, 1848, p.14. No description. Synonym for **Alba Laccina.**

Alba Lacina. Berlèse, 1848, *Annales de la Société d'Horticulture de France*, vol.40, p.224. Orthographic error for **Alba Laccina.**

Alba Lacteola. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.53. No description. Originated in Belgium. Synonym: 'Lacteola'. Orthographic variant: 'Alba Lacteolata'. (Believed extinct.)

Alba Lacteolata. Joseph Baumann, 1849-1850, Prix Courant, p.2. Orthographic error for **Alba Lacteola.**

Alba Lascende. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues:*, p.5. Orthographic error for **Alba Laccina.**

Alba Latipetala. *(C.japonica),* Ambroise Verschaffelt, 1851-1852, Catalogue Général, p.15. Verschaffelt, 1854, *Nouvelle Iconographie* Book VI, pl.3: It is unquestionably one of the whitest perfection known. The very large flowers (11 cm across) are composed of quite numerous, large, rounded petals; convex, emarginate and perfectly imbricated. At the centre the petals are small, spread out and sub-undulate at the edges. It is of Italian origin. Orthographic error: 'Alba Latipetali'.

Alba Latipetali. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Alba Latipetala.**

Alba Lawrencii. *(C.japonica),* Verschaffelt Catalogue, 1849-1850. p.44. No description. Originated in England. (Believed extinct.)

Alba Lienata. Jacob Makay et Cie Catalogue, 1842, p.9. Orthographic error for **Alba Lineata.**

Alba Lilliputiana. Burdin Maggiore & Co. Catalogue, 1862. Abbreviation for **Alba Plena Lilliputiana.**

Alba Lineata. *(C.japonica),* Jacob Makoy et Cie Catalogue, 1839, p.16. No description. Berlèse, 1843, *Iconographie*, vol.2, pl.111 as 'Colvilli Striata': The flower is 9-10 cm across or more, outer petals, which are in 2-3 rows, are ovate-obtuse, placed irregularly, more or less emarginate, a little imbricated, disposed in a cup-shape, sometimes displayed horizontally. Those building up a anemone-form heart, not very thick, resembling **Preston Eclipse.** Synonyms: 'Colvilli Striata', 'Lineata Alba', 'Lineata Striata'. Orthographic error: 'Alba Lienata'. Originated in Belgium.

Alba Lineata Nova. *(C.japonica),* Van Houtte Catalogue, 1843-1844, 12:33: Pure white with scattered pink stripes. Peony form. Originated in Italy.

Alba Lombardii. *(C.japonica),* Auguste van Geert Catalogue, 1849, p.15. No description. Originated in Italy. (Believed extinct.)

Alba Londinensis. Gheldorf Const. 1844, Catalogue of Plants and Price List, p.9. Orthographic error for **Alba Londonensis.**

Alba Londonensis. *(C.japonica),* Anonymous, 1839, *Revue Horticole*, pp.205, 207; van Houtte Catalogue, 1839, 1:1 as 'Alba Londonesis' (Candida Superba) and 'Allnutt's Alba': Good form, imbricated, pure white. Orthographic variant: 'Londoniensis Alba'. Mertens & Fontaine, *Collection de cent espèces.....camellia,* 1845, pl. 80, as 'Londiniensis Alba'.

Abbreviation: 'Londoniensis'. Orthographic errors: 'Alba Londinensis', 'Londinensis". Synonyms: 'Candida Superba', 'London White'. The listing of 'Allnutt's Alba' as a synonym is erroneous. Originated in the UK.

Alba Londoniensis. Jacob Makoy et Cie Catalogue, 1841, p.9. Orthographic error for **Alba Londonensis.**

Alba Longi. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, p.52 with colour photo; Medium size semi-double, white (RHS.CC.155C). A seedling of **Alba Simplex** x **Moshio.** First flowered 1988. Originated by Dott. Guido Cattolica, Livorno, Italy. Note; Name is illegal under Nomenclature Rules, use of Latin barred for cultivars.

Alba Longifolia. *(C.japonica),* Hazlewood 8r Jessep, 1972, *Checklist - Camellia* Cultivars *from Nursery Catalogues*, p.5. No description. (Believed extinct.)

Alba Lucina. Berlèse, *Iconographie,* 1841, vol.I, pl.88. Synonym for **Lucina Plena.**

Alba Lucina Novissima. *(C.japonica),* Auguste van Geert, 1852, Catalogue, p.27. Well imbricated, pure white. Originated in Belgium.

Alba Lutescens. *(C.japonica),* Anon. 1830, Ueber die Cultur der Kamellien in *Der Blumen Gaertner,* Jg.1.H.4, p.50 as 'Albolutescens'. No description. Burdin Chambery Catalogue, 1834, p.18. No description. Berlèse, 1837, *Monographie*, ed.1, p.1056 as 'Alba Lutescens'or 'Roseoflorescens': Leaves oblong, reflexed and rolled downwards towards the apex, regularly serrate, almost flat, of the form and colour of **Welbankiana,** but obtuse-ovate, full, no sexual organs, petals broad, arranged in several rows. Synonyms: 'Alba Lutescens Nova', 'Roseoflorescens'. Originated in England.

Alba Lutescens Nova. *(C.japonica),* Vershaffelt Catalogue, 1847-1848, p.53. No description. Synonym for **Alba Lutescens.**

Alba Maculata. *(C.japonica),* Robert Tyas, *Popular Flowers,* 1843, p.85. No description. Loddige's Catalogue,1844, p.6. No description. Originated in England. (Believed extinct.)

Alba Maculata Nova. *(C.japonica),* Charles van Geert Catalogue,1845. Peony form flower. Large and very full, yellowish and waxy at the centre, with stripes of soft rose. Synonym: 'Alba Maculata Superba'. Originated in Belgium.

Alba Maculata Superba. Charles van Geert Catalogue, 1856, p.1. Synonym for **Alba Maculata Nova.**

Alba Maculataeflora. Auguste van Geert, 1852, Catalogue, p.24. Orthographic variant for **Alba Maculatiflora.**

Alba Maculatiflora. *(C.japonica),* Verschaffelt Catalogue, 1849-1850, p.44. No description. Orthographic error: 'Alba Maculataeflora'. Originated in Belgium. (Believed extinct.)

Alba Magnifica. *(C.japonica),* RHS Yearbook, 1937 as 'Albo Magnifica'. No description. Originated in England.

Alba marginata. Rollison Catalogue,1871. Synonym for **Alba Plena Marginata.**

Alba Marginata. *(C.japonica),* Del Lungo e Girardi, 1928, *Le Camelie,* p.171: Foliage streaked and margined with white. Flowers white. Originated in Italy.

Alba Maxima. *(C.japonica),* Giles & Son Catalogue, 1881, p.90. No description. Originated in Australia. (Believed extinct.)

Alba Minima. *(C.japonica),* José Marques Loureiro, Catalogue, No.1, 1865, p.30, and No.9, 1872-1873, p.40: Pure white, miniature formal double. Originated in Portugal.

Alba Monstruosa. Colla, 1843, *Camelliografia*, p.97. Synonym for **Dahliiflora.**

Alba Multiflora. *(C.japonica)*, Halley, 1844, *Gardeners' Chronicle*, 344 (11):162; van Houtte Catalogue, 1844-1845, 18:7: Very free flowering, attractive white. Originated in England.

Alba Mutabilis. *(C.japonica)*, Maupoil & Figlio Catalogue, 1847, p.4. No description. Originated in Italy. (Believed extinct.)

Alba Nitida. *(C.japonica)*, Burdin Maggiore et Cie Catalogue, 1846-1847, p.41; No description. Ibid 1849-1850, *Catalogue Général:* Milk white, regular. Lichtenthal, 1852, *Manuale botanico enciclopedico popolare:* Milk white, regular. Originated in Italy.

Alba Nova. Berlèse, 1843, *Iconographie*, vol.2, pl.155. Synonym for **Claritas.**

Alba Nova. *(C.japonica)*, Scheidweiler, ed., 1844-1845, *Journal d'Horticulture Pratique*, vol.2, p.88: Until now we have considered 'Candidissima' as the most outstanding white. We have recently compared it with **Alba Plena** in Mr Ryflkoget's garden and recognised its superiority. Flowers of 9-10 cm across with 7-8 rows of broad, rounded, perfectly imbricated petals of an alabaster white with a rose bud centre. Foliage bright green. 'Alba Nova' was listed by Herbert as a synonym for 'Claritas', but Berlèse, 1843, *Iconographie* says "Under the name of 'Alba Nova' there exists in commerce another camellia, which in no way resembles this. ('Claritas') Moreover the 'Claritas' called 'Alba Nova' came from M. Moems, Antwerp and the 'Alba Nova' to which we refer was raised in Italy 3 years ago."

Alba Nova Plena. van Houtte Catalogue, 1844-1845, 18:7. Synonym for **Alba Fenestrata.**

Alba Novissima. Auguste van Geert Catalogue, 1848, p.14. Orthographic variant for 'Alba Nova', synonym for **Claritas.**

Alba Nivissima Variegata. *(C.japonica)*, Mercatelli Catalogue, 1894. No description. Originated in Italy. (Believed extinct.)

Alba Odorata. *(C.japonica)*, de Bisschop Catalogue, 1937, p.5: Pure white, single. Slight aroma. Originated in Belgium.

Alba Ornatissima. *(C.japonica)*, Lemaire, 1864, *L'Illustration Horticole*, vol.XI, pl.404: Medium size flower, 7-8 cm across, white, regular and imbricated. Originated in Italy. Orthographic errors: 'Alba Ornatissum', 'Alba Amatissima', 'Alba Ornatisum'.

Alba Ornatissum. Gelding Catalogue, 1897, p.40, 41. Orthographic error for **Alba Ornatissima.**

Alba Ornatisum. J. & W. Gelding, Nursery Catalogue, 1887-1888, p.53. Orthographic error for **Alba Ornatissima.**

Alba Peony. *(C.japonica)*, Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.5: White, peony form camellia. Originated in Australia.

Alba Perfecta. *(C.japonica)*, Charles van Geert, 1848. *Annotations Manuscrites:* Very double, creamy white, resembling **Kew Blush.** Hovey & Co. Catalogue, 1852, p.7. Originated by Dunlap. The petals are round and free from notches as **Wilderi.** The colour is of the purest white, full to the centre, slightly cupped and opens freely. Orthographic error: 'Alba Perfecto'. Originated in USA.

Alba Perfecta Striata. *(C.japonica)*, Verschaffelt Catalogue, 1847-1848, p.53. No description. Originated in USA. (Believed extinct.)

Alba Perfecto. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Alba Perfecta.**

Alba Phénix. *(C.japonica)*, Rousseau, Angers Nursery Catalogue, 1842-1843, p.1.: White. Originated in France.

Alba Picta. van Geert Catalogue, 1845. Synonym for **Imbricata Alba.**

Alba Planipetala. Linden Catalogue, No.94, 1875, p.21. Synonym for **Plantipetala.**

Alba Plena. *(C.japonica),* Andrew's *Botanical Repository*, 1:pl.25, 1797, as 'Flore Plena Albo'. Listed again in the 1812 *Botanical Repository*, vol.10, pl.660; Loddige's Catalogue, 1814 as 'Alba Pleno' and in their 1822 Catalogue as 'Alba Plena'. The cultivar was brought to England from China in 1792, by Captain John Corner on the East Indiaman, "Carnatic", for the ship's principal owner, Gilbert Slater. (Farrington, 1999, *Catalogue of East India Company Ships' Journals and Logs 1600-1834*, p.105, and Journal and Log of "Carnatic" in the British Library, London). It was taken to USA by Floy in 1800 for John Stevens, New Jersey. The camellia bears a full double, symmetrically imbricated (formal), medium to large size, white flower, showing no stamens and opening flat. It is about 10 cm across and 3.5cm deep. The petals decrease in size towards the centre. A medium to slow grower with light green foliage, leaves ovate. sometimes twisted and turned down at the apex. Sports include: **Fimbriata, Mrs Hooper Connell, Mattie R,** and **Blush Plena.** Synonyms: 'Nankin-shiro', 'Da Bai', 'Baiyupei', 'Baiyang Cha', 'Qiayebai', 'Napkin Bai', 'Baichahua', 'Bourbon Camellia', 'Double White', 'Old White', 'Old Double White', 'French White', 'Thousand Petalled White', 'Alba Plena Improved', 'Alba Plena Late', 'Il Cygno'(Hearn), 'Alba Pleno', 'Alba Plena Ancien', Alba Plena Imbricata'. See colour photo p.68, Macoboy, 1981, *Colour Dictionary of Camellias.* Originated in China.

Alba Plena Ancien. Trillon, Le Mans Nursery Catalogue, 1843, p.3. Synonym for **Alba Plena.**

Alba Plena (Casoretti). Verschaffelt, 1849, *Nouvelle Iconographie*, book VIII, pl.2. Orthographic variant for **Alba Plena di Casoretti.** Orthographic errors: 'Alba Plena Cassoreti', 'Alba Pleno Casoretti', 'Alba Plena Cassoretti'.

Alba Plena Cassoretti. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Alba Plena di Casoretti.**

Alba Plena di Casoretti. *(C.japonica),* Oudin, Lisieux Nursery Catalogue, 1844, p.9 as 'Alba Prima di Casoretti': Perfect imbricated form, very numerous petals, recurved from the centre to the circumference, forming an elevated centre of the purest white. van Houtte Catalogue, 1845, 18:7, as 'Alba Casoretti': Imbricated, pure white. Paquet, 1844, *Traité de la camellia des plantes de Terre de Bruyère* as 'Alba Casoretti': Flower medium to large size, 9.5 cm across x 4.5 cm deep, white with tints of yellowish green in the centre, outer petals, 14 in 3 rows, inner 9, folded and waved petaloids with stamens intermixed. Leaves, medium size, elliptic, apices short acute, margins sharply serrulate. A seedling originated by Casoretti of Italy. For illustration see Verschaffelt, 1849, *Nouvelle Iconographie*, Book VII, pl.II as 'Alba Plena'(Casoretti): This one is conspicuous by the fullness of its convex centre. Synonyms: 'Alba de Casoretti', 'Alba Prima di Casoretti', 'Alba Prima'. Orthographic errors: 'Alba di Cassoretti', 'Alba Casoretto', 'Albade Casoretti', 'Alba Pleno Casorette', 'Alba Plena Cassoreti', 'Alba Pleno Casoretti', 'Alba Prima di Cassoretti'.

Alba Plena Imbricata. Catalogue della Stablimento Agrario-Botanico Castagnola e Casabono, 1867-1868. Synonym for **Alba Plena.**

Alba Plena Improved. McIlhenny, 1937, *600 Varieties of Camellias*, p.1. Synonym for **Alba Plena.**

Alba Plena Fimbriata. Poiteau, 1836, *Revue Horticole*, p.166-170. Synonym for **Fimbriata.**

Alba Plena Florentina. *(C.japonica),* Verschaffelt Catalogue, No.50, 1844, p.17, as 'Alba Pleno Florentina'. No description. Originated in Italy. (Believed extinct)

Alba Plena Laccina. *Catalogo Plantarum Cesarii Regii Horti Modiciam*, 1844. Synonym for **Alba Laccina.**

Alba Plena late. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Alba Plena.**

Alba Plena Lucina. Charles van Geert Catalogue, 1846, p.62. Synonym for **Lucina Plena.**

Alba Plena Marginata. *(C.japonica),* Costa, 1846, *Catalogue de la collection de camellias présentée à sa majesté L'Imperatrice de toute de Russies et Reine de Pologne*, p.14. No description. Originated in Italy. (Believed extinct.)

Alba Plena Minor. *(C.japonica),* Curtis, 1819, *Monograph*, No.3, as 'Flore Pleno Alba Minor'. Introduced by Mr James Lee (Junior) in 1816. No description. McIlhenny Catalogue, 1935, p.1: White fine, small size, double blooms with small petals. Well built, similar to **Alba Plena**. Late bloomer.

Alba Plena Nova. Charles van Geert Catalogue, 1845. Synonym for **Alba Fenestrata.**

Alba Plena (Sasanqua). (*C.sasanqua),* Townhill Park Nurseries Catalogue,1985, invalidly and illegally as 'Alba Plena': Large size, double, white. Origin unknown.

Alba Plena Simplex. *(C.japonica),* Hovey & Co. Catalogue, 1852, p.7, as 'Alba Pleno Simples'. No description. Originated in USA. (Believed extinct.)

Alba Plena Splendens. *(C.japonica), Catalogo Plantarum Cesarii Regii Horti Modiciam*, 1844. No description. Originated in Italy. (Believed extinct.)

Alba Plena Stellata. Mrs W.E. McArthur, *American Camellia Yearbook,* 1952, p.2244: "The late E.A. McIlhenny of Avery Island, Lousiana who saw this plant, called it 'Alba Plena Stellata' because of the star formation present in its blooms." As this did not prove to be a fixed mutation, the name is reduced to a synonym for **Alba Plena.**

Alba Plenissima. *(C.japonica),* Burdin Maggiore & Co, 1849-1850, *Catalogue General.* No description. Burdin Maggiore & Co. Catalogue, 1856-1857: Large size, pure white flower. Originated in Italy. (Believed extinct.)

Alba Pleno. Loddige's Catalogue, 1804. Orthographic variant for **Alba Plena.**

Alba Pleno Casoretti. Verschaffelt Catalogue, No.50, 1844, p.17. Orthographic error for **Alba Plena di Casoretti.**

Alba Pleno Lacina. Verschaffelt, 1844-1845, Catalogue, p.22. Synonym for **Alba Laccina.**

Alba Pleno Simplex. Hovey & Co. Catalogue, 1852. Orthographic error for **Alba Plena Simplex.**

Alba Prima. La Escuela di agricultura di Pontevedra Catalogue, 1882. Abbreviation for 'Alba Prima di Casoretti', synonym for **Alba Plena di Casoretti.**

Alba Prima Casoretti. André, 1864, *Plantes de terre de Bruyères.* Orthographic error for **Alba Plena di Casoretti.**

Alba Prima di Cassoretti. Louis Leroy, 1893, Catalogue, p.99. Orthographic error for **Alba Plena di Casoretti.**

Alba Primavera. Pioneer Camellia News, Sept.1984. Synonym for **Primavera.**

Alba Queen. *(C.japonica),* Thompson, 1950. *American Camellia Yearbook*, p.144: This variety is a large size, fluffy, loose, incomplete double white. It is a cross between **Gauntlettii** as 'Lotus' and **Julia Drayton** as 'Mathotiana' made by Barney Goletto, Milwaukie, Oregon. USA. The foliage is similar to **Julia Drayton.**

Alba-Rosa Virginalis. Paillet, In Lemaire, 1844, p.146. Orthographic error for 'Alba Rosea Virginalis', synonym for **Miniata Striata.**

Alba Rosea Perfecta. .Verschaffelt Catalogue, 1847-1848, p.53. Synonym for **Rosea Perfecta.**

Alba Rosea Punctatissima. Charles Vuylsteke, 1877, Catalogue, p.9. Synonym for **Alba Roseo Punctata.**

Alba Rosea Virginalis. Berlèse, 1840, *Monographie:*. ed.2, p.199, 200, 235. Berlèse received this without a name and called it 'Alba Rosea Virginalis'. However in his 1845 *Monographie* he says he saw it at the Ghent Exhibition of 1844 as **Miniata Striata.** It was listed by most nurseries of the time as **Miniata Striata,** but all later than 1840. However it is a seedling originated by Lows Nursery, London and the originator's name has priority.

Alba Roseo Punctata. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847: White, lined and dotted delicate rose. Orthographic error: 'Alba Rosea Punctatissima'. Originated in Italy by Burnier & Grilli.

Alba Rotundifolia. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.53. No description. Originated in Italy. (Believed etinct).

Alba Rubens. *(C.japonica),* SCCS., 1954, *The Camellia Review.* vol.l6. No description. Originated in USA.

Alba (Sasanqua). Sweet, 1830, *Hortus Britannicus,* p.61 as Alba (sesanqua)'. Synonym for **Lady Bank's.**

Alba Semiduplex. *(C.japonica),* Chandler & Booth, 1831, *Illustrations and Descriptions of Plants which compose the Natural order of Camelleae*, pl.33: Acording to J. Reeves esq., dated Canton, 1826, that Mr Beale was the first to send a plant of this variety to England. The flower consists of 8 or 9 roundish petals, ranged in 2-3 rows, and averaging more than 10 cm across. They are, at first, bell-shaped but gradually open out nearly flat; as well as the column of stamens which is short and divided into separate parcels. The largest petals are round and about 4 cm in diameter, the others are roundish-oblong and a little smaller. Synonym: 'Semi-double White'.

Alba Seminifera. *(C.japonica),* Tagliabue, 1840, *Catalogo Camelliae.* No description. Originated in Italy. (Believed extinct.)

Alba Semiplena. Baumann & Baumann, 1829, *Collection de Camellias élevés à Bollwieler* #14 as 'Camellia Sesanqua Semi Plena'. Synonym for **Lady Bank's** .

Alba Simpla. Nangles Nurseries Ltd Catalogue, 1975-1976, p.8. Orthographic error for 'Alba Simplex', as an illegal synonym for **Yukimiguruma.**

Alba Simple. Jacob-Makoy, 1828, Catalogue, p.5. Orthographic error for **Alba Simplex.**

Alba Simplex. *(C.japonica),* Anonymous, 1816-1817, *Aligemeinen Deutchen Garten Magazine*- as 'Alba Simpl.': A seedling of **Variegata,** introduced in 1813 by Rollison of the Tooting Nursery. It is a single, white with occasional pink flecks, 6-7 petals, broadly ovate, apex refuse, 4.5 cm x 4 cm log. Stamens in a central cluster,conjoined for the lower third of length. Flower about 8.5 cm across. Foliage dark green, glossy, elliptic, long acuminate to broadly elliptic acuminate, margins widely and shallowly serrate, 12 cm long x 6.5 cm wide. It was first illustrated in *Monograph on the Genus Camellia* by Samuel Curtis, 1820, p.1. Also figured in pl.17, Chandler & Booth, *Illustrations and Descriptions...* as 'flore albo'; Baumann & Baumann, 1828, pl.2 as 'flore simplici albo'. See colour pl., p.112, Fairweather, 1979, *Rhododendrons & Camellias.* Orthographic errors and variants: 'Alba Simplici', 'Alba Flore Simplici', 'Flore Simplici Albo', 'Simplex Alba', 'Alba Simplice', 'Alba Simple' and 'Alba'. Synonyms: 'Snow Goose', 'Flore Alba', 'Single white', "Alba Simple'. Erronously used as synonym for **Lady Bank's** and **Yukimiguruma.**

Alba Simplex. Courtois, 1833, *Magazin d'Horticulture,* p.317 under *C.sasanqua.* Synonym for **Lady Bank's.**

Alba Simplex. Treseders Nurseries (Truro) Ltd Camellia List, 1962-1963, p.2. Erroneous synonym for **Yukimiguruma.**

Alba Simplex Elegans. *(C.japonica),* Hogg, 1838, *Magazine of Horticulture,* 4:155: Cupped petals. Originated by Floy, New York, USA. (Believed extinct.)

Alba Venusta. *(C.japonica)*, van Houtte Catalogue, 1839-1840, 1:1: White with dawn reflections and dotted with carmine. Very Large flower. Originated in Italy.

Alba Virginalis. Berlèse, 1843, *Iconographie*, pl.242. Synonym for **Rosea Virginalis.**

Alba (Wada). *(C.japonica)*, Wada, 1941, Catalogue, invalidly as 'Alba'. A white flowering form of the wild *C.japonica.* Originated in Japan.

Albade Casoretti. *Revue Horticole.* 1850. Orthographic error for **Alba Plena di Casoretti.**

Albani. *(C.japonica)*, Luzzatti Catalogue, 1853. No description. Verschaffelt, 1860, *Nouvelle Iconographie*, Book III, pl.IV: The blooms are of the largest size, 11-12 cm across. A pink colour, almost red at the centre, each petals being a deeper tint at the base and striped and

veined the same shade. The petals are rounded and slightly bilobate at the apex, all imbricated with the utmost regularity. Orthographic error: 'Abani'. Originated in Italy.

Albatross. SCCS., 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for **Yoheihaku.**

Albear. *(C.japonica),* Sociedad Española de la Camelia, *Camelia*, July 2006, p.41 with colour photo; 8 cm diameter, pure white formal double, petals imbricated. About 80 petals, margins round and entire, concave, mainly the inner petals. Dark glossy green leaves, 10 cm x 6.5 cm, ovate, acuminate, serrate. Flowers mid-season to late. Compact shrub, slow, upright, rounded growth. Origin probably Galicia, Spain, acquired in 1986 by Maciñeira. Diputacion Provincial de Pontevedra, Register No. 257.

Albert Cassoreti. Law Somner & Co. Catalogue, 1884, p.45. Orthographic error for **Alba Plena di Casoretti.**

Albert Horne. *(C.japonica), American Camellia Yearbook*, 1966, p.82, Reg. No.832: A 7 year old chance seedling that first bloomed 1963; originated by Albert and Alice Horne, Moncks Corner, South Carolina, USA. The semi-double flower is 13 cm across x 7 cm deep. The colour is light pink with deep, rose-pink stripe. Anthers are yellow and filaments white. There are 13-15 full form petals intermixed with 5-7 petaloids. Blooms mid-season. Plant growth is upright and dense, medium in rate with dark green leaves averaging 12 cm long x 6 cm wide.

Albert Raymond. *(C.sasanqua).* C.Aust., *Camellia News*, Autumn 2006, No.160, p.12, colour photo p.19, Reg. No. 563. Originated by Albert Raymond and Gwenda Norris, Capalaba, Qld, Australia. A chance seedling that first flowered in 1993. A semi-double, deep pink flower of 16 petals and a few petaloids, with purple tonings on the edges of the petals, 10 cm across x 2.5 cm deep. Flowers freely early to mid-season on an upright, spreading plant. Leaves dark green, glossy, elongated, fine serrations, 5 cm x 2 cm. Flowers shatter. Good texture and unusual depth of colour.

Albert Victor. *(C.japonica),* Law Somner & Co., Catalogue, 1884, p.45. Medium size, pink semi-double with petaloids. Originated in Australia. (Believed extinct.)

Alberta Long. *(C.japonica), American Camellia Yearbook*, 1968, p.128, Reg. No.973A: A 15 year old chance seedling of **Imura;** first bloomed 1956; originated by Alberta S. Long, Mt Pleasant, South Carolina, USA. The plant growth is spreading, dense and rapid in rate. The dark green leaves average 10 cm long x 3.8 cm wide. The semi-double flowers, similar to **Frizzle White,** are 11-12.5 cm across and have 15 petals and 1 or 2 petaloids. The colour is white with flecks of rose and yellow anthers. Heavy satiny texture, profuse blooming, mid-season to late.

Albert (Prins). de Jonghe, 1851, *Beknopte Handleiding tot het Kweeken von Camellias,* p.107. Synonym for **Albertii.**

Alberta Marie. *(C.japonica),* SCCS., 1966, *Camellia Nomenclature*, p.16: White centre petals and blush pink outer petals. Large semi-double; medium growth. Mid-season blooming. Originated by Dr & Mrs G.R. Johnson, Carthage, Texas, USA. Reg No.1581, *American Camellia Yearbook:, 1980, p.159.*

Albertii. *(C.japonica),* Paxton, 1841, *Magazine of Botany*, vol.8, p.54, with colour pl. Introduced by Chandler of Vauxhall Nursery: Flowers perfectly double, outer petals roundish, emarginate, lying somewhat flat, central ones small, partially erect, of various forms, of a whitish or light blush coloured ground, irregularly striped or blotched longitudinally with reddish pink. This sort, sent to Mssrs Chandler of Vauxhall from China, is much esteemed. The flowers are very double, filled up in the centre and containing a combination of colours. It was received a few years ago and first bloomed 1839. The name here adopted was applied by Chandler in honour of HRH Prince Albert. Verschaffelt, 1848, Nouvelle Iconographie, Book I, pl.III as 'Prince Albert'. Although the name 'Prince Albert' was published the same year (1841) by van Houtte; the name 'Albertii' given to it by its owner has priority. Orthographic variants:

'Princeps Albertus', 'Printz Albert', 'Principe Alberto', 'Prince Albert Variegated', 'Prince Albertii', 'Souvenir du Prince Albert', 'Charles Albert', 'Albertus', 'Alberto', 'Prins Albert'. See also colour pl. 'Harrison, 1843, *The Floricultural Cabinet*, vol.II, p.49. Synonyms: 'Concordia', 'Beautiful', 'Ellen McKinsey', 'Gomez', 'Normandy', 'Prince Albert', 'Albert (Prins)'. Sport: **Red Prince Albert.**

Albertina. *(C.japonica),* Trillon, Le Mans Nursery Catalogue, 1843, p.3. No description. Oudin, Lisieux Nursery Catalogue, 1844, p.9: From Boursault. Imbricated, very beautiful pink. Originated in France. (Believed extinct.)

Albertina Ferraz. *(C.japonica),* José Marques Loureiro, 1872-1873, Catalogue, No.9, p.47: New. Rose form, coloured a vivid pink with splashes of white. Originated in Portugal.

Albertina Giusfredi. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, medium size semi-double, flesh pink with orange shades (RHS.CC.56B). A seedling of **Alba Simplex** x 'Rosa Simplex' **(Aitonia),** First flowered in 1975. Originated by Dott. Guido Cattolica, Livorno, Italy.

Alberto. Roda, Fratelli, Catalogue, 1885. Orthographic error for **Albertii.**

Alberto Allen. *(C.japonica),* José Marques Loureiro Catalogue No.1, 1865, p.32, & No.9, 1872-1873, p.40: Vivid scarlet, formal double with small white ticks at the apex of each petal. Originated in Portugal.

Albo Plena Fimbriata. Johson, 1847, *Dictionary of Modern Gardening,* p.114. Synonym for **Fimbriata.**

Albo Pleno. Seidel, 1815, *Verzeichnis von Pflanzen.* Orthographic variant for **Alba Plena.**

Albo Rosea. Shibata, 1949, as 'Alba-rosea', Makino. Synonym for **Shôwa-wabisuke** as **Hatsukari.**

Albo Rosea. (*C.sasanqua*), Treseder's Nurseries (Truro) Ltd Catalogue, No.12, 1972, p.23: Single white, tipped pink. Very dainty grower. This name being in Latin is illegal according to the Horticultural Code. It is also invalid as the name has previously been used as a synonym for **Shôwa-wabisuke.**

Albo Semipleno. Hovey & Co. Catalogue.1834-1835, p.26. Orthographic variant for **Alba Semiplena.**

Albo Simplici. William Prince Catalogue, 1822: Seidel 1815, *Verzeichnis von Pflanzen:* Orthographic variant for **Alba Simplex.**

Albo Simplico. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.6. Orthographic error for **Alba Simplex.**

Albo-Viridis. Colla, 1843, *Camelliografia,* p.121, with 'Belle Irene' as a synonym, but this is itself a synonym for **Sulcata.**

Alburtus. *(C.japonica), The Gardeners' Chronicle,* No.8, Feb.25th, 1843, p.159: Langdon Nursery Catalogue, 1890-1891: Rose striped with white, lilac and pink. Orthographic variant for **Albertii.**

Albus. *(C.japonica),* Fruitland Nursery Catalogue, 1947-1948, p.27: Large size, semi-double, white with yellow stamens. Originated in USA.

Alcamene. Maund Catalogue, 1878, pp.209, 210, pl.260. Orthographic error for 'Alcmene', synonym for **Picta.**

Alcina. *Catalogo Plantarum Cesarii Regii horti Modiciam,* 1844; van Houtte Catalogue, 1844-1845, 18:7. No description. van Houtte Catalogue, 1866-1867, 116:24 as a synonym for 'Saccoi Vera' as 'Sacco'. de Jonghe, 1851, Beknopte Handleiding tot het Kweeken von Camellias, p.107, as synonym for **Alcinia Rosea.** Orthographic errors: 'Alunia', 'Aluna' , 'Aluna Vera'.

Alcina d'Italia. Seidel, 1870, Pflanzen Catalog, p.5. Synonym for **Alcinia Rosea.**

Alcina Rose. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.6. Orthographic error for **Alcinia Rosea.**

Alcina Rosea. van Houtte Catalogue,1849-1850, 38:51. Orthographic error for **Alcinia Rosea.**

Alcinia. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.6. Synonym for **Sacco Vera.**

Alcinia Rosea. *(C.japonica),* Spae, 1847, *Annales de Gand* 3:177, pl.131; Verschaffelt, 1848, *Nouvelle Iconographie*, Book IV, pl.l: A vigorous shrub of rapid growth; the branches are a strong dark brown, the leaves are oblong, pointed, serrated and veined a deeper green. The buds are large, rounded and green; the blossom anemone form, with numerous, imbricated petals of clear pink with a few white stripes. Sometimes known as 'Alunia Rosea', an error made when copying from the label. Synonym: 'Alcina d'Italia'. van Houtte lists it as a synonym for **Saccoi Nova.** Originated in Italy. Orthographic error: 'Alcina Rose'.

Alcmene. Rev. Herbert, 1837, *Amaryllidaceae & Supplement*, p.368. Orthographic errors 'Alcamene', 'Alcemene'. Synonym for **Picta.**

Alcione o Gigante. *(C.japonica),* José Marques Loureiro Catalogue No.1, 1865, p.36, & No.9, 1872-73, p.40; Large size, Regular rose form, vivid pink streaked with white. Orthographic variant 'Alcione, o Gigante'. Orthographic error 'Alcione'. Originated in Portugal.

Alcyone Ostberg. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2005, p.28 and colour photo p.29, Reg. No. 2658. A chance seedling that first flowered in 1995. Originated and propagated by C.M. and Lillian Gordy, Ocala, Fla., USA. The 12.7 cm diameter, semi-double flower is deep pink with deeper lavender pink centre, semi-double to loose peony in form, with soft gold anthers and creamy filaments. *American Camellia Yearbook,* 2005, p.39 and colour photo p,c3. Plant is stated to be upright and open, with slow, dense growth. Dark green leaves are 8.2 cm x 4.5 cm.

Alda Boll. *(C.japonica),* ACS., 1989, *The Camellia Journal*, vol.44, No.3, p.9, Reg. No.2159: A large size, deep rose-pink peony form *C.japonica* chance seedling that blooms mid-season. Originated by Alda K. Boll, Jacksonville, USA. *American Camellia Yearbook,* 1980, p.118: This 10 year old seedling first bloomed in 1985. Average flower size is 12.5 cm across x 6 cm deep with 40 petals, 45 petaloids, yellow anthers, white filaments. Some petaloids are pink with white variegation. Plant growth is upright, dense and medium in rate, with dark green leaves, 12.5 cm long x 6 cm wide.

Aldebaran. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.54 with colour photo; Medium size semi-double, anemone form, white. Stamens intermingled with petals and petaloids. A seedling of **Alba Simplex** x 'Giorgio Rubra'. Originated by Dott. Guido Cattolica, Livorno, Italy.

Aldobrandina Incognita. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.7. No description. Originated in Italy. (Believed extinct.)

Aldoravesiana. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.7. No description. Originated in Italy. (Believed extinct.)

Alean Miller. *(C.japonica),* McCaskill Gardens Catalogue, 1958: Light pink shading to deep pink at edge. Medium size, semi-double. Vigorous, compact, upright growth. Blooms mid-season. Originated in the McCaskill Gardens, Pasadena, California, USA.

Aleay. *(C.japonica),* Charles Vuylsteke, 1875-1876, Price List, p.14. No description. Originated in Belgium. (Believed extinct).

Alec Allan. *(C.sasanqua),* U.S. National Arboretum Sasanqua List, 1959. No description. Originated in USA.

Aleen. Fruitland Nursery Catalogue, 1946-1947, p.27. A name applied to a predominantly white form of 'Donckelaeri' (**Masayoshi**). However, not being stable it is regarded as a synonym and not a separate form.

Alegria de Albar. *(C.japonica). List of Portuguese Camellias* 2010, Guedes & Oliveira, pp. 8 & 48; Formal double, light pink, paler in the centre. Perfect imbrication. Originated in 2008 by Mr Alberto Barbosa, Portugal, propagated by Albar Nurseries.

Alein. *(C.japonica),* Yasunori Kanda, 1997, Internet site www.fujitsu.co.jp/people/kanda: Hose-in-hose semi-double of 15-17 petals. Pink. Outer petals large and rounded, inner keeled. Leaves lanceolate with long acuminate apices; margins finely serrulate. Deep green. Origin unknown.

Alejandro Mansilla. *(C.japonica), International Camellia Journal* 2005, p.127 with colour photo; Reg. No. 48. Open pollinated seedling of unknown parentage. Originated by Leonor Magariños, Pontevedra, Spain. First flowered in 2003. An upright, open shrub with weeping habit and rapid growth rate. Flowers mid-season. A cup-shaped single, deep pink to rose red, 10 cm diameter x 10 cm deep, with significant white shading on the edges and rear of nearly all petals. Gold stamens. Flowers fall whole.

Alena. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* A dark red, medium size, anemone form. Originated in Australia.

Alene Hood. *(C.japonica), American Camellia Yearbook*, 1974, vol.II, p.229, Reg. No.1327: A 15 year old chance seedling that first bloomed in 1958. Originated by M.D. Hood, Texarkana, Arkansas, USA. Plant growth is upright, average and medium in rate, with light green leaves, 7.5 cm log x 5 cm wide. The anemone form bloom is pink, with deeper pink stripes and spashes; 12 petals, 45 petaloids and yellow tipped stamens. Average size, 10-12.5 cm across x 3.5 cm deep. Smooth texture and heavy buds. Blooms mid-season to late.

Alessandra Anelli. *(C.japonica), International Camellia Journal*, No.19, p.123. Reg. No.14, 1987: Originated by Dr. Antonio Sevesi, Milan, Italy. A rose form double, opening semi-double with 26 rose pink (HCC26B) petals standing apart and a central column of stamens, with white filaments and yellow anthers, some light streaking. Flower size 11cm wide x 5.5cm deep. Blooms mid-season. Leaves mid-green, glossy, flat, oval, moderately serrate, apex acuminate, 10cm x 5cm. Plant growth slow, fastigate.

Alessandrina. *(C.japonica),* Auguste van Geert Catalogue, 1845, p.1. No description. Burnier & Grilli Catalogue, 1846-1847: Large size, rose form double flower, cherry-red with a little dark violet. A Burnier & Grilli introduction. Originated in Italy.

Alessandro. *(C.japonica),* van Houtte Catalogue, 1841, 7:1: Large size, double red shading to violet. Orthographic variants: 'Alexandra', 'Alexandro', 'Alessandro 18. Originated in Italy.

Alessandro 18. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.7. Orthographic variant for **Alessandro.**

Alessandro Borrini. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias*, 2005, p.55 with colour photo; Medium size peony form red (RHS.CC.51A). A selfed seedling of 'Rubra Simplex' **(Rubra)**, first flowered in 1999. Originated by Dott. Guido Cattolica, Livorno, Italy.

Alessandro Botti. *(C.japonica),* Stefano Pagliai Catalogue, 1867, p.67: Splendid pink, streaked and marbled with metallic white; imbricated. Gelli & Figlio Catalogue, 1871-1872: Splendid rose colour, imbricated and striped with metallic white. Originated in Italy by Botti.

Alessandro Carmine. *(C.japonica),* Ghisleni, Pier Luigi, 1982. *Le Camelie*, fig.17, p.41: Medium to large size, red, open, informal double, with large outer petals and a centre of some small, erect, irregular and twisted petals, intermixed with yellow anthered stamens. Leaves obovate or elliptic, apices tapering acuminate, margins serrulate, slightly yellowish mid-green. Originated by M. Carmine, Cannero Riviera, Italy about 1970. Chinese synonym 'Kahong'.

Alessandro Il Grande. *(C.japonica),* van Houtte Catalogue, 1841, 7:1. No description. van Houtte Catalogue,1842, 19:7: Well imbricated, pink coloured, with a white stripe down the centre of each petal. Fratelli Rovelli Catalogue, 1852, p.11: Milano. Very large size, imbricated,

beautiful red. Orthographic variants: ‘Alexandre-le-Grande’, ‘Alexandre II’, ‘Alexandro il Grande’, ‘Alessandre le Grand’. Originated in Italy.

Alessandro Licini. *(C.japonica)*, Ambroise Verschaffelt, 1852-1853, Catalogue, p.18. No description: Franchetti, 1855, *Collezione di Camelie:* Cultivated in the garden of Cesare Franchetti, Florence, Italy, Dark rose-red with petals having stripes of white, imbricated.

Alessandro Manzoni. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.7. Synonym for **Manzoni d’Italie.**

Alessandro Rossi. *(C.japonica)*, Linden Catalogue, 1875: Large size, formal double, colour milk white, striped more or less broadly with brilliant carmine-red. Originated in Italy.

Alessandro Volta. *(C.japonica)*, Franchetti, 1855, *Collezione di Camelie:* Medium size flower, imbricated, brilliant red, spotted with white, closely imbricated with small petals. Orthographic variant: ‘Alexandre Volta’. Originated by Negri, Milan, Italy.

Alex Blackadder. *(C.japonica)*, Trehane Camellia Nursery Catalogue, 1972-1973: A seedling of the Japanese cultivar **Suibijin** raised by Professor Waterhouse, Gordon, NSW, Australia. Semidouble to open peony form, 11 cm across, claret rose colour. Blooms mid-season. Synonym: ‘Alexander Blackadder’.

Alex Early. *(C.japonica), Camellias*, Y.C. Shen, 2009, p.92 with colour photo; Pink formal double with incurving petals prominently notched, diameter about 10 cm. Leaves elliptic, apex acuminate. Vigorous upright growth with spreading branches..

Alex Hunter. Andersons Nursery Catalogue.1958. Abbreviation for **Alexander Hunter.**

Alex Nowland. Oregon Camellia Society Bulletin, 1947. Abbreviation for **Alexander Nowlin.**

Alexander Black. *(C.japonica)*, Taylor & Sangster Nursery Catalogue, 1889: Dark crimson, medium size, formal double. Upright, compact growth. Late flowering. Black & white photo, p.4, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III. Originated by Taylor & Sangster, Victoria, Australia. Chinese synonym ‘Heiyali’.

Alexander Blackadder. Fairlight Camellia Nursery Catalogue, 1987. Orthographic variant for **Alex Blackadder.**

Alexander Hunter. *(C.japonica)*, Hazlewood Nursery Catalogue, 1941: Raised at Camellia Grove, Ashfield, NSW, Australia, by Alexander Hunter and transplanted to the garden of George Linton, Somersby, NSW. A single to semi-double, crimson with a cluster of golden stamens. Has occasional petaloids. See colour photo, p.69, Macoboy, 1981, *The Colour Dictionary of Camellias.* Abbreviation: ‘Alex Hunter’.

Alexander Nowland. Sharp, 1948, *Camellias Illustrated*, p.142, 136. Orthographic error for **Alexander Nowlin.**

Alexander Nowlin. *(C.japonica)*, Youtz Catalogue, 1935: Red spotted white. Medium to large size, formal double. Medium, compact, upright growth. Blooms mid-season to late. Originated by Youtz, California, USA. See: Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.II, p.44, illustration. Orthographic erors: ‘Alex Nowland’, ‘Alexander Nowland’.

Alexandra. van Houtte Catalogue, 1851-1852. Orthographic variant for **Alessandra.**

Alexandra Rose. *(C.rosiflora x C.lutchuensis).* ACRS, *Camellia News*, No.123, 1992, p.5, Reg. No.412: Originated by Alice Spragg, Sutherland, NSW, No.2232. A miniature, five petalled single flower, deep pink to white, 6 cm across. Variable in colour, some petals pink, others white, sometimes shading from deep pink to pink. Leaves light green, lanceolate, 4.5 cm long x 2.5 cm wide. Flowers mid-season to late on a spreading, open growing bush. A very slow, low-growing plant, suitable for rockeries.

A single pink, with broad, overlapping petals, 11 cm wide x 4 cm deep. Early blooming. Plant habit bushy, medium growing. Leaves elliptical, glossy, mid-green, flat; apex acute, serrulate, 4 cm x 2cm. Higo-like filaments.

Alice Cochran. *(C.japonica)*, *American Camellia Yearbook*, 1963, p.213, Reg. No.628: An 8 year old chance seedling that first bloomed 1958. Originated by Mrs C.T. Cochran, Summerville, South Carolina, USA. The plant growth is upright, dense and rapid with dark green leaves averaging 9.5 cm long x 4.5 cm wide. The semi-double flowers, 12 cm across x 5 cm deep, are pure white with white filaments and yellow anthers and have 15 petals. Blooms are considered cold resistant.

Alice Collins. *(C.reticulata)*, *American Camellia Yearbook*, 1980, p.159, Reg. No.1603: A very large, deep rose to fuchsia, semi-double to peony form *C.reticulata* (**Buddha** x 'Tali Queen'), mid-season to late flowering. Originated by W.F. Homeyer Jr., Macon, Georgia, USA. The 12 year old seedling first flowered 1974. Average flower size, 15 cm across x 7 cm deep with 11-13 petals, white filaments and anthers. Flower form varies from semi-double to an orchid-like bloom or "rabbit ears", Slightly fragrant. Plant growth is upright, rapid and open with light green leaves, 12.5 cm x 5 cm.

Alice Creighton *(C.japonica),* ACS, *The Camellia Journal*, Sept., 2008, p.30 with colour photo, Regn No. 2744; A seedling of **Tama Glitters,** raised by Walter Creighton, Semmes, Ala, USA in 2003. A 9 cm formal double, with rose pink petals bordered white at the edges. Spreading, open, average growth. *American Camellia Yearbook*, 2008, p.104 with colour photo; Light green leaves, 7.5 cm x 3.2 cm.

Alice Cutter. Nantes, *Services des Espaces. Collections*, 4, 1980. Abbreviation for **Alice K. Cutter.**

Alice Evelyn. *(C.hybrid).* C.Aust., *Camellia News,* Autumn 2006, No.160, p.12, colour photo p.19, Reg. No. 567. Originated by Marjorie Baker, Macleod, Vic, Australia. A chance seedling of *C.hybrid* **Snowdrop**, first flowered in 1992. The miniature, single cup-shaped flower has 6 petals and is white in the centre, shading to pale pink at the petal edges, 4 cm across x 1.5 cm deep. Flowers mid-season to late. on a dwarf, dense slow growing plant. Leaves dark green, keeled, matt, oblong, 6 cm x 3 cm. Flowers along the stem. Stamens columnar. Flowers shed whole.

Alice Gaily. *(C.japonica)*, SCCS., 1950, *The Camellia. Its Culture and Nomenclature*, p.22: White, large peony form. Vigorous, compact growth. ACS., Newsletter, 1949, vol.4, No.3, Reg. No.3: A 6 year old seedling of the 'Queen of Hearts', that first flowered 1946. Originated by Stanley W. Miller, El Cajon, California, USA. The plant is of compact growth with dense, medium green foliage. Buds are round and full. The incomplete double flowers, with large petaloids, are white with yellow stamens. Blooms early to mid-season. The slightly fragrant flowers are 10-12.5 cm across x 5 cm deep with 14-17 petals. The large petals are wavy with petaloids twisted and fluted amongst the stamens.

Alice Horne. *(C.japonica), American Camellia Yearbook*, 1966, p.83, Reg. No.892: A 7 year old chance seedling that first bloomed 1963. Originated by Albert and Alice Horn, Moncks Corner, South Carolina, USA. Plant growth is upright and open. The dark green leaves average 8 cm x 4 cm. The semi-double flowers, similar to 'Donckelaeri' (**Masayoshi**) are 13 cm across x 8 cm deep with 18 petals and 2-5 petaloids. Colour is deep rose-pink with deeper veins and an undertone of deeper pink stripes. Anthers are yellow and filaments are white, The first 10 petals grow together for half their length, the remaining 8 are upright and folded with stamens intermixed. The petaloids form trumpets or flutes. Cold resistant. Flower mid-season.

Alice K. Cutter. *(C.hybrid),* SCCS., 1974, *Camellia Nomenclature*, p.174: Medium pink, large anemone form. Vigorous, spreading growth. Blooms mid-season. A seedling of *C.japonica* **Mrs Bertha Harms** x *C.hybrid* 'Parks 69-1' *[C.japonica* **Reg Ragland** x *C.lutchuensis]*, originated by Dr R.K. Cutter, Berkeley, California, USA. Abbreviation: 'Alice Cutter'.

Alice Linwood. Hillcrest Nursery Catalogue, 1958. Orthographic error for **Alice of Linwood.**

Alice Lockwood. *(C.japonica),* Gerbing's Azalea Garden Catalogue, 1941-1942: (Middleton No.34), A 7.5 cm across, rose-pink with a white margin on each petal. The rounded foliage is light green. The blooms resemble the 'Albert and Elisabeth' azaleas and the plant is noted for its tall growth. Blooms early. Originated at the Middleton Gardens, South Carolina, USA.

Alice McCoughtry. *(C.reticulata),* ACRS., *Camellia News*, No.83, Dec.1982, p.22, Reg. No.291: Originated by T.E. Pierson, Hurstville, NSW, Australia. Parents *C.reticulata*, **Buddha** x 'Cornelian' (**Damanao**). Seed planted 1973, flowered 1980. The deep coral rose, 15 cm across x 8 cm deep, full peony form flower has good quality petals. Blooms mid-season to late.The spreading,open plant has 12 cm x 5 cm leaves, narrow-lanceolate, dark green, medium pointed apex and tapered base with numerous, small serrations.

Alice Maree. *(C.japonica), American Camellia Yearbook*, 1968, p.129, Reg. No.522: A 10 year old chance seedling that first flowered 1963. Originated by Neal Cox, Georgetown, South Carolina, USA. Plant growth habit is upright and average, rapid in rate. Dark green leaves average 9.5 cm x 3.8 cm. The loose, peony form blooms are 12.5 cm across x 7 cm deep. Deep red with golden anthers and white filaments and having 3-4 rows of broad, wavy petals and a rosebud centre which opens up to show a few stamens interspersed with petaloids. Blooms mid-season. Sport: **Alice Maree Variegated.**

Alice Maree Variegated. *(C.japonica),* Mark Cannon, ACS., 1969, *The Camellia Journal*, vol.24, No.4, as 'Alice Maree Var.': A virus variegated form of **Alice Maree** - Deep red blotched with white. Originated in USA.

Alice Maud. *(C.williamsii). New Zealand Camellia Bulletin,* March 1996, Issue No.123, vol.XIX, No.4, p.47, Reg. No.372: Originated by B.E. Simmons, Blenheim, New Zealand. A pink, (RHS.CC 52C-D), peony form flower with 42 petals and 158 petaloids, yellow anthers and creamy filaments. The flower is 8 cm across x 3 cm deep, carried on a plant of upright, medium growth rate. The leaves are dark green, 9 cm long x 4.5 cm wide. Flowering period is late to very late. A chance seedling of *C.x williamsii* **Elegant Beauty.**

Alice Morgan. *(C.japonica),* ACRS., 1987, *Camellia News*, No.103, p.22, Reg. No.355: Originated by Mrs A. Morgan, St, Ives, NSW., Australia. A chance seedling that first flowered 1985. A white **Elegans** form flower, vividly striped and marked carmine red (MBH,11B8). The bloom, 12.5 cm across x 6 cm deep, flowers freely on an upright, rapidly growing plant over a long period. Leaves glossy green, elongated, flat form, finely serrate, acuminate, 11.5 cm long x 4.5 cm wide.

Alice Morrison. *(C.japonica),* SCCS., 1956, *The Camellia. Its Culture and Nomenclature*, p.24: Light shell pink, medium size, semi-double. Vigorous, compact, upright growth. Blooms mid-season. Originated in USA by R.E. Craig, San Gabriel, California.

Alice Munz. *(C.japonica),* SCCS., 1942, *Classification of Camellias*, p.1: White, semidouble, 7.5cm across. Blooms mid-season. SCCS, 1950, *The Camellia, Its Culture and Nomenclature*, p.23: White, medium size, full peony. Vigorous, upright growth. Blooms mid-season. Originated by Dr P.A. Munz, Clairmont, California, USA.

Alice of Linwood. *(C.japonica),* SCCS., 1954, *The Camellia. Its Culture and Nomenclature*, p.25: White, variegated red and pink, medium size, semi-double. Vigorous growth. Flowers mid-season to late. Originated in USA by Allen. Orthographic error: 'Alice of Lynwood'.

Alice of Lynwood. Feray's Fine Flowers Catalogue, 1960. Orthographic error for **Alice of Linwood.**

Alice Parks. *(C.japonica),* ACS, 1993, *American Camellia Yearbook*, p.69, Reg. No.2274: A large white rose form double *C.japonica* chance seedling; blooms mid-season. The 10 year old seedling has 11 cm diameter x 8 cm deep blooms. Plant growth is spreading and medium, with light green leaves 8 cm long x 5 cm wide. Colour photo under the eroneous name 'Alice Parker' on p.71.

Alice Parker. ACS, 1993, *American Camellia Yearbook*, p.71. Erroneous name for **Alice Parks**, given under colour photo.

Alice Slack. SCCS., 1958, *Camellia Nomenclature*, p.14, Synonym for **Blood of China.**

Alice Spragg. *(C.reticulata* hybrid), ACRS., 1977, *Camellia News*, No.66, p,27, Reg. No.195: Originated by Alice Spragg, Sutherland, NSW, Australia. Seed parent *C.x williamsii* **Charles Colbert** x *C.reticulata*, 'Cornelian' (**Damanao**). First flowered 1974. The plant is a dense, dwarf grower, sun hardy and prolific. The 13 cm semi to incomplete double flower is deep pink, shading through to soft pink. Blooms mid-season. Leaves are mid-green, small and lanceolate.

Alice Stokes. *(C.japonica),* Dodd, 1948-1949, Catalogue, p.7: Light pink, medium size, rose form double. Vigorous, upright growth. Blooms mid-season. Originated by T. Dodd, Semmes, Alabama, USA.

Alice Valeria. *(C.japonica), American Camellia Yearbook*, 1959, p.267, Reg. No.375: An 11 year old chance seedling of **Elegans.** Originated by Mrs Guy R. Crosby, Pavo, Georgia, USA, which first flowered 1955. The dark green leaves, 10 cm x 5 cm, are borne on a plant, average in habit and medium rapid in rate of growth. The semi-double, bright red flowers, resemble 'Hikarugenji' in form. The flowers are 12.5 cm across x 5 cm deep, with 25 petals and 3 petaloids with pink veined stamens. Blooms mid-season.

Alice Wood. *(C.japonica),* Nuccio's Nurseries Catalogue, 1960: Bright red, large size, formal double. Vigorous, upright growth. Early to mid-season blooming. Originated by Mrs A. Wood, San Gabriel, California, USA. Chinese synonym 'Aili Mudanwang'.

Alicia. *(C.japonica),* Naudin, 1851, *Revue Horticole*, p.258: Exhibited by Mme Baour of Cauderon, named for her daughter. (Believed extinct.)

Alisa. *(C.reticulata), American Camellia Yearbook*, 1982, p.169, Reg. No.1832: A medium size, salmon pink, semi-double *C.reticulata* chance seedling, mid-season blooming. Originated by David L. Feathers, Lafayette, California, USA. The 6 year old seedling first bloomed 1979. Average flower size is 10 cm across x 6 cm deep with 15 petals. Plant growth is average and medium in rate with light green leaves measuring 12 cm long x 6 cm wide.

Alisha Carter. *(C.japonica), New Zealand Camellia Bulletin*, 1992, Issue No.112, vol.XVII, No.5, p.38, Reg. No.322: Very dark red (RHS.CC.53A) veined black, small to medium size, peony form. An 8 year old seedling with the flowers 7 cm across x 4.5 cm deep, 27 petals, 20 petaloids, yellow anthers and light red filaments. Blooms mid-season to late. Average, open growth. Leaves dark green 7 cm long x 4 cm wide. A seedling of 'Fuyajo' (**Kon-wabisuke**) raised by Trevor Lennard, Te Puke, New Zealand.

Alison Clare. *(C.japonica)*, ACRS., 1968, *Camellia News*, No.32. p.17, Reg. No.92: Originated by Dr J.R. Burstal, Pymble, NSW, Australia from seed of **Edith Linton** in 1956. First flowered 1960. Has a vigorous, upright growth habit. Flowers are semi-double, 12.5 cm across, rose-pink with golden stamens. Blooms mid-season. Leaves glossy, mid-green, larger than parent.

Alison Leigh Woodroof. *(C.japonica)*, Tourje,1955, *American Camellia Yearbook*, p.32: This small, semidouble flowered seedling is being grown by McCaskill Gardens Camellia Nursery and is named for the daughter of William E. Woodroof and Barbara Woodroof, California. The flowers are appealing in the simplicity of the petal arrangement and delicate colouring - pink shading to deeper pink at petal margin. The flowers are borne in such profusion as to suggest a flowering fruit tree. The midseason to late flowering plant is upright and well branched. Originated in USA.

Alison Lennard. *(C.reticulata* hybr.), *New Zealand Camellia Bulletin*, vol.XII, No.7, p.51, Reg. No.178: A seedling raised by Mrs Ida Berg of Whakatane, NZ. The female parent is a *C.saluenensis x* unknown *C.reticulata.* The male parent is *C.reticulata*, 'Crimson Robe', (**Dataohong**). It first flowered 1977. Growth habit is spreading, open and rapid. The light green leaves average 11.5 cm long x 5 cm wide. The loose, peony form flower averages 15 cm across x 5 cm deep with 16 petals. The colour is carmine, RHS Red Group 52B) with cream anthers. Early to mid-season flowering. The edges of the petals darken noticeably as the flower ages.

Alison Sebire. *(C.reticulata)*, ACRS., 1976, *Camellia News*, No.62, p21, Reg. No.183: Originated by Edgar R. Sebire, Wandin North, Victoria, Australia. Seed parent *C.reticulata* 'Willow Wand' (**Liuye Yinhong**). First bloomed 1972. The habit of the plant is dense, upright and vigorous. The mid-green, 10 cm x 6 cm leaves are broad-elliptic with coarse serrate margins. See colour photo p.4, ACRS, 1977, *Camellia News*, No.66.

Alison Spragg. *(C.sasanqua)*, ACRS., 1973, *Camellia News*, No.51, p.37, Reg. No.161: Originated by Alice Spragg, Sutherland, NSW, Australia. A chance seedling that flowered 1970. Upright, attractive, vigorous growth. The magenta-rose (RHS, CC.27/2), semi-double to informal double flowers, have 5 cm long petals, 4 cm wide, with fluted inner petals. Blooms early to late. The 5 cm long x 2 cm wide leaves are obovate-elliptic with acuminate apices and crenate margins. Chinese synonym 'Ailisen'.

Alitonia. *(C.japonica)*, Jenkins, Micah, Nursery Catalogue, 1945-1946: Large size, semi-double, rose-pink. Stamens and a few petaloids mixed in the centre. Medium long, dark green foliage. Loose spreading growth. Blooms mid-season. Originated in USA.

All American. *(C.japonica)*, *American Camellia Yearbook*, 1974, vol.II, p.229, Reg. No.1307: An 8 year old *C.japonica* chance seedling that first bloomed 1970. An open pollinated seedling of **Lindsay Neill,** originated by Ted Alfter, Bakersfield, California, USA. Plant growth is upright, dense and rapid with light green, 8 cm x 5 cm leaves. The peony form, 'Debutante' type bloom, is dark red, marbled white. Average size, 10 cm across by 5 cm deep with 30-40 petals. Blooms midseason. Sport: **All American Variegated.** Chinese synonym 'Quanmeiguo'.

All American Variegated. *(C.japonica)*, *American Camellia Yearbook*, 1978, p.127, Reg. No.1466, as 'All American Var.': A medium size, bright red, marbled white, virus variegated form of **All American.** Flower form, size and plant resemble the parent. Originated by Ted Alfter, Bakersfield, California, USA.

All Out. Wilmot, 1944, *Camellia Variety Classification Report*, 1944, p.5. Synonym for **Sally Huested.**

Alla E. Hearn. Index, 1948, *American Camellia Yearbook*, p.222. Orthographic error for **Ella E. Hearn.**

Allan Raper. (*C.reticulata* hybrid). ACRS, *Camellia News,* 1998, No.147, p.13, colour photo p.2, Reg. No.512. Originated by Dr R.M. Withers, Donvale, Victoria, Australia. A cross between *C.reticulata* hybrid **Suzanne Withers** as seed parent x *C.reticulata* hybrid **Arcadia.** First flowered 1994. A pale pink (RHS.CC.55C) informal double flower of 16 petals and petaloids, fading to white at the basal third of the petals, 16 cm diameter x 6 cm deep. Flowers early to mid-season on an upright, open, rapid-growing plant. Leaves dark green, glossy, keeled and slightly curled, elliptic, serrate margins, acuminate apex, 13 cm long x 6 cm wide. Petals folded and fluted. Orthographic error for **Alan Raper**.

Allan Walton. *(C.reticulata),* ACRS, 1984, *Camellia News*, No.91, p.22, Reg. No.318: Originated by T.E. Pierson, Hurstville, NSW, Australia. A chance seedling from *C.reticulata* **Samantha.** Flowers formal double, 15 cm across by 6 cm deep, rose coloured with red veining, similar to **Grand Sultan.** Blooms mid-season to late. Plant upright, open and vigorous with dark green, 15 cm by 5.5 cm leaves with prominent venation and numerous small serrations.

Allure. *(C.hybrid). Camellia Nomenclature* 2006, p.169. A medium size, pink variegated white, semi-double to peony form. **Reg Ragland** x *C.lutchuensis*. Vigorous, spreading growth. Fragrant. Introduced 1998 by W & M.A. Ray, Fresno, Calif., USA.

Alunti Superba. Cels, Paris Nursery Catalogue, 1836-1837, p.8. Orthographic error for **Allnuttii Superba.**

Alma. *(C.japonica),* Anonymous, 1869, *Horticultural Magazine & Gardeners and Australian Amateurs Calendar:* Dark red. Medium size, anemone form. Medium, compact growth. Blooms mid-season. Originated in Australia.

Alma Armstrong. (*C.japonica), American Camellia Yearbook*, 1962-1963, p.213, Reg. No.612: A 10 year old chance seedling that first bloomed 1958. Originated by E.A. Judice, New Orleans, Louisiana, USA. Dense, average, slow growth with 10 cm x 3.8 cm, dark green leaves. The semi-double flower, similar to **Hikarugenji,** is 11 cm across x 5 cm deep with 20 petals, 30 petaloids and yellow stamens. Early blooming.

Alma Halecki. *(C.japonica), American Camellia Yearbook,* 1977, p.207, Reg. No.1424: A large size, white, anemone form *C.japonica.* A 10 year old chance seedling that first bloomed 1972. Originated by Joseph R. Halecki, Wilmington, North Carolina, USA. The bloom has 20 petals, 30 petaloids, yellow centre and white filaments. Average size is 11 cm across x 5 cm deep. An abundance of blooms, mid-season to late flowering. Cold hardy. Plant growth is compact, upright and rapid with dark green leaves, 10.2 cm x 5 cm.

Alma Wood. *(C.reticulata),* Piet, SCCS., 1982, *The Camellia Review,* vol.44, No.2, p.12, pl. No.1: 'Crimson Robe' (**Dataohong**) x **Nuccio's Ruby,** to be introduced and named 'Alma Wood'. The best of our crosses using 'Nuccio's Ruby' pollen, back crossed to 'Crimson Robe'. It is a 13-15 cm semi-double flower with vivid red ruby colour. Vigorous, compact, upright growth. Midseason flowering. Originated by Meyer Piet, Arcadia, California, USA.

Almeidia. *(C.japonica), Jardin Portuense*, April 1844, 7:103; Commonly known as 'Anagoa de Venus do Pe. José d.Almeida'. Obtained by this priest by seedling. White, pink stripes, very regular flowers. Originated in Porto, Portugal.

Althaeiflora. *(C.japonica)*, Chandler & Buckingham, 1825, *Camellia Britannica*, p.11, pl.4 as 'Althea Flora': A seedling of **Anemoniflora,** raised in 1819 by Chandler of Vauxhall Nursery, England and illustrated and described in *Camellia Britannica* by Chandler and Buckingham in 1825 and 1831. A peony form, carmine flower with deeper centre and venation, 10-11 cm across, of 12-18 outer petals in 2 whorls, obovate, 5 cm x 4 cm, rounded, deeply notched at the apex. Inner petals and petaloids, oblong, smaller and forming an irregular, elevated centre. Foliage, dark to mid-green, elliptic,10 cm x 5 cm, sharply serrate, apex long acuminate, recurved. Strong, upright growth, forming an open branched, spreading bush. See also Baumann & Baumann, 1835. *Collection de Camellias élevés à Bollwieler.* Received the RHS Award of Merit in 1950 and an Award of Garden Merit in 1953. Synonyms: 'Childsii', 'Rosette' end 'Thunbergia'; erroneously, 'Blackburniana' and 'Anemoniflora'. Orthographic errors: 'Althaeaeflora', 'Althaeaflora', 'Althaeflora', 'Altaeiflora', 'Altheaflora', 'Althae Flora', 'Althaiflora', 'Altheiflora', 'Altheaeflora', Althoeflora', 'Altheflora', 'Althaeoeflora', 'Althiiflora', 'Althoeiflora', 'Altoaeflora'. Chinese synonym 'Aerda'.

Althaeiflora Alba. *(C.japonica)*, Verschaffelt, 1847-1848, p.53. No description. Verschaffelt, 1850, *Nouvelle Iconographie*, Book IV, pl.III: Blossoms which look like a double hollyhock. The petals at the circumference are very large, biserrate, spread out, suddenly becoming consistently smaller and gathered to form a full-bodied, compact heart. The entire blossom is of pure white with a yellow tinge at the base of the central petals. Received from Joseph Baumann of Ghent, Belgium. Orthographic variants: 'Althae Flora Alba', 'Altheaflora Alba', 'Althaeflora Alba', 'Althaeaeflora Alba', 'Altheiflora Alba'.

Althaeiflora (B & A). *(C.japonica)*, Mcllhenny 1941, *700 Varieties of Camellias*, as 'Altheaflora' (B & A): Peony form. Pink to white. Received from Bobbink & Atkins, Rutherford, NewJersey, USA. Krussmann, Gerd, 1976, *Manual of Cultivated Broad-leaved Trees and Shrubs*, p.267, as 'Althaeiflora': Pink occasionally also speckled white.

Althaeiflora Folius aurea Variegatis. *(C.japonica)*, Henderson & Son, 1870, Catalogue, p.18, as 'Althaeiflora Fol. Aur. Var.'. A form of **Althaeiflora** with golden variegated foliage. Originated in England.

Althaeiflora Gigantea. Treseder Camellia Nursery 1964-1965; Platt, 1968, RHS, *The Rhododendron & Camellia Yearbook*, No.22, p.75, Fig.29, description, p.235: "Award of Merit", Feb.21, 1967. Flowers 8-9.5 cm across, semi-double. Petals held tightly in five or six whorls. Centre open with a tight central cluster of shorter petaloids showing less pigmentation. The colour of the flowers is a rich, satiny red -RHS Colour Chart Red Group 50A. Leaves, large, dark green, variably serrated, apices varying from acute to acuminate. Exhibited by Mrs S. Williams, "Scorrier House", Scorrier, Redruth, Cornwall, England. Reported to be named from a plant of 'Althaeiflora' in a glasshouse which had large flowers. It is considered to be a synonym for **Althaeiflora.**

Althaeiflora Grandiflora. *(C.japonica)*, Costa, 1846, *Catalogue de la collection de camellias présentée à sa majesté L'Impereratrice de toutes les Russies et Reine de Pologne*, p.13. No description. (Believed extinct.)

Alyne Brothers. *(C.japonica), American Camellia Yearbook*, 1959, p.268, Reg. No.383: A 7 year old chance seedling, originated by S.L. Brothers, Madison, Florida, USA which first flowered in 1953. Plant growth is medium rapid, upright and of medium density. The leaves are yellowish green and average, 8 cm x 4 cm. The flowers, 9-10 cm across and 5-6 cm deep, are white with occasional pink blotches and resemble **Debutante** in form. There are 30-45 petals and 200-300 petaloids hiding any stamens. Mid-season blooming. Sports: **Linda Brothers** and **Ladell Brothers.**

Alyne Brothers Blush. Cannon, 1966, ACS, *The Camellia Journal*, vol.21, No.1, back page. Synonym for **Linda Brothers.**

Alyne Brothers Pink. Cannon, 1966, *American Camellia Yearbook*, p.69. Synonym for **Ladell Brothers.**

Alyson Pollard. *(C.japonica), American Camellia Yearbook*, 1977, p.207, Reg. No.1452: A medium blush with an occasional, small, rose streak, formal double *C.japonica*, early to mid-season flowering. An 11 year old seedling that first bloomed 1970. Originated by Douglas Mayfield, Baton Rouge, Louisiana, USA. The **Alba Plena** style bloom has 90 petals. Average size, 8 cm in diameter and
4 cm deep. Sports three distinct types.

Amabel Landsell. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.6. Orthographic error for **Amabel Lansdell.**

Amabel K. Lansdell. Mark S. Cannon Scion Catalogue, 1964-1965, p.1. Synonym for **Amabel Lansdell.**

Amabel Lansdell. *(C.japonica)*, Pyron, Jan.1962, ACS, *The Camellia Journal*, vol.17, No.1. *American Camellia Yearbook*, 1966, p.69, Reg. No.826: A 10 year old chance seedling, first bloomed, 1960, originated by Marion Lansdell Meiere, Augusta, Georgia, USA. Large, serrated, dark green leaves, 10.5 x 5.5 cm. Medium growth, upright and open. The flower is variable from semi-double to peony with creamy centre shading to exquisite tones of pink on outer petals. Cold hardy. Blooms measure 12.5 cm across by 6 cm deep and have from 12-15 petals and varying petaloids. Mid-season blooming. Orthographic errors: 'Amabel Lansdel', 'Annabel Langsdale', Annabel Lansden', 'Amabel Landsell', 'Anabel Lansdell'. Synonym: 'Amabel K. Lansdell. Chinese synonym: 'Lansideer'.

Amabel Lansdel. Tammia Nursery Catalogue, 1965-1966. Orthographic error for **Amabel Lansdell.**

Amabile. *(C.japonica)*, Buist, 1839, *American Flower Garden Directory*, p.237: This perfect flower was raised from seed by J.B. Smith of this city (Philadelphia). It is regularly imbricated. The extreme petals are bright rose, shading to delicate pink, and then again, shading in the centre to light red. The flower is about 8 cm across. Berlèse, *Monographie*, 1840, ed.2: Rose and red. Flower about 9 cm across, rose form double, rose-pink colour. Exterior petals are numerous, bright rose, and regularly imbricated. Interior is very deep rose, otherwise, pale rose. Originated by J.B. Smith, Philadelphia, USA. Orthographic variants and synonyms: 'Amabile Americana', 'Amabilis Americana', 'Amabilis d'Amerique', 'Amablis de New York', 'Amabilis Plena', 'Amabilis d'America' , 'Amabils Philadelphie', 'Amabilis di New York' , 'Smith's Amabilis' , 'Amabilis de Smith', 'Amabilis Smith', 'Smith's Amabile', 'Amabilis Smithii', 'Amabilis Smith's', 'Amabilis'(Smith's), 'Amabilis de New York', 'Amabalis', and erroneously 'Aimable d'Amerique' and 'Amabilis'.

Amabile Americana. Leroy Andrè, 1847 Catalogue. Synonym for **Amabile.**

Amabilis. SCCS, 1942, *The Classification of Camellias*, p.3. Hume, 1946, *Camellias in America*, p.240. Name has erroneously been given in USA for **Kamo-honnami.**

Amabilis. R.Tyas, 1843, *Popular Flowers.* Orthographic error for **Amabile.**

Amabilis. *(C.japonica)*, Cels, Paris Nursery Catalogue, 1836-1837, p.8, No description. Berlèse, 1837, *Monographie*, ed.1, p.52, 125: Leaves, 10 cm x 6 cm, roundish-oval, acute to a little acuminate, horizontal, conspicuous venation, regularly serrate, of a dull green. Buds, elongate, scales greenish, flower terminal, large, white,~single,8 petals with a few stamens in the centre. It differs little from 'Alba Simplex'. Originated in Nantes, France about 1825. The name **Amabilis** has been also used erroneously, as a synonym for **Yukimiguruma** and **Kamo-honnami** in the USA and the name has been considerably confused with Smith's **Amabile** from USA.

Amanda. Gao, Jiyin, Ltr, 22nd August, 1992. Chinese synonym for the New Zealand *C.reticulata* hybrid **Amanda Lisa.**

Amanda Lisa. *(C.reticulata x C.japonica), New Zealand Camellia Bulletin*, vol.XIII, No.8, 1984, p.12, Reg. No.221: This chance reticulata-japonica seedling is 9 years old and first bloomed 1978. The seed originated with Mr H.J. Clark, grown and flowered by Mrs B.U. Urquhart, Mt Albert, New Zealand. The plant is upright and dense of habit with average growth and dark green leaves, 11 cm x 5.5 cm. The peony form flowers are bright, deep red with cream filaments, yellow anthers and 20 petals. They measure 13 cm across by 7 cm deep and appear midseason. Colour RHS, Colour Chart, Red group, 53B.

Amanda Mandarich. (*C.reticulata* hybrid). ACS, *The Camellia Journal,* Aug. 1997, p.16. Large, roseine purple semi-double. A cross of **Carl Tourje** x **Lilette Witman**, which flowers mid-season. Originated by Jack L. Mandarich, Grants Pass, Ore., USA. *American Camellia Yearbook,* 1997, p.1, colour photo before p.1. The 13 year old seedling first flowered in 1990. Average flower size is 12.7 cm across x 5 cm deep with 12 petals and golden anthers. Blomms have a silver fluorescence on all petals. Plant growth is upright, open and average with leaves 9 cm long x 6.5 cm wide.

Amarantha. Cachet Catalogue, 1845-1846, p.6. Synonym for **Amaranthina.**

Amarantha Rubra. *(C.japonica)*, Berlèse, 1844, *Annales de la Société d'Horticulture de Paris*, 34(197):205: Leaves, 9-10 cm long by 6-7 cm wide, wide-ovate, lightly veined, coarsely serrate, dark green; buds, large, pointed with greenish scales. Flower, rose form double, 10-11 cm across of deep rose or soft red with a touch of carmine; star-like in form; outside petals in

4 rows, ovate-oblong, channelled, finely veined and notched; those at the centre, numerous, very short, mixed with stamens and petaloids, splashes of white a little like **Oxoniensis.** Originated in France.

Amaranthina. *(C.japonica)*, Anonymous, 1839, *Revue Horticole*, p.205-207. No description: Trillon, 1843, Catalogue, p.3: Cherry red striped white. Originated in Belgium. Orthographic errors 'Amarantina', 'Amarantha'.

Amarantina. Burdin Maggiore & Co.1845, p.41. Orthographic error for **Amaranthina.**

Amarie. (*C.reticulata* hybrid). ACS, *The Camellia Journal*, Aug. 2002, p.21, colour photo p.20, Reg. No.2576. A cross of **Buddy Bills** x **Arcadia.** A pink semi-double flower with golden anthers, pink filaments and heavy petal texture. Flowers mid-season. Originated by Hulyn Smith, Valdosta, Ga, USA. *American Camellia Yearbook*, 2002, p.126, colour photo p.c9. The 15 year old seedling first flowered in 1997. Flowers measure 15 cm across x 10 cm deep. Plant is upright and vigorous, with dark green leaves 14 cm long x 9 cm wide.

Amarita. *(C.japonica)*, *Catalogue General des plantes Cultivées dans L'Establishment de la Société Royale de Belge*, 1842, p.21. No description. Charles Van Geert Catalogue, 1845, p.1: Large, brick red with speckles of white. Originated in Italy.

Amataki. (Rain Cascade), *(C.japonica)*, *Chinka Zutu*, (before 1700), Watanabe, 1969, pl.431: Small, single red with large, white blotches. Central stamen column. Originated in Japan. (Believed extinct.)

Amatsu-hagoromo. JCS., ea., Mainichi Shinbun, 1971, *Tsubaki.* Synonym for **Amatsu-otome.**

Amatsu-otome. (Celestial Maiden), *(C.japonica)*, *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.53, p.298; Yokoyama 1975, *Gendai Tsubaki Meikan*, p.65, black and white photo; Seibundô Shinkôsha, 1979, *Senchinshû*, p.13, colour photo: Small, soft palest pink, trumpet-shaped single. Mid-season blooming. Leaves dark green, slender, elliptic. See Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.88. Original tree is in the precincts of the Kôtô-in, Daitokuji, Kyôto, Japan. Synonym: 'Amatsu-hagoromo'. Named by the former chief priest, Gizan, in 1970.

Amazing. *(C.japonica)*, McIlhenny, 1937, Catalogue, p.1: Medium size, Imbricated. Purple fading to lavender; formal double; petals v'ed at the tips. Mid-seasom blooming. See Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III, p.5 for black and white photo. Originated as a seedling at Jungle Gardens, Avery Island, Louisiana, USA.

Amazing Grace Abbott. *(C.reticulata* hybrid) C.Aust., *Camellia News*, Autumn 2008, No.176, p.13, colour photo front cover, Reg. No. 576. Originated by Keith Abbott, Rossmoyne, Western Australia. A chance seedling of *C.reticulata* hybrid **Lasca Beauty.** First flowered in 1995. The large, semi-double, hose-in-hose flower has 14 petals, and is soft pink (RHS.CC. 52C). Size is 19 cm across x 6.5 cm deep. Stamens are arranged in a column. Heavy textured, long lasting flowers. Flowers fall whole. Flowers mid-season on an upright medium growing plant. Leaves mid-green, incurved, broad, 16 cm x 8 cm.

Amazing Graces. *(C.japonica)*, *American Camellia Yearbook*, 1979, p.102, Reg.No.1574: A small, sweet pea pink, formal double *C.japonica*, ('Dr Tinsley' x 'Letitia Schrader'). Mid-season blooming. Originated by Mrs Henry Stone, Baton Rouge, Louisiana, USA. The 8 year old seedling first flowered 1976 and has 48 petals. Average size, 7 cm across by 3.2 cm deep. The inner two thirds of the flower is the palest blush, almost white; outer flat petals are pink of 'Dr Tinsley'; imbricated petals form 8 complete swirls, outer petals, smooth and slightly turned up. Plant growth, upright, open and medium in rate, with mid green leaves 7.5 cm x 3.7 cm. Chinese synonym: 'Jingmei' .

Amazone. *(C.japonica)*, van Houtte, 1842, Catalogue, 9:7. No description. Charles van Geert Catalogue,1845, p.1: Globular form; rosy red. Burnier & Grilli Catalogue,1846-1847 as

‘Amazzone’: Large, formal double, deep red displaying petals like a star. Originated in Italy. Orthographic errors: ‘Amazzone’, ‘Amazoni’ Van Geert, 1848 has this as a synonym for **Maria Dorothea**, but this is in error as **Maria Dorothea** is a white.

Amazoni. van Houtte, 1851, Catalogue, 44:2. Orthographic error for **Amazone.**

American Beauty. *(C.japonica),* McIlhenny, 1941, *700 Varieties of Camellias*, p.2: Large, deep red. Magnolia Gardens and Nursery Catalogue, 1942-1943: "Another of our original varieties which has missed the fame it deserves by blooming in March (late), long after the last Camellia Show. One of the most difficult to propagate and a slow grower." SCCS, *Camellia Nomenclature* lists it as: Deep pink, marbled white. Medium semi-double to rose form double, medium, compact, upright growth. Originated at Magnolia Gardens, Charlston, South Carolina, USA.

American Flag. *(C.japonica),* SCCS, 1942, *Classification of Camellias*, p.1: Variegated single, 4 cm across. Late. Originated in USA.

American Girl. *(C.japonica), American Camellia Yearbook*, 1955, p.334, Reg. No.220: A 15 year old chance seedling, originated by Fruitland Nurseries, Augusta, Georgia, USA. First flowered 1943. Plant growth average, upright and compact. Leaves broad-ovate, convex. The 'American Beauty' red flowers, 10-12.5 cm across, are incompletely imbricated, similar to 'Mathotiana', (**Julia Drayton**). Mid-season flowering. Colour photo on front cover of Fruitland Nurseries Catalogue, 1957-1958.

American Dunlap. van Houtte, 1845-1846, Catalogue,23:1. Synonym for **Americana.**

American (Dunlap's). Verschaffelt Catalogue, 1867-1868, p.37. Synonym for **Americana.**

Americana. *(C.japonica),* Buist, 1839, *Camellias*, p.5; Dunlap, 1840, *Magazine of Horticulture*, 6:23: Originated by Dunlap. Leaves 8 cm x 6 cm, nearly flat, roundish oval, glossy green, slightly acuminate, delicately dentated, smooth, finely veined and a softness in texture. The bud is large, oval, with greenish calcinal scales; petals, 70 in number, full to the centre, clear white (changed in 1841 to "blush"), regularly spotted as in the guard petals of 'Punctata Plena'. The parents were the old 'Middlemist' fertilized by **Punctata.** Schweidweiler, ed., 1843-1844, *Journal d'Horticulture Pratique*, p.67: Similar in form to **Alba Plena,** but pale pink streaked or spotted with carmine red. Orthographic variants: 'Americana'(Dunlap's)', 'Americano, Dunlap', 'Americana' (Dunlop's)', 'Americana (Dunloops)', 'Americana de New York', 'Americana Dunlap's', 'Americana New York', 'Americana Dunlop', 'Americana de Dunlop', 'Americana (Dunlap's). Orthographic error: 'Americiana'. Synonyms: 'Maid of Orleans', 'Apple Blossom'(Youtz), and erroneously in the USA, 'Countess of Orkney'. For illustrations see *Annales de Gand,* 1847, pl.140, and *Berlèse,* 1843, pl.300.

Amplissima Simplex. *(C.japonica),* Harrison, ed., 1837, *Floricultural Cabinet*, vol.V, p.172: Simple red flowers. A sport of **Aitonia.** Synonym: ‘Amplissima Rosea’. Orthographic Variant: ‘Amplissimae Simplici’.

Amy Connor. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2013, p.29 with colour photo; Regn No. 2903; Originated and registered by Parker Connor, Edisto Island, S.C, USA. ACS, *Yearbook* 2013, p.103 with colour photo; Propagated by Mark Crawford, Loch Laurel Nursery, Valdosta, Georgia; The 12 year old seedling, parentage unknown, first flowered 2003. The medium to large size flower is 10cm diameter x 5cm deep, loose peony to rose form double, red variegated white. Yellow anthers and pink filaments. Heavy petal texture, and flowers fall in one piece. Flowers mid-season to late. Plant growth is spreading, at average growth rate. Mid-green leaves average 10cm x 5 cm, with medium serration.

Amy Doodle. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2013, p.28 with colour photo; Regn No.2892; Originated, registered and propagated by Gabriel C. Olsen, Pensacola, Fla, USA. ACS, *Yearbook*, 2013. p.104 with colour photo; Large size flower is 10-11.5cm diameter x 3.2-5cm deep, semi-double to lose peony, yellow anthers and white filaments. Colour is described as white with light pink shading, (accompanying photo shows a mainly light pink flower with a variable amount of white edging to each petal, and the stamens dispersed among the inner petals). Flowers fall whole. Plant is spreading and open, with average growth rate, and mid-green leaves, 9.5cm x 4.5cm with low serration.

Amy McCay. *(C.japonica),* ACS, 1993, *The Camellia Journal,* vol.48, p.37, Reg. No.2279: Large size, moderately deep red – lighter at periphery, anemone form, chance seedling of **Tiffany.** Blooms early to mid-season. Originated by Legrand J. Audioun, Biloxi, Mississippi, USA. ACS, 1993, *American Camellia Yearbook,* p.69: The 9 year old seedling first bloomed 1987. Average size 11 cm across x 5 cm deep with 44 petals and 84 petaloids. The blooms have light yellow anthers and very pale to white filaments. Plant growth is upright, average, open and medium with dark green leaves 10.5 cm long x 5 cm wide. Colour photo facing p.69.

Amy Maryott. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1999, p.14, Reg. No.2496. A medium rose japonica with crepey petals and crenated leaf edges. Very cold hardy and fragrant. Originated by Arthur A. Maryott, Gaithersburg, Mld, USA. *American Camellia Yearbook*, 1999, p.3, colour photo before p.1. A semi-double seedling of **Berenice Boddy,** pollen parent unknown. The 24 year old seedling first flowered in 1985. Average flower size is 10 cm across x 5 cm deep, with 18 petals, yellow anthers and white filaments. Plant growth is average, with medium green leaves 10.8 cm long x 3.8 cm wide.

Amy Pearson. (*C.reticulata*), ACRS, 1974, *Camellia News*, No.55, p.36, Reg. No.165: Originated by F.S. Tuckfield, Berwick, Victoria, Seed parent 'Cornelian', (**Damanao**), pollen parent unknown. First flowered 1970. The 15-17 cm semi-double flowers are bright red with a lighter tone to the outer edge. Blooms mid-season. Growth habit is upright, dense, vigorous and floriferous, with typical reticulate, dark green, lanceolate leaves, 11.4 cm x 4.8 cm, a sharp apex and pronounced serrations.

Amy Stephens. *(C.japonica), American Camellia Yearbook*, 1974, p.229, Reg. No.1320: A 13 year old, chance *C.japonica* seedling, that first bloomed 1966; originated by J.Thomas Agnew, Athens, Georgia, USA. Plant growth is upright, medium in rate with 8 cm x 5 cm dark green leaves. The semi-double, 'Herme', (**Hikarugenji**) type, bloom is deep pink with 23-24 petals and 2-5 petaloids, yellow anthers, and whitish yellow filaments. Average size is 10 cm across x 3.7 cm deep. Blooms late season.

Amy V. Thomas. *(C.japonica),* ACS., 1989, *The Camellia Journal,* vol.44, No.3, p.9, Reg. No.2164: A small size, red, formal double, *C.japonica* chance seedling. Blooms mid-season. Originated by Lindsey A. Odom, Wilmington, USA. The 20 year old seedling first bloomed 1974. Average flower size, 7 cm across x 3.8 cm deep. Plant growth is upright and rapid in rate with dark green leaves 7 cm long x 2 cm wide.

Amyntas (Fiaes). *(C.japonica),* Loureiro, Catalogue No.1, 1865, p.30 & No.9, 1872-73, p.41; Formal double. Pale pink striped deeper. Originated in Portugal by Fiaes..

Amzer Nevez. *(C.japonica),* ICS *Journal,* 2008, p.120 with colour photos; A chance seedling originated by Fañch Le Moal, Guingamp, France, on behalf of the Camellia Association of Guingamp. An average upright shrub of slow growth rate. First flowered 1986 at circa 28 years. The **Lily Pons** type, single flower is 7-11 cm diameter x 4-6 cm deep, and is white (RHSCC 155C) yellowing at the base (RHSCC 2D). Flowers early to mid-season.

An Van Gastel. *(C.x williamsii).* ICS *Journal,* 2009, p.94 with colour photo; An open pollinated seedling of **Mary Larcom.** Originated by Liesbeth Reiling, Kapellen, Belgium. Registration applied for by Roger Van Loon, Brasschaat, Belgium. First flowered 2005 at circa 7 years of

age. Shell pink single, 7 cm diameter x 4 cm deep, with a strong, short cylinder of golden stamens. Bushy shrub of medium growth rate. Note; The flower pictured is semi-double rather than single by the standard classification.

Anemoneflora Variegata. Fratelli Rovelli Catalogue 1874, p.30. Orthographic variant for **Anemoniflora Variegata.**

Anemoneflora Warratah. Cels, Paris Nursery Catalogue, 1836-1837, p.8. Synonym for **Anemoniflora.**

Anemoniflora. *(C.japonica)*, Curtis, 1814, *Botanical Magazine;* Aiton, 1812, *Hortus Kewensis* as 'Anemone-flower'd': First brought to England from China in 1806, it was described and illustrated in a great many horticultural publications of the time. The flower is the prototype of the "anemone forms with 5-6 large, outer guard petals with emarginate apices and a central cushion of ligulate petaloids, 7.5-8 cm across. Colour turkey red, becoming very dark in some conditions. Buds, round, developing dark brown, leathery edges to the scales. Leaves, dark green, glossy, broadly-elliptic to very broadly-ovate margins shallowly serrate, apices short

acuminate. Habit is open, vigorous and spreading. Its old Chinese name of 'Po Chu Cha' is written as 'Baozhu Cha' in Pinyin transliteration system and translates as "Precious Pearl Camellia". Because its sexual parts are reduced to the pistil only, it was much used as a seed parent by such early Camellia hybridists as Chandler of England and Macarthur of Australia, so that, generations later, its genes have flowed into hundreds of modern cultivars. Synonyms include: 'Waratah', 'Anemoniflora Waratah', 'Mrs Sol Runyon', 'Honey Comb', 'Waratah Ancien', 'Waratah Purpurea', 'Waratah Sinensis', and erroneously as 'Red Waratah'. Orthographic variants and errors include: 'Anemonae Flora', 'Anemonaeflora', 'Anemoneflora', 'Anemone Flora', 'Anemoflora', 'Anemone-flowered', 'Anemonaeflora (Waratah)','Anemoninaeflora'. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.422; New Chinese synonym 'Lianhua'.

Anemoniflora Alba. *(C.japonica)*, Curtis, 1820, *Monograph on the Genus Camellia*, p.1, as 'flore pleno Anemoniflora Alba' or 'White Waratah'; Chandler & Buckingham, 1825, *Camellia Britannica* as 'Anemone Flora Alba': "This plant was produced, with 4 others, from 5 seeds contained in a capsule of the **Pompone** or 'Kew Blush' variety and sown in November 1819. Its habit and appearance are much the same as its parent. The branches are pale coloured, erect and slender. The leaves resemble 'the striped' (**Variegata**) in shape but of a lighter green with more prominent veins. It approximates nearer to the leaves of the **Pompone** and 'Paeony-flowered' varieties. They are broader at the base, more veiny on the upper side and have a stronger midrib. The flower buds are large and round, with thin, pale green, slightly pubescent scales. The flowers are about the same size as the 'Pompone', which they also very much resemble in form and disposition of the petals. They seldom exceed 8.5 to 10 cm across and are of a delicate white colour, a little striped and occasionally spotted with pale red. The outer petals are large and spreading, about 10 in number and arranged in two rows; the greater part of them are nearly flat, roundish cordate, from 2.5- 3.8 cm in diameter. The inner petals are small, irregularly shaped and numerous; their usual characteristic is to be nearly all of the same height and rise upright in a dense mass. The name of 'White Waratah' or 'White Anemone Flowered' which has been given to this variety, is inappropriate as leading one to suppose, except for the colour of its flowers, that it is the same as the elegant variety represented at folio 8." (**Anemoniflora**) Synonyms: 'White Waratah', 'Warratah White', 'White Warrata'. Orthographic variants and errors: 'Anemoneflora Alba', 'Anemonaeflora Alba', 'Anemone Flora Alba', 'Anemoniaeflora Alba', 'Anemonae Flora Alba', 'White Anemone', 'Anemone Alba', 'Anemonaeflora Albo Variabilis'. See colour plates in Chandler & Booth, 1831, Illustrations and Descriptions of the plants which compose... pl.12 as 'Anemoniflora Albo'. Note-. According to Chandler & Buckingham this was raised from seed planted in 1819. Obviously from the listing by Curtis, a camellia of this name was a mature plant prior to 1820. From this it would appear that there were two camellias named 'Anemoniflora Alba'.

Anemoniflora Alba (Australia). SCCS, 1954, *The Camellia. Its Culture and Nomenclature,* p.26. This was a synonym for the name 'Leila' which had been applied by Waterhouse in 1947. However as two previous camellias had also been known by this name, it was later changed to 'Narellen'. Orthographic variant 'Anemonaeflora Alba'(Australia).

Anemoniflora Alba Plena. Loddiges Catalogue, 1814 as 'Anemonaeflora Alba Pl.'. According to the 1830 Journal of the Horticultural Society of London: "believed to have been amongst those imported for Kew in 1810". It thus appears to be a synonym for **Paeoniiflora Alba.**

Anemoniflora Carnea. *(C.japonica)*, Loudon, 1825, *Greenhouse Companion*, p.74 as 'Anemoneflora Carnea' or 'Blush Waratah'. A British hybrid with pale or light red flowers. Synonyms: 'Carnation', 'Anemonae Flora Warratah Carnea', 'Blush Waratah'. Orthographic variants: 'Anemoneflora Carnea', 'Anemonaeflora Carnea', 'Waratah Incarnata'.

Anemoniflora Carnea Superba. (C *japonica)*, Rovelli, 1874, Catalogue, p.30 as 'Anemoneflora Carnea Superba': Early flowering. No description. Originated in Italy. (Believed extinct.)

Anemoniflora Coccinea. *(C.japonica),* Trillon, Le Mans Nursery Catalogue, 1843, p.3 as 'Anemoneflora Coccinea'. No description. Synonym for **Anemoniflora Rubra.**

Anemoniflora (Dickson). *(C.japonica)*, Paxton's, 1837, *Magazine of Botany*, vol.3, p.118, invalidly as 'Anemoniflora': It is a hybrid produced between 'Red Waratah', (**Anemoniflora**) and 'Pomponia' or 'Kew Blush', it partakes of the free growth and ample foliage of the 'Waratah' and the form of the flowers, but the centre is much improved by partaking of the delicacy of 'Pomponia' (**Pompone**). The centre is lighter than the surrounding petals and partially mottled with a salmon colour. It was raised by James Dickson, Acre Lane, Chatham, England.

Anemoniflora Flora Albo. Mertens & Fontaine Catalogue, 1845, p.59. Synonym for **Anemoniflora Alba.**

Anemoniflora Grandiflora. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.9. Synonym for **Gauntlettii.**

Anemoniflora Knightii. Loddiges Catalogue, 1826, p.21. Synonym for 'Knightii', which is a synonym for **Dianthiflora.**

Anemoniflora Lutea. Anonymous, 1860, *Belgique Horticole*, p.100-101. Synonym for **Jaune.**

Anemoniflora Mutabilis. Mertens & Fontaine Catalogue, 1845, p.59. Orthographic variant for **Anemone Mutabilis.**

Anemoniflora Plena. Loddiges 1814, Catalogue as 'Anemonaeflora Pl.'. Synonym for **Paeoniiflora Alba.**

Anemoniflora Purpurea. *(C.japonica)*, J.E. von Rieder, 1834, *Die Beschreibung und Kultur der Azaleen, Cactus, Camelien.*, p.218., as 'Anem. fl. purp'. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.9: Purple, anemone form. Originated in Italy. (Believed extinct.)

Anemoniflora Rosa de Press. Makoy Catalogue, 1839. Synonym for **Pressii Rosea.**

Anemoniflora Rosea. *(C.japonica)*, Loddiges Catalogue, 1830, p.21: Originated by the nurseryman Low, England. A rose pink to red, Medium size, anemone form similar to **Anemoniflora.** Berlèse, 1843, *Iconographie*, vol.3, pl.216 as 'Anemonaeflora Rosea de Low': Flower 9-10 cm across, irregular, full, of a spherical form, pure cherry-red carmine, sometimes tinted. The outside petals in 2 rows, are ample, long, obtusely notched, horizontally imbricated and veined; those of the interior are in keeping, but smaller, innumerable, serried and in a spherical cluster. The name was erroneously used in Australia as a synonym for **Speciossissima.** It was also invalidly used by Negri, Milan, Italy in 1843, for one of his seedlings. Orthographic variants: 'Anemone Warrata Rosea', 'Anemoneflora Rosea', 'Rose Waratah', 'Anemonaeflora Rosea de Low'. 'Anemonae Warrata Roseii', 'Anemonaeflora Rosea'. 'Anemonae Rose', 'Anaemoneflora Rosea', 'Warratha Roses', 'Waratah Rosea'.

Anemoniflora Rosea de Low. Berlèse, 1843, *Iconographie*, pl.216 as 'Anemonoeflora Rosea de Low' and as 'Anemonaeflora Rosea de Low' on page facing pl.216. Synonym for **Anemoniflora Rosea.**

Anemoniflora Rosea Depressa. Anonymous, 1841, *Gardeners' Chronicle*, p.609 as 'Aneomoneflora Rosea Depressa'. Synonym for **Pressii Rosea.**

Anemoniflora Rosea de Presse. Jacob Macoy et Cie Catalogue, 1836, p.15. Synonym for **Pressii Rosea.**

Anemoniflora Rosea (H. Negri). *(C.japonica)*, Colla, 1843, *Camelliografia*, p.137 as 'Anemonaeflora Rosea'(H.Negri): Similar to the **Anemoniflora Violacea,** yet with paler foliage and the

flowers completely rose coloured. Originated from seed by M. Negri, Milan, Italy. Synonym: 'Warratah Rosea'.

Anemoniflora Rosea Precocissima. *(C.japonica)*, Rovelli Catalogue, 1874. An early flowering form of **Anemoniflora Rosea (H. Negri).** Originated in Italy.

Anemoniflora Rubra. *(C.japonica)*, Harrison, ed., 1837, *Floricultural Cabinet*, vol.5, p.267 as 'Anemoneflora Rubra': Double, dark red. Orthographic variants: 'Anemonaeflora Rubra', 'Anemonae Flora Rubra', 'Anemonae Rubra', 'Anemonoeflora Rubra', 'Anemoniflora Coccinea', 'Anemoneflora Scarlet Sinensis'. Originated in England.

Anemoniflora Sasanqua. Wright & Dewar Catalogue, 1896 as 'Anemonaeflora Sasanqua'. Synonym for **Jaune.**

Anemoniflora Sinensis. Harrison ea., 1837, *Floricultural Cabinet*, vol.7, p.56 as 'Anemoneflora Sinensis' as the 'double striped waratah from China' that is, **Variegata.**

Anemoniflora Striata. *(C.japonica)*, Loddiges Catalogue, 1826, p.21. No description. Colla, 1843, *Camelliografia*, p.83: A purple red single form of 8-9 cm in diameter, with 6 outer guard petals, ovate-oblong, rounded, emarginate. Synonyms: 'Warata Striata', 'Waratah Striata Chinensis', 'Waratah Striata', 'Striata Sinensis', 'Anemoniflora Striata Chandleri'. Orthographic errors: 'Anemoneflora Striata', 'Anemonaeflora Striata', 'Anaemoneflora Striata'. Originated in England.

Anemoniflora Striata Chandleri. Anon, 1830, "Ueber die Cultur der Kamellien" in *Der Blumen Gartner*, p.50. Synonym for **Anemoniflora Striata.**

Anemoniflora Striata Variabilis. *(C.japonica)*, A.J.D., 1835, *American Gardeners' Magazine*, p.74, as 'Anemoneflora Striata Variabilis': "The color is a fine rich pink". Originated in USA. (Believed extinct.

Anemoniflora var. Sinensis. Berlèse, 1837, *Monographie*, ed.1, p.130, 233 as 'Anemomaeflora var. Sinensis'. Synonym for **Variegata.**

Anemoniflora var. Waratah. McEacharn, 1955, *American Camellia Yearbook*, p.214-218 as 'Anemonaeflora var. Waratah'. Synonym for **Anemoniflora.**

Anemoniflora Variegata. *(C.japonica)*, London, 1825, *The Greenhouse Companion*, p.74 as 'Anemoneflora Variegata' or 'Carnation Waratah'; Edward's *Botanical Register*, vol.XI, illustr.887: A crimson, blotched white, anemone form with 7-8 guard petals and a tight central cushion of petaloids. Medium size. Blooms mid-season. Orthographic variants: 'Anemonae Flora Variegata', 'Anemonaeflora Variegata', 'Anemoneflora Variegata'. Synonym: 'Carnation Waratah'. Originated in England by Chandler of the same parentage as **Elegans.**

Anemoniflora Violacea. *(C.japonica)*, Colla, 1843, *Camelliografia*, p.136, as 'Anemonaeflora Violacea': A soft violet-red. Corolla of 9-12 petals alternatively disposed in 3-4 rows, opening ovate-oblong, broad, emarginate. Stamens all disposed regularly with the petals in the centre of the flower, forming a corolla with their apices turned towards the centre. Orthographic errors: 'Anemonae Flora Violacea', 'Anemoneflora Violacea', 'Anemonaeflora Violacea'. Originated in Italy. Said by Colla to have been originated by Negri, Milan.

Anemoniflora Waratah. SCCS, 1942, *Camellia Digest*, as 'Anemoneflora Warratah'. Synonym for **Anemoniflora.**

Anemoniflora Waratah Alba. Berlèse, 1843, *Iconographie*, pl.150, as 'Anemoneflora Warratah Alba'. Synonym for **Anemoniflora Alba.**

Anemoniflora Waratah Carnea. Berlèse, 1837, *Monographie*, ed.1, p.52 as 'Anemonaeflora Warrata Carnea'. Synonym for **Anemoniflora Carnea.**

Anemoniflora Waratah Sinensis. Berlèse, 1837, *Monographie*, ed.1, p.106 as 'Anemonaeflora Warrata Sinensis'. Synonym for **Variegata.**

Anemoniflora Waratah Vera. Isola Madre Catalogue, 1845 as 'Anemonaeflora Varrath Vera'. Synonym for **Anemoniflora.**

Anemoniflora Warrata Alba. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.9. Synonym for **Anemoniflora Alba.**

Anemoniflora Warrata Sinensis. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, *p.9.* Synonym for **Variegata.**

Anemoniflora Warrath. McEachern, 1955, *American Camellia Yearbook*, p.217 as 'Anemonaeflora Warrath'. Synonym for **Anemoniflora.**

Anemonifolia. Guilfoyles Catalogue, (ca.1890) p.10. Orthographic error for **Anemoniflora.**

Anemoninaeflora. Trewidden Estate Nursery Retail Autumn Price List, 1987, p.3. Orthographic error for **Anemoniflora.**

Anemora Mutabilis. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Anemone Mutabilis.**

An-Flo-Lee. *(C.japonica),* SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* Dark red. Large, peony to anemone form. Vigorous, upright growth. Mid-season blooming. Originated by R. Lee, Pensacola, Florida, USA.

Anession. Contini & Nava Catalogue, 1900. Orthographic error for **Annessione.**

Anfsika. *(C.japonica),* **SCCS,** 1950, *The Camellia. Its Culture and Nomenclature*, p.23: Purplish pink. Large, full peony form. Vigorous upright growth. Mid-season blooming. Originated in USA.

Anfuren. Shao, Taichong, 1992, *The Observations from the Camellia World,* Chinese synonym for the USA *C.japonica* **Lady Ann.**

Angel. *(C.japonica), American Camellia Yearbook*, 1955, p.334, Reg. No.216: A 7 year old seedling of unknown parentage; originated by Mrs Elizabeth Councilman, El Monte, California, USA. First flowered 1951. Plant growth is average, pendulous and compact. Leaves are ovate, serrate with tapering bases and cuspidate tips, light in texture. Buds are plump and white. The white flowers, 10-11 cm across, are semi-double, similar to 'Donckelaeri' (**Masayoshi**), with 28 petals. Flowers mid-season to late.SCCS., 1966 *Camellia Nomenclature* and on, give **Angel** and **Candlelight** as synonymous; however, in the original description **Candlelight** is given as upright and with variegated leaves. They are considered to be separate cultivars. See colour photo in *American Camellia Yearbook*, 1958, facing p.210 and in Macoboy, 1981, *The Colour Dictionary of Camellias*, p.70. Received a Preliminary Commendation from the RHS in 1962.

Angel Cocchi. Forrest, Mary, 1985, *Trees and shrubs cultivated in Ireland.* Orthographic error for **Angela Cocchi.**

Angel Cochi. Escuela de Agricultura de Pontevedra, 1882, p.28. Orthographis error for **Angela Cocchi.**

Angel Kloman. *(C.japonica),* ACS, 1984, *The Camellia Journal*, vol.39, No.3, p.14, Reg. No.1948: A very large white to cream, formal double: *C.japonica* (H#193 [**Elizabeth Boardman** x **Charlie Bettes**] x H#218 [**Gus Menard** x **Charlie Bettes**]). Early to mid-season blooming. Originated by Dr. W.F. Homeyer, Jr., Macon, Georgia, USA. The 6 year old seedling first bloomed 1982. Average flower size, 12 cm across x 4.5 cm deep with 38-45 petals and up to 9 petaloids. The flower has large, cupped, long, fluted petals. Plant growth is average, open and medium in rate with mid-green leaves, 9, 5-15 cm long by 3-6 cm wide.

Angel Marie. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2013, p.27 with colour photo. Regn No.2876; Regd by James & Elaine Smelley, Moss Point, Miss., USA. ACS, *Yearbook*, 2013, p.105 with colour photo; Originated and propagated by Vernon E. Howell, Lucedale, Miss. Seedling of unknown parentage, first bloomed 2007. Medium size flower, 8.2cm diameter x 6.5cm deep, loose peony form, light pink with pink stripes.Yellow anthers and white filaments. Heavy petal texture, long-lasting, and fall whole. Flowers mid-season. Plant growth is upright, dense, and at average rate. Dark green leaves average 10cm x 3.5cm, with medium serration.

Angel Wings. *(C.x williamsii),* Kramer's Nursery Catalogue, 1970; *American Camellia Yearbook*, 1979, p.102, Reg. No.1535: A medium size, white, washed and shaded orchid pink, semi-double, with narrow, upright petals. *C.x hybrid (C.japonica* **Dr Tinsley** x *C.saluenensis),* mid-season flowering; originated by Kramer's Bros. Nursery, Upland, California, USA. Plant growth, medium and compact. Received the Dr John Taylor Award for outstanding hybrid in 1973. For colour photos see: SCCS, 1974, *The Camellia Review*, frontispiece; Macoboy, 1981, *The Colour Dictionary of Camellias*, p.182 and the 1978, *American Camellia Yearbook*, facing p.21. Sport: **Angel Wings Variegated**. Chinese synonym: 'Shenchi'.

Angel Wings Variegated. *(C.x williamsii), American Camellia Yearbook*, 1979, p.102, Reg. No.1536 as 'Angel Wings Var.': A medium orchid pink, blotched white, virus variegated form of **Angel Wings,** semi-double with narrow, upright petals. Mid-season blooming. Originated by Kramer Bros. Nursery, Upland, California, USA. The flower form and size and the plant resemble the parent **Angel Wings.**

Angela. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie*, p.10; Imbricated. Seven rows of petals, bright red with a paler centre. Burnier Catalogue, 1855-1856. No description. Originated in Italy.

Angela. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.412; Chinese synonym for the Italy *C.japonica* **Angela Cocchi.**

Angela Gilmore. *American Camellia Catalogue,* 1954, p.301, Reg. No.201: A 9 year old seedling produced between seed parent 'Purity', (**Shiragiku**) and pollen parent 'Herme', (**Hikarugenji**); originated by O.K. Hopfer, Oakland, California, USA. Flowered first time in 1953. Flowers are complete double, imbricated similar to **Alba Plena,** from 7.5-8 cm in diameter. Petals have white background, veined with delicate pink. Blooms mid-season.

Angela Helen Thomas. *(C.japonica), American Camellia Yearbook,* 1974, p.167, Reg. No.1280: A 12 year old chance seedling *C.japonica,* first flowered 1969; originated by Blanding V. Drinkard, Mobile, Alabama, USA. Plant growth is upright and open, rapid in rate, with light green leaves, 8 cm x 3.8 cm. The anemone form flower, **Elegans** type, is snow white with 20 petals and 19 petaloids. Average size is 10 cm across by 5 cm deep. It is a free bloomer, tolerates low temperatures and blooms mid-season to late.

Angela Lansbury. *(C.japonica),* ACS, Aug., 1995, *The Camellia Journal,* vol.50, No.3, p.37, Reg. No.2346: Medium size white formal double *C.japonica* **Charlie Bettes** x **Gus Menard** seedling. Blooms mid-season to late. Originated in the USA by W.F. Homeyer Jr, Macon Georgia. ACS, 1995, *American Camellia Yearbook,* p.1 and color photo: The 17 year old seedling first bloomed 1984. Average size bloom is 8 cm across x 3.2 cm deep. Inner half petals are cupped inwards. Late in season they form a 5-6 pointed star. Plant growth is upright and spreading.

Angela Rouge. Vanderbilt, 1941, *Camellia Research, II,* p.2. Abbreviation for **Angela Cocchi Rouge.**

Angelia Dean. (*C.reticulata* hybrid). ACS, *The Camellia Journal,* Feb. 1997, p.15. A large, deep dark red with frosted sheen. A cross of **Silver Mist** x **Nuccio's Ruby.** Flowers mid-season to late. Originated by Marvin Jernigan, Warner Robins, Ga, USA. *American Camellia Yearbook,* 1997, p.1, colour photo before p.1. The 12 year old seedling first flowered in 1985. Average flower size is 12.7 cm across x 5 cm deep with 35 petals, 5 petaloids, white anthers and white filaments. Stated to have a unique colour – red is so dark it looks black.

Angelica. *(C.japonica), Catalogue General des plantes Cultivées dans L'Establishmant de la Société d'Horticulture de Belge.* 1842, p.21 as 'Anglica'. No description. Berlèse, 1843, *Iconographie;* pl.270: Originated in Italy by M.Mariani of Milan. A large, peony form flower, about 10 cm across, pure white to pale pink with here and there, stripes or tints of carmine. The centre is formed of many small, ruffled, compact petals, amongst which a few towards the centre attempt to resume their usual size and arrangement. See colour plate No.3, Book 7,

Verschaffelt 1853, *Nouvelle Iconographie.* Orthographic errors: 'Anglica', 'Angelique', 'Angelica de Mariany', 'Angliqua'. The name was erroneously used in America as a synonym for **Governor Mouton.** Note – Verschaffelt, 1853 says: "Probably obtained from seed by Mariani of Milan, Italy"; Charles van Geert, 1848 says it originated with Burnier.

Angelica (Burnier). *(C.japonica),* de Jonghe, 1857, *Beknopte Handleiding tot het Kweeken von Camellias,* p.109, as 'Angelica'. No description. Originated in Italy by Burnier & Grilli. (Believed extinct.)

Angelica. *Azalea and Camellia Society of America Yearbook*, 1933, p.22, 30. Erroneous synonym for **Governor Mouton.**

Angelica de Mariany. Verschaffelt Catalogue, 1847-1848, p.53, Orthographic error for **Angelica.**

Angelica Florentina. *(C.japonica),* Jacob Makoy et Cie Catalogue, 1849, p.19. No description. Originated in Italy. (Believed extinct.)

Angelica (Luzzatti). *(C.japonica),* Luzzatti, 1851, *Collezione di Camelie,* p.5: Perfectly imbricated, rose tending to violet. This appears quite different to Mariani's **Angelica** and is thus listed as a separate variety.

Angelica Mariani. *(C.japonica),* Jose Maria Serra, Establecimento de Horticultura, 1855, Catalogo, p.4. José Marques Loureiro, 1872-1873, Catalogue No.9, p.48. Peony form, rosy white, blotched pink. This is a different description to Mariani's **Angelica** above and is listed as a separate cultivar. Orthographic errors: 'Angelica Marianni', 'Angellea Marianni'.

Angelica Marianni. *Real Companhia Horticolo-Agricolo Portuense*, *Catalogue*, No.29, 1895-1896, p.43. Orthographic variant for **Angelica Mariani.**

Anita. *(C.japonica),* Armstrong Nursery Catalogue, 1940, with illustr.: Original tree on the Baldwin Estate, California, USA, origin Unknown. Large semi-double, light pink striped carmine red. Vigorous, upright, compact growth. Sports: **Anita's Blush, Rio Rita, White Anita.** According to the *American Camellia Catalogue*, 1951, the bloom is 9-11 cm across by 3.7 cm deep, with 3 loosely formed rows of round petals, slightly notched, 18-20 in number. Stamens short and central, filaments whitish yellow; anthers dark yellow. Leaves, medium size, olive green, 2.7 cm x 1.3 cm; leathery texture, tips short and blunt, midrib heavy, serrations black tipped, shallow and average. See colour photo Macoboy, 1981, *The Colour Dictionary of Camellias*, p.70.

Anita Bennett. *(C.japonica),* ACS, 1987, *The Camellia Journal*, vol.42, No.2, p.8, Reg. No.2045: Large white, semi-double *C.japonica.* Chance seedling. Flowers early to mid-season. Originated by Mrs Herman Johnson, Madison, Florida, USA. *American Camellia Yearbook*, 1987, p.79, Reg. No.2045, colour photo between p.60-61: The 6 year old seedling first bloomed 1985. Average flower size, 12.5 cm across x 6 cm deep, with 24 petals, 3 petaloids and yellow anthers. The outer row of petals have a pale pink tone. Plant growth is upright and medium with dark green leaves, 8 cm x 5 cm.

Anita Roche. *(C.japonica), American Camellia Yearbook,* 2000, p.1, colour photo p.c7. Reg. No.2537. A rose pink, semi-double chance seedling, with 11-12 petals showing veining, yellow anthers and white filaments. The 15 year old seedling first flowered in 1992. Originated by Ken Hallstone, Calif. USA. Flowers mid-season. Average flower size is 12-13.5 cm across. Plant growth is upright and average with light green leaves 10 cm long x 5 cm wide.

Anita's Blush. *(C.japonica),* McCaskill Gardens Catalogue, 1949; *American Camellia Yearbook*, 1954, p.301, Reg. No.94: A sport of 'Anita' which first flowered 1943. Originated by McCaskill Gardens, Pasadena, California, USA. Plant characteristics the same as 'Anita', also shape and colour of buds. Blooms are semi-double, colour white shading to blush pink. Mid-season to late blooming. See black and white photo, p.7 Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III.

Anita's Favourite. *(C.japonica),* Hillcrest Nursery Catalogue, 1958, as 'Anitas Favourite'. No description. Originated in USA.

Anita's Sport. Mark S. Cannon Scion Catalogue, 1962, p.1. Synonym for **Rio Rita.**

Anita's Triumph. *(C.japonica),* SCCS, 1954, *The Camellia. Its Culture and Nomenclature*, p.26; *American Camellia Yearbook*, 1965, p.226, Reg. No.733: (SCCS, No.62-22). Originated by Harvey L. Short, Pasadena, California, USA. A 10 year old seedling that first bloomed 1954, Seed parent: **Anita,** pollen parent unknown. The peony form flower 12.5 cm by 8 cm, is oriental red, streaked with blood red, stamens intermingled with petals. Flowers mid-season to late on a compact, upright plant.

Aniu Boshi. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.416; Chinese synonym for the USA *C.japonica* **Dr Agnew Hilsman.**

Anju-haku. (Anju White). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.25 with colour photo; English translation p.16. Small white, tubular to trumpet shaped single with cylindrical stamens. Flowers mid-season. Leaves elliptic to narrowly elliptic, small to medium size. Upright growth. Selected from wild camellias in Tottori Prefecture by Kumaji Anji, released by Iwao Kobashi in 1991.

Anjuhime. (Legendary Heroine of the Ancient Drama "Sanshôdayu"), *(C.rusticana),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.199: Medium size, soft peach pink, dappled with red at the apices of the petals, semi-double flower. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.25 with colour photo; English translation p.16. Leaves widely oval, small, flat. Cespitose. Named and released by Tokuji Ôoka in 1972. Originated in Kashiwazaki-shi, Niigata Prefecture, Japan. See note on **Zushiô.**

Ann Blair Brown. *(C.japonica), American Camellia Yearbook,* 1977, p.208, Reg. No.1441: A very large, light pink, with lighter pink petaloids, with a tendency to creamy lavender on some blooms. An 18 year old seedling of **Frau Geheimrat Oldevig,** formerly known as FGO 1-1-1; first bloomed 1967. Originated by Richard Dodd, Marshallville, Georgia, USA. The anemone (**Elegans**) type bloom has 20 petals and 55 petaloids, yellow anthers and cream filaments. Average size, 15 cm across and 9 cm deep. Mid-season blooming. Plant growth, upright, average and medium in rate with dark green leaves. See colour photo facing p.116, *American Camellia Yearbook*, 1979. Sport: **Ann Blair Brown Variegated.**

Ann Blair Brown Variegated. *(C.japonica), American Camellia Yearbook*, 1977, p.208, Reg. No.1441 as 'Ann Blair Brown Var.' A virus variegated form of **Ann Blair Brown** - Light pink blotched white. Originated by Richard Dodd, Marshallville, Georgia, USA. Chinese synonym 'Hua Bulang Nüshi'.

Ann Clayton. *(C.japonica), American Camellia Yearbook,* 1980, p.159, Reg. No.1658: A miniature white, shading to pink, formal double, *C.japonica* chance seedling, late flowering. Originated by Dr J.M. Habel, Suffolk, Virginia, USA. The 15 year old seedling first flowered 1964. Average flower size, 6 cm across by 3.7 cm deep with 65 petals; cold hardy. Plant growth, average, medium in rate with light green leaves 8 cm x 4 cm.

Ann Curtis. *(C.japonica), American Camellia Yearbook,* 1983, p.156, Reg. No.1862: A medium to large size, light pink, rose form double *C.japonica* chance seedling; early to mid-season flowering. Originated by Mary McLeod, Monticello, Florida, USA. The 10 year old seedling first bloomed 1977. Average flower size, 10 cm across by 3.7 cm deep. Plant growth is upright, average and rapid in rate with dark green leaves 10.5 cm x 5.5 cm.

Ann Day. *(C.reticulata x C.japonica), American Camellia Yearbook,* 1974, p.229, No.1301: A 10 year old hybrid, ['Crimson Robe' (**Dataohong**) x **Tiffany**] that first bloomed 1968. Originated by W.E. Sellers, Mobile, Alabama, USA. Plant growth is upright, rapid in rate with dark green leaves, 7.5 m x 2.5 cm. The 'Donckelaeri' (**Masayoshi**) type bloom, is **Tiffany** pink with 28

petals and 3-4 petaloids, yellow anthers and white filaments. Average size 15 cm across and 10 cm deep. Flowers open well with varying shades of pink, large petaloids, tight clustered stamens. See colour photo, *American Camellia Yearbook*, 1974, vol.I, facing p.21.

Ann English. *(C.reticulata).* ACS, *The Camellia Journal*, Nov. 1999, p.19, Reg. No.2505. A deep pink semi-double. Originated by Marvin Jernigan, Warner Robins, Ga, USA. *American Camellia Yearbook*, 1999, p.4, Colour photo before p.1. A cross of 'Homeyer #158' (**Tom Durrant** x 'Tali Queen [**Dali Cha**]) x 'Homeyer #155'. Flowers mid-season to late. The 7 year old seedling first flowered 1997. Average flower size is 15 cm across x 10 cm deep, with 20 petals, high rabbit ears, yellow anthers, and white with a pink cast filaments. Flowers have a purplish cast and heavy petal texture. Plant growth is spreading and average with dark green leaves 10 cm long x 3.8 cm wide.

Ann Fowler. *(C.japonica),* SCCS, 1958, *Camellia Nomenclature*, p.15: Blush pink. Large, anemone form. Medium size, compact growth. Mid-season blooming. Originated by M.R. Murray, Fort Valley, Georgia, USA. Orthographic error: 'Ann Towler'.

Ann Griffin. *(C.japonica),* Barnes 1956, *American Camellia Yearbook,* p.39: A large, rose pink, incomplete double flower, blooming in mid-season. Compact, upright growth. Orthographic error: 'Anne Griffin'.

Ann Kelley. *(C.japonica),* Pitkin, 1966, SCCS, *The Camellia Review*, vol.27, No.3, p.15: Although of unknown parentage, apparently has **Daikagura** in it makeup. Its form is similar and blooming season the same. It is a loose to tight peony form, with very large petals, and its deep rose colour is brighter than 'Daikagura Red', (**Benidaikagura**) and is larger by 1 cm. Its growth is average, dense and well branched. Originated by C.D. Cothran, Upland, California, USA.

Ann Lawton. *(C.japonica),* Pyron, 1959, *American Camellia Yearbook*, p.91: Large, semi-double with petaloids surrounding a cluster of yellow stamens. Pink. Originated by H.L. Lawton, Georgetown, South Carolina, USA.

Ann Lee. Gerbing's Azalea Gardens Supplement, 1943-1944, p.218. Orthographic error for **Anna Lee.**

Ann Lee. *(C.japonica),* ACS, 1992, *The Camellia Journal*, vol.47, No.4, p.26, Reg. No.2232. Originated by Dr O.V. Lewis, Picayune, Mississippi, USA as a chance seedling of **Elegans Supreme**: Rose pink, miniature formal double. Blooms mid-season with average upright growth. A 10 year old seedling that first bloomed 1985. Average flower size 5.7 cm across x 2.5 cm deep with 60 petals in 6 rows of 10 petals each, in a swirl pattern. Plant growth is upright, medium with dark green leaves 9.5 cm long x 3.2 cm wide. Note: Not to be confused with **Anna Lee**.

Ann Marie Hovey. James Rare Plant Nursery Catalogue, 1954-1955, p.5. Orthographic error for **Mrs Anne Marie Hovey.**

Ann Miller. *(C.japonica), American Camellia Yearbook*, 1950, p.323; and 1954, p.301, Reg. No.72: A 10 year old seedling of unknown parentage that first flowered in 1946. Originated by Paul E. Shepp. The plant has rapid, compact growth. Flower buds are oval and show colour for a long time. The flowers open slowly and are long lasting. They are incomplete double, some with large petaloids and some with mixed petaloids, 10-11 cm across, bright, light salmon pink. Orthographic error: 'Anne Miller.'. Sport: **Ann Miller Variegated.**

Ann Miller Variegated. *(C.japonica),* Outteridge, 1962, *1000 Named Camellias in Australia*, as 'Ann Miller Var.': A virus variegated form of **Ann Miller.** - Light salmon pink, blotched white. Originated in Australia.

Ann Morrison. *(C.japonica), American Camellia Yearbook*, 1980, p.160, Reg. No.1663: A medium size, light pink with darker pink outer petals, rose form double, *C.japonica* seedling, mid-season blooming. Originated by C.V. Bozeman, Hattiesburg, Mississippi, USA. The 15 year old

seedling first bloomed 1975. Average flower size is 10 cm across by 3.7 cm deep. Plant growth is upright and slow with light green leaves 7.5 cm long by 4 cm wide.

Ann Oliver. *(C.japonica), American Camellia Yearbook,* 1972, p.125, Reg. No.1188: An 8 year old chance *C.japonica* seedling that first bloomed 1969; originated by Mrs E.C. Oliver, Statisboro, Georgia, USA. Plant growth is average, medium in rate with light green leaves, 10 cm x 5 cm. The peony form bloom is light, clear pink with yellow anthers and filaments. It has 25-30 petals and 4 rabbit eared petaloids and is 11-12.5 cm across and 6 cm deep. Orthographic error: 'Anne Oliver'.

Ann Quarles. *(C.japonica), American Camellia Yearbook,* 1962-63, p.213, Reg. No.601: An 11 year old seedling of **Rosary** x **Leucantha,** ('Tricolor White'), that first bloomed 1954. Originated by H.E. Quarles, Mobile, Alabama, USA. Plant growth is upright and open, medium in rate with dark green leaves. The semi-double flowers, similar to **Frizzle White,** are 12.5-13 cm across and 6 cm deep and have 24-30 petals and 6 very frilly petaloids. The blooms are white with white stamens and open early to mid-season.

Ann Shackelford. Tammia Nursery Catalogue, 1960, p.2. Orthographic error for **Anne Shackelford.**

Ann Shaw *(C.japonica),* Jessep, 1957, ACRS, *Camellia Annual,* No.4, p.7. Reg. No.20: Originated by Mrs Shaw about 65 years ago at Bayswater, N.S.W., Australia. The plant still exists and bears white flowers with slight pink streaks and several branches with full informal double flowers, pink, edged white in the manner of **Lady Loch,** but flatter in the centre where the petals are very twisted and crowded. This pink form is registered by Mr. J. Shaw in the name of his mother who raised it as a seedling. It has been confused with **Lady Loch.** Orthographic error; 'Anne Shaw'.

Ann Smith. Thomasville Nursery Catalogue, 1957. Orthographic error for **Anne Smith.**

Ann Smith Variegated. Mark S. Cannon Scion Catalogue, 1962, p.1. as 'Ann Smith Var.' but as the parent was registered as 'Anne Smith' this cultivar name is considered to be an orthographic variant for **Anne Smith Variegated.**

Ann Solomon. Tammia Nursery Catalogue, 1965-1966. Orthographic error for **Anne E. Solomon.**

Ann Sothern. *(C.japonica), American Camellia Yearbook,* 1960, p.193, Reg. No.462: A 12 year old seedling of **Rosary,** originated by Earl Hudson, Sun Valley, California, USA that first bloomed 1954. Plant growth is upright, bushy and fast. Leaves average 11 cm long by 6 cm wide and are curled similar to **Arabella**. The flowers are 11-13 cm across and 6-7.5 cm deep, resembling **Ville de Nantes** in form with 17-20 petals and 1-3 petaloids erect amongst gold tipped stamens with white filaments. Blooming season is long, from early to late. Orthographic error: 'Anne Southern'. See colour photo p.70, Macoboy, 1981, *The Colour Dictionary of Camellias.*

Ann Swinton. *(C.japonica), American Camellia Yearbook,* 1973, p.188, Reg. No.1258: A 7 year old chance *C.japonica* seedling, first bloomed 1970, and originated by Mrs Daniel W. Ellis, Charleston, South Carolina, USA. Plant growth is spreading, average, open and medium in rate with 9.5 cm x 4 cm light green leaves. The peony form, **Daikagura** type, bloom is 2.5R5/11, deep pink in Munsel Hue, Nickerson Colour Fan. It measures 12.5 cm across and 7.5 cm deep with 42 petals. Anthers are yellow and filaments white. Early to mid-season blooming. Outer petals flat while centre petals stand up and twist and curl around a group of stamens.

Ann Towler. Tammia Nursery Catalogue, 1965-1966. Orthographic error for Ann Fowler.

Ann Wahl. *(C.japonica), American Camellia Yearbook,* 1957, p.297, Reg. No.289: A 6 year old chance seedling, originated by Mrs Ernest F. Wahl, Thomasville, Georgia, USA. Bloomed for the first time in 1953. Leaves are similar to those of **Debutante.** The blush pink flowers are

incomplete double with mixed petaloids similar to **Nobilissima.** The flower has 8-10 broad, outer petals and a large cluster of 160-175 tall petaloids with white stamens interspersed and is 10-10.5 cm across and 5.5 cm deep. Flowering season, early to mid-season. Sport: **Ann Wahl Variegated.**

Ann Wahl Variegated. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1962, p.1 as 'Ann Wahl Var.': A virus variegated form of **Ann Wahl** - Blush pink blotched with white. Originated in USA.

Ann Walton. *(C.japonica),* ACS, *The Camellia Journal*, Nov. 1999, p.19, Reg. No.2504. A white, formal double to rose form seedling of 'Homeyer #103' x **Charlie Bettes.** Flowers mid-season to late. Profuse bloomer, long lasting. Average flower size is 12.7 cm across x 5 cm deep, with 52 petals. Originated by Marvin Jernigan, Warner Robins, Ga, USA. *American Camellia Yearbook*, 1999, p.4, colour photo before p.1. The 12 year old seedling first flowered in 1990. White anthers and filaments. Heavy petal texture.

Ann Wilson. *(C.japonica), American Camellia Yearbook*, 1957, p.198, Reg. No.298: A 13 year old chance seedling, originated by Wilson's Nursery, Batesburg, South Carolina, USA. This seedling first flowered 1949. Plant growth is upright, dense and medium in rate. Leaves have spear head tips and are 6-7.5 cm long by 3.8-5 cm wide. The flowers average 7.8 cm across and 5.2 cm deep, with 24-30 petals and 4-5 petaloids. The colour is light pink with darker veins. The form is similar to **Emily Wilson**. Flowers mid-season to late.

Anna Bolena. *(C.japonica),* de Jonghe, 1851, *Traité de la Culture du Camellia,* p,95. No description. Luzzatti, 1851, *Collezione, di Camelie,* p.4: Magnificent imbricated flower, deep rose, full, veined. Originated in Italy.

Anna Brenner. Stuart Low Co. Camellia List, 1939-1940. (One page). Orthographic error for **Anna Bruneau.**

Anna Brumaeusa. Lenten Nursery Catalogue, 1963. Orthographic error for **Anna Bruneau.**

Anna Bruneau. *(C.japonica),* Jules Menoreau Catalogue, 1880: Imbricated, beautiful red. C. Smith & Sons Nursery Catalogue, (ca 1914) under: "double flowered varieties. A handsome plant bearing red flowers. Raised by Jules Bruneau, Nantes, France about 1856". Orthographic errors 'Anna Gruneau', 'Anna Brumaeusa', 'Anna Brenner'. Sport: **Anna Bruneau Variegated.** Received a Preliminary Commendation from the RHS, 1957.

Anna Bruneau. McIlhenny Catalogue, 1935. This cultivar proved to be the virus variegated form of 'Mathotiana Rosea' and the use of the name 'Anna Bruneau' here is not valid. See **Mathotiana Rosea Variegated** for the correct name.

Anna Bruneau (France). SCCS, 1951, *The Camellia. Its Culture and Nomenclature.* The affix (France) was added to distinguish the true clone from the erroneous. It can thus be regarded only as a synonym for **Anna Bruneau.**

Anna Bruneau Variegated. *(C.japonica),* Guichard Nursery Catalogue, 1971-1972 as 'Anna Bruneau Var.': Imbricated, red spotted with white. Blooms mid-season. Originated in France.

Anna Castignan. da Silva 1880, *Forcing Varieties of Camellias in Oporto*, p.2. Orthographic error for **Anna Costigan.**

Anna Costigan. *(C.japonica),* Stefano Pagliai Catalogue, 1867, p.67: Vivid red, perfect imbrication. Linden Catalogue, 1875: Double, bright vermilion, lighter centre, striped and spotted rosy white. Originated in Italy. Orthographic error: 'Anna Castigan'.

Anna Dzofka *(C.sasanqua).* J & F Thoby, Gaujacq, France, Catalogue, 2005, p.39; No details.

Anna Flo Lee. Mark S. Cannon Scion Catalogue, 1962, p.1. Synonym for **Anna Lee.**

Anna Frank. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, p.61 with colour photo; Medium size, peony form, red (RHS.CC.45D). A seedling of 'Pomponia Semiplena'

(Pomponia Semi-duplex) x 'Rubra Simplex **(Rubra),** first flowered 1988. Originated by Dott. Guido Cattolica, Livorno, Italy.

Anna Frost. *(C.japonica),* Jacob Makoy et Cie Catalogue, 1849, p.19. No description. Franchetti, 1855, *Collezione di Camelie*, p.10: Imbricated. A vivid pink. In America the name was used erroneously as a synonym for 'Comte de Gomer'. Orthographic errors: 'Annia Frost', 'Anna Froster', 'Anna Prost'. Originated in Italy.

Anna Froster. Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete*, p.7. Orthographic error for **Anna Frost.**

Anna Gruneau. Tresco, 1985, *England's Island of Flowers*, p.141. Orthographic error for **Anna Bruneau.**

Anna Harper. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* No description. Originated in USA.

Anna Howard. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* A pink, incomplete double with a purple cast, 7.5 cm in diameter. Stamens having white filaments and yellow anthers are intermixed with petals and petaloids. Similar to **Gloire de Nantes.** Foliage is rounded, dark green, serrate, 7.5 cm x 4 cm. Plants are vigorous growing and compact. The variety was found in a garden in Waycross, Georgia, USA.

Anna Jane. *(C.japonica), American Camellia Yearbook.* 1961, p.218, Reg. No.547: A 9 year old chance seedling that first bloomed 1957. Originated by Mrs J. David Worth, New Orleans, Louisiana, USA. Plant growth, upright, open and medium in rate with 8 cm x 4 cm dark green leaves. The rose form double flowers, 8 cm across and .5 cm deep, are a softer pink than **Debutante** with a few yellow stamens and 40-45 petals. Blooms early to mid-season. Colour plate, front cover ACS, 1962, *The Camellia Journal*, vol.17, No.10.

Anna Laureati. *(C.japonica),* Stefano Pagliai Catalogue, 1867, p.67: [from] Spada. Carmine pink, imbricated. Originated in Italy by Spada.

Anna Layard. *(C.japonica),* Hazlewood Nursery Catalogue, 1945, p.4: Originated in New Zealand by Duncan & Davies from a seedling from the garden of Mrs Layard, Taranaki and listed by them in their 1952 Catalogue, p.25. A light, rose red, large, single to semi-double with reflexed petals. Very early flowering. Orthographic errors: 'Anne Layard', 'Anna Ledyard'.

Anna Lee. *(C.japonica),* Fruitland Nursery Catalogue, 1946-1947, p.29: A seedling of unknown parentage, originated by Dr W.G. Lee, Macon, Georgia, USA, and named for his wife. Rose red. Medium size semi-double of flat form, with prominent central stamens in five fascicles. Bloom is 11-12.5 cm across and 2.6 cm deep with 16-18 round petals in three rows, tips notched, surfaces crinkly. Mid-season blooming. Medium, sturdy, upright growth, leaves dark green, 12.5 cm long by 5 cm wide, with short, sharp apex and shallow but coarse serrations. Previously released by Gerbings Azalea Gardens Nursery under the erroneous orthography: 'Ann Lee'. Sport: **Anna Lee Variegated.** Synonym: 'Anna Flo Lee'.

Anna Lee Variegated. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* A virus variegated form of **Anna Lee** - Rose red blotched white. Originated in USA.

Anna L. Schwabe. *(C.japonica), Camellia Digest*, 1(3), 1943: Blush pink, striped and splashed red. Medium size semi-double. Medium, compact growth. Originated by Rhodellia Nursery, USA.

Anna Louise. *(C.japonica), American Camellia Yearbook*, 1975, p.235, Reg. No.1363: A 6 year old chance *C.japonica* seedling. first bloomed, 1972; originated by Jim Ridgeway, Hartwell, Georgia, USA. Plant growth, dense, medium with dark green leaves, 8 cm long by 4 cm wide. The semi-double **Lady Vansittart** type, bloom is red and white variegated and solid red, with dark gold anthers and light gold filaments, 14 petals and 7 petaloids. Blooms mid-season to late.

Anna M. Page. *(C.japonica)*, Hazlewood Nursery Catalogue, 1945: A medium to large size, semi-double to anemone form. Rose pink. Spreading growth. Blooms mid-season. It is presumed to be a Camden Park seedling as Miss Page was a companion of Mrs John Macarthur and a labelled plant was found at Camden Park. Originated in Australia.

Anna Mariotti. *(C.sasanqua)*, Mariotti Nursery Catalogue, 1924, p.17: Beautiful pure white, semi-double. Del Lungo and Girardi, 1928, *Le Camelie*, p.121, fig. 23: Flower single, pink, with wrinkled petals and delicately perfumed. Autumn flowering. Originated in Italy by Mariotti. Seems to be some confusion in descriptions. The illustration in *Le Camelie* indicates white flushed pink.

Anna Mary Hovey. Portland Camellia Nursery Catalogue, 1955-1956, p.6. Orthographic error for **Mrs Ann Marie Hovey.**

Anna Mary Stone. *(C.japonica), American Camellia Yearbook*, 1961, p.218, Reg. No.544: A 25 year old seedling from a 150 year old unamed parent. First bloomed 1940. Originated by Mrs Audley M. Stommreich, Natchez, Mississippi, USA. Plant growth is rapid, dense, upright, with dark green leaves, 5 cm long by 3.2 cm wide. The semi-double flowers, 11 cm across and 3.8 cm deep, are watermelon pink with deep orange stamens and have 18 petals and 10 petaloids. Blooms midseason.

Anna Prost. Peer, 1956, *American Camellia Yearbook*, p.54. Orthographic error for **Anne Frost.**

Anna Ray. *(C.japonica), American Camellia Yearbook*, 1962, p.213, Reg. No.600: An 8 year old chance seedling that first bloomed 1958; originated by Mrs Homer Ray Sr., Moultrie, Georgia, USA. Plant growth is dense and rapid with dark green leaves, 10 cm long by 5.5 cm wide. The peony form flowers, similar to **Daikagura,** are 13 cm across and 7.5 cm deep with 40 petals and 12-15 petaloides. The blooms are light, rose pink, (Munsell Hue 75RP 7/10-6/12) with creamy filaments and yellow anthers; stamens in centre cluster and in 5 fascicles, petals folded and upright, veined a deeper colour. Flowers early to mid-season. Colour plate, front page, ACS, 1963, *The Camellia Journal*, vol.18, No.3. Sport: **Anna Ray Variegated.**

Anna Ray Variegated. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1964-1965 as 'Anna Ray Va.'; SCCS, 1968, *Camellia Nomenclature*, p.19 as 'Anna Ray Var.': A virus variegated form of **Anna Ray** - Rose pink blotched white. Originated in USA.

Anna Smyre. *(C.japonica), American Camellia Yearbook*, 1971, p.43, Reg. No.1137: A 6 year old chance *C.japonica* seedling that first bloomed 1963; originated by E.J. Prevatt, Bonneau, South Carolina, USA. Plant growth, upright, dense and rapid with dark green leaves, 7 cm long by 3.2 cm wide. The semi-double flower, similar to **Frizzle White**, is a strong pink colour with yellow anthers and pink filaments. It is 12 cm across and 7 cm deep and blooms mid-season to late.

Anna Wahl Variegated. Mark S. Cannon Scion Catalogue, 1963-1964, p.1 as 'Anna Wahl Var.': Orthographic error for **Ann Wahl Variegated.**

Anna Zacchini. Burdin Maggiore & Co., Catalogue, 1856-1857. Orthographic error for **Anne Zucchini.**

Anna Zucchini. *(C.japonica)*, Verschaffelt, 1848, *Nouvelle Iconographie*, Book 10, pl.1: We are indebted to Mr Burdin of Milan Italy, sole owner, till now, who writes us that it bloomed last spring and that its blossoms were either red or pink and white, or white with pink stripes; this is also found on 'Pomponia' and **Teutonia.** This Camellia has dark wood, elongated ovate, pointed leaves, regularly serrate with slightly deep notches. The blossoms, which resemble the double white Camellia (**Alba Plena**), as to shape, are slightly flattened. Orthographic errors: 'Anna Zuchini', 'Anna Zucchani', 'Anna Zucchinni', 'Anna Zacchini'. An entirely different cultivar usurps this name in America. To distinguish this invalid variety its name has been modified to **Anna Zucchini (Rubel)** as it was first missnamed by Rubel.

Anna Zucchini Rosea. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p. 11. Synonym for **Anna Zucchini Pink Tint.**

Anna Zucchini (Rubel). *(C.japonica)*, Rubel, 1933, *Choice Pot Grown Camellias*, *List*, No.63, erroneously as 'Anna Zucchini': White with an occasional pink sport. Medium size semi-double. Medium, compact growth. Mid-season blooming. Not the variety listed in the old literature which is a formal double red, pink or white. Originated by the Orton Nursery, Winnabow, North Carolina, USA. Orthographic variants: 'Anna Zuchani', 'Anna Zuchine', 'Anna Zuchini'.

Anna Zucchini Pink Tint. *(C.japonica)*, Harris, Longview Nursery Retail Price List, 1955-1956 as 'Ann Zucchini Pink Tint'. A pink tinted form of **Anna Zucchini (Rubel).** Originated at Longview Nursery, USA.

Anna Zucchani. Manning, 1934, *Plant Buyer's Index.* Orthographic error for **Anna Zucchini (Rubel).**

Anna Zuchini. de Jonghe, 1851, *Traité de la Culture du Camellia.* Orthographic error for **Anna Zucchini.**

Anna Zuchinie. The Pacific Camellia Society, 1946, *Camellia Nomenclature*, p.4; erroneously as a synonym for 'Purity'.

Anna Zucchinni. Manning, 1939, *Plant Buyer's Index.* Orthographic error for **Anna Zucchini (Rubel).**

Annabel Landsell. Hazlewood & Jessep,1972, *Checklist-Camellia Cultivars from Nursery Catalogues*, p.11. Orthographic error for **Amabel Lansdell.**

Annabel Langsdale. Charmwood Nursery Catalogue, 1964, ACS, *The Camellia Journal*, vol.19, No.2, p.17. Orthographic error for **Amabel Lansdell.**

Annabel Lansden. Thermal Nurseries (Rotorua), Ltd Catalogue, 1986, p.1. Orthographic error for **Amabel Lansdell.**

Annabelle Fetterman. (*C.reticulata* hybrid), *American Camellia Yearbook*, p.175, 1984, Reg. No.1935: Released by Ray Gentry as a seedling from Frank Pursel, Oakland, California, USA. A very large, pale pink semi-double *C.hybrid* (['Cornelian' (**Damanao**) x **Brigadoon**] x 'Crimson Robe' (**Dataohong**)), mid-season blooming. A 7 year old seedling, first flowered 1978. Average flower size, 13 cm across and 5 cm deep. Plant growth, upright, average and rapid in rate with dark green leaves, 10 cm long by 6 cm wide.

Annalena. *(C.japonica)*, Luzzatti Catalogue, 1853. No description. Franchetti, 1855, *Collezione di Camelie:* Imbricated with a form similar to *Rosa centifolia*, bright red. Originated in Florence, Italy.

Annalena Negri. *(C.japonica)*, Franchetti, 1855, *Collezione di Camelie*, p.10: Very deep red, imbricated. Originated in Italy.

Annalisa. *(C.reticulata)*, Kramer's Bros. Nursery Catalogue, 1977: Soft pink. Large semi-double. Vigorous, open growth. Flowers mid-season to late. Originated by Kramer Bros. Nursery, Upland, California, USA.

Annavari. *(C.japonica)*, ICS *Journal*, 2004, p.73 with colour photo, Reg. No.45: Originated in Mahalon, France, by M. Eugène Tanneau. An open pollinated seedling which first flowered 1996 at circa 8 years. An upright shrub of medium growth rate. Blooms mid-season. A red-pink (RHS.CC.52B), with radiating lighter stripe mid-petal. Rose form double, 10 cm across x 5 cm deep. Note: "Annavari" in the Breton language is equivalent to "Anne Marie" in French.

Anne Alexandre. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943: Delicate rose--pink. Medium size, semi-double to loose pine-cone formation. An old plant at Magnolia Gardens is either a lost label plant importation or a local seedling.

Anne Askew. *(C.japonica), American Camellia Yearbook*, 1974, p.167, Reg. No.1278: A 24 year old *C.japonica* chance seedling that first bloomed 1956; originated by J. Thomas Askew, Athens, Georgia, USA. Plant growth, average, medium in rate, with dark green leaves 10 cm long by 5 cm wide. The semi-double, 'Donckelaeri' (**Masayoshi**) type, bloom is rose-pink with 15 petals, golden yellow stamens and yellow filaments. It is over 10 cm across and 3.5 cm deep. Slightly fimbriated with a crepe-like finish. Long bloomer from early to late.

Anne Brown. *(C.japonica),* Mcllhenny Catalogue, 1945-1946, p.2: Large, rose-pink single with prominent stamens. Late blooming. Originated by McIlhenny, Avery Island, Louisiana, USA.

Anne-Claire. *(C.japonica),* Minier, C., Catalogue, 1986-1987, p.74: Cherry red. Originated in France.

Anne Curtis. *(C.japonica),* SCCS., 1990, *Camellia Nomenclature*, p.13: Light pink. Medium size, rose--form double. Vigorous, upright growth. Blooms early to mid-season. Originated by M. McLeod, Monticello, Florida, USA. First flowered 1982.

Anne de Bretagne. *(C.japonica),* Claude Thoby, 1993, *Camélias,* pp.10, 19, 22, 37: White formal double, late blooming. Originated in France.

Anne E. Solomon. *(C.japonica), American Camellia Yearbook*, 1960, p.193, Reg. No.504: A 12 year old chance seedling; originated by Arthur W. Solomon, Savannah, Georgia, USA. First bloomed 1958. Plant growth, upright, open and rapid with light green leaves averaging 10 cm long by 5 cm wide. The blush pink semi-double flowers, 11 cm across and 5.5 cm deep, have 14-16 petals with a few petaloids and white stamens. Blooms mid-season. Orthographic error: 'Ann Solomon'.

Anne Louise Howard. *(C.reticulata). New Zealand Camellia Bulletin*, March 2008, No.159, p.4, Reg. No. 480. Registered by Harvey Howard, Blenheim, New Zealand. A seedling from a **Glowing Embers** seedling, pollinated by an unknown male parent. First flowered in 2005. Plant is upright, of open form and medium growth rate. Dark green leaves are 13.5 cm x 7.5 cm. Flower is semi-double, very large, 18 cm across by 9 cm deep, with about 20 heavy textured petals that sit up, giving depth and charm to the flower. Filaments are white and anthers bright yellow. The stamen mass is broken up into separate clumps by the irregularly-shaped inner petals. Flowers are rich pink (R58D – 62A). The inner parts of the petals have a darker veining (RHS.CC. 61D). Flowers early to mid-season.

Intense orchid pink, semi-double to loose peony form. Blooms mid-season. Plants look like sasanquas but with flower size and quality improved. Moderate grower; blooms freely. Originated in USA.

Anne Miller. Valley Garden Supplies Catalogue, 1951. Orthographic error for **Ann Miller.**

Anne Michelle. *(C.pitardii* hybr.), ACRS., Dec.1990, *Camellia News*, No.115, p.10, Reg. No.385. Originated by Kenneth Brown, Higgins Road, Mitcham, Victoria, Australia. A chance seedling from a *C.pitardii* var. *pitardii* that first flowered 1986. Incomplete double to peony flowers of 24 petals, light pink shading to soft pink in the centre. (RHS.CC.62A), 8 cm across x 4 cm

deep. Free flowering mid-season on a slow growing plant. Leaves ovate, flat, glossy, serrulate, acuminate, 5 cm x 2.5 cm. Petals notched, filaments mixed with petaloids. Flowers shed whole. Bicoloured outer petals, with large bunch of filaments and petaloids in paler shades, then finally white.

Anne Oliver. Hazlewood & Jessep,1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.11. Orthographic error for **Ann Oliver.**

Anne Pound. *(C.japonica), American Camellia Yearbook*, 1966, p.83, Reg. No.852: A 9 year old chance seedling that first bloomed 1958; originated by Julington Nurseries Inc., Jacksonville, Florida, USA. Plant growth is upright, open and medium in rate with light green leaves, 8 cm long by 3.8 cm wide. The semi-double flower is light, blush pink with inconspicuous stamens. Bloom is 11 cm across by 5 cm deep with 45-50 petals. It has 3 rows of elongated petals, centered with small 5 cm high, elongated petals. Early flowering.

Anne Prideaux. *(C.japonica),* ACRS, 1982, *Camellia News*, No.83, p.22, Reg. No.282: Originated by Mrs A. Prideau, Corinda, Queensland, Australia. Seed parent **Countess of Orkney**, pollen parent unknown. The upright, dense plant has dark green, lanceolate, 10 cm x 5 cm leaves. Flowers 10 cm across, peony; soft pink inner petals, with darker pink veined outer petals, a few stamens. Blooms mid-season.

Anne Quinn Reily. *(C.japonica),* McIlhenny Catalogue, 1949: A medium size, 8 cm across, semi-double. Pinkish white petals throughout are thick textured and V'ed at the edges. The three rows of petals are somewhat large and slightly ruffled. The centre of the bloom consists of several pinkish white petaloids, interspersed with white stamens tipped primuline yellow. Originated by McIlhenny Nurseries, Avery Island, Louisiana, USA.

Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III, p.7: Red, occasionally blotched white, semi-double, 9 cm across by 4.5 cm deep. Petals up to 12, obovate, cupped, 4.5 cm long by 3.5 cm wide, apices notched. Central column of erect stamens with creamy filaments, united one third of their length, small, golden anthers. Leaves, dark, glossy green, heavily cupped and twisted, elliptic, 7 cm long by 3.5 cm wide. Plant habit, upright, densely foliated. Mid-season to late flowering. Seedling originated by Alonzo Boardman,

Augusta, Georgia, USA. Black and white photo, Hertrich, 1969, *Camellias in the Huntington Gardens*, vol. III, p.9.

Anne Vincent. *(C.japonica), American Camellia Yearbook*, 1978, p.128, Reg. No.1482: A large, white with red to pink border, formal double *C.japonica* seedling, flowers mid-season to late. Originated by John B. Adams, Lake Charles, Louisiana, USA. The 6 year old seedling has 80 petals, 20 regular petals and 60 incurved petals with 60 plus petaloids. Average size, 10.5 cm across by 3.2 cm deep. Plant growth, upright, medium in rate with dark green leaves, 8 cm long by 3.8 cm broad.

Anne Witman. *(C.japonica), American Camellia Yearbook*, 1972, p.125, Reg. No.1175: A 12 year old chance *C.japonica* seedling; originated by Mrs M.J. Witman, Macon, Georgia, USA. Plant growth, spreading and rapid with 8 cm x 5 cm, dark green leaves. The peony form bloom is fire red, with yellow anthers and white filaments. It is 12.5 cm across and 7.5 cm deep with 30 petals and a few petaloids. Blooms early. The petals are heart shaped and curl upwards with numerous bundles of stamens mixed in.

Annemarie Holman. *(C.japonica)*, ACRS, 1969, *Camellu News* No.36, p.15, Reg. No.114: Originated by C.F. Walton, St Ives, N.S.W., Australia. A chance seedling, probably of **Jean Lyne**, first flowered 1968. The flower is 10 cm across, white, semi-double, sometimes with a few petaloids and an occasional pink or red streak. Mid-season blooming on a spreading, open plant of medium vigour. The mid-green leaves are ovate, slightly twisted, with a small pointed apex. Orthographic variant: 'Anne Marie Holman'.

Annemarie Walton. *(C.japonica)*, ACRS, 1969, *Camellia News*, No.36, p.15, Reg. No.113: Originated by C.F. Walton, St Ives, N.S.W., Australia. A chance seedling first flowered 1968. Informal double, 9-10 crn across. The leaves are ovate with slightly pointed apices.

Annetta Tuccheri. *(C.japonica)*, Franchetti, 1855, *Collezione di Camelie*, p.10: Imbricated, deep pink streaked with white. Burnier Catalogue, 1855-1856. No description. Synonym: 'Annette Tuccheri vel Borghettiana'. Orthographic error: 'Annetta Tuccari'. Originated in Italy.

Annetta Tuccheri vel Borghettiana. Antofilo, ed., 1857-1858. *I Giardino* vol. IV, p.97. Synonym for **Annette Tuccheri.**

Annette. *(C.japonica)*, Waterhouse, 1947, *Camellia Quest*, p.16: A Camden Park seedling, 38/51. No description. Originated by Macarthur, Camden Park, N.S.W., Australia. (Believed extinct.)

Annette. *(C.sasanqua)*, Blackwell Nursery Catalogue, 1950-1951, p.13: A special feature of this variety is its beautiful flower buds, pink as they expand preparatory to opening; free flowering, early. Introduced by the Semmes Nursery, Semmes, Alabama, USA. This name is let stand as the Macarthur variety is extinct.

Annette Carol. *(C.pitardii),* ACRS, 1980, *Camellia News,* No.75, p.24: Reg. No.251: *C.pitardii* var. *pitardii* hybrid. Originated by E.R. Sebire, Wandin North, Victoria, Australia. A seedling that first flowered 1977. Spreading, open habit with 8 cm x 4 cm mid-green, lanceolate leaves. Flowers, incomplete double, 7 cm across, pale pink, blooming mid-season to late. Colour photos: ACRS, 1981,*Camellia News,* No.79, p.41 and *New Zealand Camellia Bulletin,* vol. XV, No.2, p.18, 1987. Chinese synonym 'Fenshanhu'.

Annette Franchetti. *(C.japonica),* Verschaffelt, 1856, *Nouvelle Iconographie,* Book I, pl. IV: Remarkable for the perfection of its form and its ruddy pink colouring. It was obtained from seed by M. Franchetti, Florence, Italy, from whom M. Miellez at Lille has bought the entire stock. A particular charm is the evenness and perfect imbrication of its numerous petals, which compose blooms of lovely, delicate pink with a pale pink stripe in each. Orthographic errors: 'Annetta Franchetti', 'Annetti Franchetti'.

Annette Gehry. *(C.japonica), American Camellia Yearbook,* 1960, p.193, Reg. No.519: A 6 year old chance seedling that first bloomed 1957; originated by Dr E.L. Gehry, Orangeburg, South Carolina, USA. Growth habit is upright, dense and rapid in rate. The dark green leaves are 8-10 cm long by 5-7 cm broad. The anemone form flower is light, lavender pink, shading to a white centre with yellow stamens. Flowers are 11 cm across by 7.5 cm deep. Cold hardy. Blooms early to mid-season. See colour photos: *American Camellia Yearbook,* 1964, facing p.116 and pl.5, *Encyclopedia of Camellias in Colour,* vol.II, 1978, p.23. Orthographic error: 'Annette Gray'. Chinese synonym: 'Geli'.

Annette Gray. Gish, 1962, SCCS, *The Camellia Review,* vol.23, No.16. Orthographic error for **Annette Gehry.**

Annette King. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* No description. Originated in USA.

Annette (McIlhenny). *(C.japonica),* McIlhenny Nursery Catalogue, 1952-1953, invalidly as 'Annette': Large size, full pink, petals in centre resemble rabbit ears, interspersed with yellow stamens. A Jungle Gardens seedling. Originated by McIlhenny, Avery Island, Louisiana, USA.

Annette Wilson. *(C.japonica),* Tammia Nursery Catalogue, 1965-1966. Medium size, pink formal double. Originated in USA.

Annetti Franchetti. Rollisson & Son, 1875-1876, Plant Catalogue, p.100. Orthographic error for **Annette Franchetti.**

Anni Asiyou. Shao, Taichong, 1992, *The Observations from the Camellia World,* p.10. Chinese synonym for the USA *C.japonica* **Anne Askew.**

Annibal. *(C.japonica),* van Houtte, 1846-1847, Catalogue, 27:19. No description. Auguste van Geert Nursery Catalogue, No.117, 1850, p.2: Imbricated, dark red. Central petals with broad white stripes. Verschaffelt, 1850, *Nouvelle Icongraphie,* Book I, pl.IV: A richly coloured perfection received two years ago from Italy. The blooms, of average size, are a bright poppy red; at the centre only, are broad, pure white stripes, faintly striated with red, stand out. The perfectly imbricated petals are rounded and deeply emarginate. At the centre they are oblong, outspread and streaked. This variety should not be confused with an inferior variety grown for several years.

Annibale. Maupoil & Figlio Catalogue, 1853, p.37. Orthographic error for **Annibal.**

Annie Feast. *(C.japonica),* Feast's Catalogue, 1868, p.16. No description. Originated in USA. Orthographic error: 'Anne Feast'.

Annie Frost. Manning Catalogue, 1939. Orthographic error for **Anna Frost.**

Annie Gray. *(C.japonica)*, Orton Nursery Price List, 1947-1948: Cherry red. Medium large, semi-double with upright petals. Upright growth. Blooms mid-season. Originated in USA by the Orton Nursery.

Annie Jones. *(C.japonica)*, ACS., 1989, *The Camellia Journal*, vol.44, No.3, p.9, Reg. No.2148: A large size, pale pink, semi-double *C.japonica* chance seedling that blooms early to late season. Originated by Annie Jones, Colquit, Georgia, USA. *American Camellia Yearbook*, 1989, p.118: The 12 year old seedling first bloomed 1980. Average flower size is 10 cm across x 6 cm deep with 28 petals and yellow anthers and filaments. Plant growth is upright and medium with dark green leaves, 8 cm long x 2 cm wide.

Annie L. Bell. *(C.japonica)*, *American Camellia Yearbook*, 1959, p.267, Reg. No.415: A 9 year old chance seedling originated by Annie L. Bell, Fort Deposit, Alabama, USA. Plant growth is upright, open and medium in rate with 8 cm x 3.2 cm, light green leaves. The semi-double, white flowers, 7.5 cm across and 3.2 cm deep, have 13 petals and yellow stamens. Texture, thin and dainty. Flowers mid-season.

Annie Laurie. *(C.japonica)*, SCCS, 1945, *Camellias*, p.20 gives this as a synonym for **Tricolor California;** however SCCS, 1950, *The Camellia, Its Culture and Nomenclature*, p.23 has it as a sport. SCCS, 1946, *Camellias*, p.20: Mauve. Large, semi-double. Vigorous, upright, bushy growth. Sport of **Tricolor California** originated by Hearn, USA. Synonym: 'Mrs Eva Hill'. See black and white photo, p.29, Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II.

Annie M. True. *(C.japonica)*, Gentry, 1968, ACS, *The Camellia Journal*, vol.23, Nod, p.26: No description. Originated in USA. No valid listing located. Sport: **Annie M. True Variegated.**

Annie M. True Variegated. *(C,japonica)*, Gentry, 1968, ACS, *The Camellia Journal*, vol.23, No.1, p.26 as 'Annie M. True V.': A virus variegated form of **Annie M. True.** Originated in USA. No valid listing located.

Annie McDonald. SCCS, 1951, *The Camellia. Its Culture and Nomenclature.* Synonym for **Eugene Lize.**

Annie R. Cantey. *(C.japonica)*, *American Camellia Yearbook*, 1961, p.218, Reg. No.564: A 6 year old chance seedling that first bloomed 1959; originated by Rev. S.O. Cantey, Marion, South Carolina, USA. Plant growth is spreading, medium in rate with 11 cm x 5.5 cm, dark green leaves. The peony form flowers, similar to **Debutante,** 12.5 cm across and 10 cm deep, are purplish pink with pink filaments and have 11 petals and 67 petaloids.

Annie Tee. *(C.japonica)*, *American Camellia Yearbook*, 1968, p.128, Reg. No.963: A 5 year old chance seedling that first bloomed 1961; originated by Mrs Annie T. Williams, Dotham, Alabama, USA. Plant growth is upright, dense and medium in rate with 7.5 cm x 3.8 cm, dark green leaves. The peony form flower, similar to **Daikagura,** is 11 cm across and 6 cm deep. Its colour is ruby red with golden yellow stamens. Blooms mid-season. Sport: **Annie Tee Variegated.**

Annie Tee Variegated. *(C.japonica)*, Cannon, 1972, ACS, *The Camellia Journal*, vol.27, No.3 as 'Annie Tee Var.': A virus variegated form of **Annie Tee** - Ruby red, blotched white. Originated in USA.

Annie Wylam. (*C.japonica)*, SCCS, 1960, *Camellia Nomenclature*, p.28: Bright pink, shading to white in centre. Medium, peony form to rose form double with many slender petaloids. Medium, open, upright growth. Blooms early to late. Blooms tend to be rose form double in climates such as England where it received an RHS, "Award of Merit" in 1981. Originated by W. Wylam, California, USA.

Anniversario. *(C.japonica)*, van Houtte, 1858, Catalogue, 72:5: Deep rose, dotted with white. Imbricated. Orthographic variant: 'L'Anniversario', 'La Anniversario'. Originated in Italy.

Anniversary. *(C.japonica), American Camellia Yearbook,* 1959, p.268, Reg. No. 363: A 5 year old chance seedling, originated by Eagleson Nurseries, Port Arthur, Texas, USA. First flowered 1956. The dark green leaves are 8 cm x 5.5 cm. The bright red, formal double flowers are 8 cm across by 4 cm deep and resemble **Alba Plena** and have about 80 petals. Flowers Mid-season to late.

Ann's Delight. (*C.reticulata* hybrid). ACRS, *Camellia News,* Autumn 2003, No.161, p.8, colour photo front cover, Reg. No.544. Originated by H.L. Lane, Melville, West Australia. A chance seedling that first flowered 1989. A large, deep pink (RHS.CC.64D), peony form flower of 40 petals, and stamens, 13 cm diameter x 7 cm deep. The stamens are displayed loosely within the flower. Flowers freely mid-season on an upright, spreading plant of medium growth. Leaves mid-green, medium sized, keeled. Chinese synonym 'Kuaile'.

Ann's Delight. Some plants of *C.sasanqua* **Ann's Welcome** sold under this name.

Ann's Memorial. *(C.x williamsii).* ACRS, *Camellia News,* No.131, 1994, p.7, Reg. No.432, colour photo p.2: Originated by Alan Truran, Hornsby, NSW Australia as a chance seedling of **Bowen Bryant.** First flowered 1987. A white semi-double to informal double of 14-30 petals, 11.5 cm wide x 4 cm deep; flowers early to mid-season on an upright, rapidly growing plant. Leaves matt green, elliptic, flat, apices acuminate, margins serrulate, 10 cm long x 4 cm wide. Petals slightly notched, filaments flared. The white flower contrasts with the creamy filaments. Stamens about 350.

Ann's Welcome. *(C.sasanqua).* C. Aust, *Camellia News,* No.182, Autumn 2010, p.7 with colour photo; Regn No.601-N; Seedling of **Edna Butler**, first flowered 2007. Meium size, white single blooms on a strong growing compact bush with dark green foliage. Originated by Craig Carroll, Carroll's Country Gardens & Nursery, Mt Tomah, NSW, Australia, and released by Flower Power & Arborglen Nurseries. Has sometimes been erroneously sold as 'Ann's Delight'.

Annulata. *(C.japonica),* Jacob Makoy et Cie Catalogue, 1839, p.16. No description. Loudon, 1840, *The Gardeners' Magazine,* vol.16, p.307. Raised by Dr Sacco of Milan, Italy. No description. (Believed extinct).

Anonima. *(C.japonica),* Luzzatti Catalogue,1953; Franchetti, 1855, *Collezione di Camelie*, p.10: Dark red, with white stripes. Imbricated. Originated in Florence, Italy.

Antarès. *(C.japonica).* Claude Thoby, 1993, *Camélias,* pp. 10, 16, 25, 37; colour plate p.27: Large glowing red semi-double of 10-12 rounded petals and central stamen column of white filaments and yellow anthers. Leaves broad-lanceolate, apices acute to acuminate. Originated in France.

Antarmetta. *(C.japonica),* Giles & Son Nursery Catalogue, 1881, p.91. No description. Originated in Australia. (Believed extinct.)

Antarctic Star. *(C.japonica), New Zealand Camellia Bulletin,* 1981, vol.XII, No.2, p.7, Reg. No.166: A chance seedling of *C.japonica* originated by Mr & Mrs W.H. Peters, Tauranga, New Zealand. First flowered 1978. Growth habit is average with dark green 12 cm x 5 cm leaves. The anemone form flower, 10 cm across by 3 cm deep, has 9-12 petals and an average of 100 petaloids and is white with yellow anthers and creamy white filaments. It shows very few stamens and flowers Mid-season to late. Orthographic error: 'Anaric Star'.

Antheropetala. *(C.japonica),* Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani. Originated by Ridolfi in Italy. No description. (Believed extinct).

Anthographa. *(C.japonica)*, Colla, *Camelliografia*, 1843, p.132: Petals all light red with dots and irregular lines of carmine red. Corolla, considerable petals, those exterior round-oval, disposed regularly in 5-6 rows, standing apart; those of the interior, graduating to smaller size, oval-oblong, irregularly folded. It was obtained from the Banker Negri, Milan, Italy in the autumn of 1839. "It belongs to the section 'Punctata Piene' or 'Imperialis' of which it is the most beautiful. Its flowers resemble a carnation which gardeners call 'Script'. I have given it the name **Anthographa** (script flower) instead of 'Agenorea' ". According to Burdin Maggiore & Co, 1849-1850 Catalogue, this is a synonym for **Villageoise.**

Antica. *(C.japonica)*, Shirley Hibbert, 1871, The Floral World Garden Guide, vol.6, new series, p.125. No description. (Believed extinct).

Anticipation. *(C.x williamsii)*, *New Zealand Camellia Bulletin*, vol.III, No.1, p.37, 1962, Reg. No. 14: A seedling of *C.saluenensis x C.japonica* **Leviathan,** originated by L.E. Jury, New Plymouth, New Zealand. Flowers early to late season with dark, green leaves and upright habit. First flowered 1959. Flowers, peony form, 10 cm across with 6 rows of petals and numerous petaloids. Colour Red Purple Group 63B overlaid with Red Group 53C. For Colour photos see: *New Zealand Camellia Bulletin*, vol.IX, No.4, between pages 20-21; p.143, Macoboy, 1981, *The Colour Dictionary of Camellias* and *American Camellia Yearbook*, 1980, facing p.143. Awards include: RHS, "Award of Merit", 1974, RHS, FCC 1975. Sport: **Anticipation Variegated.**

Anticipation Variegata. Duncan & Davies (UK) Ltd, 1995, Wholesale Plant List, p.5. Illegal orthography for **Anticipation Variegated.**

Anticipation Variegated. *(C.x williamsii)*, *New Zealand Camellia Bulletin*, vol.X, No.4, 1978, p.24 Reg. No.133: This cultivar is a virus variegated form of Mr L.E. Jury's saluenensis hybrid, **Anticipation.** All other descriptive particulars are the same as the original cultivar. Originated in New Zealand. Colour photo, *New Zealand Camellia Bulletin*, vol.XII, No.7, 1982, p.25. Chinese synonym 'Fuse Qiwang'.

Antigone. *(C.japonica)*, Dodd, 1968, *Adventures in Camellia Seedlings.* p.12, colour photo: A small, soft pink, anemone form with large, ruffled outer petals and an open centre of mixed stamens and small, twisted petals. Originated by Richard Dodd, Marshallville, Georgia, USA.

Antigoni. *(C.japonica)*, SCCS, 1950, *The Camellia. Its Culture and Nomenclature*, p.23: Large, red semi-double. Vigorous bushy growth. Mid-season blooming. Originated in USA, by Malbis.

Antique Charm. *(C.hybrid). New Zealand Camellia Bulletin*, 1994, Issue No.118, vol.XVIII, No.5, p.31, Reg. No.340: Originated in New Zealand by Les Jury. Rose form double, soft pink, (RHS.CC.55C), petal margins paler to almost white on central edge. Flower buds red. Blooms are 9 cm across x 2.5 cm deep with 53 petals. Growth habit upright and dense but very slow with small, light green leaves. Blooms mid-season.

Aozhou Zhi Guang. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.430; Chinese synonym for the Australia *C.japonica* **Australis.**

Aozora. (Blue Sky), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.146, colour photo and description: Small to medium size, campanulate single, dark pink, channelled. Petals rounded, oval, in 2 rows; outer row tips reflexed. Stamens cylindrical, anthers yellow. Leaves elliptic, mid-green, apices long-acuminate, margins finely serrate. Blooms early to mid-season. Originated in Japan. A seedling of **Kikuzuki.** Originated and named by Noboru Nagahama.

Apache. *(C.japonica), American Camellia Yearbook*, 1961, p.218, Reg. No.587: An 8 year old chance seedling that first bloomed 1959; originated by Dr Gilbert E. Fisher, Union Springs, Alabama, USA. Plant growth is upright, of average denseness and rapid in rate. The dark green leaves average 12.5 cm x 3.8 cm. The semi-double flowers, 13 cm across and 6 cm deep, are brilliant red, with yellow stamens and have 20 plus petals and 3 or 4 petaloids. Blooms mid-season. SCCS, *Camellia Nomenclature* 1968, p.19 has it as a synonym for **Red Giant** previously registered with the ACS, by Shackelford in 1954. Sport: 'Apache Variegated'.

Apache Chief. *(C.japonica),-American Camellia Yearbook-*, 1966, p.83, Reg. No.834: A 7 year old seedling (No.1007) that first bloomed 1962; originated by Albert and Alice Home, Moncks Corner, South Carolina, USA. The leaves are dark green and average 11 cm x 5.5 cm. The plant growth is medium in rate, upright and dense. The semi-double flower, similar to 'Donckelaeri' (**Masayoshi**), is 13 cm across and has 37 petals and 12 petaloids. Its colour is bright rose pink with yellow anthers and white filaments. As the flower ages it takes on an undertone of purple. Falls intact. Some of the petaloids form trumpets and some flags are purple. Blooms early to mid-season.

Apache Variegated. *(C.japonica),* SCCS, 1962, *Camellia Nomenclature*, p.16 as 'Apache Var.': A virus variegated form of **Apache** - Deep pink, blotched white. Originated in USA.

Ape's Lips. Waterhouse, 1970, ACRS, *Camellia News*, No.40, p.7. Synonym for **Xingchun.**

Aphrodite. *(C.hiemalis).* ACS, *The Camellia Journal*, Sept. 2005, p.28, colour photo p.29. A seedling of *C.hiemalis* **Mine-no-yuki** which first bloomed in 1999. Originated by Robert Green, Fairhope, Ala, USA and propagated by Green Nurseries. The rose form flower is white, edged with magenta pink, and often has a peach-pink bud centre. Petals are wavy and ruffled edged. Diameter is 9 cm. Plant is upright and dense, and flowers very freely early to mid-season. *American Camellia Yearbook,* 2005, p.39 and colour photo p.c3. Dark green leaves are 5.7 cm x 2.5 cm.

Apisiformis. Peer, 1956, *American Camellia Yearbook*, p.56. Orthographic error for 'Apucaeformis', synonym for **Quercifolia.**

Apolinia d.Italie. Seidel, 1847, *Pflanzen Catalog*, p.5. Orthographic error for **Apollina.**

Apollina. *(C.japonica),* Berlèse, 1837, *Monographie*, ed.1, p.59, 126: A vigorous shrub, filled with numerous, spreading branches; leaves 8 cm x 6 cm, roundish-oval, sub-cordiform, of a green almost black, veins prominent. Flower, medium size, 8 cm across, full, of a delicate rose; petals of the circumference, rounded and entire, those at the centre, distorted, crenate and depressed. Oudin, Lisieux, Nursery Catalogue, 1844, p.9 as 'Apollon': Large size, perfectly imbricated flower, transparent, bright soft pink. Orthographic variant: 'Apolline'. Synonyms: 'Apollinae d'Italie', 'Apolinia d'Italie'. Orthographic errors: 'Appollina', 'Apollinae', 'Apollinea d'Italie', 'Appolina', 'Apollon', 'Apolliniana'. According to Le Texnier, 1911, catalogue, p.31: grown about 1831 by Cachet, Anjou, France.

Apollinae. Berlèse, 1843, *Iconographie*, p. facing pl.163. Orthographic error for **Apollina.**

Apollina Nova. *(C.japonica)*, Cachet Catalogue, 1840-1841, p.2. No description. Originated in France by Cachet. (Believed extinct.)

Apolline. Angelo Longone Catalogue, 1861. Orthographic variant for **Apollina.**

Apollinea d'Italie. van Houtte, 1843-1844, Catalogue, 12:tt. Synonym for **Apollo.**

Apolliniana. Cachet Catalogue, 1840-1841, p.2. Orthographic error for **Apollina.**

Apollo. *(C.japonica)*, Trillon, Le Mans Nursery Catalogue, 1843, p.3: Large size, imbricated, transparent pink. van Houtte Catalogue, 1844-1845, 18:9. No description. Berlèse, 1845, *Monographie*, ed.3, p.122: Full Double. Delicate pink finely tipped with soft carmine. Originated in Italy by Mariani, Florence.

Apollo. *(C.japonica)*, Rovelli Nursery Catalogue, 1874, p.30: Imbricated, red, strong growth, extra. Originated in Italy.

Apollo (Pauls). *(C.japonica)*, *The Garden*, 1911, p.249 as 'Apollo': Puddle & Hanger, 1961, RHS., *The Rhododendron and Camellia Yearbook*, No.15, pp.111-112: Semi-double, 15 petals, orbicular or oblate, 5 cm wide by 4.5 cm long, central petals smaller, with an irregular central cluster of stamens and a few petaloids. The colour is Turkey Red, (HCC, 721/1) occasionally blotched white.Habit, vigorous, branching and open with elliptical leaves, 10 cm x 5 cm, serrate from the middle to the apex, very shallowly serrate to the base, apex acuminate to long-acuminate, glossy, dark green. This cultivar received a RHS "Award of Merit" in 1956. It was originated about 1900 in a group of single and semi-double varieties introduced by the English nurseryman, William Paul. Both flowers and foliage are sometimes inclined to variegation and the name **Apollo Variegated** has been applied to the predominantly variegated form. It has been confused with another Paul introduction **Jupiter**, which received an Award of Merit when erroneously exhibited as 'Apollo'. It is this confusion that causes some nursery catalogues to list it as "single to semi-double". **Apollo** can be distinguished from **Jupiter** by its deeper red, more numerous petals and its long, pointed leaves which have a slight twist. Synonyms: 'Compton's Brow Cherry', 'Compton's Brow Pink', 'Paul's Apollo'. Orthographic errors:

‘Appollo’, ‘Opollo’, ‘L’Apollo’. See black and white photo, RHS, *The Rhododendron and Camellia Yearbook*, 1961, No.15, pl.42.

Apollo (McIlhenny). *(C.japonica),* McIlhenny, 1937, *600 Varieties of Camellias*, p.2 invalidly as ‘Apollo’: Five petal single. Prolific bloomer. Rose red. Introduced by Bobbink & Alkins, Rutherford, New Jersey, USA.

Apollo Novissima. *(C.japonica),* Desportes, 1847, *Revue Horticole*, ser.3, vol.1, p.217: Flower regularly imbricated, the pink petals traversed by white lines; Porcher, 1847, *Revue Horticole*, p.446: Flowers a shade of pink deeper than **Sacco Vera.** The slender, closely packed petals are regularly imbricated in 7 or 8 rows, those in the centre, paler than the outer petals. Mercatelli, 1881, *Catalogo della Camelie:* Large regularly imbricated flower; very broad petals, uniform deep red. Note: This completely red form would appear to be a sport which has taken over the identity of the original variegated pink cultivar.Originated in Italy.

Apollo Variegated. *(C.japonica),* Puddle and Hanger, 1961, RHS *Rhododendron and Camellia Yearbook*, No.15, p.112: The name **Apollo Variegated** has been applied to the form showing predominantly variegated flowers. A virus variegated form of **Apollo (Pauls)** - Orient red, heavily blotched white. Originated in England. In Australia this cultivar was confused with **Mars Variegated** and **Amagashita.**

Apollo 14. *(C.japonica), American Camellia Yearbook*, 1972, p.125, Reg. No.1198: An 11 year old chance japonica seedling that first bloomed, 1966; originated by Mary Alice and Neal Cox, Georgetown, South Carolina, USA. Plant growth is upright, dense and medium in rate with dark green leaves measuring, 8 cm x 3.8 cm. The formal double flower measures, 12.5-15.5 cm across and 5 cm deep. Flowers mid-season. It has good texture and lasting quality, many blooms showing 75-80% white with deep pink, moired and blended throughout the bloom. Synonym: ‘Apollo 14 Variegated’. Chinese synonyms ‘Hua Aboluo’ as ‘Apollo 14 Var.’ and ‘Aboluo’ as **Apollo 14**.

Apollo 14 Variegated. Cannon, 1974, ACS, *The Camellia Journal*, vol.29, No.1 as ‘Apollo 14 Var.’. As the original registration No. 1198 of **Apollo 14** includes the variegated form, this must be accepted as a synonym.

Apollon. Oudin, Lisieux Nursery Catalogue, 1844, p.9. Orthographic error for **Apollina.**

Appiani. *(C.japonica),* Ambroise Verschaffelt, 1850, General Catalogue, p.45. de Jonghe, 1851, *Traité de la Culture du Camellia*, p.96. No description. van Houtte, 1851, Catalogue, 44:3. No description. Verschaffelt, 1855, *Nouvelle Iconographie*, Book VI, pl.III: We have lately received this little known variety from Mr F. Mariani, Florence, Italy. It has blossoms of medium size, with large, perfectly imbricated, rounded and emarginate petals, of a vivid, carmine rose colour, with broad, whitish stripes at the centre of each. Synonym: ‘Andrea Appiani’. Orthographic error: ‘Apiani’, ‘Appioni’, ‘Apian’.

Appioni. Vanderbilt, 1940, *Camellia Research*, p.2. Orthographic error for **Appiani.**

Applause. *(C.reticulata* hybrid), *American Camellia Yearbook*, 1980, p.160, Reg. No.1679: A large, salmon pink, semi-double *C.reticulata* hybrid, (**Mudan Cha** x **Elizabeth Johnstone**), mid-season to late flowering; originated by Nuccio’s Nurseries, Altadena, California, USA. (Their No.7131). A 9 year old hybrid seedling, first bloomed 1971. Average flower size 12 cm across. Plant growth is upright and medium in rate with dark green leaves, l0 cm long by 5 cm broad.

Apple Blossom. *(C.japonica),* RHS, Index 1927, p.282: A single with 7 obovate petals, 3.5 cm wide and long, with a central cylindrical stamen cluster about 1.8 cm long, with golden anthers. The flower is white, flushed Rose Opal, HCC, 022/2, about 6.5 cm across. Leaves, broadly-elliptic, 8 cm long by 6 cm broad, apex shortly acuminate, margins, shallowly crenate-serrulate. Plant habit is upright and compact. This cultivar was introduced by the

Sander Nursery, Bruges, Belgium, about 1915 and named by them 'Joy Sander'. However no prior listing of this name has been located and it thus remains a synonym. Synonyms 'Apple Blossom'(England), 'Joy Sander'. Received a RHS, "Award of Merit", 1933. There are 4 other Camellias which bear the name 'Apple Blosson' but this one would appear to have priority. The Japanese camellia **Furô-an** has been confused with this cultivar in England.

Apple Blossom. Nuccio's Nurseries Catalogue, 1955, p.3: Single pink and white, small. Listed as a *C.williamsii.* Vigorous, open growth. Blooms early to mid-season. SCCS, 1960, *Camellia Nomenclature*, p.124: Pink and white. Medium size single. Vigorous, upright growth. Mid-season to late. This is now listed by Nuccio's as **Showa Wabisuke** and it is the same as the Domoto form. Reduced to synonym for **Showa Wabisuke.** Chinese synonym 'Pingguohua'.

Apple Blossom. Domoto Camellia List, 1932 as a small, white single, lightly washed rose colour on the petal reverse. Early. Listed under *C.saluenensis.* This now appears to be the same as 'Little Princess', itself a synonym for **Showa-wabisuke.** See black and white photo, p.77, 79, Hume, 1946, *Camellias in America.*

Apple Blossom (Coolidge). *(C.sasanqua), Azalea and Camellia Society of America Yearbook*, 1933, p.23, invalidly as 'Appleblossom': A lovely single, blush and white, like a glorified apple blossom, with conspicuous yellow stamens. Delightfully scented. Blooms early. Coolidge Nursery Catalogue, 1939, invalidly as 'Apple Blossom'. White flushed pink. Single. Medium size. According to Hertrich, 1959, *Camellias in the Huntington Gardens*, vol. III, p.274: Developed by Coolidge Gardens, Pasadena, California, USA, from seed imported from Japan about 1921. According to Fendig, 1953, *American Camellia Catalogue*, it is a medium size, single white, blushed pink, about 6 cm across. The stamens open in a semi-sunburst shape and filaments and anthers are dark yellow. It is a good pillar plant lending itself to espalier. Fragrant. In the *C.sasanqua* group the name has also been used as a synonym for the Japanese variety **Fukuzutsumi.**

Apple Blossom. Hume, 1946, *Camellias in America:* "Dr D.W. McLean advises that a variety of *C.japonica* was propagated from an old plant in the garden of Mr Youtz, Pasadena, California, and named 'Apple Blossom' by him." This has since been found to be the same as **Americana.**

Apple Blosson (England). SCCS., 1968, *Camellia Nomenclature,* p.16. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.12. Synonym for **Apple Blossom.**

Apple Blossom (Fischer). *(C.japonica),* Jutta Fischer, 1994, "Success with Camellias", inside front cover illustration, and text p.64, invalidly as 'Apple Blossom': Medium size pink, hose-in-hose semi-double with 15 large, rounded petals. Centre fascicle of stamens, yellow anthers, white filaments.

Apple Blossom (McIlhenny). *(C.japonica),* McIlhenny Catalogue, 1941 as 'Apple Blossom': Pale blush pink, deepening towards the margin; medium sized semi-double. Originated in USA.

Apple Blossom (Youtz). SCCS, 1945, *Camellias,* p.18. Synonym for **Americana.**

Apple Queen. *(C.japonica), American Camellia Yearbook*, 1954, p.301, Reg. No.184: A 10 year old chance seedling; originated by Hugh Shackelford, Albany, Georgia, USA. First flowered 1950. Plant growth is of average density and rapid in rate with rather pointed, medium size leaves. Flower buds are long, white with blush pink edges. The incomplete double flowers, white with pink edges, have 18-25 petals with rabbit ears in the centre and are from 10-12.5 cm across. Blooms mid-season to late.

Appleblossom. Hume, 1947, *National Horticultural Magazine*, 26(3):190. Orthographic variant for 'Apple Blossom', synonym for **Showa-wabisuke.**

Appleblossom (Japan). Manning,1939, *Plant Buyer's Index*, ed.4. Synonym for **Showa-wabisuke.**

Appolina. Isola Madre Catalogue, 1845. Orthographic error for **Apollina.**

Appollina. Rovelli Catalogue, 1874. Orthographic error for **Apollina.**

Appollinae. Harrison, ed., 1846, *Floricultural Cabinet*, vol.14, p.20. Orthographic error for **Apollina.**

Appollo. Wall Cottage Nursery Catalogue, 1982, p.2. Orthographic error for **Apollo.**

Apricot Red Pine Cone Shell. Ikeda, 1970 *American Camellia Yearbook*, p.144. Synonym for **Xinghong Songzike.**

April Blush. *(C.japonica), American Camellia Yearbook,* 1993, p.3, "Breeding Camellias for Garden Culture" by C.R. Parks and K.M. Parks. A seedling of **Berenice Boddy** x **Dr Tinsley**. 102-F-30-CF-33. A compact slow growing plant with semi-double, shell-pink flowers. Bud set is heavy. Blooms mid-season. ACS, Aug. 1995, *The Camellia Journal*, vol.50, No.3, p.37, Reg. No.2341: Large size, rose pink semi-double. Originated by Dr C.R. Parks, Chapel Hill, North Carolina, USA. ACS, 1995, *American Camellia Yearbook*, p.1 with colour photo: A 29 year old seedling. Average size flower is 10.5 cm across x 4 cm deep with 20 petals and 0-10 petaloids, yellow anthers and cream filaments. Cold hardy. Plant growth is spreading, with dark green leaves 10 cm long x 5 cm wide.

April Dawn. *(C.japonica). American Camellia Yearbook,* 1993, p.3, "Breeding Camellias for Garden Culture" by C.R. & K.M. Parks: A seedling of **Berenice Boddy** x **Hikarugenji** ('Herme'); 60-L-9-CF-29; Erect habit, vigorous growth rate with shades of shell-pink and white variegated (not virus induced) formal double flowers. Heavy bud set and long blooming period. The pink and white variegation amongst the flowers over the whole of the plant is interesting. Originated by Dr C.R. Parks, Chapel Hill, North Carolina, USA.

April Kiss. *(C.japonica),* Camellia Forest Nursery Catalogue, 1995, p.9: A seedling of *C.japonicas* **Berenice Boddy** x **Reg Ragland,** originated by Dr. C.R. Parks, Chapel Hill North Carolina, USA. A compact, well formed plant with a moderate growth rate and small, medium red formal flowers, mid-season blooming with heavy bud set. The earliest flowering of the "April" series. SCCS, *Nomenclature Supplement* 2014. Pinkish red, small to medium formal double. Cold hardy, Zone 6B.

April Lynn Poe. *(C.japonica), American Camellia Yearbook,* 1972, p.125, Reg. No.1168: A 10 year old chance seedling japonica, first bloomed 1965; originated by W. Lee Poe, Birmingham, Alabama, USA. Plant growth is upright and rapid with dark green leaves measuring 10-12.5 cm long by 7 cm broad. The, **Frizzle White** type, bloom is peach pink with golden anthers and creamy filaments and is 12.5 cm across by 5 cm deep. Blooms mid-season. See colour photos: *American Camellia Yearbook*, 1971, facing p.102. SCCS, 1972 *Camellia Nomenclature*, facing p.16.

April Melody. *(C.japonica),* Camellia Forest Nursery Catalogue, 2008, p.15; A compact, erect and moderate grower with single, small, rose red flowers. Early and long flowering. Sturdy grower and very cold hardy. **Berenice Boddy** x **Reverend John Bennett.** Originated and released by Camellia Forest Nursery, Chapel Hill, N.C., USA.

April Pink. *(C.japonica),* Camellia Forest Nursery Catalogue, 2008, p.15; Soft pink, small, formal double flowers in mid-season. Petal edges often darker. Plant has survived -9ºF temperature. **Berenice Boddy** x **Kumasaka.** Plant is dense and compact. Originated and released by Camellia Forest Nursery, Chapel Hill, N.C., USA.

April Remembered. *(C.japonica), American Camellia Yearbook*, 1993, p.3, "Breeding Camellias for Garden Culture" by C.R. & K.M. Parks: A seedling of **Berenice Boddy** x **Dr Tinsley**; 102-F-6; Vigorous fast growing plant with large, cream to pink shaded flowers; semi-double. Bud

set substantial. Flowers from early to late in the season. Slightly larger and hardier in all respects than **Berenice Boddy.** ACS, Aug. 1995, *The Camellia Journal*, vol.50, No.3, p.37, Reg. No.2342: Large size magenta rose semi-double. Originated by Dr C.R. Parks, Chapel Hill, North Carolina, USA. ACS, 1996, *American Camellia Yearbook*, p.2 with colour photo. A 29 year old seedling. Average flower size is 12.5 cm across x 5 cm deep, with 18 petals, yellow anthers and cream filaments. Cold hardy with a long blooming season. Plant growth is average with dark green leaves 8 cm long x 5 cm wide. Chinese synonym 'Siyue Huiyi'.

April Rose. *(C.japonica), American Camellia Yearbook*, 1993, p.2; "Breeding Camellias for Garden Culture" by C.R. & K.M. Parks: A seedling of **Berenice Boddy** x **Kumasaka,** 60-0-CF-31; A compact, relatively slow growing, well formed plant with rose-red, formal double flowers. Heavy bud set and medium to late season flowering. Very cold hardy. Originated by Dr C.R. Parks, Chapel Hill, North Carolina, USA.

April Showers. *(C.japonica),* SCCS, 1958, *Camellia Nomenclature*, p.16: Clear pink. Medium anemone form, with somewhat undulate outer guard petals and petaloids grown together at the base. Medium dense, upright growth. Late flowering. Originated in the USA by Marshall.

April Snow. *(C.japonica), American Camellia Yearbook*, 1993, p.3; "Breeding Camellias for Garden Culture" by C.R. & K.M. Parks: A seedling of **Triphosa** x **Betty Sheffield Supreme**; 152-1; A compact, medium to slow growing, well formed plant with white, rose form double flowers. Heavy bud set, late blooming, very hardy. Originated by Dr C.R. Parks, Chapel Hill, North Carolina, USA.

April Tryst. *(C.japonica), American Camellia Yearbook*, 1993, p.3, "Breeding Camellias for Garden Culture": Open pollinated seedling 232-NX: Erect habit with medium growth rate, a well formed plant with bright red, anemone form flowers. Heavy bud set over a long period within the middle of the flowering season. Dense clusters of petaloids are easily damaged by cold in the unopened bud stage. ACS, Aug. 1995, *The Camellia Journal*, vol.50, No.3, p.37, Reg. No.2343: Medium size, currant red petals with red and white variegated petaloids, anemone form. Seedling of **Yours Truly.** Originated by Dr. C.R. Parks, Chapel Hill, North Carolina, USA. ACS, 1995, *American Camellia Yearbook,* p.2 with colour photo. a 27 year old seedling. Average flower size 10 cm across x 5 cm deep with 15 petals, 135 petaloids, yellow anthers and rose pink filaments. Cold hardy. Plant growthis upright and medium in rate with dark green leaves 8 cm long x 5.5 cm wide.

Apuaeformis. Verschaffelt, 1865, *Expositor Bruxelles.* Orthographic error for 'Apucaeformis', synonym for **Kingyo-tsubaki.**

Apucaeformis. Verschaffelt, 1865, *Expositor Bruxelles.* Annonymous, 1866, *Gardeners' Chronicle*, (26):51-52 as 'Apuaeformis'. Synonym for **Kingyo-Tsubaki.**

Apucoeformis. Jacob Makoy et Cie Nursery Catalogue, 1874, p.19. Orthographic error for 'Apucaeformis', Synonym for **Kingyo-Tsubaki.**

Apunga. *(C.japonica),* Courtois, 1833, *Magazin d'Horticulture*, 13pt.D4:315. No description. Berlèse, 1840, *Monographie*, ed.2, p.106, 107: Leaves about 8 cm long by 6 cm broad, long-oval, a little acuminate, glossy, unequal serrations, dark green. Buds long acuminate, scales green. Flower 8 cm across, sometimes larger, double, cherry red, petals of the circumference are not numerous, broad, well imbricated, those at the centre, unequal, twisted and of a small number, The flower resembles **Reine des Pays-bas.** Makoy, 1839 says that it is a synonym, although Courtois, 1833 lists them as separate cultivars. Originated in Germany. Orthographic error: 'Apunta'.

Apunta. *Catalogue General des plantes Cultivées dans L'Establihment de la Société d'Horticulture de Belge*, 1842, p.21. Orthographic error for **Apunga.**

Apuseformis. Gadeceau, 1908, *Revue Horticole*, p.61-64. Orthographic error for 'Apucaeformis', Synonym for **Kingyo-Tsubaki**

Aquarius. *(C.japonica), American Camellia Yearbook*, 1972, p.126, Reg. No.1206: A 10 year old chance japonica seedling, first bloomed 1965; originated by Neal Rogers, Theodore, Alabama, USA. Plant growth is upright, dense and slow with 11 cm x 5 cm light, green leaves. The formal double, light pink bloom measures 10-11 cm across and 5 cm deep. Blooms mid-season to late. Sport: **Aquarius Variegated.**

Aquarius Variegated. *(C.japonica)*, Cannon, 1975, vol.30, No.1 as 'Aquarius Var.': A virus variegated form of **Aquarius** - Light pink blotched white. Originated in USA.

Aquifolium. *Useful Plants of Japan*, 1895, colour plate. Synonym for **Kingyo-tsubaki.**

Aquillon. *(C.japonica)*, Graulhie, 1844, *Revue Horticole*, p.67: From seed of **Leeana Superba;** flower larger and firmer than **Triumphans** or **Sophie**. Originated in Belgium.

Ara Jisji. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars* from *Nursery Catalogues*, p.13. Corruption of the Japanese name **Arajishi.**

Arabella. *(C.japonica)*, Vanderbilt, 1941, *Camellia Research*, p.2; No description; *American Camellia Yearbook*, 1949, p.240: A chance seedling, grown by Mrs Mary Edinger, Hood, California, USA and named in 1939 for her sister. Although the seedling is old it has only just come into commercial propagation. A light, brick red, incomplete double with folded, upright petaloids mixed with fascicles of stamens, which are predominantly central. The variety is very similar to the garden form of *C.reticulata*, **Captain Rawes** but is deeper in colour.

Arabian Nights. *(C.japonica)*, McCaskill Gardens Catalogue, 1958: Oriental pink with shadings of deeper pink. Large, semi-double with ruffled petals. Vigorous, upright growth. Mid-season blooming. Originated by McCaskill Gardens, California, USA. Sport: **Arabian Nights Variegated.**

Arabians Nights Variegated. *(C.japonica)*, SCCS, *Camellia Nomenclature*, p.19 as 'Arabian Nights Var.': A virus variegated form of **Arabian Nights** - Oriental pink blotched white. Originated in USA.

Araboshi. Satomi, 1962, *Supplement to Camellia Varieties in Japan.* Different reading for **Arahôshi.**

Arahi. (obscure), *(C.japonica)*, Hamamatsu, 1818-1825, *Setsuyô Kikan.* No description. Originated in Japan. (Believed extinct.)

Arahôshi. (Warrior Priest), *(C.japonica)*, Minagawa, 1957, *Chinkashû;* Tuyama & Futakuchi, 1966, *Camellia Cultivars of Japan*, p.190, pl.112: A medium size, orange-red semi-double of 20 petals in 2 or 3 rows, with an irregular centre of stamens and 2 or 3 small, twisted petals. Late flowering. Leaves, narrowly elliptical to elliptical, apex acute, medium size, wavy and twisted. Vigorous, erect growth becoming spreading. For illustration see: *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.200; Seibundô Shinkôsha, 1979, *Senchinshû*, p.14. Different reading 'Arabôshi'. Originated in Kantô, Japan. Said to be a seedling of **Arajishi.**

Arai. (Place name), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô:* Medium size, white with vivid streaks of red, round corolla. Originated in Japan. (Believed extinct.)

Arai. (Place name), *(C.japonica), Chinka Zufu*, [before 1700], Watanabe, 1969, pl.581: Medium size, white, open peony form with spots of red and stamens intermixed with centre petals. Originated in Japan. (Believed extinct.)

Arai-in. Nobelius Nursery Catalogue, 1941, p.30. Corruption of 'Arai-inbeni'. Synonym for **Hitosuji.**

Arai-inbeni. Wada Nursery Catalogue, 1941, p.29. Synonym for **Hitosuji.**

Arainin. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.13. Corruption of the Japanese name 'Arai-in', synonym for **Hitosuji.**

Araiso. (Wind Swept Shore), *(C.rusticana)*, Hagiya and Ishizawa, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.8, p.4, black and white photo; *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.370; Seibundô Shinkôsha, 1979, *Senchinshû*, p.14, colour photo, p.199, description: Flower, crimson, spherical, peony form, informal double, the centre a confused mass of small twisted petals, petaloids and stamens, like a marigold flower, 8-10 cm across. Late flowering. Outer petals 12-20, rather narrow and waved; in the centre, approximately 120 slender, twisted petals, confused with about 120 stamens. Leaves, medium size to small, elliptical, reflexed, stem hairy, mid-green, sharply, shallowly serrate; clearly veined. Vigorous, erect growth. Colour photo p.381, Yokoyama & Kirino.1989, *Nihon no Chinka.* Originated in Ojiya City, then at the Agricultural Dept. of the Niigata University, Japan by Dr Hagiya.

Araja. *(C.japonica)*, Gerbing Camellia Nursery, 1963, ACS, *The Camellia Journal*, vol.l8, No.4, inside back cover. No description.

Aragishi. Vanderbilt, 1940, *Camellia Research*, p.2. Corruption of Japanese name, **Arajishi.**

Arajisha. Gerbings Azalea Gardens Nursery Catalougue, 1938-1939, Corruption of Japanese name **Arajishi.**

Arajishi. (Fierce Lion), *(C.japonica)*, Itô, Jukyû, 1739, *Honzô Hanamaki'e:* Very large size, semi-double, 3 tiers of petals, red with large, white spots; flat flower, tubular stamen cluster. Originated in Japan. (Believed extinct.) Note: This is not the same as the existing cultivar. See JCS., 1983, *Tsubaki*, No.22, p.124.

Arajishi. (Fierce Lion), *(C.rusticana)*, Itô Ko'emon, 1879, *Chinkashû:* Dark red, mottled white, large peony form. Tuyama, 1966, *Camellia Cultivars of Japan*, pl.35, p.66; Tuyama, 1968, *Camellias* of *Japan*, colour photo No.307, p.155, description, p.182: White blotched form of the variety **Beni-arajishi.** It is a full peony form, 8-9 cm across with obcordate outer petals, emarginate, numerous, small petals and petaloids, variously twisted and irregular, forming a central mass, intermingled with a few stamens. The colour is Currant Red, HCC, 821/2 with scattered white markings. Leaves, dark, glossy green, characteristically narrow-elliptic, long acuminate, with deeply and coarsely serrate or bi-serrate edges. New growth carries easily visable hairs on the petiole and midrib. Early flowering. This cultivar is widely grown. In the West, particularly the USA, it is often the solid red form, erroneously as 'Arajishi'. The solid red form is **Beni-arajishi,** of which the variegated form, **Arajishi** is a sport. Different readings are: 'Arejishi', 'Areshishi'. Corruptions of the Japanese name: 'Aragishi', 'Arajishu', 'Arajisi', 'Arajisha', 'Are Jisji', 'Arijishi', 'Arejeshi', 'Arazishi', 'Arejisji', 'Arejishii', 'Areshishi', 'Arejishi Variegated'. Synonyms: 'Heckla', 'Lady Alice', 'Aloha', 'Arajishi Waratah', 'Arajishi Variegated', 'Arajishifuiri' and, erroneously: 'Akakarako'. See colour photos: See *Encyclopedia Of Camellias in Colour*, vol.I, 1972, pl.292 & p.334. Seibundô Shinkôsha, 1979, *Senchinshû*, p.14. Originated in Japan. Chinese synonym: 'Huangshizi'.

Arajishifuiri. Usami, Naohachi, (ca.1910), *Nagoya Chinzue.* See Watanabe, 1965, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.6, p.127, as 'Arajishi-huiri', Synonym for **Arajishi. Araluen Star.** (*C.pitardii* hybrid). ACRS, *Camellia News*, Autumn 2003, No.161, p.8, colour photo front cover, Reg. No.543. Originated by R.H. Campbell, Maddington, West Australia. A chance seedling of *C.pitardii* var. *pitardii* **Prudence.** First flowered 1989. The semi-double, pale to light pink (RHS.CC.65C), flower of 18 petals is hose-in-hose, with stamens arranged in tubular form, and is 10 cm across x 4.5 cm deep. An erect plant of medium growth rate, that flowers freely mid-season to late. Leaves mid-green, glossy, narrow and keeled, 7.5 cm long x 3 cm wide. Flower form and shape similar to *C.x vernalis* **Star Above Star**. Mass-flowering.

Arajishi Variegated. Fruitland Nursery Catalogue, 1946-1947, p.27 as 'Arajishi Var.'. Synonym for **Arajishi.**

Arajishi Waratah. Vanderbilt, 1940, *Camellia Research*, p.2 as 'Aragishi Warata'. Synonym for **Arajishi.**

Arajishu. Portland Camellias Nursery, Camellia Catalogue, 1946-1947, p.3. Corruption of the Japanese name **Arajishi.**

Arajisi. Hazlewood Nursery Catalogue, 1941. Corruption of the Japanese name **Arajishi.**

Araluen Star. (*C.pitardii* hybrid). ACRS, *Camellia News*, Autumn 2003, No.161, p.8, colour photo front cover, Reg. No.543. Originated by R.H. Campbell, Maddington, West Australia. A chance seedling of *C.pitardii* var. *pitardii* **Prudence.** First flowered 1989. The semi-double, pale to light pink (RHS.CC.65C), flower of 18 petals is hose-in-hose, with stamens arranged in tubular form, and is 10 cm across x 4.5 cm deep. An erect plant of medium growth rate, that flowers freely mid-season to late. Leaves mid-green, glossy, narrow and keeled, 7.5 cm long x 3 cm wide. Flower form and shape similar to *C.x vernalis* **Star Above Star**. Mass-flowering.

Aramusha. (Fierce Warrior), (Wabisuke), Seibundô Shinkôsha, 1979, *Senchinshû*, p.14, colour photo, p.199, description: Flower, light red graduations, single of 7 large, strongly crinkled petals, opening through campanulate to flat, 8-10 cm across. Mid-season flowering. Central stamen tube. Leaves, medium size, narrowly elliptic, apex acuminate, base acute, deep green with clear venation. Growth, erect, not vigorous. Originated in Kawaguchi-shi, Saitama Prefecture, Kantô District, in Japan. For botanical drawings, colour photo and description, see p.72, 73, 74, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.11, 1982. The colour of the flower, leaves, plant habit etc. resemble those of **Tarôkaja,** of which it is thought to be a seedling.

Aranami. (Fierce Wave), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô:* Carmine red, single, large size, white streaks. Also listed by Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki.* Originated in Japan. (Believed extinct.)

Ara-Nico. Haskin's Nursery Catalogue, 1962, p.3: Formal double, showing no stamens. Pink with a white bar. Corruption of the Japanese name 'Arai-in', synonym for **Hitosuji.**

Araragi. (Japanese Yew), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô;* Yashiro, 1841, *Kokon Yôrankô*, vol.306: Medium size, anemone double, red with long, slender, pointed petals. Originated in Japan. (Believed extinct.)

Araragi. (Japanese Yew), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Medium size, pale pink with red spots, 3-4 rows of petals, divided stamens. Originated in Japan. (Believed extinct.)

Arare. (Hailstones), *(C.japonica)*, Mizuno, Motokatsu, 1681, *Kadan Kômoku:* Large, double. Originated in Japan. (Believed extinct.)

Arare-kasuri. (Hailstone Pattern), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.532: Deep red semi-double to peony form, with vividly contrasting white spots. Originated in Japan. (Believed extinct.)

Arashi. (Tempest), *(C.japonica)*, Okumura, Shigetarô, (ca. 1810), *Chinka Hin'i.* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Pale pink, with red spots, medium size with 3-4 rows of petals and divided stamens. Originated in Japan. (Believed extinct.)

Arashiyama. (Place name in Kyôto), *Chinka Zufu*, (before 1700), Watanabe, pl.150: Semi-double to informal double white with red stripes. Different reading: 'Ranzan'. (Believed extinct.)

Arashiyama. (Place name in Kyôto), *(C.sasanqua)*, Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.16: White with pink graduations. Originated in Japan. (Believed extinct.)

Arata. (Personal Name) *(C.hiemalis). "Sasanquas, The Winter Flowers"* ICS Congress, Kurume 2010, English translation p.64; White, double, medium size, early to mid-season. *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.298 with colour photo; Semi-double. Leaves elliptic, somewhat small. Upright but somewhat spreading growth. First distributed in Kurume, Japan around 1990.

Aratama. (New Jewel), *(C.japonica)*, Satô, 1969, *Chûbu Tsubaki Kyôkai Shinhinshû:* Bowl shaped flower, white, medium small size, 7 cm across, 5 petals, rounded and curved inwards. Stamens about 105, anthers yellow, slightly spreading columnar. Flowers early to mid-season. Leaves, medium size, dark green, long-ovate, curved, glossy. Plant habit, erect and vigorous. A seedling from the cross **Shirohassaku** x **Shûfûraku.** Name approved by Chûbu area Tsubaki Kyôkai, New Flowers Registration Committee, Jan. 1969. Seibundô Shinkôsha, 1979, *Senchinshû*, p.14 & 199 for colour photo & description. Originated in Chûbu District, Japan.

Araya-shiro. (Araya's White), *(C.japonica)*, Nakayama, 1851, *Senkaôden:* White, single, large size. Originated in Japan. (Believed extinct), See: Kyôto Engei Kurabu, 1963, *Tsubaki Tokushû*, No.4, p.80.

Arazishii. Abbotsbury Gardens Catalogue,1974. Orthographic error for **Arajishi.**

Arbutus. *(C.japonica)*, SCCS, *The Camellia. Its Culture and Nomenclature*, 1950, p.23: Rose pink. Medium semi-double. Vigorous, upright growth. Blooms mid-season. Originated by R. Long, Pasadena, California, USA. See black and white photo, p.49, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I.

Arbutus Gum. *(C.reticulata x C.japonica), American Camellia Yearbook*, 1972, p.126, Reg. No.1201: A 9 year old chance *C.reticulata* hybrid that first bloomed in 1964; originated by Frank Maitland, Sylmar, California, USA. Plant growth is upright, of average density and rapid in rate with dark green leaves, measuring 7.5 cm in length and 3.2 cm wide. The semi-double flower, light to deep pink, measures 12.5-13 cm across, with yellow anthers and pink filaments. Blooms mid-season to late. A variegated form also exists. For colour photo see p.150, Macoboy, 1981, *The Colour Dictionary of Camellias.*

Arcadia. *(C.reticulata x C.sasanqua), American Camellia Yearbook*, 1980,p.160, Reg. No.1609: A very large, salmon pink, semi-double to loose, peony form, *C.hybrid (C.reticulata*, **Mouchang** x *C.sasanqua*, **Bonanza**). Mid-season to late flowering, originated by Meyer Piet, Arcadia, California. The 7 year old seedling first bloomed in 1974. Average flower size, 13-15 cm across. Plant growth is upright, open and rapid with dark green leaves, 12.5 cm long by 6 cm wide. Received the 'Frank L. Stormont Reticulata Award' in 1983. Sport: **Arcadia Variegated.** Chinese synonym: 'Akadiya'.

Arcadia Variegated. *(C.reticulata x C.sasanqua)*, Cannon, 1981, ACS, *The Camellia Journal*, vol.36, No.4 as 'Arcadia Var.': A virus variegated form of **Arcadia** - salmon pink blotched white. Originated in USA.

Arch Duchess Augusta. Wicks, W.C., Ltd., Catalogue, 1978. Orthographic error for **Arciduchessa Augusta.**

Arch of Triumph. *(C.reticulata), American Camellia Yearbook, p.126*, 1972, Reg. No.1171: A 10 year old chance hybrid seedling that first bloomed in 1962; originated by David Feathers, Lafayette,
California USA. Plant growth is upright, relatively dense and rapid, with waffled, green leaves, 13 cm x 8 cm. The loose, peony form bloom is wine red with yellow stamens. It measures up to 17 cm across and 8 cm deep with 15-20 petals and blooms early to

mid-season. Heavy texture and long lasting. Grown from wild Reticulata seed sent by Colonel T. Durrant, Rotorua, New Zealand. Received the "Frank L. Stormont Reticulata Award" in 1973 and the "Aubrey Harris Award" of the ACS in 1974. For colour photos see: ACRS, *Camellia News*, No.24, 1966, p.24. *Camellias, A Wisley Handbook*, 1985, p.41. Sport: **Arch of Triumph Variegated.**

Arch of Triumph Variegated. *(C.reticulata),* Gentry 1972. ACS, *The Camellia Journal*, vol.26, No.1 as 'Arch of Triumph Var.': A virus variegated form of **Arch of Triumph** - Wine red blotched with white. Originated in USA.

Archdeacon Brown. *(C.japonica),* Durrant, 1962, *New Zealand Camellia Bulletin*, vol.II, No.5, p.15, 16: "In view of the extreme rarity of the spiral form, it is little short of amazing that we also discovered another, this time Neyron Rose, (HCC,623), and having 5 spirals of 8 or 9 petals each....the spirals are present in all the flowers seen and occur both clockwise and anticlockwise....If **Spiralis Rubra** cannot be established as the name for this camellia it will be called **Archdeacon Brown** after one of New Zealand's most worthy and famous missionaries." As it proved impossible to equate **Spiralis Rubra** with this cultivar it now carries the valid name of **Archdeacon Brown.**

Archiduchesse Lindsay de Ceracina. *(C.japonica)*, Scott, J. & Son, Nursery Catalogue, 1889 as 'Archduchess Lindsay de Ceracina'. No description. Originated in Italy. (Believed extinct.) Orthographic variant: 'Archduchesse Lindsay de Ceracina'.

Archiduchesse Marie. *(C.japonica)*, van Houtte, 1853-1854, Catalogue, é0:26: I have acquired from M. Defresne, the entire stock of this camellia, which I have dedicated, with her Royal permission, to our Duchesse de Brabant. The camellia, 'Archiduchesse Marie', is a bright cerise colour, each petal having a wide, marbelized, white stripe of geometric regularity. Orthographic variants and errors: 'Archduchesse Marie', 'Archduchess Marie', 'Archiduchessa Marie', 'Arch Duchesse Marie', 'Archduchess Maria', 'Arciduchessa Marie', 'Achiduchesse Marie'. Originated in Belgium by M. Defresne, Liege. Sport: 'Archiduchesse Marie Rouge'. Synonym: 'Archiduchesse Marie(v.H.). For illustration see *Flores des Serres et des Jardins de l'Europe,* Book VIII, 1852-53, pl.851.

Archiduchesse Marie Rouge. *(C.japonica)*, de Bisschop, Catalogue, 1935, p.11: The solid red form of **Archiduchesse Marie.** Originated in France.

Archiduchesse Marie(v.H.). Jules Menoreau, Nantes Nursery Catalogue,1862, p.10. Synonym for **Archiduchesse Marie.** Note: This is the Belgium cultivar released by van Houtte. The (v.H.) was added as there was also an Italian camellia which was sometimes known by the same name, but is correctly **Arciduchessa Marie Isabella.**

Archie Lanier. *(C.japonica), American Camellia Yearbook*, 1974, p.167, Reg. No.1262: A 25 year old chance seedling that first bloomed in 1958; originated by Vivian L. Green, Ocala, Florida, USA. Plant growth is average, medium in rate, with 9.5 cm x 4 cm, dark green leaves. The semi-double, 'Herme', (**Hikarugenji**) type, bloom is pink, shading darker. It measures 12.5 cm across by 5 cm deep with 16 petals and 8 petaloids. Anthers and filaments are yellow. Blooms mid-season.

Archie McDonald. Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II, p.120. Synonym for **Eugene Lize.**

Archie's Angel. *(C.japonica),* SCCS, 1981, *Camellia Nomenclature*, p.19: Faint pink. Miniature, formal double. Compact, upright growth. Flowers mid-season to late. Originated by R. Gentry, Jackson, Mississippi, USA in 1975.

Arciduca Luigi. *(C.japonica)*, Ambroise Verschaffelt, 1854, p.18, as 'Archiduca Luiza di Toscana. No description. Franchetti, 1855, *Collezione Di Camelie*, p.11: Perfectly imbricated form, the outer petals red, the centre pink. Burnier Catalogue, 1855-1856: A fiery cherry-red, striped elegantly with white. Von Biedenfeld, 1856, *Practische Grundlehren der Cultur von Camellien..*, p.32, No description. Synonyms: 'Arciduca Luigi di Toscano', 'Loderico'. Orthographic variants: 'Archiduc Luigi', 'Archiduc Luiza di Toscana', 'Arciduca Luigi di Toscana', 'Archiduca Luizi di Toscana', 'Archiduce Luiza di Toscana', 'Archiduca Louis', 'Archiduca Luigi'. Originated in Italy.

Arciduca Luigi di Toscana. Menoreau, Jules, Nantes Nursery Catalogue, 1856, p.8. Synonym for **Arciduca Luigi.**

Arciduca Luiza di Toscana. Auguste van Geert Nursery Catalogue, No.75, 1869-1870, p.49 as 'Arhiduc Luiza di Toscana'. Orthographic variant for **Arciduca Luigi.**

Arciduca Stefano. *(C.japonica)*, van Geert Catalogue, 1856. No description. Originated in Italy. (Believed extinct.)

Arciduchessa Augusta. *(C.japonica)*, van Houtte, 1846-1847, Catalogue, 27:19 as 'Archiduchessa August': Imbricated. Beautiful red. Verschaffelt, 1852, *Nouvelle Iconographie*, Book VIII, pl.IV: Sometimes the petals, by their imbrication, form radiated, almost regular series, sometimes spiral-alternate. The double colouring a rich, vivid crimson, intersected in the middle of the petals by a double, sometimes triple, white stripe at the centre; these stripes join to form one which can be variegated by some purple stripes. As the bloom ages the colouring becomes paler and a lilac coloured or pale violet margin appears on the petals. Burnier & Grilli in the Gardeners' Chronicle, No.6, 1850, gives **Puccini** as identical. The variety was originally raised by M. Jos. Piccioli, Florence, Italy, who offered it to Burnier & Grilli. They rejected it as they found it too similar to their **Puccini.** He then disposed of it to M. Vicenzo Corsi in 1845, who sold it to van Houtte. It was erroneously equated with 'Pecchioliana' by van Huotte in his *Flore des Serres.* This is a synonym for the Burnier & Grilli variety, **Contessa Nencini.** From this history it would seem that **Arciduchessa Augusta** and **Puccini** are not truly synonymous, but very similar. Orthographic variants and errors: 'Archduchess Augusta', 'Archiduchesse Augusta', 'Archduchessa Augusta', 'Archduchesse Augusta', 'Arch Duchesse Auguste d'Orleans', 'Archiduchessa Augusta', 'Archiduchesse Auguste', 'Archiduchesse Auguste Marie', 'Achiduchesse Augusta'.

Arciduchessa Isabella. Franchetti, 1855, *Collezione di Camelie*, p.11. Abbreviation for **Arciduchessa Isabella di Toscana.**

Arciduchessa Isabella di Toscana. *(C.japonica)*, Gaetano Catalogue, 1849; Verschaffelt, 1858, *Nouvelle Iconographie*, Book I, pl.I as 'Archiduchessa Isabella di Toscana': The blossoms are of the largest size, measuring 11 cm in diameter, composed of numerous large, biform petals, those at the periphery, larger, rounded, slightly emarginate; those following to the centre, in a compact heart, are oval and almost acute, very regularly imbricated, of a vivid, carmine cherry-red. Orthographic variants and errors: 'Archiduchessa Isabella di Toscana', 'Arciduchessa Isabella', 'Archiduchesse Isabella', 'Archiduchesse Isabella di Toscana', 'Archiduchesse Isabella di Toscano', 'Archiduchesse Isabelle di Toscana'.

Arciduchessa Maria. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete*, p.7. Orthographic variant for **Archiduchesse Marie.**

Arciduchessa Maria Isabella. *(C.japonica)*, Luzzatti, 1851, *Collezione di Camelie*, p.5: Flower, large, imbricated. Colour bright, lacquer-like pink, similar to 'Iride', ('Dryade'). Originated in Italy.

Arisi. *(C.japonica)*, Cachet Catalogue, 1840-1841, p.2. No description. Originated in France. (Believed extinct.)

Arisionii. Seidel, 1846, Pflanzen Catalog, p.5. Orthographic error for **Arisonii.**

Arisoni. Cachet Catalogue, 1840-1841, p.2. Orthographic error for **Arisonii.**

Arisonii. *(C.japonica)*, Cachet Catalogue, 1840-1841, p.2 as 'Arisoni'. No description. Originated in France. Orthographic errors: 'Arisoni', 'Arsionii'. (Believed extinct.)

Arisotto. van Geert Catalogue, 1848. Orthographic error for **L'Ariosto.**

Arista. Gelding Nursery Catalogue, 1897. Orthographic error for **L'Ariosto.**

Aristo. Rousseau, Angers Catalogue, 1843-1844, p.1. Orthographic error for **L'Ariosto.**

Aristo d'Italie. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.14. Synonym for **L'Ariosto.**

Aristocrat. *(C.japonica)*, River View Nursery Catalogue, 1947-1948, p.10; Thompson, 1953, *American Camellia Yearbook*, p.79: While this unusual white single has only 6 petals, their arrangement is striking there are three petals in the bottom row and three on the top and they overlap like shingles. The petals are wide and crinkled and there is a large, stamen cluster in the centre. The flower opens with a faint blush and later becomes pure white. The plant has a pyramidal growth habit and blooms midseason. A seedling of **Kamo-honnami,** erroneously as 'Amabilis', raised by Harvey Short, Ramona, California, USA.

Arlene Ignicio. SCCS, 1954, *The Camellia, Its Culture and Nomenclature*, p.27. Orthographic error for **Arlene Ignico**.

Arlene Ignico. *(C.japonica)*, Wheeler, 1950, *American Camellia Yearbook*, p.123, 125, black and white photo: This is a 1940 seedling which flowered at 10 years of age. It is a loosely formed, incomplete double, a 12.5 cm flower with lanceolate foliage, varying from small to medium in

size and crenately margined. The petalage is of unusual form and is a lovely shade of red. Named for General R.V. Ignico, Commander of the Warner Robins Material Area. Registration No.84 with the ACS. Orthographic error: 'Arlene Ignicio'. Sport: **Arlene Ignico Variegated.**

Arlene Ignico Variegated. *(C.japonica)*, Wheelers Central Georgia Nurseries Catalogue, 1954-1955, p.3, as 'Arlene Ignico Var.': A virus variegated form of **Arlene Ignico** - Red blotched with white. Originated in USA.

Arlene Lee Shepp. *(C.japonica)*, SCCS Bulletin, vol.11, No.2, Dec. 1949. SCCS, 1950, *The Camellia. Its Culture and Nomenclature*, p.23; *American Camellia Yearbook*, 1954, p.301, Reg. No.16: A sport produced on 'Olive Lee Shepp' (**Olive Lee**) in 1944. The plant and flower are the same as the parent, except that the flowers are light pink, shading to white on the edge of the petals. Originated by Paul E. Shepp, USA.

Arlene Marshall. *(C.japonica)*, SCCS, 1956, *The Camellia. Its Culture and Nomenclature*, p.26: White. Large, semi-double to anemone form. Vigorous, compact, upright growth. Blooms mid-season. Originated by Marshall, USA.

Arnold's Pride. (*C.reticulata* hybrid). ACRS, *Camellia News*, Autumn 2003, No.161, p.8, colour photo front cover, Reg. No.542. Originated by Dr John Arnold, Wentworth Falls, NSW, Australia. Registered by John Paddison, Burradoo, NSW. A chance seedling that first flowered 1993. A large peony form, pink (RHS.CC.62B) flower, with stamens loosely mixed among the wavy petals, and 14 cm diameter x 7.5 cm deep. Flowers freely mid-season to late on an upright, open plant of medium growth. Leaves typical reticulata, long, narrow and lanceolate, 10 cm long x 3.5 cm wide.

Aroma. *(C.japonica)*, *American Camellia Yearbook*, 1963, p.214, Reg. No.609: A 7 year old, hand pollenated seedling from **Ville de Nantes** x **Roosevelt Blues,** that first bloomed 1958; originated by Dr Walter C. Hava, Waveland, Mississippi, USA. Plant growth is upright, dense and rapid in rate with 9.5 cm x 5 cm, light green leaves. The semi-double flowers, similar to 'Donckelaeri' (**Masayoshi**), are 10 cm across and 5 cm deep with 18 petals and 20 petaloids. The blooms are lavender rose, variegated, with white filaments and have a pronounced fragrance, similar to the Easter Lily. Blooms mid-season.

Aromatica. (*C.japonica* hybrid), *New Zealand Camellia Bulletin*, March 2002, Issue No.141, vol.XXII, No.5, p.9, Reg. No.428. Registered by J.R. Finlay, Whangarei, New Zealand. A cross between C.hybrid **Scented Sun** x *C.japonica* **Kramer's Supreme,** which first flowered in 1998. Flower form is semi-double, stated to sometimes vary to peony, with 10-11 petals and 2-5 petaloids, about 11 cm diameter x 4 cm deep. The petals are variegated pale pink (RHS.CC.56D) with deep flesh-pink radial stripes (RHS.CC.58C). Pollen is bright yellow and the many stamens form a loose mass about 5 cm across. The flower is scented.. The bush is of average height, open form and slow-growing, with dark green leaves 7 cm long x 4 cm wide. Flowers early to mid-season.

Arrabella. *(C.japonica)*, Nuccio's Nurseries Catalogue, 1949-1950, p.2: Orange red. Medium size, semi-double with ruffled and notched petals. Vigorous, compact, upright growth. Mid-season to late blooming. *American Camellia Yearbook*, 1950, p.142; Black and white photo, p.140: **Arrabella,** named for Mrs Edinger's sister is outstanding. It is a compact grower and the flowers reach 14 cm across. The colour is a light brick-red. It is semi-double in form with centre petals twisted and standing up like rabbit ears and it has golden stamens. Synonym: 'Donna Kaye'. Orthographic error: 'Arabella'. See colour photo: p.71, Macoboy, 1981, *The Colour Dictionary of Camellias.* Sport: **Arrabella Variegated.**

Arrabella Variegated. *(C.japonica)*, Williams and Thompson, 1952, *American Camellia Yearbook*, p.1: **Arrabella,** a fine orange-red semi-double variety, has now produced a variegated form. This is being distributed by James Rare Plant Nursery, Campbell, California, USA. A virus variegated form of **Arrabella.**

Art Howard. *(C.japonica)*, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III, p.10, black and white photo, p.13: Flower: Incomplete double; Camellia Rose, 622-622/1, fully expanded, 11 cm across by 6 cm deep. Buds globular. Petals: about 15 guard, strongly undulate and channelled, up to 4.5 cm long by 4 cm wide, rounded apices, entire margins, short hefts. Centre of flower: Many folded petals with petaloids of various sizes, intermixed with fascicles of stamens with white filaments having a pink overtone, to 3 cm long, small golden yellow anthers. Leaves, slightly obovate, curved and cupped, dark, dull green, coarsely serrate, apices, short to long pointed, venation light. Habit, upright, open, spreading, fast growing, free flowering. Blooms mid-season to late. Originated by Fred Bergstrom, Pasadena, California, USA.

Artel. *(C.sasanqua),* ACRS, 1980, *Camellia News*, No.75, p.24, Reg. No.231: Originated by Alice Spragg, Sutherland, N.S.W., Australia. A sun tolerant chance seedling, first bloomed 1974. The plant has an upright, open habit of growth, with mid-green, 3 cm x 1.5 cm, leaves. The semi-double, 7.5-8 cm, deep red flowers are produced early to mid-season.

Artemise. Verschaffelt Catalogue, 1847-1848, p.54. Orthographic variant for **Arthemise.**

Artenisa. Joseph Baumann, 1853, Prix Courant, p.1. Orthographis error for **Arthemise.**

Arthemise. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.53. No description. Originated in Italy. (Believed extinct.) Orthographic variants: 'Artemise', 'Artenisa'.

Arthur. *(C.japonica),* Vershaffelt, 1852, *Nouvelle Iconographie*, Book V, pl.IV: A pretty English camellia which bloomed for the first time in 1850. Its lanceolate-oblong petals slightly pointed, irregularly imbricated, with a delicate longitudinal groove in the centre, give it a multi starshaped aspect. Its vivid cherryrose colouring is delicately and distinctly veined in the same shade. We acquired it from England where it was obtained from seed.

Arthur Bolton. *(C.japonica)*, ACRS,1967, *Camellia News*, No.28, p.4, Reg. No.83: Originated by Arthur Bolton, Croydon, Victoria, Australia. A sport of 'Magnoliiflora', (**Hagoromo**), which it resembles in the colour of bloom and habit of growth. It varies in having flowers 8 cm across with about 18 reflexed and wavy petals, opening from a formal to an incomplete double flower.

Arthur Gayle. *(C.japonica)*, SCCS, 1981, *Camellia Nomenclature*, p.20: Dark red. Very large, semi-double to anemone form. Vigorous, bushy, upright growth. Mid-season blooming. Originated by Ray Gentry, Jacksonville, Mississippi, USA.

Arthur Knight. *(C.reticulata* hybrid), ACRS, 1981, *Camellia News*, No.79, p.28, Reg. No.260, Colour photo, p.5: Originated by Arthur Knight, Heathfield, South Australia. A chance seedling that first flowered 1979. The plant has an upright, open habit of growth with 15 cm x 8 cm mid-green lanceolate leaves, heavily veined, coarsely serrate. The 10-12 cm diameter, double white flowers are produced mid-season to late.

Arthur Middleton. *(C.japonica),* Gerbings Azalea Gardens Catalogue, 1941-1942: New Camellia from Middleton Gardens, (Middleton No.4). An exquisite, deep pink flower of formal double type, 10 cm across. When fully opened there are some stamens intermingled with petaloids in the centre. Free in its blooming habit and vigorous in its growth. Foliage, medium green. Mid-season flowering. Originated at Middleton Gardens, South Carolina, USA. See p.52, Hertrich, 1954, *Camellias in the Huntington Gardens*, Vol.I for black and white photo.

Arthur Weisner. *(C.japonica),* Gerbings Azalea and Camellia Garden Catalogue, 1961; *American Camellia Yearbook*, 1963, p.214, Reg. No.615: A 5 year old seedling of 'Donckelaeri' (**Masayoshi**) x **Lindsay Neill** that first bloomed in 1959; originated by John T. Weisner, Fernandina Beach, Florida, USA. Growth is spreading and dense, medium in rate, with dark green leaves averaging 10.5 cm x 5 cm. The semi-double red flowers resemble 'Herme', (**Hikarugenji**) in form and are 13 cm across and 5.5 cm deep with 14-16 petals and pink stamens. Blooms early to late.

Art's Ruby. *(C.japonica),* SCCS *Camellia Nomenclature* 2009, p.17; Small, ruby red semi-double with fluted petals. Open, upright growth, with elongated leaves. Raised in 2003 by Art Landry, Baton Rouge, La, USA

Aruka-kasuri. (Spotted Aruka), *(C.japonica),* Hamamatsu, Utakuni, 1818-1825, *Setsuyô Kikan.* No description. Originated in Japan. (Believed extinct.)

Arukawa. (Personal Name), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô.* Red spotted white. Large bloom, semi-double, mid-season. Itô, Jukyû, 1739, *Honzô Hanamaki'e;* Shirai-Bunko, Higashiyamamura,1789, *Shoshiki Hanagatachô;* Kasuya, Kamegorô, 1859, *Tsubaki*

Irohanayose Irotsuki; Itô, Ko'emon, 1879, *Chinkashû;* Minagawa, 1933, *Chinkashû;* Satomi 1956, *Camellias of Japan;* Tuyama, 1966, *Camellia Cultivars of Japan*, pl.268, p.330; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.268, p.330; Seibundô Shinkôsha, 1979, *Senchinshû*, p.14, description p.199; Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.325: Flower, crimson semi-double to rose form double, with small splashes of white and a small, white, central stamen column. When fully open it is cupshaped,10-11 cm across, about 20 petals with the outer ones reflexed. Mid-season to late flowering. Leaves, elliptical to broad-elliptic, medium size, apex caudate, sharply serrate, base obtuse, twisted with occasional yellow spots; petioles hirsute. Spreading habit with pendulous branches. Different reading: 'Arugawa', 'Arikawa'. Originated in Kantô district, Japan. Resembles **Go-ishi, Kasugano**.

Arvinerza. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.14. Orthographic error for **L'Avvenire.**

Arvinirze. Giles & Son Nursery Catalogue, 1881. Orthographic error for **L'Avvenire.**

Asabenisancha. Different reading for **Senkô-sancha.**

Asaborake. (Daybreak), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, p.108, colour photo, pl.77: Leaves, elliptical to rhombeo-elliptical, long acuminate, midrib elevated, laterals flat or slightly impressed, 6.5-8.2 cm long x 2.7-4.2 cm wide; petioles, 6-8 mm long, hairy. Flowers, palest pink (paler than rose pink 427/3), formal double, outer petals with hairs, 3-5, normal petals, 45-71, diminishing to the centre. Very rarely a few petaloids with degenerate anthers in the centre, 8-10 cm across. Mid-season flowering. Habit, vigorous, densely furnished, spreading. Also see colour photo & description: Seibundô Shinkôha, 1979, *Senchinshû*, p.11 & 198. Originated in Niigata Prefecture, Japan by Kaoru Hagiya. Resembles **Otome.**

Asachidori. Ashizawa, 1898, *Chabaika Taishu.* Different reading for the *C.sasanqua* **Chôchidori.**

Asagai. Grimes Catalogue, 1958. Corruption of Japanese name **Asagao.**

Asagairi. Fendig, 1953, *American Camellia Catalogue.* Corruption of Japanese name **Asagiri.**

Asagao. (Morning Glory), (Higo), Taniguchi, 1912, *Kaikaen Chinka Kyôkan;* Hiratsuka 1964, *Higo Camellia*, p.12, 13; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.55 & p.299; Seibundô Shinkôsha, 1979, *Senchinshû*, p.9, colour photo, description, p.197: Flower, large, soft pink, single Higo type, 7-9 petals, up to 13 cm across, opening flat with a large, central burst of 140-170 stamens, known as the apricot style (ume-shibe) with yellowish filaments. Late flowering. Leaves, elliptic to broad-elliptic, large, shallowly serrate, with some yellow markings. Vigorous, spreading habit. See, p.119, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Kumamoto Prefecture, Japan. Similar to 'Bifu'.

Asagao. (Morning Glory), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.259, 470: Two types of flowers are described; one a pale coloured semi-double, stamens intermixed with petaloids; the other, also a pale coloured semi-double but stamens in a central cluster. Originated in Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.17 with colour photo; Pale pink, flat single, yellow flared stamens, large, fructifying. Flowers mid-season. Leaves elliptic to broadly elliptic, medium to large. Spreading, vigorous growth. An old Higo variety, appearing in the *Higo-tsubaki Meikan* in 1912.

Asagasumi. (Morning Mist), *(C.sasanqua)*, Ashizawa, 1898, *Chabaika Taishû;* Nihon Shubyo Catalogue, 1910: Long, pretty, rosy, 5 or 6 petals closely arranged, forming a 7.5 cm bloom combined with clear, yellow stamens. Flowers profusely. Originated in Japan.

Asagawa. (Morning on the River), *(C.sasanqua)*, Parks et al., 1981, No description. Originated in Japan.

Asagiri. (Morning Mist), *(C.sasanqua)* Wada Nursery, Catalogue, 1941, p.31: Single, peach pink, narrow petalled, medium size. Corrupted name: 'Asagairi'. Originated in Japan.

Asagiri. (Morning Mist), *(C.sasanqua)*, Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.16: Large size, white with pink graduations. Originated in Japan. (Believed extinct.)

Asagiri. (Morning Mist), *(C.japonica)*, Shirai-Bunko, 1789, *Shoshiki Hanagatachô;* Itô, Ihei, (before 1801), *Hyakka Tsubaki Nayose Irotsuki:* Formal double, pale pink, small size, cup-shaped, finely splashed with red. Originated in Japan. Synonym: 'Asagiri-tsubaki'. (Believed extinct.)

Asagiri-tsubaki. Itô, Ihei, 1733, *Chikinshô Furoku.* Synonym for **Asagiri.**

Asagura. Different reading for **Asakura.**

Asahi. (Sunrise), *(C.japonica)*, Mizuno, 1664, *Kadan Kômoku;* Okumura, (ca,1810) *Chinka Hin'i; Chinka Zufu*, (before 1700), Watanabe, 1969, pl.210, 326, 472: White with red stripes, double. None of these varieties appears to be the same as the modern cultivar. (All believed extinct.)

Asahi. (Sunrise), *(C.x williamsii)*, Seibundô Shinkôsha 1979, *Senchinshû*, p.10 colour photo, p.197, description: Flower, soft pink with fuchsia tones, cup-shaped single, 7 broad petals with creped and fluted margins, central stamen cluster in a ring; medium size. Mid-season flowering. Leaves, narrowly elliptic to elliptic, small, smooth surface, clear venation, sharply and shallowly serrate. Vigorous, upright growth. Originated by Shigeichi Hirano in 1977. Synonym: 'Morning Sun'. A seedling from a *C.saluenensis.* From Kanagawa Prefecture.

Asahi. (Sunrise), *(C.x vernalis)*, Kirino, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.37; Sakata and Arisumi, 1983, *International Camellia Journal*, No.15, p.22. No description. Hakoda, 1987, JCS., *Tsubaki*, No.26, p.50: Medium size, white to light pink, sometimes variegated, single with rounded petals, crinkled at the edges. Originated in the Fukuoka Prefecture, Japan. A seedling of *C.x vernalis* **Kyô-nishiki.** Selected, named and released by Shunsuke Hisatomi in 1960. Chinese synonym 'Xu'.

Asahibeni. (Red Sunrise), *(C.japonica)*, Shirai-Bunko, Higashimurayama, 1789, *Shoshiki Hanagatachô:* Red, double, magnolia flower form. No description. Originated in Japan. (Believed extinct.)

Asahibeni. (Red Sunrise), *(C.sasanqua)*, Murayama, 1971, *Garden Life*, *Higo sazanka Bunkashi:* A *C.sasanqua* from Kumamoto Prefecture, Japan.

Asahibotan. (Peony at Sunrise), *(C.sasanqua)*, Kajitsu-en, 1905, *Chabaika Meikan; Tokyo Konoen*, 1928: Large, scarlet double peony form, with 12 or more broad petals, some curled. Stout, upright, slow grower. Originated in Japan.

Asahi-dzuru. Chûgai Nursery Catalogue, 1937-1938, p.18. Different reading for **Asahizuru.**

Asahigai. (Sunrise Shell), *(C.sasanqua)*, Ashizawa, 1898, *Chabaika Taishû;* Chûgai Nursery Catalogue, 1936-1937: Medium size, white single, 7.5 cm across, colour Solferno-Purple, (RHS,CC,26/1). Margins of the petals red. Petals are round, outwardly curved, and number 8-9 with slightly crêped margins. Stamens spreading, filaments light yellow, anthers golden yellow. Blooms very early. Originated in Kantô District, Japan. Corruption of Japanese name: 'Ashi-gai'.

Asahigari. (Sunrise Viewing), *(C.sasanqua)*, Wada Nursery, Catalogue, 1941, p.31: Single, red exterior, whitish interior, medium size. Early blooming. Originated in Japan.

Asahigawa. (Sunrise on the River), *(C.rusticana)*, Seibundô Shinkôsha, 1966, *Garden Life*, No.17, p.22, black and white photo & description; *Encyclopedia of Camellia in Colour*, vol.I, 1972, pl.180, p.96 & 317; Seibundô Shinkôsha, 1979, *Senchinshû*, p.10, colour photo, p.198, description: Flower, red informal double of 25 petals; outer, large, lobed; inner, erect, mingled with stamens; filaments, yellow. Average size, 12 cm across. Leaves, medium size, elliptical with conspicuous venation, sharply roughly serrate and short, hairy petioles. Vigorous, erect growth. Late flowering. Different reading: 'Asahikawa'. Originated in Takada City, Niigata Prefecture, Japan. Named by Kawamura, Yaichi.

Asahihime. (Dawn Princess). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.19; English translation p.12. A miniature, peach red single, embracing petals, flared stamens, long flower stalks. Flowers profusely, early to late. Leaves broadly elliptic, medium size. Upright and dense growing. An interspecific cross between *C.vernalis* **Shôwa-no-sakae** x *C.sinensis* 'ZI'. Originated and named by Kaoru Hagiya, Niigata Prefecture.

Asahikage. (Dawn Shadows), *(C.hybrid),* ICS, Apr.1990, *Japanese Camellia cultivar List*, p.27: Small corolla, pale, peach pink with salmon pink graduations, tubular single. A seedling from the cross *C.japonica* **Tarô'an** x *C.hybrid* **Tiny Princess.** Originated in the Niigata Prefecture, Japan by Kaoru Hagiya..

Asahikai. Seibundô Shinkôsha, 1970, *Garden Life*, No.36, p.120. Different reading for **Asahigai.**.

Asahikawa. Different reading for **Asahigawa.**

Asahikirin. (Mount Kirin at Sunrise), *(C.rusticana)*, Seibundô Shinkôsha, 1973, *Garden Life*, No.5, p.16, colour photo; Seibundô Shinkôsha, 1979, *Senchinshû*, p.10, colour photo, p.198, description: Flower, peach red, rose form double, 8-10 cm across, with a few vertical whitish streaks on the inner petals, 35 petals; outer imbricated, notched, smooth. Mid-season flowering. Leaves, medium size, long-oval to elliptical, serrate with hairy petioles. Vigorous, upright growth. Originated in Higashi-kanbara-gun, Niigata Prefecture, Japan. Similar to **Matsukasa.**

Asahi Nishi. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.14. Corruption of the Japanese name **Asahi-nishiki.**

Asahi-nishiki. (Dawn Brocade), (Higo), JCS, 1958, *Nomenclature List of Higo Camellia Varieties;* Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.75; Hiratsuka, 1964, *Higo Camellia*, p.14, 40; Seibundô Shinkôsha, 1979, *Senchinshû, p.1*0, colour photo, p.198, description: Flower, single Higo form, crimson markings "like sunlight on snow" on pure, white base, opening flat to 8-10 cm across, with large ring of stamens, having yellowish white filaments. Mid-season flowering. Leaves, medium size, narrowly elliptic, sparse. Originated in Kumamoto Prefecture, Japan. Corruption: 'Asahi Nishi'.

Asahi-no-hikari. (Light of Sunrise), (Higo), Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement*, p.60, Colour photo: Medium size, bright red Higo form with 6-7 large, creped and fluted outer petals, surrounding a flared burst of 170 stamens with light yellow filaments. Early to mid-season blooms. There is also a *C.japonica* cultivar of the same name. Originated in Kumamoto Prefecture, Japan.

Asahi-no-hikari. (Light of Sunrise), *(C.japonica)*, Seibundô Shinkôsha, 1979, *Senchinshû*, p.11, colour photo, p.198, description: Flower, cup-shaped single, very pale pink background with vertical crimson streaks, and a cylindrical stamen cluster. Average measurement, medium size. Early to mid-season flowering. Leaves, medium size, elliptical; base obtuse, reflexed, shallowly serrate. Vigorous, upright growth. Originated and released by Shunichi Sakuragi in 1973. From Aichi Prefecture. .

Asahi-no-mai. (Dance at Sunrise), (Higo), Taniguchi, 1912, *Kaikaen Chinka Kyôkan;* Hiratsuka, 1964, *Higo Camellia*, p.13, 32; Seibundô Shinkôsha, 1979, *Senchinshû*, p.11, colour photo, p.198, description: Flower, scarlet, single Higo form, opening flat, with a large ring of numerous stamens, filaments reddish. Average flower size, 10 cm across. Flowers mid-season. Leaves, medium size, narrowly elliptic, apex acute, thick texture, leaf edge turned under. A good seed setter. Originated in Kumamoto Prefecture, Japan. Chinese synonym 'Xuzhiwu'.

Asahi-no-minato. (Harbour at Dawn), (Higo), Taniguchi, 1912, *Kaikaen Chinka Kyôkan;* Hiratsuka, 1964, *Higo Camellias*, p.13, 33, colour photo, p.40; Seibundô Shinkôsha, 1979, *Senchinshû*, p.11, colour photo, p.198, description: Flower, scarlet, single Higo type, rarely with a few fine white lines on the scarlet; opening flat to 8-10 cm across, some petals crimped, all waved at the margin, 6-7 petals. Stamens in typical "Apricot", (ume-shibe) burst, filaments pale red.

Mid-season flowering. Leaves, large, elliptical with acuminate apex. Plant growth, vigorous and spreading. Good seed setter. See p.169, Yokoyama & Kirino, 1989, *Nihon no Chinka.* A sport of **Higo-kyô-nishiki**. Sport: **Jitsugetsusei.**

Asahi-no-nishiki. (Dawn Brocade), *(C.japonica),* Uekiya, Seigorô, 1874, *Tsubaki Hyakuro no Zu*, vol.1: Medium size, red formal double with numerous petals. Originated in Japan. (Believed extinct.)

Asahi-no-sora. (Sunrise Sky), *(C.sasanqua),* Ashizawa, 1898, *Chabaika Taishû;* Nihon Shubyô Catalogue,1910: Medium size, lilac toned, pink bloom, deepening towards the petal base. Although petals are delicate and weak, very lovely and floriferous. Plant habit upright but weak. Early flowering. Originated in Japan. Synonym: 'Morning Sky'. For colour plate see Tuyama and Yamada, 1979, *Ishii's Selected Japanese Camellias Including Sasanquas*, pl.125.

Asahi-no-umi. (Sunrise Sea), *(C.sasanqua),* Ashizawa, 1898, *Chabaika Taishû;* Ishii, Yûgi, 1932, *Genshoku Engei Shokubutsu Zufu*, vol.4:636-691. (Illustr.): Very large, dark pink bloom, having 7 or 8 petals. Leaves, long and lustrous; plant habit, spreading, lax, poor resistance to cold. Early blooming. Originated in Kantô District, Japan. For colour plate see Tuyama and Yamada, 1979, *Ishii's Selected Japanese Camellias Including Sasanquas*, pl.99. Corruption: 'Ashi-no-umi'. Synonym: 'Asahi-no-umi'(Edo).

Asahi-no-umi (Edo). Hakoda, 1987, JCS., *Tsubaki*, No.26, p.43. Synonym for **Asahi-no-umi.**

Asahi-no-umi (Kumamoto). (Sunrise Sea at Kumamoto), *(C.x vernalis),* Hakoda, 1987, JCS., *Tsubaki*, No.26, p.47: Medium size, red, semi-double. Originated in the Kumamoto Prefecture, Japan.

Asahi-no-yuki. (Snow at Sunrise), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.165 as a variegated leaf camellia from Niigata Prefecture. Inazawa Nursery Co. Ltd. Catalogue, 1986-1987, p.6, A-271: Long leaves with white-yellow, central variegation. Originated in Japan.

Asahi-ôdemari. (Morning Handball), *(C.japonica), Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.219, p.221, description p.323: Large size, up to 14 cm across, soft pink, almost white, semi-double, to open peony form about 18 petals; central petals, crinkled and irregular, divided fascicles of stamens. Leaves medium large, elliptical, reflexed. Tree upright and vigorous. See colour photos and description: Seibundô Shinkôsha, 1979, *Senchinshû*, p.10 & 198, as 'Asahi-ôtemari', and p.304, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Toyama Prefecture, Japan. Collected by Kamo, Zenji in 1957.

Asahi-ôtemari. Different reading for **Asahi-ôdemari.**

Asahitsuru. Different reading for **Asahizuru.**

Asahiyama. (Mountain Sunrise), *(C.japonica),* Sakuden, 1630, *Hyakuchinshû:* White, rose form double to anemone form, with 5-6 imbricated petals with red petaloids in the centre when fully open. (Believed extinct.) Originated in Japan. Thought to be a synonym for **Dattan.**

Asahizuru. (Crane at Sunrise), (Higo), Taniguchi, 1912, *Kaikaen Chinka Kyôkan;* Hiratsuka, 1964, *Higo Camellia,* p.14, 37; *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.108, & p.307; Seibundô Shinkôsha, 1979, *Senchinshû*, p.10, colour photo, p.198 as 'Asahi-zuru': A swirl of white breaks the crimsom surface of this Higo Camellia, 10 cm across, 7-9 petals, about 130 stamens in an open burst, filaments white, anthers yellow. Leaves, medium size. A virus variegated form of **Shintsukasa-nishiki.** Originated in Kumamoto Prefecture, Japan. See colour photo, p.247, Yokoyama & Kirino, 1989, *Nihon no Chinka.* The different reading, 'Asahitsuru'.

Asahizuru. (Crane at Sunrise), *(C.sasanqua),* Ashizawa, 1898, *Chabaika Taishû;* Wada, Hakoneya Nurseries, 1941, *Japanese Garden Treasures*, p.31: Red with a white base, large size, single,

opens evenly, narrow petals. Early flowering. For colour photo see pl.10, p.8, Andoh, 1974, *Tsubaki Nyûmon.* Different readings: 'Asahitsuru', 'Asahidzuru'. Originated in Kantô District, Japan. Selected and named by Jisuke Minagawa. Chinese synonym: 'Xuhe'.

Asaji-shiro. (Asaji White). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.18 with colour photo; English translation p.11. White, sake-cup-shaped single, cylindrical stamens. Flowers early to mid-season. Leaves elliptic, medium size, thick, slightly recurved. Vigorous, upright, with thick branches. Selected from wild japonicas growing in Izuhara Town, Tsushima Island. Found and named by Kikutoshi Mizokoshi. Nagasaki Prefecture.

Asaka. (Morning Fragrance), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.299, colour photo and description: Medium size, pale pink, semi-double, opening wide, cup-shape with 23 row of irregular, emarginate, overlapping petals and a short, spreading stamen cluster, with large yellow anthers. Leaves dark green, ovate, apices acute, margins coarsely serrate. Blooms early to mid-season. Fragrant. Originated in Okayama Prefecture, Japan from the cross, **Hatsu-arashi-Saga** x **Tagoto-no-tsuki.** Originated and released by Nobuo Sasai in 1978.

Asakagari. (Dawn Fires), *(C.japonica),* Yashiro, Kôken, 1841, *Kokon Yôrankô*, vol.308. No description. Originated in Japan. (Believed extinct.)

Asakahime. (Princess Asaka), *(C.lutchuensis* hybr.) Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.119, colour photo and description: Very small size, irregular, campanulate single, soft pink, 3 inner petals, large, rounded, emarginate, 3 outer petals smaller. Stamen cluster, short, somewhat spreading, anthers yellow. Leaves mid-green, elliptic, apices acute, recurved, margins coarsely serrate. Blooms mid-season to late. Fragrant. Seedling of the cross *C.japonica* var *rusticana* **Kazahana** *x C.lutchuensis.* Originated in Niigata Prefecture, Japan by Kaoru Hagiya in 1974.

Asakura. (Place name), *(C.sasanqua),* Hakoda, 1974, *Nôkôdai Nôjôhô*, No.6, p.37; SCCS, 1981, *Camellia Nomenclature*, p.185: White, shaded pale red. Large size, semi-double. Early flowering. Different reading: 'Asagura'. Originated in Kurume, Fukuoka Prefecture, Japan. Named by Shunsuke Hisatomi. Synonym: 'Akebono-fuji'. Chinese synonym: 'Zhaocang'.

Asakura-no-sato. (Village of Asakura). *(C.hiemalis). "Sasanquas, The Winter Flowers"* ICS Congress, Kurume 2010, English translation p.64; Pale pink, bordered red, rose form to formal double, large, very early. From Kurume, a new cultivar.

Asakura-wabishin. (Wabisuke from Asakura), (Wabisuke), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.216, colour photo and description: Small size, cup-shaped, bright red single with 5 large, rounded, overlapping petals. Stamens spreading, anthers white. Blooms mid-season to late. Leaves, mid-green, ovate, margins serrate. Originated in Fukui Prefecture, Japan. Found at the castle ruin of the Asakura family, named by Tokuji Ôoka in 1980.

Asama. (Name of Mountain), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Double, red with white spots, pine cone shape. Originated in Japan. (Believed extinct.)

Asama. (Name of Mountain), *(C.sasanqua),* Itô, Jukyû, 1739, *Honzô Hanamaki'e*, vol.16: Large. Originated in Japan. (Believed extinct.)

Asama-shibori. (Asama Dappled), *(C.japonica),* Uekiya, Seijirô, 1874, *Tsubaki Hyakuro no Zu*, vol.II: Medium size semi-double to open, incomplete double, with two rows of guard petals and a centre of stamens and petaloids. The flower colour is white with red edges to the petals, similar to **Betty Sheffield Supreme.** Originated in Japan.

Asamo. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.15. Corruption of the Japanese name **Asama.**

Asanenotoko. (Bed for Sleeping Late), *(C.japonica)*, Sakuden, 1630, *Hyakuchinshû:* Semi-double, large size, red with white splashes on the inner petals. Synonym for **Mino-tsubaki** and 'Akasaka-futae'. Originated in Japan. (Believed extinct.)

Asa-no-mai. (Dance in the Morning), *(C.hybrid)*, ICS., Apr.1990. *Japanese Camellia Cultivar List*, p.27: Large size, pale peach pink with light red base, lotus-form semi-double. Originated in Niigata Prefecture, Japan, by Kaoru Hagiya from the cross *C.japonica* **Akatsuki-no-kaori** x *C.vietnamensis. Nippon Tsubaki - Sasanqua Meikan*, 1998, p.18 with colour photo; English translation p.11. *C.japonica* parent stated to be **Gyôkô.**

Asano-kasuri. (Splashed Pattern on Light Field), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe, 1969, pl.136: A semi-double having a soft blush background with a splashed pattern of rose pink. Originated in Japan. (Believed extinct.) Different reading: 'Asano-tobiiri'.

Asanomi-katsura-tobi'iri. Different reading for **Asano-katsura-kasuri**

Asanomi-katsura-kasuri. (Asanomi's variegated Judas Tree), *(C.japonica), Chinka Zufu*, (before 1700), Watanabe 1969, pl.136: White, with rare red spots; double. Different reading: 'Asanomi-katsura-tobi'iri'. Originated in Japan. (Believed extinct.)

Asano-tobiiri. Different reading **Asano-kasuri.**

Asa-no-umi. *(C.sasanqua). "Sasanquas, The Winter Flowers"* ICS Congress, Kurume 2010, English translation, p.60; Dark red, single with many petals, flat, large, early. From Edo – Saitama (Angyô).

Asasakura. Different reading for **Asazakura.**

Asatsuma. (Personal Name), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô*. Red with white spots, medium size, cylindrical stamen cluster. Different reading 'Asazuma'. Originated in Japan. (Believed extinct.)

Asatsuyu. (Morning Dew), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki*. White, double, in 4-5 rows, with small, red splashes. Originated in Japan. (Believed extinct.)

Asatsuyu. (Morning Dew), *(C.hybrid)*, Ohoka Chinka-en Catalogue, Niigata no Tsubaki, 1983-1984, p.2; Inazawa, Nursery Co. Ltd. Catalogue, 1986-1987, p.7, No. A-344: Pale pink semi-double with paler ornamental border, small, fragrant. Yokoyama & Kirino, 1989, *Nihon no Chinka*, pp.302.303, colour photo and description: Small size, soft pink, semi-double with pink graduation towards the petal edge. Stamens few and irregular, filaments white, anthers brownish yellow. Leaves elliptic, mid-green, apices tapering acute, recurved, margins bluntly serrate, Late flowering. Originated in Niigata Prefecture, Japan by Kaoru Hagiya, from the cross *C.japonica* var *rusticana x C.hybrid* **Tiny Princess.**

Asawarai. (Morning Smile), *(C.japonica)*, Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.51 and 1970, No.10, p.113. No description. Originated in Japan.

Asayake. (Morning Glow). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.20 with colour photo; English translation p.12. White mottles on red ground. A small, tubular to trumpet shaped single with cylindrical stamen cluster. Flowers mid-season to late. Leaves elliptic, medium size, slightly wavy. Upright, vigorous growth. Selected from wild japonicas growing in Nagahama Town, Ehime Prefecture, and named and released by Ôzu Camellia Enthusiasts Club in 1975.

Asazakura. (Morning Cherry Blossom), *(C.rusticana)*, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.9, 1968, p.53, 54, black and white photo; *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.370; Seibundô Shinkôsha, 1979, *Senchinshû*, p.9, colour photo, p.197, description: Small, 7 cm across, palest pink to white, cup-shaped single of 8-9 petals, compact, central group of stamens, about 77, light yellow filaments; deep yellow anthers. Mid-season blooming. Leaves medium to dark green, ovate, blunt acuminate, margins sharply serrulate, venation somewhat

raised. Petioles hairy. Tree spreading, tending to pendulous. Different reading: 'Asasakura'. Originated in Japan at Kariba Subprefecture, Niigata Prefecture. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1968.

Asazuma. Yashiro, 1841, *Kokon Yôrankô*, vol.306. Different reading for **Asatsuma.**

Ascapia. Portland Camellia Nursery Catalogue, 1947-1948, p.8. Orthographic error for 'Aspasia', pseudonym for **Emperor of Russia Variegated.**

Ascona. Eisenhut, Otto, Nursery Camellia List, 1985: Medium size, red semi-double. Originated in Switzerland. Chinese synonym 'Asikana'.

Ase-ishi. (Stone from Ase), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* as 'Aseishi': Large size, semi-double, blush pink with red stripes and white petal edges. Originated in Japan. (Believed extinct.)

Ashby's 19. *(C.japonica)*, Shackelford, 1964, ACS, *The Camellia Journal*, vol.19, No.5, p.28: No description. Originated in USA. No valid listing located.

Ashi-gai. SCCS, 1950, *The Camellia. Its Culture and Nomenclature*, p.69. Corruption of the Japanese name **Asahigai.**

Ashihara-tsubaki. Sakuden, 1630, *Hyakuchinshû.* Synonym for **Takigi-no-nô.**

Ashinaka-no-aki. (Autumn in the Reeds), *(C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.3: Peach pink, tubular single, very small, early flowering. Originated in the Shizu'oka Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.337 with black and white photo: Colour given as red. Leaves elliptic, medium size, waved. Upright, vigorous growth. Parentage unknown, originated and released by Toshikazu Iwamoto in 1987.

Ashinaka-no-kaze. (Wind in the Reeds), *(C.japonica)*, ICS, Apr.1990, *Japanese Camellia Cultivar List*, p.3: Very small size, peach pink, double with numerous rows of imbricated petals in a whirl form. Late blooming. Originated in Shizu'oka Prefecture,Japan.

Ashi-no-umi. James Rare Plant Nursery Catalogue, 1954-1955, p.12. Corruption of the Japanese name **Asahi-no-umi.**

Ashitani. (Name of originator), *(C.japonica)*, Tuyama, 1968, *Camellias of Japan*, p.156, colour photo No. 221 as 'Ashi-tani': Leaves broadly elliptic, acuminate or cuspidate-acuminate, plicate along the midrib, side veins slightly impressed.; 6.5-8.5 cm long by 3-4.9 cm wide, petioles 3-7 mm long, glabrous. Flowers of peony type, dark rose (Spinel Red 0023/1), petals loosely wavy, 5-8; androceum 1.8-3.2 cm high, filaments creamy or pale pink with small, irregular petaloids; stamens intermixed. Flowers early to late. Originated in the garden of Mrs Tomoko Ashitani, Nishi-machi , Yatsuo-machi, Toyama Prefecture, Japan.

Ashizuri-gogô. (Ashizuri No.5). *(C.japonica)*, *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.20 with colour photo; English translation p.12. From Kohchi Prefecture. A red, medium size, tubular single with cylindrical stamens. Flowers mid-season to late. Leaves elliptic, medium size. Upright, vigorous growth. Selected from wild japonicas growing at Cape Ashizuri, transplanted to Izu-ôshima, and named by Masaomi Murata around 1952.

Ashizuri-ichigô. (Ashizuri No.1). *(C.japonica)*, Inazawa Nurseries Co. Ltd. Catalogue, 1986-1987, p.13, B-19: Medium size, dark red, tubular single. Originated in Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.337; English translation p.225. Medium size, deep red, tubular to trumpet shaped single, cylindrical stamen column. Flowers mid-season. Leaves elliptic, medium size. Upright, vigorous growth. Selected from wild japonicas transplanted from Cape Ashizuri to Izu. Named and released by Yoshiomi Murata in 1952. From Kôchi to Kanagawa Prefectures.

Ashland Pink. Gerbing, G.G., 1945, *Camellias*, p.20. Synonym for **Augusta Wilson.**

Ashley Hall. *(C.japonica),* ACS, *The Camellia Journal,* Mar. 2005, p.24 with colour photo. Reg. No. 2633. A chance seedling that first flowered in 1999. Originated by Marion G. Hall, Dothan, Ala, USA. The striped and mottled, rose pink coloured, peony form flower is 11.5 cm diameter with some interspersed yellow stamens. Flowers early and holds well in heat. *American Camellia Yearbook,* 2005, p.39, dark green leaves are 10 cm x 5 cm. Colour photo p.c3.

Ashley Hardee. *(C.japonica), American Camellia Yearbook*, 1961, p.219, Reg. No.548: A 10 year old chance seedling that first bloomed 1958; originated by Mrs Van Hardee, Madison, Florida, USA. Plant growth is rapid, upright and open with medium size, light green leaves, averaging 10 cm x 3.8 cm. The peony form flower is deep rose with a purple cast and white stamens. The flowers are 10 cm across and 5 cm deep with 12-15 petals and a couple of petaloids. Blooms mid-season.

Ashley McComb. *(C.japonica),* ACS., 1989, *The Camellia Journal*, vol.44, No.3, rear cover with colour pl.: A large size, dark pink, with peony centre of 40 petaloids, surrounded by a skirt of 4 rows of 27 large petals. Blooms early to mid-season. A chance seedling raised by Ferol & Sam Zerkowsky, Tammia Nursery, Slidell, Louisiana, USA. ACS., Nov.1990, *The Camellia Journal*, vol.46, No.4, p.18, Reg. No.2196. *American Camellia Yearbook*, 1990, p.88: A 13 year old seedling that first bloomed in 1980. Average flower size, 12 cm across x 7 cm deep with 27 petals and 42 petaloids.

Ashley Variegated. *(C.japonica), Camellia Digest*, 1(3), 1943: Deep pink, sometimes marked with white. Large, semi-double. Mid-season blooming. Originated in Simon's Nursery, Johns Island, South Carolina, USA.

Ashton's Ballet. *(C.hybrid).* ACS, *The Camellia Journal,* Nov. 2000, p.28 with colour photo, Reg. No.2524.. A cross of *C.japonica* 'Shikishima' (PI 418371) x *C.oleifera* (PI 162561). The rose form double flowers show two-tone pink petals with pale yellow anthers and white filaments. Originated by Dr William L. Ackerman, Ashton, Md, USA. *American Camellia Yearbook,* 2000, p.1, colour photo p.c7. The 19 year old seedling first flowered in 1986. Average flower size is 8.2 cm across x 3.8 cm deep, with 30 petals and 4 petaloids. Plant growth is upright with medium growth rate. Blooms early and is cold hardy to -10° F. The dark green leaves are 7.5 cm long x 3.2 cm wide.

Ashton's Cameo. *(C.hybrid).* ACS, *The Camellia Journal,* Dec. 2004, p.24 with colour photo; Reg. No.2628. A cross of *C.hybrid* **Winter's Charm** x *C.oleifera* **Plain Jane**, first flowered in 1994, introduced in 2006. Flower is 8.2 cm across, and is a deep lavender peony form with neon colour quality, 10 petals and 12 petaloids. Cold hardy to -10º F. Originated by Dr William L. Ackerman, Ashton, Md, USA. Flowers early. *American Camellia Yearbook*, 2004, p.90, colour photo p.c1. Plant has average growth rate. Dark green leaves are 7.5 cm long x 3.5 cm wide.

Ashton's High Rise. *(C.japonica),* ACS, *The Camellia Journal,* Mar. 2008, p.C11 with colour photo, Regn. No.2713; Originated by Dr William L. Ackerman, Ashton, Maryland, USA. Propagated by Camellia Forest Nursery and Cam Too Nursery. First flowered in 1994. A 9 cm diameter, medium pinkish red, rose form double flower with separated layers of petals. Central creamy-white filaments and gold anthers. Flowers mid-season. Upright plant with vigorous growth rate. *American Camellia Yearbook,* 2008, p.105 with colour photo; Dark green leaves 9 cm x 4.5 cm.

Ashton's Pink. *(C.hybrid).* ACS, *The Camellia Journal,* Nov. 2000, p.28 with colour photo, Reg. No.2525. A cross of *C.japonica* **Billie McCaskill** x *C.oleifera* (PI 162561) with lavender pink, semi-double flowers. Blooms early to mid-season. Originated by Dr William L. Ackerman, Ashton, Md, USA. *American Camellia Yearbook,* 2000, p.1, colour photo p.c7. The 19 year old seedling first flowered in 1989. Average flower size is 8.2 cm across x 3.2 cm

deep, with 14 petals, 3 petaloids, pale yellow anthers and white filaments. Plant growth is spreading and medium, making a symmetrical globular plant without pruning. Dark green leaves are 7 cm long x 2.5 cm wide.

Ashton's Prelude. *(C.hybrid).* ACS, The Camellia Journal, Dec. 2003, p.21 with colour photo, Reg. No.2604. A seedling of *C.oleifera* **Plain Jane** x *C.sasanqua* 'Setsuzan' (**Sessan**), with shell pink anemone form flowers 8.2 cm across x 4.5 cm deep. Cold hardy plant to -10° F. Originated by Dr William L. Ackerman, Ashton, Md, USA. *American Camellia Yearbook*, 2002, p.60, colour photo p.c2. First flowered 1989. Flowers have 12 petals, 78 petaloids, pink anthers and pink filaments. Flowers early. Plant is dense with average growth habit and slow to medium growth rate. The dark green leaves are 7.5 cm long x 3.2 cm wide.

Ashton's Pride. *(C.hybrid).* Camellia Forest Nursery Catalogue, 2008, p.10; Pale pink, single flower. Autumn flowering. Plant appearance is unusual with small narrow leaves and slightly weeping branches. Growth is vigorous and somewhat spreading. Offered as a cold hardy selection. *C.oleifera* **Plain Jane** x *C.sasanqua* **Santôzaki.** Raised by Dr William L. Ackerman, Ashton, Maryland, USA.

Ashton's Red Sunset. *(C.japonica)* ACS, *The Camellia Journal,* Sept. 2010, p.26 with colour photo; Regn 2795. Originator Dr. William Ackerman, Ashton, Md., USA. ACS, *Yearbook* 2010, p.73 with colour photo. A 29 year old cross of **Frost Queen** x 'Variety Z', **(Z)** which first flowered in 1990. Propagated by Cam Too Nursery, Greensboro, N.C. Plant is spreading, dense, and low growing with average growth rate. Cold hardy to -15° Far. Dark green leaves are 8.2 cm x 3.8 cm. Medium size, semi-double flower is 9.5 cm diameter x 3.8 cm height, red-purple (RHSCC 58C) with 14 petals and 5 petaloids. Bright yellow anthers and creamy white filaments. Heavy petal texture, and flowers early to midseason.

Ashton's Shooting Star. *(C.hybrid)* ACS, *The Camellia Journal*, Sept. 2010, p.26 with colour photo; Regn 2796. Originator Dr William Ackerman, Ashton, Md., USA. ACS, *Yearbook* 2010, p.73 with colour photo. A 15 year old cross of **Mrs Bertha A. Harms** x *C.oleifera* **Plain Jane**, first bloomed in 2000. Spreading, dense plant, with average growth rate. Cold hardy to -10° Far. Dark green leaves average 10 cm x 4.5 cm. Large size single form flower is 12 cm diameter x 4.5 cm height. White background with bright red (RHSCC 54A) radial stripes. Golden yellow anthers and creamy white filaments. Heavy petal texture, and flowers midseason.

Ashton's Snow. *(C.hybrid).* ACS, *The Camellia Journal*, Dec. 2002, p.20 with colour photo, Reg. No.2579. A cross of *C.japonica* **Billie McCaskill** x *C.oleifera* **Plain Jane,** with white single to semi-double flowers. The plant is cold hardy to -15° F. and flowers early to mid-season. Originated by Dr William L. Ackerman, Ashton, Md, USA. *American Camellia Yearbook*, 2002, p.126, colour photo p.c9. The 21 year old seedling first flowered in 1987. Flowers measure 9.5 cm across x 3.2 cm deep, with 8-12 petals, golden anthers and creamy filaments. Plant is spreading and dense, with dark green leaves 9 cm long x 3.2 cm wide.

Ashton's Supreme. *(C.hybrid).* ACS, *The Camellia Journal,* Dec. 2003, p.21 with colour photo, Reg. No.2605. Flower has bright lavender pink anemone form blooms, 6.5 cm across x 3.8 cm deep. Plant is very cold hardy to -17° F. *American Camellia Yearbook*, 2003, p.60, colour photo p.c2. First flowered in 1989. A seedling of (**Bill Wylam** x **Plain Jane**) x (**Narumigata** x **Plain Jane**). Originated by by Dr William L. Ackerman, Ashton, Md, USA. Flower has 21 petals, 34 petaloids, golden yellow anthers and creamy white filaments. Plant is upright, dense, with medium growth rate. Field tested for 20 years. Blooms early to mid-season. The dark green leaves are 7 cm long x 3.8 cm wide.

Ashy Pink. Camellia Grove Nursery Catalogue, 1944. Synonym for **Mathotiana Rosea.**

Asmodèe. *(C.japonica)*, Verschaffelt, 1854, *Nouvelle Iconographie*, Book VII, pl.IV: Of Italian origin, this Camellia bloomed for the first time this year, (1854). Its bloom, above average in size, has perfectly imbricated, numerous, regularly rounded petals, slightly emarginate, outspread, of a delicate pink colour, longitudinal veins of a deeper shade, unite to the margin which is membranaceous.

Asmodèe (Italia). Andrè, 1864, *Plantes de terre de bruyères...*, p.238. Synonym for **Asmodèe.**

Asomurasaki. (Mountain in Kyûshû), *(C.japonica)*, ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.3: No description. Originated in Kumamoto Prefecture, Japan.

Asomusume. (Girl from Aso), *(C.japonica)*, *Encyclopedia of Camellias in Colour*, vol.II, 1978, p.126, Colour photo No. 293; Seibundô Shinkôsha, 1979, *Senchinshû*, p.12, colour photo, p.198, description as 'Asomusume'(Yoshino): Flower, pink single with colour washed out to white towards the centre, 6-7 petals, 7-8 cm across, opening flat; stamens in a large, central group, a little irregular. Blooms mid-season to late.. Leaves, small, lanceolate to narrowly elliptic. Vigorous, upright growth. While similar to a Higo, it does not have the correct stamen cluster. See p.129, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Synonym: 'Asomusume'(Yoshino), Yoshino' by Andô. Originated in Kumamoto Prefecture, Japan by Tsugio Ôta around 1965..

Asomusume (Yoshino). Synonym for **Asomusume,** as synonymous with 'Yoshino'.

Aso-no-yuki. (Snows of Aso), *(C.sasanqua)*, Hakoda, JCS., 1987, *Tsubaki*, No.26, p.43; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.32: Small size flower, white, single. Blooms early. Originated in the Kumamoto Prefecture, Japan.

As-otome. McIlhenny 1941, *700 Varieties of Camellias.* Corruption of the Japanese name **Sa-otome.**

Aspacia. Lindo Nursery Price List, 1940-1941. Erroneously used as a synonym in America for **Emperor of Russia Variegated.**

Aspasia. *(C.japonica)*, Cachet Catalogue, 1840-1841, p.2. No description. Baumann, Mulhouse Catalogue, 1841-1842, p.13. No description. van Houtte Catalogue, 1858, 72:6: Brilliant carmine pink, petals lined with white at the centre. Verschaffelt, 1853, *Nouvelle Iconographie*, Book X, pl.III: The delicateness of this medium sized bloom justifies the name given, that of a famous courtesan of antiquity. Foliage medium size. Petals of the exterior rows are rounded, faintly emarginate or full; the others ovate, acute; the imbrication is perfect and seems to be arranged in spiral, concentric series, all of a vivid, cerise pink colour. Originated by Santarelli, Italy. Note: This name was invalidly used by Macarthur of Camden Park, Australia for one of his seedlings. Synonym: 'Aspasia Rosea'.

Aspasia Macarthur. *(C.japonica)*, *Botanical Society of New South Wales Report*, 1848, invalidly as 'Aspasia': White flushed flesh pink at base of petals and flaked with pink. Large, peony form. A Macarthur seedling from Camden Park, N.S.W., Australia. Due to confusion in nomenclature rules on priority, with an Italian cultivar of the same name, Professor Waterhouse, in his *Camellia Trail*, 1952, p.13, proposed that the name should be **Aspasia Macarthur.** In America the names **Aspasia** and 'Aspacia' have been used as erroneous synonyms for **Emperor of Russia Variegated,** whereas, the Camellia **Aspasia Macarthur**

was erroneously equated with **Paeoniaeflora** and **Pomponia.** Synonyms included: 'Pomponia Improved', 'Flore Celeste', 'Aspasia Nova', 'Aspasia'(New). Sports include: **Lady Loch, Otahuhu Beauty, Camden Park, Strawberry Blonde, Can Can, Jean Clere, Margaret Davis, Just Sue.** Orthographic errors:'Asposia', 'Asphasia'. Pseudonym: 'Paeoniaeflora'. Chinese synonym: 'Makade'.

Astonishment. SCCS, 1958, *Camellia Nomenclature*, p.49. Synonym for **Kenkyô.**

Astra. *(C.reticulata* hyb.), *American Camellia Yearbook*, 1979, p.102, Reg.No.1566: A large to very large, rose pink, white on inner petals, rose form double, *C.reticulata* chance seedling, mid-season blooming; originated by Herbert H. Smith, Yuba City, California, USA. The 23 year old seedling first bloomed 1969. Flower has 50-58 petals, 3-5 petaloids, yellow anthers and pale yellow filaments. Average size, 12.5 cm wide by 7.5 cm deep. Plant growth is upright, dense and medium in rate with 10 cm x 7 cm dark green leaves.

Astrea. *(C.japonica)*, *Camelie delta semine Romana*, 1851. Delgrande seedling. Large flower, petals numerous, perfectly imbricated, the outer petals rolled back somewhat. A soft rose flesh colour, lined with carmine of varying intensities; the centre petals forming a crater with little rose stripes and some of pale colour. Originated by Delgrande, Rome, Italy.

Astro Nova. *(C.japonica),* ACS, *The Camellia Journal*, Mar. 2003, p.29 with colour photo, Reg. No.2586. A cross of **Gwenneth Morey** x **Kona**, which has white flowers with red stripes and spots. Semi-double to anemone form, with fimbriated petals, yellow anthers and white filaments. Originated by Ken Hallstone, Lafayette, Calif., USA, and registered by Don Bergamini, Martinez. *American Camellia Yearbook,* 2003, p.60, colour photo p.c2. The seedling first flowered in 1988. Flowers measure 11.5 cm across x 5 cm deep with 10-12 petals and 5-30 petaloids. Plant is upright and dense with average growth rate. Flowers mid-season. The dark green leaves are 5 cm long x 2.5 cm wide. Note: The name is illegal according to the International Code, which prohibits the use of Latin for cultivars.

Astronaut. *(C.japonica),* Select Nurseries Wholesale Price List, 1964, p.69. Mark S. Cannon Scion Catalogue,1964-1965, p.1. No description. SCCS., *Camellia Nomenclature*, p.20: Rose pink. Large, single to semi-double with channelled petals. Vigorous, upright growth. Flowers early to mid-season. Originated by Select Nursery Inc., Whittier, California, USA. For colour plate see frontispiece, SCCS, *The Camellia Review*, 1965, vol.26, No.3. Chinese synonym 'Yuhangyuan'.

Astrorubens. Harrison, ea., 1835, *Floricultural Cabinet*, vol.3, p.186. Orthographic error for **Atrorubens.**

Asuka. (Place name in Nara Prefecture), *(C.japonica), Encyclopedia of Camellias in Colour*, vol.I, 1972, p.106 & 322, colour photo, No.217; Seibundô Shinkôsha, 1979, *Senchinshû*, p.11, colour photo, p.198, description: A pale pink semi-double, outer petals broad-cordate, a poor stamen cluster broken and intersected by an occasional small, erect petal, size 10-11 cm wide, filaments white. Mid-season to late flowering. Leaves, medium size, round-ovate, base acute, reflexed. Plant growth habit, vigorous and erect. See p.306, Yokoyama & Kirino, 1989, *Nihon no Chinka.* The old name of this cultivar was 'Atoseyama' or 'Atoseyama'(Chûbu), but it was changed in Chûbu in 1971 to avoid confusion between this and the cultivar which had the same Kanji. Originated in Chûbu District, Japan.

Asukagawa. (Asuka River), *(C.japonica)*, *Chinka Zufu,* (before 1700), Watanabe, 1969, pl.153; Itô, Tokuemon, 1788, *Tsubaki, Hanagata Tsuki Oboechô;* Shirai-Bunka, 1789, *Shoshiki Hanagatachô:* Double flower, medium size, 3 rows petals, divided, central stamen cluster. Deep red background with white star-like variegation. Different reading: 'Asukakawa'. Originated in Japan. Not sure that it is the same variety as from the *Kokon Yôrankô*. (Believed extinct.)

Asukagawa. (Asuka River), *(C.japonica)*, Yashiro, Kôken, 1841, *Kokon Yôrankô*, vol.309: No description. Originated inJapan. (Believed extinct).

Asukagawashiro. (White Asuka River), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô;* Watanabe, 1964, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.5, p.79: White, large double, Stamens divided by inner petals. Originated in Japan. (Believed extinct).

Asukagoshiki. (Five Coloured Camellia from Asuka), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.11, colour photo, p.198, description: Flower, Medium to large size, fine red lines and speckles on a base colour varying from white to pale red, occasionally a white flower, semidouble, small, compact column of stamens. Flower very similar to **Tricolor,** ('Ezo-nishiki'),10-11 cm wide, mid-seasom flowering. Leaves, medium to large, elliptical, caudate apex, twisted and wavy. Growth habit vigorous and erect. A cultivar from a private family in Kashiwara City, Nara Prefecture, Japan. Named and released by Ikuo Nishihata in 1967.

Asukakawa. Different reading for **Asukagawa.**

Asukayama. (Asuka Mountain), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki*, *Irohanayose Irotsuki:* White, single with red stripes, tubular stamen cluster; cup-shape. Originated in Japan. (Believed extinct.)

Asuniyovense. Sunningdale Nursery Catalogue, 1956, p.6. Corruption of the Japanese name **Usumyorenji.**

Ataburo. Sunningdale Nursery Catalogue, 1956: Foliage mottled yellow. Rose form flowers. Corruption of Japanese name **Ama-obune.**

Atago. (Place name). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.143 with colour photo; Small single, tubular to trumpet shape, white spots on purplish deep red ground. Leaves small, elliptic. Upright growth. Breeding unknown, released by Soshin Hirai, Kurume, Saitama Pref., Japan.

Atago-meigetsu. (Bright Moon of Atago), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.3. No description. Originated in the Shimane Prefecture, in Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.21 with colour photo; English translation p.13. Small to medium, pale pink, trumpet shaped single, cylindrical stamen column. Flowers early to late. Leaves narrowly elliptic, medium size. Upright growth. Selected from wild japonicas at Mt Atago, Matsu'e City. Named by San-in Camellia Club in 1983.

Atagoyama. (Mount Atago), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.95, colour photo and description: Small size, soft pink, vase-shaped single with 6 broad, overlapping, rounded petals. Stamens in a central cylinder, degenerated, filaments joined for the lower half, anthers yellow. Leaves light green, elliptic, apices tapering acute, recurved, margins rolled under serrulate. Late blooming. Collected at Mt. Atago, near Matsue-shi, Shimane Prefecture, Japan. Named and released by Hiroshi Ibara in 1984.

Atamabura. Colonel Hicks List, 1937-1938. Corruption of the Japanese name **Ama-obune.**

Atamburo. Sunningdale Nursery Catalogue, 1965, p.6. Corruption of Japanese name **Ama-obune.**

Ata-no-kimi. (Legendary Warrior from Kagoshima), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.371, colour photo and description: Large size, peony form, incomplete double with 23 rows of large, rounded, outer petals and a convex centre of erect, folded and twisted, small petals with stamens and petaloids intermixed. White ground with streaks of pink and red. Leaves bright, mid-green, elliptic to lanceolate, apices acute, margins shallowly serrate. Blooms mid-season to late. The original tree survives in a private garden in Kôriyama Town. Named and released by Kagoshima Camellia Society in 1980.

Ate-tsubaki. (Noble Camellia), *(C.japonica),* Satomi, 1962, *Supplement to Camellia Varieties of Japan;* Tuyama, 1968, *Camellias of Japan,* colour photo, No.359, p.182, description, p.196; *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.338, p.341; Seibundô Shinkôsha, 1979, *Senchinshû,* p.12, colour photo, p.198, description: Leaves very broadly elliptic, rounded at base, shortly acuminate, prominent venation, thick texture; petioles glabrous. Flowers, semi-double, white, thinly striped, deep red, (Spinel Red 0023), petals broad, in three layers, slightly emarginate, wavy at apex, separated, 10-11 cm across. Blooms mid-season to late. Occasionally produces completely white flowers. Vigorous, spreading growth. One of the three famous old Camellias in the grounds of the Honen'in Temple, Kyôto, Japan. Originated in Kansai District, Japan.

Athelyne. SCCS, 1956, *The Camellia. Its Culture and Nomenclature,* p.26: Red. Medium to large size, semi-double with irregular petals. Medium, compact growth, Mid-season blooming. Originated by Bartlett's Nursery, Fort Valley, Georgia, USA. Sport: **Athelyne Variegated.**

Athelyne Variegated. Bartlett's Nursery Catalogue, 1958. As 'Athelyne Var'.: A virus variegated form of **Athelyne** - red blotched white. Originated by Bartlett's Nursery, Fort Valley, Georgia, USA.

Athena. *(C.japonica), American Camellia Yearbook,* 1958, p.285, Reg.No.327: A 9 year old chance seedling, originated by Julington Nurseries, Jacksonville, Florida, USA. The medium sized, glossy, mid-green leaves are long and oval. The incomplete double flowers, 9-10 cm across, have 3 rows of slightly wavy petals, surrounding a few small, petaloids interspersed with light stamens. The colour of the flower is white, with scattered deep rose pink markings. Flowers are fragrant and open mid-season to late.

Atropurpurea. *Index Seminum University Palermo*, 1827. Abbreviation for **Atropurpurea Plena.**

Atropurpurea Flore Plena. Burdin Catalogue, 1822, p.55 as 'Atro-Purpurea Flore Pleno'; ortho-graphic variant for **Atropurpurea Plena.**

Atropurpurea Nova. *(C.japonica),* Debonnaire, 1832, *Annales Société Horticulture de Paris,* 11:15-20, as 'Athropupurea Nova': Flower about 10 cm across, full, irregular, of a vivid cherry-red, with a touch of salmon-orange. The outer petals are horizontal, 4 cm wide by 5 cm long, in

4-5 rows diminishing in size, veined with very intense red, deeply notched, reflexed and imperfectly imbricated. The inner petals are few and very small, in irregular serries, elevating the centre to the appearance of the heart of a peony. Originated in Italy.

Atropurpurea Plena. *(C.japonica)*, Loddiges Catalogue, 1814, p.25 as 'Atropurpurea pl.': Deep red double from China. (Believed extinct.) Orthographic variant: 'Atro Purpureo Pleno'.

Atro Purpureo Pleno. *Catalogue des plants cultivée dans le Jardin de M. Joseph Parmentier*, May, 1812. Orthographic variant for **Atropurpurea Plena.**

Atrorubens. *(C.japonica)*, Parmentier, 1818, Catalogue des arbres et plantes...p.15. No decription. Loddige's 1818, *Botanical Cabinet*, vol.2, pl.170; Sweet, 1818, *Hortus Suburbanus Londinensis.* Imported from China by Loddiges in 1809. The flowers are small to medium, averaging 7.5 cm across. The outside petals are of heavy texture and deep crimson in colour, faintly marked by darker veins. The petals are in 2 to 3 rows and the centre of the flower is filled with small, confused petals, varying in size and form. Sometimes a few, elongate petals stand out from between the centre and the circumference, presenting the appearance of a second flower growing from the first. Synonyms: 'Loddige's Red', 'Atrorubens Flore Pleno', 'Flore Pleno Atrorubens', 'Atrorubens Coccinea', 'Double Crimson', 'Rubra Atropurpurea', 'Lord Keer Ancien', 'Paeoniiflora Atropurpurea', 'Double Dark Red', 'Double Crimson'. Orthographic error: 'Atrorubra'. Originated in China.

Atroviolacea Serni. Harrison ed., *Floricultural Cabinet*, 1838, vol.6, p.149. Synonym for **Atroviolacea.**

Atroviolacea Nova. Trillon, Le Mans Nursery Catalogue, 1843, p.3. Synonym for **Atropurpurea.**

Atroviolacea Superba. Trillon, Le Mans Nursery Catalogue, 1845, p.3: Deep purplish red, superb form. Originated in France.

Atrovirens. *(C.japonica,)* Annonymous, 1830, *Annales Société Horticulture de Paris*, vol.7, p.280-281: Raised from seed sown in 1821 in France by M. Noisette and named by him. Baumann, 1841, gives **Purpurascens** as a synonym, but as this is reported to be an English seedling, the synonymy is rejected. Synonym: 'Atrovirens Multiflora'.

Atrovirens Multiflora. Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani. Synonym for **Atrovirens.**

Atsuhime. (Princess Atsu). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.208 with colour photo; Medium size single, colour often split between white and red on the same flower. Tubular stamen ring, gold anthers on white filaments, and slightly pinched at the top. Leaves medium size, elliptic. Somewhat slow growth. A chance seedling of a white flower sport of **Jiun**. Named by Takashi Tanaka, and released by Ichiro Kanetsuki. From Shimane Pref., Japan.

Atsuma-shibori. Different reading for **Azuma-shibori.**

Atsumori. (Ill-fated member of the Taira Clan), *(C.japonica)*, Hagiya & Ishizawa, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.8, black and white photo, p.3; Seibundô Shinkôsô , 1979, *Senchinshû*, p.12, colour photo, p.198, description: Flower, large, very pale pink single of 6-7 petals which are creped and waved and having a central ring of stamens with milk-white filaments. Average size 12 cm across. Flowers mid-season to late. Leaves, large, narrowly-elliptic with turned under margins. Vigorous, erect growth. Renamed from 'Juraku-hachigô'. Originated in Kantô District, Japan. Atsumori of the Taira clan was only 15 years old when he was killed (1180) by Kumagai Naozane, veteran warrior of the Minamoto clan. During single combat, Naozane unwillingly killed the boy under the cold code of the battlefield. Rebelling against the cruel duty of the fighting man, Naozane renounced the world and entered the Monastery of Kurodani, Kyôto as a member of the Buddhist Jôdo Sect and spent his life, until his death in 1208, praying for the happiness in the next world of the short lived Atsumori. Named and released by Kataoka Juraku-en Nursery in 1967.

Attenuata. *(C.japonica)*, Isola Madre Catalogue, 1845. No description. Fratelli Rovelli Catalogue, 1852, p.11: Red anemone flowers. Originated in Italy. (Believed extinct.)

Corallina. Orthographic errors: ‘Augusta Rubra Aurantriaca’, ‘Augusta Rubra Aurantia’. Synonyms: ‘Aurantiaca’, ‘Augusta Vera’, ‘Aurantia’, ‘Rubra Aurantia’, ‘Nutrata Waratah’, ‘Rubra Aurantia Augusta’. Originated in England.

Augusta Rubra Aurantriaca. Ellis, 1953, *Old Camellia Varieties*, p.30. Orthographic error for **Augusta Rubra Aurantiaca.**

Augusta Superba. *(C.japonica),* Berlèse, 1840, *Monographie*, ed.2, p.106: Leaves of average size, oblongovate, slightly acuminate, similar to ‘Hallesia’ with the same veins and serration, of deep green; buds scales blackish at the base and green at the apex. Flower 8 cm across, semi-double, clear cherry red, sometimes dark cerise; outside petals in 3 rows, oblong, well imbricated but not numerous, those at the centre, mixed with stamens and petaloids, short, narrow, reddish, few, leaving an opening in the centre of the corolla. Originated in Italy.

Augusta Venusta. *(C.japonica),* Verschaffelt Catalogue, No.50, 1844, p.18. No description. Originated in Belgium. (Believed extinct.)

Augusta Vera. Jacob Makoy Nursery Catalogue, 1839, p.16, as a synonym for **Augusta Rubra Aurantiaca.**

Augusta Wilson. *(C.japonica),* Overlook Nursery Catalogue, 1938: "It is our great pleasure to have named this variety **Augusta Wilson** in memory of a famous writer of Mobile, Alabama. She was very fond of this variety and planted it in the garden of her home in Ashland Place, many years ago. The flower is very double and peony type, 9-10 cm in diameter. It is a soft pink, some flowers are marked with faint white spots. Leaves are large, thick and roundish, dark green, acuminate, coarsely serrate, 10 cm x 5 cm. Plant habit, upright and fast growing. Early blooming. Synonyms: ‘Ashland Pink’, ‘St. Elmo’, ‘Cabbage Head’, ‘Augusta Evans Wilson’, ‘Mrs Augusta Wilson’, ‘Mrs A.E. Wilson’. See p.55, Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I for black and white photo and a colour plate, p.21 in *Camellias* by G.G. Gerbing.

Auguste Delfosse. *(C.japonica),* Verschaffelt, 1855, *Nouvelle Iconographie*, Book VIII, pl.I: M. Emile Defresne of Liege, Belgium, who obtained this variety from seed from the cross of ‘Weimari’ (**Weymarii**) x **Eximia**, first bloomed it in 1853. According to the desire of the producer it was dedicated to the President of the Belgium Chamber of Representatives, M. A.Delfosse. Besides their star-like arrangement of splendid regularity, the blossoms present an unusual colouring, the vivid shade, recalling **Leeana Superba,** a pure carmine with a tint of cinnibar red and few white stripes. Orthographic errors: ‘Aguste Delfosse’, ‘Alphonse Delfosse’, ‘August Delfosse’, ‘Auguste Del Fosse’, ‘Augustine Delfosse’, ‘Augusta Delfusse’, ‘August Del Fosse’, ‘Augusta Delfonse’, ‘Auguste Delfrosse’, ‘Augusto Delfosse’, ‘Auguste Delfosses’, ‘Auguste Delafosse’, ‘Augusta Delfosse’, ‘Augusto del Fosso’, ‘Auguste De Fosse’, ‘Auguste Deofosse’. Aurora del Guicciardini. Del Lungo e Girardi, 1928, *Le Camelie*, p.174. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.16. Orthographic error for **Aurora Guicciardini.**

Aurora Guicciardini. *(C.japonica)*, Burnier & Grilli Catalogue, 1846-1847: Flower a full bomb burst, peony form of a yellow dawn, more splendid than the rose 'Smith's Yellow'. Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France*, vol.40, p.132: Peony form flower, 9-10 cm across, basically white with a reflection of yellow and very few nuances of the old tea rose. Exterior petals, large, in 2 or 3 rows, with irregular petals at the centre with tints of pale yellow. Originated by Burnier & Grilli, Florence, Italy. Orthographic variants: 'Aurora de Guicciardini', 'Aurora del Guicciardini', 'Aurora'(Comte Guicciardini), 'Aurora di Guicciardini', 'Aurora dei Guicciardini'. Synonyms: 'Lutea del Conte Guicciardini', 'Lutea Guicciardini'.

Aurora Nova. *(C.japonica)*, Geldorf, Const., 1844, Catalogue of Plants and Price List, p.3, as 'Aurora': Imbricated, soft pink. Charles van Geert Catalogue, 1845, p.2; Cachet Catalogue, 1845-1846, p.6; Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France*, vol.40, p.275: Flower 9-10 cm across, white with touches of rose, small. The corolla is almost always peony form; centre broad and full. Sometimes it is a peony form at the base and rose form at the top; in which case the exterior petals are in 3 rows, irregular and badly imbricated, undulate and twisted. The rows that follow are small, numerous, narrow, unequal and petaloid. Those at the centre are in several rows, broad, as large as the exterior petals, well imbricated, well displayed and forming a rose form centre, more or less regular. Verschaffelt, 1853, *Nouvelle Iconographie*, Book VIII, pl.II: White to pale flesh colour, tinged pink, with a few lines of red, rose form double. Originated by Mariani, Italy. Synonym: 'Aurora Nova de Casoretti'. Orthographic error: 'Auroro Nova'.

Aurora Nova (de Milan). Auguste van Geert, Catalogue, 1852, p.28. Synonym for **Aurora (Casoretti).**

Aurora Nova de Casoretti. Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France*, vol.40, p.275. Synonym for **Aurora Nova.**

Aurora Rosea. SCCS, 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for **Finlandia Red.**

Aurora (Scarlatti). *(C.japonica)*, Scarlatti Catalogue, 1888: White on background of red. Originated by Scarlatti, Florence, Italy.

Aurora's Bluebird. *(C.reticulata)*, ACRS, 1984, *Camellia News*, No.91, p.22, Reg. No.317: Originated by T.E. Pierson, Hurstville, N.S.W. Australia. A *C.reticulata* **Balderdash** chance seedling, first flowered 1980. Flower, informal double, 12.5 cm across by 8.5 cm deep, rose pink with distinct lavender overtones, particularly on edge of petals. Flowers mid-season to late. Plant habit, open and spreading with 10.7 cm x 4 cm, dark green, slightly ovate, reticulate leaves.

Auroro Nova. Jacob Makoy et Cie Catalogue, 1849, p.19. Orthographic error for **Aurora Nova.**

Ausfega. *(C.japonica)*, Mark S. Cannon Scion Catalogue, 1962, p.1. No description. Originated in USA. No valid listing located.

Ausonia. *(C.japonica)*, Padova, 1855, *Catalogi Plantarum Caesarei Regii Horti.* Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete*, p.4. No description. Sport: **Ausonia Flore Plena Variegata.** Originated in Italy. (Believed extinct.)

Ausonia Flore Plena Variegata. *(C.japonica)*, Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani, as 'Ausonia Fl. Pl. Variegata'. Variegated sport of **Ausonia.** Originated in Italy.

Austell Pink. Lindo Nursery Price List, 1941-1942. Orthographic error for **Austill Pink.**

Austil Pink. Rubel, 1936, *Camellia Culture Under Glass*, p.44. Orthographic error for **Austill Pink.**

Austill Pink. *(C.japonica)*, Kiyono Catalogue, 1934, p.12: Semi-double pink of medium size, stamens often intermixed with smaller petals in the centre. Mid-season blooming. Plant habit, compact, upright, fast growing. Lindo Nursery Catalogue, 1940-1941, as 'Austell Pink': Peony type showing stamens, red, large. Orthographic errors: 'Austell Pink', 'Austil Pink', 'Austill's Pink', 'Austills Pink'.

Austill's Pink. Vanderbilt, 1941, *Camellia Research, II*, p.2. Orthographic error for **Austill Pink.**

Austills Pink. Gerbing's Azalea Gardens Catalogue, 1938-1939. Orthographic error for **Austill Pink.**

Australia. Tammia Nursery Catalogue, 1965-1966. Orthographic error for **Australis.**

Australia. *(C.japonica)*, Shepherd Nursery Catalogue, 1841. No description. Originated in Australia. (Believed extinct.)

Australia. (*C.reticulata* hybrid). Claude Thoby, 1993, *Camélias*, pp.10, 16, 60. Blooms mid-season. Salmon pink semidouble.

Australian Hiryo. Nuccio's Nurseries Catalogue, 1956, p.7. Synonym for **Kanjiro.**

Australian Hiryu. Nuccio's Nurseries Catalogue, 1957, p.19. Synonym for **Kanjiro.**

Australis. *(C.japonica)*, Camellia Grove Nursery Catalogue, 1951; Waterhouse, 1952, *Camellia Trail*, p.30: A seedling from Camellia Grove Nursery, St. Ives, Sydney. Large, informal double, salmon rose, resembling **Leviathan** but flatter in the centre. Three or four rows of large, outer petals and a confused centre of half size petals, petaloids and stamens. Mid-season blooming. Orthographic error: 'Australia'. Chinese synonym 'Aozhou Zhi Guang'.

Australis Alba. *(C.japonica)*, Jean Vershaffelt, 1860-1861, Price List, p.13. No description. (Believed extinct).

Austroyunnanensis. Hu, Hsen-Hsu, 1957, RHS, *The Rhododendron and Camellia Yearbook*, No.11, p.107, as the species *Camellia austroyunnanensis* which has not been recognised by Sealy or Chang.

Autonia. *(C.japonica)*, Verschaffelt Catalogue, No.50, 1844, p.18. No description. (Believed extinct.)

Autonomia dos Açores. *(C.japonica). List of Portuguese Camellias* 2010, Guedes & Oliveira, pp.10 & 51. From the original manuscript list of Companhia Horticola, ref 1081, without description. Semi-double to anemone form pink, irregularly blotched with pure white. Several petaloids among stamens. Possibly a synonym for **Sophia**. Named for the "Autonomist Movement", which led to the creation of the Autonomous districts. (ref João Forjaz Sampaio).

Autumn Beauty. *(C.sasanqua)*, Camellia Grove Nursery Catalogue, 1947, p.8: Single, rose pink with mauve tonings, to deep cyclamen. Very early flowering. Attractive, open, upright growth. Strongly scented. Originated at Camellia Grove Nursery, St. Ives, N.S.W., Australia. Invalidly used in America as a synonym for **Jeff's Watermelon Pink.**

Autumn Beauty. Overlook Nursery Catalogue, 1948-1949, p.35. An invalid synonym for **Jeff's Watermelon Pink.**

Autumn Dawn. *(C.sasanqua)*, Nuccio's Nurseries Advert, ACS, 1994 *The Camellia Journal*, vol.49, No.4, p.30; SCCS 1996, *Camellia Nomenclature*, p.148: Pink with edges toned a deeper pink. Medium sized, loose peony form. Originated in USA By Nuccio's Nurseries, Altadena California.

Autumn Delight. *(C.sasanqua).* ACS, *The Camellia Journal*, Aug. 2000, p.5 with colour photo, Reg. No.2517. A white rose form double flower with pink edges, and yellow anthers and white

filaments. Flowers early. Originated by Dr. James Habel, Suffolk, Va, USA. *American Camellia Yearbook,* 2000, p.2, colour photo p.c8. The 10 year old chance seedling first flowered in 1994. Average flower size is 9 cm across x 3.2 cm deep, with 21 petals. Plant growth is upright, dense and vigorous, with dark green leaves 7 cm long x 2.5 cm wide.

Autumn Fragrance. *(C.japonica* hybrid). *New Zealand Camellia Bulletin,* March 2002, Issue No.141, vol.XXII, No.5, p.9, Reg. No.426. Registered by J.R. Finlay, Whangarei, New Zealand. A cross between *C.hybrid* **Fragrant One** x *C.japonica* **Scentasia,** which first flowered in 1997. Flowers are single, 10 cm diameter x 3 cm deep, with 6-7 petals. The anther mass is compact, about 2.5 cm across, with bright yellow pollen and yellow-cream filaments. Colour is light pink (RHS.CC.65C) shading to 158D. The flower has a good "honeycomb" fragrance. The plant is upright, open and of medium growth rate, with dark green leaves 7 cm long x 3 cm wide. Flowers early to mid-season.

Autumn Glory. *(C.japonica x C.granthamiana),* Camellia Lodge Nursery Catalogue, 1967, p.37: *C.japonica* **Spencer's Pink** x *C.granthamiana.* Large, size single. Creamy white, delicately flushed soft pink towards the petal margins, with long petals, crimped and slightly waved, surounding a mass of golden yellow stamens, almost spherical in form. Bud sepals, at maturity, are greyish-brown, crinkled and dry in texture. Tall to medium, bushy growth with large, attractive foliage, deeply veined. Originated by Erica McMinn, Camellia Lodge Nursery, Noble Park, Victoria, Australia and is the first *C.granthamiana* hybrid introduced into cultivation. The growth, foliage and flower form being similar to *C.granthamiana* with an added soft pink colouring. Chinese synonym: 'Qiuli'.

Autumn Gold. (C.x *hiemalis),* ACRS, *Camellia News,* No.79, p.28, Reg. No.267, 1981: Originated by Erica McMinn, Camellia Lodge Nursery, Noble Park, Victoria, Australia. A chance seedling from *C.x hiemalis* **Shishigashira,** first bloomed 1976. The slow growing, spreading, dense plant has 4.5 cm x 2.5 cm, slightly ovate, medium green leaves with gold coloured margins. The 5 cm semi to incomplete double flowers are rose red, shading to darker red on the margins of the petals.

Autumn Herald. *(C.pitardii).* Camellia Haven Catalogue, 1993, p.12: Miniature, white shading to pink at the edges. A *C.pitardii* hybrid similar to the species but very early flowering. Compact shrubby growth. Originated in New Zealand by N. Haydon, Camellia Haven Nursery, Takanini.

Autumn Jewel. *(C.x williamsii).* ACS, *The Camellia Journal,* Aug. 2002, p.21, colour photo p.20, Reg. No.2575. A chance *C.saluenensis* seedling with salmon pink flowers. Originated by Nuccio's Nurseries, Altadena, Calif., USA, and commercially introduced in their 2000 catalogue. Nuccio's #9137T. Flowers early to late. *American Camellia Yearbook,* 2002, p.126, colour photo p.c9. The 15 year old seedling first flowered in 1989. Average flower size is 7.5-10 cm across with 60-85 petals. Plant is dense and spreading with average growth rate.

Autumn Lantern. *(C.japonica),* Camellia Forest Nursery Catalogue, 2008, p.17; A true autumn blooming japonica, covered in single, medium size, rose red flowers. Flowers tend to open all at once. Good upright form with dark green foliage. **Berenice Boddy** x **Dainty.** Originated and released by Camellia Forest Nursery, Chapel Hill, N.C., USA.

Autumn Mist. *(C.japonica),* Camellia Forest Nursery Catalogue, 2008, p.17; An autumn blooming japonica. Large, single flowers are pure white early. Later flowers show some pink at the edges, fading into the centre as the flower matures. Stamens in a tight cylinder. Upright plant with rather large leaves. Flowering continues into winter. **Berenice Boddy** x **Daikagura.** Originated and released by Camellia Forest Nursery, Chapel Hill, N.C., USA.

Autumn Moon. *(C.sasanqua), American Camellia Yearbook,* 1961, p.219, Reg. No.523: A 12 year old chance sasanqua seedling, that first bloomed 1953; originated by K. Sawada, Overlook Nursery, Alabama, USA. Growth habit, rapid, upright and dense. Leaves large, thick textured,

well serrated, averaging 5 cm x 1.5 cm. The single, white flowers are 10 cm across and 2.5 cm deep with 8-9 thick petals. Early flowering.

Autumn Perfection. *(C.japonica),* ACS, *The Camellia Journal*, Mar. 2007, p.28 with colour photo; Reg. No.2694. A chance seedling that first flowered in 2000. Originated by V. E. Howell, Lucedale, Miss., USA and propagated by the Camellia Nursery, Lucedale. A 7.5 cm diameter, clear pink formal double with 45 petals. Plant growth is upright and vigorous and blooms early. *American Camellia Yearbook*, 2007, p.66 with colour photo; Light green leaves are 7.5 cm x 3.8 cm.

Autumn Pink Icicle. *(C.hybrid).* ACS, *The Camellia Journal,* Nov. 1998, p.24, Reg. No.2472. A medium size, deep pink, semi-double *C.hybrid* (*C.oleifera* x unknown) which flowers early to mid-season. Originated by Bond Nursery Corp., Dallas, Tex., USA. *American Camellia Yearbook*, 1998, p.1, colour photo before p.1. The 12 year old seedling first flowered in 1987. Average flower size is 9 cm across x 2.5 cm deep with 18 petals, bright yellow stamens and bright yellow filaments. Plant growth is upright, dense and vigorous with dark green leaves 6.5 cm long x 4.5 cm wide.

Autumn Rocket. *(C.sasanqua).* ACS, *The Camellia Journal*, Aug. 2000, p.5 with colour photo, Reg. No.2518. A white anemone to rose form double, opening from pink buds. Flowers early. Originated by Dr James Habel, Suffolk, Va, USA. *American Camellia Yearbook*, 2000, p.2, colour photo p.c8. The 10 year old seedling first flowered in 1993. Average flower size is 8.2 cm across x 3.8 cm deep, with 25 petals, 15 petaloids, yellow anthers and white filaments. Plant growth is columnar, dense and vigorous, and with dark green leaves 6.5 cm long x 2.5 cm wide.

Autumn Rose. McIlhenny Catalogue, 1947:1948, p.2. Synonym for **Gloire de Nantes.**

Autumn Sentinel. *(C.sasanqua).* ACS, *The Camellia Journal,* Feb. 1999, p.22, Reg. No.2486. A miniature, clear pink, peony to rose form double chance seedling. Flowers early. Originated by Green Nursery, Fairhope, Ala, USA. *American Camellia Yearbook,* 1999, p.1, colour photo before p.1. The 19 year old seedling first flowered in 1984. Blooms of 3.8 cm diameter are arranged spirally on its branches. Plant growth is vigorous, very upright, and dense. The dark green leaves are 3.2 cm long x 1.2 cm wide.

Autumn Snow. *(C.sasanqua),* McCaskill Gardens advert, SCCS, 1950, *Camellia Review*, vol.12, No.3, p.18. SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* A white, single *C.sasanqua* seedling, originated by McCaskill Gardens, Pasadena, California, USA. See black and white photo, p.279, Hertrich, 1959, *Camellias in the Huntington Gardens*, vol.III.

Autumn Spirit. *(C.hybrid).* Camellia Forest Nursery Catalogue, 2008, p.9; Small to medium size, peony form flowers of an intense bright deep pink. Very early flowering. Small deep green leaves, and a bushy, moderate to vigorous grower. (*C.oleifera* x *C.sasanqua* F^2 segregate) Offered as a cold-hardy selection. Originated and released by Camellia Forest Nursery, Chapel Hill, N.C., USA.

Autumn Sun. *(C.sasanqua).* Camellia Forest Nursery Catalogue, 2008, p.5; Rose red semi-double flowers in mid-autumnUpright, compact and dense growth with shiny dark green leaves.. Originated and released by Camellia Forest Nursery, Chapel Hill, N.C., USA.

Autumn Sunrise. *(C.sasanqua).* Camellia Forest Nursery Catalogue, 2008, p.5; Large, single, cup-shaped white flowers with a red tip. Dense, upright, vigorous growth. Originated and released by Camellia Forest Nursery, Chapel Hill, N.C., USA.

Autumn Surprise. *(C.sasanqua),* Tammia Nursery Catalogue, 1966; *American Camellia Yearbook*, 1967, p.223, Reg. No.933: A 12 year old chance seedling that first bloomed 1959; originated by A. Rester, Bogalusa, Louisiana, USA. Growth habit is upright and it grows well for espalier work. The leaves are light green, variegated with gold or white flecks and average 2.5

cm x 1.3 cm. The semi-double to peony form flowers are 3.9 cm across by 3.2 cm deep. A delicate pink with yellow anthers and white filaments. Blooms early.

Autumn Tint. *(C.sasanqua),* Yashiroda Catalogue, 1939. Well formed, large, crimson double. Originated in Japan.

Autumn Twilight. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2005, p.28 with colour photo p.29, Reg. No. 2659. A chance seedling that first flowered 1994. Originated and propagated by C.M. and Lillian Gordy, Ocala, Fla., USA. A chance seedling that first flowered in 1994. The 12.7 cm diameter, lavender pink, formal double flower has heavy petal texture, and imbricated centre petals. A pale pink stripe extends inwards from the centre edge of each petal. *American Camellia Yearbook,* 2005, p.39 with colour photo p.c3. Plant is upright and dense, with average growth rate. Dark green leaves are 11.5 cm x 5 cm. Flowers mid-season.

Ava Maria. SCCS, 1956, *The Camellia. Its Culture and Nomenclature*, p.26. Orthographic error for **Ave Maria.**

Ava Marie. Feray's Fine Flowers Inc. Catalogue, 1960. Orthographic error for **Ave Maria.**

Avalanche. *(C.x williamsii). New Zealand Camellia Bulletin,* March 1992, Issue No.111, vol.XVII, No.4, p.46, Reg. No.302: Originated by Les Jury, New Zealand as a seedling of **Fantastic** x **Daintiness.** Creamy white flowers on 6 year old plant in 1987. Dense, weeping plant of medium growth rate with dark green leaves 7.5 cm long x 4 cm wide. Flowers semi-double, 9cm across x 4 cm deep with 21 petals. Blooms mid-season. The plant has a spreading mounded habit of growth with long weeping branches. Colour RHS.CC.155B.

Avalanche. ACRS *Camellia News,* No.131, 1994, p.7, Reg. No.435. Name changed to **Snow Storm** due to the existence of the earlier registered New Zealand variety of the same name.

Avalon. *(C.x williamsii),* McCaskill Gardens Catalogue, 1962: Rose pink overlaid with cerise. Large, semi-double with notched and irregular petals. A cross between the hybrid, **William's Lavender** and a *C.japonica.* Originated at McCaskill Gardens, Pasadena, California, USA.

Avalon Sunrise. (*C.reticulata* hybrid), Heartwood Nursery, Seedling List 2009; A 7.5 cm, medium pink, single, reticulata type, with ruffled petals. Flowers profusely. Small dark green leaves. Self grooming, compact shrub. {(*C.pitardii* var *yunnanica* x **Zipao** 'Purple Gown') x (**Buddha** x **Tiny Princess**)}. Originated by Heartwood Nursery, Fort Bragg, Calif., USA (HW89).

Avacato Salleri. da Silva, 1880, *Forcing Varieties of Camellias in Oporto*, p.2. Orthographic error for **Avvocato Saleri.**

Ave Maria. *(C.japonica),* Tourje, 1955, *American Camellia Yearbook*, p.32: A fully formal double to peony form seedling; originated by Caesar Breschini, San Jose, California, USA. The colour is a shade deeper than 'Pink Perfection', (**Otome**). The petals number 45-50. The plant, which resembles **Debutante**, starts to bloom a little earlier than **Daikagura.** *American Camellia Yearbook*, 1956, p.58, Reg. No.270: A 10 year old seedling of 'Paeoniaeflora', (**Aspasia Macarthur**), bloomed for the first time, 1953. Orthographic errors: 'Ava Marie', 'Ava Maria'. See colour photo, No.7, p.23, *Encyclopedia of Camellias in Colour*, vol.II, 1978. Chinese synonym 'Maliya'.

Avvocato Salario. Corbelli Catalogue, 1882. Orthographic error for **Avvocato Soleri.**

Avvocato Solerio. André, 1864, *Plantes de terre de Bruyères...*, p.239. Orthographic error for **Avvocato Soleri.**

Awaji. *Tsubaki Hachiboku Sanboku Tsuki Meisai*, (before 1868): Deep red with 4 rows of petals, with white spots, bamboo whisk-like stamens. Thought to be an error for **Awayuki.**

Awaji. (Island in the Inland Sea), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl.118, p.59, description, p.122: Leaves green to dark green, obovate to rhomeo-obovate, curved, apex blunt-acute, shining, upper surface veinlets impressed, 6.2-7.7 cm long by 3.5-3.9 cm wide, petioles 8-9 mm long. Flowers, pink (Rhodomine Pink 527/2-3), semi-double, petals straightly spreading; 3-4 hairy petals, 8-11 normal petals. Androecium, 3.4 cm high, staminal tube short, stamens in 5 groups with 1-3 small petals; filaments creamy. Late flowering. Originated in a private garden, Saka-machi, Niigata, Japan. Collected, named and released by Susumu Ichikawa. For colour plate and description see Seibundô Shinkôsha, 1979, *Senchinshû*, p.15 & p.199.

Awajishima. (Awaji Island), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô;* Itô Jukyû, 1739, *Honzo Hanamakie*, vol.15: Yashiro, 1841, *Kokon Yôrankô*, vol.309 Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* A variety existing for 300 years. White to pale pink striped crimson, medium size, anemone to semi-double, often with a petaloid centre. Mid-season blooming. Leaves, small, wide-oval, apex blunt acute, wavy, mid-green. Plant habit, spreading, weak. For colour photo and description see p.199, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement;* Tuyama, 1966, *Camellia Cultivars of Japan*, p.370, pl.210; *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.348, pl.382; Seibundô Shinkôsha, 1979, *Senchinshû*, p.15 & p.199: Often resembles **Kyôkarako.** An old variety from Edo, Japan. Awajishima is believed to be the island where a piece of aromatic wood was found on the beach and presented to Emperor Suiko, (6th Century). Such wood became used in the incense burning ritual called Kôdô.

Awajishima. (Awaji Island), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* This lists two camellias of this name. One is that above, the other is a small size, white single with rare red spots and protruding centre petals. Originated in Japan. (Believed extinct.)

Awaotobe. (Otobe's Pale Pink). *(C.japonica)*, *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.25 with colour photo; English translation p.15. A small, palest pink, sake-cup-shaped single with pinched cylindrical stamen column. Flowers mid-season. Leaves widely oval, small to medium size. Upright, vigorous growth. Selected at a wild japonica community in Matsu'e City, Shimane Prefecture, named and released by Shigeaki Takano in 1990.

Awake. *(C.sasanqua)*, ACRS, 1980, *Camellia News*, No.74, p.24, Reg. No.239: Originated by Alice Spragg, Sutherland, N.S.W., Australia. A chance seedling that first bloomed 1972. The upright, open plant has glossy, dark green, 5.5 cm x 2.5 cm leaves. The 10 cm wide flowers are rosy pink, sometimes shading lighter to the centre. Blooms early to mid-season.

Awamori. (Personal name), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* 1710, *Zoho Chikinshô:* A small, soft pink, single, 5 petals with a central column of stamens. Synonym: 'Awamori-tsubaki'. (Believed extinct.)

Awamori-tsubaki. Andoh, 1981, *International Camellia Bulletin*, p.47 as being listed in Hôrin's Diary, 1645, *Kakumeiki* and later known as **Awamori.**

Awa-otome. Different reading for 'Usu-otome', synonym for **Otome.**

Awa-sekitei. (Pale 'Sekitei'). *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan)*, 2010, p.47 with colour photo; Palest pink single, pinched stamen cluster, medium size. Flowers mid-season. A chance seedling of **Sekitei,** named and released by Yasushi Ihara, Shimane Pref., Japan, in 2004.

Awa-wabisuke. Savige, 1974, *International Camellia Journal*, No.6, p.29. Synonym for **Tarôkaja.**

Awayuki. (Light Snow), *(C.japonica)*, Itô, Ihei, 1695, *Kadan Chikinshô:* Itô, Jukyû, 1739, *Honzô Hana-maki'e*, vol.15; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Red, with snow-white spots, medium size semi-double, large size flower, with stamens like a bamboo whisk. Originated in Japan. (Believed exhnct.)

Awayuki. (Light Snow), *(C.rusticana)*, Tuyama, 1968, *Camellias of Japan*, pl. No.76, p.38, description, p.108: A very floriferous snow camellia, formal double with flowers of the palest pink (Rose Pink 427/3). Leaves, dark green, ovoid to narrow-ovoid, acuminate; lateral veins and veinlets, impressed, 7.2-8.3 cm long by 3-4.2 cm wide; petiole, 3-7 mm long, very densely hairy. Hairy petals 2-4, normal petals 46-54; oblong, shallowly emarginate, incurved, with nuance of palest yellow at base. Stamens, underdeveloped, 1-1.2 cm high, in 2-3 groups, filaments pale yellow. Late flowering. Originated in Yatsuo-machi, Toyama Prefecture, Japan.

Awayuki. (Light Snow), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.30, colour photo and description: Small size, white, vase-shaped single of 5-6 broad, overlapping, emarginate petals with a broad, cylindrical stamen cluster, filaments white, joined for lower half, anthers yellow. Leaves bright green, ovate, apices acute, margins serrate. Blooms mid-season to late. Originated in the Chubû District, Japan.

Awayuki. (Light Snow). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.25 with colour photo; English translation p.16. White mottles on peach red, semi-double, thick and split stamens, medium size. Flowers mid-season. Leaves elliptic, medium size, recurved. Upright, vigorous growth. A natural seedling of **Kôki,** found and named by Saneichi Ogawa in Kagawa Prefecture in 1997.

Awenni. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.416; Chinese synonym for the Italy *C.japonica* **L'Avvenire.**

Axillaris. Loddige's Catalogue, 1820. The species *Gordonia Axillaris.*

Axillaris Vera. Burdin, Chambery Nursery Catalogue, 1834, p.18. The species *Gordonia Axillaris.*

Axoniensis. *(C.japonica).* Mertens & Fontaine, *Collection de cent espèces…..camellia,* 1845, pl.63. Originated in England. Leaves elliptic, lanceolate and acuminate. A full flower, cherry red with white splashes on the central petals. Four outside rows of regularly placed petals, smaller central petals cut out and folded.

Ay Ay Ay. *(C.japonica), New Zealand Camellia Bulletin*, July 1995, Issue No. 121, vol.XIX, No.2, colour plate p.16, text p.19: ACS, *The Camellia Journal*, Aug. 2002, p.21, colour photo p.20, Reg. No.2574. A sport of **Oo-La-La**, first observed 1992 and propagated true for 5 years. Originated by Nuccio's Nurseries, Altadena, Calif., USA, and introduced in their 1999 catalogue. Flowers early to mid-season. *American Camellia Yearbook*, 2002, colour photo p.c9. The strawberry pink single to semi-double flower is heavily striped with dark red, and sometimes mottled white. Flowers measure 9-10 cm across x 12.5 cm deep. Plant growth is upright and average, with dark green leaves 9 cm long x 3.8 cm wide. Chinese synonym 'Jingya'.

Ayabe. (Place name), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.88, colour photo and description: Medium size, pale pink, campanulate single of 6 rounded, overlapping, long, emarginated petals with tips reflexed. Compact flower. Stamens in a central column, filaments white, joined for the lower half, anthers pale yellow. Occasionally produces pink or red flowers. Leaves elliptic, bright mid-green, apices tapering acute, margins bluntly serrate. Late flowering. Originated in Saga Prefecture, Japan.

Ayagawa. Different reading for **Ayakawa.**

Ayagawa-shibori. Different reading for **Ayakawa-shibori.**

Ayaha. (Place name in Ikeda-shi, Ôsaka), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.97, colour photo, p.96, description: Medium size, soft pink, saucer-shaped single of 5 large, round petals, edges a little irregular. Stamens numerous, in a large, spreading cluster, filaments creamy, joined for lower third, anthers dull yellow. Leaves dark green elliptic, apices acute, margins serrate. Blooms early to mid-season. Originated in Ôsaka Prefecture, Japan. A seedling of 'Engei-tarô'an'.

Ayahime. (Female Name), *(C.japonica)*, Kinji Ohara, 1993-1994, *List of Camellias:* Bright red, tubular single, small to medium size. Collected from wild camellia in Kyûshû, Japan.

Ayakawa. (Place name), *(C.japonica)*, Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.1, p.51 as 'Aya-kawa'. No description. Different reading: 'Ayagawa'. Originated in Japan.

Ayakawa-shibori. (Dappled Ayakawa), *(C.japonica)*, Minagawa, 1933, *Chinkashû;* Chûgai Nusery Co., Catalogue, 1939-1940, p.18: Tuyama, 1966, *Camellia Cultivars from Japan*, p.272, pl.157; *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.334 & pl.293; Seibundô Shinkôsha, 1979, *Senchinshû*, p.13, colour photo, p.199, description: Flower, informal double red, peony to anemone, with cloudy white blotches, large outer petals with a centre of confused, small petals and petaloids mixed with stamens, 8-10 cm across. Flowers late season. Leaves, medium size, narrowly elliptic, apex caudate, reflexed, finely serrulate. Plant growth habit, vigorous, erect. Different reading 'Ayagawa-shibori'. Resembles **Yokogawa-shibori.** Originated in Kantô District, Japan.

Ayakomai. (Traditional Dance in Niigata), *(C.rusticana)*, Yokoyama, 1975, *Gendai Tsubaki Meikan* p.67; Seibundô Shinkôsha, 1979, *Senchinshû*, p.13, description, p.199: A medium size, cherry red, formal double, often tiered, emarginate petals. Mid-season blooming. Originated in Kashiwazaki-shi, Niigata Prefecture, Japan. Named by Ôoka, Tokuji.

Ayakura. (Place name), *(C.japonica)*, JCS., 1987, *Japan Camellia*, No.23, p.4, colour photo and description: Medium to small size, light red, campanulate single, 7 petals, central column of stamens, petals waved and fluted. Originated in Japan.

Ayame. (Japanese Iris), *(C.japonica)*, *Chinka Zufu*, (before 1700), Watanabe, 1969, pl.402: A semi-double white with large sections of red on its petals and a pinched in stamen cluster. Originated in Japan. (Believed extinct.)

Ayamedori. (Iris Bird), *(C.japonica)*, Ôoka Chika-en, 1983-1984, Catalogue, p.9; Inazawa Nurseries Co. Ltd Catalogue, 1986-1987, p.11, A-537: Bright peach pink, single, 5 irregular petals, tubular to campanulate blooms. Medium size. Early blooming. Leaves narrow and long, pointed at apex. See colour photo, p.106, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Shimane, Japan. A seedling of **Hatsukari.** Named and released by San-in Camellia Club in 1977.

Aya-nishiki. (Figured Brocade), (Higo), Taniguchi, 1912, *Kaikaen Chinka Kyokan:* White streaked purplish pink, large size, single, Higo form. Early blooming. Originated in Kumamoto Prefecture, Japan.

Aya-nishiki. (Aya's Brocade), *(C.japonica)*, *Encyclopedia of Camellias in Colour*, vol.I, 1972, p.308, pl.118; Yokoyama et al., 1975, *Gendai Tsubaki Meikan.* p.67; Seibundô Shinkôsha, 1979, *Senchinshû*, p.14, coloured photo, p.199, description: Flower, soft fuchsia pink single with deeper stripes and speckles, campanulate to cup shaped, 8-10 cm across, early to mid-season flowering; stamens spreading, petals creped on margins. Fragrant. Leaves, dark green, medium size, elliptical, apex acuminate, base obtuse, venation impressed; petioles hairy. Vigorous, erect growing with spreading branches. Originated in Sifue-chô, Aichi Prefecture, Japan, by Hattori, Ayatarô. Thought by some to be a *C.x vernalis.*

Aya-nishiki. (Figured Brocade), *(C.japonica),* Inazawa Nurseries Co.Ltd, Catalogue, 1986-1987, A-500: Dark red ground with horizontal, moires white. Flat, semi-double blossom. Originated in Japan.

Aya-nishiki. (Figured Brocade), *(C.x vernalis),* Kajitsu-en, 1905, *Chabaika Meikan;* Hakoda, JCS., 1987, *Tsubaki,* No.26, p.50: Light red, sometimes variegated with deeper red and white; medium size, single. Originated in Aichi Prefecture, Japan.

Aya-no-yume. (Aya's Dream). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.23 with colour photo; English translation p.14. Pink graduating ti white at the centre, single, acute at petal edges, cylindrical stamens, medium size. Flowers early to mid-season. Leaves oval, medium size. Upright, growth a little weak. A chance seedling of 'Haru-chidori', named by Mineko Ôsawa in 1989, and released by Gifu Camellia Club, Gifu Prefecture.

Aya-no-ue. (Lady Aya), *(C.sasanqua),* Satomi, 1958, *Nomenclature List of Sasanqua of Japan*, p.7: Pure white. Large, double wih round petals. Originated in Japan.

Ayaori-hime. (Woman Textile Worker for Figured Cloth), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinchû,* p.13, colour photo, p.199, description: A medium size, very light pink, anemone centered, semi-double with large rounded, outer petals and a short, compact cluster of mixed stamens and petaloids Mid-season blooming. Leaves oval, apex acute, colour mid-green, twisted towards the apex. Originated in Kansai District. Named by Katayama Juraku-en Nursery in 1979.

Ayasegawa. (Ayase River), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki.* White, semi-double, with 3-4 rows of petals, medium size, divided stamen cluster. Originated in Japan. (Believed extinct.)

Aya-shiro-wabisuke. (Aya's White Wabisuke). (Wabisuke); *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.256 with colour photo; White, very rarely with slight, red radial stripes. Miniature single, flowers early to mid-season. Leaves medium size, elliptic. Upright growth. A sport of **Aya-wabisuke**, found and named by Takeo Ogawa, Izu Oshima, Tokyo, Japan, around 2000.

Ayato. (Personal name) *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.26; A chance seedling selected by Sachie Hisatomi, Kurume, Japan, in 1994 and named by Kazuyuki Yamabe. Large white semi-double. Stamen centre loosely arranged. Vigorous, somewhat upright plant. Leaves medium size, oblong, revolute at margins. Flowers mid-season. *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.36 with colour photo.

Ayatori. (Bird's Crest), *(C.rusticana),* Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.67; *Encyclopedia of Camellias in Colour*, vol.II, 1978, pl.458, p.180; Seibundô Shinkôsha, 1979, *Senchinshû*, p.13, colour photo, p.199: Medium size, formal double, often tiered in an hexagon star form, with long, outer petals, developing keeled and pointed petals towards the centre. Soft pink with faint veining. Late blooming. Leaves, medium size, oval, flat, minutely serrate, hairy. See p.395, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated in Kariba Sub-prefecture, Niigata Prefecture, Japan. Named and released by Tokuji Ôoka.

Aya-tsubaki. (Aya Camellia), *(C.japonica),* Yashiro, 1841, *Kokon Yôrankô*, vol.307. Synonym for **Hinoki-tsubaki.**

Aya-wabisuke. (Figured Wabisuke), (Wabisuke), Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.249, colour photo and description: Small size, vase-shaped single, white with some splashes and peppering of pink; 5-6 somewhat irregular rounded, overlapping petals and a short, abortive stamen cluster. Leaves shining mid-green, long, elliptic, apices acute, margins serrate. Flowers mid-season. Originated in Izu-ôshima, Japan. A seedling of **Funatsu.** Originated and named by Takeo Ogawa in 1989.

Ayeka. Different reading for **Aeka.**

Aye Marie. Thermal Nurseries (Rotorua) Ltd Catalogue, 1986, p.1. Orthographic error for **Ave Maria.**

Ayer-Maid. *(C.japonica)*, ACS., 1987, *The Camellia Journal*, vol.42, No.3, p.6, Reg. No.2049: Medium to large, white semi-double *C.japonica.* Chance seedling. Blooms mid-season. Originated by Claudia Ayer, Madison, Florida, USA. *American Camellia Yearbook*, 1989, p.79, with colour photo between p.60-61: The 7 year old seedling first bloomed 1984. Average flower size, 10 cm across x 5 cm deep with 22 petals and 3 petaloids. Plant growth is spreading and medium with dark green leaves, 8 cm long x 3.8 cm wide.

Ayes di Casoretti. Castagnola Catalogue, 1861-1862. Synonym for **Ayez Casoretti.**

Ayes Superba. *(C.japonica)*, Costa 1846, *Catalogue de la collection de Camellias présentée à sa majesté L'lmpératrice de toutes les Russies et Reine de Pologne*, p.8. No description. Originated in Italy. (Believed extinct.)

Ayez. van Geert, Catalogue, 1845. Abbreviation for **Ayez Casoretti.**

Ayez Casoretti. van Houtte, 1845-1846 Catalogue. No description. Charles van Geert, 1847, Catalogue, No.101, p.16, as 'Ayez'. Fine imbricated form, enormous size pink with paler centre. Charles van Geert Catalogue, 1848, p.2: Perfect imbrication, one of the most beautiful forms known, enormous flower, pink with paler centre. Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France*, vol.40, p.276: A rose form double 10-11 cm across, of dark, orange-red, blending to vivid rose at the centre. Petals very numerous and symmetrical, cup shaped, veined blood red, 6-7 rows, 70-80 petals, rounded, notched. Originated in Italy by Casoretti. Orthographic variants: 'Ayes di Casoretti', 'Ayez', 'Ayez' (Casorretti), 'Ayez do Casoretti', 'Ayez di Casoretti'. It is thought that this camellia was named for the painter Francesco Hayez as some catalogues use the name 'Hayez'.

Ayez (Casorretti). von Biedenfeld, 1856, *Practische Grundlehren der Cultur von Camellien*, p.33. Orthographic error for **Ayez Casoretti.**

Ayez di Casoretti. Burdin Maggiore & Co. Catalogue, 1849-1850. Orthographic variant for **Ayez Casoretti.**

Ayumi-shiro. (Ayumi's White Camellia). *(C.japonica), "Camellias in Kurume"*, ICS Congress, Kurume 2010, p.108. No description.

Azaleaflora White. *(C.sasanqua)*, Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues*, p.17. No description. No valid listing located.

Azarea. Hazlewood Bros Pty Ltd Nursery Catalogue, 1949, p.5. Orthographic error for **Azurea.**

Azebettô. (Place name in Nagasaki Prefecture), *(C.japonica)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.25, colour photo and description: Small size, tubular single, white, of 5 overlapping petals. Cylindrical stamen crusted with golden anthers. Leaves bright green, ovate, apices acute, margins broadly crenate. Flowers mid-season to late. A wild japonica collected in Nagasaki Prefecture, Japan.

Azitaike. (Large Cone), Gao & Zhuang, Apr.1989, *The Camellia in China*, p.71, No.510. Synonym for the *C.reticulata* **Aztec.**

Azitaikeren. Gao, Jiyin, 1993, *The Observations from the Camellia World*, No.516, p.66. Chinese synonym for the USA *C.reticulata* hybrid **Aztec.** Different reading 'Azitaike'.

Azora. SCCS, 1984, *Camellia Nomenclature*, p.17: Medium pink. Medium size to large, single with flared stamens which, in some flowers are fully topped with white petaloids. Corruption for the Japanese name **Ôzora.**

Aztec. *(C.reticulata x C.japonica), American Camellia Yearbook*, 1972, p.126, Reg. No.1199: A 5 year old hybrid cross, *C.reticulata* 'Crimson Robe' (**Dataohong**) x *C.japonica* **Gauntlettii** as 'Lotus'; originated by Howard J. Asper, Escondido, California, USA. Plant growth is upright, open and medium with dark green leaves, 10.5 cm long by 5 cm wide. The rose form double flower is rose madder, 23/1, with yellow anthers and pale yellow filaments. The flower measures up to 15 cm across by 8 cm deep with 18-14 petals. Blooms mid-season to late. Colour photos: Macoboy, 1981, *The Dictionary of Camellias in Colour*, p.149; Frontispiece, SCCS, 1973, *The Camellia Review*, vol.33, No.3. Chinese synonym: 'Azitaike'.

Aztec Warrior. *(C.japonica), American Camellia Yearbook*, 1966, p.84, Reg. No. 833: A 7 year old chance seedling that first bloomed 1962; originated by Alec and Alice Horne, Moncks Corner, South Carolina, USA. Plant growth is upright and medium in rate with 9.5 cm x 3.8 cm light green leaves. The anemone to loose peony form flowers are bright red with yellow anthers and pink filaments and measure 13 cm across by 7.5 cm deep. All petals are somewhat twisted, 28 petals are large and surround 14 smaller ones, curled and intermixed with 12 petaloids and the stamens. All curl outwards and downwards to form a ball. Blooms early to mid-season.

Azuma. Yashiroda Catalogue, 1939. Abbreviation for **Azuma-shibori.**

Azumabeni. (Eastern Red), *(C.sasanqua)*, Ashizawa, 1898, *Chabaika Meikan*, Chûgai Nursery Catalogue, 1935-1936, p.26 as 'Tôkô'. Crimson double, peony form. Large flowers. Yashiroda, 1950, *American Camellia Yearbook*, p.22: Large, deep pink bloom, well formed with some 12 broad, thick petals, some of which are curled and double. One of the earliest to flower. Stout, densely branched growth of upright nature. Different readings: 'Azuma-kurenai', 'Tôkô', 'Azumakô'. Originated in Kantô District, Japan.

Azumabotan. (Eastern Peony), *(C.hiemalis)*, Hakoda, JCS., 1989, *Tsubaki*, No.26, p.47; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.38: Medium size, dark red, irregular, peony form double. Originated in the Fukuoka Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.292 with colour photo; English translation p.204. Considered to be a seedling of **Egao.** Selected by Yoshikatsu Ueno in 1970s, named by Naotoshi Hakoda. Chinese synonym: 'Dongmudan'.

Azumabotan-nishiki. *(C.hiemalis). Sasanqua*, Shanghai Municipal Gardens, 2007, p.71 with colour photo; Crimson with white patches, peony form, large. A virus variegated form of **Azumabotan.**

Azumakagami. (Eastern Mirror), *(C.sasanqua)*, Kajitsu-en, 1905, *Chabaika Meikan:* White ground, red graduation, medium size, cup-shaped. Originated in Japan.

Azumakagami. (Eastern Mirror), *(C.japonica)*, Katayama, Sadayuki, 1960, Juraku-en Nursery List of Camellias and flowers for Tea Ceremony Catalogue; Tuyama, 1968, *Camellias of Japan*, pl.148, p.74, description, p.132: Leaves, elliptical, deep green, minutely serrate; petioles glabrous. Flowers, single, rosy red (Crimson 22), cup shaped, with thick stamenal tube. Flowers mid-season to late. See p.150, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Originated by Katayama Juraku-en, Kibe-machi, Ikeda-shi, Ôsaka Prefecture, Japan.

Azumakazari. (Eastern Adornment), *(C.x williamsii)*, Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.338, colour photo and description: Large size, semi-double, with 3 irregular rows of fluted and twisted petals, white ground with pink and red stripes. Stamens a little irregular, filaments light yellow, anthers gold. Flowers mid-season to late. Leaves elliptic to obovate, mid-green, apices acute, margins serrate. Originated in Izu-ôshima, Japan by Takeo Ogawa, from the cross *C.japonica* **Shokkô-nishiki** x *C.x williamsii* **Margaret Waterhouse.**

Azumakenkyô. (Eastern Astonishment), *(C.japonica)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Peach pink, formal double like **Kenkyô**. Different readings: 'Azuma-miodoroki', 'Tôkenkyô'. Originated in Japan. (Believed extinct.)

Azumakô. ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.32: Large size, light red, single *C.sasanqua* from Tokyo, Japan. Different reading for **Azumabeni.**

Azuma-komachi. (Beautiful Lady from the East), *(C.sasanqua)*, Minagawa, Iza'emon, 1885, *Nissho'en Chabaifu:* White ground, pale pink graduation. Medium size. Originated in Japan.

Azumakurenai. Different reading for **Azumabeni.**

Azuma-miodoroki. Different reading for **Azumakenkyô.**

Azumanishika. Veitch Nursery Catalogue, 1914. Corruption of the Japanese name **Azuma--nishiki.**

Azuma-nishiki. (Eastern Brocade), *(C.sasanqua)*, Hantei, Kinta, 1827, *Sômoku Kihin Kagami;* Yashiro, 1841, *Kokon Yôrankô*, vol.344: Variegation on the leaf edge. Synonym: 'Aifukurin'. Originated in Japan. (Believed extinct.)

Azuma-nishiki. (Eastern Brocade), *(C.sasanqua)*, Minagawa, Iza'emon, 1885, *Nisshô'en Chabaifu:* White ground with pink graduation, semi-double, medium size. Yokohama Catalogue, 1891, p.9 as 'Adzuma-nishiki': Pink. SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* Large, semi-double rose pink flower with a darker border. Weak, spreading growth. For colour photo see p.172, Macoboy, 1981, *The Colour Dictionary of Camellias.* Corruptions of name: 'Azumanishika', 'Azume-Nishiki'. Received a RHS Preliminary Commendation in 1935. Originated in Kantô District, Japan. Chinese synonym: 'Dongfangjin'.

Azuma-nishiki. (Eastern Brocade), (Higo), Taniguchi, 1912, *Kaikaen Chinka Kyôkan;* Hiratsuka, 1964, *Higo Camellia*, pp.14.39: Crimson streaks on a ground from white to light pink, 7-9 cm across, 57 petals, 120 stamens in a circle, filaments white, Leaves large, long oval, deep green, spreading growth. For colour photo see: Seibundô Shinkôsha, 1979, *Senchinshû*, p.11. Originated in Kumamoto Prefecture, Japan.

Azuma-shibori. (Eastern Dapple), *(C.rusticana)*, Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki;* Satomi, 1956, *Camellia Varieties in Japan*, p.4: Deep red blotched white. Large size, rose form to formal double. Vigorous, upright growth. Tuyama, 1966, *Camellia Cultivars of Japan*, p.80; Tuyama, 1968, *Camellias of Japan*, pl.198, p.151, description, p.180; Seibundô Shinkôsha, 1979, *Senchinshû*, p.11 & p.198, left hand photo: medium size, full, rose form double to semidouble, about 30 petals, scarlet spotted white (Rose madder 23/2). Flowers very late. Leaves small, narrowly elliptic to long-oval, impressed venation, tapered acuminate, serrulate, medium green, petioles hairy. See p.326, Yokoyama & Kirino. 1989, *Nihon no Chinka.* Originated in Kantô District, Japan. Similar to **Hoshiguruma.** In America this name has been erroneously used as a synonym for **Margherita Coleoni Variegated.** Corruptions of name: 'Aduma-Shibori', 'Atsuma-shibori', Adzuma-shibori'.

Azuma-shibori. (Dapple of Azuma), *(C.japonica)*, Tuyama, 1966, *Camellia Cultivars of Japan*, p.80 as 'Azuma-shibori-Nagoya'; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.112 & p.307; Yokoyama, 1975, *Gendai Tsubaki Meikan*, p.65; Seibundô Shinkôsha, 1979, *Senchinshû*, p.11, colour photo, p.198, description. Note characters are different to one above. A medium size, single, campanulate pink with a dense flicking and striping of crimson and a central stamen column. Early flowering. Leaves medium size, long-oval, waved, sharply serrate, dark green. Plant habit, vigorous and upright. Originated in Chûbu District, Japan. See p.282, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Synonym: 'Azuma-shibori-Nagoya'.

Azuma-shibori. (Eastern Dapple), *(C.sasanqua)*, Hakoda, JCS., 1989, *Tsubaki*, No.26, p.43: White becoming red at the margins, medium size, single. Raised in 1974 at Kosaki Chinju'en Nursery, Inazawa City, Aichi Prefecture, Japan. Selected and named by Toshiaki Kosaki.

Azuma-shibori-Nagoya. Tuyama & Futaguchi, 1966, *Camellia Cultivars of Japan*, p.80. Synonym for **Azuma-shibori.**

Azuma-uta. (Eastern Song), *(C.x hiemalis)*, Hakoda, JCS., 1987, *Tsubaki*, no.26, p.47; ICS., Apr.1990, *Japanese Camellia Cultivar List*, p.38: Large size, dark red, formal double. Originated in Tokyo, Japan.

Azuma-wabisuke. Satomi, 1956, *Camellia Varieties in Japan.* Synonym for **Kochô-wabisuke**.

Azuma-wabisuke. (Eastern Wabisuke), (Wabisuke), Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû*, No.11, p.92, 93, 95 with colour photo and botanical drawings: Very small size, campanulate single of 6 purplish pink, petals, stamens abortive. Leaves mid-green, long elliptic, margins shallowly serrate. A seedling of **Tarôkaja,** originated by Kanematsu Funatsu in 1955, named by Takeo Ogawa in 1960. From Tokyo.

Azume-Nishiki. Hillier's Nursery Catalogue, 1952. Corruption of the Japanese name **Azuma--nishiki.**

Azura. Merrillees, 1951, *Shere Camellia List.* Orthographic error for **Azurea.**

Azurea. *(C.japonica)*, Shepherd & Co. Nursery Catalogue, 1862: Raised from seed by ourselves, a free grower and an abundant bloomer. The flower is of the largest size, peony shaped, the colour is a dark or metallic purple, and is, perhaps, the nearest approach to blue that has yet occured in the tribe Flowers early to late. It has sometimes been confused with **Zambo** which, however, is formal double. Originated in N.S.W., Australia.

Baifurong. (White Hibiscus), *(C.japonica),* Wang & Yu, 1981, *Shancha Hua:* Medium size, white, with a slight touch of pink, open informal double, irregular peony form with large, twisted and fluted

outer petals, surrounding a group of smaller, twisted, erect petals, mixed with fascicles of stamens with golden anthers and white filaments forming a convex centre. See colour photo, [p.141], Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.67 and colour photos No.107A & B. Gao & Zhuang, 1989, *The Camellia in China,* p.39, 40, No.202. Originated in China. Synonym: 'Hibiscus White'.

Baigents Gift. *(C.japonica), New Zealand Camellia Bulletin,* vol. XIV, No.4, 1985, p.39, Reg. No.229: This chance *C.japonica* seedling was raised by Mr and Mrs R. Baigent, Katikati, New Zealand and first flowered 1983. Plant growth is dense, upright and average in rate with dark green leaves 9 cm x 4.5 cm. The peony form flower measures about 12 cm across and 6 cm deep with 22 petals and about 40 petaloids. The stamens are yellow and the anthers are white. Colour is mid-pink (RHC,CC.65A, Amaranth Rose). The flower has some perfume and opens early to mid-season.

Baige. (White Doves), Gao & Zhuang, 1989, *The Camellia in China,* p.73, No.532 erroneously as 'Bai he'. Chinese synonym for the Japanese sasanqua **Mine-no-yuki.** Orthographic error 'Baihe'.

Baignoleana. Oudin, Lisieux, Conservatory List, 1845, p.2. Orthographic error for **Baignolliana.**

Baignolliana. *(C.japonica),* Tourres, Macheteaux, Catalogue, 1839, p.21. No description. Originated in France. (Believed extinct.) Orthographic error 'Baignoleana'.

Baihe. (White Lotus), *(C.japonica),* Shanghai Botanic Gardens List, 1984: Medium size, white, informal double with large outer guard petals. Originated in China.

Baihe Xianzi. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.411; Chinese synonym for the USA *C.japonica* **Lily Pons.**

Baihi. (Plum Queen), *(C.x vernalis),* ICS, Apr.1990, *Japanese Camellia Cultivar List,* p.40. No description. Originated in Japan.

Baihua Feibie. (White Fat Turtle), *(C.japonica),* Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.228 with colour photo; An old established cultivar from the Chengdu area, Sichuan, China. Flowers white, slightly yellow at the centre, medium size formal double, outside petals broad and flat, inner petals pointed-rounded and erect. Leaves dark green, long-elliptic, thick, arched and shiny. Compact plant with vigorous growth. Flowers mid-season.

Baihua Masetiana. Shao, Taichong, 1992, *The Observations from the Camellia World,* p.12. Chinese synonym for the European *C.japonica* **Mathotiana Alba.**

Baihuanghou. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.410; Chinese synonym for the USA *C.japonica* **White Empress.**

Baihudie. (White Butterfly), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.53, No.167, colour photo No.83: Medium size, 7-8 cm across, white, double with 20 petals in 3 rows, broad, rounded, some slightly emarginate, with a centre of 2-3 petaloids and abortive stamens. Leaves dark green, round-ovate, apices blunt-acute, margins variable from widely to finely serrate. Blooms mid-season. Originated in China.

Baijiaxian. Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.94. Synonym for **Guaxian.**

Baijinqiu. *(C.japonica), Chinese Camellia Culture,* 2003, Appendix, p.565 as 'Baijingqiu'.; A small tree. Dark green leaf, ovate to obovate, 6-7 cm x 4-5 cm, apex acuminate, sunken veins on upper surface, densely serrate. Flower white, yellowish in centre, semi-double, medium to large, over 10 cm diameter. 30 to 40 petals in 4-5 rows, mostly broad and large, some narrow, regular arrangement. Well developed central stamens. Late flowering. From Zhejiang Province, China.

Baijuban. *(C.reticulata),* Chuang Mao-chang, 1959, *Yunnan Shancha Hua;* Ikeda, 1976, *American Camellia Yearbook,* p.144 as 'Paitsueban', ('White Chrysanthemum Petal'). Originated in Kunming, China. Different reading: 'Pai-chü-pan'.

Baijuye. (White Saw Leaf), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.53, No.339, colour photo No.197: Leaves medium green ovate, apices acute, margins sharply, strongly serrate (Saw-like). Flower medium size, 6-8 cm across, white, irregular, open peony form, with large, outer guard petals and a centre of petaloids and stamens intermixed. Flowers mid-season. Originated in China.

Baikô. *(C.japonica),* Itô, Ko'emon, 1879, *Chinkashû,* in section on variegated leaves. A small, rose red single with variegated leaves. The name is that of a character from the Kabuki drama. Originated in Japan.

Bailetian. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p.153. Chinese synonym for **Hakurakuten.**

Bailey Walker. *(C.japonica),* SCCS, 1950, *The Camellia. Its Culture and Nomenclature,* p.24: Delicate pink. Medium size, semi-double. Vigorous growth. Mid-seasom blooming. Originated by W.T. Wood, Georgia, USA.

Bailing. (White Caltrops), *(C.japonica),* Wang, Shimao, 1587, *Xue Pu Za Shu:* Pure white flowers, enduring and prosperous. Tender. Yashiro, 1841, *Kokon Yôrankô.* A Chinese cultivar. Different reading 'Pe Ling'. (Believed extinct.)

Bailing. *(C.japonica), Chinese Camellia Culture,* 2003, p.256 with colour photo; Developed by Chen Xingrong, Shifang, Sichuan, China. White semi-double to loose peony. Thin, translucent petals, inner petals crimped, folded and waved at edges. Centre of mixed stamens and petaloids. Flowers mid-season.

Bailiufang. *(C.japonica),* Watanabe & Andoh, 1980, *Tsubaki - Hana to Kino Bunka,* p.146 as 'Pai-liu-fang', (White six directions) Small size, white peony. Originated in China.

Bailiujiao. (White Hexagon), *(C.japonica),* Liu, 1959, *Chung Kuo Chu Ming Ti Chi Chung Hua Hui:* A white formal double, often with tiered flowers. Medium size, mid-season flowering. Synonyms: 'White Hexagon', 'White Hexangularis'. Different readings: 'Pei Lu Chio', 'Liujiaobai', 'Bailiujue', 'Balugu', 'Baluga'. Japanese reading: 'Hakurokkaku'. See colour plate No.156, p.74, *Encyclopedia of Camellias in Colour,* vol.II, 1978 as 'Baluga'.

Bailong. Shao Taichong, 1992, *The Observations from the Camellia World,* p.80, No.404. Chinese synonym for the USA *C.japonica* **White Dragon.**

Bailu Zhi Rimu. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.411; Chinese synonym for the Japan *C.japonica* **Momoji-no-higurashi.**

Baimanao. Feng, 1930, *Tiannan Chahua Xiaozhi.* Different reading: 'Pe Ma Nao'. Synonym for **Damanao.**

Baimianqiu. (White Cotton Ball), *(C.japonica),* Wang & Yu,1981, *Shancha Hua:* Medium size, white. Semi-double to rose form double, 8-9.5 cm across, with three rows of 30-47 crinkled petals. Late blooming. See colour photo, [p.144], Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.32, 52. Synonym: 'White Silk Ball'. This name as also been used as a synonym for **Xueta.** Originated in China.

Baimianzhu. *(C.japonica),* Huang Nursery Catalogue, 1947. No description; Savige, 1984, *International Camellia Journal,* p.33, colour photo, p.44c: A medium size, soft pearl pink to white formal double with about 6 rows of petals. Different reading: 'Pei Mien Chu'. Originated in China. Synonym: 'Fluffy White Pearl'.

Baimudan. (White Peony), *(C.japonica),* Yang, 1965, A *Study of the Camellia of Taiwan,* as 'Pai Mou-ta´n': A white semi-double to peony form informal double. 8-9 cm across. Blooms mid-season. . Leaves glossy, medium green, broad-ovate, apices acuminate, margins serrulate. See Gao & Zhuang, 1989, *The Camellia in China,* p.34, No.154, colour photo No.77. Originated in China.

Bainiqu. Chinese synonym for USA C. *japonica* **White Nun.**

Bainisi Baodi. Gao, Jiyin, Ltr 25-5-90. Chinese synonym for the USA *C.japonica* **Berenice Boddy.** Orthographic error 'Benisi Baodi'. Later changed to 'Bonisi Baodi'.

Bainuobo. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.410; Chinese synonym for the Belgium *C.japonica* **Nobilissima**.

Baipensha. (White Sprinkled with Sand). *(C.japonica),* Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p.85. A sport of the highly variable **Pensha.** Widely grown in Sichuan and Zhejiang provinces, China. White, covered with small red spots. Rose form double, medium size. Leaves dark green, leathery, tiny serrations. Strong, spreading growth. Flowers mid-season.

Baiqian Cha. (White Coin Camellia). *(C.japonica),* Xia, Dan, (Ming Dynasty, 1386-1644), *Yao Pu Tong Chun:* Flowers in November, white and elegant with slight perfume. Can be grafted in summer on *C.japonica* stock. Originated in China. (Believed extinct).

Baisan Xueshi. (White Three Scholars) *(C.japonica),* Wang & Yu, 1981, *Shancha Hua:* A medium size, white with a rare pink or red mark, rose form to informal double of 5-6 rows of imbricated outer petals and an inner cluster of small, erect petals. See Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.45, 101, color photo [p.118] and Gao & Zhuang, 1989, *The Camellia in China,* p.48, No.287, colour photo No.167. Sports: **Hongsan Xueshi, Fensan Xueshi, Danzhi.** Originated in China. Synonyms: 'White Three Scholars', 'Chuluyin'.

Baisebeidi. Gao, Jiyin, 1991, *The Observations from the Camellia World*, p.10. Chinese synonym for the USA *C.japonica* **Betty Sheffield White.**

Baisemingtian. Shao, Taichong, 1992, *The Observations from the Camellia World*, p.14. Chinese synonym for the USA *C.japonica* **Tomorrow White.**

Baishan Cha. *(C.japonica),* Wang, Shimao, 1587, *Xue Pu Za Shu:* Flowers big and white. Wang, Hsiang-Chin, 1935, *Kuang Chun Fang Pu.* Originated in China. (Believed extinct.) Synonym: 'White Mountain Camellia'.

Baishiba Xueshi. (C.*japonica),* Huang Nursery Catalogue, 1949: A medium size, formal double white with some pink stripes. A sport of **Shiba Xueshi.** Gao & Zhuang, 1989, *The Camellia in China,* p.44, No.246, colour photo No.134A & B. Different reading, 'Bashebo Shushi'. Synonym: 'White Eighteen Scholars'. See colour photo, 3p.1344, Chang, Chao, Yun, 1987, *Camellias from Zhejiang*, p.41, 85.

Baishiyangjin. (White Ten Brocades), *(C.japonica),* Wang & Yu, 1981, *Shancha Hua.* A white, with rare red streaks, sport of **Shiyangjin**. A rose-form double, about 7 cm across with 22-23 petals rounded, diminishing in size towards the centre, and small, irregular stamen cluster. Leaves, elliptic, short acuminate, shining dark green, 5 cm long, by 2.5 cm wide. Originated in China. See Gao & Zhuang, 1989, *The Camellia in China,* p.37, No.179, colour photo, No.93. Synonym: 'Baishiyangjing'.

Baishiyangjing. Wang and Yu, 1989, *Camellia,* p.32. Synonym for **Baishiyangjin.**

Baishizi. (White Lion), *(C.japonica),* Watanabe & Andoh, 1980, *Tsubaki, Hana to Kino Bunka,* p.146 as 'Pai-shih-tzu': Red, medium to large, double, with narrow, blade-like petals. Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.79: Leaves yellowish green, thick, large, 12.5 cm x

7cm elliptic, upper surface bullate, sunken mid-rib, petiole 14 mm long. Flower white, 10 cm across, 18-22 petals in 2 whorls; petaloid stamens, about 200, clustered in the centre, including a few large ones. Pistil degenerate. Buds round, rusty green. Flowers mid-season. Originated in China. Synonym: 'White Lion'.

Baisi. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.411; Chinese synonym for the USA *C.reticulata* hybrid **Beth Dean.**

Baisi Wanghou. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.410; Chinese synonym for the USA *C.japonica* **Queen Bessie**

Baitian'e. *Chinese Camellia Culture*, 2003, Appendix, p.568. Synonym for **Baitianhui.**

Baitian´e. (White Swan), Gao & Zhuang, 1989, *The Camellia in China,* p.49, No.296, as 'Bai tian er': Chinese synonym for **Elegans Champagne.** Orthographic variant: 'Baitian´er'.

Baitian´er. Gao & Zhuang, 1989, *The Camellia in China,* p.49 as 'Bai tian er', different reading for 'Baintian´e'.

Baitianhui. *(C.japonica), Chinese Camellia Culture,* 2003, Appendix, p.568. Growth medium rate and open. Leaves elliptic, 7-8 cm x 4-5.5 cm, apex acuminate, base cuneate, prominent veining, thick and stiff, serrations sparse and obtuse. Flower semi-double to peony, pure white, petals thin, in 5-6 rows, some stamens dispersed among the petals. Flowers mid-season. Synonym 'Baitian'e'. From Fujian Province, China.

Baitiao Hongliufang. *(C.japonica),* Chang, Chao Yun, 1987, *Camellias from Zhejiang,* p.41, 87. A sport of **Hongliufang** - petals white, lined longitudinally with deep pink. See Gao & Zhuang, 1989, *The Camellia in China,* p.45, No.254: White, crimson lined, medium size, formal double, sometimes tiered. Originated in China. Synonym: 'White Branch, Red Hexagonal'.

Baitouweng. (First Old man), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.51, No.325, erroneously as 'Baitouwong': Medium size, white, single of 5-7 petals. Blooms early. Originated in China. Orthographic error: 'Baitouwong'.

Baitouwong. Gao & Zhuang, 1989, *The Camellia in China,* p.51, No.325. as 'Bai tou wong'. Orthographic error for **Baitouweng.**

Baiwojin. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.410; Chinese synonym for the Italy *C.japonica* **Vergine di Collebeato.**

Baiwubao. *(C.japonica), Chinese Camellia Culture*, 2003, Appendix, p.563; A white form of **Wubao.** Leaves elliptic or long-elliptic, 7.5-9.0 cm x 4.0-4.5 cm. Flower semi-double, white, medium size 7-9 cm diameter, 20 petals in 5 whorls, loosely arranged. Flowers mid-season to late. Originated in Fujian Province, China.

Baiwuse Furong. (White Five Coloured Hibiscus), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.40, No.208, colour photo No.111, 'Bai wu se fu rong': A sport of **Wuse Furong.** Medium size, open, irregular peony form, 10-12 cm across, 30 white petals with a peppering and dashes of scarlet and fascicles of stamens mixed with the centre ptals. Mid-season blooming. Originated in China.

Baixiandi. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.409; Chinese synonym for the Italy *C.japonica* **Centifolia Alba.**

Baixiangbian. (White Rimmed), *(C.japonica),* Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.94, colour photo, [p.146]: Medium size, pink, formal double, veined deeper and with a fine white rim to petals, which are in 6-7 rows, imbricated, outer rows rounded, slightly emarginate, becoming smaller and somewhat pointed towards the centre. Leaves mid-green with yellowish mid-rib, elliptic, apices acute, Margins serrulate. Originated in China.

Baixiuqiu. *(C.japonica), Chinese Camellia Culture*, 2003, Appendix, p.568; Growth strong, erect and symetrical. Leaf pale green surface, yellowish reverse, ovate, 6-8 cm x 4-5 cm, prominent veins, margins shallowly serrate. Flower semi-double to peony, pure white, 8-9 cm diameter, outer 2-3 rows of petals large, centre petals smaller and curled. Ball shaped flower. Flowers mid-season to late. From Fujian Province, China.

Baixue. Yang, 1965, A *Study of the Camellia Varieties of Taiwan.* Translation: 'Snow White'. Synonym for **Fuji-no-mine.**

Baixueji. (Snow White Singer), Gao & Zhuang, 1989. *The Camellia in China*, p.76, No.573 as 'Bai- xue ji': Chinese synonym for the Japanese hiemalis **Shirayuki-hime.**

Baixueshan. (Snowy Mountain), Chang, Shao Yun, 1987, *Camellias from Zhejiang*, p.88. Synonym for **Liujiao Baota.**

Baiyang. Watanabe & Andoh, 1980, *Tsubaki - Hana to Kino Bunka*, as 'Pai-yang'. Abbreviation for 'Baiyang Cha', synonym for **Alba Plena.**

Baiyang Cha. Ikeda, 1978, *American Camellia Yearbook*, p.141. The characters for this camellia name have been expressed using, at various times, three different characters for "yang" each with a different meaning. Taking "bai" equal white and "cha" equal Camellia, the three translations are, 'White Foreign Camellia', 'White Poplar Camellia', and 'White Garden Camellia'.They are all synonyms of **Alba Plena.**

Baiye Zipao. (White Leaf Purple Gown), *(C.japonica)*, Gao & Zhuang, 1989, *The Camellia in China*, p.52, No.334: Large size, 9-10 cm across, red, double. Blooms mid-season. Originated in China.

Baiyi Dahuangguan. (Large Variegated Imperial Crown), Gao, Jiyin, Ltr., 25-5-1990. Chinese synonym for **Betty Sheffield Supreme.**

Baiyilanjiao. *(C.japonica), Chinese Camellia Culture*, 2003, p.234 with colour photo; A sport of **Yilanjiao**. Formal double, white with red lines.

Baiyingsu. Gao, Jiyin, Ltr, 22nd August 1994. Chinese synonym for Nuccio's *C.japonica* **Matilija Poppy.**

Baiyu. (White Jade), Gao & Zhuang, 1989, *The Camellia in China*, p.75, No.55. Chinese synonym for the Japanese sasanqua **Shiro-kantsubaki.**

Baiyubei. Fang, 1930, *Tiannan Chahua Xiaozhi.* Different reading: 'Paiyupei'. Translation: 'White Jade Cup'. Synonym for **Alba Plena.**

Baiyu Danxin. (White Jade, Red Heart), *(C.japonica)*, Gao & Zhuang, 1989, p.51, p.319: Small to medium size, 6-7.5 cm across, white, formal double with 100 petals. Blooms mid-season to late. Originated in China.

Baiyunpiao. Gao, Jiyin, Ltr, 16th October 1992. Chinese synonym for the USA *C.reticulata* hybrid **White Retic.**

Baiyupian. (White Jade Petals), *(C.japonica)*, Gao & Zhuang, 1989, *The Camellia in China*, p.51, No.323, colour photo No.187: Large size,10-11 cm across, white, formal double, sometimes tiered, with 9-10 rows of rounded petals. Blooms early to mid-season. Originated in China.

Baizhebian. (White Frilled Petals), Gao & Zhuang, 1989, *The Camellia in China*, p.79, No.612 as 'Bai zhe bian'. Chinese synonym for **White Frills.**

Baizhu Cha. Chen, 1955, *Guanshan Shumaxue*. Synonym for **Baibaozhu.**

Baker. *(C.japonica).* Gentry, 1972, ACS, *The Camellia Journal,* vol.27, No.4, back page. No description; SCCS, 1974, *Camellia Nomenclature,* p.23: Pink. Large, semi-double to anemone to peony form. Mid-season flowering. Originated by J.M. Haynie, Theodore, Alabama, USA.

Bakurô-tsubaki. Synonym for **Hajikano-de-benten.**

Balade. Gao, Jiyin, Ltr, 5th August 1992. Chinese synonym for the Australian *C.hybrid* **Keith Ballard.**

Balderdash. *(C.reticulata), New Zealand Camellia Bulletin,* Nov.1967, vol.V, No.4, p.39, Reg. No.40: This is a seedling of the wild form *C.reticulata,* produced by controlled pollination from *C.reticulata* 'Crimson Robe', (**Dataohong**) by Dr Jane Crisp at Tirau, New Zealand, which first flowered 1963. It has a vigorous growth habit with dark green, reticulate leaves, up to 13 cm x 6 cm, keeled and with distinct venation. Flowers, semi-double with large rabbit ears; the 16 petals, veined, creped and folded with notched margins, surround fascicles of bright, gold tipped stamens. Size up to 15 cm across by 7 cm deep. Colour RHS, CC, Red Group 45E - 45D. Black & white photo on p.38.

Baldwin Wood. *American Camellia Yearbook,* 1958, p.87. Abbreviation for **Mrs Baldwin Wood.**

Balei Huanghou. (Ballet Queen), Gao & Zhuang, 1989, *The Camellia in China,* p.80, No.623. Chinese synonym for **Ballet Queen.** Later changed to 'Balei Wanghou'.

Baoyuhong. *(C.reticulata),* Yü and Bartholomew, 1980. *American Camellia Yearbook,* p.12: "Spinel pink. E. Kunming. ('Red Jewel'), Bao, 1980)"; Feng et al., 1981, *Yunnan Shanchahua* p.56, 57, colour photo and description: Open peony form to semi-double, 11-12 cm across, 24-28 petals in 5-6 whorls, notched at the apex; centre petals, small, erect, streaked with white, mixed in with stamens and a few petaloids, pistil rudimentary. Colour, RHS,CC,55A, spinel pink, slightly greenish. Leaves elliptic to ovate, flat, margins revolute, apices acuminate and recurved, bases cuneate or slightly broadened, 7-9 cm long by 3-4 cm wide. This is a new cultivar selected from seedlings of open pollinated seeds by researchers at the Kunming Botanical Gardens, Yunnan, China. Flowers early. Different reading: 'Pao-yü-hung'. Synonyms: 'Red Jewel', 'Precious Jade Red'. See Feng et al., 1986, *Yunnan Camellias of China,* p.48 for illustration.

Baozhong. (Treasure Tomb). Gao & Zhuang, 1989, *The Camellia in China* p.75, No.556. Chinese synonym for the Japanese sasanqua **Takarazuka.**

Baozhu. *(C.japonica),* Wang Shumao, 1587, *Xue Pu Za Shu.* Li, Shizhen, 1590, *Bencao Gangmu.* (Materia Medica). Synonym: 'Precious Pearl'. Originated in China. See Bartholomew, 1982, *American Camellia Yearbook,* p.149, 150.

Baozhu Cha. *(C.reticulata),* Wang, Xianjin, 1621, *Qunfang pu,* (Thesaurus of Botany); Yü, T.T., 1950, RHS, *Camellias and Magnolias Conference Report* as 'Paochucha'; Feng et al., 1986, *Yunnan Camellias of China,* p.93, colour plate and description: Leaves large, thick, broad-ovate to oblongovate, apices short-acute or acuminate, bases rounded or broad-cuneate, veins deeply sunken, 7-11 cm long by 4.5-6.5 cm wide. Flowers bright purplish red (RHS,CC,53B), 12-14 cm across. Petals about 30 in 4-5 whorls, outer 2 whorls flat, inner whorls folded or basally connate, forming a spherical corolla. Stamens numerous, divided into 4-6 groups by curved petals. Pistils rudimentary. This cultivar is similar to **Dataohong** but differs in thicker leaves, larger petals, and more raised flower centre. The variety originated in Kunming, Yunnan, China and flowers mid-season. There is a tree at Shidong Temple, Fengqing County with an estimated age of 150 years or over. Western Synonym: 'Noble Pearl'. It received an RHS "Award of Merit" in 1963 under the name 'Paochucha'. Different reading: 'Pao-chu-ch´a'. Sport: 'Noble Pearl Variegated'.

Barbara Anne. *(C.x williamsii),* ACRS., Dec.1990, *Camellia News,* No.115, p.10, Reg. No.386: Originated by Allan B. Raper, 6 George Rd. The Patch, Victoria, Australia. A *C.saluenensis* chance seedling that first flowered 1984. The rose-pink semi-double flowers ('RHS.CC.65B) of 16 petals are produced abundantly over a long period on an upright, rapid growing plant, size 11 cm across x 5.5 cm deep. Leaves dark, glossy green, elliptic, slightly keeled, margins finely serrated, apices acuminate. Petals fluted and tiered, filaments in a column.

Barbara Bedayn. *(C.japonica), American Camellia Yearbook,* 1968, p.128, Reg. No.1011: A 7 year old seedling of **John Illges,** that first bloomed 1964; originated by Mrs Pauline Bedayn, California, USA. Plant growth dense, bushy, slow with dark green leaves, 10 cm x 6 cm leaves. The semidouble to anemone form flower is 11 cm across and 5 cm deep with 10 petals and 30-40 petaloids. the colour is salmon pink with white stamens. Blooms mid-season to late.

Barbara Beeland Rehder. *(C.japonica),* ACS, Aug. 1996, *The Camellia Journal,* vol.51, No.2, p.31, Reg. No.2382. A miniature, blush pink, formal double chance seedling, flowering mid-season.

Originated by Henry B. Rehder Sr., Wilmington, N.C., USA. *American Camellia Yearbook*, 1996, p.1. The 9 year old seedling first flowered 1992. Flowers mid-season to late. Average flower size is 6.5 cm across x 3.7 cm deep, with 58 petals. Plant growth is upright, with dark green leaves 8.2 cm long x 5 cm wide.

Barbara Botts. *(C.japonica),* ACS, May 1995, *The Camellia Journal*, vol.50, No.2, p.15, Reg. No.2321: Large white with pink stripes, *C.japonica* chance seedling. Blooms mid-season to late. Originated by Walter A. Wilson, Augusta, Georgia, USA. ACS, 1995, *American Camellia Yearbook*, p.2 and colour photo: The 30 year old seedling first bloomed 1978. Average flower size is 11 cm across x 5.5 cm deep with 21 petals, 4-5 petaloids and yellow anthers. Plant growth is upright and medium in rate with light green leaves 8 cm long x 5.5 cm wide.

Barbara Butler. (*C.reticulata* hybrid). ACRS, *Camellia News*, Autumn 2005, No.167, p.17, Reg. No.556. Seed parent *C.reticulata* hybrid **Lasca Beauty,** pollen parent unknown. First flowered in 2001. A bight coral pink, semidouble flower of 17 petals, 13 cm diameter x 6 cm deep. Flowers mid-season to late on a very strong upright plant of medium growth. Leaves dark green, glossy, serrate, rounded at base, apiculate apex, 12.5 cm long x 7 cm wide. Flower is cup-shaped with stamens arranged in a column.

Barbara Carol. *(C.japonica),* ACRS, 1970, *Camellia News,* No.40, p.27, Reg. No.125: Originated by E.R. Sebire, Wandin North, Victoria, Australia. Seed parent is *C.japonica* **Ville de Nantes,** pollen parent unknown. First bloomed 1967. Upright, dense, vigorous grower, with mid-green leaves 9 cm x 5 cm, with broad rounded base and coarsely serrate.

Barbara Clark. *(C.saluenensis x C.reticulata),* Doak, *Camellia Bulletin*, July, 1958, South Auckland Camellia Society: "Named for my daughter and has flowers 8-9 cm across. The colour is rose madder self (HCC.23/2). About 15 petals in hose-in-hose arrangement. Flowers long lasting." Originated in New Zealand. See colour photo, ACRS, 1966, *Camellia News*, No.24, p.25. Orthographic error: 'Barbara Clarke'. Sport: **Barbara Clark Variegated.**

Barbara Clark Variegated. *(C.saluenensis x C.reticulata).* Mark S Cannon Scion Catalogue, 1962, p.1 as 'Barbara Clark Var.': A virus variegated form of **Barbara Clark** – Rose-madder blotched white. Originated in USA.

Barbara Fisher Hoff Variegated. Mark S. Cannon Scion Catalogue, 1962, p.1, as 'Barbara Fisher Hoff Var.'. Synonym for **Barbara Hoff.**

Barbara Goff. *(C.reticulata), American Camellia Yearbook,* 2009, p.106 with colour photo; Regn No.2751; A chance seedling first flowered in 2005. Originated and propagated by Gordon Goff, Lafayette, Calif, USA. A very large, 17 cm diameter x 8.2 cm deep rose form to formal double, soft pink (RHS.CC. 68B). Yellow anthers and filaments. Petals number 20 plus. Heavy petal texture, very unusual form, with scalloped and blunt edged petals, long lasting, and falls in one piece. Dark green leaves average 12.7 cm x 6.5 cm. Flowers early to midseason or late.

Barbara Grace. *(C.japonica)* ACS, *The Camellia Journal,* June 2013, p.25 with colour photo; Regn No.2846; Originated, registered and propagated by Vernon E. Howell, Lucedale, Miss., USA. ACS, *Yearbook,* 2013, p.105 with colour photo; A 16 year old seedling, parentage unknown, first flowered 2002. The large size, 12.7cm diameter x 5cm deep, flower is rose form double to formal double. Purple, usually with deep maroon centre shading to dark purple at edges. 30 petals and heavy petal texture. Yellow anthers and yellow filaments. Long-lasting flowers fall whole. Upright growth at average rate. Flowers early to mid-season.

Barbara Harrison. *(C.japonica),* ACS., Nov.1990, *The Camellia Journal,* vol.46, No.4, p.18, reg. No.2197: Large size, pale blush pink, anemone form, *C.japonica* seedling, (**Pirouette** x **Mrs Bertha A. Harms**). Blooms early to late. Originated by Woodford Harrison, Berkeley, California, USA. *American Camellia Yearbook,* 1989, p.88: A 12 year old seedling which first bloomed 1984. Size 11 cm across x 6 cm deep with 40 petals and 5-6 petaloids. Growth upright, spreading, medium with dark green leaves, 10 cm x 6 cm.

Barbara Hillier. *(C.hybrid),* RHS, 1954, *The Rhododendron and Camellia Yearbook;* Hillier, 1955, *American Camellia Yearbook,* p.6: *Camellia x williamsii* **Barbara Hillier.** This plant originated as a seedling in a garden near Romsey, and was selected for its distinctive leaves and habit before the plant flowered. The plant is more lax and open than most plants of this cross, with leaves more distinctly spaced. The flowers as self satiny pink (Rose madder HCC 23/3),10-12 cm across, in size and quality recalling *C.reticulata.* They are a little deeper than 'J.C. Williams' with 6 broadly ovate to ovate petals, cleft at the apex; stamens 2.5 cm long, united for one third their length and arranged in a cylindrical mass. Leaves of firm rigid texture, small serrations, 6-9 cm long by 3.2-4.8 cm wide. Originated in England. Sealy (1958) placed this cultivar in the section *C.heterophylla* which has more recently been placed by Chang (1981) as a cultivated form of *C.reticulata.* It is now considered that this cultivar is not a *C.x williamsii* as first reported, but a seedling of the wild form of *C.reticulata.* Orthographic error 'Barbara Hiller'.

Barbara Hiller. ACS., 1955, *American Camellia Yearbook,* p.6. Orthographic error for **Barbara Hillier.**

Barbara Hoff. *(C.japonica), American Camellia Yearbook,* 1958, p.285, Reg. No.344: A 12 year old chance seedling, originated by Dr Gilbert E. Fisher, Alabama, USA. Plant growth is spreading, of average density, and rapid in rate with very heavy foliage. Leaves average 9 cm x 6 cm. The vivid, rose red, variegated with white flowers are 13-15 cm across and 6.5 cm deep and resemble 'R.L. Wheeler' in form and have 10-12 petals and occasional petaloids. Flowers mid-season. Synonyms: 'Barbara Fisher Hoff, 'Barbara Fisher Hoff Variegated'.

Barbara Jane. *(C.x williamsii),* Tooby, 1983, *International Camellia Journal,* No.15, p.48: A new *C.x williamsii* hybrid from the garden of Rupert and Doreen Solley, Middlesex, England. It was bought over 30 years ago from Hilliers as an un-named seedling. It has single, rather trumpet shaped flowers of deep pink in the style of **Bow Bells.** It flowers profusely very early and continuing and is weather resistant.

Barbara Lodge. SCCS, 1942, *Classification of Camellias,* p.4. Synonym for **Marianna Gaeta.**

Barbara McBride. *(C.japonica), American Camellia Yearbook,* 1974, vol.II, p.230, Reg. No.1333: a 9 year old *C.japonica,* **Elizabeth Boardman** x unknown, first bloomed 1970; originated by Dr. Walter F. Homeyer, Macon, Georgia, USA. The rose form double bloom is Neyron Rose, 623/1 with deeper pink veining. Average size 11-12 cm across and 6.5 cm deep with white anthers and filaments. Bloom has good substance, falls intact and is a good seed setter. Blooms mid-season. Some blooms are fimbriated.

Barbara Mary. *(C.japonica),* Eagle Height's Nursery Catalogue, 1965, p.9; Waterhouse, 1966, ACRS, *Camellia News,* No.21, p.5: Colour blush pink. A large, peony form flower with a delicate scent. Early to mid-season blooming. A seedling from **Cho Cho San,** originated by E.G. Waterhouse, Gordon, N.S.W., Australia.

Barbara Morgan. *(C.japonica),* Fruitland Nursery Catalogue, 1946-1947, p.29; Fendig, 1952, *American Camellia Catalogue:* Large, oriental red, incomplete double, sometimes semi-double, 11.5 cm across by 4.5 cm deep; petals crinkled, standing apart, about 5.5 cm in width. Filaments pink, anthers yellow. Leaves mid-green, oval, 7.5 cm x 4 cm, texture thick, centre vein light green, serrations obscure. Vigorous, bushy growth. A "Tea Garden" import from Europe with a lost label. Named by the proprietor of the Carolina Floral Nursery for his granddaughter. Synonym: 'Nigger Red'. Sport: **Barbara Morgan Variegated.**

Barbara Morgan Variegated. *(C.japonica),* SCCS, 1960, *Camellia Nomenclature,* p.31: A virus variegated form of **Barbara Morgan** - Oriental red blotched with white. Originated in USA.

Barbara Ratliff. *(C.x williamsii), American Camellia Yearbook,* 1982, p.169, Reg. No.1817: A very large, light pink with orchid overtones, semi-double, *C.hybrid ([C.saluenensis x C.japonica]* **Holland Orchid** x *C.japonica* **Angel**), early to mid-season blooming; originated by Ted Alfter, California, USA. The 12 year old seedling first bloomed 1977. Average flower size, 13 cm across x 5 cm deep with 14-15 petals. Good texture. Blooms fall entire. Plant growth upright, open and rapid with dark green leaves 12.5 cm x 6.2 cm wide. Sport: **Barbara Ratliff Variegated.**

Barbara Ratliff Variegated. *(C.x williamsii), American Camellia Yearbook,* 1982, p.169, Reg. No.1818: as 'Barbara Ratliff Var.': A virus variegated form of **Barbara Ratliff.** A very large, light pink with orchid overtoned blotched with white; originated by Ted Alfter, California, USA.

Barbara Sebire. *(C.reticulata),* ACRS, 1985, *Camellia News,* No.95, p.20, Reg. No.334: Originated by Edgar Sebire, Wandin North, Victoria, Australia. A seedling of **Buddha** that first flowered 1981. Deep salmon pink, very large flowers, blooms mid-season on an upright, open plant with large, lanceolate leaves 15 cm long by 5.5 cm wide, short petiole and small serrations. Chinese synonym 'Babala'.

Barbara Thompson. *(C.japonica), American Camellia Yearbook,* 1958, p.285, Reg. No.337: A 9 year old chance seedling that first flowered 1954; originated by R.S. Mauldin, Alabama, USA. Plant growth is medium, rapid in rate and dense with long pointed leaves, 9-10 cm long by 6.5-7.5 cm wide. The deep pink, formal double flowers are 6.5-7.5 cm across by 4.5-5 cm deep with 95-102 petals, with the outer two rows imbricated, the formation of the very pointed, inner petals is star-like. Flowers mid-season to late.

Barbara Whaley. *(C.japonica), American Camellia Yearbook,* 1957, p.298, Reg. No.295: A sport of **Candy Stripe** first observed 1947. Originated by Hugh B. Whaley, Alabama, USA. The dark green leaves average 7.5 cm long by 4 cm wide. Flowers average 8.7 cm across with 17-20 petals and 67 petaloids intermixed with yellow stamens, and are somewhat like 'Beauty of Holland' in form. The colour is lighter than carmine rose with darker stripes. Flowers early to mid-season.

Barbara Witten. *(C.japonica),* ACRS, 1963, *Camellia News,* No.12, p.26, Reg. No.61: Originated by Mrs K.V. Rosenhain, Victoria, Australia. A chance seedling of **The Czar.** A vigorous grower with a slightly pendulous habit. First bloomed 1960. Incomplete double flower, 11 cm across; colour Carmine HCC,21 /1, veined HCC,21. Mid-season to late blooming. Leaves, mid-green, ovate, acuminate, sharply serrate, 7.5 cm long by 4 cm wide.

Barbara Woodroff. Anthony Huxley, ed. 1992, *The New RHS Dictionary of Gardening,* vol.1, p.482. Orthographic error for **Barbara Woodroof.**

Barbara Woodroof. *(C.japonica),* SCCS, 1956, *The Camellia. Its Culture and Nomenclature,* p.27: A sport of **Elegans Variegated.** Light orchid pink outer guard petals and creamy white centre petaloids, with an occasional rose pink one. Medium to large size. Originated by W.E. Woodroof, Sherman Oaks, California, USA. See colour photo, *Encyclopedia of Camellias in Colour,* vol.II, 1978, pl.9, p.28. Received a Preliminary Commendation from the RHS, 1961. Chinese synonym: 'Babala Wudefu', later changed to 'Wuluofu'.

Barbara's Own. *(C.pitardii).* ACRS, *Camellia News,* No.127, December 1993, p.8, Reg. No.422, colour photo p.2: Originated by Kenneth P. Brown, Mitcham, Victoria, Australia. A seedling of *C.pitardii* var. *pitardii,* pollen parent unknown. First flowered 1987. A miniature, white single of 7-9 petals, 4.7 cm across x 3.2 cm deep. Flowers prolifically, early to mid-season on an open, medium growing spreading plant. Leaves glossy dark green, flat, lanceolate, apices acuminate, margins serrulate, 8 cm long x 2.6 cm wide. Petals notched and wrinkled with columnar stamens.

Barbarel. *(C.japonica),* Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.1, p.33, black and white photo: Flower: complete double formal; Neyron Rose 623/self /1, Crimson 22/self veins, 9 cm across by 3 cm deep, petals approximately 50, obovate, 4 x 3 cm, proportionally smaller towards the centre, conspicuous veining, darkening towards margins. Centre petals proportionally smaller, cupped and edges inrolled into a loose, budlike formation, apical notching; no visible stamens; buds globular. Leaves: broadelliptic, cupped, channelled, about 12 cm long by 6.5 cm wide. Midseason to late flowering. Originated in USA.

Barbra Mitchell. *(C.japonica),* ACS, Aug.1995, *The Camellia Journal,* vol.50, No.3, p.36, Reg. No.2328: Large, light pink, shading to white at the centre, formal double, *C.japonica* chance seedling. Blooms mid-season to late. Originated in Melrose, Florida, USA by Ivan J. Mitchell. ACS 1995, *American Camellia Yearbook,* p.2, with colour photo: The 13 year old seedling first bloomed in 1987. Average flower size is 10.5 cm across x 4.5 cm deep with 75 petals. Plant growth is upright and average in rate with dark green leaves 3.5 cm long x 2 cm wide.

Barchi. Burdin Maggiore & Co., 1849-1850, Catalogue General. van Houtte, 1851 Catalogue; de Jonghe, 1851, *Culture du Camellias.* Orthographic variant: 'Barchii'. Synonym for **Contessa Samailoff.**

Baronne de Bleichroder. Real Companhia Horticolo-Agricola, Portuense, 1895-1896, Catalogue, No. 29. Veitch Catalogue, 1903. Orthographic error for **Baronne de Bleichroeder.**

Baronne de Bleichroeder. *(C.japonica),* Linden Catalogue, 1878, p.3 as 'Baron de Bleichröder': The flowers are large, of a perfectly imbricated form, with petals reflexed and rounded, snow-white, finely lined with streaks of flame red. André. ed. 1880, *L'lllustration Horticole,* vol.27, p.54, pl.378: This new variety, recently placed in commerce by the firm of Linden, is characterised as follows: Flowers abundantly, blooms very large, 10-12 cm across, opens freely with petals imbricated, obcordate, rounded, edges slightly scalloped, those at the centre, narrow and tapering, the background is a pure, pale, wash tint of delicate pink, striped with unusual bands of bright rose, both broad and narrow and fairly regular. Named for Baronne de Bleichroeder, wife of the celebrated banker and Queen Victoria's Consul-General in Berlin. Originated in Belgium. Orthographic variants and errors: 'Baronne de Bleichroder', 'Baronne von Bleichroeder', 'Baronne de Bleichröhder', 'Baron von Bleichroeder', 'Baroness Schroder'. The Japanese cultivar **Otome-shibori** is erroneously named 'Baronne de Bleichroeder' in America.

Baronne de Bleichroeder. Coolidge Rare Plant Gardens Catalogue, 1939. An erroneous synonym for **Otome-shibori** used exclusively in America.

Baronne de Bleichroeder (United States). SCCS, 1966, *Camellia Nomenclature,* p.22. The affix (United States) was added to the erroneously used name 'Baronne de Bleichroeder' in an attempt to legalize it. However according to the Horticultural code, it remains an illegal synonym for **Otome-shibori.**

Baronne de Bleichroeder Pink. Griffiths Jr., 1958, *American Camellia Yearbook,* p.5. Synonym for **Casablanca.**

Baronne de Bleichroeder Special. *(C.japonica),* Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II, p.32, black and white photo, p.35: This is 'Baronne de Bleichroeder', (**Otome-shibori**) in all essential respects. Differences are in size and colour of the flower, which is slightly larger in all dimensions and the colour is nearly pure white with only the briefest flecking of Spinel Pink, 0625. It is a formal type of incomplete double, retaining its formal aspect longer in the late stages of unfolding than the other sports of **Otome-shibori.** Originated at Huntington Gardens, San Marino, California, USA.

Baronne de Bleichroeder Special White. Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II, p.36, 37. Synonym for **Otome White.**

Baronne de Bleichröhder. Linden Catalogue, 1880. Orthographic variant for **Baronne de Bleichröder.**

Be My Cherie. *(C.sasanqua),* ACRS, 1978, *Camellia News,* No.70, p.16, Reg. No.209: Originated by Alice Spragg, Sutherland, N.S.W., Australia. A seedling from *C.sasanqua* **Cherilyn** x *C.sasanqua* **Beatrice Emily** that firsts flowered 1975. Plant is upright and dense with mid-green, lanceolate leaves, 4, 5 cm long by 2 cm wide, with small serrations. The 9 cm, anemone form flowers have deep red edged petals, merging into white at base with petaloides, red at the apex and white at the tease.

Bea Rogers. *(C.japonica),* SCCS, May 1971, *The Camellia Review; American Camellia Yearbook,* 1972, p.126, Reg. No.1207: A 4 year old japonica seedling that first bloomed 1969; originated by Neal Rogers, Alabama, USA. Plant growth is upright, average and medium in rate with light green leaves, 9-10 cm long by 5-6 cm wide. The peony form, alabaster white bloom has gold anthers and filaments with 30 petals and 15-20 petaloids. It measures 15-17 cm across by 5-7.5 cm deep, glasshouse grown; normally 13 cm x 5 cm. It has a high centre, wavy petals and good substance. Blooms mid-season.

Beack's Conspicua. Baumann, Mulhouse Catalogue, 1841-1842, p.13. Orthographic error for **Beck's Conspicua.**

Beacon. *(C.japonica),* Horton Catalogue, 1902: A peony form flower of 8-12 rounded, wavy petals, surrounding a high centre of irregular petals and petaloids, forming a globular flower. Bright salmon rose with an occasional streak of rose-red. Slender, upright growth with glossy, light green leaves, 9.5 cm long by 5 cm wide. Originated in New Zealand.

Bealei. Chandler & Booth, 1837, *Illustrations and Descriptions of Camelieae...,* pl.42 as 'Bealeii'. However, as this cultivar had been illustrated and described in *L'Horticuleur Belge, Journal*

Jardiniers Amateurs, 1834, 2:191, pl.40 as **Leeana Superba,** it can only be regarded as a synonym for this latter name.

Bealei des Anglais. van Houtte Catalogue, 1844-1845, p.26, as 'Beali des Anglais'. Synonym for **Leeana Superba.**

Bealei des Horticulteurs du Continent. van Houtte Catalogue, 1844, No.18, p.8. Synonym for **Leena Superba.**

Bealei Palmers. Maupoil & Figlio Catalogue, 1853 as 'Beali Palmers'. Synonym for **Leeana Superba.**

Bealei Rosea. *(C.japonica),* van Houtte Catalogue, 1846-1847 as 'Beali Rosea'. No description. Verschaffelt, 1853, *Nouvelle Iconographie,* Book V, pl.IV: It was obtained from seed in England by Messrs Low & Co, London. The uniform, bright pink blossom is composed of a great many small, oval or sub-rounded petals, either full or sub-lobate at the apex; all are quite spread out, except for the heart, where they are erect and somewhat concave. Orthographic variants: 'Bealii Rosea', 'Belea Rosea', 'Beali Rosea', 'Beal's Rosea', 'Bealia Rosea', 'Beallii Rosea', 'Bealy Rosea'. Synonyms: 'Dixie', 'Orton's Pride', 'Vivid Pink'.

Bealei Vera. Anonymous, 1862, *R. Societa Toscano di Orticultura Bolletino,* as 'Beali Vera'. Synonym for **Leeana Superba.**

Beau de Nantes. Killiow Gardens Catalogue, 1984-1985, p.1. Orthographic error for **Beauté de Nantes.**

Beau Geste. *(C.japonica), American Camellia Yearbook,* 1973, p.188, Reg. No.1247: A 12 year old chance seedling that first bloomed 1967; originated by J.M. Haynie, Alabama, USA. Plant growth is upright, average in rate, medium, open with dark green leaves, 9 cm x 4 cm. Loose, peony flowers, up to 12 cm across and 6.5 cm deep, rich red with yellow anthers and pink filaments; petals of medium texture, some folded. Mid to late season bloomer.

Beau Harp. *(C.japonica), American Camellia Society Newsletter,* 1949, vol.4, No.3; *American Camellia Yearbook,* 1954, p.302-303, Reg. No.10: Illges Medal Award 1949. A seedling from the *C.japonica* seed planted 1936, first flowered 1945; originated by G.H. Wilkinson, Florida, USA. It is of very hardy, upright growth. Large, oval buds. The red flowers, incomplete double with large petaloids, open early to mid-season and are 10-15 cm across with 22-30 petals. Leaves, broadly oval, mid-green, 10 cm long by 6 cm wide; apex acuminate, venation prominent, coarse and wide serrations. See colour photo p.131, Feathers, ed.1978, *The Camellia,* facing p.131. Sport: **Dr John Bell.** Chinese synonym 'Shuaige'.

Beau Harp Variegated. SCCS, 1951, *The Camellia. Its Culture and Nomenclature* as 'Beau Harp Var.'. A synonym for **Dr. John Bell.**

Beaufi. *(C.japonica),* de Jonghe, 1851, *Traité de la Culture du Camellia,* p.97. No description. (Believed extinct.)

Beaulieu Belle. *(C.japonica), American Camellia Yearbook,* 1966, p.84, Reg. No.880: A 12 year old chance seedling that first bloomed 1960; originated by Geo.T. Clarke, Georgia, USA. Plant growth is medium in rate. Leaves, dark green, 11.5 cm long by 6 cm wide. The semi-double flowers are 12.5 cm across and 7.5 cm deep. Colour is white with yellow stamens. Blooms have 10 petals and 20 rabbit ears. Stamens are in 10 groups of 20 stamens each. Slight pink stripe in each rabbits ear. Blooms mid-season.

Beaumannii. Trillon, Le Mans Nursery Catalogue, 1843, p.3. Orthographic error for **Baumannii.**

Beautis Palmers. Longone Catalogue, 1858. Orthographic error for 'Bealei Palmers', synonym for **Leeana Superba.**

Beauté Parfait. *(C.japonica), Annals of Horticulture* vol.2, 1847: This is a variety that was raised by Mr Hally of Blackheath, England. The flowers are somewhat small, but are well formed with cupped petals of a deep rose-pink colour.

Beauté de Nantes. *(C.japonica),* Jules Ménoreau Catalogue, 1890 as 'Beauté de Nantes'(Heurtin). It was originated by M. Heurtin, Nantes, France, in 1879. It is rose-pink (RHS., 21/1) with a lighter centre. Medium size, about 10 cm across, rose form double with cupped centre petals. Late flowering. Vigorous, compact grower. Leaves broadly ovate, 7.5 cm long by 4.5 cm wide, sharp, abrupt apex, serrations coarse, deeply cut, depressed venation. Synonyms: 'Rose Queen', 'Busch Garden Red', 'Beauty of Nantes', 'Beauty', 'Bush Red' Orthographic error: 'Beau de Nante'. Chinese synonym 'Meijiu'.

Beauté Suprème. *(C.japonica),* Paxton, 1847, *Magazine of Botany,* vol.XIII, p.71: A fine seedling recently flowered by Messrs Lane of Great Berkhampstead, England, of good shape and size and a pale, waxy, rose colour. Synonym: 'Beauty Supreme'.

Beauti of Clapham. Jean Verschaffelt, 1876-1877 Catlalogue No.19, p.54. Orthographic variant for **Beauty of Clapham.**

Beautiful Peacock. Yashiroda, 1950, *American Camellia Yearbook,* p.23. Synonym for **Tamakujaku.**

Beautiful Peony. Savige, 1983, *International Camellia Journal,* p.47. Synonym for **Yumudan.**

Beautiful Pink. Hume, 1946 *Camellias in America* as listed by Longview and Lindo Nurseries. No description. Originated in USA.

Beautiful Singing Bird. *Camellias,* Y.C. Shen, 2009, p.135 with colour photo; Synonym for **Karyôbin.**

Beauty. Sunny Knoll Nursery Catalogue, 1950. Orthographic error for **Beauté de Nantes.**

Beauty de L'Europe. *(C.japonica),* Hovey & Co., Catalogue, 1857. No description. (Believed extinct.)

Beauty de Nantes. Gerbing's Azalea Nursery Catalogue, 1938-1939. Orthographic error for **Beauté de Nantes.**

Beauty Grafton. *(C.japonica),* Fratelli Rovelli Catalogue, 1852, p.12: Imbricated, satin red. Franchetti, 1855, *Collezione di Camelie,* p.13: Flower imbricated with great symmetry and of an intense red with whitish centre. Synonym: 'Beauty of Grafton'. Originated in Italy.

Beauty of Chatsworth. Newman & Sons Nursery Catalogue, 1894-1895. Synonym for **Chats.**

Beauty of Clapham. *(C.japonica),* Verschaffelt 1853, *Nouvelle Iconographie,* Book VII, pl.I: As its name indicates, this variety was recently obtained from seed in England. It is remarkable for the uniform, vivid, cherry carmine colouring and the mathmatical regularity of imbrication of its numerous petals of two forms. The exterior are rounded, fully emarginate at the apex, the others at the centre are acute-apiculate. Orthographic error: 'Beauti of Clapham'.

Beauty of Exeter. *(C japonica),* Hazlewood & Jessep, 1973, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.20: Bright rosy salmon, semi-double, medium size. Originated in Australia.

Beauty of Grafton. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.20. Orthographic variant for **Beauty Grafton.**

Beauty of Greenoaks. *(C.japonica),* Hunter's Camellia Grove Notebook, 1872. No description. Originated in Australia. (Believed extinct.)

Beauty of Greenville. *(C.japonica),* Steffek, 1949, *Plant Buyer's Guide,* ed.5, p.47; Stanley, 1953, *American Camellia Yearbook,* p.279: The name of a camellia plant of local fame was changed from 'Henderson' to **Pride of Greenville.** This bright red, full peony form variety was purchased by W.J. Beeland in 1897 from a nursery in Springfield, Ohio. In time the property was sold to Mr C.C. Henderson, then to Mr Ambrose Reese. As it was a desirable variety, and

not identified, it was finally introduced under the name **Pride of Greenville.** It is thought to be a local seedling, originating in Springfield, Ohio, USA.

Beauty of Grove Hill. *(C.japonica),* Giles & Son Nursery Catalogue, 1881, p.91. No description. As Grove Hill was the name of Giles' home, it is believed to be a variety originated by him in South Australia. (Believed extinct.)

Beauty of Guernsey. *(C.sasanqua),* Lort-Phillips, 1970, RHS, *The Rhododendron and Camellia Yearbook,* p.134. No description. Believed to have originated in the Channel Isles.

Beauty of Holland. *Azalea and Camellia Society of America Yearbook,* 1933, p.26, 29: A sport of **Hikarugenji,** ('Herme') which, when it occurred in America, collected such synonyms as 'Herme Sport', 'Herme Sport Number 2', 'Hermesport', 'Light Herme', 'Princess Lucille', 'C.P. Morgan', 'Doris Madalia' and erroneously, 'Jenny Lind'. However they are all synonyms for the old Japanese cultivar **Hikarugenji-yokomoku.** Chinese synonym: 'Helen Zhimei'.

Beauty of Hernesey. Real Companhia Horticolo-Agricola Portuense Catalogue, No.29, 1895-1896, p.44. Orthographic error for **Beauty of Hornsey.**

Beauty of Hernsey. Real Campanhia Horticolo-Agricola Portuense Catalogue, No.29, 1895-1896, p.57. Orthographic error for **Beauty of Hornsey.**

Beauty of Hornsey. *(C.japonica),* Verschaffelt, 1855, *Nouvelle Iconographie,* Book V, pl.II: Large blossoms, of vivid carmine colour, variegated with white stripes. Long lasting blooms with rounded exterior petals and lanceolate centre petals, slightly emarginated and forming a full heart. Obtained from seed at Hornsey, near London, England. Orthographic errors: 'Beauty of Hernesey', 'Beauty of Hernsey'.

Beauty of Japan. *(C.japonica),* Searle & Son Nursery Catalogue, 1906. No description. Originated in Japan. (Believed extinct.)

Beauty of Korea. *(C.japonica),* Vanderbilt, 1941, *Camellia Research II,* p.1. No description. (Believed extinct.)

Beauty of Longview. *(C japonica),* Rubel Catalogue No.79, 1940-1941. No description. Originated at Longview, Crichton, Alabama, USA. (Believed extinct.)

Beauty of Nantes. Lindo Nurseries Price list, 1941-1942. Orthographic variant for **Beauté de Nantes.**

Beauty of Satin. Yoshiroda Catalogue, 1939. Synonym for **Shusugasane.**

Beauty of Waltham. *(C.japonica),* Dean., A. Camellias, 1891, *Gardeners' Chronicle,* ser.3, 9:404: Blush, very beautiful formal double. Received a First Class Certificate in 1891 when shown by Paul. Originated in England. Orthographic variant: 'Waltham Beauty'.

Beauty Red, Large Osmanthus Leaf. Ikeda, 1976, *American Camellia Yearbook,* p.144. Synonym for **Meirenhong Daguiye.**

Beauty Supreme. de Jonghe, 1851, *Traité de la Culture du Camellia,* p.97. Synonym for **Beauté Supreme.**

Beauty Twin. Bao, 1980, ACS, *The Camellia Journal,* vol.35, No.2, p.18. Synonym for **Erqiao.**

Beauvoir. *(C.japonica),* SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* Red with a purple cast. Medium large, incomplete double to semi-double with fluted petals. Petaloids mixed with yellow stamens. Buds are dark green, long and pointed. Colour and form of flower are similar to **Mrs Charles Cobb.** Leaves, medium, dark green, elliptic, 12.5 cm long by 5 cm wide; apex long acuminate, margins widely, shallowly serrate. A vigorous, upright grower.

Mid-season blooming. Originated by Mr and Mrs T.S. Clower, Gulf Port, Mississippi, USA, from seed of unknown parentage. First flowered 1944. Named for the Gulf Coast home of Jefferson Davis.

Bebe Woodward. *(C.japonica),* ACS, Aug. 1995, *The Camellia Journal,* vol.50, No.3, p.36, Reg No.2333: Large size white, shading yellow at the base of each petal and petaloid, peony to rose form to formal double *C.japonica* chance seedling. Blooms early to late. Originated in USA by Elizabeth R. Scott, Aiken, Florida. ACS, 1985, *American Camellia Yearbook,* p.2 with colour photo: The 20 year old seedling first bloomed 1981. Average flower size is 10 cm across x 6 cm deep with 43 petals, 8 petaloids, yellow anthers and white filaments. Plant growth is upright and average in rate, with dark green leaves 8 cm long x 5 cm wide.

Bebe's Best. *(C.japonica),* ACS, *Yearbook* 2012, p.169 with colour photo; Regn No.2823;A sport of **Adam Grant**, first flowered 2004. Originated and propagated by Marion Hall, Dothan, Ala.; Very large, 12.5cm x 7.5cm, loose peony form flower has 50 petals, colour light pink with rose pink striping. Centre petals are creped. Upright plant of average growth habit. Dark green leaves average 9cm x 5cm. Flowers early to late.

Beccan. *(C.japonica),* Guilfoyle Catalogue, 1866. No description. Originated in Australia. Orthographic error 'Beecan'. (Believed extinct.)

Beccaria. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847 as from Mariani. No description. Burdin Maggiore & Co., 1849-1850, Catalogue General: Purplish red, brighter at the centre, well imbricated. Luzzatti, 1851, *Collezione di Camelie,* p.6: Imbricated, vivid carmine, large, rounded petals arranged in a spiral. de Jonghe, 1851, *Traité de la Culture du Camellia,* p.97: Large, double flower, vivid carmine. petals rounded and in a spiral. Ample foliage, strong habit. Verschaffelt, 1852, *Nouvelle Iconographie,* Book IX, pl.III: Italian. This variety has been grown for several years. Its petals, which are regularly imbricated, are distictly ovate-lanceolate, obtusely rounded at the apex, seldomly slightly emarginate. They are somewhat hooded and of a vivid pink with carmine tints. A few rare stripes of white appear at the centre. de Jonghe (1851) lists it as 'Beccaria'(Negri).

Bechong Boer. Gao, Jiyin, Ltr.,30 July 1990. Chinese synonym for **Pearl Maxwell.**

Becket Red. *(C.japonica),* Griffin ed., 1958, *Camellian.* A large, red semi-double. Originated in USA. Orthographic error: 'Beckett Red'.

Beckett Red. Mark S. Cannon Scion Catalogue, 1962, p.1. Orthographic error for **Becket Red.**

Beck's Conspicua. *(C.japonica),* van Houtte Catalogue, 1839, p.1; Berlèse, 1840, *Monographie,* ed.2, p.110, 228: Plant habit vigorous with dull green leaves, 10 cm long by 5.4 cm wide, long-oval, sharply acuminate, prominent venation, crenulated margins; buds, large, long pointed with whitish scales. Flower, 10 cm across, double, cherry-red; petals in 4-5 rows, 5 cm across, almost round, slightly notched, regularly imbricated with veins of carmine; in the centre a few upright fertile stamens. Jacquin, Paris, Catalogue, 1845, p.12: Double, transparent pink, veined, edges of petals streaked white. Orthographic errors: 'Buck's Conspicua', 'Beek's Conspicua', 'Beack's Conspicua', 'Buyck Conspicua', 'Conspicua de Beck', 'Buckii Conspiua'. Synonym: 'Imperatrix'(Beck's). . Has been confused with **Conspicua de Loddiges.** Originated in England.

Becky Ann. *(C.japonica),* Buck's Nursery Catalogue, 1962; *American Camellia Yearbook,* 1965, p.227, Reg. No.671: An 8 year old chance seedling, first bloomed 1957; originated at Buck's Nursery, Georgia, USA. Plant growth, medium, upright and open with dark green leaves, 7 cm long by 4 cm wide. The white, anemone form flower is 11 cm across by 6 cm deep, with 10 outer guard petals and 90-100 petaloids. Early flowering.

Becky Sharp. *(C.japonica),* Valley Garden Centre Catalogue, 1946-1947: Cream white. Large, double peony. Vigorous, spreading growth with medium size, mid-green leaves. Mid-season blooming. Synonym: 'Cream Peony'. Originated at the Star Nursery, California, USA, from Camellias imported from Japan in 1930.

Becky Varner. *(C.japonica), American Camellia Quarterly,* 1951, 4(2):8. A seedling of unknown parentage, 8 years old. First flowered 1946. Originated by Mrs C.T. Springer, Alabama, USA. The plant growth is open, upright and slow. Buds ovoid and green. Flowers deep red, turning purple with age; loose peony type with yellow stamens, 9-11 cm across. Mid-season blooming. Registration No.112, *American Camellia Yearbook,* 1954.

Bella Milanaise. da Silva Catalogue No.29, 1929. Orthographic variant for **Bella Milanese.**

Bella Milanesa. Auguste van Geert, 1854, Catalogue, No.36, p.33. Orthographic error for **Bella Milanese.**

Bella Milanese. *(C.japonica),* Luzzatti, 1851, *Collezione di Camelia,* p.7. No description. Franchetti, 1855, *Collezione di Camelie*, p.14: Rosy pink, spotted and streaked with pale carmine. Imbricated. Verschaffelt, 1855, *Nouvelle Iconographie,* Book X, pl.II: Received in the Autumn, 1853 from M. Luzzatti, of Florence, Italy, who obtained it from seed. Blooms, larger than average, are regularly imbricated, having a double form, Those of the first rows being rounded, slightly emarginate; those following are lanceolate, at the centre where they are grouped in the form of a rose. Their colouring is a delicate pink, becoming lighter at the margins and variegated with crimson dashes and stripes. Orthographic errors: ‘Bella Milanaise’, ‘Belle Milanaise’, ‘Belle Milanese’, ‘Bella Milanesa’.

Bella Otero. *(C.japonica),* Sociedad Española de la Camelia, *Camelia*, No.13, Dec. 2008, p.33 with colour photo; Flower large, 10-12 cm diameter, dark pink (RHS.CC. 45C). Semi-double with 8-11 petals, and 20-40 petaloids, some petaloids with a central white band. Up to 100 dispersed stamens with cream filaments and yellow anthers. A chance seedling originated by Jaime Escofet and Rosa Crespo in Valga, Pontevedra, Spain, in 2000. First flowered in 2004. Leaves dark green (RHS.CC. 147A), 7 cm x 4 cm, ovate-elliptic. Flowers mid-season. Plant is upright, bushy and dense.

Bella Paolina. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847: Flower, large; petals long, concave, regular and of a brilliant rose colour. Originated in Italy by Burnier & Grilli, Florence. Orthographic error ‘Bella Paulina’.

Bella Pauline. Alex. Verschaffelt, 1847-1848, Catalogue, p.44. Orthographic error for **Bella Paolina.**

Beneyii. *Azalea and Camellia Society of America Yearbook,* 1933, p.27, 29. Orthographic error for **Binneyi.**

Beni-akane (Red Madder) (*C.japonica*) from Kodaira, Tokyo, *Japan Camellia* No.84, August 2007: Red, single, cupped petals, tubular stamens, blooming in March to April, small. Tree upright growth. Leaves elliptic, medium. A crossing between **Benimyôrenji** and **Oboko**. Originated by Shinichi Noguchi and named in 2001.

Beni-akari. (Red Lantern). *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.79 with colour photo; A chance seedling, raised by T. Kunitake, Kurume, Japan, and named by Kairyoen Co. Flower purplish red, medium to large size, lotus form semi-double. Tubular stamen cluster. Plant upright. Leaves large, oblong. Flowers early to mid-season. .

Beni-arajishi. (Red Fierce Lion), (*C.rusticana*), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in early flowering section. Itô, Ko'emon, 1879, *Chinkashû:* Early bloomer. Deep red Peony form. This cultivar is widely grown, often, invalidly as 'Arajishi', which is the variegated form. (See **Arajishi**). Leaves long-oval, large, apices acuminate, margins sharply serrate, petioles hirsute. The name translates as "Red Restive Lion". Originated in Japan. Different reading: 'Beni-arejishi', 'Kô-arajishi'. Synonyms: 'Aloha', 'Lady Alice', 'Pompenia Rubra'. Colour photos can be found on p.61, Macoboy, 1981, *The Dictionary of Camelluas in Colour;* Tuyama, 1966, *Camellia Cultivars of Japan,* p.66 and *Camellias of Japan,* 1968, pl.244 & p.164; and in Seibundô Shinkôsha, 1979, *Senchinshû,* p.134.

Beni-arashi. (Red Tempest), (*C.rusticana*), Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.8, p.14; Seibundô Shinkôsha, 1979, *Senchinshû,* p.134 & p.245, colour photo: Crimson, variable

peony to anemone form, 8-10 cm across x 4 cm deep. About 10 large guard petals; centre an irregular mass of variously shaped, twisted petals, petaloids and a few stamens with long, yellow filaments giving a high centre. Very variable; some white marks on the inner petals. Late flowered. Petiole hirsute. Leaves, ovate, lustrous strong green, margins coarsely, sharply serrate and clear venation, 7-8 cm long x 5 cm wide. Plant habit, low, bushy and sturdy. Originated at the Kakizaki Machi, Kubiki Gun, Niigata, Japan. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1967. See p.382, Yokoyama & Kirino, 1989, *Nihon no Chinka.*

Benibana-cha. *(C.sinensis),* Creech, 1957, *Plant Explorations of Ornamentals in Southern Japan, U.S.* Dept. Agriculture, ARS,34(1):"Red Tea", so called because of the dark, reddish maroon foliage and small, reddish pink, nodding flower with 5 petals, anthers yellow, becoming brown, filaments reddish. Leaves long-oval, thick, 4 cm x 2 cm. . New rootlets are also pink tinted. Compact habit. Early flowering. Originated in Japan. See: *Camellia sinensis* Linn. var. *rosea.*

Benibato. (Red Pigeon) (*C.hybrid*) from Tokyo, *Japan Camellia* No.60, August 1999: Thought to be a crossing between the *C.hybrids* **Wirlinga Belle** and **Joyful Bells**. Peach red, 4 cm across, bears fruits easily, blooms in early to mid-season. Leaves elliptic, small. Tree upright growth. Found by Yaichiro Fujimoto in 1989.

Benibokuhan (Chûbu). Seibundô Shinkôsha, 1979, *Senchinshû,* p.245. Synonym for **Benikarako** as 'Jikkô'.

Benibana-kakuba-rôgetsu. (Red Flower, Square Leaf, Rôgetsu), (*C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.135, colour photo, p.246, description: Light red, single, 6-7 petals with central column of stamens, shallow cup-shaped, 8-10 cm across, reflexing with age. Leaves, broadelliptic, round base, medium to large, thick, coarsely serrate. Translation: Benibana means "red flower"; kakuba is "angular leaved" and rôgetsu means december, referring to its early flowering. However it has no relationship with **Rôgetsu.** Originated in Ehime Prefecture, Japan.

Benibokuhan. Chûbu Tsubaki Kyôkai, 1960, *Tsubaki Meikan.* Different reading: 'Akabokuhan'; synonym for **Benikarako.**

Benibotan. (Red Peony), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in peony form section. Itô, Ko'emon, 1879, *Chinkashû:* Large, red peony form. The self red sport of **Hikarugenji.** See colour photos p.56, Macoboy, *The Dictionary of Camellias in Colour,* 1981. and p.93, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement.* See also, under the different reading 'Kôbotan' in the following publications: Tuyama, 1966, *Camellia Cultivars of Japan,* pl.26. Tuyama, 1968, *Camellias of Japan,* pl.l84. *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.171. Seibundô Shinkôsha, 1978, *Senchinshû,* p.53. Synonyms: 'Batista', 'Harmonious', 'Majestic', 'Radiant Glow', 'Rosy Dawn', 'Wings', 'Herme Sport No.l', 'Herme Red', 'Herme Rose', 'Pink Herme', 'Red Herme', 'Hikarugenji Pink', 'Hikaru Pink', 'Hikaru Rose', 'Hikarugenji Rosea', 'Pink Hikarugenji', 'Hikarugenji-aka', 'Pink Jordan's Pride', 'Red Jordan's Pride'. 'Powell's Pink', 'Hermi Pink', 'Hermi Red', 'Hermi Red Rose', 'Herme Pink', 'Majestic', 'Jordan's Pride Red', 'Hikarugenji Red'. Originated in Japan. In Japan this cultivar is more generally known by the different reading 'Kôbotan'.

Benibotan. (Red peony), *(C.sasanqua),* Shimada, Yaichi, 1957, *Kumamoto no Sazanka ni Tsuite Dantairin;* Satomi, 1958, *Nomenclature List of Sasanqua of Japan,* p.7: Deep pink. Medium size single. Leaves small and oblong. Originated in Kumamoto, Japan. Same characters as the *japonica* cultivar. See JCS., 1987, *Tsubaki,* No.26, p.43. Synonym: 'Benibotan'(Higo).

Benibotan. (Red Peony), *(C.sasanqua). Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.574, p.221, description p.395: Early blooming, medium size single, red, 7-8 cm across, of 5-6 petals with 70-85 stamens. Originated in Niigata Prefecture, Japan. Selected and named by Yawazaki, Sadatsuga. Same characters as the *C.japonica* cultivar. see JCS., 1987, *Tsubaki,* No.26, p.43. Synonym: 'Benibotan'(Niigata).

Benibotan. ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.38. Synonym for the hiemalis **Benibotan (Chûbu).**

Benibotan (Chûbu). (Red Peony from Chûbu), *(C.hiemalis),* Hakoda, 1987, JCS., *Tsubaki,* No.26, p.48: Medium size, red, double. Early to mid-season blooming. Originated in the Shizu'oka Prefecture, Japan. Synonym: 'Benibotan'.

Benibotan (Higo). Hakoda, 1987, JCS., *Tsubaki,* No.26, p.43. Synonym for **Benibotan,** sasanqua from Kumamoto.

Benibotan (Niigata). Hakoda, 1987, JCS., *Tsubaki,* No.26, p.43. Synonym for **Benibotan,** sasanqua from Niigata.

Benichidori. (Red Plover), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in double flower section; Itô, Ko'emon, 1879, *Chinkashû:* Cardinal red, mottled white. Medium sizes semi-double with petaloids and small, divided stamens. Flowers late. Leaves long-obovate, reclined, flat, shallowly serrate, yellowish green. Plant habit bushy and side spreading. See colour photos and descriptions: Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement,* p.96 and Seibundô Shinkôsha, 1979, *Senchinshû,* p.135 & p.245. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.324. Similar to **Hoshiguruma.** Chinese synonym: 'Hongqianniao'. Originated in Kantô District, Japan.

Benichirimen. Itô, 1739, *Honzô Hanamaki'e.* Synonym for **Chirimenkô.**

Benichirimen. (Red Crêpe), *(C.japonica),* Okumura, Shigetarô, ca.1810, *Chinka hin'i.* No description. Originated in Japan. (Believed extinct.)

Benichô. (Red Butterfly), *(C.japonica),* ICS., Apr.1990. *Japanese Camellia Cultivar List,* p.4: Medium size, crimson, campanulate single. Originated in the Hyôgo Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.232 with colour photo; English translation p.161. Flowers mid-season. Leaves elliptic, medium size, flat. Upright, vigorous growth. A natural seedling of **Chôchidori.** Originated by Yoshihiko Mishima, released by Nobuo Sasai in 1979.

Beni-chôchidori. (Red Butterfly Plover), *(C.japonica),* Yokoyama & Kirino, 1987, *Nihon no Chinka,* p.168, colour photo and description: Medium size, red, single with 5 ovate petals, like a Chinese bellflower, and a central stamen cluster with white filaments, joined for the lower half, and yellow anthers. Leaves mid-green, elliptic to wide-elliptic, apices acute, margins serrulate, plant bushy and side-spreading. Originated in the Toyama Prefecture, Japan. Named and released by Mitsuroku Makino in 1987.

Benichohji. Andoh, 1974, *Tsubaki Nyamon,* No.86. Different reading for **Benichôji.**

Beni-chôja. (Red Millionaire). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.232 with colour photo; English translation p.163. Small, deep red, single, slender and channelled petals, cylindrical stamen column. Flowers mid-season to late. Leaves somewhat oblong, medium size. Upright growth. A cross between **Yuri-tsubaki** and **Eiraku.** Originated by Nobuo Sasai in 1983, released in 1997. From Okayama Prefecture.

Benichôji. (Red Clove), *(C.japonica),* Tateyama Nursery Catalogue, 1957: A medium sized, red double. Originated in West Usuhara, Japan. Different reading: 'Benichohji', 'Benichôzi'. A variegated form is called **Shibori-chôji.**

Benichôji. (Red Clove Tree), *(C. rusticana),* Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.8. Tuyama, 1968, *Camellias in Japan,* pl.223, description, p.156: Leaves broad-elliptic, acuminate-cuspidate at the apex, margins serrate, petioles 5 mm long, hairy. Flowers of irregular peony type, deep red, (Currant red 821/2) 5-6 cm across by 3 cm deep; petals incurved at apical margin,13-15, the largest, 2.9 cm x 3 cm; 40-50 small, central petaloids, intermingled with stamens, sometimes anemone centered. Collected in Ojiya-shi, Niigata Prefecture in 1959. See colour pl.372, p.158 & p.347, *Encyclopedia of Camellias in Colour,* vol.I, 1972. There is also a white variegated form named **Shibori-chôji.**

Benichôzi. Seibundô Shinkôsha, 1966, *Garden Life,* No.17, p.22. Different reading for **Benichôji.**

Benidaikagura. (Great Sacred Shintô Dance, Red), *(C.japonica),* Minagawa, 1933, *Chinkashû.* Chûgai Catalogue, 1934-1935, p.35, erroneously as 'Daikagura'. Wada, 1941, *Japanese Garden Treasures,* p.28; Tuyama, 1966, *Camellia Cultivars of Japan,* pl.32, p.62: One of the largest of all, full double, the type of **Emperor of Russia;** deep red, self coloured. Early blooming. The self red form of **Daikagura.** Petals exceed 30, wavy, mixed up, uneven, large and small, piled up with stamens intermixed. Leaves elliptic to broad-elliptic, thick, recurved, variegated with yellow. Synonyms: 'Shangri-La', 'Daikagura Red', 'Pink Kagura', 'Daikagura Pink', 'Daikagura Rose', 'Daikagura Rosea', 'Daikagura-Kansai'. Different reading: 'Akadaikagura'. Sports: **Daikagura, Benten-kagura.** Similar to **Hoshiguruma.** Originated in Kantô District, Japan. Chinese synonym 'Quimudan'.

Benifubuki. (Red Snow Storm), (Higo), Izu Ohshima Hawaii Botanic Gardens Catalogue, 1980, p.17. No description. Hayashi, Shigeyuki et al, 1986, *Higo Rokka,* p.32: Red ground with white markings, 10-11 cm across with 8-9 petals. Originated in Kumamoto Prefecture, Japan as a mutation of **Shintsukasa.** Recognised by the Higo Camellia Society around 1985.

Benifude. (Red Writing Brush), *(C.rusticana),* Mainichi Shinbun, 1971, *Tsubaki,* p.86, pl.110: Small sized, semi-double white with red stripes and central stamen column. Originated in Chôfukuji, Nishi-kyôgoku, Kyôto, Japan.

Benifude. (Red Writing Brush), *(C.rusticana),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.204, colour photo and description: Small size, deep crimson, tubular single with 5 overlapping petals and central stamen cylinder with yellow anthers. Blooms mid-season. Leaves small, broad-elliptic, apices long-acuminate, margins serrulate. Selected from wild japonicas in Matsuyama City, Ehime Prefecture, Japan. Named and released by Tokihiro Kôno around 1979. This cultivar seems distinct from the former cultivar.

Benifude. (Red Writing Brush), *(C.sasanqua),* Murayama, 1971, *Garden Life, 12, Higo Sazanka Bunkashi.* No description. Originated in the Kumamoto Prefecture, Japan.

Beni-fukin. (Red Cloth), *(C.sasanqua),* Satomi, 1962, *Sazanka Iden 16:* Deep red, formal double, medium size. Originated in Japan.

Benifukura. (Red Fukura), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.201, colour photo and description: Medium size, deep red, wide campanulate single, with 6 broad, overlapping petals, emarginate and somewhat crinkled around the margins and a central stamen cylinder, with ivory to pinkish filaments, joined for the lower third, and small yellow anthers. Blooms mid-season. Leaves bright green, elliptic to broad-elliptic, apices tapering-acute, margins serrate. Originated in Gifu Prefecture, Japan. Named and released by Nagaharu Niwa in 1987, released by Gifu Camellia Club.

Benifuyô. Yoshimura, 1961, *Higotsubaki Meikan* No.5. Synonym for **Hino-tsukasa.**

Benigasa. (Red Umbrella), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.245: Medium size, red, semi-double with inner petals semi-erect. Mid-season flowering. Leaves, medium sized,

ovate to long-ovate, conspicuous serrations, mid-green. Plant habit, upright, vigorous, thick branches. A sport from **Ehigasa**. Originated in the Chûbu District, Japan. Named and released by Minoru Satô in 1982.

Benigiku. (Red Chrysanthemum), *(C.japonica),* Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai,* p.217: Red. Small size, double with many petal rows, flowers well displayed. Mid-season flowering. Slender, slow growth. Originated in San'in District, Japan.

Benigiku-gasane. Different reading for **Benikiku-gasane.**

Beniginu. (Red Dress), *(C.hybrid),* ICS., Apr. 1990, *Japanese Camellia Cultivar List:,* p.27: Large size, deep carmine, semi-double to loose peony form. Originated in the Ôsaka Prefecture, Japan. A seedling of **China Lady.** Named and released by Kazuo Yoshikawa in 1980s.

Benigishi. Fendig, 1953, *American Camellia Catalogue* . Corruption of Japanese name **Benijishi.**

Benigôri. (Red Country), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.4: Small to medium size, deep crimson, campanulate single. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.231 with colour photo; English translation p.161. Flowers mid-season to late. Leaves elliptic, medium size. Upright growth. Selected from wild japonicas growing in Yamaguchi Prefecture. Collected by Nobuo Sasai in 1983, released in 1997.

Benigoromo. (Red Dress), *(C.sasanqua),* Yamato Nô'en Catalogue, 1952: Red Double. Originated in Japan.

Beniguruma. (Red Carriage), Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki.* Different reading for **Kôsha.**

Beniguruma. (Red Carriage), *(C.japonica),* Itô Ko'emon, 1879, *Chinka Shû;* Tuyama, 1966, *Camellia Cultivars of Japan,* pl.121, p.205; *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.92, pl.170, description, p.316: Dark red, double flower, 9 cm in diameter with 10-15 petals. Outer petals open evenly and reflex. The centre has numerous, small petals mixed with stamens when flower is fully open. Blooms late-season. Leaves, medium size, oval, shallowly serrate. Plant habit erect. Resembles **Higuruma.** Different reading: 'Benikuruma'. See Seibundô Shinkôsha, 1979, *Senchinshû,* p.245; Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.317 as 'Benikuruma'. Originated in the Kantô District, Japan.

Beniguruma. (Red Carriage), *(C.sasanqua),* Taniguchi, Shinkichi, 1918, *Engei no Tomo, Yushutsu yô Kanshô Shokubutsu no Saibai.* No description. Originated in Japan. (Believed extinct.)

Benigyoku. Different reading for **Kôgyoku.**

Benihagoromo. (Red 'Hagoromo'), *(C.japonica),* Inazawa Nursery Co. Ltd Catalogue, 1986-1987, p.13, B-8: Dark red, medium size, 8 cm across, single of 5 petals, coloured half red. Originated in Kurume, Fuku'oka Prefecture, Japan. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.316. Flower form resembles **Hagoromo.** A seedling of **Moshio.** Named and released by Kôichi Inoue in 1980. Chinese synonym 'Hongyuyi'.

Benihana. (Red Gorgeous Flower). *(C.reticulata hybrid). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.233 with colour photo; English translation p.163. Medium size, red, irregular semi-double. Flowers mid-season. Leaves elliptic, medium size, dull. Upright growth, dense branches. A cross between *C.reticulata* 'Crimson Robe' (**Dataohong**) and *C.sasanqua* **Crimson King.** Named and released by Kazuo Yoshikawa in 1996. From Osaka.

Benihassaku. (Red 'Hassaku'), *(C.japonica),* Wada, 1941, *Japanese Garden Treasures,* p.28: One of the forerunners of Autumn; single red, medium size flowers campanulate, very profuse blooming. Opens out to a flat form with 6-7 petals of irregular size. Slow, leafy grower. The name refers to the first day of the 8th month and indicates its early blooming. A sport of 'Shibori-hassaku'.

For colour photos and descriptions see: Yuyama, 1966, *Camellia Cultivars of Japan,* p.294; Satô, 1975, *Chûbu no Tsubaki,* p.4; Macoboy, 1981, *The Colour Dictionary of Camellias,* p.72. Seibundô Shinkôsha, 1979, *Senchinshû,* p.135 & P.246. Originated in Chûbu District, Japan. Abbreviation 'Hassaku'.

Benihata. (Red Flag), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.4: Large to very large size, deep crimson, cup-shaped single. Originated in the Tottori Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.232 with colour photo; English translation p.163. Flowers mid-season to late. Leaves elliptic, large, somewhat waved. Upright, vigorous growth. Raised by a private family, named and released by Nobuo Sasai in 1980.

Beni-hatsugama. (Red 'Hatsugama'). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.233 with colour photo; English translation p.163. Small, pale red, flat single Flowers early. Leaves narrowly elliptic, small, glossy, venation not clear. Upright growth, poor cold hardiness. A cross between **Kôgyoku** and *C.irrawadiensis.* Named and released by Kazuo Yoshikawa in 1995. From Osaka.

Beni-Hizen. (Red Camellia of Hizen) (*C.japonica*) from Nagasaki Pref., *Japan Camellia* No.78, August 2005: A cross between **Tama-no-ura** × **Iwane-shibori.** Peach red, semi-double, flat, tubular to split stamens. Blooming early to mid-season. Leaves elliptic, medium. Branches and tree upright. Fast growth. Originated by Kaoru Kusumoto.

Benihomare. (Red Glory), *(C.sinensis),* Creech, 1957, *Plant Exploration of Ornamentals in Southern Japan,* U.S. Dept. Agriculture, ARS, 34(1). An ornamental form of the tea plant at the National Tea Experimental Station, Kanoya, Shizu'oka Prefecture, Japan. Corruption of the name: 'Benji-Homare'.

Benihitoe-kingyoba-tsubaki. (Red Single Goldfish Leaf Camellia), *(C.japonica),* Seibundô Shinkôsha, 1979. *Senchinshû,* p.136, colour photo, p.246, description: Red, medium size, single camellia, evenly opening almost flat; stamens in central cylindrical column, 8-10 cm across. Mid-season to late flowering. Leaves, broad-elliptic with multiple apices (like the tail of a goldfish). Thick, recurved, wavy. Sometimes a small dorsal leaf is attached to one of the apices, when it is called **Ranchûba-tsubaki.** Vigorous, spreading growth. Originated in Saitama Prefecture, Japan.

Benihôshi. (Red Priest). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.234 with colour photo; English translation p.164. Small, deep red, sake cup-shaped single, tea whisk type stamen cylinder. Flowers mid-season. Leaves elliptic, medium size, flat. Upright growth. A cultivar at a private family. Named by Nagaharu Niwa in 1989. released by Gifu Camellia Club. From Gifu Prefecture.

Benihôshu. (Red Bud-centred). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.234 with colour photo; English translation p.164. Very large, deep red, formal double with many, thick petals, cylindrical to split stamens. Flowers mid-season to late. Leaves elliptic, large, curved outwards. Upright, vigorous growth. A natural seedling of unknown parentage. Originated by Takeo Koyama, named by Saneichi Koyama, released by the Kagawa Branch of the JCS. From Kagawa Prefecture.

Benihotaru. (Red Firefly). *(C.hybrid). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.234 with colour photo; English translation p.164. Medium size, deep red, peony, fragrant, profuse. Flowers early. Leaves elliptic, small. Spreading growth, weeping branches. A cross between *C.hiemalis* and *C.drupifera.* Named by Nihon Nôyaku Co., released by Kaoru Hagiya in 1980. From Niigata Prefecture.

Benihyûga. (Red Hyûga, ancient name for Miyazaki) *(C.japonica), Encyclopedia of Camellias in Colour,* vol.II, 1972, P1.371, p.152, colour photo, p.252, description; Seibundô Shinkôsha, 1979,

Senchinshû, p.136, colour photo, p.246, description: Deep red, rose form double with many rows of petals, opening to show a few scattered regressive stamens in the centre. Size of flower, 10-11 cm across x 7 cm deep. Flowers mid-season to late. Leaves, broad-ovate, curved, thick, lustrous dark green, apex acuminate, base round, coarsely serrate; upright, vigorous growth. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.317 for colour photo. The original tree is in Ohira Kiyotaki Machi. Miyazaki Prefecture, Japan, where other huge trees thrive.

Benijirimen. Different reading for **Benichirimen.**

Benijishi. (Red Lion), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in the anemone form section; Itô, Ko'emon, 1879, *Chinkashû:* Dark red. Medium sized, anemone form with vigorous, upright growth. Early to mid-season flowering. Leaves, dark green, oval, 7.5 cm x 4 cm, acuminate, finely serrate, reflexed, venation impressed. Plant bushy and side spreading. Originated in Japan. Different reading: 'Kôjishi'. For colour plates under this reading see: Tuyama, 1966, *Camellia Cultivars of Japan,* pl.129. Tuyama, 1968, *Camellia of Japan,* pl.255. *Encyclopedia of Camellias in Colour,* vol.II, 1972, pl.373. Seibundô Shinkôsha, 1979, *Senchinshû,* p.52. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.382. Except for the original reading by Kasuya, all later authors read this name as 'Kôjishi', and this is now generally accepted in Japan for this cultivar. Synonym: 'Pink Lion'. Corruption of name: 'Benigishi'. Resembles **Ôkarako.**

Beniji-wabisuke. (Red Ground variegated Wabisuke), (Wabisuke), Anonymous, ca.1874, *Tsubaki Hyakuro no Zu,* vol.3, No.27: Small, tubular red with occasional white streaks. Originated in Japan. See Kyôto Engei Kurabu, 1975, *Kyôto Engei* No.73.

Benijômanji. (Red Jôman Temple), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.135, colour photo, p.245, description: Red single of cupped shape, 7-9 petals, 8-10 cm across with a central column of stamens. Leaves, large, broad-elliptic, apex, long acuminate, flat, mid-green. Vigorous, erect, vigorous growth. Originated in Chûbu District, Japan. Named and released by Minoru Satô in 1977.

Benijuru. Wada, 1941, *Japanese Garden Treasures.* Orthographic error for **Benizuru.**

Benikagami. (Crimson Mirror), *(C.rusticana),* SCCS, 1972, *Camellia Nomenclature,* p.161: Crimson, medium peony form. Seibundô, Shinkôsha, 1979, *Senchinshû,* p.134, colour photo: Crimson. Medium size, open peony form, 10-11 cm across, about 25 petals, with stamens divided into fascicles, filaments dark yellow. Late season flowering. Leaves, medium size, light green, apex acuminate, base obtuse, finely serrate. Vigorous, bushy, spreading growth. Petioles hirsute. Originated in Naka-kanbara Sub-prefecture, Niigata Prefecture, Japan. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1970.

Beni-kagura. (Red 'Kagura'). *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.24; Vermilion, medium size double. An 80 year old tree in Kusano-machi.

Benikamo. (Red Duck), *(C.sasanqua),* Kajitsu-en, 1905, *Chabaika Meikan,* Vermilion red. Originated in Japan. (Believed extinct.)

Benikamo . (Red Kamo), *(C .japonica),* ICS., Apr. 1990, *Japanese Camellia Cultivar List,* p.4. No description. Originated in the Ôsaka Prefecture, Japan. 'Kamo' is the name of a river in Kyôto.

Benikanoko. (Red Fawn), *(C.japonica),* Itô, Kukyû, 1739, *Honzô Hanamakie,* vol.15; Watanabe, 1968, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.9, p.161 cites this as 'Beni-kanoko'. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Large, double. Red with large and small white spots. Originated in Japan. (Believed extinct.)

Beni-kantsubaki. Katz, 1947, *American Camellia Yearbook,* p.145. Synonym for **Shishigashira.**

Benikarako. (Red Anemone), *(C.japonica),* Itô, Ko'emon, 1879, *Chinkashû:* Vermilion red, medium to small size, anemone form. See colour photo, p.194, Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement;* Tuyama 1966, *Camellia Cultivars of Japan*, pl.38, p.72 as 'Jikkô'; *Encyclopedia of Camellias in Colour*, vol.I, 1972, pl.365 & p.346, and Seibundô Shinkôsha, 1979, *Senchinshû,* p.134: Five to seven large, outer guard petals, surrounding a tight, compact crown of petaloids with protruding pistil. The flower is 6-7 cm in diameter. Mid-season flowering. Leaves, dark green, Medium size, elliptic to long-elliptic, flat, apex acute; base obtuse, fine, sharp serrations. Vigorous, erect growth. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.359. In America, this cultivar name was erroneously applied to **Kumasaka.** It was also corruptly spelt: 'Beni-karoko', 'Beni-koraka', 'Beni-koroka', 'Beni-ko-roki', 'Benikoroko', 'Beni-koroku', 'Benikuruku', 'Beni-Karashi'. Different readings: Kôkarako'. Synonyms: 'Jikkô, in the Reikanji, Kyôto, 'Nikkô', 'Hibikari', 'Beni-bokuhan' in Chûbu area. Sports: **Bokuhan-nishiki**. **Kifukurin-benikarako** in Kasuya, 1859, *Tsubaki Irohanayose Irotusuki is* believed to be a sport of **Benikarako.** Originated in Kantô District, Japan.

Benikarako Variegated. SCCS, 1951, *The Camellia. Its Culture and Nomenclature* as 'Benikarako Var.'. Erroneously for **Kumasaka Variegated.**

Benikarashi. Duke of Devonshire, 1969, RHS, *The Rhodendron and Camellia Yearbook,* No,23, p.2 as "as imported from Japan." This would seem to be a corruption for **Benikarako.**

Benikasane. (Red Double). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.230 with colour photo; English translation p.161. Medium size, deep red, semi-double, cylindrical stamen column. Flowers early to mid-season. Leaves somewhat narrowly elliptic, somewhat medium size, flat, thick. Upright, vigorous growth. A natural seedling of **Benimyôrenji.** Named and released by Mamoru Naitô in 1997. From Aichi Prefecture.

Benikikugasane. Itô, Ihei, 1695, *Kadan Chikinshô:* Medium size, red formal double with many even, small petals. Different reading for **Kôkikugasane.**

Benikikukasane. Different reading for **Kôkikugasane.**

Beni-kikuzuki. (Red 'Kikuzuki'). *(C.japonica). Nippon Tsubaki - Sasanqua Meikan*, 1998, p.230 with colour photo; English translation p.161. Small, dark red, bellflower-shaped single, cylindrical stamen column. Flowers early to mid-season. Leaves elliptic, medium size, somewhat waved. Upright, vigorous growth. A cultivar of unknown parentage. Originated and released by Kimura Shikishima'en Nursery in 1985. From Hyôgo Prefecture.

Beni-Kingyo. J & F Thoby, Gaujacq, France, Catalogue, 2009, p.1. Described as a pink single, but this does not match the name – Beni in Japanese means red.

Benikirin. Different reading for **Kôkirin.** See Tuyama, 1966, *Camellia Cultivars of Japan,* p.58.

Benikirin (1). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Kôkirin.**

Benikirin (2). *(C.japonica),* Fendig, 1953, *American Camellia Catalogue;* SCCS, 1950, *The Camellia. Its Culture and Nomenclature,* as 'Benikirin': Light pink, heavily veined darker pink. Medium size, semi-double. Origin unknown.

Benikomachi. (Red 'Komachi'), *(C.japonica),* Inazawa Nurseries Co. Ltd Catalogue, 1988-1989, p.1, A-41: White centered flower of good shape. Originated in Japan.

Beni-koraka. Lindo Nursery Catalogue, 1948, p.6. Corruption of the Japanese name **Benikarako.**

Beni-korako. McIlhenny Catalogue, 1937. Corruption of the Japanese name **Benikarako.**

Beni-korako Variegated. McIlhenny Catalogue, 1945-1946. Erroneously for **Kumasaka Variegated.**

Beni-ko-roki. Vanderbilt, 1941, *Camellia Research, II.* Corruption of the Japanese name **Benikarako.**

Beni-koroko. Rhodellia Nursery Catalogue, ca., l945. Corruption of the Japanese name **Benikarako.**

Beni-koroku. Fruitland Nursery Catalogue, 1948-1949. Corruption of Japanese name **Benikarako.**

Benikosode. (Crimson Jacket), *(C.japonica),* Inazawa Nursery Catalogue, 1980-1981. No description. Originated in Japan.

Beni-kosode. (Red Sleeves) (*C.japonica*) from Ehime Pref., *Japan Camellia* No.63, August 2000: Dark red, petals relatively long, small, tubular to trumpet, blooms early to mid-season. Leaves with prominent veins. Tree vigorous, spreading growth. Seedling of unstated parentage, found and selected by Kimiko Fujiwara in 1989 at a private garden in Ônishi Town.

Benikosuzume. (Small Red Sparrow), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.II, 1972: Seibundô Shinkôsha, 1979, *Senchinshû*, p.134, Colour photo, p.245, description as 'Benikosusume': Small, single red of open trumpet shape, with 5 large, oval, slightly emarginate petals, surrounding a central cylinder of long stamens; 6-7 cm in diameter. Early to mid-season flowering. Cold resistant. Leaves, long-elliptical to elliptic, medium size, curved, keeled; apex acuminate; base acute; finely serrate. Plant growth habit, erect and vigorous. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.182. Originated with a private family in Kanazawa City, Ishikawa Prefecture, Japan. Named and released by Nishimura, Hisanaga in 1950.

Beni-kozuchi. (Small Red Mallet). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.231 with colour photo; English translation p.161. Miniature to small, deep red, tubular to trumpet shaped single, round petals, cylindrical stamen column. Flowers mid-season. Leaves elliptic, medium size. Somewhat spreading growth. Selected from wild japonicas growing in Okayama Prefecture. Coleected by Nobuo Sasai, released in 1997.

Benikujaku. (Red Peacock), *(C.japonica),* Craig, 1972, *American Camellia Yearbook,* p.57; Seibundô Shinkôsha, 1979, *Senchinshû*, p.245: Black red, petals up to 190, irregular peony form to rose form double. Medium size. Mid-season flowering. Leaves, medium size, wide-ovate, serrations inconspicuous, flat. Originated at a private family in Nishi-kanbara-gun, Niigata Prefecture, Japan. Collected by Susumu Ishizawa, named and released by Kaoru Hagiya in 1966. Corruption of name: 'Benikujara'.

Beni-kujaku (Kansai). (Red Peacock). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.230 with colour photo; English translation p.161. Medium size, deep red, semi-double, stamen cylinder somewhat disarranged, filaments reddish. Flowers mid-season. Leaves narrowly elliptic medium size. Upright, vigorous growth. A cross between **Kuro-tsubaki** and 'Kujaku-tsubaki' (**Hakuhan-kujaku**). Named and released by Kazuo Yoshikawa in 1980s. From Osaka.

Benikujaru. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.22. Corruption of the Japanese name **Benikujaku.**

Beni-kuruko. Fruitland Nursery Catalogue, 1944-1945. Corruption of Japanese name **Benikarako.**

Benikuruma. Different reading for **Beniguruma.**

Benimaru. (Red Circle), (*C.rusticana*), Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.8, p.14, description, p.15, black and white photo; Seibundô Shinkôsha, 1979, *Senchinshû*, p.246: Medium size, 8 cm across, red, open peony form double with large, waved and fluted petals,

scattered stamens, anthers dark yellow. Mid-season blooming. Leaves, long oval, acuminate, hirsute petiole and midrib, sharply serrate. Originated in Ugawa Mura, Kariwa Subprefecture, Niigata, Japan. Named and introduced by the Niigata University. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.234 with colour photo *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.234 with colour photo, English translation p.164.; Note – the correct photo for **Benimaru** is that shown with **Beni-miyakodori**.;

Benimaze. (Red Maze), *(C.rusticana),* Hagiya, Kaoru, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.8, p.14, description, p.15, black and white photo: Large, 10-13 cm across, crimson, open, irregular, double to open peony to rose form double with about 11 1arge, fluted and creped outer petals, surrounding a centre of a mixture of 20 small, twisted petals and about 100 stamens with light yellow filaments. Late flowering. See colour plate: Seibundô Shinkô, 1979, *Senchinshû,* p.136. Mid-season blooming. Leaves, yellowish green, broad obovate medium size. reflexed, channelled midrib, petioles slightly hairy. Plant growth habit, vigorous and spreading. Originated at Yahiko Mura, Nishi-kanbara-gun, Niigata Prefecture, Japan. Collected named and released by Susumu Ishizawa. See also colour plate Seibundô Shinkôsha, 1973, *Garden Life,* No.5.

Beni-miyakodori. (Red 'Miyakodori'), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.4: Large size, crimson to deep crimson, lotus form semi-double. Blooms mid-season. Originated in Shizuo'ka Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.234 with an incorrect colour photo (of **Benimaru**): English translation p.164. Leaves narrowly elliptic to ovate, medium size, margins somewhat outwardly curved. Upright growth. The original tree survives in Yaizu City. Named and released by Toshihiro Iketani in 1989.

Benimyôrenji. (Red 'Myôrenji'), (*C.japonica),* Yoshida, Shigekurô, 1933, *Tsubaki Meikan;* Wada, 1941, *Japanese Garden Treasures,* p.28; Tuyama, 1966, *Camellia Cultivars of Japan,* pl.109, p.184; *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.24 & p.294: Single, large, very broadly campanulate, fiery red with beautiful, spreading stamens in a ring form. Seibundô Shinkôsha, 1979, *Senchinshû,* p.136, colour photo, p.246, description: Five to seven large, creped outer petals, surrounding a central cylinder of 115-120 stamens, cup shaped. Very early flowering to mid-season, 7-10 cm across. Filaments pale yellowish green, anthers large, yellow. Leaves, medium size, dark green, thick, glossy, elliptic; apex long acuminate, tomentose. Plant growth habit, open and erect. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.166, colour photo. Sport **Shibori-myôrenji.** Similar to **Hanadaijin.** *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.234 with colour photo; English translation p.164. Appeared as 'Myôrenji' in an old Owari Banzuke. Renamed by Minoru Satô in 1968, on the occasion of the foundation of the Chûbu Camellia Society.

Beninagashi. (Red Streaks), *(C.japonica),* Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû,* p.51, No.1. No description. *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.334, p.340; Seibundô Shinkôsha, 1979, *Senchinshû,* p.135, colour photo, p.246, description: Semi-double form of white with occasional red streak, 11-13 cm across, petals wide and wavy. Stamen cluster sometimes broken by one or two small, erect petals; filaments white. Mid-season blooming. Leaves, dark green, large, elliptic to broad-ellipic; apex long acuminate; base obtuse, twisted. Plant growth habit, rather weak and spreading. Original tree in Tôdaiji Kaizandô, Nara City, Kansai District, Japan.

Beni-natsume. (Red Jujube), *(C.japonica),* ICS., Apr.1990. *Japanese Camellia Cultivar List,* p.4. No description. Originated in Aichi Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.323; English translation p.239. Small, vermilion, tubular single, thick petals. Flowers early to mid-season. Leaves elliptic, medium size. Upright, vigorous growth. Parentage unknown, named and released by Tôhei Takahashi in 1973.

Beni-no-ato. (Trace of Red), *(C.sasanqua),* Kajitsu-en, 1905, *Chabaika Meikan:* Large size, white with pale pink graduations. Originated in Japan. (Believed extinct.)

Beni-no-tsurugi. (Red Sword). *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.114. No details. From Kurume City, Japan.

Beni-oboro. (Hazy Rouge). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.229 with colour photo; English translation p.160. Medium size, pale red with a white border and red stripes, filaments slightly red. Flowers mid-season to late. Leaves elliptic, medium size. Spreading growth. A natural seedling found under a tree of **Hatsu-arashi.** Named by Itsuko Okabe, an essayist, released by Taneo Okada in 1979. From Osaka.

Beni-okesa. (Red Okesa), *(C.rusticana),* Izu-Ohshima Hawaii Botanic Gardens Catalogue, 1980, p.17 as 'Beniokesa'. No description. Ôoka Chinka-en Catalogue, 1980-1981: Red single, small size, tubular flower. A seedling of **Yoi-okesa.** "Okesa" is the name of a local dance in Niigata Prefecture. Originated in Japan.

Beni-osaraku. (Red 'Osaruku'), (Higo), Taniguchi, 1912, *Chinka Kyokan:* Rose pink single, Higo form, 6-8 petals, 7-9 cm across. Stamens long and slender, approximately 150 in a spreading cluster, colour light pink and white, pistils pale yellow. Mid-season flowering. Leaves medium size, ovate. See colour photo: Seibundô Shinkôsha, 1979, *Senchinshû,* p.134 & p.245, also *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.368 and vol.II, 1978, p.117, pl.268. Different reading: 'Kôchôraku'. Originated in Kumamoto Prefecture, Japan.

Beni-no-tsubasa. Synonym for **Benitsukasa.**

Beni-Otame. John Waterer Son & Crisp Ltd. Bagshot Nursery Catalogue, 1957-1958, p.10. Corruption of the Japanese name 'Beni-otome', different reading for **Hi-otome-sazanka.**

Beni-otome. Tokio Nursery Catalogue, 1896, p.13. Different reading for 'Kô-otome' synonym for **Hi-otome-sazanka.**

Beni-rannge. (Red Lotus). *(C.japonica), Japan Camellia* 99, May 2013, p.3 with colour photo, JCR Regn 2013-8, (ser. No.8); A seedling of **Tama-no-ura** x **Black Magic**, originated by Atsushi Itô. Double, loose peony to rose form with stamens interspersed with central petals. Petals cupped. Mid-season to late flowering.

Benirôgetsu. (Red Rôgetsu), (C.*japonica),* Yokoyama, et al., 1975, *Gendai Tsubaki Meikan,* p.208 black and white photo; colour photo. No.286, *Encyclopedia of Camellias in Colour,* vol.II, 1978, p.123, also Seibundô Shinkôsha, 1979, *Senchinshû,* p.136 & p.246: A reddish, single pink to white at petal base, 6-7 large, creped petals, opening evenly, reflexing with age, surrounding a central column of short stamens. The flower opens flat and is 10-11 cm across. Early flowering to midseason. Leaves, broad-elliptic, large, acuminate apex, base obtuse, finely serrate, reflexed, green with yellow variegation. Plant growth habit, vigorous and spreading. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.152, colour photo. Originated in Takarazuka-shi, Hyôgo Prefecture, Japan. Not related to **Rôgetsu** or **Shibori-rôgetsu.**

Beni-rokkaku. Tuyama, 1968, *Camellias of Japan,* No.183, p.143. Japanese reading of the original Chinese characters for **Hongliujiao.** (Red hexagonal).

Beniryômen. (Both sides, Red), *(C.japonica),* Shirai-Bunko, Higashimurayama, 1789, *Shoshiki Hanagatachô:* Red, double, large size, early flowering. Watanabe, 1964, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.5, p.81. No description. Originated in Japan. (Believed extinct.)

Benisakura. Tateyama, Nursery List, 1957: Different reading for **Benizakura.**

Benisankô. Different reading for **Kurenai-sankô.**

Benisarasa. (Red Chintz), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Deep red, double flower form in 3 to 4 petal rows with white speckles and moires. See JCS., 1969, *Tsubaki,* No.7, p.23. Originated in Japan. (Believed extinct.)

Benisashi. (Red Tinge), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchishû,* p.245: Vertical marks of pale, peach pink and dark, peach pink on a white ground. The flowers colour changes, one is white, another dark peach red; single, campanulate with cylindrical stamen column. Medium size flower. Mid-season to late flowering. Leaves, medium size, wide-oval; apex blunt acute. Plant habit wide spreading, slow growth. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.257, colour photo. A natural "Yabu-tsubaki" from Tabira-chô, Nagasaki Prefecture, Japan. Discoveredby Tokio Kozato in 1976, named and released by Zaiki Kajikawa.

Beni-sazanka. Settsu, Raikô-en Co., 1938-1940, *Descriptive Catalogue of Seeds, Plants and Bulbs.* Synonym for **Kanjirô.**

Beni-sazare. (Small Red Camellia). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.231 with colour photo; English translation p.162. Miniature, deep red, tubular to trumpet shaped single, slender long petals, cylindrical stamen column. Flowers early to mid-season. Leaves narrowly elliptic, small to medium, somewhat plicate. Upright growth. A cross between **Shiroyabu-tsubaki** (White Bush Camellia) and *C.ssp.rusticana* **Bandai**. Originated and released by Nobuo Sasai in 1985, released in 1997. From Okayama Prefecture.

Benisekitan. (Red Stone), *(C.japonica),* Angyô Nursery, 1955, *Shokubutsu Shunjû:* Large, snowy white. Originated in Japan.

Beni-shibori. (Red spotted white), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô;* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Red, single, medium size, with vermilion speckles and white edges; medium size, crimson single, opening flat. Originated in Japan. (Believed extinct.)

Beni-shibori. (Red Spotted White), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Double, red spotted white, opens wide. Originated in Japan. (Believed extinct.)

Benishidare-tsubaki. (Red Pendant Camellia), *(C.japonica),* Satô, 1975, *Chûbu no Tsubaki,* colour photo p.72; Seibundô Shinkôsha, 1979, *Senchinshû,* p.245: Large size, dark crimson colour, single, cup-shaped, 10 cm across; petals reflexed, medium size, rounded, 5-6 in number, crinkled edges; stamens, numerous, Higo-like. Blooms late season. Leaves, dark green, broad-elliptic with acuminate apex, branches pendant. Parentage unknown, originated and released by Toshiaki Kosaki, Inazawa-shi, Aichi Prefecture, Japan in 1973.

Benisi Baodi. Orthographic error for 'Bainisi Baodi'.

Beni-sodekakushi. Seibundô Shinkôsha, 1979, *Senchinshû,* p.233. Synonym for **Tôtenkô.**

Benisudare. (Red Bamboo Screen), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.419: Semi-double to open peony form; white, streaked and peppered carmine. Originated in Japan. (Believed exhnct.)

Benisugata. (Red Appearance), *(C.hybrid),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.184, description, p.185, colour photo: Small size, deep red, tubular single, with 5 irregular petals and a central stamen column with red filaments and bright yellow anthers. Blooms mid-season. Leaves small, flat, bright mid-green, elliptic, apices tapering acuminate, margins serrulate. Originated in the Okayama Prefecture, Japan. A seedling of **Brian.**

Benisumire. (Red Violet), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.200, colour photo, p.201, description: Small size, deep crimson, with a purplish cast, tubular to wide campanulate single, with 5 broad, overlapping, rounded, somewhat reflexed petals of uneven size, and a central stamen column with crimson filaments, joined for the lower half, and

yellow anthers. Blooms mid-season. Leaves small, narrow-elliptic, apices long-tapering acuminate, margins serrulate. Originated in the Toyama Prefecture, Japan. A seedling of **Tulip Time** x **Kon-wabisuke.**

Benisumire (Okayama). (Red Violet). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan*, 1998, p.231 with colour photo; English translation p.162. Small, purplish-red, tubular to trumpet-shaped single, thick and round petals, cylindrical stamen cluster. Flowers mid-season. Leaves narrowly elliptic, small to medium, somewhat flat. Upright growth. A natural seedling of **Kon-wabisuke.** Originated by Nobuo Sasai in 1984, released in 1997.

Benisuru. SCCS, 1958, *Camellia Nomenclature*, p.92. Different reading for **Benizuru.**

Beni-surusumi. (Red 'Surusumi'), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.145, colour photo and description: Large size, peach pink, single, with 6 broad, waved, overlapping petals, reflexed, emarginate and a large, central stamen cylinder with ivory filaments, joined for the lower third, and golden anthers. Blooms mid-season to very late. Leaves dark green, round-ovate, apices abrupt-acute. Originated in the Chûbu District, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.232 with colour photo; English translation p.161. A cross between **Surusumi** and **Ôshô**. Originated and released by Minoru Satô in 1972.

Benisuzume. (Red Sparrow), *(C.japonica),* Kasuya, Kamegorô.1859, *Tsubaki Irohanayose Irotsuki* in single flower section. Itô, Ko'emon, 1879, *Chinkashû:* Deep pink, small, single. Originated in Japan.

Benisuzume. (Red Sparrow), *(C.x vernalis),* Ashizawa, Yagorô, 1898, *Chabaika Taishû;* Wada, 1941, *Garden Treasures of Japan*, p.32: Hybrid with *C.japonica*, the habit and leaves showing its influence, the fragrance and detached segments showing the kinship to *C.sasanqua.* A small, 22 petalled flower. Red with white spots and stripes. Leaves dark green, 7.9 cm x 3.6 cm. Listed under "Winter flowering varieties of *C.sasanqua*". Synonyms: 'Yae-wabisuke', 'Chirihime'(Kansai). The original tree is at the Reiganji Temple in Kyoto.

Beni-suzume (Red Sparrow) (*C.japonica*) from Hachiôji, Tokyo. *Japan Camellia* No.82, February 2007: Vermilion, small, cup-shaped single, tubular stamens, blooming in March to April. Tree upright, branches slender, average growing. Leaves long elliptic, somewhat flat, medium. A crossing of **Muromachi-tsubaki** × **Fugen-yabu**. First flowered in 2006. Originated by Hiroshi Okado and named in 2006.

Benitaiheiraku. JCS, 1958, *Tsubaki* as 'Beni-taihei-raku'; Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangement,* p.64, colour photo, p.72, description: Flower, deep pink, 7-10 cm across, 68 petals; stamens, fully opened, blush colour. Leaves, large, broad-ovate. A seedling of **Yamato-nishiki.** Synonym for **Kuni-no-hikari.**

Benitakai. Fendig, 1953, *American Camellia Catalogue* as 'Beni-takai'. A corruption of the Japanese name **Beni-wabisuke.**

Benitanchô. (Red Head Crane), (Higo), Higo-tsubaki Aikokai, 1977: *Higo Tsubaki Meikan:* Crimson. A sport of **Tanchô.** Hayashi, Shigeyuki, et al., 1986, *Higo Rokka*, p.30: Crimson, 10 cm across, 7-8 petals with about 140 flared stamens. Originated in Japan.

Beni-tarô'an. (Red 'Tarô'an'). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.232 with colour photo; English translation p.162. Small, red, tubular to cup-shaped single, cylindrical stamen column. Flowers early to late. Leaves narrowly elliptic, medium size. Upright, fast growing. A mutation of **Tarô'an-nishiki.** Named and released by Minoru Satô in 1979. From Aichi Prefecture.

Beniteiji. Corruption for **Beni-chôji.**

Benitorinoko. (Red Chick), *(C.japonica),* Itô, Jukyû, 1739, *Honzô Hanamakie,* vol.15; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Flower, double, pale red, petals in three rows, rose-pink with red spots and stripes, lotus shape. Stamens, spread like a tea whisk. Sport of **Tori-no-ko.** Originated in Japan.

Beni-tsubaki. *(C.x williamsii).* Brian Mulligan, 1993, University of Washington Arboretum *Inventory*, p.24. No description. Originated in Japan. This is a common Japanese name, meaning 'red camellia'.

Benitsukasa. (Red Lord), (Higo), Watanabe, 1960. Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.1, p.51. No description. Originated in Japan.

Benitsukasa. (Red Lord), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.178, description, p.179, colour photo: Small size, deep red, tubular single with large, central column of stamens with yellow anthers. Blooms early to mid-season. Leaves deep, glossy green, ovate, apices acute, margins serrulate. Selected from wild camellias in Itsuki-mura, Kumamoto Prefecture, Japan. Named and released by Mikio Akashi in 1985.

Benitsukasa. (Red Lord), *(C.hiemalis),* ICS., Apr. 1990, *Japanese Camellia Cultivar List,* p.38: Medium size, red, double. Originated in Saitama Prefecture, Japan. See Hakoda, 1987, *Tsubaki*, No.26, p.48: Medium size, red, double. Different reading: 'Beni-no-tsukasa'.

Benitsuru. Fendig, 1953, *American Camellia Catalogue.* Different reading for **Benizuru.**

Beni-urushi. (Red Lacquer), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka.* p.230, colour photo and description as 'Beniurushi': Medium size, dark red, campanulate single, of 5 ovate petals of uneven size, and a central stamen column with red filaments, joined for the lower third, and golden anthers. Blooms mid-season to late. Leaves lightish green, elliptic,, apices acuminate, margins serrate. Originated in Tabira-chô, Nagasaki Prefecture, Japan. Resembles **Eiraku.**

Beni-wabisuke. (Red Wabisuke), (Wabisuke), Uesa, 1844, *Sômoku Benran;* Note: This describes it as Red, small, with white spots and seems to be a synonym for **Kochô-wabisuke.** Kasuya Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in section on early flowers, refers to the modern **Beni-wabisuke.** Itô, Ko'emon, 1879, *Chinkashû:* Rose red, small tubular single. Early to midseason flowering. For colour photo see: Tuyama, 1966, *Camellia Cultivars of Japan,* pl.224, p.394; *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.460, & p.361; Seibundô Shinkôsha, 1979, *Senchinshû,* p.136: Small column of retrogressive stamens. Leaves long-elliptic, medium to small, dark green, 8-10 cm long x 3-4 cm wide. Habit bushy and luxuriant. For colour photo, botanical drawing and description see: Kirino Shûhô, 'Wabisuke Group', 1982, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.11, p.35, 37, 39. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.160, colour photo. Synonym: 'Wabisuke Red'. Resembles **Kanzaki-aka-wabisuke.** Originated in Kantô District, Japan.

Beniwaraku. (Red 'Waraku'), *(C.rusticana),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.209, colour photo and description: Very small size, brilliant scarlet, campanulate single with 5 emarginate, reflexed petals and a short, central stamen column with red filaments and golden anthers. Blooms early to mid-season. Leaves ovate to lanceolate, mid-green, apices acuminate, margins sharply serrate, inclined to roll or twist. Originated in the Toyama Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.322; English translation p.239. Dwarf growth. A natural seedling of **Benisuzume**. Named and released by Minoru Takeuchi in 1980.

Beniyagura. (Red Tower), *(C.rusticana),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.362, description, p.363, colour photo: Large size, red, open peony form with 2 outer rows of irregular, crinkled petals and a centre of stamens mixed with a trumpet shaped erruption of erect, centre petals. Leaves deep green, elliptic, apices acuminate, margins shallowly serrulate.

Late blooming. Originated with a private family in the Toyama Prefecture, Japan. Named and released by Mitsuroku Makino around 1980.

Beniyakko. (Red Clown), *(C.rusticana), Encyclopedia of Camellias in Colour,* vol.I, 1972, p.47, pl.26 & p.295. Seibundô Shinkôsha, 1979, *Senchinshû,* p.136, colour photo, p.246 description: A wild variety collected in 1961 in the Mishima Subprefecture, Niigata Prefecture, Japan. A small size, 6-7 cm in diameter x 3.5 cm deep, single, red, of 5-6 petals, channelled and recurved at apex and forming a star. Stamens about 70, filaments yellow, pistil protruding. Leaves oval, medium size, apices abrupt-acute, pronounced venation, petioles hirsute. Late blooming. Originally published as 'Haru-no-yume' (Dreams of Spring), by Hagiya & Ishizawa in 1968, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.9, p.53; black and white picture "B". Name changed to **Beniyakko** as 'Haru-no-yume' already in use. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.161, colour photo.

Beniyuki. (Red Snow), *(C.japonica),* Tateyama Nursery Catalogue, 1957 as a variegated leaf camellia with medium, yellow spots on dark green. Flower, small, red single. Different reading 'Kôsetsu'. Originated in Tokyo, Japan.

Benizakura. (Red Cherry), *(C.japonica),* Tateyama Nursery List, 1957, Large size, single, red. Originated in Japan. Different reading: 'Beni-sakura'.

Benizakura. (Red Cherry), *(C.sasanqua),* Murayama, 1971, *Garden Life 12. Higo Sazanka Bunkashi;* Camellia Forest Catalogue, 1988, p.2: Medium size, rose red, single Higo sasanqua. ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.32 as 'Beni-zakura': Medium size, crimson, single. Originated in the Kumamoto Prefecture, Japan. Different reading: 'Benisakura'.

Benizakura. (Red Cherry) (Higo). *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.238 with colour photo; Large, pink, occasionally with white blotches, flat open single. Filaments pale yellow, ume-jin (apricot-type stamen ring). Flowers mid-season to late. Leaves elliptic. Spreading, vigorous growth. A cross of **Osaruku** x **Hatsuwarai** made by Tomoya Nishimura, Kumamoto Pref., Japan. Recognised by the Higo Society in 1999

Benizome. (Dyed Red), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.195, colour photo and description: Medium size, deep red, cup-shaped single of 7 petals, rounded and overlapping, and a central stamen column with pinkish filaments, joined for the lower half, and bright yellow anthers. Blooms mid-season to late. Leaves bright mid-green, elliptic to broad-elliptic, apices blunt-acute, margins serrate, pronounced venation. Originated in the Chûbu District, Japan. Parentage unknown, named and released by Minoru Satô in 1987.

Benizuru. (Red Crane), *(C.sasanqua),* Kajitsu-en, 1905, *Chabaika Meikan,* Wada, 1941, *Japanese Garden Treasures,* p.31 as 'Beni-juru': Red, Medium size, single. Very early flowering. *Encyclopedia of Camellia in Colour,* vol.I, 1972, p.213, pl.530 & p.386: Medium sized, bright pink, single, 8 cm across, early flowering, 5-7 long, narrow, obovate petals with edges reflexed; stamens pale yellow in a spreading cluster. Leaves lustrous, dark green, long and slender, 5-6 cm long x 2-3 cm wide. Similar to **Asahizuru.** Different reading: 'Benitsuru'. Synonym: 'Pink Crane'. Corruptions of the Japanese names: 'Beni-juru', 'Beni-zuru'. Originated in Japan.

Benjamin. J & F Thoby, Gaujacq, France, Catalogue, 2009, p.1; Red semi-double.

Benjamin IV. ACS., Feb.1989, *The Camellia Journal,* vol.44, No.l, p.12, erroneously for **Benjamin Thompson IV.**

Benjamin Thompson IV. *(C.japonica),* ACS., Feb.1989, *The Camellia Journal,* vol.44, No.1, p.12, Reg. No.2102 as 'Benjamin IV': Medium size, rose coloured, semi-double *C.japonica* chance seedling. Blooms mid-season to late. Originated by Johnny Aldrich, Brooklet, Georgia, USA.

American Camellia Yearbook, 1989, p.118: 15 year old seedling first bloomed 1978; size 10cm across x 3.8 cm deep with 21 petals, 7 petaloids, gold anthers and yellow filaments.

Benji-Homare. Ghisleni, Pier Luigi, 1982, *Le Camelie,* p.188. Corruption of the Japanese name **Benihomare.**

Benjo. *(C.japonica),* Gentry, 1979, ACS, *The Camellia Journal,* vol.34, No.4, p.21. No description. SCCS, 1981, *Camellia Nomenclature,* p.24: Deep salmon red, veined darker. Medium size, loose, peony form to semi-double. Medium, compact growth. Blooms early to late season. Originated by D.W. Townsend, Brookhaven, Mississippi, USA.

Benjy. *(C.japonica), American Camellia Yearbook,* 1959, p.269, Reg. No.393: A chance seedling originated by Mrs Harriet K. Edwards, South Carolina, USA that first flowered 1955. Plant growth is upright and average density and rate of growth, with dark green leaves. The dark red flowers (Nickerson chart 2.R 9/3-2.5R 5/12) are 11-12.5 cm across and 4-5 cm deep with 25 petals and 15 petaloids. Flowers mid-season.

Benkei. (Name of a Warrior), *(C.japonica),* Kaempfer, 1712, *Amoenitatum Exoticarum* as 'Benke'. No description. Originated in Japan. (Believed extinct.) See JCS., 1989, *Tsubaki,* No.28, p.8.

Benkei. (Name of a Warrior), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.158, p.88; Seibundô Shinkôsha, 1979, *Senchinshû,* p.137, colour photo, p.246, description: Light red with 2-3 rows of large, rounded, exterior petals, slightly channelled, with a centre of a few, small petals, petaloids and rare stamens, 11-13 cm across. Early flowering. Leaves large sized, elliptic; apex long acuminate, reflexed. Plant habit, vigorous, erect, bushy growth. see p.314, 315, Yokoyama & Kirino, *1989, Nihon no Chinka.* Synonym: 'Oniwari'. Resembles: **Konpira-benkei** in Kagawa Prefecture. Originated in Kansai, Japan. Released by Kanaoka Chinju'en Nursery. The modern **Benkei** is not the same as Kaempfers of 1712, having originated as late as 1967 when listed in Kanaoka Chinka-en, *Tsubaki no Shiori,* No.2. It was also listed as 'Oniwarai' in Tuyama, *Nihon no Tsubaki,* 1968.

Benten. (Goddess of Learning and Wealth), *(C.rusticana),* Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai:* Light crimson red, small size, wide open trumpet form single, with wide petals, reflexed; deformed and variegated leaves. Synonyms: 'Kifukurin-benten' and 'Benten-tsubaki'. Originated in Japan.

Benten. (Goddess of Learning and Wealth), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* White margined flower, early flowering. Originated in Japan. (Believed extinct.)

Benten. Itô Ko'emon, 1879, *Chinka-shu.* Synonym for **Benten-tsubaki.**

Benten (Hertrich). *(C.japonica),* Hertrich, 1955, *Camellias in Huntington Gardens,* p.40, 41, black and white photo as 'Benten': Flower, single, Currant Red, 821/2 and /3 with darker veins, 8 cm broad by 6.5 cm deep. Petals in 5 segments united at the base, erect in a cup-shape; broadly ovate, 6.5 cm by 4.5 cm; outer segments reflexed on full opening; epically notched. Stamens: cylindrical column with creamy white filaments, fused to petal base; light golden anthers. Midseason flowering. Leaves: ovate, base rounded, 9-10 cm long by 5-6 cm wide; apex long pointed; serrations shallow and broad. The origin of this Huntington Gardens 'Benten' is not known but it is not the true **Benten** as it has plain green leaves while the true **Benten** has genetically variegated leaves.

Benten Portuense. *(C.japonica),* Jutta Fischer, 1994, "Success with Camellias", colour plate, p.6. A dark red form of **Benten** with similar variegated and distorted foliage, 5 petals with larger emarginated, single deep red with columnar yellow stamen cluster and protruding style. Thought to have originated in Portugal, possibly as a seedling of **Benten.**

Benten-ichiraku. ('Ichiraku' with Benten foliage) *(C.rusticana), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.214 with colour photo; Miniature white single, sake cup-shaped. Flowers mid-season to late. Leaves small, elliptic, dark green with lighter green patches and yellowish margins. A sport of **Ichiraku,** released in 1997.

Benten-kagoshima. (Benten from Kagoshima), *(C.japonica),* Inazawa Nurseries Co. Ltd, Catalogue 1988-1989, p.1, A-35: Medium size, double, red with white spots. Blooms mid-season. Originated in Japan.

Benten-kagura. (Benten-leaf 'Daikagura'), *(C.japonica),* Minagawa Nursery Catalogue, 1949; Satomi, 1956, *Camellia Varieties of Japan,* p.5; Tuyama, 1966, *Camellia Cultivars of Japan,* p.64, pl.33; *Encyclopedia of Camellias in Colour,* vol.l, 1972, pl.448 & p.359: Red mottled white. Large, double peony form. Early to mid-season flowering. Foliage variegated. See Seibundô Shinkôsha, 1979, *Senchinshû,* p.137 & p.245, coloured photo. Originated in Japan as a genetically foliage variegated sport of **Benidaikagura.** It has irregularly shaped green leaves, finely bordered yellow. Different reading: 'Benten Kagura'. Synonym: 'Shichifukujin-benten'. Chinese synonym 'Biantian Shenle'.

Benten Kagura. SCCS, 1958, *Camellia Nomenclature,* p.19. Different reading for **Benten-kagura.**

Benten-kumagai. (Variegated Leaf 'Kumagai'), *(C.japonica),* Yokoyama, 1975, *Gendai Tsubaki, Meikan,* p.209, black and white photo: Single, deep red, large size with about 200 stamens, spreading in the Higo form. Leaves, irregular in shape, variegated. No serrations. A genetically variegated leaf form of **Chûbu-kumagai.** Originated in the Chûbu area, Japan.

Benten-rogetsu. (Variegated Leaf Rogetsu'), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.4: **Rogetsu** with variegated leaves. Originated in Ishikawa Prefecture, Japan.

Benten-sazanka. (Benten-leafed Sasanqua). *(C.sasanqua). Kurume Camellia*, 1997, English translation, p.56. Small, peach pink single. Foliage variegated with yellow. Flowers early. Originated in Japan.

Benten-seiôbo. (Variegated Leaf Seiôbo), *(C.japonica),* Inazawa Nurseries Co. Ltd Catalogue,1986-1987, p.2, A-104, description and colour photo: Red graduations on a pale peach pink ground. Single, tubular blossoms, medium size with leaves having an ornamental border of yellow. Early flowering. Originated in Japan.

Benten-shiratama. (Benten's White Jewel), *(C.japonica),* Yokohama, 1975, *Gendai Tsubaki Meikan,* p.210, black and white photo and description; Seibundô Shinkôsha, 1979, *Senchinshû,* p.137, colour photo, p.246, description: A small, 6-7 cm wide, white single, bell-shaped, 7 petals; central stamens in a column, early flowering. Leaves, broad-elliptic, medium size, acuminate apex, yellow variegation of margins; no serrations. Plant habit, vigorous, bushy growth. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.51, colour photo. Originated in Kantô District, Japan by Takahashi, Keizô. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.236 with colour photo; English translation p.165. A mutation of **Meigetsu.**

Benten-shiro. (White 'Benten'). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.236 with colour photo; English translation p.165. Small, white, tubular single, cylindrical stamen column. Flowers early to late. Leaves elliptic, medium size, clearly bordered in white-green. Upright, vigorous growth. A mutation of **Nukifude.** Discovered and released by Minoru Satô in 1995. From Aichi Prefecture.

Benten-surusumi. (Variegated 'Surusumi'), *(C.japonica),* Ohoka, Chinkaen, 1983, Catalogue: White, large single flower. A sport of **Surusumi.** Leaves with yellow margins. Originated in Japan by Kamiyama, Jirô.

Benten-tsubaki. (Goddess Camellia), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in variegated leaves section. Itô, 1879, *Chinkashû:* A small, single rose-red flower. Foliage variegated with yellow; leaves deformed along the edge with no serrations. Mid-season blooming. This camellia has generally been known as "Benten" and exported as such by the Chûgai Nurseries from 1934 and on. However it had been imported into England much earlier and was listed by Veitch in 1864 as 'Japonica Variegata'. Synonyms: 'Japonica Variegata', 'Japonica Folius Variegata', 'Angel'. 'Kifukurin-benten' and Tafuku-benten' have erroneously been used as synonyms, but the *Chinkashû* lists both as separate cultivars. Corruption of the Japanese name: 'Benton'. The name 'Benten' was taken from the *Benten Shiranami Kozô*, the name of the character in the popular, ancient story of that name. "Benten Shiranami Kozô" means "White waved young boy". This white wave implies white margined leaves. Thus all camellias which include 'Benten' in their varietal names will be found to have variegated leaves. Originated in Japan.

Benton. Steffek, 1949, *Plant Buyer's Guide,* ed.5, p.47. Corruption of the Japanese name **Benten.**

Benton's Red. *(C.japonica),* SCCS, 1964, *Camellia Nomenclature,* p.23: Carmine red. Large single. Medium, bushy growth. Early to late flowering. Originated by Sumter, South Carolina, USA.

Bento de Amorim. *(C.japonica),* Alfredo Moreira da Silva Catalogue, No.103, 1968-1969, p.27: Large size, vermilion semi-double. Photo on cover back page of da Silva Catalogue No.107, 1972-73. Originated in Portugal. *La Camelia .....Diputación Provincial de Pontevedra*, 2004, p.103 with colour photo, Register No.6; 12 cm diameter, RHSCC 51A at centre to 53C at edges, and darker veins. About 30 petals and some white filaments with yellow anthers. Leaves dark green, elliptic with acuminate apice. Orthographic error 'Bento de Amorin'.

Bent-Myorentji. Fendig, 1953, *American Camellia Catalogue.* Corruption of Japanese name **Benimyôrenji.**

Benvenuto Cellini. *(C.japonica),* Gelli & Figlia Catalogue, 1871-1872: Very large, well imbricated flower, carmine red streaked with white on the petals. Orthographic error: 'Benvenutto Cellini'. Originated in Italy by Franchetti, Florence.

Benvenutto Cellini. Linden Catalogue, 1880, p.97. Orthographic error for **Benvenuto Cellini.**

Benzaiten. (God of Wealth), *(C.japonica),* Inazawa Nurseries Co., Catalogue, 1980-1981, No.C.48, p.12: A small single, pale crimson. Prolific and early flowering. Leaves elliptic, flat, coarse serrations. Benzaiten is another name for "Benten" as god of wealth. Selected from wild japonicas in Yu-no-tsu, San'in District, Japan. Collected and named by Minoru Satô in 1977.

Beppu. (Place Name), (Higo), Izu-Ohshima Hawaii Botanic Gardens Catalogue, 1980, p.16. No description. Originated in Japan.

Beregama. Vanderbilt, 1940, *Camellia Research*, p.2. Orthographic error for **Bergama.**

Bérènice. *(C.japonica),* van Houtte, 1841, Catalogue, 7:2. No description. Berlèse, 1845 *Monographie*, ed.3, p.151; Verschaffelt, 1849, *Nouvelle Iconographie,* Book VI, pl.IV: Flower, 9-10 cm across, with petals oblong, rounded, slightly emarginate, are a bright pink, often streaked with a lighter pink in the middle; while towards the circumference they are a more delicate pink, often striped with white and veined a deeper hue. Originated by Mariani, Italy.

Berenice Beauty. *(C.japonica),* Nuccio's Nurseries Catalogue, 1965: Pale pink with deeper pink towards the margin. Medium to large size, loose, peony form double. Vigorous, upright growth. Early to mid-season flowering. See colour photo No.10, p.25, *Encyclopedia of Camellias in Colour,* vol.II, 1978. Orthographic error: 'Berenice Beautiful', 'Bernice Beauty'. Originated by Nuccio's Nurseries, Altadena, California, USA.

Berenice Beautiful. *Carolina Camellias,* 1981. Orthographic error for **Berenice Beauty.**

Berenice Boddy. *(C.japonica),* SCCS, 1947, *The Camellia. Its Culture and Nomenclature:* Light pink with deeper pink under the petals. Medium large semi-double, about 8 cm across with 5 upright petals in the centre forming a cup around delicate white filaments. Leaves, dark green, lanceolate, base round, somewhat leathery. Plant habit, vigorous, rapid, erect and spreading. Originated at the Rancho del Descanso and developed by Jones, Sierra Madre, California, USA. Named for Mrs Manchester Boddy, wife of the publisher of the Los Angeles Daily News. U.S. Plant Patent No.605. (Fendig, 1953). Orthographic errors: 'Bernice Boddy', 'Bernice Bodley'. Sports: **Kathryn Hall, Berenice Boddy Variegated.** For colour photo see: Pl. No.11, p.25, *Encyclopedia of Camellias in Colour,* vol.II, 1978. Chinese synonym: 'Bonisi Baodi', formerly 'Bainisi Baodi' and 'Benisi Baodi'.

Berenice Boddy Variegated. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.1 as 'Berenice Boddy Var.': A virus variegated form of **Berenice Boddy** - Light pink, blotched white. Originated in USA.

Berenice Perfection. *(C.japonica),* Nuccio's Nurseries Catalogue, 1965: Pale pink with deeper pink margins. Medium size, formal double. Vigorous, columnar, upright growth. Mid-season blooming. Originated at Nuccio's Nurseries, Altadena, California, USA. See colour photo, pl.

Berg's Baby Formal. *(C.japonica), New Zealand Camellia Bulletin,* vol.XIV, No.5, 1986, p.10, Reg. No.235: Originated by Mrs I. Berg, Whakatane, New Zealand as a chance seedling of **Waiwhetu Beauty**. It was 7 years old when it first bloomed in 1982. A slow grower with an open, spreading habit and dark green leaves, 8.5 cm x 3 cm. The miniature, formal double flower, 4-4.5 cm x 2.5 cm, is white with pink stripes. The petals are pointed and it is late flowering.

Berg's Flame. *(C.reticulata* hybrid), *New Zealand Camellia Bulletin,* vol.XIII, No.2, April-June, 1983, p.11, Reg. No.188: A seedling originated by Mrs Ida Berg, Whakatane, New Zealand. The female parent is an un-named seedling from *C.saluenensis x C.reticulata* 'Crimson Robe', (**Dataohong**). The male parent is *C.japonica* **Mahogany Glow.** First flowered 1979. Habit upright with a medium growth rate. The dark green leaves average 10 cm x 7.5 cm. The very large, single flowers have 7 crinkled petals and are up to 15 cm across, flame red with rose coloured stamens. Opens fairly flat. Flowers early.

Bernadette. *(C.japonica), American Camellia Yearbook,* 1988, p.187, Reg. No.2087, with colour photo facing p.186: A very large size, pink, peony form, *C.japonica* chance seedling that blooms mid-season to late. Originated by Albert V. Ewan, Charleston, South Carolina, USA. The 5 year old seedling first bloomed 1983. Average flower size, 13 cm across with 44 petals and yellow anthers. Plant growth is upright, open and medium with dark green leaves, 10 cm x 5.5cm.

Bernadette Karsten. *(C. reticulata x C .japonica),* Dekker, 1969, *American Camellia Yearbook,* p.99 *:* The raiser, Frank Maitland, renamed his hybrid 'Two Ton Tony' for the wife of the Danish Ambassador to Colombia. It is a light pink, large semi-double, 15-17.5 cm across and up to 12 cm deep. A *C.reticulata x C.japonica* hybrid which blooms mid-season to late. Synonym: 'Two Ton Tony'. Originated by F. Maitland, California, USA. Sport: **Bernadette Karsten Variegated.**

Bernadette Karsten Variegated. *(C.reticulata x C.japonica),* Gentry, 1969, ACS, *The Camellia Journal,* vol.24, No.4, inside back cover as 'Bernadette Karsten V.' A virus variegated form of **Bernadette Karsten** - Light pink, blotched white. Originated in USA.

Bernadine. *(C.x williamsii),* RHS, 1980-1981, *Rhododendrons with Magnolias and Camellias,* p.71; Wisley Trials 1980. Raised by K.M. White, Axminster, Devon, England. Plant, vigorous, compact and erect habit; free flowering. Leaves 7 cm x 3 cm, dark, glossy green. Flowers, 10 cm across, semidouble with 24 petaloids and numerous stamens, a very pale shade of Red-Purple Group 61D, becoming much paler towards margins, with a fine veining of deeper colour. Mid-season to late flowering. Originated in England.

Bessie McArthur. *(C.japonica),* Gerbing's Azalea Gardens Catalogue, 1938-1939: One of our hybrids. A large, semi-double, deep, clear pink with 3-4 rows of very large petals, prominent stamens with small petaloids intermixed, 12.5 cm across. Low, bushy grower with large, glossy, long foliage. A seedling of unknown parentage raised by G.G. Gerbing, Fernandina, Florida, USA. See illustrations in G.G. Gerbing's 1945 *Camellias,* p.27 and *American Camellia Yearbook,* 1950 facing p.26. Orthographic variant: 'Bessie Macarthur', 'Bessie MacArthur.

Bessie Morse Bellingrath. Semmes Nursery Cataogue, 1945-1946. Synonym for **Toki-no-hagasane.**

Bessie Perdue Weaver. *(C.japonica), American Camellia Yearbook,* 1954, p.303, Reg. No.165: A 16 year old seedling of **Lady Saumerez** and an unknown pollen parent, originated by A.C. Weaver, Brewton, Alabama, USA. First flowered 1943. Plant growth average and compact. Flower buds, long and green. The semi-double flowers are similar to 'Donckelaeri' (**Masayoshi**); colour rose-pink, 9-11 cm across with 30-40 petals. Flowers mid-season.

Bessie Shearouse. *(C.japonica), American Camellia Yearbook,* 1968, p.129, Reg. No.994: A 10 year old chance seedling that first flowered 1968; originated by George B. Shearouse, Jr., Georgia, USA. Plant growth is upright, dense and rapid with dark green, heavily veined leaves, averaging 11 cm long by 7.5 cm wide. The semi-double flower is 15 cm across and 6 cm deep with 49 petals. Light rose-pink colour with yellow stamens. It has 34 even petals and 15 creped petals, erect in the centre; 9 sets of stamens, each of 15. Blooms mid-season. Orthographic error: 'Betsy Shearhouse'.

Bessie Staring. *(C.japonica), American Camellia Yearbook,* 1954, p.303, Reg. No.167: A 9 year old chance seedling, originated by Mrs Sydney Staring, Louisiana, USA. First flowered 1952. Plant growth, average, pendulous and rapid with olive green leaves, 11cm long by 6cm deep with even serrations and acute apices. Flower buds, round and pink similar to **Beau Harp;** pink with 24 heart-shaped petals; 13 outer followed by stamens, then a row of large petaloids mixed with stamens to form a star. Early to mid-season flowering.

Best Wishes. (*C.pitardii* hybrid). *New Zealand Camellia Bulletin,* March 2004, Issue No.147, vol.XXIII, No.5, p.9, Reg. No.460. Registered by N. Haydon, Takanini, New Zealand. A chance seedling from *C.pitardii* var. *pitardii* which first flowered in 1996. The flower is 7 cm diameter x 3.5 cm deep, rose form double to peony, with 50-55 petals and 3-7 petaloids. The stamens have

gold anthers on pale lemon filaments. The flower colour shades from pale pink (RHS.CC.62C) in the main body of the flower through to almost white in the centre, while the broad and very ruffled petals are tipped with a darker pink (RHS.CC.68A). The plant is of average height, dense structure and slow to medium growth rate with light green leaves 5.5 cm long x 2.5 cm wide. Flowers mid-season to late. The overall effect is of a Victorian petticoat. Champion seedling NZ National Show 2001.

Bett's Supreme. *(C.hybrid), New Zealand Camellia Bulletin,* 1986, vol.XIV, No.8, P.13, Reg. No.243: A chance seedling with hybrid characteristics, originated by P.A. Betts, Te Awamutu, New Zealand. It is over 20 years old and tends to spread with average growth and dark green, sharply serrate leaves, 8 cm x 4.5 cm. Flowers are widely opening, semi-doubles of 14-18 petals and a centre of stamens with white filaments and yellow anthers. Its size varies from 12-15 cm across and 5-6 cm deep. They open with a pale coloured centre and deepen to an even, soft pink. Flowers early to late. RHS colour chart Red Group 54C. Chinese synonym: 'Chaoji Bidisi'.

Betty. Doty & Doerner Nursery Catalogue, ca. 1950, p.2. Synonym for **Akebono Pink** as 'Akebono'.

Betty Anne. *(C.hybrid). Camellias,* Y.C. Shen, 2009, p.26 with colour photo; Pink peony flower, medium to large size. Compact growth. Originated by Boskoop Nursery, South Africa.

Betty Arnott. *(C.japonica),* ACRS, 1962, *Camellia News,* No.9, p.27: Originated by Mr. G.S Arnott, Victoria, Australia. Seed parent 'Magnoliiflora', (**Hagoromo**) and pollen parent **Spencer's Pink.** The 6 year old plant first flowered 1961. An early bloomer with a white, single flower of 8-9 petals, 10 cm across. Growth habit, pendulous with medium vigor. Leaves 10 cm x 5 cm, acute apex with medium serrations.

Betty Berwick. *(C.japonica),* ACRS, 1978, *Camellia News,* No.70, p.16, Reg. No.212: Originated by Mrs Betty Berwick, Caringbah, NSW., Australia. Seed parent **Great Eastern,** pollen parent unknown. The upright, dense, vigorous plant flowers mid-season. The dark green, shiny, broad ovate leaves vary from 9.5-14 cm long x 9.5 cm wide with acuminate apex, rounded base and medium serrations.

Betty Blond Superlative. Cannon, 1970, ACS, The Camellia Journal, Orthographic error for **Blond Betty Superlative.**

Betty Boardman. *(C.japonica),* Fruitland Nursery Catalogue, 1945-1946, p.27: A large, deep pink, semi-double, 9-10 cm across, resembling 'Donckelaeri' (**Masayoshi**). Filaments white with a pink base and golden anthers; buds long and narrow. Leaves, light green, glossy, broad-ovate, 9.5 cm x 5.5 cm, long prominent apex, veins pronounced, serrations shallow. A bushy, compact, vigorous grower. Originated by Alonza P. Boardman, Georgia, USA from a seedling of unknown parents. Not to be confused with the cultivar **Elizabeth Boardman.** Sport **Betty Boardman Variegated.**

Betty Boardman Variegated: *(C.japonica),* Fruitland Nursery Cataolgue, 1947-1948, p.30: A virus variegated form of **Betty Boardman** - Deep pink, blotched white. For black and white photo see p.42, Hertrich, 1955, Camellias in the Huntington Gardens, vol.2. Originated in the USA.

Betty Boswell. *(C.hybrid). New Zealand Camellia Bulletin*, July 2006, No.154, p.14, Reg. No. 473. Registered by J.R. Finlay, Whangarei, New Zealand. A cross of *C.japonica* **Tama-no-ura** x *C.henryana*. First flowered 2001. Plant growth is upright, of average density and growth rate, with light green leaves 7 cm long x 3 cm wide. Flower is 10 cm across x 3 cm deep, of peony form, strongly bi-coloured with the main body of the petals and petaloids red (RHS.CC. 61D) and the edges white, with the shift in colour being quite abrupt. Veining is pronounced. There

are about 10 petals and 50 mixed petaloids and anthers, the anthers yellow and the filaments pink. Flowers early to mid-season.

Betty Brinson. *(C.japonica),* Mark S. Cannon, Scion Catalogue, 1962, p.1. No description. Orthographic variant: 'Bettie Brinson'. Originated in USA. No valid listing located.

Betty Bryant. *(C.japonica),* Hillcrest Nursery Catalogue, 1958. No description. Originated in USA.

Betty Burgess. *(C.japonica), American Camellia Yearbook,* 1966, p.84, Reg. No.882: A semi-double, chance seedling that first bloomed 1961 at the age of 15 years. Originated by Robert V. Burgess, Georgia, USA. Its colour is blush with cherry-red stripes and bright yellow stamens. Size 14.5 cm across and 7.5 cm deep. It has 16 petals and 16 erect rabbit ears, interspersed with 10 groups of stamens. Blooms mid-season.

Betty by George. *(C.japonica), American Camellia Yearbook*, 1983, p.156, Reg. No.1866: A large, blush pink, almost transparent, peony form *C.japonica* mutant of **Betty Sheffield**, early to mid-season flowering; originated by George R. Clegg, Florida, USA. Average flower size is 11 cm across by 6 cm deep, with 32 petals, golden anthers and light yellow filaments. The blooms have very few darker pink marks. Plant habit and leaf form the same as the parent.

Betty Chiffon. Gentry, 1971, ACS, *The Camellia Journal,* vol.26, No.4. Abbreviation for **Betty Pink Chiffon.**

Betty Cromley. *(C.japonica),* ACS., Feb.1989, *The Camellia Journal,* vol.44, No.1, p.12, Reg. No.2114: Large size, deep, salmon red, semi-double to peony form *C.japonica* chance seedling that blooms mid-season to late. Originated by Johnny Aldrich, Brookley, Georgia, USA. *American Camellia Yearbook,* 1989, p.118: A 15 year old seedling that first bloomed 1977. Average flower size, 10 cm across x 5 cm deep with 22 petals, 4 petaloids, yellow anthers and white filaments. Plant growth is upright and medium with dark green leaves, 10.5 cm long x 5 cm wide.

Betty Cuthbert. *(C.japonica),* Outteridge, 1962, *1000 Named Camellias in Australia,* p.6: Pink, informal double, large size. Mid-season flowering. ACRS, 1964, *Camellia News,* No.16, p.28 with illustration on back cover. A seedling of 'Yoibijin', originated by E.G. Waterhouse, Gordon, N.S.W., Australia. First bloomed 1960. The flower, an incomplete, informal double, sometimes opens as a formal double, 10 cm across with 20-30 petals and some petaloids. Colour Neyron Rose HCC.623/3. Medium sized, spreading growth with large, broad, dark green leaves. Named for Betty Cuthbert, the Australian gold medal sprinter at the Melbourne Olympic Games.

Betty Dream. Charmwood Nursery 1964, ACS, *The Camellia Journal,* vol.19, No.4, p.33. Abbreviation for **Betty Sheffield Dream.**

Betty Drews. *(C.japonica), American Camellia Yearbook,* 1982, p.170, Reg. No.1798: A miniature to small, creamy pink, formal double *C.japonica* chance seedling; originated by Rupert E. Drews, South Carolina, USA. The 10 year old seedling first bloomed 1978. Average flower size 6 cm across x 3 cm deep with 50 petals. Outer petals form a cup, inner petals form a rose. Plant growth is upright and rapid with dark green leaves, 8.5 cm x 4 cm wide.

Betty Fleming. Steffek, 1949, *Plant Buyer's Guide,* ed.5, p.47. Orthographic variant for **Elizabeth Fleming.**

Betty Foy Sanders. *(C.japonica),* Gerbing Camellia Nursery Catalogue, 1965; *American Camellia Yearbook,* 1967, p.223, Reg. No.931: A 12 year old chance seedling that first broomed 1959; originated by Fred H. Smith, Georgia, USA. Plant growth, average, medium with dark green leaves, 6 cm long by 3 cm wide, twisted and waved. The semi-double flower has 6 petals in each of 4-5 rows, 11 cm across by 8.5 cm deep. It has 24 petals with occasional petaloids. Its

colour is white with short, radially elongated red splotches. Anthers yellow, filaments white. Blooms mid-season. Named for the wife of the Governor of Georgia of the time. Chinese synonym 'Hongrong Beidi'.

Betty Gabriel. *(C.japonica), American Camellia Yearbook,* 1977, p.208, Reg. No.1448: A large, white semidouble *C.japonica,* 18 year old chance seedling, first bloomed 1972; originated by Dr, Herbert F. Gabriel, California, USA. The bloom has 13-16 petals, average size, 11 cm across and 4 cm deep. Crinkled, cupped petals, the cupped form displaying distinct, vertical layering. Mid-season blooming. Plant growth, upright, dense, rapid with dark green leaves, 13.5 cm long by 8.5 cm wide. For colour plate see frontispiece, SCCS, *The Camellia Review,* vol.42, No.4, 1981.

Betty Goodwin. *(C.japonica),* ACS, 1951, *Quarterly,* 6(2):7:- *A* seedling of unknown parentage, first flowered 1947 on a 10 year old plant. Originated by Mrs C.I. Goodwin Sr., South Carolina, USA. Plant growth is rapid and compact. One side of the plant has flowers of white streaked with blush pink, while other parts have solid, blush pink flowers. Buds, oval and blush pink. Blooms, semi-double, 7.5-8.5 cm across, mid-season flowering. Leaves, ovate, medium serrate, thin, mid-green, slightly revolute. ACS, Registration No.107, 1954, *American Camellia Yearbook.*

Betty Grandy. *(C.japonica),* SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* White, slightly blush pink. Large rose form double. Medium, compact growth. Mid-season to late flowering. Originated by Mrs C.R. Grandy, Norfolk, Virginia, USA.ACS, Registration No.57, *American Camellia Yearbook,* 1954.

Betty Hopfer. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1951; *American Camellia Yearbook,* 1954, p.304, Reg. No.211: A 12 year old seedling from hand pollenated cross between seed parent 'Purity', (**Shiragiku**) and 'Herme', (**Hikarugenji**), originated by Dr O.K. Hopfer, Oakland, California, USA. First flowered 1945. Plant growth, average, slow and compact. Buds like a rose-bud, blush white, pink tinged, opening to an irregular, complete double with colour fading from pink to white. Similar form to **Professor Sargent.** Very late flowering. SCCS, 1956 *The Camellias. Its Culture and Nomenclature* reduces this cultivar name to a synonym for the Japanese variety **Toki-no-hagasane** but this cannot be so if the above registration is genuine. Orthographic error: 'Betty Hopfge'.

Betty Lou. *(C.japonica),* SCCS, 1981, *Camellia Nomenclature,* p.25: Red variegated white. Large, anemone form. Medium, upright growth. Flowers early to mid-season. Originated by H. Bailey, Plant City, Florida, USA.

Betty Lyon. *(C.japonica), New Zealand Camellia Bulletin,* March 1999, Issue No.132, vol.XXI, No.1, p.18, Reg. No.414. Registered by Mrs B. Lyon, Whakatane, New Zealand. A chance seedling which first flowered in 1984. Flowers are formal double, 8 cm diameter x 4.5 cm deep with about 70 petals. The inner petals are incurved, cupped, small and mid-pink (RHS.CC.62C), with rather darker outer edges (RHS.CC.62B). The outer petals are only lightly cupped, and are dark pink (RHS.CC.58C) blotched with pale pink markings. The plant has an open, upright form and average growth rate with dark green leaves 10 cm long x 5 cm wide. Flowers mid-season to late.

Betty M Lee. *(C.japonica), American Camellia Yearbook,* 1970, p.161, Reg. No.1068: A 13 year old seedling that first bloomed 1962, originated by Sam Munroe, Georgia, USA. Plant growth, average and medium in rate with dark green leaves, 7.5 cm x 4 cm. The rose form double flower resembles **Lady Kay** in form, 11cm across and 7.5 cm deep with 20 petals, deep red with 60 yellow anthers and white filaments. Flowers mid-season to late.

Betty McCaskill. SCCS, 1942, *Classification Of Camellias,* p.3. Synonym for *Camellia maliflora.*

Betty Mitchell *(C.japonica),* ACS, 1984, *The Camellia Journal,* vol.40, No.2, p.31, Reg. No.1970: A medium size, white formal double, *C.japonica* chance seedling, early to mid-season flowering; Originated by Mrs Herman Johnson, Madison, Florida. USA. The 6 year old seedling first bloomed 1982. Average flower size, 8 cm across by 3.8 cm deep with 22 petals. Plant growth is upright and medium in rate with dark green leaves, 10 cm long by 5 cm wide.

Betty Morris. *(C.japonica),* SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* Deep rose pink, with purplish cast. Large peony form with irregular petals. Medium, compact growth. Flowers early to late. Originated by Mrs R. Morris, Yemassee, South Carolina, USA. Registration No.106, *American Camellia Yearbook,* 1954.

Betty Neild. *(C.japonica), American Camellia Yearbook,* 1954, p.304, Reg. No.185: A seedling of unknown parentage, originated by Mrs Robert Morris, Yemassee, South Carolina, USA. Growth, average and compact. Leaves, mid-green, smooth with long acuminate apex. Buds, round and open slowly. Blooms long lasting, irregular double of deep rose with purplish cast; large flower. Blooms mid-season to late.

Betty Patricia. Sharp, 1957, *Camellias Illustrated,* p.138. Orthographic variant for **Bettie Patricia.**

Betty Patrick. Nuccio's Nurseries Catalogue, 1974-1975. Orthographic error for **Bettie Patricia.**

Betty Pink Chiffon. *(C.japonica),* Cannon, 1965, ACS, *The Camellia Journal,* vol.20, No.3, inside front cover. No description. *American Camellia Yearbook,* 1967, p.224, Reg. No.916: This sport of **Betty Sheffield** was propagated by Mark Cannon, Alabama, USA. Plant growth is upright and rapid in rate. The dark green leaves average 10 cm x 5 cm. The flowers are semi-double, similar to 'Frizzle White', 12 cm across by 7 cm deep. Colour is light pink blush, with an overcast of orchid and slightly waved petals. Flowers mid-season to late.

Betty Pregnall. *(C.japonica), American Camellia Yearbook,* 1971, p.44, Reg. No.1136: A 7 year old chance seedling that first bloomed 1962; originated by E.J. Prevatt, Bonneau, South Carolina,

USA. Plant growth is spreading, open and medium in rate. The dark green leaves are 11.5 cm long by 6 cm wide. The anemone form flower is deep pink, 14.5-15 cm across and 8.5 cm deep with 22-25 petals, yellow anthers and pink filaments. Flowers mid-season.

Betty Ridley. *(C.x williamsii). American Camellia Yearbook,* 1974, p.167, Reg. No.1277: A 7 year old hybrid seedling, (**Marie Bracey** x **Felice Harris**) that first bloomed 1969; originated by Dr W.F. Homeyer Jr., Macon, Georgia, USA. Plant growth is slow, upright and open with dark green leaves 7.5-4 cm long by 5-3.5 cm wide. The formal double, **Alba Plena** type bloom is Tyrian Rose (RHS,CC 24/2 to 24/3) with 73-77 petals. Average size 11 cm across by 3 cm deep. Early blooms tend to open like a rose-bud. Blooms early to late season. Sport: **Betty Ridley Variegated.** Note: **Felice Harris** was registered as a *C.reticulata* hybrid, but this parentage has been found to have no basis. See C. Aust., *Camellia News,* No.180, Winter 2009, p.18, and front cover colour photo. **Betty Ridley** is reclassified as a *C. x williamsii.*

Betty Ridley Variegated. *(C. x williamsii),* SCCS, 1981, *Camellia Nomenclature,* p.170 as 'Betty Ridley Var.': A virus variegated form of **Betty Ridley** - Tyrian Rose blotched with white. Originated in USA.

Betty Robinson. *(C.japonica),* Wylam, 1957, *American Camellia Yearbook,* p.25: John Robinson of La Canada, California, USA has a rose red seedling which he has named for his wife. The large, red, peony form flowers have attracted favourable comment. SCCS, 1958, *Camellia Nomenclature:* Dark red. Large full peony to anemone form. Vigorous, compact, upright growth. Midseason blooming. Chinese synonym 'Beidiluo'.

Betty Sette. *(C.japonica), American Camellia Yearbook,* 1992, p.31, Reg. No.2252: Originated by Dr W. Ackerman, Ashton, Maryland, USA. A seedling of *C.japonica* **Frost Queen** x **Variety Z.** The 11 year old seedling first bloomed 1985. Pink, medium sized formal double of average, dense growth; late blooming. Cold hardy to -10° F. Flower size, 9 cm across x 4.5 cm deep with 40 petals. Plant growth is upright, dense and medium with dark green leaves 9.5 cm long x 4.5 cm wide.

Betty Sheffield. *(C.japonica),* Thomasville Nursery Catalogue, 1951; Fendig, 1981, *American Camellia Catalogue:* A medium to large, white with a few red and pink splotches and stripes, incomplete double anemone form, 10-11 cm across with large, erect petaloids intermixed with stamens. Leaves, glossy, rich green, oval, 10.5 cm by 6.5 cm, apex prominent acuminate, serrations shallow with black pointed tips. A seedling of **Mrs F.L. Gibson,** planted 1944 and grown by Mrs A.B. Sheffield, Thomasville, Georgia, USA. A most unstable camellia with a great number of sports, many often sporting on to other forms. These include: **Betty by George, Betty Sheffield Strawberry,** 'Betty Lavender Pink', **Betty Sheffield Supreme, Betty Pink Chiffon, Betty Sheffield Variegated,** 'Betty Sheffield Baby', **Betty Sheffield Veined, Betty Sheffield Blush, Betty Sheffield White, Betty Sheffield Blush Variegated, Betty Sheffield Coral, Betty Sheffield White Throat, Betty Sheffield Dawn, Betty's Beauty, Betty Sheffield Dream, Betty's Pink Organdy, Betty Sheffield Lavender, Blond Betty, Betty Sheffield Light Pink, Funnyface Betty, Betty Sheffield Light Pink Variegated,** 'Betty Sheffield Peony', **Blush Supreme, Betty Sheffield Pink, Lucky Seven, Betty Shefffield Pinkheart, Betty's Blond Superlative,** 'Betty Sheffield Pink Variegated', **Betty Sheffield Purple, Adrienne's Betty,** 'Betty Sheffield (Ray's Speckled)', 'Betty Sheffield Rose Form', **Betty Sheffield Silver,** 'Betty Sheffield Ruby Red', 'Betty Sheffield Special', 'Blonde Betty'. For illustrations see: *American Camellia Yearbook,* 1956 facing p.41. Sharp, 1957, *Camellias Illustrated,* p.155. Hertrich, 1959, *Camellias in the Huntington Gardens* vol.III, p.19.

Betty Sheffield Baby. *(C.japonica),* Cannon, 1965, ACS, *The Camellia Journal,* vol.20, No.1, p.16. No description. Originated in USA. No valid listing located.

Betty Sheffield Blonde. Tammia Nursery Catalogue, 1988, ACS., *The Camellia Journal,* vol.43, No.4, p.3. Synonym for **Blond Betty.**

Betty Sheffield Blush. *(C.japonica), American Camellia Yearbook,* 1956, p.58, Reg. No.268: A 4 year old sport of **Betty Sheffield** originated by Thomasville Nurseries, Georgia, USA. Plant growth, average and compact. Leaves same as parent. Flowers, light pink with a few deep pink markings; incomplete double with mixed petaloids and 30 stamens, 12.5-10 cm across. Flowers midseason to late. Synonym: 'Blush Betty Sheffield'. Sport: **Betty Sheffield Blush Variegated.**

Betty Sheffield Blush Supreme. *(C.japonica),* Thomasville Nurseries Catalogue, 1962. SCCS., 1964, *Camellia Nomenclature,* p.18: Sport of **Betty Sheffield Supreme**. Light pink with a wide edge of deep pink to red. Mid-season flowering. Originated at Thomasville Nurseries, Georgia, USA. Chinese synonym: 'Hongyi Dahuangguan'.

Betty Sheffield Blush Variegated. *(C.japonica),* ACS, 1969, *The Camellia Journal*-, vol.24, No.1, inside back cover as 'Betty Sheff. Blush Var.'. A virus variegated form of **Betty Sheffield Blush** - Light pink blotched white. Originated in USA.

Betty Sheffield Blush Pink. Abbott's Nursery Catalogue, 1961. Synonym for **Betty Sheffield Pink.**

Betty Sheffield Charming. Mark S. Cannon Scion Catalogue, 1962, p.1. Synonym for **Funnyface Betty.**

Betty Sheffield Coral. *(C.japonica),* Thomasville Nursery Catalogue, 1963-1964; *American Camellia Yearbook,* 1965, p.227, Reg. No.757: A sport of **Betty Sheffield** originated by A.P. Hjort, Georgia, USA. Plant growth, average, upright and medium in rate, with dark green leaves, 8.5 cm by 5 cm. The semi-double to loose peony form flower is coral pink with golden anthers and white filaments. The plant and flower are similar to the parent except for colour. Mid-season to late flowering. Colour plate No.13, p.26, *Encyclopedia of Camellias in Colour,* vol.II, 1978. Chinese synonym: 'Shanhuhong Beiti'.

Betty Sheffield Dawn. *(C.japonica),* Tammia Nursery Catalogue, 1965-1966: A dawn pink sport of **Betty Sheffield.** All other characteristics the same as the parent. Originated in USA.

Betty Sheffield Dream. *(C.japonica),* Tammia Nursery Catalogue, 1964-1965: A pale pink sport of **Betty Sheffield.** All other characteristics the same as the parent. Originated by Tammia Nursery, Slidell, Louisiana, USA. See colour photo, Macoboy, 1981, *Dictionary of Camellias in Colour,* p.57. Abbreviation: 'Betty Dream'.

Betty Sheffield Funny Face. Cannon, 1965, ACS, *The Camellia Journal,* vol.20, No.1, p.16. Synonym for **Funnyface Betty.**

Betty Sheffield Lavender. *(C.japonica),* Cannon, 1967, ACS, *The Camellia Journal,* vol.22, No.1, back cover, (Advert.): A lavender pink sport of **Betty Sheffield.** All other characteristics the same as the parent. Originated in USA.

Betty Sheffield Lavender Blush. *(C.japonica),* Cannon, 1968, ACS, *The Camellia Journal,* vol.23, No.1, back cover, (Advert.) as 'Betty Sheffield Lav. Blush'. A lavender blush sport of **Betty Sheffield.** All other characteristics the same as the parent. Originated in USA.

Betty Sheffield Light Pink. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.2: A light pink sport of **Betty Sheffield.** All other characteristics the same as the parent. Originated in USA. Sport: Betty Sheffield Light Pink Variegated.

Betty Sheffield Light Pink Variegated. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.2 as 'Betty Sheffield Light Pink Var.'. A virus variegated form of **Betty Sheffield Light Pink** -Light pink blotched white. Originated in USA.

Betty Sheffield Peony. *(C.japonica)* Mark S. Cannon Scion Catalogue, 1963-1964, p.2. No description. Originated in USA. No valid listing located.

Betty Sheffield Pink. *(C.japonica), American Camellia Yearbook,* 1956, p.59, Reg. No.266: A 4 year old sport of **Betty Sheffield,** originated by the Thomasville Nurseries, Georgia, USA. Plant and flower characteristics the same as the parent. Flowers, deep pink, incomplete double with 30 petals and mixed petaloids, 12.5-15 cm across. Flowers mid-season to late. Synonym: 'Betty Sheffield Blush Pink'.

Betty Sheffield Pink Chiffon. *(C.japonica),* SCCS, 1966 *Camellia Nomenclature,* p.25: A sport of **Betty Sheffield** - Light, blush pink with orchid overcast. All other characteristics the same as the parent. Originated by Cannon, Dothan, Alabama, USA.

Betty Sheffield Pink Heart. Mark S. Cannon Scion Catalogue, 1962, p.1. Orthographic variant for **Betty Sheffield Pinkheart.**

Betty Sheffield Pinkheart. *(C.japonica),* Thomasville Nursery Catalogue, 1962: Blush pink with deep pink centre and white edge. A sport of **Betty Sheffield Silver.** All other characteristics the same as the parent. Originated by the Thomasville Nursery, Georgia, USA.

Betty Sheffield Pink Variegated. Feray's Fine Flowers Catalogue, 1960 as 'Betty Sheffield Pink Var.'. Synonym for **Betty Sheffield Variegated.**

Betty Sheffield Purple. *(C.japonica),* Cannon, 1966, ACS, *The Camellia Journal,* vol.21, No.1. A purplish red sport of **Betty Sheffield.** All other characteristics the same as the parent. Originated in USA.

Betty Sheffield (Ray's Speckled). *(C.japonica),* Mark S. Cannon, 1963, *The Camellia Journal,* vol.18, No.1, back cover. No description. Originated in USA by Ray Gentry, Louisiana, USA. No valid listing located.

Betty Sheffield Rose Form. *(C.japonica),* Keeton, 1965, ACS, *The Camellia Journal,* vol.20, No.2, p.11, (Advert.). No description. Originated in USA. No valid listing located.

Betty Sheffield Ruby Red. *(C.japonica),* Mark S. Cannon, 1965, ACS., *The Camellia Journal,* vol.20, No.1, p.16. No description. Originated in USA. No valid listing located.

Betty Sheffield Silver. *(C.japonica), American Camellia Yearbook,* 1960, p.194, Reg. No.468: A sport of **Betty Sheffield Blush.** Blush pink bordered white with a pinkish sheen. Originated in USA by G.G. Comstock, Texas. See color plate No.14, p.26, *Encyclopedia of Camellias in Colour,* vol, II, 1978. Sports: **Adrianne's Betty, Betty Sheffield Pinkheart.**

Betty Sheffield Special. Mark S. Cannon Scion Catalogue, 1962, p.2. Described as having lots of white. However not sufficiently different to **Betty Sheffield** to warrant the standing of a sport. Hence a synonym for **Betty Sheffield.**

Betty Sheffield Strawberry. *(C.japonica),* Mark S. Cannon, 1966, ACS., *The Camellia Journal,* vol.21, No.1, back cover (Advert.). No description. No valid listing located.

Betty Sheffield Suprema. Odriozola, 1980, *La Camelia, Variedades y Cultivo,* p.10. Orthographic variant for **Betty Sheffield Supreme.**

Betty Sheffield Supreme. *(C.japonica),* Griffin ed., 1957, *Camellian,* 8(4):18; *American Camellia Yearbook,* 1959, p.269, Reg. No.381: A sport of **Betty Sheffield** originated by Mrs Green Alday, Georgia, USA, first observed in 1956. The semi-double flowers are like its parents in form but are pure white in colour with a narrow band of deep pink on the petal margins. See colour plates *American Camellia Yearbook* 1959 facing p.82; Macoboy, 1981, *The Colour Dictionary of Camellias,* p.57. Frontispiece, *New Zealand Camellia Bulletin,* vol.V, No.6. This cultivar has been awarded the "Sewell Mutant Award" and the "William Hertrich

Award". Orthographic error: 'Better Sheffield Supreme'. Orthographic variant: 'Betty Sheffield Suprema'. Chinese synonym: 'Baiyi Dahuangguan'. Ferreira & Celina, 2000, *O Mundo da Camélia,* p.73; The flower pictured would be classified as **Betty's Beauty.**

Betty Sheffield Variegated. *(C.japonica), American Camellia Yearbook,* 1956, p.59, Reg.No.267: A three year old sport of **Betty Sheffield,** originated by Thomasville Nursery, Georgia, USA. Plant and leaves similar to parent. Flowers, deep pink with white blotches, incomplete double with intermixed petaloids. Mid-season flowering. Synonym: 'Betty Sheffield Pink Variegated'.

Betty Sheffield Veined. *(C.japonica),* Tammia Nursery Catalogue, 1965-1966. A sport of **Betty Sheffield,** colour light pink, veined deep pink. Plant and leaves similar to parent. Originated by Tammia Nurseries, Slidell, Louisiana, USA.

Betty Sheffield White. *(C.japonica),* Tammia Nursery Catalogue, 1972; *American Camellia Yearbook,* 1981, p.94, Reg. No.1712: A large, white anemone to peony form mutant of **Betty Sheffield.** Mid-season flowering. Originated by Tammia Nursery, Slidell, Louisiana, USA. The 17 year old plant first bloomed in 1965. Average flowers 12.5 cm wide by 6 cm deep. Number of petals and petaloids the same as **Betty Sheffield,** white anthers and yellow filaments. Plant growth, upright, dense and rapid.

Betty Sheffield White Throat. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.2. A sport of **Betty Sheffield,** pink with a white throat. Originated in USA. Synonym: 'White Throat Betty'.

Betty Sue. *(C.japonica), American Camellia Yearbook,* 1978, p.128, Reg. No.1483: A large, white semi-double, *C.japonica* chance seedling, mid-season blooming; originated by L.B. Wilson, Mississippi, USA. The flower has 19 petals, yellow anthers, 12.5 cm wide by 5 cm deep. Plant growth is upright and medium in rate with dark green leaves, 8.5 cm long by 4 cm wide.

Betty Theisen. *(C.japonica),* Fendig, 1951. *American Camellia Catalogue:* A large, light, blush pink shading to a deepening blush at the centre, anemone form. Loosely formed with numerous petals intermixed with yellow stamens. Leaves, mid-green, glossy, rounded, 10.5 cm long by 6 cm wide. Veins noticeably lighter green, serrations prominent and sharp. Growth, bushy, slow and symetrical. Originated by Camellia Nurseries, Florida, USA from seed of unknown parents about 1941.

Bettye Jo. *(C.hiemalis), American Camellia Yearbook,* 1967, p.224, Reg. No. 953: A 9 year old chance seedling that first bloomed 1962; originated by Howard E. Burnette, California, USA. Plant growth, spreading, open and medium in rate with light green leaves, 7 cm long by 4 cm wide. The formal double flower is 8.5 cm across and 2.5 cm deep with 50 petals. The colour is white, no stamens. Petals cleft and slightly incurved. Blooms early to mid-season.

Betty's Beauty. *(C.japonica),* SCCS, 1976, *Camellia Nomenclature,* p.27: Sport of **Betty Sheffield Supreme.** White with each petal edged light orchid. Originated by F. Moore, West Covina, California, USA. Synonym: 'Rudy Moore'. See colour photo, front page SCCS, 1986, *The Camellia Review,* vol.47, No.4 and *International Camellia Journal,* No.21, 1989, p.3. Chinese synonym: 'Yumian Beiti'.

Betty's Blond Superlative. *(C.japonica),* Shackelford, 1969, ACS, *The Camellia Journal,* vol.24, No.4, p.16: Clear, light apricot throughout the flower. Originated in USA.

Betty's Coral Candy. *(C.japonica), Camellias,* Y.C. Shen, 2009, p.99 with colour photo; Deep pink to crimson, with some faint white striping, particularly on the outer petals. A sport of the **Betty Sheffield** family. Other details as for the parent. Raised by Nuccio's Nurseries, Altadena, California, USA.

Betty's Delight. *(C.reticulata* hyb.), ACRS., Dec.1990, *Camellia News,* No.115, p.11, Reg. No.390: Originated by Mildorrie Camellias, Strong's Road, Jasper Brush, NSW, Australia. Seed parent *C.reticulata* hybrid **Brian Variegated,** pollen parent unknown. First flowered 1984. Coral pink, formal double with 100 petals; RHS.CC.67D, shading lighter at the centre to 73D; 6.5 cm across x 2.5 cm deep. Flowers mid-season to late on a slow growing, compact, bushy plant. Leaves glossy green, ovate, keeled, acuminate, serrahons almost absent.

Betty's Pink Organdy. *(C.japonica), American Camellia Yearbook,* 1981, p.94, Reg. No.1713: A large, blush pink, anemone to peony form *C.japonica* mutant of **Betty Sheffield,** mid-season flowering; originated by Tammia Nursery, Louisiana, USA; first observed 1978. the flower form is the same as 'Betty Sheffield. Plant growth, upright, average and open and medium in rate with light green leaves 8.5 cm long by 5 cm wide.

Betzy Baker. Ghisleni, Pier Luigi, 1982, *Le Camelie,* fig.27, p.46. Orthographic error for **Betsy Baker.**

Beulah Alphin. *(C.japonica),* SCCS, 1966, *Camellia Nomenclature,* p.25, Red. Large, semi-double to peony form with loose petals. Mid-season blooming. Originated by B.L. Alphin, Clinton, North Carolina, USA.

Beulah B. Bobe. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 2001, p.21, colour photo p.20, Reg. No.2544. A pink, rose form to semi-double chance seedling. Flowers mid-season to late. Originated by Walter Homeyer, Macon, Ga, USA. *American Camellia Yearbook,* 2001, p.93, colour photo p.c13. Average flower size is 12.5 cm across x 5 cm deep, with 24 petals, white anthers and white filaments. Plant is upright and spreading with average growth rate. The dark green leaves are 10 cm long x 6.5 cm wide.

Beulah Brown Baxter. *(C.japonica), American Camellia Yearbook,* 1992, p.76, Reg. No.2213: Large, crimson red, single *C.japonica* chance seedling that blooms mid-season to late. Originated by Luther W. Baxter Jr, Seneca, S.C., USA. This 15 year old seedling first bloomed 1986. Flowers are 10-11 cm across x 5 cm deep. Higo type with yellow anthers and pink filaments. Flowers have prominent veining and crinkled petals. Plant growth is vigorous and rapid with medium green leaves 11 cm long x 5 cm wide. Colour photo pp.80-81.

Beulah Hennly. *(C.reticulata),* ACS, *The Camellia Journal,* Sept.2013, p.27 with colour photo; Regn No. 2870; Originated by Hulyn Smith, Valdosta, Ga., USA. ACS, *Yearbook,* 2013, p.106 with colour photo, as 'Baulah Hennly'. Registered and propagated by Ralph Maphis, Tallahassee, Fla. A 12 year old seedling, parentage unknown, first flowered 2008. Large size, 10cm diameter x 7cm deep flower is described as semidouble, (accompanying photo is of a loose peony). Light pink, long-lasting, and with heavy petal texture. Flowers late-season. Plant is upright and open, with vigorous growth. Mid-green leaves average 11.5cm x 6,5cm with low serration.

Bev Piet. *(C.reticulata* hybr.) Withers, 1979, ACRS, *Camellia News,* p.9: "The third seedling was 'Bev Piet' with the breeding **Fire Chief** x **Nuccio's Ruby.** The flowers are 15 cm across, wavy and dark black-red with high rabbit ears and a huge centre of golden anthers. Originated by Meyer Piet and Lee Gaeta, California, USA. Sport: **Bev Piet Variegated.**

Bev Piet Variegated . *(C. reticulata* hybr.), SCCS, 1986, *The Camellia Review,* vol .48, No.2, p.7 as 'Bev Piet Var.'. A virus variegated form of **Bev Piet** - Black-red, blotched white. Originated by Meyer Piet and Lee Gaeta, California, USA. Orthographic variant: 'Beverly Piet Variegated'.

Bev Piets Smile. *(C.japonica),* ACS, *The Camellia Journal,* Sept 2008, p.30 with colour photo; Regn No. 2715; 11.5 cm diameter, semi-double to peony form. Dark red and white. Yellow anthers and light pink to white filaments. Average upright growth. Raised by Meyer Piet, Arcadia, Calif.,

USA in 1995. *American Camellia Yearbook,* 2008, p.106 with colour photo; Dark grren leaves 10 cm x 5 cm.

Bev Ritter. *(C.japonica)* ACS, *The Camellia Journal*, Dec. 2010, p.29 with colour photo; Originator Charles D. Ritter, Melrose, Fla., USA. ACS, *Yearbook* 2010, p.74 with colour photo. A nine year old sport of **Show Time**, first flowered in 2002. Plant habit is upright and vigorous. Dark green leaves are 12 cm x 6.5 cm. Medium size, clear light pink, formal double flower has 74 petals, and is 9.5 cm diameter x 2.5 cm height. Thick, creped petal texture.

Bevaniana. *(C.japonica), Magazine of Horticulture,* 1841. No description. Originated in USA. (Believed extinct.)

Bevereley Caffin. Forrest, 1985, *Trees and Shrubs Cultivated in Ireland.* Orthographic error for **Beverley Caffin.**

Beverley Caffin. *(C.japonica),* Camellia Grove Nursery Catalogue, 1944: Large, semi-double white with flakes of carmine. Fragrant. Probably a seedling of **Jean Lyne.** It throws a sport, **Beverley Caffin Rosea.** Originated by Professor E.G. Waterhouse, Gordon, N.S.W. Australia. Orthographic error 'Bevereley Caffin'.

Bianchi. *(C.japonica),* Jacob Makoy Catalogue, 1839, p.16 as 'Bianchii'. Berlèse, 1840, *Monographie,* ed.2, p.154: Buds, very large, round with green scales. Flower about 10 cm across, full, globular in form, of a velvety, dark, cherry-red; the exterior petals, large, rounded, first concave then convex; those of the centre, long, erect, irregular in form . Originated in Italy by Bianchi. Orthographic errors: 'Biankii', 'Bianckii'.

Bianckii. Trillon, Le Mans Nursery Catalogue, 1843, p.4. Orthographic error for **Bianchi.**

Biankii. Cachet Catalogue, 1840-1841, p.1. Orthographic error for **Bianchi.**

Bianselong. Gao, Jiyin, Ltr, 22nd August, 1994. Chinese synonym for the Japanese *C.japonica* 'Reigyoku', which has been renamed **Lizu.**

Biantian Shenle. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.410; Chinese synonym for the China *C.japonica* **Benten-kagura.**

Bianye Kuancaidai. (Margaret Davis Benten). *(C.japonica),* Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.147 with colour photo; A sport of **Margaret Davis,** originated by Jinhua Feng's Camellia Garden of China in 2004. Flower as for **Margaret Davis,** occasional red stripes and spots on petals. Leaves dark green edged with yellow, irregular shape, wrinkled surface. Upright plant, slow growth. Flowers early to mid-season.

Bice. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.8. Abbreviation for **Bice Rosazza.**

Bice Pacinotti. *(C.japonica),* Rovelli Catalogue, 1892-1893 as "nuova". No description. Originated in Italy by Rovelli. (Believed extinct.)

Bice Rosazza. *(C.japonica),* van Houtte, Catalogue, 1858, 72:6: Perfectly imbricated, red and white. Mercatelli Catalogue, 1881, p.11: Ivory white with vivid blood red spots, imbricated and cupped. Abbreviation: 'Bice'. Originated in Italy by Dr Vital, Rosazza, Genoa.

Bicentennary Joy. *(C.japonica),* ACRS, 1987, *Camellia News,* No.103, p.23, Reg. No.356 with colour photo back cover: Originated by G.W. Hooper, Bexley North, NSW., Australia. A chance seedling from **Doris Hirst** that first flowered 1980. A white, formal double flower, 9 cm across x 4 cm deep, with a soft cream centre and distictive fluted petals. Plant growth is slow and upright. Leaves ovate, flat. glossy green with fine serrations, 11 cm long x 5.5 cm wide. The flower occasionally shows petaloids.

Bichonne. *(C.japonica), Catalogo Plantarum Cesarei Regii Horti Modiciam,* 1844. No description. Originated in Italy. (Believed extinct.)

Bickley's Red. Rubel, 1940-1941, *Floral Gems from China,* Catalogue No.79, p.23. Synonym for **Jarvis Red.**

Bicolor. *(C.japonica),* Sweet, 1830, *Hortus Britannicus,* p.74: Single. Rosy and white. Hibbert & Buist, 1832, *The American Flower Garden Directory,* p.79: A single flower with a pink ground and white streaks...not as large as many of the single ones. Paxton, 1838, *Magazine of Botany,* vol.4, p.71: Mr Low of Clapton, has a good plant of **Bicolor** which is new, and although perhaps not quite so good as 'Donckelaeri' (**Masayoshi**), yet deserves a place in every collection. Originated in England.

Bicolor (GS). *(C.japonica),* McIlhenny, 1935, *List of Camellias,* p.2, invalidly as 'Bicolor'. Pink and white, equally divided. Large blooms. Petals smooth outside with centre pronounced; peony type bloom. Some flowers are double, light red with centre petals interspersed with a few stamens. McIlhenny gives it as having been obtained from Guichard Soeurs, France.

Bicolor de la Reine. *(C.japonica),* van Houtte, 1859 Catalogue, 77:51: Superior imbrication, petals very large, extremely round, deep rose, very soft, sometimes veined, with the circumference of the flower bordered distinctly with pure white. Van Houtte, 1861, *Flore des Serres et des Jardins de l'Europe,* vol.14, p.17, illustr., 1400. A sport of **De la Reine,** grafted and fixed by M. Dominique Vervaene, of Belgium. Orthographic variants: 'Bicolore de la Reine', 'Bicolour de la Reine', 'Bicolore della Regina'. Synonym: 'Belladonna'.

Bicolor Nova. *(C.japonica),* Backhouse & son Catalogue, 1870, p.35. No description. Originated in England. (Believed extinct.)

Bicolour de la Reine. Nairne & Son, 1906 Catalogue. Orthographic variant for **Bicolor de la Reine.**

Bicordis. van Houtte, 1843-1844, Catalogue, 12:ff. Synonym for **Binata.**

Bicsasha. Mount Congreve Gardens Computerised List of Camellias Grown in the Gardens, 1994, p.1. Orthographic error for 'Bihashi Bia', synonym for **Mikenjaku.**

Bids-thesis. *(C.japonica),* Cannon, 1985, ACS, *The Camellia Journal,* vol.40, No.4, p.13. No description. Originated by Dr T.E. Pierson, N.S.W., Australia. No valid listing located.

Bidwell. *(C.japonica),* Lindo, 1932, Nursery Catalogue: Pink. Medium size semi-double. Midseason blooming. Originated in USA. Synonym: 'Bidwell Pink'. A sport of **Bidwell Variegated.**

Bidwell Pink. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.25. Synonym for **Bidwell.**

Bidwell Variegated. *(C.japonica),* Vanderbilt, 1940, *Camellia Research,* p.2 as 'Bidwell Varie.'. No description. Valley Garden Supplies Catalogue, 1946-1947: White, splashed and striped with pink and red. Large, irregular semi-double to loose peony. Vigorous, upright growth with medium size, light green foliage. Mid-season blooming. Originated in USA. Synonym: 'Fragrant Striped'. See Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.1 p.65 for illustr. Sport: **Bidwell.**

Biejia Cha. (Turtle Shell Camellia). Gao, Jiyin, Ltr, 31st January 1993. Sichuan synonym for **Jinxin Dahong.**

Bienvenu Ami. *(C.japonica), American Camellia Yearbook,* 1981, p.94, Reg. No.1697: A medium size, mid-pink, formal double *C.japonica* chance seedling; originated at Tammia Nurseries, Louisiana, USA. The 8 year old seedling first bloomed in 1977. Average flower size is 12 cm across by 6 cm deep with 55 petals and 5 petaloids. Petals somewhat imbricated. Plant growth, upright, open and medium in rate with light green leaves, 8.5 cm x 4 cm.

Bienville. *(C.japonica), American Camellia Yearbook,* 1961, p.219, Reg. No.576: A 13 year old seedling of **Imura,** (**Miyakodori**) that first bloomed 1955; originated by K. Sawada, Alabama, USA. Plant growth, upright, broad and dense. The leaves, 8.5 cm long by 4 cm wide are medium textured and serrate. The formal, complete double flower is imbricated, 10-11 cm across and 5 cm deep, self-white with 80-90 petals, obovate, smooth, mostly with incurved edges. Early to mid-season flowering.

Bier Dachilun. Gao, Jiyin Ltr. 25th July 1990. Chinese synonym for **Bill Goertz.**

Bier Damudan. Chinese synonym for USA C. *japonica* **Bill Woodroof.**

Biersi Laoxiong. Shao, Taichong, 1992, *The Observations from the Camellia World,* No.273, p.72. Chinese synonym for the USA *C.reticulata* hybrid **Buddy Bills.**

Biflora. Satomi, 1958, *Nomenclature List of Sasanqua of Japan,* p.6,as *C.biflora* Makino, *(Thea biflora* Hayata). These are classed as synonyms for *C.oleifera* by Sealy, 1958, *A Revision of the Genus Camellia,* p.205.

Biflora. *(C.japonica),* van Houtte, Catalogue, 1841, 7:3; 1842, 9:8: Red, petals loose, in two central tufts, very beautiful. Trillon, Le Mans Nursery Catalogue, 1843, p.4: Very dark red, convex flower. *Floricultural Cabinet,* 1846 as "Red"; Burnier & Grilli Catalogue, 1846-1847: Red, sparsely petalled with fascicles of stamens in the centre.

Biformis Flore Pleno. *(C.japonica),* Ridolfi, 1843, Catalogue of Plants Cultivated at Bibbiani, as 'Biformis Fl. Pl.'. Originated by Ridolfi in Italy. No description. (Believed extinct).

Bifû. (Zephyr), (Higo), Kita, Tsuneo, 1966, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.7, p.80; Watanabe, 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.10, p.115 as 'Bihû': Large, pink, single. Sport of **Chôjuraku**. Different reading for **Soyokaze.**

Big Apple. *(C.reticulata* hybr.) Valdosta Camellias, 1986, ACS, *The Camellia Journal*, vol.41, No.4, p.9: Dark red. Large to very large, semi-double to peony form. Medium growth, Mid-season to late flowering. a seedling from *C.reticulata* 'Crimson Robe', (**Dataohong**) x **Jean Pursel.** Originated by F. Pursel, Oakland, California, USA.

Big Beauty. *(C.japonica),* McIlhenny Catalogue, 1941. p.3: (Jungle Gardens seedling). Large, white, blotched and dashed pink. In the McIlhenny 1948 Catalogue: Very large, dull white, lightly veined, dotted and blotched rose; double; outer petals imbricated, centre petals forming a compact rose-bud. Mid-season blooming. About 12.5 cm across. For other forms see: **Mollie Moore Davis, Tillie Wirth, Sarah R** and **Big Beauty Blush.** Originated by McIlhenny, Louisiana, USA.

Big Beauty Blush. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.2: A blush pink form of **Big Beauty.** Originated in USA.

Big Beauty Pink. Griffiths and Strother, 1954, *American Camellia Yearbook,* p.1, 9. Synonym for **Mollie Moore Davis.**

Big Cup. Macoboy, 1981, *The Dictionary of Camellias in Colour.* Synonym for **Dewatairin.**

Big Daddy. Mark S. Cannon Scion Catalogue, 1963-1964, p.2. Synonym for **Imperator.**

Big Daddy. *(C.japonica)* ACS, *The Camellia Journal*, Sept. 2012, p.26 with colour photo; Regn. No.2827; Regd by C.M. & Lillian Gordy, Ocala, Fla. ACS, *Yearbook* 2012, p.170 with colour photo; An 11 year old chance seedling, first flowered 2002. The medium to large, 10cm x 5cm flower is semidouble, deep pink to light red with 20 petals. Bright gold anthers and cream filaments. Upright, average growth. Dark green leaves average 10cm x 5cm. Flowers midseason to late.

Big Dipper. *(C.reticulata),* ACS., 1988, *The Camellia Journal*, vol.43, No.1, p.6, reg. No.2069: Very large, carmine pink, semi-double *C.reticulata* hybrid, chance seedling of 'Tali Queen' (**Dali Cha**). Originated in USA by Houghton Hall, San Anselmo, California, USA. *American Camellia Yearbook,* 1987, p.79 with colour photo, p.60-61: The seedling first flowered 1981. Average flower size, 17.5 cm across x 10 cm deep with 19 1arge petals, gold anthers, yellow filaments. Blooms early. Plant growth is upright, spreading and rapid in rate with dark green leaves, 10 cm x 6 cm. Chinese synonym 'Beidouxing'.

Big Dipper Variegated. *(C.reticulata),* ACS 1992, *The Camellia Journal*, vol.47, No.4, p.13. Valdosta Camellias Scions advert. A white blotched virus induced variegated form of **Big Dipper.** Originated in the USA.

Big Ed. *American Camellia Yearbook,* 1965. Synonym for **Ed Anderson.**

Big Ed Wilson. *(C.japonica),* Griffin, ed., 1958, *Camellian.* No description. Originated in USA.

Big Jack. *(C.japonica),* ACS, *The Camellia Journal*, Nov. 1999, p.19, Reg. No.2515. A pink to deep red, peony to formal double seedling of **Eyes of March,** pollen parent unknown. Originated by Ray Bond, Dallas, Tex., USA. Flowers mid-season to late. *American Camellia Yearbook,* 1999, p.6, colour photo before p.1. The 8 year old seedling first flowered in 1999. Average flower size is 5 cm across x 1.8 cm deep, with 96 fimbriated petals, sometimes veined. Plant growth is upright, spreading, open and average rate, with dark green leaves 9 cm long x 3.2 cm wide.

Big Mo. *(C.hybrid),* SCCS, 1960, *Camellia Nomenclature,* p.124: Soft pink. Medium size, semi-double with golden stamens. Vigorous, spreading growth. Early blooming. A seedling from *C.oleifera x C.hiemalis,* **Showa-no-sakae** originated by R. Carr, Tulare, California, USA. See colour photo: Macoboy, 1981, *The Dictionary of Camellias in Colour,* p.183.

Big Pink. Nursery name for plant later named **Paradise Diana** by Paradise Plants, Kulnura, Australia.

Big Rainbow. Macoboy, 1981, *The Dictionary of Camellias in Colour,* p.73. Synonym for **Ôniji.**

Big Red Single. *(C.japonica),* Orton Price List, 1947-1949. No descrption. Originated in USA. (Believed extinct.)

Big Tiny. *(C.japonica),* SCCS, 1962, *Camellia Nomenclature,* p.25: Red. Medium size semi-double. Vigorous, opem, upright growth. Mid-season blooming. Originated by D. Feathers, Lafayette, California, USA.

Bigetta. *(C.japonica),* Longone Catalogue, 1854. No description. Originated in Italy. (Believed extinct.)

Bigg Al's. (*C.reticulata* hybrid). ACS, *The Camellia Journal,* Nov. 2000, p.28 with colour photo, Reg. No.2526. A very large, semi-double to loose peony seedling of **Lilette Witman** x **Nuccio's Ruby.** Flowers early to mid-season. The long lasting blooms have heavy petal texture. Originated by Jack. L. Mandarich, Salinas, Calif., USA. *American Camellia Yearbook,* 2000, p.2, colour photo p.c8. The 10 year old seedling first flowered 1992. The red flowers average 14.5 cm across x 5 cm deep, with 24 petals and golden anthers. Plant growth is upright, dense and vigorous, with light green leaves 7.5 cm long x 5 cm wide.

Biho. (Beautiful Phoenix), *(C.japonica),* Gerbings Azalea Gardens Catalogue, 1938-1939: Full double white, large size, blushed with flesh pink. Tall growth, glossy foliage, mid-season blooming. See p.77, Sharp, 1957, *Camellias Illustrated* for a black and white photo and p.44, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II. Synonyms: 'Songbird', 'Biho (1)'. This Camellia has no relationship with the modern Japanese camellia of the same name which is a variegated red single. Also the last character of the name is different giving the translation "Beautiful Treasure".There was confusion over these two camellias. The formal double **Biho** is believed to have been an European variety even though Satomi (1956) accurately describes it in *Camellia Varieties of Japan,* p.5. However the impression is that he copied the SCCS nomenclature description together with the American synonym 'Songbird'.

Bihô. (Beautiful Treasure), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.127, colour photo as 'Biho', p.243, description: Dark red single, variegated white, ball-shaped, 5-6 petals, stamens in a central tube. Flower 8-10 cm across, mid-season blooming. Leaves, narrow elliptic, medium size; plant upright and vigorous. Originated in Chûbu District, Japan. Thought to be a seedling of **Kyôkosode,** synonymous with **Saifu.** Corruption: 'Biho'.

Biho Light. *(C.japonica),* McIlhenny, 1937, *600 Varieties of Camellias,* p.3 as 'Biho'. Vanderbilt, 1941, *Camellia Research, II:* Single, cup-shaped, white slightly flushed with pink. This alternative name was selected as valid to avoid confusion with the other cultivars named **Biho.** Originated in Japan.

Biho Pink. *(C.japonica),* McIlhenny, 1941, *700 Varieteis of Camellias,* p.3: A pink form of **Biho,** originated by Pugh, USA as a sport of the formal double **Biho.** See Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III, p.20.

Biho White. *(C.japonica),* Doty & Doerner Inc., 1942, Wholesale Price List, p.22. No description. Fendig, 1952, *American Camellia Catalogue:* White. Single. Mid-season. This seems to be a form of **Biho Light.**

Biho (1). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Biho.**

Biho (2). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Biho Light.**

Biho (3). Seibundô Shinkôsha, 1979, *Senchinshû,* pl.29. Corruption of **Bihô.**

Biho-no-kan. (Gateway to Enduring Beauty). *(C.japonica),* JCS, 1997, No.36, p.58: A small, deep red single of 5-6 petals, inner ones with pointed apices, central stamen column. Leaves dark green, elliptic, apices acute, bases cuneate, shallowly serrate. Blooms mid-season.

Bihû. Watanabe, 1970, Kyôto Engei Kurabu, *Tokushû,* p.115. Different reading for 'Bifû', synonym for **Soyokaze.**

Bijou. van Houtte, 1857, Catalogue, 67:43. Synonym for **Mazzuchelli.**

Bijou d'Italia. Scarlatti Catalogue, 1888. Synonym for **Mazzuchelli.**

Bijou de Florence. Burdin Maggiore & Co. Catalogue, 1880-1881. Orthographic variant for **Bijou di Firenze.**

Bijou de la Garza. van Houtte, 1846-1847, Catalogue, 27:20. Orthographic variant for **Bijou della Garza.**

Bijou della Garza *(C.japonica),* van Houtte, 1846-1847, Catalogue, 27:20 as 'Bijou de la Garza': Formal double, deep cerise, all the petals widely blotched with white, and almost striped at the centre by an equally white band. The petals are slightly curled and evenly concave and are cerise on the reverse. Berlèse, 1849, *Annales de la Société Central d'Horticulture de Paris,* vol.40, p.231: Flower, formal double, a deep carmine red splashed with white. Petals, broad, cupped, rounded, a little notched, numerous, well imbricated, all extensively blotched or striped longitudunally with a ribbon of white. Originated in Italy by G. Ugoni. Orthographic variant: 'Bijou de la Garza'.

Bijou di Firenze. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.1: Of medium size, perfectly imbricated, vivid red at the cicumference, pink at the centre, the petals streaked and lightly edged white. Verschaffelt, 1856, *Nouvelle Iconographie,* Book XI, pl.I: Jewel.of Florence. The ruddy and variegated colouring of this floral miniature justifies the name. Its irnbrication is flawless, the outspread, rounded-oval petals, a vivid carmine at the circumference, rose-red near the centre, which is also carmine, all intersected and faintly emarginated by white. Leaves, small and elegant. Originated by Cesar Franchetti, Florence, Italy. Orthographic error: 'Bijou di Firinzi'. Orthographic variant: 'Bijou de Florence'.

Bijou di Firinzi. *Azalea and Camellia Society of America Yearbook,* 1933, p.27, 29. Orthographic error for **Bijou di Firenze.**

Bikashi-Bia. Waterer Son & Crisp Catalogue, 1954-1955, p.19. Synonym for **Mikenjaku** as 'Nagasaki'.

Bikashi Bir. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.25. Orthographic error for 'Bikashi Bia', synonym for **Mikenjaku** as 'Nagasaki'.

Bikashi-Bira. RHS, Yearbook, Index, 1955, p.161. Orthographic error for 'Bikashi-Bia', synonym for **Mikenjaku** as 'Nagasaki'.

Biliu. ICS Journal 2013, p.103. Colour photo of plant.

Bill Arant. *(C.japonica),* SCCS, 1968, *Camellia Nomenclature,* p.26: Pink. Large semi-double to full peony form. Vigorous, upright growth. Mid-season blooming. Originated by Dr A.F. Burnside, Columbia, South Carolina, USA. Sport: **Bill Arant Variegated.**

Bill Arant Variegated. *(C.japonica),* Cannon, 1969, ACS, *The Camellia Journal,* vol.24, No.4 as 'Bill Arant Var.'. A virus variegated form of **Bill Arant** - Pink blotched white. Originated in USA.

Bill Barnett. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.2. No description. Originated in USA. No valid listing located.

Bill Blount. *(C.japonica),* Cannon, 1965, ACS, *The Camellia Journal,* vol.20, No.3, inside back cover; *American Camellia Yearbook,* 1967, p.224, Reg. No.917: A 15 year old chance seedling that first bloomed 1958; originated by H.E. Ashby, South Carolina, USA. Plant growth, upright and rapid. The dark green leaves average 11 cm long by 6 cm wide. Flower is semi-double, similar to 'Donckelaeri' (**Masayoshi**) and is white with 3 pink stripes and golden anthers. It is up to 15 cm across and blooms mid-season. Other forms: **Bill Blount Pink, Bill Blount Pink Variegated.**

Bill Blount Pink. *(C.japonica),* Cannon, 1967, ACS, *The Camellia Journal,* vol.22, No.4. A self pink form of Bill Blount. Originated in USA. Sport: **Bill Blount Pink Variegated.**

Bill Blount Pink Variegated. *(C.japonica),* Cannon. 1970, ACS, *The Camellia Journal,* vol.25, No.1 as 'Bill Blount Pink Var.'. A virus variegated form of **Bill Blount Pink** - Pink blotched white. Originated in USA.

Bill Boll. *(C.japonica), American Camellia Yearbook,* 1991, p.76, Reg. No.2208: Large white anemone to peony form *C.japonica* chance seedling, originated by Alda Boll, Jacksonville, Florida, USA. The 12 year old seedling first flowered 1985. Size, 12.5 cm across x 8 cm deep, with 35 petals and 70 petaloids, bright yellow anthers, white filaments. Plant growth is upright and medium in rate with dark green leaves 8 cm long x 5 cm wide. Colour photo, pp.80-81.

Bill Colsen. *(C.japonica),* ACS 1993, *The Camellia Journal*, vol.48, No.3, p.30, Reg. No.2258. Originated by G.G. Gerbing, Millwood, Georgia, USA. A chance seedling of **Julia Drayton** ('Mathotiana'). The 10 year old seedling first flowered 1987. Large size, dark, rose-red semi-double, flower size 12.5 cm across x 6 cm deep with 20 petals, 7 petaloids, yellow anthers and white filaments. Plant growth is spreading and vigorous with dark green leaves 10 cm across x 6 cm wide. Chinese synonym 'Kaoersong'.

Bill Goertz. *(C.reticulata* hybr.), Nuccio's Nurseries Catalogue, 1986-1987; *American Camellia Yearbook,* 1986, p.88, p.20, Reg. No.2020: Large red semi-double with notched, fimbriated and irregular petals and flared stamens. Medium, upright growth. Flowers mid-season to late. A seedling of *C.reticulata,* **William Hertrich** x *C.japonica*, **Clark Hubbs** by Bill Goertz, Duarte, California, USA. The 8 year old seedling first bloomed 1978 and has 11 cm diameter flowers on a vigorous, upright plant. For colour plate see frontispiece, SCCS, *The Camellia Review*, 1986, vol.48, No.1. Sport: **Bill Goertz Variegated.** Chinese synonym: 'Bier Dachilun'.

Bill Goertz Variegated. *(C.reticulata* hybr.), Valdosta Camellias, Nov.1990, ACS., *The Camellia Journal,* vol.46, No.4, p.22: A virus variegated form of **Bill Goertz** - Red blotched white. Originated in USA.

Bill Hairston. *(C.japonica)* ACS, *The Camellia Journal,* Sept 2012, p.26 with colour photo; Regn No.2824; Regd by Mrs Louise Hairston, Birmingham, Ala. ACS, Yearbook 2012, p.171 with colour photo; The 11 year old chance seedling is a red medium to large size semidouble, 12cm x 7.5cm with 28 petals and 14 petaloids, some mingled with the stamens, which have yellow anthers and white filaments. Upright, average growth. Mid-green leaves average 9.5cm x 4.5cm.Flowers midseason.

Bill J. *(C.japonica), American Camellia Yearbook,* 1956, p.59, Reg. No.263: A 9 year old chance seedling, originated by W.R. Johnson, Alabama, USA. Plant growth is upright and open, tall and rangy with leaves, 6 cm long by 4 cm wide. Flowers, 10 cm across by 5 cm deep with 21 petals and 2-4 petaloids, similar to **Blood of China** in colour and form. Blooms mid-season.

Bill Johnston. *(C.reticulata), American Camellia Yearbook,* 1981, p.94, Reg. No.1774: A large, red semidouble to loose, peony form, *C.reticulata* 'Tali Queen', (**Dali Cha**) x **Buddha**; early to mid-season flowering; originated by Dr W.F. Homeyer, Jr., Macon. Georgia, USA. The 11 year old seedling first flowered 1978. Average flower size, 18-20 cm across by 10-11 cm deep with 12-19 petals and 57 rabbit ears and white anthers and filaments. Plant growth, upright, spreading and open, medium in rate with 15 cm x 6 cm light green leaves. See colour plate back cover, ACS, 1983, *The Camellia Journal,* vol.38, No.2.

Bill LaRose. *(C.reticulata* hybr.), *American Camellia Yearbook,* 1981, p.94, Reg. No.1764: A very large, burgundy red, semi-double *C.reticulata* hybrid *(C.reticulata,* 'Crimson Robe' (**Dataohong**) x *[(C.reticulata* 'Cornelian' (**Damanao**) x *C.japonica* **Mrs D.W. Davis**) x *C.reticulata* 'Cornelian'], mid-season to late flowering; originated by Frank Pursel, Oakland, California, USA. The 8 year old seedling first bloomed 1979. Average flower size 12 cm across by 7.5 cm deep with numerous petals and yellow anthers. Plant growth is upright, average and medium in rate with heavily serrated, dark green leaves, 12.5 cm long by 7.5 cm wide.

Bill Lee. SCCS, 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for **Prima Donna Variegated.**

Bill Lee Variegated. Fruitland Nursery Catalogue, 1946-1947. Synonym for **Prima Donna Variegated.**

Bill Mcfarland. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.43 with colour photo. Orthographic error for **Billie McFarland.**

Bill Mura. *(C.japonica),* SCCS, 1962, *Camellia Nomenclature,* p.21: Light rose-pink. Large semi-double with loose petals to peony form, with yellow stamens and petaloids mixed in with inner petals and occasional upright petals. Originated by H. Mura, Augusta, Georgia, USA. Sport: **Bill Mura Variegated.**

Bill Mura Variegated. *(C.japonica),* Cannon, 1962, ACS, *The Camellia Journal,* vol.17, No.1, back cover as 'Bill Mura Var.'. A virus variegated form of **Bill Mura** - Light rose pink blotched white. Originated in USA.

Bill Pearce. *(C.japonica),* ACRS, 1985, *Camellia News,* No.95, p.20, Reg. No.324: Originated by Bill Pearce, Tusmore, South Australia. A chance seedling that first flowered 1979. The formal double white, with a cream centre, 8-9 cm across, blooms mid-season to late on an upright, dense plant with medium size, dark green leaves.

Bill Porter. *(C.japonica),* McIlhenny Catalogue, 1948: White. Large, semi-double with large petals. Medium, compact growth. Mid-season blooming. Originated at Jungle Gardens, Louisiana, USA. Synonym: 'Princess Elizabeth'. Orthographic variant: 'Billy Porter'. See Hertrich, 1959, *Camellias in the Huntington Gardens,* p.21 for black and white photo.

Bill Quattlebaum. *(C.japonica), American Camellia Yearbook,* 1967, p.224, Reg. No.952: A chance seedling originated by Bill Quattlebaum, South Carolina, USA. Plant growth, upright, dense, medium in rate with dark green leaves averaging 7.5 cm x 4.5 cm. The anemone form flower is 15.5 cm across and 7.5 cm deep with 17 petals and 10 petaloids. Colour, wine red. Its centre consists of erect petaloids and flags with creped ends, intermixed with stamens of pink filaments and yellow anthers. Sport: **Bill Quattlebaum Variegated.** Chinese synonym 'Kuate'.

Bill Quattlebaum Variegated. *(C.japonica),* SCCS, 1968, *Camellia Nomenclature,* p.26 as 'Bill Quattlebaum Var.': A virus variegated form of **Bill Quattlebaum** - Wine red blotched white. Originated by Bill Quattlebaum, South Carolina, USA.

Bill Stewart. *(C.japonica), American Camellia Yearbook,* 1957, p.298, Reg. No.306: An 11 year old chance seedling, originated by Mrs H.G. Stewart, Mississippi, USA that first bloomed 1951. Plant growth is upright, dense and rapid in rate, with very green, heavily serrated, twisted and veined leaves are 7.5-10 cm long by 4-5 cm wide. The deep, rose-pink, semi-double flowers are from 12.5-13.5 cm across and 6-7.5 cm deep with 35-45 petals and 7-10 petaloids with stamens intermixed. Flowers early to mid-season.

Bill Stout. *(C.japonica), American Camellia Yearbook,* 1982, p.170, Reg. No.1799: A small to medium size, white lightly marked with rose-red lines and specks, peony form, chance *C.japonica* seedling, early flowering; originated by Miss Ida Merriwether, Florida, USA. The 12 year old seedling first bloomed 1973. Its average flower size is 7.5 cm across by 4 cm deep, with over 30 outer petals and more than 20 inner petals, 150 petaloids with white filaments. Plant growth is upright and average, slow in rate with mid-green leaves, 8-11 cm long by 4-5.5 cm wide.

Bill Woodroof. *(C.reticulata* Hybr.*),* SCCS., 1990, *Camellia Nomenclature,* p.117: Scarlet, occasionally toned lighter. Very large, semi-double to loose peony form. Vigorous, compact, upright growth. Blooms mid-season. Originated in USA by Nuccio's Nurseries, Altadena, California. Chinese synonym: 'Bier Damudan'.

Bill Wylam. *(C.hiemalis), American Camellia Yearbook,* 1955, facing p.242, colour photo. A large, rose-pink semi-double with flushed petals. A seedling of **Shishigashira** originated by the McCaskill Gardens, Pasadena, California, USA. For illustr. see p.348, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III.

Billie McCaskill. *(C.japonica), American Camellia Yearbook,* 1955, p.335, Reg. No.237: A 10 year old chance seedling, originated by McCaskill Gardens, Pasadena, California, USA, that first flowered 1952. Plant growth is average, upright and compact. the medium textured leaves are elliptic to ovate, finely serrate. Flower buds, long and tapering. The softly shaded, pink flowers, 7.5-8.5 cm across, are semi-double with 18 petals, deeply fimbriated. Flowers mid-season to late. See colour photo, p.73, Macoboy, 1981, *The Dictionary of Camelluas in Colour* and the *American Camellia Yearbook,* 1956 facing p.146. Nuccio's Nurseries Catalogue, 1958 also incudes a colour photo. It won the "Margarete Hertrich Award" in 1957. Registration No. 237, *American Camellia Yearbook,* p.335, 1955. Chinese synonym: 'Maika'.

Billie McFarland. *(C.japonica), New Zealand Camellia Bulletin,* 1963, vol.III, No.4, p.5, Reg. No.19, illustr. p.9: A chance *C.japonica* seedling thought to be from **Spencer's Pink.** The plant is upright, sturdy and dense. The flowers are semi-double, 14-15 cm across by 5-6 cm deep. Their colour is Tyrian Rose, (HCC, 24/3) with gold anthers and white filaments fused at the base. Petals number 14-16. Originated in New Zealand by W.M. McFarland. Chinese synonym 'Maifalan'. Orthographic error 'Bill McFarland'.

Billie Rountree. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1997, p.16, Reg. No.2419. A medium size, white striped red, loose peony form chance seedling. Flowers mid-season to late. Originated by Charles T. Elliott Sr, Swainsboro, Ga., USA. *American Camellia Yearbook,* 1997, p.1. The 15 year old seedling has flowers 10 cm across x 6.5 cm deep with 20 petals and golden anthers. Plant growth is upright, open, and average in rate, with dark green leaves 9 cm long x 3.2 cm wide.

Bill's Pink. *(C.reticulata), New Zealand Camellia Bulletin,* 1984, vol.XIII, No.6, p.24, Reg. No.213: A chance seedling of *C.reticulata* **Trewithen Pink** that first flowered 1980; originated by E.W.E. Butcher, New Zealand. It has an open, spreading habit with a rapid growth rate, dark green leaves, 9.5 cm by 4.8 cm. The flowers are peony form, light pink and measure 12 cm across by 6.5 cm deep with 25-28 petals and some petaloids. Filaments are light yellow, anthers light gold. Flowers mid-season to late.

Billotii. van Houtte, 1841, Catalogue, 7:3. Orthographic error for **Billottii.**

Billotte. Stefano Pagliai Catalogue, 1867, p.65. Orthographic error for **Billottii.**

Billottii. *(C.japonica),* Burnier Catalogue, 1840 according to Colla, 1843; van Houtte, 1841, Catalogue, 7:3 as 'Billotii'; Berlèse, 1843, *Iconographie,* vol.3, pl.256: The flower is perfectly round, full and regularly imbricated; the colour is vivid carmine-red with tints of scarlet, becoming deeper to the centre. The petals are somewhat round in 8-9 rows, lightly notched, very numerous, close set, inserted with order, proportionately graduated. A few of the extreme rows have marks and lines of white, with edges streaked and stained white. According to Rovelli Catalogue, 1874, p.30: Imbricated, pink. Originated by Burnier, Turin, Italy. According to van Houtte, 1851, synonyms are 'Burdini', 'Burdiniana' 'Billottii Colla', and "Quadricolor", while orthographic errors include: 'Bilotti', 'Billotii', 'Billotti', 'Billotii', 'Bellotti', 'Bellotiana', 'Burdiana', 'Burdidiana', 'Burdigiana', 'Billotte'.

Billottii Colla. Costa, 1846, Catalogue, p.8. Synonym for **Billottii.**

Billy Cockeye. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.25. Orthographic error for **Billottii.**

Billy Gates. *(C.japonica), American Camellia Yearbook,* 1976, p.159, Reg. No.1394: A *C.japonica,* open pollenated seedling of **Dr Tinsley**, originated by Mrs Henry Stone, Baton Rouge, Louisiana, USA. Plant growth is upright, average and of medium rate, with light green leaves, 6 cm long by 4 cm wide. The anemone to peony form flowers are a fiery red, with 8 petals, 12-16 petaloids, red anthers and filaments. Average size is 5 cm across by 2.5 cm deep. Blooms mid-season to late.

Billy Hardwick. *(C.reticulata).* ACS, Aug. 1996, *The Camellia Journal,* vol.51, No.2, p.30, Reg. No. 2372. A very large, flame red, semidouble, 'Homeyer No.158' x 'Tali Queen' (**Dali Cha**). Flowers mid-season to late. Originated by Marvin Jernigan, Warner Robins, Ga., USA. *American Camellia Yearbook,* 1996, p.1, colour photo before p.1. The 15 year old seedling first flowered 1987. Average flower size is 16.5 cm diameter x 11.5 cm deep with 22 petals, yellow anthers and white filaments. Petals have ruffled edge. Plant growth is upright and vigorous, with leaves 14.5 cm long x 3.7 cm wide.

Billy Mann. *(C.reticulata),* SCCS, 1976, *Camellia Nomenclature,* p.163: Dark pink. Large semi-double. Vigorous, open, upright growth. Mid-season blooming. A reticulata seedling originated by Kramer Bros. Nursery, Upland, California, USA.

Bittinia Major. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.26. Synonym for **Bittiniana.**

Bittiniana. *(C.japonica),* Verschaffelt, 1850, *Nouvelle Iconographie,* Book IX, pl.IV: Distinguished by the large size of its full-bodied, somewhat convex blossoms, of a crimson rose colour, with a few, sparse, white stripes towards the centre and by its large, rounded, emarginated and outspread petals which form a full, compact, little heart at the centre. Originated in Italy by Mariani. Synonyms: 'Bittinia', 'Bittinia Major'. Orthographic errors: 'Bitiniana', Bettiniana'.

Biwaba. (Loquat Leaved), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki,* in section on deformed leaves; Itô, Ko'emon, 1879, *Chinkashû:* Rose red, small single with leaves resembling those of the loquat, leathery, small, sharp serrations, green, strong, waved, keeled, apex twisted. See: Seibundô Shinkôsa, 1979, *Senchinshû,* p.243. Originated in the Kantô District, Japan. Synonym: 'Biwaba-tsubaki'. Different reading: 'Biwaha'.

Biwaba-tsubaki. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.1, p.52, as 'Biwa-batsubaki'. Synonym for **Biwaba.**

Biwaha. Fendig, 1953, *American Camellia Catalogue.* Different reading for **Biwaba.**

Bixia. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p.89. Chinese synonym for **The Czar**.

Biyu. *(C.reticulata),* Yü & Bartholomew, 1980, *American Camellia Yearbook,* p.10: Leaves, oblong to broad-elliptic, apices long acuminate and recurved, bases cuneate, margins coarsely and shallowly serrate, blades arched, 10-11 cm long by 5-6 cm wide. Petals flat, rather short, the corolla looks like a trumpet when fully open, petals, 5-7, arch outwards, arranged in 1-2 whorls, outer whorl light pink, inner milky white with slightly reddish tint, (RHS, CC, 55A to

56A), the stamens and pistil well developed, filaments united at the base. A form corresponding to *C.reticulata f. simplex.* Flowers mid-season. For colour plate see Feng et al., 1981, *Yunnan Chahua,* p.22. Synonyms: 'Flushed Jade', 'Flushed White', 'Flushed White Jade', 'Green Jade'. Different reading: 'Pi-yü'. Originated in Tengchong, China from selected seedlings of wild Reticulata.

Bizan-benten. Different reading for **Miyama-benten.**

Bizan-hime. (Bizan Princess). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.212 with colour photo; English translation p.148. Pale pink, tubular to trumpet shaped single, cylindrical stamen column. Flowers early to late. Leaves narrowly elliptic, medium size, recurved. Upright growth. A natural seedling of the white japonica being grown at a temple on the slopes of Mt Bizan, in the vicinity of Tokushima City. Named and released by Hirotake Yasuda in 1989. From Tokushima Prefecture.

Bizantina. van Houtte, 1841, Catalogue, 7:3. Orthographic variant for **Byzantina.**

Bizarra. von Beidenfeld, 1856, *Practische Grundlehren der Cultur von Camellien,* p.34. Orthographic error for **Bizzarra.**

Bizen. (Old Name of Okayama). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.213 with colour photo; English translation p.148. Medium size, dark red, bellflower shaped single, thick petals, cylindrical stamen column. Flowers early to late. Somewhat upright growth. A cross between **Yuri-tsubaki** and **Eiraku.** Originated by Nobuo Sasai in 1983, released in 1997. From Okayama Prefecture.

Bizzana. Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete.* Orthographic error for **Bizzarra.**

Bizzantina. Isola Madre Catalogue, 1846. Orthographic error for **Byzantina.**

Bizzarra. *(C.japonica),* Luzzatti Catalogue, 1853. No description. Auguste van Geert, 1854, Catalogue No.36, p.33. Franchetti, 1855, *Collezione di Camelie,* p.15: Of average size, very floriferous, pale pink with all the petals streaked white. Burnier Catalogue, 1855-1856: Flower very graceful, small, formed of many petals elegantly disposed in perfect imbrication. Colour, pale rose-red with some petals wholly white. Originated in Italy. Orthographic errors: 'Bizarra', 'Bizzana'.

Blacburniana. Cachet Catalogue, 1840-1841, p.1. Orthographic error for **Blackburnia.**

Black Beauty. SCCS, 1942, *Classification of Camellias,* p.1. Synonym for **Woodville Red** according to Hume, 1947 or for **Campbellii** according to the Pacific Camellia Society, 1946.

Black Betty. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1964-1965, p.2. No description. Originated in USA. No valid listing located.

Black Bird. *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.120 with colour photo; Synonym for **Burakku-bâdo.**

Black Burmania. Whitelegg Catalogue, 1957. Orthographic error for **Blackburnia.**

Black Camellia. Threkeld & Anthony, 1957, *American Camellia Yearbook,* p.164. Synonym for **Kuro-tsubaki.** Also used as a group name for the very dark red camellias from Ôshima, Japan.

Black Cam. *(C.japonica),* Withers, 1979, ACRS, *Camellia News,* No.71, p.15: A very large, very dark red, incomplete double flower. The name is an abbreviation of "Black Camellia" and originated in Japan, but grown in USA.

Black Domino. *(C.japonica),* SCCS, 1962, *Camellia Nomenclature,* p.25: A black-red with dark red stamens. Miniature single. Slow, bushy growth. Late flowering. Originated by Harvey Short, California, USA. This is a member of the "black camellia" group. For colour plate see No.15, p.26, *Encyclopedia of Camellias in Colour,* vol.II, 1978.

Black Dragon. Jenkin's Nursery Catalogue, 1946-1947. Synonym for **Kokuryû.**

Black Dragon Variegated. Thomasville Nursery Catalogue, 1953-1954 as 'Black Dragon Var.'. Synonym for **Kokuryû-shibori.**

Black Gold. *(C.japonica), American Camellia Yearbook,* 1982, p.170, Reg. No.1829: A medium size, black-red semi-double, *C.japonica* chance seedling of **Maroon and Gold,** mid-season flowering; originated by Paul Gilley, Florida, USA. The 5 year old seedling first bloomed 1980. Average flower size 9.5 cm across and 5 cm deep, with 18-20 petals, red anthers, gold filaments. Plant growth is dense and medium in rate with dark green leaves. Chinese synonym 'Heijin'.

Black Hawk. *(C.japonica),* Hogg, 1838, *Magazine of Horticulture,* 4:155: Originated in USA by Floy. Maroon, forming a ball, very double. (Believed extinct.)

Black Hawk. *(C.japonica),* Steffek, 1949, *Plant Buyer's Guide,* p.47; SCCS, 1950, *The Camellia. Its Culture and Nomenclature:* Dark red. Large, semi-double. Upright, slender growth. Not the variety listed in the old literature. Originated in USA.

Black Heart. *(C.japonica),* SCCS, 1966, *Camellia Nomenclature,* p.26: Black red. Small formal double with pointed petals. Medium, compact growth, the new growth with a mahogany red colouring. Mid-season to late flowering. Originated by Harvey Short, California, USA.

Black Jap. (*C.japonica),* Fruitland Nursery Catalogue, 1950-1951, p.20, 32: Dark velvet maroon. Small flower but prolific bloomer. Originated in USA.

Black King. *(C.japonica),* Fruitland Nursery Catalogue, 1949-1950, p.20: Black-red. Medium size, semi-double. Originated by Fruitland Nursery, Augusta, Georgia, USA.

Black Knight. *(C.hybrid),* McCaskill Gardens Catalogue,1965; *American Camellia Yearbook,* 1980, p.161, Reg. No.1583: A large black-red, rose form double *C.hybrid* **Philippa Forward** x *C.japonica* **Kuro-tsubaki.** Flowers mid-season to late. First bloomed 1964. Originated by McCaskill Gardens, California, USA. Flower is 10 cm across x 5 cm deep. Plant growth is upright.

Black Lace. *(C.reticulata* hybr.), *American Camellia Yearbook,* 1971, p.44, Reg. No.1129: A hybrid seedling cross of *C.x williamsii* **Donation** x *C.reticulata* 'Crimson Robe', (**Dataohong**), originated by L.W. Ruffin, Mississippi, USA. Plant growth is compact and upright with medium size, dark green, glossy leaves that average 8 cm long by 4 cm wide. The 11 cm by 4 cm flower is rose form to formal double. It never shows stamens. The flower is dark red with a silvery sheen. All 130-140 petals are sharply incurved down and have a small, narrow, picotee edging of real black on each petal. First bloomed 1965. Blooms mid-season to late. Sports: **Black Lace Peony, Black Lace Variegated.** Chinese synonym: 'Heirongdai'.

Black Lace Benten. (*C.reticulata* hybrid), *International Camellia Journal* 2005, p.128, Reg. No. 53. A leaf sport of the complex hybrid **Black Lace.** Originated by Peter Fischer, Wingst, Germany. Leaves have cream to yellow genetic variegation spreading from the midrib, and are slightly smaller than the parent. Other characteristics as for the parent. First observed 1988 and stable propagation since then. Introduced in 1996.

Black Lace Peony. *(C.reticulata* hybr.), *American Camellia Yearbook,* 1982, p.170, Reg. No.1816: A medium size, dark red peony form mutant of **Black Lace.** Blooms mid-season to late.

Originated by Robert L. Wines, Ocala, Florida, USA. Average flower size 8 cm across by 4 cm deep. Plant growth, average, upright and a medium rate with dark green leaves, 8 cm x 4 cm. Chinese synonym 'Heirongdai Mudan'.

Black Lace Peony Variegated. *(C.japonica),* ACS 1993, *The Camellia Journal,* vol.48, No.4, p.32. Valdosta Camellias Scions as 'Black Lace Peony V.'. White blotched virus variegated form of **Black Lace Peony**. Originated in the USA.

Black Lace Variegated. *(C.reticulata* hybr.), Cannon, 1985, ACS, *The Camellia Journal,* vol.40, No.4, p.13 as 'Black Lace Var.': A virus variegated form of **Black Lace** - Dark red blotched white. Originated in USA.

Black Magic. *(C.japonica),* Nuccio's Nurseries Catalogue, 1991-1992, p.3: Very dark glossy red. Medium, irregular semi-double to rose form. Unusual holly-like foliage, similar to **Holly Bright**. Medium, loose upright growth. Blooms mid-season to late. Originated in USA. Chinese synonym 'Heimofa'. Note: No relation to Fendig's **Black Majic.**

Black Majic. *(C.japonica),* SCCS, 1956, *The Camellia Review* according to Albert Fendig. No description. Originated in USA.

Black Opal. *(C.japonica* hybr.), *New Zealand Camellia Bulletin,* vol.XIV, No.1, p.25, Reg. No.226: *C.hybrid* **Ruby Bells** x *C.japonica* **Kuro-tsubaki.** Intense black-red. Miniature to small, 6-8 cm across x 3 cm deep, semi-double. Red filaments and gold anthers. Late flowering. Flower colour RHS,CC, Grey Purple,187A-B. Dense, slow growth. Leaves, small, 7 cm x 3.5 cm. Young growth is red. Won champion seedling at 1984 N.Z. National Camellia Show. Originated by O. Blumhardt, Whangarei, New Zealand. See colour photo, front cover, 1987, ACRS., *Camellia News,* No.103. Chinese synonym: 'Heisei Danshi', later changed to 'Heidanshi'.

Black Out. *(C.japonica),* Wilmot, 1944, *Camellia Classification Report,* p.5 as originated by W.P. Huested, California, USA. No description.

Black Pearl. *(C.japonica), New Zealand Camellua Bulletin,* 1970, vol.VI, No.5, p.32, Reg. No.43: A chance seedling of *C.japonica* 'Amabilis', (probably **Kamo-honnami** as 'Amabilis') grown by Mrs Martha E. Wilson, New Plymouth, New Zealand. First flowered 1967. It is a close peony form, very dark red, average diameter, 10 cm and 7.5 cm deep. The plant is a dense and slow grower with dark green leaves and it flowers mid-season. Chinese synonym: 'Heizhenzhu'.

Black Prince. McIlhenny 1936, *600 Camellia Varieties.* Synonym for **Konronkoku** imported from Japan in 1920 by Domoto.

Black Queen. *(C.japonica),* McIlhenny, 1941, *700 Varieties of Camellias,* p.3: "(Japan) Has not yet bloomed." No description. (Believed extinct.)

Black Red. *(C.japonica)* ACS, *The Camellia Journal,* June 2013, p.25 with colour photo; Regn No.2845, Originated, registered and propagated by Vernon E. Howell, Lucedale, Miss, USA. ACS Yearbook, 2013, p.106 with colour photo; A 16 year old seedling, first flowered 2002. The very large, 15cm diameter x 7.5 cm, flower is semidouble with 9+ petals, deep red, with black trim not caused by weather. Yellow anthers and pink filaments, (photo shows these in tubular form). Flowers early to mid-season. Long-lasting flowers fall whole. Plant is upright with average growth rate. Dark green leaves average 10cm x 5cm with medium serration.

Black Red Lion's Head. Ikeda, 1976, *American Camellia Yearbook,* p.139. Synonym for **Heidahong.**

Black Sinensis. *(C.sinensis)* ACS, *Yearbook* 2011, p.133. Dark, maroonish green foliage, small pink blooms with a maroonish tint, and maroon roots. Flowers early to midseason. Rounded, compact growth. Offered by Nuccio's Nurseries, Altadena, Calif., USA.

Black Tie. *(C.japonica), American Camellia Yearbook*, 1975, p.235, Reg. No.1358: A 12 year old chance japonica seedling that first bloomed 1968; originated by Spencer C. Walden, Jr., Georgia, USA. Plant growth is medium, upright and average in rate with dark green leaves, 7.5 cm long x 4 cm wide. The formal double type bloom is dark red with 60 petals. Average size, 7.5 cm across and 4 cm deep. Resembles a rose-bud. Blooms mid-season. Sport: **Black Tie Variegated.**

Black Tie Variegated. *(C.japonica),* Gentry, 1971, ACS, *The Camellia Journal*, vol.26, No.4, p.21 as 'Black Tie Var.'. A virus variegated form of **Black Tie** - Dark red blotched white. Originated in USA.

Black Velvet. *(C.japonica), New Zealand Camellia Bulletin*, March 1997, Issue No.126, vol.XX, No.1, p.19, Reg. No. 378. Originated by Jim and Val Bennet. A chance seedling of **Bob Hope,** pollen parent unknown. It is a very dark red-black (RHS.CC.53B–C), medium to large, rose form double or formal double, notable for the dark colour and darker veining. Flower has 35 petals and is 10 cm in diameter. Flowers hold well on the plant before shattering. A 9 year old plant that first flowered in 1990. Flowers mid-season to late. **Blackwater.** *(C.japonica), New Zealand Camellia Bulletin,* 1995, Issue No.120, vol.XIX, No.1, p.47, Reg. No.364: Originated by G.W. Clapperton, Gisborne, New Zealand. Dark red, (RHS.CC.45A), semi-double. Few stamens, 16 petals. Flower 6 cm across x 4 cm deep, slightly conical and outer petals have central white streaks. Slow growth rate with dark green leaves 8 cm long x 4.2 cm wide. A chance seedling that blooms mid-season to late.

Blackburnea. Charles van Geert Catalogue, 1845, p.2. Orthographic error for **Blackburnia.**

Blackburneana. Verschaffelt Catalogue, 1847-1848, p.54. Orthographic error for **Blackburnia.**

Blackburnia. *(C.japonica),* Jacob Makoy et Cie.Catalogue, 1833. No description. Courtois, 1833, *Magazin d'Horticulture,* 1[pt.D]:315. No description. The most complete description is from Berlèse, 1841, *Iconographie*, vol.1 with pl.39 as 'Blackburniana' as deep cherry red to a slightly deeper crimson in colour. Exterior petals, 4 cm in size, are round-oval, considerably cut-out on the margins, creased and channelled, largely imbricated while those following are numerous, smaller, deformed, acuminate, while those in the centre are of many different shapes, in clusters, shortened, upright and forming an anemone-like centre of several centimeters in size. This cultivar is very similar to if not the same as **Althaeiflora.** Synonym: 'Cruenta' according to van Houtte, 1839. Orthographic errors: 'Blackburnii', 'Blackburniana', 'Blakburnia', 'Blackburnea', 'Blackburneana', 'Black Burniana', 'Blacburniana'. Originated in England. Chinese synonym 'Heihuo'.

Blackburniana. Poiteau, 1836, *Revue Horticole*, p.166-170. Orthographic variant for **Blackburnia.** 'Blackburniana' has been almost exclusively used and, at present is regarded as a synonym for **Althaeiflora.**

Blackburnii. Backhouse & Son Catalogue, 1871, p.36. Orthographic error for **Blackburnia.**

Blackii. *(C.japonica),* Cachet Catalogue, 1840-1841, p.1: "Red". Originated in England. (Believed extinct.)

Blackwater. *(C.japonica), New Zealand Camellia Bulletin,* 1995, Issue No.120, vol.XIX, No.1, p.47, Reg. No.364: Originated by G.W. Clapperton, Gisborne, New Zealand. Dark red, (RHS.CC.45A), semi-double. Few stamens, 16 petals. Flower 6 cm across x 4 cm deep,

slightly conical and outer petals have central white streaks. Slow growth rate with dark green leaves 8 cm long x 4.2 cm wide. A chance seedling that blooms mid-season to late.

Blackwell Special. SCCS, 1946, *Camellias,* p.17. Synonym for **Brilliant.**

Blackwell's Special Red. Vanderbilt, 1941, *Camellia Research, II,* p.1. Synonym for **Brilliant.**

Blair Brown. *(C.reticulata* hybr.), ACS, 1985, *The Camellia Journal,* vol.40, No.2, p.31, Reg. No.1974: A very large, dark pink, semi-double to peony form *C.reticulata* seedling of 'Crimson Robe' (**Dataohong**) x **Jean Pursel,** which blooms mid-season to late. Originated by Frank Pursel, Oakland, California, USA. Average flower size is 20 cm across by 10 cm deep. Plant growth is upright and rapid in rate with mid-green leaves, 8 cm x 6 cm. Colour photo see front cover, 1986, ACS, *The Camellia Journal,* vol.41, No.1.

Blakburnia. Burdin Catalogue, 1934, p.18. Orthographic error for **Blackburnia.**

Blanc Double. André Leroy, Angers Catalogue, 1823, p.10. Synonym for **Alba Plena.**

Blanc Fimbriata. Frères Noisette, Nantes Catalogue, 1857, p.34. Synonym for **Fimbriata.**

Blanc Simple. André Leroy, Angers Catalogue, 1823, p.10. Synonym for **Alba Simplex.**

Blanch Maxwell. Wine, 1956, *American Camellia Yearbook,* p.56. Orthographic error for **Blanche Maxwell.**

Blanche. Eastwoodhill Arboretum, 1982, *List of Trees, Shrubs and Climbers,* p.8. Abbreviation for **Blanche Maxwell.**

Blanche Giraldini. de Bisschop Catalogue, ca.1930. Orthographic error for **Bianca Gherardini.**

Blanche Aurea. *(C.japonica),* Gerbing's Azalea Gardens Catalogue, 1941-1942: A new camellia from Middleton Gardens, (Middleton No.25). Four rows of white petals, lemon tinted at the base, make the pleasing structure of this semi-double, white variety. The stamens of this 10 cm bloom are noticeable, wide spreading. Mid-season blooming. Small, round, deep green foliage. Originated in USA.

Blanche de Castille. *(C.japonica),* Galeotti, M., 1854, *Journal d'Horticulture Pratique de la Belgique,* vol.12, p.60: Satiny white, with perfectly rounded interior petals of concave form. Obtained from seed by Donckelaer, Belgium.

Blanche Graham. *(C.japonica), American Camellia Yearbook,* 1960, p.194, Reg. No.479: A 7 year old chance seedling that first bloomed 1960; originated by Julington Nurseries, Inc., Florida, USA. The plant growth is average in habit and medium rapid in rate. The dark green leaves average, 8.5 cm x 5 cm. The loose, peony form flowers, 12.5 cm across and 6 cm deep, are a glowing rose, veined with darker rose, petals edged silvery blue. There are 30-50 petals; the exterior, waved and curved; interior, waved and folded, standing high and apart around centre grouped stamens. Mid-season blooming.

Blanche Maxwell. *(C.japonica),* Wine, 1956, *American Camellia Yearbook,* p.42 as 'Blanch Maxwell': This is a pure white sport of **Pearl Maxwell** with all the good qualities of the parent. It is late blooming with flowers from 12.5 cm across and up to 15 cm. This is another new introduction from S. Hjort, Thomasville, USA.

Blanche Truesdale. *(C.japonica), American Camellia Yearbook,* 1959, p.269, Reg. No.391: A 6 year old seedling of **Elizabeth Boardman,** originated by Truesdale Nursery, South Carolina, USA, that first flowered 1954. Plant growth is medium, rapid, open and spreading. The dark green leaves are 9.5 cm long by 5 cm wide. The white flowers vary in form from semi-double to peony and are 12.5 cm across by 6.5 cm deep, with 15 petals and 1-10 petaloids. Stamens white. Texture fine, almost like tissue. Blooms mid-season.

Blanche Ullrich. Seidel, 1870, Pflanzen Catalog, p.5. Orthographic error for **Madame Ulrich.**

Blanche Ulrich. Jean Verschaffelt, 1860-1861, Price List, p.13. Burdin Maggiore & Co. Catalogue, 1862. Synonym for **Madame Ulrich.**

Blanchette. *(C.sasanqua),* Coolidge Catalogue, ca.1936. A pure white single, very sturdy and upright with dainty, grey-green foliage. Originated in USA.

Blanda. *(C.japonica),* Sweet, 1826, *Hortus Britannicus,* pt.1, p.61: 'Blush Waratah from China'. Described by Berlèse, 1837, *Monographie,* ed.1 as clear cherry red. Leaves 7.5 cm long by 3.5 cm wide, roundish-ovate, narrow at the apex, flat, finely serrate, rather thick, of a dull, dark green. Flower, tolerably large, full, of a cherry red; petals of the circumference, broad, expanded, crenate, sometimes striped with white, those at the centre, small and united in a fascicle. Hibbert & Buist, 1832, *The American Flower Garden Directory,* p.75: "...or 'Blush Waratah', flower in a shape similar to **Anemoniflora,** rather large and of considerable duration." Orthographic error: 'Blandina'. Originated in China.

Blandida. *Catalogue Général des plantes cultivées dans L'establishment de la Société Royale d'Horticulture de Belgique,* 1842. No description. (Believed extinct).

Blandina. *Catalogo Plantarum Cesarii Regii Horti Modiciam,* 1844. Orthographic error for **Blanda.**

Blaze. *(C.japonica),* Nuccio's Nurseries Catalogue, 1959: Medium size, red single. Vigorous, compact growth. Originated in USA.

Blaze of Glory. *(C.japonica),* McCaskill Garden's Catalogue, 1965; *American Camellia Yearbook,* 1967, p.224, Reg. No.909: This brilliant red, anemone form, chance seedling from **Lindsay Neill,** first flowered 1956; originated by McCaskill Gardens, California, USA. Flower formation similar to **Elegans,** 12.5-13.5 cm across and 6 cm deep. Early to mid-season flowering. Plant growth is upright, medium and compact. Chinese synonym 'Rongyao'.

Bleichroeder. Vanderbilt, 1940, *Camellia Research,* p.2. Erroneous synonym for **Otome-shibori.**

Bleichroeder Pink. SCCS Bulletin, Vol.11, No.2, Dec. 1949. SCCS, 1950, *The Camellia. Its Culture and Nomenclature.* Synonym for **Casablanca.**

Bleichroeder Pink Variegated. Laurel Lake Nursery Catalogue, 1964 as 'Bleichroeder Pink Var.'. Synonym for **Sweetheart.**

Bleichroeder White. SCCS, 1950, *The Camellia. Its Culture and Nomenclature.* Synonym for **Hakuotome.**

Blessed Peace. Macoboy, 1981, *The Colour Dictionary of Camellias,* p.136. Synonym for **Dewatairin.**

Bleunienn an Trev. *(C.japonica),* ICS *Journal,* 2008, p.120 with colour photos; An open pollinated seedling originated by Fañch Le Moal, Guingamp, France, on behalf of the Camellia Association of Guingamp. First flowered 1992 at circa 20 years. A thick, dense growing shrub which flowers mid-season to late. The semi-double flower is red (RHSCC 53C) and the prominent central stamen group usually has a few intermingled petaloids. 8-11 cm diameter x 4-5 cm deep.

Blind Plover. *Camellias,* Y.C. Shen, 2009, p.82 with colour photo; Synonym for **Mennai-chidori.**

Blissful Dawn. *(C.hybrid), New Zealand Camellia Bulletin,* 1982, p.52, Reg. No.182: A seedling of *C.x williamsii* **Donation,** the male parent assumed to be the "Wild Retic". Growth habit is upright with average density and medium rate. The leaves, 10 cm x 4 cm, are dark green. The 12 petalled flower is semi-double, 12-13 cm across and 4 cm deep, white at the base and shaded

pink towards the tips, guard petals darker. Mid-season flowering. Originated in New Zealand by Os Blumhardt.

Blizzard. (*C.reticulata* hybrid), C. Aust, *Camellia News*, No.182, Autumn 2010, p.8 with colour photo; Regn No.611-N; A chance seedling of **Brian Variegated.** Medium size, pure white. Flowers are formal double early season, semi-double later. Bushy, very dense and globular growth. Leaves are palish yellow-green, and narrow saluenensis type. Originated by Terence E. Pierson, Jasper's Brush, NSW, Australia.

Blond Betty. *(C.japonica),* Tammia Nursery Catalogue, 1964: A peach pink sport of **Betty Sheffield.** Medium to large size. Originated in USA. Orthographic errors: 'Blonde Betty', 'Boong Betty'. Synonyms: 'Blond Betty Superlative', 'Betty Sheffield Blonde'.

Blond Betty Superlative. Cannon, 1970, ACS, *The Camellia Journal,* vol.25, No.4. Synonym for **Blond Betty.**

Blond Hibiscus. Savige, 1984, *International Camellia Journal.* Synonym for **Baifurong.**

Blond Pink Chrysanthemun Petal. Durrant, 1972, ACRS, *Camellia* News, No.45 as 'Bold Pink Chrysanthemum Petal'. Synonym for **Hanhong Juban.**

Blondy. *(C.pitardii x C.fraterna),* ACRS, 1986, *Camellia News,* No.99, p.22, Reg. No.343 with colour photo on rear cover: Originated by E.R. Sebire, Wandin North, Victoria, Australia. A chance seedling from *C.hybrid* **Snowdrop** that first flowered 1983. The plant has an upright, open growth habit with 6 cm x 3 cm olive green leaves, acute apex and fine serrations. The 5 cm diameter flowers are anemone form and pure white.

Blood Coloured. Berlèse, 1843, *Iconographie,* vol.1 facing pl.172, es 'Blood Color'. Synonym for **Sabiniana.**

Blood of China. *(C.japonica),* Rubel, 1938, Brochure, *Camellia Blood of China:* Large size, vivid salmon red flowers. Flowers 10-12 cm across, comprised of many petals, irregularly placed, twisted and curled, of a loose peony rose form. They are a deep, but brilliant, salmon red with reticulated darker veins, occasionally a few petals in the centre are slightly splashed white. When fully open, a short bunch of golden stamens adds to the colour harmony. Mid-season to late flowering. The bush forms a globular type specimen. Colour photo, Macoboy, 1981, *Dictionary of Camellias in Colour,* p.190 and on p.309, Hume, 1946, *Camellias in America* as 'Victor Emanuel'. This Camellia, originated from an unknown variety in the Stoutz garden, Mobile, Alabama, USA, was purchased by Henry Stoutz in 1905 from the "Industrial Gardeners' Boy's Home". In 1931 Rubel propagated from it at his Longview Nursery, Alabama. Some plants were sold in 1934 as 'Lot No.17' an unknown variety. In the meantime Bellingrath Gardens bought the original plant where it became verbally known as 'Victor Emmanuel' from a fancied resemblance to **Vittorio Emanuele II.** Kiyono Nursery obtained propagating material from Bellingrath Gardens and erroneously listed it as 'Victor Emmanuel' in their 1938-1939 Catalogue. As 'Victor Emmanuel' is a valid synonym for the old Italian variety **Vittorio Emanuele II** published in the *Agrario Botanico,* 1861-1862, it must be rejected as a synonym of **Blood of China.** Synonym: 'Alice Slack'. Sport: **Blood of China Variegated.** Chinese synonym: 'Cixuehong'.

Blood of China Variegated. *(C.japonica),* SCCS, 1974, *Camellia Nomenclature* p.28 as 'Blood of China Var.': A virus variegated form of Blood of China - Deep salmon red marbled white. Originated by H.W. Steindorf, Greenville, Alabama, USA.

Blood of Christ. Rubel, 1936, Wholesale Price List No.74, p.13. Synonym for **Mathotiana Alba.**

Blood of Cina. Floricultura Hillebrand Catalogo Generale, 1995, p.6. Orthographic error for **Blood of China.**

Bloody Mary. *(C.japonica), American Camellia Yearbook,* 1976, p.159, Reg. No.1398: A 1968 chance *C.japonica* seedling that first bloomed 1972. Originated by Mrs Henry Stone, Baton Rouge, Louisiana, USA. The plant growth is spreading, average and medium in rate with dark green leaves, 8.5-11 cm long x 6.5-7.5 cm wide. The semi-double to anemone form blossom is brilliant red with varying number of petals and red anthers and filaments. Average size, 11 cm across by 4 cm deep. The flowers vary from loose, wavy semi-double with a dome of stamens with heavy pollen to a full peony centre. It is also variegated. Blooms early to mid-season.

Bloomfield. (*C.reticulata* hybrid) SCCS, *Supplementary List* 2011; Velvety red. Large to very large, rose form double. Vigorous, upright, open growth. {'Crimson Robe' **(Dataohong)** x ('Cornelian' **(Damanao)** x **Finlandia**)}. Flowers midseason to late. Originated by Daniel Charvet, Fort Bragg, Calif., USA.

Bloomfield (Morris). *(C.japonica).* ACS, *Yearbook* 2011, p.105 as 'Bloomfield'. Collected before 1986 as seed from South Korean islands by representatives of the Morris Arboretum, USA. Vigorous growth, fully branched to the ground, excellent ovate habit. Typical single, scarlet red flowers and excellent foliage. Proven cold hardiness. Top rated plant of the Morris Arboretum seed importations.

Blossom Time. *(C.reticulata),* ACRS, 1974, *Camellia* News, No.55, p.36, Reg. No.163: Originated by E.R. Sebire, Wandin North, Victoria, Australia. Seed parent *C.reticulata* **Buddha,** pollen parent unknown. First bloomed 1970. Plant growth, upright and vigorous, with dull, mid-green leaves 10 cm long by 5 cm wide. The medium pink, 12.2 cm diameter, blooms are incomplete doubles of peony form and are produced mid-season.

Blue Beauty (Naidong). *(C.japonica), Collected Papers,* ICS Congress, Jinhua 2003, *Naming new Cultivars of "Naidong" Camellias...,* Chen Junzhi and Chen Jinshui, p.47 as "Blue Beauty"; Purple cloudy pendent form. Blue-purple flower, cupped corolla.

Blue Blood. Trehane, 1971, RHS., *Magnolia Camellia Yearbook,* No.25, p.124: A 1965 introduction. A 2nd generation *williamsii* hybrid. Orthographic variant for **Blueblood.**

Blue Danube. *(C.x williamsii),* McCaskill Garden's Catalogue, 1960: Medium size. peony form, rose lavender in colour. Vigorous, compact growth. Flowers mid-season. Originated by McCaskill Gardens, Pasadena, California, USA. Chinese synonym: 'Lanse Dounaohe'.

Blue Ridge Sunset. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2005, p.28 with colour photo p.29, Reg. No. 2660. A chance seedling that first flowered in 1994. Originated by C.M. and Lillian Gordy, Ocala, Fla., USA, and propagated by Erinon Nursery, Plymouth, Fla. The 10 cm diameter, rose form double flower is bright lavender pink with a darker centre. Gold anthers and creamy filaments. Layers of petals are raised and separated. *American Camellia Yearbook,* 2005, p.40 with colour photo p.c3. Plant is upright and dense, with average growth rate. Dark green leaves are 11.5 cm x 4.5 cm.

Blue Sky. *(C.japonica),* River View Nursery Catalogue, 1957-1958, p.8. No description. Originated in USA.

Blue Twilght. *(C.reticulata),* SCCS, *Supplementary List,* 2014. Large semidouble with ruffled petals, blush pink with yellow anthers and pinkish filaments. Flowers late. Vigorous, open growth. Originated by Camellia Forest, Chapel Hill, NC., USA.

Blue Velvet. J & F Thoby, Gaujacq, France, Catalogue, 2009, p.1; Red single.

Blue Wabisuke. (Wabisuke). Pépinières Thoby, Carquefou, France, Plant List, 2003, p.16; Red, single.

Bluebird. *(C.x williamsii), New Zealand Camellia Bulletin,* 1977, vol.X, No.3, p.15, Reg. No.131: a putative hybrid of *C.saluenensis* and *C.japonica* that first bloomed 1974; originated by Mrs Ida Berg, Whakatane, New Zealand. The flowers are semi-double with 14-16 petals and some petaloids. The size is 12 cm x 3.5 cm and the colour deep pink with a blue cast. (RHS.CC.Red-Purple Group 67B-C). The plant has as open, upright habit with mid-green leaves, 7 cm x 2.5 cm. Flowers mid-season. Orthographic variant: 'Blue Bird'. Chinese synonym; 'Lanniao'.

Blueblood. *(C.x williamsii),* McCaskill Gardens Catalogue, 1969: Rose-pink with blue overtones. Medium size peony form. Vigorous, bushy growth. A seedling of **Philippa Forward** x *C.japonica* originated at McCaskill Gardens, Pasadena, California, USA.

Blue-Red Prunus Osmanthus Leaf. Feng et al., 1981, *Yunnan Chahua,* p.65. Synonym for 'Qingmeihong Guiye', itself a synonym for **Meihong Guiye.**

Blumenthal's Miniature. *(C.sasanqua),* Foss, 1969, SCCS, *The Camellia Review,* vol.31, No.2, p.16: A very tiny sasanqua, very slow growing. A 2 year graft is only 5 cm high. Leaves are oval, 1.2 cm long with tiny flowers. Originated by C. Blumenthal, St. Ives, NSW., Australia.

Blush. *(C.sasanqua),* Kiyono Catalogue, 1940-1941, p.16. Blush pink, medium size single. Originated in USA.

Blush. Aiton, 1812, *Hortus Kewensis,* 4:235. Synonym for **Incarnata.**

Blush Amabilis. Mulligan, Brian, *Woody Plants in the University of Washington Arboretum,* 1977, p.31. University of Washington Arboretum *Inventory,* 1993, p.19. Synonym for **Pink Amabilis.**

Blush Anne. *(C.japonica),* ACS, *The Camellia Journal,* Sept. 2005, p.28 with colour photo p.29, Reg. No. 2648. A chance seedling that first flowered 1980. Originated by Archie Beattie, Bishopville, S.C., USA, and propagated by the Lee County Historical Society, Bishopville. The 9 cm bi-colour pink semi-double flower has heavy textured and notched petals. Vigorous growth and flowers freely late season. Photo shows a pink edged flower shading to white at the centre. *American Camellia Yearbook,* 2005, p.40 and colour photo p.c3. Dark green leaves are 11.5 cm x 5 cm.

Blush Betty Sheffield. Griffin, ed., 1957, *Camellian,* 8(4):18. Orthographic error for **Betty Sheffield Blush.**

Blush Camellia. Edward's *Botanical Register,* 1816, vol.2, pl.112. Synonym for **Incarnata.**

Blush Ben Parker. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.2. A blush pink sport of **Ben Parker.** Originated in USA.

Blush Could Be. Rogers, 1974, ACS, *The Camellia Journal,* vol.29, No.3, p.21. Synonym for **Wylmer Pool Blush.**

Blush Debutante. *(C.japonica),* Gentry, 1973, ACS, *The Camellia Journal,* vol.28, No.4: A blush pink form of **Debutante**. Originated in USA.

Blush Diddy. *(C.japonica),* Shackelford, 1968, ACS, *The Camellia Journal,* vol.23, No.1: A blush pink form of **Pink Diddy**. The same as the parent except for the colour. Originated in USA.

Blush Edison. *(C.japonica),* Thomasville Nursery Catalogue, 1962: A large, blush pink sport of **Frank Edison.** The same as the parent, except of the colour. Originated by the Thomasville Nursery, Georgia, USA.

Blush Finlandia. McCaskill, 1958, SCCS, *The Camellia Review,* vol.19, No.5, p.18. Orthographic error for **Finlandia Blush.**

Blush Gem. *(C.japonica),* Mason's Nurseries Catalogue, 1968: Delicate blush semi-double with petaloids and stamens intermixed in the centre. Medium size. Mid-season flowering. Originated in New Zealand.

Blush Hibiscus. *(C.japonica),* Overlook Nursery Catalogue, 1942-1943: A very large single to semi-double flower, resembling the giant Mallow Hibiscus. The colour is white with blush pink at the centre. A vigorous grower with large, dark green leaves. Originated in the USA. For illustr. see p.69, Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.I.

Blush Mathotiana. Stonehurst Estate Nursery Catalogue, 1962. Synonym for **Souvenir de Bahuaud-Litou.**

Blush Peony. Savige, 1961, *New Zealand Camellia Bulletin,* vol.II, No.4, p.26. Synonym for **Paeoniflora Pallida.**

Blush Pink. *(C.sasanqua),* McIlhenny 1937, *600 Varieties of Camellia:* A single pink with broad petals. Orthographic variant: 'Pink Blush'. Originated in USA.

Blush Plena. *(C.japonica),* Nuccio's Nurseries Catalogue, 1955, p.4: A sport of **Alba Plena.** Blush pink on first opening, fading to white with age. See illustr. p.23, Hertrich, 1959, *Camellias in the Huntington Garden,* vol.III. Originated in USA.

Blush Purity. *(C.japonica),* Nuccio's Nurseries Catalogue, 1993-1994, p.4: White to blush pink edge. Blooms mid-season to late. Originated in USA as a sport of **Shiragiku** ('Purity'). Chinese synonym 'Xiujie'.

Blush Rosette. *(C.sasanqua),* ACS 1994, *The Camellia Journal,* vol.49, No.4, p.30. Nuccio's Nurseries Advert. No description. Originated in the USA.

Blush Sieboldii. Magnolia Gardens and Nursery Catalogue, 1952-1953. Synonym for **Tricolor Pink.**

Blush Supreme *(C.japonica), American Camellia Yearbook,* 1962, p.214, Reg. No.624: A sport of **Betty Sheffield Blush,** first observed 1959, propagated 1960. The plant growth is medium in rate and of average density, with medium size, mid-green leaves. The light pink, peony form flowers, are 12 cm across and 5 cm deep with 20-25 petals. There is a deep pink border on the outside petal. Blooms mid-season. Originated in USA. Synonyms: 'Blush Supreme Anemone', 'Betty Sheffield Blush Supreme', 'Blush Supreme Betty'.

Blush Supreme Anemone. Gentry, 1967, ACS, *The Camellia Journal,* vol.22, No.5, p.28 as 'Blush Sup. Anemone'. Synonym for **Blush Supreme.**

Blush Supreme Betty. Mark S. Cannon Scion Catalogue, 1963-1964, p.2. Synonym for **Blush Supreme.**

Blush Tinsie. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.2: Blush pink sport of **Bokuhan.** Originated in USA.

Blush Tomorrow. *(C.japonica),* Gentry, 1969, ACS, *The Camellia Journal,* vol.24, No.4: A soft, blush pink form of **Tomorrow**, otherwise the same as its parent. Originated in USA.

Blush (Town's). *(C.japonica),* Alexis Dalliere, 1852, Price List, p.13. No description. von Biedenfeld, 1856, *Practische Grundlehren der Cultur von Camellien....* p.34. No description. Auguste van Geert, 1863-1864, Catalogue No.43, p.33: Small imbricated flower. Petals triangular with poited ends; starry; white and slightly pinkish. Originated in England.

Blush Tricolor. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1957: White blushed pink to blush pink sport of **Tricolor.** Originated in USA. Chinese synonym 'Xiu Sanse'.

Blush Waratah. Hibbert & Buist, 1832, *The American Flower Garden Directory,* p.74. Loudon, ed. 1825, *The Greenhouse Companion,* p.74. Synonym for **Blanda.**

Blush Warrattah. Loudon, 1841, An Encyclopedia of Plants, p.1238. Synonym for **Anemoniflora Carnea.**

Blushing Beauty. *(C.japonica), American Camellia Yearbook.* 1965, p.227, Reg. No.797: A 7 year old chance seedling that first bloomed 1962; originated by Neal Cox, South Carolina, USA. Plant growth, upright and open, rapid to medium in rate, with light green leaves, 11 cm long by 4 cm wide. The formal double flowers are white, blushed pink. Blooms measure 7.5-8.5 cm across and 2.5-3.5 cm deep and have 60 petals. Blooms mid-season. See colour plate, p.73, Macoboy, *The Colour Dictionary of Camellias.*

Blushing Bride. McIlhenny 1937, *600 Varieties of Camellias,* p.4. Synonym for **Feastii.**

Blushing Fountains. *(C.hybrid).* SCCS, *Supplementary List*, 2014. Originated by Camellia Forest, Chapel Hill, NC., USA. A seedling of *C.japonica* x *C.tsaii.* A light pink, small single. Moderate upright growth, with arching branches. Flowers late.

Blushing Maiden. *(C.sinensis) Camellias,* Y.C. Shen, 2009, p.28 with colour photos; A form of *C.sinensis* at Nuccio's Nurseries, Altadena, Calif., USA, which has red leaves and seedpods, and a section of red at the base of the flowers.

Blushing Maiden. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Suibijin.**

Bianca Geraldine. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Gherardini Bianca**

Bo Morris. *(C.japonica),* Morris, 1954, *American Camellia Yearbook,* p.114: We have two cold resistant seedlings that have flowered each year for over 20 years. One, a semi-double, rose-pink, we have named in honor of our daughter, Mrs George Pitt Lachicotte. The flowers are about 8.5-10 cm across. It is a mid-seasom bloomer. Originated in USA.

Bo Nadal. *(C.japonica),* Asociasión Española de La Camelia, *Camelia,* Dec. 2004, p.33 with colour photo; Large, 10-12 cm diameter. Semi-double, rose fuschia, (RHSCC 54B), with rays of a more intense colour from the petal bases. 12 to 15 petals with one or more notches at the edges, cream filaments and gold anthers. Leaves lanceolate, elliptic, acuminate, 10cm x 5 cm, dark green. Flowers mid-season. Originated by Leonor Magariño.

Bo Peep. *(C.japonica),* Stromeyer, 1959; Roger, 1974, ACS, *The Camellia Journal,* vol.29, No.3, p.21, (advert.). SCCS., 1990, *Camellia Nomenclature,* p.20: White, medium size, semi-double. Vigorous, upright growth. Originated in USA by L. Stromeyer, San Gabriel, California.

Boadicea. *(C.japonica),* D.R., "The Camellia", 1904, *Gardeners' Chronicle,* ser.3, 36:53: A soft pink with an edging of white on the petals. Originated in England.

Boardman's Lotus. *(C.japonica),* Vanderbilt, 1941, *Camellia Research, II* p.1. No description. Originated in USA. Synonym: 'Lotus Boardman's'.

Boastful Flower. Macoboy, 1981, *The Colour Dictionary of Camellias.* p.174. Synonym for **Hanajiman.**

Bob Hope. *(C.japonica),* Nuccio's Nurseries Catalogue, 1972; *American Camellia Yearbook,* 1979, p.103, Reg. No.1522: A large to very large, brilliant, dark red, irregular semi-double *C.japonica* chance seedling, flowering mid-season to late; originated by Nuccio's Nurseries, Altadena, California, USA. The 9 year old seedling first bloomed 1969. Average flower size is 11 cm across. Plant growth is upright, dense and medium in rate with dark green leaves, 6 cm long by 4 cm wide. See colour photos: *American Camellia Yearbook,* 1974 facing p.53; and on p.73, Macoboy, 1981, *The Colour Dictionary of Camellias;* also on the frontispiece, SCCS, 1973, *The Camellia Review,* vol.35, No.2. Sport: **Bob Hope Variegated.** Chinese synonym: 'Hebe', later changed to 'Huobo'.

Bob Hope Variegated. *(C.japonica),* Gentry, 1979, ACS, *The Camellia Journal,* vol.34, No.4, p.21 as 'Bob Hope Var.': A virus variegated form of **Bob Hope** - Dark red marbled white. Originated in USA.

Bob Mealing. *(C.japonica),* SCCS, Reg. No.43, 1962; *American Camellia Yearbook,* 1965, p.227, Reg. No.706: A chance seedling that bloomed in 1959 at 10 years old; originated by Dr H.G. Mealing, South Carolina, USA. The flower is semi-double, 8.5-10 cm across, colour Neyron Rose, 623/2 on opening and fading with age, to 623/1. Blooms mid-season to late on a vigorous, upright plant. Has large cluster of yellow stamens.

Bob Sansing. *(C.reticulata* hybr.), *American Camellia Yearbook*, 1981, p.95, Reg. No.1713: A very large, red, semi-double *C.reticulata* hybrid of 'Crimson Robe', (**Dataohong**) blooming mid-season to late. Originated by Frank Pursel, Oakland, California, USA. The 5 year old seedling first flowered 1978. Average flower size 15 cm across by 5 cm deep. Plant growth is upright with average density and rapid rate, with dark green, heavily serrated leaves 12 cm long x 7 cm wide.

Bob Tinsie. Duncan Davies (UK), 1984-1985, Catalogue. Orthographic error for **Bob's Tinsie.**

Bob Tinsley. Burncoose & Southdown Nurseries Catalogue, 1988, p.16. Orthographic error for **Bob's Tinsie.**

Bob White. *(C.japonica),* Cannon, 1971, ACS, *The Camellia Journal.* vol.26, No.4, p.20, (advert.). No description. Originated in USA. No valid listing located. *Camellias,* Y.C. Shen, 2009, p.100 with colour photo; Pale pink semi-double with waved, separated petals. Central cluster of small white petaloids and a few stamens. Diameter 12 cm.

Boban. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.405. Chinese synonym for the Japan *C.japonica* **Bokuhan.** Earlier synonym 'Aisou'.

Bobbie Fain. *(C.japonica*), ACS 1992, *The Camellia Journal,* vol.47, No.4, p.13. No description. SCCS, Camellia *Nomenclature,* p.20, 1993: Clear, bright red with deep red radial veining and occasional whitish variegation on central petals. Large size, semi-double to anemone form. Average, upright growth. Blooms early to mid-season. Originated by Dr. Homeyer, Macon, Georgia, USA.

Bobbie Fain Variegated. *(C.japonica),* ACS 1992, *The Camellia Journal,* vol.47, No.4, p.13: Valdosta Camellias Scions as 'Bobbie Fain V.': Bright red, blotched white virus variegated form of **Bobbie Fain**. Originated in USA. Chinese synonym 'Hua Baobiye'.

Bobby Fain Variegated. ACS 1992 *The Camellia Journal,* vol.51, No.2, p.29, as 'Bobby Fain Variegated'. Orthographic error for **Bobbie Fain**.

Bobbye Dennis. *(C.japonica), American Camellia Yearbook* 1986, p.88, Reg. No.2015: A medium to large, very pale blush pink, anemone to peony form; *C.japonica* **Sadie Mancil** x **Evalina.** Mid-season to late flowering. Originated by Mrs Henry Stone, Baton Rouge, Louisiana, USA. The 20 year old seedling first bloomed 1970. Flower size is 10 cm wide by 5 cm deep with 52 petals. It has 12 outer petals of the same size and 40 others swirled, folded and crinkled with stamens intermixed.

Bobby Guillot. SCCS, 1956, *The Camellia. Its Culture and Nomenclature.* Synonym for **Winifred Womack.**

Bo-Bo. *(C.japonica),* SCCS, 1976, *Camellia Nomenclature*, p.29: Rose-pink. Small, loose peony form. Vigorous spreading growth. Mid-season flowering. Originated in USA by Novick.

Bob's Tinsie. *(C.japonica),* Nuccio's Nurseries Catalogue, 1962: A brilliant red. Miniature to small anemone form. Medium, compact, upright growth. Mid-season blooming. Originated by Nuccio's Nurseries, Altadena, California, USA. For colour photos see: p.130, Macoboy, 1981, *The Colour Dictionary of Camellias* and p.28, *Encyclopedia of Camellias in Colour,* vol.II, 1978. Orthographic errors: 'Bob Tinsie', 'Bob's Tinsley'. Chinese synonym: 'Baobude Aiwu'.

Bob's Tinsley. Burncoose & Southdown Nursery Catalogue, 1987, p.11. Orthographic error for **Bob's Tinsie.**

Bocage. *(C.japonica),* José Marques Loureiro, Catalogue No.1, 1865, p.36, & No.9, 1872-73, p.41: Formal double, colour salmon pink streaked with white. Originated in Portugal.

Bonanza. *(C.x hiemalis), American Camellia Yearbook,* 1962-1963, p.214, Reg. No.623: A 6 year old chance *C.sasanqua* seedling of **Crimson Tide** that first bloomed in 1959; originated by Tom Dodd, Jr., Semmes, Alabama, USA. Plant growth is upright and dense, rapid in rate with dark green leaves, 6 cm long by 3.5 cm wide. The deep red, semi-peony form flowers are 9-10 cm across and 3.8 cm deep and have 20-15 petals and 25-30 petaloids. The stamens are yellow. Has similar characteristics to **Sparkling Burgundy.** Flowers early. Received the Ralph Peer Sasanqua Award in 1965.

Bonardii. *(C.japonica),* Berlèse, 1840, *Monographie,* ed.2, p.218, 237; Illustr. pl.71, Berlèse 1841, *Iconographie:* Leaves, 9 cm long x 5 cm wide, ovate-rounded, thick, prominent venation, sharply serrate, dull green. Buds elongated, scales green. Flower, 8-9 cm across, white with a reflection of flesh-pink just perceptible with a few deep red streaks; outer petals strap-like, on an average, reflexed, notched and imbricated; those following are smaller but of similar shape and likewise imbricated and notched. The corolla is round and rose-like and sometimes irregular. Berlèse 1843, says it was named by M. Paillet, but in his *Monographie*, 1845 says that it was originated by Ridolfi. Paillet, 1844, in his article "Camélias, Rhododendrons et Azaleas" gives himself as the originator. Orthographic variants: 'Bonnardii', 'Bornadii'.

Bonardii Adolpho Striata. *(C.japonica), Magazine of Horticulture,* 1844 as 'Bonardi Adolpho Striata". Orthographic error 'Bonardii Striata Adolphii'. No description. Originated in Italy. (Believed extinct.)

Bonardii Lactea Flore Plena. *(C.japonica)* Ridolfi, 1843, Catalogue of Camellias Cultivated at Bibbiani, as 'Bonardii Lactea Fl. Pl.'. Originated by Ridolfi in Italy. No description. (Believed extinct).

Bonardii Striata Ridolphii. Hovey, 1844, *Magazine of Horticulture.* Orthographic error for **Bonardii Adolpho Striata.**

Bonaria Nova. *(C.japonica),* da Silva, 1880, *Forcing varieties of Camellias in Oporto,* p.3: From Italy. A light, carmine formal double.

Bonbon. *(C.japonica),* SCCS, 1966, *Camellia Nomenclature,* p.27: White, splotched red, miniature peony form. Vigorous, upright growth. Originated by Toichi Domoto, California, USA. For other forms of this cultivar see: **Bonbon Blush, Bonbon Red**. Orthographic variant: 'Bon Bon'.

Bonbon Blush. *(C.japonica),* SCCS, 1974, *Camellia Nomenclature,* p.29: A sport of **Bonbon.** Deep pink with each petal edged white. Originated at McCaskill Gardens, Pasadena, California, USA. For colour photo see p.130, Macoboy, 1981, *The Colour Dictionary of Camellias.* Orthographic variant: 'Bon Bon Blush'.

Bonbon Red. *(C.japonica), American Camellia Yearbook,* 1971, p.44, Reg. No.1162: A sport of **Bonbon** that was first observed 1965 by W.F. Wilson, Louisiana, USA. Plant growth is upright and rapid in rate. Except for flower colour, which is solid red, the flower is identical to the parent variety. Orthographic variant: 'Bon Bon Red'.

Bonbori. (Hand Lamp), *(C.rusticana),* Hagiya, 1967, Kyôto Engei Kurabu, *Tsubaki Tokushû*, No.7, p.14, colour photo; No.181, p.96, *Encyclopedia of Camellias in Colour*, vol.I, 1972; Seibundô Shinkôsha, 1979, *Senchinshû,* p.141, colour photo: Flower, peach pink, peony form with 8 petal rows, bowl shaped, petals, imbricated, approximately 45, stamens, deep yellow, about 140, in fascicles mixed with small petals, 8-10 cm across. Flowers mid-season. Petals protrude from the buds for a time before opening and can be weather damaged. Leaves, 6-8 cm long by 3-4 cm wide, elliptic, reflexed, serrations shallow and sharp; petiole hairy. Growth vigorous, open, spreading. Collected from Tochio City, Niigata Prefecture, Japan in 1959 by Susumu Ishizawa, named and released by Kaoru Hagiya in 1967.

Bonchamps. *(C.japonica),* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.16; White, single to semi-double.

Bonnie Belle. *(C.japonica), New Zealand Camellia Bulletin,* 1989, vol.XVI, No.l, p.28, Reg. No.267: Originated by Les Jury, New Plymouth, NZ., from *C.japonica* 'Tinsie' x **Margaret Davis.** The seedling is 12 years old and first flowered 1980. The plant is of average growth and density and the leaves are light green, 7.5 cm long x 5 cm wide. The miniature, red flower measures 5.5-6 cm across x 5 cm deep. Petals number 7 with about 80 petaloids, with yellow filaments and white anthers. Flowers mid-season. Flowers are bell-shaped with a tight boss of petaloids in white, yellow and carmine. (RHS.CC.47A-B).

Bonnie Chance. Fruitland Nursery Catalogue, 1946-1947. Orthographic error for **Bonne Chance.**

Bonnie Dee. Abbott's Sunny Knoll Nursery Catalogue, 1950, p.17. Synonym for **Henry VIII.**

Bonnie Jean. *Camellia Digest,* 1943, 1(3). Synonym for 'Akebono Pink' as **Akebono.**

Bonnie Lassie. *(C.saluenensis x C.cuspidata),* Sharp, 1957, *Camellias Illustrated*, p.142, illustr. p.39: Large single to semi-double white, edged pink. Early flowering. Originated by James, California, USA from a seedling of the hybrid **Sylvia Mae.**

Bonnie Marie. *(C.hybrid),* Nuccio's Nurseries Catalogue, 1960. A seedling from the cross *(C.saluenen*sis *x C.cuspidata)* **Robbie** x *C.japonica*, **Charlottte Bradford,** originated by James Rare Plant Nursery, Aptos, California, USA. Plant Patent 1801. Phlox pink, large, semi-double to anemone form double with fluted petals. Vigorous, compact, upright growth. For another form of this cultivar see 'FBI'. For colour photo see front page, SCCS, 1960, *The Camellia Review,* vol.22, No.1.

Bonnie Prince Charles. *(C.japonica),* Deutsche, 1950, *Camellian,* (1):35: White centre petals and blush pink outer petals, edges veined a deeper colour. Medium sized, loose peony to anemone form,

10-11 cm across, swirled centre petals mixed with stamens. Originated by McIlhenny, Louisiana, USA.

Bonomia. Sgarvatti Catalogue, 1896. Orthographic error for **Bonomiana.**

Bonomiana. *(C.japonica),* van Houtte, 1858, *Flore des Serres* et *des Jardins de L'Europe,* vol.13, p.9, F.1858: This variety was obtained from seed by Sangalli of Milan, Italy. The flowers are medium sized, formal double, with over 80 petals, pure white background marked with bands and speckles of bright carmine. Also illustrated by Verschaffelt, 1859, *Nouvelle Iconographie,* Book XI, pl.3. Sports include: **Doutor Balthazar de Mello, Dona Jane Andresen, Bonomiana Maculata, Bonomiana Nova, La Bonomiana Rubra, Bonomiana Rosea, Bonomiana Extra.** Synonym: 'Fain's Best', 'Bonomiana Alba'. Orthographic errors: 'Bonomia', 'Bononnana', 'Bonsoniana'. Erroneously equated with **Contessa Paolina Maggi** and **Carolina Franzini.**

Bonomiana I. SCCS, 1950, *The Camellia. Its Culture and Nomenclature.* Erroneous synonym for **Paolina Maggi.**

Bonomiana II. Scott, J. & Son Catalogue, 1889 as 'Bonomiana No.1'. Erroneous synonym for **Carolina Franzini.**

Bonomiana Alba. Newman & Son Catalogue, 1894-1895. Synonym for **Bonomiana.**

Bonomiana Extra. *(C.japonica),* Jean Verschaffelt, 1879, Catalogue, No.21, p.68: Superb improvement on the camellia **Bonomiana.** Obtained by M. Tretiakoff, Moscow, Russia.

Bonomiana Maculata. *(C.japonica),* Scarlatti Catalogue, 1888: Rose Amaranth formal double, outer petals marbled with white; centre, clear rose-red. A sport of **Bonomiana** originated in Italy.

Bonomiana Nova. *(C.japonica,)* Scarlatti Catalogue, 1888: Imbricated rose, lined with carmine and feathered with white and with large stripes and dots of blood red. Originated in Italy as a sport of **Bonomiana.**

Bonomiana Pink. Fruitland Nursery Catalogue, 1948-1949, p.21 . Synonym for **Bonomiana Rosea.**

Bonomiana Red. Fendig, 1953, *Ameriean Camellia Catalogue.* Synonym for **La Bonomiana Rubra.**

Bonomiana Rosea. *(C.japonica),* Linden Catalogue, 1875. A solid rose-pink sport of **Bonomiana.** Synonym: 'Bonomiana Pink'. Originated in Italy.

Bonomiana Rouge. Nantes, *Services des Espaces, Collections,* 1980. Synonym for **La Bonomiana Rubra.**

Bononnana. Gelding Nursery Catalogue, 1887-1888, p.53. Orthographic error for **Bonomiana.**

Bononri. *(C.rusticana),* SCCS, 1972, *Camellia Nomenelature,* p.61: Pink. Medium sized, rose form double. Originated in Japan.

Bonsai. *(C.japonica),* SCCS, 1964, *Camellia Nomenclature,* p.26: Rose red. Miniature, anemone form. Medium sized, upright growth. Mid-season to late blooming. Originated in USA.

Bonsai Baby. *(C.hiemalis),* McCaskill Gardens Catalogue, 1957, "Newest Camellias"; Wylam, 1957, *American Camellia Yearbook,* p.30: The McCaskills also have a small seedling of **Shishigashira** with a dainty foliage and compact growth habits...covered with a profusion of semi-double, bright red flowers, 2.5-3.5 cm across. This seedling can easily be made into a bonsai.

Bonshiratama. Settsu Raikôyen Catalogue, 1938-1939. According to Satomi, 1956, *Camellia Varieties of Japan* it is a sport of **Shiratama** and has the synonyms: 'Kakuba-shiratama', 'Seiganji' and **Rôgetsu.** However **Rôgetsu** was listed earlier by Minagawa, 1933, *Chinkashû* and has priority as the valid name. This name is the local name for **Rôgetsu** in the Chûbu district. See: Tuyama, 1966, *Camellia Cultivars of Japan,* pp.88, 90.

Bonshiratima. McIlhenny Catalogue, 1941, p.3. Corruption for the Japanese name 'Bonshiratama', synonym for **Rôgetsu.**

Bonsoniana. Giles & Son Nursery Catalogue, 1881. Orthographic error for **Bonomiana.**

Bonten. (One of Buddha's names), *(C.japonica),* Kyôto Engei Kurabu, 1969, *Tsubaki Hana to Bunka*, p.39. No description. Originated in Japan.

Bontenhaku-hôshû. ('Hakuhôshu' of Bonten Leaves), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.4: Small size, white, bud centred double. Blooms late. The leaves are the "Bontenba" form. See explanation for **Bontenjiro.** *Nippon Tsubaki - Sasanqua Meikan*, 1998, p.243 with colour photo; English translation p.170. Originated in Shizu'oka Prefecture, Japan by Toshikazu Iwamoto in 1988, as a natural seedling of **Bontenjiro**.

Bontenjiro. (Bonten White), *(C.japonica),* JCS, 1985, Tsubaki, No.24: Colour photo back page: Large white single of 7 fluted petals and a central column of yellow anthers with white filaments joined for their lower third. Fishtail leaves, some with second round leaf pendant at end of main rib. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.54, colour photo and description: Medium size, white, wide campanulate single, with 5-6 wide, reflexed, overlapping petals with ruffled margins and a broad, central stamen column, with lemon coloured filaments, joined for the lower third, and yellow anthers. Late blooming. Leaves dark green, obolanceolate, apices rounded, margins serrate. "Bonten" is one of Buddha's names. In this case it alludes to the form of a small leaf from the main leaf apex. Some leaves are two tiered, with this small leaf extending from the apex of the mother leaf, which is the extreme form of the 'Kingyoba' or fish tailed camellias. Originated in the Tokyo area, Japan. Parentage unknown, named and released by Uichirô Noda in 1985.

Bonten-tsubaki. Abbreviation for 'Bontenba-tsubaki', synonym for **Ranchûba-tsubaki.**

Bontenba-tsubaki. Hisamoto, JCS, 1976, Tsubaki, No.15, p.24: Kyôto Engei Kurabu, 1969, *Tsubaki Hana to Bunka,* p.36. Synonym for 'Ranchû-kingyo-tsubaki', synonym for **Ranchûba-tsubaki.**

Bontiana. *(C.japonica),* Burnier & Grilli Catalogue, 1846 1847. No description. Originated in Italy.

Boom-a-Loom. *(C.sasanqua), American Camellia Yearbook,* 1967, p.225, Reg. No.944: A 7 year old chance sasanqua seedling that first bloomed 1964; originated by Gary Chitty LeCroy, South Carolina, USA. Plant growth is upright and rapid in rate. The upper leaf surface is dark green with raised veins, the underside is lighter. The leaves average 6 cm long by 2.8 cm wide. The semi-double flower is 10.5 cm across and 4 cm deep with 7-10 petals. Colour is pale pink with the petal edges shading to white; petals crinkled, those in the centre, upright. Stamens yellow. Early blooming.

Boong Betty. Bob Wines Nursery Catalogue, 1985-1986, p.1. Orthographic error for **Blonde Betty.**

Boozie B. *(C.x williamsii). American Camellia Yearbook,* 1993, p.69, colour photo facing, p.70: Originated by F.F.Becker. Brookhaven, Mississippi, USA as a chance seedling of **Creation.** The 10 year old seedling first flowered 1986. Medium to large size, very light orchid pink, with magenta rose stripes, deeper at edges, shading to centre; semi-double. Average size bloom 10 cm across x 5.5 cm deep with 47 petals, white anthers and filaments. Plant growth

is upright, spreading, open and vigorous with light green leaves 10 cm long x 2 cm wide. See also colour photo, p.41, *New Zealand Camellia Bulletin,* 1995, Issue No.120, vol.XIX, No.1.

Bopu. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.418; Chinese synonym for the Belgium *C.japonica* **Prince Eugene Napoleon.** Formerly 'Popu'.

Borghese Rosea Nova. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.8: Flower extremely large, (overwhelming) petals numerous, regularly imbricated, some reflexed, colour a bright rose-pink. Originated in Italy. Orthographic variant: 'Borghese Rosea Novissima'.

Borghese Rosea Novissima. Medici Spada.1858, Catalogue. Orthographic variant for **Borghese Rosea Nova.**

Borghese Variegata. *(C.japonica),* Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.4: Medium to large size flower, imbrication perfect as a rose, numerous petals, rather larger than a pink hydrangea, varied in size and of similar colours, but deeper and of blush tint when the flower first opens. Originated in Giardino Borghese, Italy.

Borghesiana. *(C.japonica),* Berlèse, 1840, *Monographie,* ed.2, p.108, 228: Leaves long, well serrate, surface irregular, somewhat dark green; buds, oval, pointed, with yellowish scales; Flower, rather large, double, clear, cherry red, often rose-red, exterior petals in 5 or 6 rows, broad, rounded, reflexed, and profoundly notched at the apex; the centre is composed of an indeterminent number of small petals, upright, close packed, uniform, which, together, form a spherical boss similar to 'Waratah'. Obtained from seed by M. Calciati Borghi, Plaisance, Italy.

Borghi. Fratelli Rovelli Catalogue, 1852, p.12. Orthographic error for **Borgia.**

Borghia. van Houtte, 1852-1853, Catalogue, 48:36. Orthographic variant for **Borgia.**

Borgia. *(C.japonica),* Verschaffelt, 1844, Catalogue No.50, p.18.Oudin Nursery Catalogue, 1845-1846, p.42. No description. Cachet Catalogue, 1845-1846, p.6; illustr.pl.182. p.87, Spae, 1848, *Annals de Gand,* vol.4; Berlèse, 1849, *Annales de la Société Central d'Horticulture de Paris,* p.276: Formal double, 9-10cm across, bright pink, almost cerise with broad white stripes. Petals in 5-6 rows, the outer rounded, the others oblong. Central petals narrow, entire, reflexed and veined red. Imbrication slightly loose. Corolla flat and round: pl.3, Book IV, Vershaffelt, 1851, *Nouvelle Iconographie:* Pale cerise, formal double with broad bands of white in the centre of each petal, the stripes themselves sometimes striated with pink; petals rounded at the exterior becoming almost pointed towards the centre. Van Houtte erroneously gives this camellia as a synonym for 'Empereur de Russie' Orthographic variants: 'Borghia', 'Borghi', 'La Borghia'. Synonym: 'La Borgia'. Originated in Italy.

Borgia Alba. *(C.japonica),* Verschaffelt Catalogue, 1849-1850, p.45. No description. Originated in Italy. (Believed extinct.)

Brehm's Madonna. *(C.japonica),* River View Nursery Catalogue, 1957-1958, p.11: Medium large, rose form double white with a blush pink bud. Originated in USA. Orthographic error: 'Brehem's Madonna'.

Brenda. *(C.japonica),* Shepherd & Co. Nursery Catalogue, 1872, p.22: Medium large, formal double; rose red, veined crimson and striped white. Originated in Australia.

Brenda Ann Hart. *(C.japonica), American Camellia Yearbook,* 1978, p.128, Reg. No.1499: A medium size, rose-pink, formal double, *C.japonica* chance seedling, early to mid-season flowering; originated by Tammia Nursery, Louisiana, USA. The 13 year old seedling first bloomed 1971. The flower has over 100 petals in 12-14 rows. Its average size is 10 cm across by 7.5 cm deep. Plant growth is average in density, upright and rapid in rate with dark green leaves, 7.5-8.5 cm long by 4-4.5 cm wide. For colour photo see back cover ACS, *The Camellia Journal,* vol.33, No.1, 1978. Chinese synonym 'Bulinda'.

Brenda Beach. *(C.japonica),* ACS, Aug. 1996, *The Camellia Journal,* vol.51, No.2, p.30, Reg. No.2368. A large, blush pink mottled with shades of medium pink, semi-double chance seedling, flowering mid-season to late. Originated by Miles A. Beach, Mt. Pleasant, S.C., USA. *American Camellia Yearbook,* 1996, p.1, colour photo before p.1. The 9 year old seedling first flowered in 1991. Average flower size is 12.7 cm wide x 3.7 cm deep, with 18 petals and 8 petaloids. Plant growth is upright and vigorous with dark green leaves 9 cm long x 3.7 cm wide.

Brenda Lee Willbern. *(C.japonica),* ACS 1994, *The Camellia Journal,* vol.49, No.1, p.36, Reg. No.2285: *American Camellia Yearbook,* 1994, p.60: Originated by Dr O.V.Lewis, Picayune, Mississippi, USA. Large white with narrow rose-red stripes. Peony form. Chance seedling. Blooms early to late. The 23 year old seedling first flowered 1980. Average flower size is 11 cm across x 7.5 cm deep with 20 petals, 15 petaloids, and yellow anthers and white filaments. Plant growth is spreading and average with dark green leaves 8 cm long x 2.2 cm wide. Colour pl. between pp.64-65.

Brenda Griffin. *(C.japonica),* SCCS, 1970, *Camellia Nomenclature,* p.28: Blush pink. Large semi-double with fluffy, partly upright, petals. Blooms mid-season to late. Originated by F. Griffin Sr, South Carolina, USA.

Brenda Kay. *(C.japonica),* ACS., 1989, *The Camellia Journal* vol.44, No.3, p.9, Reg. No.2153: Miniature to small size, deep red with wine edges, formal double, *C.japonica* chance seedling. Blooms midseason to late. Originated by Lillian C. Schaefer, Baton Rouge, Louisiana, USA. *American Camellia Yearbook,* 1989, p.119: The 15 year old seedling first bloomed 1979. Average flower size 5-6 cm across x 1.3 cm deep with 96 petals. Plant growth is dense and average with dark green leaves, 7 cm x 3.8 cm.

Brenda Lee Willbern. *(C.japonica),* ACS 1994, *The Camellia Journal,* vol.49, No.1, p.36, Reg. No.2285: *American Camellia Yearbook,* 1994, p.60: Originated by Dr O.V.Lewis, Picayune, Mississippi, USA. Large white with narrow rose-red stripes. Peony form. Chance seedling. Blooms early to late. The 23 year old seedling first flowered 1980. Average flower size is 11 cm across x 7.5 cm deep with 20 petals, 15 petaloids, and yellow anthers and white filaments. Plant growth is spreading and average with dark green leaves 8 cm long x 2.2 cm wide. Colour pl. between pp.64-65.

Brenda Tuck. *(C.japonica), American Camellia Yearbook,* 1966, p.84, Reg. No.820: A 10 year old chance seedling that first bloomed 1957; originated by Dr Albert C. Tuck, Georgia, USA. Plant growth, upright, spreading, dense and medium in rate with dark green leaves averaging

9.5 cm long by 5.5 cm wide. The rose form double flowers, similar to 'Mathotiana', (**Julia Drayton**), 10 cm across and 8 cm deep, are snow white with light coloured stamens. Blooms mid-season to late.

Brendan Fair. *(C.japonica),* Dodd, 1968, *Adventure in Camellia Seedlings,* p.11, colour photo: A medium size, white peony type informal double with large, notched and fluted guard petals and a large, central mixture of small, irregular, erect petals, petaloids and stamens. A seedling of **Mrs William Thompson.** Originated by Richard Dodd, Marshallville, Georgia, USA.

Breschini's Pride. *(C.japonica), American Camellia Yearbook,* 1962-1963, p.215, Reg. No.622: A 5 year old chance seedling that first bloomed in 1960; originated by C. Breschini, California, USA. Plant growth is open and medium in rate with dark green leaves averaging 10.5 cm long by 6 cm wide. The semi-double flowers, 'Herme', (**Hikarugenji**) in form are 11-12.5 cm across by 6 cm deep with 30-35 petals. They have a pink border which fades into creamy white to the centre with yellow stamens. Orthographic error: 'Brechini's Pride'.

Bresley's Victoria. Berlèse, 1841, *Iconographie,* pl.64. Synonym for **Queen Victoria.**

Bressenie. G.G. Gerbing, 1945, *Camellias.* Orthographic error for **Brassenie.**

Bressonie. Fendig. 1953, *American Camellia Catalogue.* Orthographic error for **Brassenie.** Erroneously given as a synonym for 'Lallarook' by Hertrich, 1954, *Camellias in the Huntington Garden,* p.210.

Bretagne. Vanderbilt, 1941, *Camellia Research, II,* p.1. Abbreviation for **Duc de Bretagne.**

Bretti. *(C.japonica),* Vanderbilt, 1940, *Camellia Research,* p.2. No description. Originated in USA. (Believed extinct.)

Brevistyla. Nakai, 1940, *Journal of Japanese Botany,* 16(12):2. *C.brevistyla* (Hay), Cohen Stuart, 1916. A camellia species from Formosa.

Brian. *(C.saluenensis x C.reticulata),* Griffin, ed. 1957, *Camellian; New Zealand Camellia Bulletin,* 1961, p.38, Reg. No.6: A 10 cm semi-double with 15 petals, pointed and in a hose-in-hose arrangement. The colour is HCC 23/3, Rose Madder, stamens yellow. First flowered 1954. Vigorous, upright growth. A seedling of the cross *C.saluenensis x C.reticulata* **Captain Rawes** raised by Dr B. Doak, Papatoetoe, New Zealand. Synonym: 'Brian Doak'. See colour photo, p.41, Richard & Charles Harrison, 1965, *Know Your Garden Series, Trees and Shrubs.* Sport: **Brian Variegated.**

Brian Anderton. *(C.japonica), New Zealand Camellia Bulletin,* March 2003, Issue No.144, vol.XXIII, No.2, p.16, Reg. No. 454. Registered by Carol J. Anderton, Te Puke, New Zealand. A chance *C.japonica* seedling that first flowered in 1987. The flowers are of anemone to peony form, 8 cm diameter x 4 cm deep, with 30-35 petals, 20-25 petaloids and 60-70 stamens. It has a light tea scent. Flowers are a striking red-purple colour, shading from a mid blue-red (RHS.CC.53B) at the inner petal bases to a much darker colour at the tips (RHS.CC.60A). The petals are markedly veined, with the veins so deeply coloured (RHS.CC.79C) that they seem almost black. Petaloid and stamen filaments are light red. The plant is upright, and of average density and growth rate with dark green leaves 8 cm long x 4.5 cm wide. Flowers mid-season to late.

Brian Bohru. (*C.reticulata* hybrid), ACRS, *Camellia News,* 1991, Issue No.119, p.11, Re. No.398: Originated at Mildorrie Camellias, Jasper's Brush, NSW, Australia. A chance seedling of **Brian Doak Variegated** that first flowered 1984 as a 3 year old plant. A semi-double red with 12-14 petals and filaments in a central boss. Size, 8 cm across x 5.5 cm deep. Flowers mid-season to late on a slow growing, dense, spreading bush. Leaves glossy green, keeled,

elongated, margins dentate, apices acuminate, 10 cm long x 2.2 cm wide. Similar to **Brian** but brilliant red.

Brian Doak. Mark S. Cannon Scion Catalogue, 196~1965, p.2. Synonym for **Brian.**

Brian Gaeta. *(C.reticulata x C.granthamiana),* SCCS., 1990, *Camellia Nomenclature,* p.117: Bright pink, speckled white. Large to very large semi-double with wavy petals, Vigorous, spreading growth. Blooms early to mid-season. Originated in USA by Piet & Gaeta, California from the cross *C.reticulata* hybrid 'Pink Sparkle' x *C.grathamiana.* Sport: **Brian Gaeta Variegated.**

Brian Gaeta Variegated. *(C.reticulata x C.granthamiana),* Valdosta Camellia, Nov.1990, *The Camellia Journal,* vol.46, No.4, p.22 as 'Brian Gaerta V.': A virus variegated form of **Brian Gaeta** - Pink blotched white. Originated by Piet & Gaeta, California, USA.

Brian Variegated. *(C.saluenensis x C.reticulata),* Macoboy, 1981, *The Colour Dictionary of Camellias,* colour photo, p.150. A virus variegated form of **Brian** - Rose madder flecked with pure white. Originated in New Zealand. Chinese synonym: 'Huanao'.

Brian's Dawn. *(C.japonica).* ACS *Journal,* June 2012, p.30 with colour photo; Regn No.2020; Originated by Brian Dick, Lakeland Fla., USA. ACS, *Yearbook* 2012, p.172 with colour photo; Medium size flower is 10cm x 5cm, light red with darker red stripes, 40 petals and 20 petaloids. Described as semidouble to anemone form, but photo shows a peony form flower. Upright average growth. Early flowering.

Brianta Verva. Louis Leroy, 1868, Catalogue, p.122. Orthographic error for **Briantea.**

Brice. Fruitland Nursery Catalogue, 1948, p.31. Synonym for **Stardust.**

Brice Number 4. Wright Nursery Catalogue, 1942-1943 as 'Brice No.4'. Synonym for **Stardust** according to Hertrich, 1954.

Brickley's Red. Vanderbilt, 1941, *Camellia Research, II,* p.1. Synonym for **Jarvis Red.**

Bridal Fragrance.(*C.japonica* hybrid). *New Zealand Camellia Bulletin,* March 1996, Issue No.123, vol.XIX, No.4, p.47, Re. No.373: Originated by J.R. Finlay, Whangarei, New Zealand. Fragrant, white, peony flowers, 11 cm across x 6 cm deep with 26 petals and 26 petaloids, yellow anthers and white filaments with some blooms having an imbricated edging to petals. Plant of average growth type and rapid rate. Dark green leaves 11 cm long x 5 cm wide. Blooms mid-season to late. Female parent *C.japonica* hybrid (**Scented Sun** x **High Fragrance**).

Bridal Gown. *(C.x williamsii),* Trehane Camellias Catalogue, 1987, p.5: In California as classic, formal double, but here (Cornwall, UK) a consistent white, peony form with many regular, curved and fluted petals around a few dark stamens. A hybrid between *C.saluenensis* and *C.japonica* **Debutante.** Mid-season to late flowering. Stocky, upright growth with fairly broad leaves. Originated by David Feathers, Lafayette, California, USA.

Bridal Pink. *(C.japonica), American Camellia Yearbook,* 1969, p.159, Reg. No.1061: A 6 year old chance seedling that first bloomed 1963; originated by J.M. Haynie, Alabama, USA. Plant growth is upright, medium, full foliage with dark green leaves, 7.5 cm long x 3 cm wide. The semi-double flower is 10-11 cm across, petals stand up 3-3.5 cm high in 23 rows of 14 or more petals, 4-6 petaloids interspersed with small clusters of gold tipped stamens. Translucent pink with orchid undertones. Mid-season to late blooming.

Bridal Veil. *(C.japonica),* SCCS, 1956, *The Camellia. Its Culture and Nomenclature,* p.30: White. Large single of flat form. Vigorous, open growth. Mid-season blooming. Originated by Harvey Short, Ramona, California, USA.

Bride. *(C.japonica),* Oriental Importing Co. Catalogue, San Francisco, 1887, p.25. "Rose, good". Originated in USA. (Believed extinct.)

Bride of Roses. *(C.japonica),* van Houtte Pere, 1896, Catalogue, 265P:109: Large size, poppy flowered, lively rose colour.

Bride's Boque. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Bride's Bouquet.**

Bride's Bouquet. *(C.japonica),* SCCS, *Bulletin,* Vol.6, No.4, June 1950. SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* White, large, semi-double to anemone form double, 12.5-13 cm across. The petals, notched and twisted, curve towards the centre. The few stamens intermingle with the centre petaloids. Filaments cream-white, anthers golden-yellow. Leaves are oval, dark green, 9.5 cm long x 4.5 cm wide on the average. Medium, open growth with slender stems. Originated by Harvey F. Short, Ramona, California, USA from seed of 'Lotus', (**Gauntlettii**), male parent unknown. Received the "Margarete Hertrich Award" 1951. See p.47, black and white photo, Hertrich, 1959, Camellias in the Huntington Garden, Vol.III. Orthographic errors: 'Bride's Boque', 'Bride's Boquet'.

Bridesmaid. *(C.japonica),* SCCS, 1972, *Camellia Nomenclature,* p.29: Sport of **Margaret Wells.** Blush white with each petal edged with a few fine pencil lines of orchid. Large size. Originated by R. Parschall, Sacramento, California, USA.

Brigadoon. *(C.x williamsii),* SCCS, 1962 *Camellia Nomenclature,* p.118. Rose-pink medium large semi-double; compact upright growth. Blooms mid-season. *C.saluenensis x C.japonica* **Princess Baciocchi** seedling, originated by Armstrong USA. Received an Award of Merit from the RHS in 1974 where it was described as having "Flowers 12.5 cm diameter, semi-double with five rows of petals, very pale pink overlaid with Red-Purple Group 62A, veined 61D".

Bright Baby. Thermal Nurseries (Rotorua), Ltd Catalogue, 1986, p.2. Orthographic error for **Bright Buoy.**

Bright Beauty. *(C.reticulata),* ACRS, 1984, *Camellia News,* No.91, p.22, Reg. No.318: Originated by Edgar Sebire, Wandin North, Victoria, Australia. A seed from **Lasca Beauty** planted 1979, flowered 1982. The 15 cm diameter, light red, semi-double to informal double flowers are produced mid-season. The upright, open plant has dark green, 14.5 cm x 9.5 cm, leaves with prominent veining, numerous shallow serrations and an acuminate apex.

Bright Bob. *(C.japonica), New Zealand Camellia Bulletin,* March 2005, Issue No.150, vol.XXIV, No.2, p.36, Reg. No.469. Registered by R.J. Macdonald, Waiuku, New Zealand. A 12 year old seedling of **Bob Hope,** pollen parent unknown, which first flowered in 1996. Flower is anemone form, with 11-13 petals and a very variable number of petaloids, 50-110, and some intermingled yellow anthers on cream filaments. Flower colour is bright red (RHS.CC.60B) with faint blackish veining. The plant is upright, and of average density and growth rate with dark green leaves 10 cm long x 5 cm wide. Free flowering from very early to late.

Bright Buoy. *(C.japonica), New Zealand Camellia Bulletin,* 1975, vol.IX, No,1, p.29, Reg. No.106: A cross between the camellia variously known as *C.purpurea* 'Fuyajo'or **Kon-wabisuke** and *C.japonica* **Hassaku,** first flowered 1968. Habit, bushy, spreading, with dark green leaves, 8 cm x 5 cm. The flower is single, colour an exceptionally scarlet crimson with golden anthers. Flowers early to late. Originated by Mr Les Jury, New Zealand, who regarded it as an important breeder plant. Sport: **Bright Buoy Variegated.** Orthographic error: 'Bright Baby'.

Bright Buoy Variegated. *(C.japonica),* Cannon, 1979, ACS, *The Camellia Journal,* vol.34, No.4 as 'Bright Buoy Var.': A virus variegated form of **Bright Buoy** - Dark crimson spotted white. Originated in USA.

Bright Eyes. *(C.pitardii* var *pitardii* hyb.), ACRS., 1989. *Camellia News,* No.111, p.12, Reg. No.372: Originated by Edgar Sebire, Wandin North, Victoria, Australia. A chance *C.pitardii* var *pitardii* seedling that first flowered 1978. The semi-double flower has 16 petals of deep pink (RHS.CC.64D),10 cm across x 5 cm deep. The slow growing, spreading, bushy plant, flowers from very early to late. Petals are notched, fluted and folded; filaments are in a central column. Leaves elongate, flat, matt green, margins finely serrate, apices acuminate, 6.5 cm long x 2.5 cm wide. See colour pl. Camellia News No.114, Sept. 1990, p.2.

Bright Eyes (Marion Grove). *(C.hiemalis)* C. Aust., *Camellia News,* Autumn 2011, No.185, p.20 with colour photo; Regn No.660-N. Chance seedling of **Showa-no-sakae,** first flowered 2002. Originated by Justin Jones, Marian Grove Nursery, Mangrove Mountain, NSW, Australia. Small, vivid dark pink to bright red, informal double blooms.

Bright Eyes (Parks). ([*C.saluenensis x C.rosiflora*] x *C.japonica*). *American Camellia Yearbook,* 1993, p.5 invalidly as 'Bright Eyes': Large deep rose-pink semi-double with bright yellow centre. Very free flowering. Favours its japonica parent. Originated by Dr. C.R.Parks, USA. Chinese synonym 'Huiyan'.

Bright Forecast. *(C.japonica),* Forrest, 1985, *Trees and shrubs cultivated in Ireland.* No description. No valid listing located.

Bright Leaf Pink. SCCS, 1984, *Camellia Nomenclature,* p.113. Western synonym for **Liangye Yinhong.**

Bright Leaf Spinel Pink. Yü & Bartholomew, 1980, ACS, *The Camellia Journal,* vol.35, No.2, p.20. Synonym for **Liangye Yinhong.**

Bright Pink. The Pacific Camellia Society, 1946, *Camellia Nomenclature,* p.6. Synonym for **Marchioness of Exeter.**

Bright Pink Duc d'Orleans. Fendig, 1953, *American Camellia Catalogue.* Erroneous synonym for 'Stardust', itself a synonym for **Marguerite Gouillon Rose.**

Bright Red Gown. Yü & Bartholomew, 1980, ACS, *The Camellia Journal,* vol.35, No.2, p.20. Western synonym for **Dahongpao.**

Bright Red Nine Hearts. Waterhouse, 1970, ACRS, *Camellia News,* No.40, p.9. Synonym for **Yanhong Jiuxin.**

Bright Shadows. *(C.sasanqua),* Wylam, 1956, *American Camellia Yearbook,* p.27: Still another of the McCaskill Sasanqua seedlings which are especially adapted to use as ground covers, this is a large flowered white, introduced under the name 'Bright Shadows' because of the masses of brilliant white which cast bright shadows on the foliage. Originated in USA.

Bright Sprite. *(C.japonica),* SCCS, 1964, *Camellia Nomenclature,* p.26: Orange red. Miniature semi-double with loose, high folded petals and sometimes, centre petaloids. Early to mid-season flowering. Medium, upright growth. Originated by W. Wylam, California, USA.

Brighton Special. *(C.japonica),* Spencer, 1957, ACRS, *Camellia Annual,* No.4, p.22: A soft pink, full peony, informal double of unknown parentage. Originated in Australia.

Brigida Rizzini. *(C.japonica),* Torsanlorenzo, Catalogue, 1984-1985: Formal double white with stripes of rose-red. Medium size. Originated in Italy.

Brilhante. *(C.japonica),* José Marques Loureiro, Catalogue No.1, 1865, p.31, & No.9, 1872-73, p.41: Anemone form to semi-double, vivid cherry, almost always splashed with white. Originated in Portugal.

Brilliant de Casoretti. Ysabeau, ed., 1848-1849, *Jornal d'Hortkulture Pratique de la Belgique,* vol.6, p.348. Synonym for **Brillante.**

Brillant d'Italie. van Houtte, 1846-1847, Catalogue, 27:20. Synonym for **Brillante.**

Brillante. *(C.japonica),* van Houtte, 1841, Catalogue. 7:3. For illustr. see pl.II, Book II, Verschaffelt, 1848, *Nouvelle Iconographie* as 'Brilliante'. A brilliant white, large, formal double, 11 cm across, buds, large. rounded, with green scales; leaves, oval elliptic, sharply serrate. Originated by M Casoretti, Italy. Synonyms: 'Briantina', 'Brillant d'Italie', 'Brilliant de Casoretti', 'Brillante Casoretti', 'Alba Briantana', 'Alba Briantea'. Orthographic errors: 'Brilhante', 'Brilliant'.

Brillante Casoretti. Auguste van Geert Catalogue, 1848, p.15. Synonym for Brillante.

Brillante Seconda. *(C.japonica),* Luzzatti, 1851, *Collezione di Camelie,* p.8 as 'Brillante 2da': Light red with the first rows of petals imbricated like a star while the centre forms a tuft of small petals.

Franchetti, 1855, *Collezione di Camelie,* p.15: Cherry red, spotted with white; imbricated. Orignated in Italy.

Brilliana. *(C.japonica),* Ghent Exhibition Catalogue, 1847, p.33, by the trader Jean van Hove-De Caigny, mentioned as follows; First time in flower, coming from **Florida** fertilized by 'Goussonia'. Originated in Belgium, breeder unknown.

Brilliance. *Calendar,* 2014. Chin Shiang Josme Camellia Nursery, Taichung City, Taiwan. Photo of a semidouble floiwer with raised layers of petals. White with a bright red picotee edge. No other information.

Brilliancy. *(C.sasanqua),* Overlook Nursery Catalogue, 1939-1940, p.39: The colour is the same as **Cleopatra,** bright cherry red, but the flower is large and single. The leaves are narrow and thick, dark shiny green. Imported from Japan in 1933 but found to be incorrectly named so was given the name **Brilliancy** by K. Sawada. See black and white photo, p.281, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III.

Brilliant. *(C.japonica),* Gerbing's Azalea Gardens Catalogue, 1938-1939, Full, double red of a most brilliant colour, unusual shade, with very dark, glossy foliage. A bushy grower. Mid-season blooming. Synonyms: 'Blackwell's Special', 'Blackwell's Special Red', 'Brilliant Red', 'Tutcheria', 'Paloma', 'Poorman's Purple Dawn'. Originated by Blackwell, USA.

Brilliant Bells. *(C.williamsii),* Camellias Aust., *Camellia News,* Spring 2012, p.26 with colour photo; Originator Ian Hinchley, Narrandera, NSW.; A chance seedling of **Waltz Dream**, first flowered 2003. A trumpet shaped miniature to small single with 5-6 slightly ruffled, orchid rose petals, similar colour to parent. Flowers 5.5-7cm x 3-4cm. Divided pistil extends above pale yellow filaments and bright golden anthers, which dull quickly. Upright, spreading plant, medium growth rate. Leaves are flat, glossy, elliptic, mid-green, 8.5cm x 4.5cm. Small, pear-shaped seedpods. Flowers early to late season.

Brilliant Butterfly. *(C.reticulata), New Zealand Camellia Bulletin,* 1966, vol.IV, No.5, p.32, Reg. No.26: A hand pollenated seedling of *C.reticulata* 'Wild Form' x 'Butterfly Wings' (**Houye Diechi**). Originated by Dr Jane Crisp, New Zealand. The flower form is open semi-double with 19-12 orbicular petals, notched in the centre. The flower is 10-12 cm across and 8-9 cm deep. The colour is rose-red (HCC Rose-red 724/2), with a brilliant iridescence. Habit, well furnished and vigorous. Foliage is dark green with leaves up to 12 cm long, keeled and with typical reticulata venation and serration. Chinese synonym ''Yanhudie'.

Brilliant Genji. Macoboy, 1981, *The Colour Dictionary of Camellias,* p.56. Synonym for **Hikarugenji.**

Brilliant Red. Barrios Nursery Catalogue, 1954-1955. Synonym for 'Brilliant', itself a synonym for **Brillante.**

Brooklynia. *(C.japonica),* Wilder, 1844, *Magazine of Horticulture,* 10:150. Originated by Smith. Not adequately described. *The American Garden Magazine and Register,* 1844, first listing. Hovey, 1848, *Magazine of Horticulture,* 12:292: One of the very best, a rich dark rose, perfect in form, superbly imbricated; this is a seedling of Mr J.B. Smith of Philadelphia, USA and was accidently found among a lot of plants purchased at his sale some years ago. The variety at present under this name is blotched with white, which is probably a viral infection picked up along the way. It is illustrated and described in Hertrich, 1954, *Camellias in Huntington Gardens,* vol.I, p.66, 69. where it is described as a formal, imbricated double; spinel pink 0625/1, petal margins shading to 0625/2 and /3 with the bud centre, 0625 self colour, splashed white in irregular patterns, 8 cm across by 4 cm deep. Leaves; obovate, tending to cup, 8-10 cm long by 5.5 cm wide, dark glossy green, thick, coarsely serrate, apices abrupt pointed. Vigorous, bushy growth, Late flowering. Orthographic errors: 'Brookliana', 'Brookleyana', 'Brooklinia', 'Brooklyana', 'Brooklyni', 'Brooklyn', 'Brookyniana', 'Brokliniana', 'Brooklynana', 'Broockliana'. Synonym: 'Orton Pink'. SCCS, 1945, *Camellias,* erroneously equates this with a variegated form of 'Barbara Lodge', **(Marianna Gaeta).**

Brooklynia Pink. *(C.japonica),* Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II, p.50 with a black and white photo: Flower, complete formal double; outer petals crimson 22/self; margins, veins and inner petals, neyron rose 623/2 and /3 setting the main colour tone. The heart of the flower is a soft rose, 10 cm across by 4.5 cm deep with about 75 petals, near obovate, gently reflexed. Leaves near elliptic, 10 cm long by 5 cm wide, glossy green, heavy leathery texture, coarsely serrate; apices long pointed, venation, light above, pronounced below. Habit vigorous and compact. Note: This cultivar appears unrelated to the original **Brooklynia.**

Brooklyniana. van Houtte, 1844-1845, Catalogue, 18:8. Orthographic variant of **Brooklynia.**

Brooks. *(C.japonica),* Lindo, (before 1945) according to Hume, 1946, *Camellias in America.* White and deep pink. Large formal double. Originated in USA by Orton.

Brook's Kyoko. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.2. No description. Originated in USA. No valid listing located.

Brook's Variegated. *(C.japonica),* Lindo, 1940-1941, Price list. No description. Probably the same as 'Brooks'.

Brooksiana. *(C.japonica),* Loddiges Catalogue, 1836, p.24. No description. Berlèse, 1837, *Monographie,* ed.1, pp.67, 127, as 'Brocksiana': Leaves 7.5 cm long x 6 cm wide, round-ovate, barely cordiform, horizontal, sometimes with touches of yellow, prominent venation, dark green. Flower about 6.8 cm across, semi-double, approaching rose form; cherry red, petals broad, not numerous, displayed with grace. The flower is the form of 'Roi des Pays-bas'; sometimes with stamens in the centre. This variety was confused with **Brochii,** which, however, has banded petals. Orthographic error: 'Brockiana', 'Brockioni', 'Brocchiana', 'Brokeaa', 'Broockliana', 'Brookiana', 'Broeckiana', 'Broockiana'. Originated in England.

Brookside. *(C.japonica), American Camellia Yearbook,* 1966, p.85, Reg. No.849: A 6 year old seedling, first bloomed 1959, originated by C.A. Coddingham, Florida, USA. Plant growth is upright, sturdy and dense with dark green leaves averaging 5.5 cm long by 4 cm wide. The

anemoneform flower is light rosy pink, shading deeper pink on outer petals with bright yellow stamens with trumpet tips. Bloom is 13.5 cm across by 4 cm deep with 12-15 petals and numerous erect petals and rabbit ears. Blooms early to mid-season.

Brooksie Anderson. *(C.sasanqua),* SCCS, 1962, *Camellia Nomenclature, p.* 113: Light orchid pink. Small double. Slow, compact growth. Early flowering. Originated by R.E. May, USA.

Brooksie's Rosea. *(C.japonica),* SCCS, 1968, *Camellia Nomenclature,* p.29: Highly variegated form of **Rosea Superba.** Originated by Mrs B. Anderson, Timmonsville, South Carolina, USA. Brovni. Fratelli Rovelli Caralogue, 1852, p.12. Orthographic error for **Brownii.**

Brownii. *(C.japonica), Floricultural Cabinet,* 1838, p.28: Double dark red. Makoy Catalogue, 1838. Berlèse, 1843, *Iconographie,* vol.2: Flower 10 cm across, full, irregular peony form; colour, deep salmon red. Exterior petals in 3-4 rows, broad oval; following, long oval of irregular form, notched at the apex; numerous centre petals with fascicles of petaloids forming a mass of 5 cm diameter. Erroneously believed by some to be synonymous with **Colvilii Rubra.** Originated in England. Mertens & Fontaine, *Collection de cent espèces.....camellia,* 1845, pl.38. Named for Sir Robert Brown, friend of Sir Joseph Banks. Orthographic error: 'Browni', 'Brovni'.

Brownii Nova. *(C.japonica),* Jacob Makoy et Cie Catalogue, 1838, p.16.No description. Rousseau Catalogue,1842-1843, p.1: Salmon red. van Houtte, 1843-1844, Catalogue, 12:uu, as 'Browni Nova'; Berlèse, 1845, *Monographie,* ed.3, p.247: Flower a full rose form double, sometimes with white markings. Habit of growth, pyramidal. Originated in Italy. Synonym: 'Brownii Nova Vera'.

Brownii Nova Vera. van Houtte, 1847-1848, Catalogue,31:26. Synonym for **Brownii Nova.**

Brownii Vera. *(C.japonica),* Berlèse, 1843, *Iconographie,* vol.3, pl.235 and facing page: The flower, 11 cm across, is full, regular, rounded, of an orange-crimson with touches of vivid scarlet. The petals are numerous, rounded, slightly emarginate, opening horizontally, imbricated regularly from the circumference to the centre, with occasional white markings. Sometimes the corolla is peony form. There is in commerce, a second camellia named **Brownii.** However this is different and originated in England while **Brownii Vera** originated in Belgium.

Brown's Red. *(C.japonica),* Kiyono Catalogue, 1934, p.12; black and white photo, p.51, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II: Flower incomplete double peony form with about 15 large outer petals and a centre of small, incurved petals and petaloids with rarely visable stamens with red filaments and yellow anthers. Colour is Turkey Red 721/3 with 721/2 veining; slight variegation on petaloids. Flower 9-10 cm across x 4 cm deep. Leaves, broad-elliptic to broad ovate, up to 9 cm long x 5.5 cm wide, dark glossy green, very shallowly serrated; apex short pointed. Habit, upright with a spreading tendency; Mid-season blooming. Sport: **Brown's Variegated.**

Brown's Variegated. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.30: A virus variegated form of **Brown's Red** - Turkey red blotched with white. originated in USA.

Bryan Doak. RHS, *Rhododendrons with Camellias and Magnolias,* 1986, p.71. Synonym for **Brian.**

Bryan McMahon. *(C.japonica),* Dodd, 1968, *Adventure in Camellia Seedlings,* p.14 colour photo: A medium size, mid-pink, peony form flower with a few stamens visible in fascicles in the centre. A seedling of **Rosary** originated by Richard Dodd, Marshallville, Georgia, USA.

Bryan Wright. *(C.japonica), American Camellia Yearbook,* 1949, p.240: A seedling of **Martha Wright** raised by Miss Beatrix Hoyt, Georgia, USA. Medium large semi-double, to loose incomplete double, light pink, colour between **Incarnata** and **Otome**; golden stamens interspersed with petals. Leaves, medium size, glossy green, round oval, 11 cm long by 5.5 cm wide, texture thin, serrations wide and prominent. American Camellia Society Registration No.22, 1954. Black and white photo, Sharp, 1957, *Camellias Illustrated,* p.95. Colour plate, Fendig, 1953, *American Camellia Catalogue.* Orthographic error: 'Bryon Wright'.

Bryant White. *(C.reticulata),* ACS, *The Camellia Journal,* Sept. 2013, p.27 with colour photo; Regn No.2867; Originated by Hulyn Smith, Valdosta, Ga., USA. ACS, *Yearbook,* 2013, p.107 with colour photo; A 20 year old seedling, first flowered 2000. Registered and propagated by Randolph Maphis, Tallahassee, Fla. Large size, 10cm diameter x 3.8cm deep, semi-double flower is flame to dark red. Heavy petal texture. Anthers yellow and filaments pink fading to white (Photo shows these in tubular form). Flowers late. Plant habit is open, and growth rate slow. Dark green leaves average 11.5cm x 6.5cm with low serration.

Bryanna Nicole. *(C.japonica),* ACS, *The Camellia Journal,* Sept. 2006, p.29 with colour photo, Reg. No. 2685. A chance seedling that first flowered in 2001. Originated by by Don Bergamini of Martinez, Calif., USA. The 7 cm diameter, anemone form flower is vibrant pink, washed with lighter pink, and has 8 petals, about 50 petaloids, with the central ones sometimes of petal size. Plant is upright, with average growth, and blooms mid-season. *American Camellia Yearbook,* 2006, p.54 with colour photo. Dark green leaves are 9 cm x 5 cm. Some yellow anthers on white filaments are interspersed in the petaloids.

Bryan's Red. *(C.sasanqua).* Dancraft Nurseries Catalogue, Wilberforce, NSW, Australia, 1997, p.1: Medium size, brilliant pink, formal double, fragrant with spreading bushy growth. Early

blooming. Originated in Australia. Note: Fragrance indicates that this is a rose form rather than a true formal double.

Bryon Wright. Thomasville Nursery Catalogue, 1953-1954, p.23. Photo, p.22. Orthographic error for **Byran Wright.**

Bubbles. *(C.saluenensis x C.reticulata), New Zealand Camellia Bulletin,* 1973, vol.VIII, No.3, p.25, Reg. No.85: An open pollenated hybrid seedling raised by Mrs Ida Berg, Whakatane, New Zealand. The female parent is an unnamed *C.saluenensis x C.reticulata* 'Crimson Robe', (**Dataohong**) seedling and the pollen parent a *C.reticulata.* The plant has an open, upright habit. The leaves are mid-green, 9 cm x 4 cm. The flower is semi-double with 12-14 petals, gold anthers with white filaments fused at base. The colour is Red Purple Group 58B and size 10-11 cm across by 4 cm deep. Early flowering.

Bubbles Rivett. (*C.reticulata* hybrid). *New Zealand Camellia Bulletin,* 1994, Issue No.118, vol.XVIII, p.4, Reg. No.353: Originated by Mr & Mrs J.B. Rivett, Whakatane, New Zealand. A chance seedling of peony form with glowing red (RHS.CC.51A) flowers with high rabbit ears and outstanding stamens, yellow anthers on salmon pink filaments. The flower is 14 cm across x 7 cm deep with 20 large petals and 12 small ones. Plant is of spreading, open growth of medium rate with dark green leaves 15 cm long x 8 cm wide. Blooms mid-season to late.

Buccaneer. *(C.japonica),* ACS, 1961, *The Camellia Journal,* vol.16, No.2, p.32; *American Camellia Yearbook,* 1962-1963, p.215, Reg. No.669: A 9 year old chance seedling that first bloomed 1955; originated by J. Weisner, Florida, USA. Average, upright, dense growth, medium in rate with dark green leaves, 10.5 cm long by 5 cm wide. The semi-double, rose-red flowers, similar to 'Donckelaeri' ('Masayoshi'), are 12.5-14 cm across and 5 cm deep with 12-14 petals, none too many petaloids and pink stamens. Mid-season flowering. Sport: **Buccaneer Variegated.**

Buccaneer Variegated. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964. p.2: A virus variegated form of **Buccaneer** - Rose-red variegated with white. Originated in USA.

Buchiana. André Leroy, Catalogue, 1847. Orthographic error for **Buckliana.**

Buck's Cookey. *(C.japonica),* Buck's Nursery Catalogue, 1963; *American Camellia Yearbook,* 1965, p.228, Reg. No.669: An 8 year old chance seedling that first bloomed 1958, originated by Buck's Nursery, Georgia, USA. Plant growth is upright, average in density and medium in rate with light green leaves, 7.5 cm long by 3 cm wide. The semi-double flowers, similar to 'Donckelaeri' (**Masayoshi**), are a deep, dark red with yellow stamens. They are 11 cm across and 7.5 cm deep with 18 petals. Flowers early to mid-season.

Buck's Dew Drop. *(C.japonica),* Buck's Nursery Catalogue, 1964; *American Camellia Yearbook,* 1965, p.228, Reg. No.670: A 10 year old chance seedling that first bloomed 1959; originated by Buck's Nursery, Georgia, USA. Plant growth, upright, average in density, medium in rate with dark green leaves 10 cm long by 4.5 cm wide. The white, peony form flower, similar to **Debutante**, is 10 cm across and 5 cm deep with 6 petals and 80-90 irregular petaloids. Flowers early.

Bucksiana. *(C.japonica),* Berlèse, 1840, *Monographie,* ed.2, p.110, 228: Flower about 8 cm across, double, light carmine, petals not very numerous, oblong, well imbricated, notched. Those in the centre are reflexed, small, not numerous, mixed with some stamens. The flower is a flattened rose form. Originated in Belgium. Orthographic error: 'Bucktiana'. For illustration see Berlèse, 1841, *Iconographie,* pl.52.

Bucksii. Berlèse, 1840, *Monographie,* ed.2, p.228. Synonym for **Bucksii Vera.**

Bucksii Vera. *(C.japonica),* Berlèse, 1840, *Monographie,* ed.2, p.109: Leaves 4-5 cm wide by 9 cm long, lanceolate, very acuminate, surface rough, obscure serrations, of a dark green, similar to **Woodsii;** bud, large, obtuse with whitish scales; flower over 10 cm across, full. orange-red; exterior petals 2.7 cm wide, round, in four rows, veined a vivid dark red, the others reflexed, well notched, and imbricated with more or less regularity; those at the centre are short, numerous and twisted into various forms, fasciculate and forming a depressed rosette. Originated in England. For illustration see pl.47, Berlèse, 1841, *Iconographie,* vol.1.

Bucktiana. Berlèse, 1840, *Monographie,* ed.2, p.228. Orthographic error for **Bucksiana.**

Bud Mancill. *(C.japonica). American Camellia Yearbook,* 1972, p.126, Reg. No.1167: A 10 year old chance seedling that first bloomed 1963; originated by E.N. Mancill, Louisiana, USA. Plant growth is spreading, open and medium in rate with dark green leaves, 8 cm long by 2.5 cm wide. The formal double bloom is shell pink with rose stripes and is 10 cm across. Blooms mid-season to late.

Budda. SCCS, 1954, *The Camellia. Its Culture and Nomenclature,* p.89. Orthographic error for **Buddha.**

Buddah. American Association of Nurserymen Inc.1957, p.30. Plant Patent number 1215, granted Sept. 1st, 1953, Walter E. Lammerts, California, organiser, assigned to Descanso Distributers Inc. La Canada, California, USA. Orthographic error for **Buddha.**

Buddha. *(C.reticulata* hyb.), NCCS, black and white photo, p.4, *The Yunnan Reticulatas,* vol.8, No.1, Oct. 1954: Rose pink. Very large, irregular semi-double with erect, wavy petals. Vigorous, upright growth. Blooms mid-season. One of two new reticulata hybrids originating with Professor Tsai, Kunming, Yunnan, China which were sent to Descanso Gardens as seedlings. It is believed to be a cross between *C.reticulata* and *C.pitardii* var *yunnanica.*Orthographic errors: 'Budda', 'Buddah'. Plant patent No.1215, 1953. RHS Award of Merit, 1962. For colour illustrations see: p.150,146, Macoboy, 1981, *The Colour Dictionary of Camellias;* p.52, Sharp's, 1957, *Camellias Illustated;* Frontispiece, *New Zealand Camellia Bulletin*, vol.VI, No.1.

Buddha's Child. *(C.hybrid),* Parks,1982, *International Camellia Journal,* No.14, p.31: A few crosses were made to combine the primary *C.sasanqua* x *C.reticulata* hybrid with *C.reticulata.* The plant texture and habit favours *C.reticulata* but the *C.sasanqua* grandparent contributes a marked improvement in texture and growth. We have one of these back-crosses with a markedly fastigate growth habit and a tendency to bloom heavily that is derived from the *C.reticulata* cultivar **Buddha.** Because of its general similarity to its mother, **Buddha** it has been named 'Buddha's Child'. *American Camellia Yearbook*, 1982, p.170. Reg. No.1816: A medium large, phlox-pink semi-double, *C.reticulata* hybrid *(C.reticulata* **Buddha** x [*C.sasanqua x C.reticulata* **Show Girl**]), originated by Dr Clifford Parks. The 15 year old seedling has flowers 10 cm across x 4 cm deep with 12 plus petals, a few petaloids, yellow anthers and cream filaments. Originated in USA.

Buddha's Crown. Peer, 1954, *American Camellia Yearbook,* p.174. Synonym for **Foding Cha.**

Buddie Billups. *(C.japonica),* Belle Fontaine Catalogue, 1962, p.4. No description. SCCS, 1962, *Camellia Nomenclature,* p.23: Medium red. Very large, semi-double with stamens interspersed among the petals. Originated by E.E.Puls, Hammond, Louisiana, USA. Sport: **Buddy Billups Variegated.**

Buddie Billups Variegated. *(C.japonica),* Tammia Nursery Catalogue, 1965-1966 as 'Buddy Billups Var.'. A virus variegated form of **Buddie Billups** - Medium red marbled white. Originated in USA.

Buddy. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1964-1965, p.2. No description. Stowe, *American Camellia Yearbook*, 1981, p.283, The seedling named **Buddy** was originated by H.L. Windbigler, Azalea Glen Nursery, USA. The nearest flower to it is 'Magnoliiflora'. It is 7.5 cm across by 5 cm deep. It is a semi-double with the 4 inside petals of the flower coming to points at the tips of the petals and forming a collar around the stamens. The other petals are round at the tips. The flower has three rows of petals that stand apart. It is pink with a purplish cast and also very fragrant. The plant is a slow and bushy grower. See black and white photo facing p.288. Chinese synonym 'Xiongdi'.

Buddy Benz. *(C.japonica), American Camellia Yearbook,* 1971, p.44, Reg. No.1154: A 13 year old chance japonica seedling that first bloomed 1960; originated by Tom Eagleson, Port Arthur, Texas, USA. Plant growth is upright, open and medium in rate with dark green leaves, 10 cm long by 4.5 cm wide. The anemone form, dark red with purple cast, flower measures 15 cm across and 7.5 cm deep with about 50 petals, variable number of petaloids and yellow anthers. Blooms mid-season.

Buddy Bills. *(C.reticulata* hybrid), *American Camellia Yearbook,* 1981, p.95, Reg. No.1733: A very large, rose-pink semi-double to loose peony form, *C.reticulata* hybrid *(C.reticulata* 'Cornelian' x *C.japonica* **Mrs D.W. Davis**). Mid-season to late blooming. Originated by Frank Pursel, Oakland, California, USA. The 7 year old seedling first bloomed 1974. Average flower size is 14.5 cm across by 5.5 cm deep with 10-14 petals, yellow anthers and filaments.

Plant growth is upright, spreading and rapid in rate with dark green, heavily textured leaves, 13.5-15 cm long by 8.5 cm wide. Sport: **Buddy Bills Variegated.**

Buddy Bills Variegated. *(C.reticulata* hybr.), Gentry, 1984, ACS, *The Camellia Journal*, vol.34, No.4, p.17 as 'Buddy Bills V.'. A virus variegated form of **Buddy Bills** - Rose pink marbled white. Originated in USA.

Buddy Billups. Tammia Nursery Catalogue, 1965-1966. Orthographic error for **Buddie Billups.**

Buddy Billups Variegated. Tammia Nursery Catalogue, 1965-1966 as 'Buddy Billups Var.'. Orthographic error for **Buddie Billups Variegated.**

Buddy Boy. *(C.japonica),* Mealing, 1950, *American Camellia Yearbook*, p.131: Name given to our son by an old coloured family retainer. The camellia first bloomed 1946 on a 7 year old plant, size 11-12.5 cm across. Its form is an incomplete double with large petaloids and is coloured deep red. Blooms mid-season. Growth is strong and upright with rounded, deep green, thick foliage. See black and white photo on p.127. Originated by H.G. Mealing, North Augusta, South Carolina, USA.

Buddy English. (*C.reticulata* hybrid). ACS, *The Camellia Journal,* May, 1998, p.18, Reg. No.2448. A very large, deep pink, semidouble cross of 'Homeyer #23' x **Jean Pursel.** Flowers mid-season to late. Originated by Marvin Jernigan, Warner Robins, Ga., USA. *American Camellia Yearbook,* 1998, p.1, colour photo before p.1. The 19 year old seedling first flowered in 1986. Average flower size is 16.5 cm across x 7.5 cm deep, with 30 petals and white anthers and filaments. Plant growth is upright and average withleaves 15 cm long x 6.5 cm wide.

Buddy Garrett. *(C.reticulata* hybr.), SCCS, 1984, *Camellia Nomenclature,* p.113: Light pink. Large rose form double. Medium, spreading growth. Blooms mid-season to late. A *C.reticulata* 'Crimson Robe' (**Dataohong**) x *C.reticulata* hybrid **Jean Pursel** originated by Frank Pursel, Oakland, California, USA.

Buddy Pregnall. *(C.japonica), American Camellia Yearbook,* 1972, p.127, Reg. No.1193: A 10 year old chance japonica seedling that first bloomed 1964; originated by Earl O. Kline, South Carolina, USA. Plant growth is open, spreading and rapid in rate with light green leaves, 8.5 cm long by 5.5 cm wide. The semi-double blooms measure 13 cm across and 7.5 cm deep. It is pale pink, striped deeper pink with yellow anthers. It has a solid pink sport: **Buddy Pregnall Rosea.** Blooms early to mid-season.

Buddy Pregnall Rosea. *(C .japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.31: Rose-pink sport of **Buddy Pregnall.** Originated in USA.

Buddy Variegated. *(C.japonica),* Don Ellison, 1997, "Camellias - A Photo Dictionary", p.26 with colour illustration: A white-blotched, virus-variegated form of **Buddy.** Light red and white, hose-in-hose semi-double. Originated in USA.

Buerxue. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars*, p.161. Chinese synonym for **Fuji-no-yuki.**

Burgdorf Beauty. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Otome.**

Burgundy and Gold. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2008, p.34 with colour photo, Regn No. 2737; A 10 cm diameter, burgundy red anemone form with numerous bright gold stamens interspersed with the petaloids.. Upright, open, average growth. Flowers mid-season to late. Raised by Clarence and Lillian Gordy, Ocala, Fla, USA and propagated by Loch Laurel Nursery, Valdosta, Ga. *American Camellia Yearbook*, 2008, p.107 with colour photo; Light to medium green leaves 9 cm x 3.8 cm.

Burgundy Boy. *(C.japonica),* Gentry, 1986, ACS, *The Camellia Journal*, vol.41,, No.4, p.23: Very dark red. Small to medium semi-double. Slow, compact growth. Flowers mid-season to late. Originated by H.B. Cave, Wanganui, New Zealand.

Burgundy Gem. *(C.japonica), New Zealand Camellia Bulletin*, March 1992, Issue No.111, Vol.XVII, No.4, p.6, Reg. No.290: Originated by Les Jury, New Zealand. First bloomed in 1987 and now 13 years old. A seedling of **Kon-wabisuke** crossed with **Zambo.** It is of average habit and growth rate; dark green leaves 9 cm wide x 4 cm wide. The anemone to peony form flower is small, from 6 cm across x 4.5 cm deep with 25 petals and about 67 petaloids, of dark cardinal red (RHS.CC.53A) with lemon yellow anthers. Blooms mid-season.

Burgundy Queen. *(C.reticulata),* ACRS, 1970, *Camellia News*, No.40, p.27, Reg. No.124: Originated by E.R. Sebire, Wandin North, Victoria, Australia. Seed parent, *C.reticulata* 'Tali Queen', pollen parent unknown. Seed sown 1963, first bloomed 1967. The plant is an upright, open, vigorous grower. It produces 13.5-15 cm diameter semi-double, deep red blooms with 10-12 large petals in mid-season. The deep green, lanceolate leaves are about 12.5 cm long x 5 cm wide with fine serrations.

Busô. (Incomparable), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô,* vol.1; Itô, Jukyû, 1739, *Honzô Hanamaki'e* as a peony form with stamens intermixed with centre petaloids; Yashiro, 1841, *Kokon Yôrankô,* vol.306; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* An eight-fold flower, small and red in colour, mixed with white spots. Originated in Japan. Different reading: 'Musô'. (Believed extinct.)

Buster. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* No. description. Originated in USA.

Buster Bush. *(C.reticulata). American Camellia Yearbook,* 1991, p.76, Reg. No.2200: Very large, medium pink, veined darker pink to light red, semi-double to loose peony form C.reticulata (**Buddha** x [**Buddha** x **Trewithen Pink**]) that blooms mid-season. Originated by Dr W.F. Homeyer, Macon, Georgia, USA. The 11 year old seedling first bloomed 1982. Average size is 16 cm across x 9.5 cm deep with 12-14 petals, yellow anthers and white filaments. Plant growth is upright, open and medium in rate with dark green leaves 13 cm long x 7,5 cm wide.

Buster Lewis. *(C.japonica), American Camellia Yearbook,* 1966, p.85, Reg. No.869: A semi-double flower, similar to 'Herme', (**Hikarugenji**), 13-13.5 cm across and 6 cm deep with 26 petals and 6 petaloids. Its colour is deep pink with golden anthers and white filaments. Dark green leaves averaging 10.5 cm long x 6 cm wide. Originated by Carl E. Morgan, South Carolina, USA.

Buster Newman. *(C.japonica), American Camellia Yearbook,* 1958, p.286, Reg. No.343: A 10 year old chance seedling, originated by Mrs W.J. Beasly, South Carolina, USA. The deep red flowers, 11 cm across and 6 cm deep, resemble **Debutante** in form and have 42 wide petals, folded, giving a loose, peony look, with 8-10 petaloids and short stamens intermingled. Flowers mid-season to late.

Butchie. *(C.japonica),* ACS, *The Camellia Journal,* Nov. 1998, p.24, Reg. No.2476. A very large, rose pink, anemone to peony form chance seedling. Flowers early to late. Originated by W.T. Shepherd, N. Charleston, S.C., USA. *American Camellia Yearbook,* 1998, p.1, colour photo before p.1. The 8 year old seedling first flowered in 1990. Average flower size is 12.7-14 cm across x 6.5 cm deep, with 40 petals, 20 petaloids, yellow anthers and pink filaments. Blooms have stamens intermixed among petals. Plant growth is upright, spreading and average with dark green leaves 9-10 cm long x 3.8 cm wide.

Butler's Beauty. *(C.japonica),* ACS, *The Camellia Journal,* Mar. 2003, p.29 with colour photo, Reg. No.2587. Plant is upright and vigorous. Flowers early. Originated by Robert W. Butler, Hilton Head Island, S.C., USA. *American Camellia Yearbook,* 2003, p.61, colour photo p.c2. The 9 year old *C.sasanqua* chance seedling first bloomed in 1997. The pink to lavender pink semi-double flowers are darker at the edges and have 15 petals and 2 petaloids. Flowers measure 9.5 cm across x 3.8 cm deep. Dark green leaves are 6.5 cm long x 3.8 cm wide. Note: Given as different species in the two ACS publications.

Butonnaire. Mark S. Cannon Scion Catalogue, 1962, p.2. Orthographic error for **Boutonniere.**

Butter Scotch. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.31. No description. Originated in USA. No valid listing located.

Buttercup. *(C.sasanqua), American Camellia Yearbook,* 1948, p.171. Fruitland Nursery. Colour, crimson rose with a cluster of golden yellow stamens, 2.5 cm across, 8-10 petals. Growth habit, upright, slightly arching. Foliage dark green, 2.5 cm long by 2 cm wide, dense and pointed. Originated in USA.

Buzôji-no-ôtsubaki. (Buzôji Large Camellia), *(C.japonica), Encyclopedia of Camellias in Colour*, vol.I, 1972, p.367: A particular name for the old camellia in Chinkazan. Buzôji is in Buzô, Ôaza, Chinkushi-gun, Chinushino-shô, Fuku'oka Prefecture, being an old temple, said to be a relic of Hannyaji, Kyôshû's oldest temple. (7th Century). This camellia is actually the old cultivar **Kumagai** and has a trunk of 80 cm girth, 50 cm above the ground and is considered to be over 500 years old.

Buzz Aldrin. *(C.hybrid), American Camellia Yearbook,* 1972, p.127, Reg. No.1223: A 10 year old hybrid seedling, *C.japonica* **Reg Ragland** x *C.granthamiana,* that first bloomed 1964; originated by Dr.R.K.Womack, Louisiana, USA. Plant growth average in rate and medium in density, with dark green leaves, 8.4 cm long by 4 cm wide. The anemone form, light pink bloom has 12 petals and 125-150 petaloids, 12.5 cm across and 2.5 cm deep. Blooms early.

By Line. *(C.japonica),* Cannon, 1966, *American Camellia Yearbook,* p.80: An unusual flower in that, although semi-double, it is competely devoid of stamens. Originated at Shady Acres Nursery, South Carolina, USA.

Byakko. (White Tiger), *(C.japonica x C.reticulata),* ICS., Apr. 1990, *Japanese Camellia Cultivar List,* p.27. Medium size, white ground with red variegation. Lotus form semi-double, with cherry-like leaves. Late blooming. Seedling of *C.japonica* **Goshokiyae-chiri-tsubaki** x *C.reticulata* **Daotaohong.** Originated in the Kyôto prefecture, Japan.

Byakko. (White Tiger). (*C.reticulata x C.japonica*). Seibu Maizuru Institute of Botany, 1987-1988, *Seibu no Tsubaki,* No.728: Variant colours; white striped red single. Seedling of **Goshiki-chiri-tsubaki** x **Shizetou** ('Otani-tôtsubaki'). Originated by Seibu Maizuru Nursery. Note: "Byakko" is one of the four guardian gods of heaven and guards the West. .*Nippon Tsubaki - Sasanqua Meikan,* 1998, p.219 with colour photo; English translation p.153. Named and released by Katsuyoshi Yoshikawa in 1979. From Kyoto.

Byakugôji-goshiki-tsubaki. (The 5 Coloured Camellia from the Byakugô Temple), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.I, 1972, No.333, p.147 & p.340; Seibundô Shinkôsha, 1979, *Senchinshû,* p.235: A semi-double white with some crimson steaks. The flower colour varies in many ways. The original tree is in the precincts of the Byakugôji, Nara City, Japan. Synonym: 'Nara-shichifukujin'.

Byakugôshi. (No relation to Byakugôji Temple, meaning unknown) *(C.japonica),* Chinka-en Niigata Retail List, 1994-1995, colour photo, desc. p.2: Very small, campanulate single. Originated in Japan.

Byakuran. (White Orchid), *(C.hybrid),* ICS., Apr. 1990, *Japanese Camellia Cultivar List,* p.27: Large size, double white. Seedling of *C.japonica* **Silver Chalice** x *C.granthamiana.* Originated in Osaka Prefecture Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.219 with colour photo; English translation p.152. Medium size, white, flat single, thick petals, degenerated anthers. Flowers mid-season. Leaves narrowly elliptic, medium size, glossy, clear venation. Upright growth. Named and released by Kazuo Yoshikawa in 1980.

Byc. J & F Thoby, Gaujacq, France, Catalogue, 2009, p.1; White, imbricated.

Byram Seedling. *(C.reticulata x C.japonica), The Garden,* vol.67, 1905, p.100: Mr G. Taylor sends from Byram Gardens, Ferrybridge, flowers of a seedling camellia, a cross between 'Donckelaeri' (**Masayoshi**), and *C.reticulata,* the latter being the pollen parent. The seed was sown in 1894 and the plant now covers a space of 4 feet wide x 6 feet high. The habit is like 'Donckelaeri', not the straggly growth of *C.reticulata.* It flowers freely in mid-season. The flowers are a warm, self-crimson. Orthographic error: 'Byron Seedling', 'Bryam's Seedling'.

Bryom Seedling. Camellias Grown at Kew, 1956 List. Orthographic error for **Byram Seedling.**

Byro. *(C.japonica),* Naudin, 1852, *Revue Horticole,* p.153. No description. Exhibited in a collection of Camellias by M. Remont of Versailles, at the 20th Exposition de la Société Centrale d'Horticulture de la Seine, Mar 26-28, 1852. (Believed extinct.)

Byronii. *(C.japonica),* Sweet, 1830, *Hortus Britannicus,* ed.2, p.74 as 'Lord Byron's'. Rose coloured. van Houtte Catalogue, 1841, 7:12, as 'Lord Byron': Beautifully formed, daybreak rose, globe-shaped centre. Originated in England. Synonym: 'Lord Byron', 'Lord Byron's'. Orthographic errors: 'Lady Byron', 'Lord Biron'.

Byron's Pink. *(C.japonica),* Griffins Nursery Catalogue, (before 1945) according to Hume, 1946. No description.

Bysanthina. van Houtte, 1843, Catalogue, 12:uu. Orthographic error for **Byzantina.**

Bysantina. Burnier & Grilli Catalogue, 1846-1847. Orthographic error for **Byzantina.**

Byxantina. Fratelli Rovelli, 1852, Catalogue, p.12. Orthographic error for **Byzantina.**

Byzanthina. van Houtte, 1842, Catalogue, 9:50. Orthographic error for **Byzantina.**

Byzantina. *(C.japonica),* van Houtte, 1841, Catalogue, 3:7 as 'Bizantina': Formal double, 9-10 cm across, rose coloured, average petal numbers, round-oval almost to the centre, imbricated towards the circumference, marked with lines and splashes of white. Burnier & Grilli Catalogue,1846-1847, p.50 as 'Bysantina': Formal double, 9-10 cm across, dark rose coloured. van Houtte Catalogue, 1844-1845, 18:8 gives **Hendersonii** as a synonym, but this is a solid rosepink according to the description. It is possible that **Byzantina** is the variegated form of **Hendersonii.** Orthographic errors: 'Bizantina', 'Bizzantina', 'Bysanthina', 'Byzanthina', 'Bysantina', 'Byxantina'. Originated in England.

Byzantina. *(C.japonica),* Charles van Geert, 1847, Catalogue, No.101, p.7: Not **Hendersonii.** Perfect imbrication. Pale pink with silver edges to petals.

C.

C.C. Crutcher. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1997, p.15, Reg. No.2414. A large, dark red, semi-double cross of **Pirates Gold** x **San Dimas.** Flowers mid-season. Originated by Dr Walter Homeyer, Macon, Ga., USA. *American Camellia Yearbook,* 1997, p.1, colour photo before p.1. The 6 year old seedling first flowered in 1993. Average flower size is 11.5 cm across x 6.5 cm deep, with 38 petals and widespread groups of stamens with yellow anthers. Plant growth is upright, dense and medium rate, with dark green leaves 3.2 cm long x 1.8 cm wide.

C.E. Baumann Special Red. *(C.japonica),* Wilmot, 1943, *Progress Report,* p.9. No description. Cultivar from C.E. Baumann Inc., New Jersey, USA. (Believed extinct).

C.E. Hovey. Sharp, 1957, *Camellias Illustrated,* p.173. Orthographic error for **C.M. Hovey.**

C.F. Coates. *(C.x williamsii), American Camellia Yearbook,* 1948 p.V. No description. Ralph Peer, 1950, *American Camellia Yearbook,* p.90: "We were quite interested in a curious hybrid 'C.F. Coates' *(C.saluenensis x C.japonica* **Kingyo-tsubaki**) that had many double and triple pointed leaves." A small rose-pink single flower, 6.5 cm across with medium green, 'fishtail' leaves; the main portion being 8-11 cm long by 34 cm wide, divided at the apex, into 2 or 3 points, finely serrate. The plant has a bushy, spreading habit. Originated by C.F. Coates in the Royal Botanic Gardens, Kew, England. The cross was made in October 1935. From the RHS Wisley Trials, in 1977 it received a Highly Commended Certificate and was described as: Leaves 8.5 cm long by 4 cm wide, dark glaucous green with flowers, 8 cm in diameter, single with one row of petals, Red Purple Group 65D very slightly flushed with Red Group 55B, veins slightly lighter colour than Red Group 55A. Flowers from Mid-season. See colour pi. p.87, Fischer, 1986, *Kamellien.*

C.H. Hastie. Ackerman, 1954, *American Camellia Yearbook,* p.57. Orthographic error for **C.H. Hovey.**

C.H. Hovey. *(C.japonica),* Hovey, *The Garden,* Nov.1878: The colour is entirely new, resembling, as near as possible, a 'Lord Raglan' rose. The shape is perfect, the petals are as round and circular as if cut with a compass. The variety is a dark crimson formal double about 9 cm across. Leaves are dark green, glossy, rounded oval, 8.5 cm long by 5.5 cm wide and the plant is of compact, upright growth. Raised by C.M. Hovey, Massachusetts, USA in 1847. Colour photo, Macoboy, 1981, *The Colour Dictionary of Camellias,* p.73. Orthographic variant: 'Hovey C.H.'.

C.M. Gordy. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2013, p.28 with colour photo; Regn No.2896; Regd. by C.M & Lillian Gordy, Ocala, Fla., USA. ACS, *Yearbook,* 2013, p.107 with colour photo; A 10 year old seedling, parentage unknown, first flowered 2008. Propagated by Loch Laurel Nursery, Valdosta, Ga. Large size, 12.7cm diameter x 5.7cm flower is deep pink, with creped and ruffled petals. Stamens with gold anthers and cream filaments splayed out to the edges of the petals. Flowers fall whole. Plant has a dense, vigorous habit. Dark green leaves average 9.5cm x 6.5cm, with medium serration. Flowers early to mid-season.

C.M. Hovey. *(C.japonica),* Haggerston, 1850, *Magazine of Horticulture,* p.141, 142: "From Hovey and Co. a seedling camellia; form of flower rounded to the centre and full; petals broad and smooth, generally perfect; colour a bright crimson scarlet; size of flower, large." It was exhibited at the Massachusetts Horticultural Society as Seedling I in 1853 and awarded the Society's large gold medal. Their description was as follows: "Leaves, large, 12.5 cm long by 5 cm wide, ovate acuminate, deep green, glossy, finely nerved, slightly wavy, large and coarsely dentated. Flower buds, obtusely ovate with clear greenish scales. Flower, very large,

11 cm in diameter, full and perfectly double to the centre and of great depth. Colour; rich, vivid crimson scarlet. Petals; large, bold, imbricated, symmetrically arranged and nearly entire to the edge. Habit Very robust and vigorous, flowering freely." Hovey offered the variety for sale in 1878 at Covent Gardens, London. It was described with the name **C.M. Hovey** in the Gardeners' Chronicle, 2nd ser.11:422, 1879 with the announcement that it had received a First Class Certificate from the RHS. Orthographic variants of the name that have been published include: 'Charles Mason Hovey', 'Hovey C.M.' and 'Charles Hovey'. Orthographic errors: 'C.E. Hovey', 'C.N. Hovey', 'C.M. Hovez'. Synonyms include: 'Colonel Firey', 'Firey King', 'William S. Hastie', 'Mississippi Hastie', 'William S. Hastie'(Miss.), 'Solaris', 'Colonel Fyrie', 'C.M. Hovey Number 66'. In America the names **Duc de Devonshire, Anne Lindberg** and **Rubra Plena** have been erroneously applied to this cultivar, while the name **C.H. Hovey** has been erroneously used for 'Pauline', the variegated form of **Julia Drayton** as 'Mathotiana Variegated' or 'Mathotiana Rubra Variant'. For Colour illustrations: Hume, 1946, *Camellias in America* facing p.16; Macoboy, 1981, *The Colour Dictionary of Camellias,* p.73; *American Camellia Yearbook,* 1949, facing p.83. It produces variegated forms known as **Scarlett O'Hara** and **Bradford's Variegated.** The Chinese synonym is 'Huowei'.

C.M. Hovey Benten. *(C.japonica), International Camellia Journal* 2005, p.128, Reg. No. 54. A leaf variegated sport of **C.M. Hovey.** First observed 1994, and stable propagation since then. Originated by Peter Fischer, Wingst, Germany. Leaves have very uniform 'Benten' genetic variegation. Other characteristics as for the parent.

C.W. Swann. *(C.japonica), New Zealand Camellia Bulletin,* March 2005, Issue No.150, vol.XXIV, No.2, p.35, Reg. No.466. Registered by M. & L. Mangos, Tauranga, New Zealand. A 12 year old seedling of **Bob Hope,** pollen parent unknown, which first flowered in 1997. Flower is semi-double, with 3-4 rows of flat, separated layers of petals. Flower size is 10 cm diameter x 5 cm deep, with 21 petals and gold anthers on pinkish-white filaments. Colour is dark red (RHS.CC.60B) with prominent black-red veining on the outer two-thirds of each petal. Plant is upright, of average density, and of slow growth rate, with dark green leaves 10 cm long x 4 cm wide. Flowers early to late.

Cabbage Head. Kiyono Nursery Catalogue, 1939-1940. Synonym for **Augusta Wilson.**

Cabernet. *(C.japonica)* ACS, *The Camellia Journal,* Dec. 2010, p.7; Rich burgundy wine, formal double, small size, Flowers late. Nuccio's Catalogue 2011-2012, p.4. Medium, compact, upright growth. Originated by Nuccio's Nurseries, Altadena, Calif., USA.

Cabeza de Vaca. *(C.japonica),* McIlhenny Catalogue, 1946-1947, p.14: Variety originated in Jungle Gardens. Medium sized, smooth rose colour, semi-double with large, fluted petals. Fendig, 1953, *American Camellia Catalogue:* A medium sized, pink variegated, semi-double, 10 cm in diameter. The colour is medium pink with occasional white blotches. It has large, fluted petals which tend to bend downwards. Stamens are in a tight, central tube. Filaments cream, anthers light yellow. Leaves, large, glossy apple-green, oval, thick apex, veins recessed, serrations shallow, medium pitch. Plant growth, medium and spreading. Originated at McIlhenny's Nursery, Jungle Gardens, Louisiana, USA.

Cabeza Sunburst Pink. *(C.japonica),* Shackelford, 1967, ACS, *The Camellia Journal,* vol.24, No .4, p.17. No description. Originated in USA. No valid listing located.

Cabeza Sunburst Pink Variegated. *(C.japonica),* Shackelford, 1969, ACS, *The Camellia Journal,* vol.24, No.4, p.17 as 'Cabeza Sunburst Pink Var.'. A virus blotched form of 'Cabeza Sunburst Pink'. Originated in USA. No valid listing located.

Cabinet. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.32. No description. Originated in Australia. (Believed extinct.)

Caboose. *(C.japonica), American Camellia Yearbook,* 1962-1963, p.215, Reg. No.645: A chance seedling that first bloomed 1952; originated at Wheeler's Nursery, Macon, Georgia, USA. Plant growth is compact and upright. Foliage heavily serrated, pointed and twisted. The semi-double flowers are 10-11 cm across and have 15 petals. Similar to **Lady Vansittart** in growth habit, flower size and colour except that it is last to bloom as a Caboose is at the end of the train. Flowers are predominantly white with pink marks. Sports readily.

Cabrillo. SCCS, 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for **Bella Romana Red.**

Cacti Flora. Fendig, 1953, *American Camellia Catalogue.* Orthographic variant for **Cactiflora.**

Cactiflora. *(C.japonica),* Berlèse, 1833, *Horticulture Belge, Journal Jardin Amateur* 1:82: M. Negri is a distinguished amateur to whom the seedlings of camellias give the most success. He possesses about 300 seedlings, 8 of which have flowered. The most notable are **Fasciculata** and **Cactiflora.** Later Berlèse describes **Cactiflora,** 1837, *Monographie*, edit, p.108, 130: Leaves 6 cm wide by 9.5 cm long, oblong-oval to lanceolate, very acuminate, large serrations, prominent venation, buds oblong, scales yellowish; flower semi-double, deep orange-red, petals well imbricated, not numerous, broad and regularly disposed, those at the centre are very small, twisted and mixed with stamens. Originated in Italy. Orthographic variant: 'Cacti Flora'. Orthographic errors: 'Cactifolia', 'Cadiflora'.

Cactiflora Epiphylliflora. *(C.japonica),* Cachet Catalogue, 1840-1841, p.2. No description. Originated in France. (Believed extinct.)

Cactiflora Perfecta. *(C.japonica),* Franco Agostoni, 1844, Catalogo Plantarum as 'Captiflora Perfection'. No description. Isola Madre Catalogue, 1845 as 'Castiflora Perfecta'. No description. Orthographic error: 'Cadiflora Perfecta'. Originated in Italy. (Believed extinct.)

Cactifolia. Vanderbilt, 1940, *Camellia Research,* p.2. Orthographic error for **Cactiflora.**

Cadet Reilly. *(C.japonica),* de Bisschop Nursery Catalogue, 1957 as 'Cdt Relly'. No description. Originated in France.

Cadiflora. Verschaffelt Catalogue, No.50, 1844, p.18. Orthographic error for **Cactiflora.**

Cadiflora Perfecta. Verschaffelt Catalogue, No.50, 1844, p.18. Orthographic error for **Cactiflora Perfecta.**

Cadro. Guilfoyle, 1883, *Catalogue of Melbourne Botanic Gardens,* p.127. Orthographic error for **Cadroe.**

Cadroe. *(C.japonica),* Guilfoyle, 1866, Catalogue, p.18: Rose red, large, formal double. Originated in Australia. Orthographic error: 'Cadro'.

Caerhayes. Drake, 1974, *Gardeners' Chronicle,* p.378-379. Orthographic error for **Caerhays.**

Caerhays. *(C.x williamsii),* Puddle, 1958, NCCS, *The Camellia Bulletin,* vol.12, No. l, p.23: "Of these newly named hybrids, the one most generally noticed by visitors is one of the *C.saluenensis* and 'Lady Clare' (**Akashigata**) crosses known as **Caerhays** - a large anemone to peony form, bright rosy mauve, free flowering, spreading habit.". The original plant is at Caerhays, Cornwall, England where it originated. Received an RHS "Award of Merit" April 29th 1969. Colour photo, p.168, 1970, RHS, *Rhododendron and Camellia Yearbook, No.24.*

Caerhays' Best. *(C.x williamsii),* Fortesque Garden Trust Catalogue, 1985-1986, p.10 as 'Caerhayes Best': Mid-pink, single. Originated at Caerhays Castle, Cornwall, England.

Caerhays Hybrids. Hillier, 1954, RHS, *Rhododendron and Camellia Yearbook,* No.8, p.95. The collective name for the hybrids arising from the cross between the species *C.saluenensis* and *C.cuspidata.*

Caesare Arici. de Jonghe, 1851, *Beknopte Handleiding tot het Kweeken von Camellias,* p.114. Orthographic error for **Cesare Arici.**

Caidan. (Colourful Red), *(C.japonica),* China Regn No.53, *China Flowers & Horticulture,* Aug. 2009, No.16, p.50 with colour photo; A fourth sport of **Fendan** (see also **Chidan**, **Fendan** and **Yudan).** Flowers formal double, sometimes hexagonal, deep pink with darker pink and red stripes in varying widths. Medium size, 8-10 cm diameter. About 70 petals, thick and shiny, apices round and shallowly concave. Late flowering. Plant average growth rate. Leaves pale green, 9.5 cm x 3.5 cm, apices acuminate, buds pale yellow.

Caidi Shanhu.(Coloured Coral Flute). Gao, Jiyin, Ltr, 22nd August, 1994. Chinese synonym for USA *C.x williamsii* **Kramer's Fluted Coral Variegated.** Later changed to 'Hua Aoban Shanhu'.

Caidiewu. *(C.reticulata), Chinese Camellia Culture,* 2003, p.247 with colour photo; Pink semi-double from Tengchong County, China. Diameter 12-14 cm. Flowers mid-season.

Caigi. (Colour Flag). Gao & Zhuang, 1989, *The Camellia in China,* p.81, No.629. Chinese synonym for the Australian *C. x williamsii* **Glad Rags.**

Caihong. (Coloured Rainbow), (*C.sasanqua*), Gao & Zhuang, 1989, *The Camellia* in *China,* p.79, No.66: Large size, single, white with red margins and reverse. Originated in the Jiangxi Province, China.

Cailiu Cha. (Pomegranate Camellia), *(C.japonica),* Wang, 1621, *Qunfangpu* according to Bartholmew, 1982, *American Camellia Yearbook,* p.155. (Edible pomegranate Camellia). It is similar to **Zhizhu Cha.** The colour is bright red. Yashiro in the *Kokon Yôrankô,* 1841, says it resembles the mountain Rhododendron. Different reading: 'Ts'ai Liucha'. Originated in China.

Caimiya. Gao, Jiyin, Ltr, 22nd August, 1994. Chinese synonym for the USA *C.japonica* **Cara Mia Variegated**. Later altered to 'Micaiya'.

Caise Niukou. (Coloured Buttons). Gao, Jiyin, Ltr, 22nd August, 1994. Chinese synonym for the USA *C.x williamsii* **Buttons'n Bows.**

Caishen. (God of Wealth). Gao, Jiyin, Ltr, 16th October, 1992. Chinese synonym for USA *C.hiemalis* **Bonanza.**

Caitlin Olivia. (*C.reticulata* hybrid). ACRS, *Camellia News,* Autumn 2005, No.167, p.17, colour photo p.19, Reg. No.558. Originated by John Butler, Cabarlah, Qld, Australia. Seed parent *C.reticulata* hybrid **Lasca Beauty,** pollen parent unknown. First flowered in 2000. The semi-double, cup-shaped flower of 24 petals is mid-pink in colour, with stamens arranged in tubular form, and is 14 cm diameter x 5 cm deep. Flowers mid-season on an open, spreading, upright plant of medium growth. Leaves dark green, rounded at base, apiculate apex and serrate margins, 11 cm long x 6.5 cm wide.

Caity. *(C.japonica),* Sewel & Parks, 1981, *American Camellia Yearbook,* p.125. No description. Originated in USA. No valid listing located.

Caixia. (Rosy Clouds), *(C.japonica),* Wang & Yu, 1989, *Camellias,* vol.2, No.75, p.4, colour photo, [p.138]: Petals in 5-6 rows, formal double, pink, with radiating red stripes like a colourful "morning glow". Stamens mixed with petaloids. Pistil undeveloped; flower 10cm diameter. Originated in Fujian Province, China.

Caiye Hongluzhen. (Variegated Leaf Hongluzhen), *(C.japonica),* China Regn No.8. *China Flowers & Horticulture,* Nov 2006, No.22, p.49 with colour photo; A sport of **Hongluzhen** first found in 1997 by He Jianjun, Jinhua, Zhejiang, China. Differs from **Hongluzhen** by having yellow margined leaves. Heat hardy up to 40°C.

Caiyu. (Beautiful Jade), *(C.reticulata),* Yü & Bartholomew, 1980, *American Camellia Yearbook,* p.16: Spinel pink. Early. Tengchong. Feng et al. 1981, *Yunnan Shancha Hua,* p.43 and 1986, *Yunnan Camellias of China,* p.39 with colour photo: Leaves oblong, apices acuminate, dark green above, blades slightly arched, 6.5-10 cm long by 2.2-4.7 cm wide. Flowers spinel pink (RHS.CC.62B), diameter 6-9 cm. Petals more than 10, flat. Stamens numerous, around pistil to form a ring. Pistils mostly rudimentary. Flowers mid-season. The cultivar was selected from an open pollinated plant of *C.reticulata* Lindl. f. *simplex* Sealy in Tengchong. The flowers of this cultivar are rather small, but 3-4 flowers can be produced at the branch terminals so the cultivar is rather impressive. Different reading: 'Ts'ai Yu'.

Caiyun. (Yunnan Cloud) *(C.reticulata),* China Regn No 21. *China Flowers & Horticulture,* Feb 2008, No.4, p.46 with colour photo; An open pollinated seedling of **Damanao,** originated at the Kunming Institute of Botany, Yunnan, China, and named by Xia Lifang. Flowers rose form double, peach red (RHSCC 66C), 10-11 cm diameter. Petals 20-25 in 4-6 whorls, flat but slightly incurved. Most stamens are in petaloid form. Leaves long ovate, bases cuneate, apices acuminate, 7.8-8.8 cm long and 3.5-4.8 cm wide. Flowers mid-season to late.

Cajun King. *(C.japonica),* SCCS, 1970, *Camellia Nomenclature,* p.30: Red. Large, loose peony form. Medium, compact growth. Mid-season blooming. Originated in USA.

Cajun Queen. *(C.japonica),* SCCS, 1964, *Camellia Nomenclature,* p.29: Pink. Large, anemone form. Originated in USA. Sport: **Cajun Queen Variegated.**

Cajun Queen Variegated. *(C.japonica),* Tammia Nursery Catalogue, 1964-1965 as 'Cajun Queen Var.': A virus variegated form of **Cajun Queen** - Pink marbled with white. Originated in USA.

Calciali. Wm. Prince, Linnean Gardens & Nursery Catalogue, 1860, p.5. Orthographic error for **Calciati.**

Oudin, Lisieux Nursery Catalogue, 1844, p.3 as 'Calderari': Large size, very full double, very soft pink, exterior petals rounded and imbricated, those of the centre in very elegant clusters. Synonyms: 'Anemone Calderara', 'Anemonae Calderara', 'Calderari', 'Grand Calderara', 'Althaeiflora Rosea', 'Calderariana', 'Grand Calderari', 'Althaeflora Rosea'.

Calderari. Oudin, Lisieux Nursery Catalogue, 1844, p.3. Orthographic error for **Calderara.**

Calderariana. Franco Agostoni, 1844, *Catalogo Plantarum.* Orthographic error for **Calderara.**

Calder's Treasure. *(C.japonica),* Feathers, 1962, NCCS., *The Camellia Bulletin,* vol.16, No.1, p.13: **Calder's Treasure**, (a fine new pink). Flowers pink. Large anemone form raised by J. Calder, Victoria, Australia.

Caldwell. *(C.japonica), American Camellia Yearbook,* 1947, p.126. No description. SCCS, 1950, *The Camellia. Its Culture* and *Nomenclature:* Light pink. Medium full peony form. Originated by Flowerwood Nursery, Mobile, Alabama, USA.

Caldwell Red. *(C.japonica),* McIlhenny, 1934, *List of Camellia Japonicas for Sale,* p.6. No description. McIlhenny, 1937, *600 Varieties of Camelias,* p.3: Imbricated. Medium size. Rose red. Originated in USA.

Caldwell Variegated. *(C.japonica),* McIlhenny, 1934, *List of Camellia Japonicas for Sale,* p.6. No description. McIlhenny, 1937, *600 Varieties of Camellias,* p.3: Peony type. Pale flesh pink to pure white, splashed red. Originated in USA.

Caldwell Variegated. *(C.japonica),* SCCS, 1954, *The Camellia. Its Culture and Nomenclature* as 'Caldwell Var.': Pink to white marbled red. Medium sized, formal double. Note: This is a virus variegated form of **Caldwell Red,** and not the peony form first listed by McIlhenny.

Caldwell White. McIlhenny, 1934, *List of Camellia Japonicas for Sale,* p.6. Synonym for **Compacta Alba** according to Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II, p.76.

Caleb Cope. *(C.japonica),* Buist, 1854, *American Flower Garden Directory,* ed.6, p.213: Originated by Ritchie. Pale rose, centre blush, flower medium size, perfectly imbricated, quite distinct. Foliage, long-oval, reflexed, of a pale green; grows and blooms freely. Late flowering. A fuller description is given with illustration by Fendig, 1950, *American Camellia Catalogue:* A medium size formal double, imbricated pale-rose flower with small rose-bud centre. It will average 7.5 cm across and 3.7 cm deep with approximately 60 petals. The inner petals, which are smaller than the outer petals, are cup shaped. The leaves are also slightly cupped, thick, leathery, dark, glossy green, with broad, coarse serrations and short, pointed tips. The plant is bushy, loosely branched and slow in growth. James Ritchie, in May, 1851, was awarded the prize of the season for the best American seedling exhibited between Dec.1850 and May 1851. He named it for Caleb Cope, the 6th President of the Pennsylvanna Horticultural Society. (1842-1851). Synonym: 'Mathilda'. **Madame Faucillon** has been used as a synonym but appears to be the variegated form. Colour illustrations: *Camellias* by G.G. Gerbing, 1945, p.31. Black and white photos: Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II, p.54.

Caleda. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues.* Orthographic error for **Caledo.**

Caledo. *(C.reticulata),* ACRS, 1968, *Camellia News,* No.32, p.17, Reg. No.96: Originated by F.S. Tuckfield, Berwick, Victoria, Australia. The seed parent was *C.reticulata* **Confucius** and pollen parent 'Willow Wand' (**Liuye Yinhong**). The seed was sown, 1961 and first bloomed 1965. It has semi-double blooms of good quality, 13.5 cm across, of a light orchid pink colour, produced early to mid-season. It is a vigorous grower and blooms freely. Leaves, 10 cm long by 5 cm wide, dark green, lanceolate with medium size, sharp serrations. It was awarded the Merrillees Memorial Medal as best seedling in 1965. See colour photo, ACRS, 1977, *Camellia News,* No.66, P.19. Orthographic error: 'Caleda'.

Calico. *(C.japonica),* Orton Nursery Price List, 1947-1948, No decription. SCCS, 1950, *The Camellia. Its Culture and Nomenclature:* White, striped dark pink. Medium large, formal double. Compact, upright growth. Late blooming. The name has erroneously been used as a synonym for the

Japanese cultivar **Sarasa.** Originated by Orton Plantation Nursery, Winnabow, North Carolina, USA.

Calico. Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.1, p.318, 321. Erroneous synonym for **Sarasa.**

Calico Queen. *(C.japonica),* SCCS, 1956, *The Camellia. Its Culture and Nomenclature,* p.31: White, striped rose-red. Medium size, semi-double. Slow, compact growth. Mid-season blooming. Originated by McCaskill Gardens, California, USA.

California. *(C.japonica),* SCCS, 1942, *Classification of Camellias,* p.1; Pink semi-double, 12.5cm across. Mid-season blooming. Magnolia Gardens and Nursery Catalogue, 1945-1946; Fendig, 1953, *American Camellia Catalogue* with colour plate: A large, light rose-red, incomplete double, 10-11 cm in diamter. Petals broad and thick. Stamens central, occasionally interspersed amongst semi-erect petals and petaloids. Filaments, light cream to pink, anthers golden. Mid-season blooming. Foliage, large, round, heavy and dark green, 11.5 cm x 7.5 cm. Midrib recessed, edges turned down, apex stubby, serrations shallow and broad about 4 mm pitch. Medium, compact growth. The original plant was purchased by Harlem Cate, in 1888 at Redondo Pier, Los Angeles, California, from a sailor on a Japanese tramp steamer. It took a name from Durfee Road, Pico, California where the original plant grew until purchased by Ralph Peer and moved to his property, "Park Hill", Hollywood, California where it still grows. It was originally introduced to the trade under the name **California** by E.H. Carter, Monterey Park, California. Synonyms: 'Durfee Road', 'Durfee Road Pink'. Black and white photo: Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.1, p.72 and in Sharp's *Camellias Illustrated,* 1948, p.142. Colour photo: Skinner, ed., 1957, *Garden Plants in Colour,* 50:2.

Calvin Entrekin. *(C.japonica), American Camellia Yearbook,* 1986, p.89, Reg. No.1999: Deep pink, miniature formal double. Medium, spreading growth. Midseason blooming. Originated by C. Entrekin, Ocean Springs, Mississippi, USA. The 8 year old seedling first bloomed in 1982. Average flower size, 6 cm across by 2.8 cm deep with 60 petals and 62 petaloids. Plant growth is spreading, dense and medium in rate with dark green leaves, 8 cm long by 3.8 cm wide.

Calvisi. *(C.japonica),* van Houtte Catalogue, 1846-1847, 27:21: Pretty, deep pink. Orthographic variant: 'Kalvisi'. Originated in Holland.

Calycina. *(C.japonica),* Loddiges Catalogue, 1849, p.33. No description. Originated in England. No description. (Believed extinct.)

Calypso. *(C.japonica),* Herbert, 1837, *Amaryllidaceae and Supplement,* p.367. Very large and very double; white with a few pink stripes and occasionally one or two anthers. . Berlèse, 1840, *Monographie,* ed.2, p.75: Leaves, long-oval, inclined downwards; buds, obtuse with whitish apex; flower, about 10 cm across, white, double, petals of the circumference in two rows, very broad, a little twisted, notched, unequal; those following are very numerous, mingled, compact, irregular, some erect, others recumbent, some long and strap-like, others short and erect and forming an irregular and unusual centre. Synonym: 'Maculosa'. Orthographic variant: 'Calipso'. Originated by Mariani, Italy.

Calypso Nuova. *(C.japonica),* Luzzatti, 1851, *Collezione di Camelie,* p.9: Magnificent flower, imbricated, clear rose with all petals stamped with white. Verschaffelt, 1858, *Nouvelle Iconographie,* Book XII, pl.IV as 'Calypso Nova': A ruddy, delicate pink colouring, more vivid at the centre, a regular and perfect imbrication, floral dimensions of medium size...received from Italy, its native country about two years ago. Its blossoms, of medium size (more than 10 cm across), are formed of small petals, rounded or oval, full or lobulate at the apex and imbricated with great regularity; at the centre, which is a deeper shade, they are smaller and form a serried heart. Orthographic variants: 'Calipso Nova', 'Calypso Nova'.

Calypso Nova. Franchetti, 1855, *Collezione di Camelie,* p.15. Orthographic variant for **Calypso Nuova.**

Calypso Vera. *(C.japonica),* van Houtte Catalogue, 1858, 72:7: Very Large, peony form, white and red petals. Mercatelli Catalogue, 1881, p.12: Peony form; petals white and red of striking effect. Originated in Italy. Orthographic variant: 'Calipso Vera'. Chinese synonym 'Wola'.

Cam. Brozzoni. Von Biederfeld, 1856, *Practische Grundlehren der Cultur van Camellien...,* p.35. Abbreviation for **Camille Brozzoni.**

Camareira Mór. *(C.japonica),* José Marques Loureiro Catalogue No.1, 1865, p.34, & No.9, 1872-1873, p.41: Regular rose form. Pure white with a fine speckling of carmine. Orthographic variant 'Camareira-Mor'. Originated in Portugal.

Cambellia. *Popular Flowers,* 1844. Orthographic error for **Campbellii.**

Cambelli. Trillon, Le Mans Nursery Catalogue, 1843, p.3. Orthographic error for **Campbellii.**

Cambellii. Longone Catalogue, 1846. Orthographic error for **Campbellii.**

Cambli. *(C.japonica),* Marnock, 1839, *Floral Magazine,* 3(32):258. No description. Originated in Italy. (Believed extinct.)

Cambria. *(C.reticulata), New Zealand Camellia Bulletin,* vol.X, No.4, 1978, p.24, Reg. No.137: This is a seedling of *C.reticulata* which was raised by H.J. Clark, Auckland, New Zealand. The plant has rapid growth, medium density, dark green leaves, 11 cm long x 5 cm wide and first flowered 1975. The blooms are semi-double to loose peony with 20 petals. The colour is rose-red (RHS,CC.58B-C) and measures up to 17 cm x 7.5 cm. Flowers early.

Cambridge Red. A local name given to an old camellia in Cambridge, New Zealand which has now been identified as the old Japanese variety, **Ama-obune.**

Cambyi. Hazlewood & Jessep, 1972, *Checklist - Camellia Varieties from Nursery Catalogues,* p.32. Orthographic error for **Campbellii.**

Cambyli. Société Anonyme Horticole, van Houtte Pere, 1930, No.366. Orthographic error for **Campbellii.**

Camden Park. *(C.japonica),* Waterhouse, 1952, *Camellia Trail,* p.14, 17: The third sport of **Aspasia Macarthur,** and an uncommon one, is a large variegated bloom, with colour and mottling somewhat similar to 'Elegans', (**Elegans Variegated**), but with a raised centre of crowded and twisted petals. In *Camellia Quest,* 1947, it was named 'Aspasia Variegata', but now that the name for its parent is Aspasia Macarthur and it is not a sport of the true Aspasia; the Australian and New Zealand *Camellia Research* Society has renamed it **Camden Park.** Originated in Australia. See colour plate: ACRS, 1977, *Camellia News,* No.66, p.2. Chinese synonym: 'Kamuden Gonguan'.

Camdenii. *(C.japonica), Horticultural Magazine and Gardeners'and Amateur's Calendar,* July, 1869, p.221. Exhibited by Saxby of Botany, N.S.W., Australia. No description. (Believed extinct.)

Camelia delle Peschiere. Franchetti, 1855, *Collezione di Camelie,* p.15. Synonym for **Contessa Belgioioso**.

Camellia à fleurs Jaune. Ambroise Verschaffelt, 1852-1853, Catalogue, p.16. Synonym for **Jaune.**

Camellia Bicolore de la Reine. Auguste van Geert, 1863-1864, Catalogue, No.54, p.33. van Houtte, 1872, Catalogue, p.358. Synonym for 'Bicolore de la Reine'.

Camellia Canova. Isola Madre Catalogue, 1845. Synonym for **Canova.**

Camellia City. *(C.reticulata* hybr.), *American Camellia Yearbook,* 1981, p.95, Reg. No.1746: A very large, rose red, semi-double, *C.reticulata* hybrid, ('Crimson Robe' (**Dataohong**) x **Jean Purse**l), midseason to late blooming; originated by Frank Pursel, Oakland, California, USA. The 7 year old seedling first flowered 1979. Average flower size, 15.5 cm across by 7.5 cm deep. Plant growth is upright and medium in rate, with dark green leaves, 13 cm long x 7.5 cm wide.

Camellia Country. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.33. No description. Originated in USA. No valid listing located.

Camellia de la Force. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.34. Synonym for **De la Force.**

Camellia de la Reine. van Houtte Catalogue,1846-1847, 27:21. Synonym for **De la Reine.**

Camellia de la Reine à Fleurs Roses. van Houtte Catalogue, 1858-1859, 72:7. Synonym for **De la Reine Rosea.**

Camellia de la Reine Rosea. Auguste van Geert, 1858, Catalogue, No.45, p.29. Synonym for **De la Reine Rosea.**

Camellia Ingram. Goertz, 1970, *American Camellia Yearbook,* p.23. Orthographic error for 'Camilla Ingram'.

Camellia of Daizaifu. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.33. Synonym for **Dazaifu-no-tsubaki.**

Camellia Reine Victoria. Anonymous, 1845, *Annals de Gand,* 1:355-356, pl.33 facing p.354. Synonym for **Queen Victoria.**

Camellia Rosacea. Curtis, 1819, *A Monograph on the Genus Camellia.* Synonym for 'Carnea' as **Middlemist's Red.**

Camellia Reticulata. Burdin Maggiore & Co. Catalogue, 1845. Synonym for **Captain Rawes.**

Camellia Sasanqua Rosea. Burdin Maggiore & Co. Catalogue, 1845. Synonym for **Maliflora.**

Camellia sinensis var. *rosea.* Makino, 1905. A pink flowering form of *C.sinensis* var. *sinensis.*

Camellia T. SCCS, 1956, *The Camellia. Its Culture and Nomenclature.*, p.31. Synonym for 'Donckelaeri' (**Masayoshi**).

Camellia theifera. Anonymous, 1874, *Gardeners' Chronicle.* Synonym for *Camellia sinensis.*

Camellia hiemalis. Nakai in *Journal of Japanese Botany XVI,* 695 1940. Group name for collection of hybrids between *C.sasanqua* and *C.japonica* primary hybrid, back crossed to *C.sasanqua.*

Camellia Thea Rosea. K. Wada Hakoneya Nurseries Catalogue, 1935, p.27. Synonym for *Camellia sinensis* var. *rosea* Makino, 1905.

Camellia x vernalis. Makino, 1918 *in Journal of Japanese Botany*, I. 40 (1918) as *C.vernalis.* Group name for a collection of hybids and back crosses between *C.sasanqua* and *C.japonica* primary hybrid and *C.japonica.* Ref. Kondo, 1976, *American Camellia Yearbook*, p.102.

Camellia x williamsii. Smith, 1947, Journal of RHS, LXXIV:347. Group name for hybrid cultivars arising from crosses between species *C.japonica* and *C.saluenensis.* The name was given in honour of Mr. J.C. Williams of Caerhays Castle, Corwall, England who was one of the first to raise these hybrids.

Camellian. SCCS, 1964, *Camellia Nomenclature*, p.28. Synonym for **Pink Champagne.**

Camello Galli. Scott, J. & Son, Nursery Catalogue, 1889, p.41. Orthographic error for **Cammillo Galli.**

Camelot. *(C.reticulata),* ACRS, 1976, *Camellia News,* No.62, p.21, Reg. No.185: Originated by Edgar R. Sebire, Wandin North, Victoria, Australia. Seed parent *C.reticulata* **Buddha**. Sed planted 1970, first bloomed 1973. The upright, open, vigorous plant produces 12 cm, rose-pink flowers, midseason. The 11 cm x 5.5 cm, dark green, lanceolate, acuminate leaves are concave with small, sharp serrations. Sport: **Camelot Variegated.**

Camelot Variegated. *(C.reticulata),* Cannon, 1979, ACS., *The Camellia Journal,* vol.34, No.4 as 'Camelot Var.'. A virus variegated form of **Camelot** - Rose-pink marbled white. Originated in USA.

Cameo. Lindo Nurseries Price List, 1940-1942 erroneously as a sport of 'Mrs Abbey P. Wilder'. A synonym for **Cameo Pink.**

Cameo Gem. *(C.japonica),* SCCS, 1960, *Camellia Nomenclature,* p.36: Soft, light pink. Small peony form with mixed petals and petaloids. Blooms mid-season to late. Originated by Harvey Short, Ramona, California, USA.

Cameo Pink. *(C.japonica),* McIlhenny, 1937, *600 Variety of Camellia;* Gerbing Azalea Gardens Catalogue, 1938-1939: A full double, light pink, flower, 8.5-10 cm across, when fully open shows golden stamens in the centre. A slow, bushy grower; foliage light green, medium large, an extremely profuse bloomer. Blooms mid-season. Sport of 'Lilyi' originated by Pugh, USA. Abbreviation: 'Cameo'. For colour plate see G.G. Gerbing's *Camellias,* 1945, p.33. Ref. Hertrich, 1955, *Camellias in the Huntington Gardens*, vol.II, p.55.

Cameo Queen. *(C.japonica), American Camellia Yearbook,* 1981, p.95, Reg. No.1753: A large, white semidouble *C.japonica* chance seedling, mid-season blooming; originated by Hugh

Shackelford, Georgia, USA. The 10 year old seedling first bloomed 1977. Average flower size, 11 cm across. Commercially introduced 1980. Plant growth is of average density and rapid rate with dark green leaves, 7.5 cm long by 2.5 cm wide.

Cameo Rose. *(C.x williamsii). New Zealand Camellia Bulletin,* 1992, Issue No.111, vol.XVII, No.4, p.7, Reg. No.295. Originated by Les Jury, New Zealand. First bloomed in 1988 and is now 11 years old. It is a seedling of *C.x williamsii* **Fantastic** x **Elsie Jury,** and is a semi-dwarf plant of average growth rate, with dark green leaves 8 cm long x 4 cm wide. The rose form double flower is 9 cm across x 4 cm deep with 60 petals. It is China rose pink (RHS.CC.58D) of symmetrical form, deeply notched petals. Flowers mid-season.

Cameron Cooper. *(C.reticulata x C.japonica), American Camellia Yearbook,* 1976, p.160, Reg. No.1401: A 7 year old hybrid *(C.reticulata* 'Cornelian' (**Damanao**) x *C.japonica* **Mrs D.W. Davis**), that first bloomed 1971; originated by Frank Pursel, Oakland, California, USA. Plant growth, upright, dense and rapid in rate with dark green leaves averaging 12.5 cm x 7.5 cm. The peony to rose form double type flower is vivid pink, deeper veined, with 20 petals, 12 petaloids, yellow anthers and cream filaments. Average size, 15.5 cm across x 8 cm deep. Heavy textured, long lasting blooms. Early to late flowering. Colour photo, p.151, Macoboy, 1981, *The Colour Dictionary of Camellias.* Chinese synonym 'Kubo'.

Camila Ingram. *(C.japonica),* SCCS, 1970, *Camellia Nomenclature,* p.30: Red with white variegation. Miniature, formal double. Vigorous, bushy, upright growth, Mid-season blooming. Originated by McCaskill Gardens, Pasadena, California, USA. Orthographic variant: 'Camilla Ingram'.

Camile. SCCS *Camellia Nomenclature* 2009, p.26; Orthographic error for **Camille.**

Camile Brozzoni. Anderson & Co. Catalogue, 1897, p.79. Orthograhic error for **Camille Brozzoni.**

Camilio Galli. Anderson & Co. Catalogue, 1897, p.79. Orthographic error for **Cammilla Galli.**

Camöes (João José Gomes). *(C.japonica), Jardim Portuense,* Apr 1844, No.7, p.106; Regular flower, outer petals vivid scarlet getting gradually lighter towards the centre, where they become pale pink. Originated in Portugal by João José Gomes.

Camöes (Marques Loureiro). *(C.japonica)* José Marques Loureiro, Catalogue No.1, 1865, p.36, & No.9, 1872-73, p.41: Formal double. Brilliant cherry red flaked with white. Orthographic error 'Camoens'.

Camoens. Catálogo del Establecimiento de Agricultura de Pontevedra – La Caeira, undated, p.28. Orthographic error for **Camöes.**

Camozzi. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa a Quiete,* p.8. No description. Originated in Italy. (Believed extinct.)

Campanella. *(C.japonica),* Waterhouse, 1952, *Camellia Trail,* p.30: A light pink single, campanulate form, raised by E.G. Waterhouse, Gordon, N.S.W., Australia from seed of **Suibijin.**

Campanulata. *Floricultural Cabinet,* 1838, p.149: Synonym for 'Fairley'.

Campanulata. Yashiroda, 1938. This name is an erroneous abbreviation for the early botanical classification *Thea reticulata* var. *campanulata* f. *bicolor.* The prior valid name is **Wabisuke.**

Campanulata Bicolor. SCCS, 1951, *The Camellia. Its Culture and Nomenclature.* An abbreviation for *Thea reticulata* var. *campanulata* f. *bicolor.* The prior valid name is **Wabisuke.**

Campanulata Subuvidula. SCCS, 1951, *The Camellia. Its Culture and Nomenclature.* An abbreviation for the early botanical classification, *Thea reticulata* var. *campanulata* f. *subuvidula.* Prior valid name is **Shibenashi-wabisuke.**

Campanulata White. SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* A small, single, campanulate bloom. Synonym for **Shiro-wabisuke.**

Campari. *(C.japonica),* SCCS, 1972, *Camellia Nomenclature,* p.31: Plant patent applied for. Pink, striped and flecked crimson. Medium to large formal double. Vigorous, upright growth. Blooms midseason to late. Sports: **Campari White, Campari Rose.** Originated by Armstrong, USA. Colour photo, p.73, Macoboy, 1981, *The Colour Dictionary of Camellias.*

Campari White. *(C.japonica), American Camellia Yearbook,* 1980, p.161, Reg. No.1637: A medium size, white, formal double *C.japonica* mutant of **Campari,** blooms mid-season to late. Originated by R.A. Sansing, Florida, USA. Average flower size is 8.5 cm across by 5.5 cm deep, with 76 petals. Flower characteristics the same as **Campari.** Plant growth is upright, vigorous and rapid in rate with light green leaves, 8.5 cm x 5 cm.

Campari Rose. *(C.japonica),* SCCS, 1987, *Camellia Nomenclature,* p.24; *American Camellia Yearbook,* 1986, p.89, Reg. No.2026: Rose-red sport of **Campari.** Originated by Vi Stone, Baton Rouge, Louisiana, USA. Flowers mid-season. The mutant was first observed 1981. Average size of flower, 8 cm across by 2.5 cm deep. Petals rolled at edges and are darker, shading to lighter inside each petal. Growth is average with dark green leaves, 7 cm x 3.8 cm.

Campbell. *(C.japonica),* Lindo Nursery Catalogue, 1940:1941: Deep pink, double, irregular form showing stamens. Large, profuse, dense shrub. Originated in USA. The Pacific Nursery, San Francisco, 1895-1896, listed a cultivar as **Campbell** as dark crimson. This would seem to be

an abbreviation for 'Lady Campbell'. Lindo, in 1948, equated this variety with **Covina** which, however is semi-double to rose form double.

Campbell. Seidel, 1870 Pflanzen Catalog, p.12. Thought to be an error for **Campbellii.**

Campbell Ashley. *(C.japonica),* Gerbings Azalea Gardens Catalogue, 1941-1942: A new camellia from Middleton Gardens (Middleton No.13). A loosely formed peony type flower of the deepest red with petals of crepe-like texture. The petaloids of the 10 cm flower are intermingled with stamens. Growth is tall and the deep green leaves are noticeably long. Late flowering. A chance seedling discovered at Middleton Gardens, South Carolina, USA by Campbell Ashley after whom it was named. Registration No.42 with the ACS. See black and white photo, p.73, Hertrich,1954, *Camellias in the Huntington Gardens,* vol.I. Sport: **Campbell Ashley Variegated.**

Campbell Ashley Variegated. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1948-1949: A striking form of **Campbell Ashley.** Large, red and white form of the variety. Originated at Magnolia Gardens, Charlston, South Carolina, USA.

Campbelli. L. Levavasseur Nursery Catalogue, 1971, p.7. Synonym for **Campbellii (Guichard).**

Campbellia. Robert Tyas, 1843, *Popular Flowers,* p.85. Loddige's Catalogue, 1844. p.6. Orthographic error for **Campbellii.**

Campbellii. *(C.japonica), Floricultural Cabinet,* vol.III, 1835, p.118 as. *C.j.* 'Campbelli' *'Campbell's Hybrid'* a seedling from 'Middlemist's Blush'. The flowers are very large, of a fine white, striped and spotted pale red. Rousseau, 1842-1843, Catalogue: White base striped rose. Originated by Walter Fredrick Campbell, MP., Woodhall, Lanarkshire, UK. Orthographic errors: 'Campbellia', 'Cambellii'.

Campbellii. Gerbing's Azalea Gardens Catalogue, 1938-1937. Pseudonym, as 'Campbelli', for **Margherita Coleoni** and 'Tokayama'.

Campbellii (France). The Pacific Camellia Society, 1946, *Camellia Nomenclature,* p.7: Synonym for **Campbellii (Guichard).** This is given as coming from Guichard, France but does not match the description in the Guichard Catalogues which, in 1984, still list 'Campbelli' as "Fleur, semidouble, rouge". McIlhenny listed this cultivar as 'Dobreel' in 1935 and Overlook Nurseries gave it as a synonym for 'Dobreel' in 1954, but as this is an orthographic error for **Dorbrielle** it is rejected as a prior valid name for the cultivar.

Campbellii (Guichard). *(C.japonica),* Guichard Soeurs Nursery Catalogue, 1894, erroneously as 'Campbelli': Red semi-double, extra good, flowers well. Blooms late. Hillier & Son Nursery Catalogue, 1935, p.116: "Single to semi-double, full rose." Many varieties are grown in Europe as 'Campbellii'. It is sometimes double, sometimes semi-double, self coloured or variegated, but is not related to the original valid **Campbellii.** In the USA it has been called 'Campbelli'(France): Semi-double, rose-pink. W.J. Marchants Nursery Catalogue, 1937, p.33: Forms a round, compact bush and is decorated with single or semi-double, well formed, rose-pink flowers. Late flowering. Orthographic error: 'Campelli'. Synonyms: 'Lady Campbell', 'Black Beauty', 'Goddess of Fire', 'Margharita'.

Campbellii (Jackman). *(C.japonica),* Jackman & son, 1958-1959, *Planter's Handbook,* p.18 invalidly as 'Campbellii': Produces an abundance of medium sized carmine semi-double flowers. Dense and shapely in habit. Originated in England.

Campbellii (L). *(C.japonica),* McIlhenny, 1935, *List of Camellias for Sale,* p.2 as 'Campbelli'(L): Deep rose-pink blooms, having large petals throughout. Full peony double blossom with stamens showing amongst the centre petals.

Campbellli Red. Vanderbilt, 1941, *Camellia Research, II,* p.1. Erroneous name for **Margherita Coleoni.**

Campbellii Variegated. Valley Garden Supplies Catalogue, 1946-1947. as 'Campbelli Var.' Erroneous name for **Margherita Coleoni Variegated.**

Campbellii (II). Vanderbilt, 1941, *Camellia Research, II,* p.1. Synonym for **Campbellii (Guichard).**

Campelli. Pepinieres Lepage, Catalogue, 1980-1981. Orthographic error for **Campbellii (Guichard).**

Candidissima. *(C.japonica),* F. Amatuer, Correspondance des Plantes, 1833, *Magazin d'Horticulture* 1 [pt,E]:41: Louvain 1st Dec.1832. The camellia **Candidissima,** which is described in your journal, was introduced directly from Japan by Dr Siebold. This camellia, together with 'Donckelaeri' (**Masayoshi**), **Ochroleuca** and **Tricolor** ('Ezo-nishiki'), arrived in Holland from Japan in 1829 and were first grown by Donckelaer and was the second of this group to flower. On pp.4, 5: This variety is remarkable for its leaves which resemble those of **Welbankiana**, except that they are thinner and supple to touch, with fine, acute serrations. The flower of 8 cm in diameter, is very double with regularly arranged, oblong, snow-white petals, exactly resembling a dahlia. It is mid-season flowering, pure white, formal double of about 65 petals, medium size, about 8 cm across, petals acuminate and can be imbricated to form a tiered or star shape. Leaves, light green, ovate, 6 cm long by 2.5 cm wide. Growth slow. Orthographic errors: 'Candadissima', 'Candissima', 'Candidessima', 'Candidisma', 'Candidissimia'. Synonyms: 'Louise Centurioni', 'French Pearl', 'Effie B. Youtz', 'White Star', 'Palmeria Alba', 'Louise Centruioni', 'Sieboldii', 'Candidissima Plena', 'Alba Candidissima'. Black and white photos: Hume, 1955, *Camellias in America*; Hertrich, 1954, *Camellias in the Huntington Gardens*, vol.I, p.75. Originated in Japan. Chinese synonym 'Xuedi'.

Candle Glow. *(C.cuspidata x C.japonica), American Camellia Yearbook,* 1980, p.161, Reg. No.1685: A small to medium size, white with light pink throat, single, *(C.cuspidata x C.japonica)* early to mid-season blooming. Average flower size is 7.5-8.5 cm across. Plant growth is upright, dense, medium in rate with dark green leaves, 5 cm long by 2.5 cm wide. Originated by Nuccio's Nurseries, Altadena, California, USA.

Candle Light. Stewart's Florists & Nursery Catalogue, 1964, p.1. Orthographic variant for **Candlelight.**

Candlelight. *(C.japonica), American Camellia Yearbook,* 1961, p.219, Reg No.588: A 9 year old chance seedling, first bloomed 1959; originated by Dr Gilbert E. Fisher, Alabama, USA. Plant growth is upright, of average density and rapid in rate. The leaves average 13 cm long and 5 cm wide, are dark green with some variegation. The flowers are white with yellow stamens and have more than 25 petals and 5-6 petaloids. Blooms mid-season. According to SCCS, *Camellia Nomenclature,*1966, this name is a synonym for **Angel,** however the original descriptions are different. Orthographic variant: 'Candle Light'.

Candleri Elegans. William Bull Retail Catalogue, 1867, p.73. Orthographic error for 'Chandleri Elegans', synonym for **Elegans**.

Candolleana. *(C.japonica),* Loddiges Catalogue, 1836, p.24. No description. Berlèse, 1840, *Monographie,* ed.2, p.184: Leaves 8 cm long x 4 cm wide, oval-lanceolate, coarsely serrate, a

little spoon shaped, often with marks and splashes of clear yellow. Buds, medium size, obtuse, yellowish scales. Flower 7 cm across, orange-red carmine, with a little vermilion, double; petals in 4-5 rows, oval-obtuse, well imbricated with distinct marks or lines of dark red, lightly scalloped at the apex, a central heart of small, twisted, elongated, numerous, erect petals, petaloids and stamens. The flower is a flared cup shape, regular and well developed. Synonym: 'Pomponia Candolleana'. Orthographic errors: 'Candoleana', 'Candollei', 'de Candolle', 'de Candollei', 'de Candolleana', 'Decandolli', 'Decandolleii', 'Candollei, 'De Candollei', 'de Candollii'.

Candor. *(C.japonica),* Chandler & Son, "On the Culture of the Camellia", 1842, *Gardeners' Chronicle,* 324(8):123: An English seedling raised by the Reverend Herbert, described by van Houtte as "finely imbricated, petals extremely thin and delicate, of the purest white, one petal only reflecting a light rosy tint." It was illustrated by van Houtte in the *Flore des Serres,* vol.5, Aug. 1849, F.501. Orthographic variant: 'Candeur'. Synonym: 'Candor Nevius'.

Candor Nevius. Oudin, Lisieux Nursery Catalogue, 1845-1846, p.42. A synonym for **Candor.**

Candy Apple. *(C.japonica),* Nuccio's Nurseries Catalogue, 1991, p.4, #8428: Dark red, medium to large semi-double to loose peony form. Dark green foliage. Bushy, upright medium growth. Blooms mid-season to late. Chinese synonym: 'Tianpingguo'.

Candy Cane. *(C.japonica),* Nuccio's Nurseries Catalogue, 1963: White striped red. Mediun size, formal double. Vigorous, compact, upright growth. Flowers early to mid-season. Originated at Nuccio's Nurseries, Altadena, California, USA.

Candy Flame. *(C.japonica),* Camellias Aust., *Camellia News,* Autumn 2013, p.28 with colour photo; Regn No.666-N. Originated by Craig Carroll, Mt. Tomah, NSW. A chance seedling of **Moshio**. Small to medium size, pale pink single blooms with deep pink flecks, streaks and marks.

Candy Floss. *(C.japonica), New Zealand Camellia Bulletin,* vol.XII, No.5, 1982, p.7, Reg. No.176: A chance seedling of **Aspasia Macarthur,** raised by B.R. & T.G. Healy, Wanganui, New Zealand, it first flowered 1969. The plant is of upright, open growth habit with medium growth rate. The dark green leaves average 7.5 cm x 6 cm. The white, striped pink flowers with their prominent stamens and petaloids are semi-double. They measure 12.5 cm across by 5 cm deep and have 20 petals and 7 petaloids. Anthers are white with cream filaments. Flowers early to late.

Candy Mint. *(C.japonica),* Nuccio's Nurseries Retail Price List, 1987-1988, p.4: Miniature to small anemone form; pink heavily striped red. Petaloids the same colours but turning creamy at the base. Blooms mid-season. Originated at the Nuccio's Nurseries, Altadena, California, USA. ACS, May 1989, *The Camellia Journal,* vol.44, No.2, p.9, Reg. No.2119. *American Camellia Yearbook,* 1989, p.119: The 8 year old seedling first bloomed 1984. Plant growth is upright and dense. Chinese synonym 'Bohetang'.

Candy Mountain. (*C.reticulata* hybrid). Heartwood Nursery, Seedling List 2009; a 12-7-15 cm diameter, peony form, medium pink marbled with white. Strong, somewhat spreading growth. A hybrid incorporating **Buddha, Forty-Niner** and *C.pitardii.* Originated by Heartwood Nursery, Fort Bragg, Calif., USA (HW0005).

Candy Pink. Vanderbilt, 1941, *Camellia Research, II,* p.2. Synonym for **Marchioness of Exeter.**

Candy Reiter. *(C.sasanqua),* SCCS, 1947, *The Camellia. Its Culture and Nomenclature* as "Shell pink. Single sasanqua". Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III, p.282, black

and white photo, p.283: Flower single, margins rose pink, 427, fading through 427/1, 427/2 and 427/3 at centre and base; 10 cm across. Buds; elliptic; petals, 5-7, variable in shape, lax, 4 cm long x 2.5 cm wide, tapering to haft, margins notched. Stamens; spreading, incurved, light green filaments, 2 cm long; small, light brown anthers. Leaves; lanceolate, channelled, medium, glossy green, 4.5 cm x 1.7 cm; serrations fine; apices tapering; petioles stout; venation obscure. Plant habit, dense, upright, medium rate growing. Early blooming. Originated by McCaskill Gardens, Pasadena, California, USA.

Candy Stick. *(C.japonica), American Camellia Yearbook,* 1955, p.335, Reg. No.241: A 12 year old seedling of **Finlandia Variegated;** originated by Earl D. Hudson, California, USA. First flowered 1949. Plant growth, open and upright in type, rapid and compact in manner; similar to its seed parent. Flower buds, ovoid, light green. The flower varies from 8.5-12.5 cm across and its colour is white striped dark red. In form it is incomplete double with mixed petaloids, similar to **Nobilissima.** It usually has a row of guard petals with tufts of stamens and petaloids. The edges of the petals are fimbriated. Mid-season flowering.

Candy Stripe. *(C.japonica),* McIlhenny Catalogue, 1942, p.6: White striped pale rosaline purple. Medium sized semi-double with petaloids intermixed with the stamens. Medium, upright growth. Early to mid-season blooming. Originated by McIlhenny, Jungle Gardens, Louisiana, USA. Sport: **Barbara Whaley.**

Candy Stripe (Waterhouse). *(C.japonica),* Eagle Heights Nursery Catalogue, 1965, p.9: A seedling of **Doris Tagg** originated by Professor E.G. Waterhouse, Gordon, N.S.W., Australia and invalidly named 'Candy Stripe' by Gordon Waterhouse, Kurrajong, N.S.W. A single, white ground with red flecks and stripes. Slightly scented. Compact, bushy growth.

Candyball. *(C.sasanqua).* C. Aust, *Camellia News,* No.182, p.6 with colour photo; Regn No.594-N.; A seedling of **Jennifer Susan,** first flowered 2001. Medium size flowers which open formal double and age to informal double. Upright, bushy growth. Originated by Justin O'Malley Jones, Marian Grove Nursery, Mangrove Mountain, NSW, Australia.

Canebiensis. *(C.japonica),* Geldorf, Const., 1844, Catalogue of Plants and Price List, p.4. No description. Originated in Belgium. (Believed extinct).

Cappellano Peregalli. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.16. Formal double, imbricated, pink; paler in the centre. Originated in Italy.

Capponiana. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847: Flower, full, regular; external petals lined and striped rose white; internal petals, some formed from abortive stamens. Originated by Burnier & Grilli, Florence, Italy. Orthographic error: 'Caponiana'.

Cappy Durden Variegated. *(C.japonica), American Camellia Yearbook,* 1991, p.77, Reg. No.2224: Originated by Dean's Nursery, Lucedale, Mississippi, USA, and commercially introduced in 1990. A large, dark red, variegated white, semi-double chance seedling. The 17 year old seedling first bloomed in 1973. Average flower size is 11-12.5 cm across x 5 cm deep with 18 petals, yellow anthers and red filaments. Plant growth is upright, dense and rapid with dark green leaves 10 cm across x 6 cm wide. Registered erroneously as 'Cappy Durden Var.'. Colour photo pp.80-81, 1991 *American Camellia Yearbook.*

Capricci. *(C.japonica),* ACS, *The Camellia Journal,* Nov. 2001, p.21, colour photo p.20, Reg. No.2554. A peony form chance seedling, white with occasional pink stripes, gold anthers and creamy white filaments. The plant has vigorous upright growth and flowers early to mid-season. Originated by Clarence Gordy, Ocala, Fla., USA. *American Camellia Yearbook,* 2001, p.93, colour photo p.c13. The 10 year old seedling first flowered in 1994. Can also throw solid pink flowers, or pink with rose stripes. Average flower size is 10 cm across x 5 cm deep. The dark green leaves are 10 cm long x 6.5 cm wide.

Capricciosa. *(C.japonica),* Charles van Geert Catalogue, 1845, p.3 as 'Capriciosa'. No description. Ibid. Catalogue,1848, p.4: Cherry red peony form, first class. Orthographic variant: 'Capriciosa'. Originated by Del Grande, Rome, Italy.

Caprice. *(C.japonica),* Coolidge Rare Plant Gardens Catalogue, 1930; McIlhenny, 1937, *600 Varieties of Camellias:* A double creamy white, from 10-12 cm across. SCCS, 1947, *The Camellia. Its Culture and Nomenclature:* Creamy white. Medium, full peony form. Vigorous, upright growth. Midseason flowering. Black and white photo, p.77, Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.I. Of a somewhat uncertain origin, but grown for many years by the Coolidge Rare Plants Garden, Pasadena, California, USA. Said to have some fragrance. Not to be confused with the large semi-double grown in the South of America as **Caprice (South).** Listed by Fendig, 1953, *American Camellia Catalogue* as 'Caprice (2)'. Synonym: 'Ilegemann White'. Orthographic errors: 'Legerman White', 'Ilegerman White', 'Ilegmann White'.

Caprice de la Reine. *(C.japonica),* Jean Vervaene fils, 1864 Price List, No.1, p.4. No description. Linden Catalogue, 1871-1872, p.15. No description. Originated in France or Belgium.. (Believed extinct.)

Caprice (South). *(C.japonica),* SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* White, medium size semi-double. Origin credited to C.S. Tait, Georgia, USA who developed it from seed planted in the mid 1920's. Originally known as 'Caprice', the name of **Caprice (South)** was given to it to distinguish it from the peony form. Synonym: 'Caprice (1)'.

Caprice (1). Fendig,1953,American *Camellia Catalogue.* Synonym for **Caprice (South).**

Caprice (2). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Caprice.**

Capriciosa. Charles van Geert Nursery Catalogue, 1845, p.3. Orthographic error for **Capricciosa.**

Capricious. *(C.reticulata x C.japonica), American Camellia Yearbook,* 1974, vol.II, p.230, Reg. No.1319: An 8 year old hybrid 'Crimson Robe' (**Dataohong**) x **Ville de Nantes** seedling, that first bloomed 1970; originated by Dr W.F. Homeyer Jr, Macon, Georgia, USA. Plant growth is upright, spreading and rapid with dark green leaves, 10-11 cm long x 5-5.5 cm wide. The semi-double to loose peony form flower is rose bengal with 14-20 petals and white anthers and filaments. Size, 15-16 cm across x 5-6 cm deep. Blooms mid-season. Sport: **Capricious Variegated.**

Capricious Variegated. *(C.reticulata x C.japonica),* Gentry, 1977, *ACS., The Camellia Journal,* vol.32, No.4, as 'Capricious Var.': A virus variegated form of **Capricious** - Rose bengal marbled with white. Originated in USA.

Capriola. Volonte, 1888, Catalogue, p.117. Orthographic error for **Caprioli.**

Caprioli. *(C.japonica),* Fratelli Rovelli Catalogue, 1852, p.13. No description. Franchetti, 1855, *Collezione di Camelie,* p.16: Average size, perfectly imbricated, pale pink streaked with white. André, ed. 1873, *Illustration Horticole,* vol.XX, p.181, pl.145: Flower of average size, regularly imbricated, petals oblong, strongly indented at the apex, colour, light carmine, each petal having a longitudinal white band in the centre with a regularity which gives the aspect of a star. Originated in Italy by Ugoni.

Captain A. Selby. *(C.japonica),* Guilfoyle, 1883, *Catalogue of the Melbourne Botanic Gardens.* No description. Originated in Australia. Abbreviation: 'Captain Selby'. (Believed extinct.)

Captain Alexander Variegated. *(C.japonica),* Griffin, ed., 1958, *Camellian.* No description. Orthographic variant: 'Capt. Richard Alexander Var.' Originated in USA.

Captain Blood. *(C.japonica),* McIlhenny Catalogue, 1948-1949: Peony type bloom, medium sized**,** outer petals turned down and curled under at tips, inner petals, irregular, upstanding; lemon tipped stamens; rose-red blossom washed pomegranate purple. A seedling from Jungle Gardens, Avery Island, Louisiana, USA. See p.29, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III.

Captain Call. *(C.reticulata).* J & F Thoby, Gaujacq, France, Catalogue, 2005, p.40; Probably an orthographic error for **Curtain Call.**

Captain Edwin Folk. Walter Allen Nursery Catalogue, 1949 as 'Capt. Edwin Folk'. Synonym for **Captain Folk.**

Captain Edwin Folk Variegated. Hillcrest Nursery Catalogue, 1958 as 'Capt. Edwin Folk Var.' Synonym for **Edwin H. Folk Variegated.**

Captain Folk. *(C.japonica),* Fruitland Nursery Catalogue, 1945-1946, p.27: Bright rose-red, large, loose semi-double. Vigorous, upright growth. Flower 10 cm in diameter, some petals occasionally marked with white, cup-shaped, white filaments, yellow anthers, mid-season to late flowering. Originated by Flechtman, superintendent of the Tea Gardens, South Carolina, USA from seed of unknown parents. Synonyms: 'Edwin H. Folk', 'Captain Edwin Folk', 'Edwin Folk', 'Colonel E.H. Folk'. See p.109, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II. Awarded the RHS, P.C., 1962 as 'Edwin H. Folk'. Sport: **Edwin H. Folk Variegated.**

Captain Harrison. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.33. No description. Originated in USA. (Believed extinct.)

Captain Ike Davis. *(C.japonica),* Orton Nursery Price List, 1947-1948 as 'Capt. Ike Davis': Rose-red. Medium sized, loose peony form with large, ruffled petals. Vigorous, upright growth. Mid-

season blooming. See, p.57, Hertrich, 1955, *Camellias in the Huntigton Gardens,* vol.II. Originated by Orton Nurseries, USA.

Captain Jack. *(C.japonica),* NCCS, 1949, *Bulletin,* vol.3, No.2, p.7: A seedling raised by Mrs F. Edinger of Rosebud Farm, California, USA. White striped red to solid red. Medium sized, semi-double. Seedling of **Tricolor.** Sometimes throws a red sport.

Captain John Smith. *(C.japonica),* Funchess, 1951, *American Camellia Yearbook,* p.21. No description. SCCS, 1954, *The Camellia. Its Culture and Nomenclature:* Rose-red, sometimes spotted white. Medium sized, peony form. Medium, compact growth. Mid-season blooming. Synonym: 'Captain John Smith Red'. Sport: **Captain John Smith Variegated.** Originated by Wildwood Nursery, South Carolina, USA.

Captain John Smith Red. Mark S. Cannon Scion Catalogue, 1963-1964, p.3 as 'Capt. John Smith Red'. Synonym for **Captain John Smith.**

Captain John Smith Variegated. *(C.japonica),* McDonald Nursery Catalogue, 1954-1955 as 'Capt. John Smith Var.' A virus variegated form of **Captain John Smith** - Rose-red marbled white. Originated in USA.

Captain John Sutter. Valley Garden Supply Catalogue, 1946-1947. Synonym for **Kishû-tsukasa.**

Captain Kidd. *(C.japonica),* Fruitland Nursery Catalogue, 1948-1949: Deep rose shading to red. Large, semi-double with irregular petals. Originated at Fruitland Nursery, Augusta, Georgia, USA.

Captain MaCall. Hazlewood & Jessep, 1972, *Checklist - Camellia* Cultivars *from Nursery Catalogues,* p.33. Orthographic error for **Captain Mackall.**

Captain Mackall. *(C.japonica),* Anonymous, 1853, *Floricultural Cabinet,* vol.21, p.148: The flowers are very large, ranunculus-formed and of a shining, rich, purple-crimson colour with irregular patches of white. Originated in England. Orthographic error: 'Captain Macall'.

Captain Martin's Favorite. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943: A medium sized, 8-9 cm across, light, rosy-red on white, formal double, symmetrical, imbricated and does not show stamens. The petals are incurved. Some blooms are deep pink, splotched white. Long flowering, early to late. Leaves, medium sized, 6 cm x 3 cm, light green, acuminate. A slow grower, compact and symetrical. Origin as given by Mr C. Norwood Hastie Jr. of Magnolia Gardens: Captain Martin was the Captain of a boat which used to bring visitors to the gardens. He was somewhat of a dude, always wearing a tall plug hat. After his visits the family noticed many flowers missing from a particular plant. One day my grandmother (Julia Drayton) met the Captain in the garden, face-to-face. He tipped his hat with a flourish and flowers cascaded to the ground. From that day the plant was known as 'Captain Martin's Favorite'. The name has been used in Magnolia Gardens from about 1860. See colour plate p.37, *Camellias,* 1945 by G.G. Gerbing. Its actual origin is uncertain. It is either a seedling from the gardens or an unknown European import. It is somewhat similar to **Vittorio Emmanuele II.**

Captain of Beauty. *(C.japonica),* Peer, 1956, *American Camellia Yearbook,* p.54 in a list of camellias growing in the glasshouses of the King of Belgium at Laeken. No description.

Captain Parks. *(C.japonica),* Hertrich, 1955, *Camellias in the Huntington Cardens,* vol.II, black and white photo, p.59, description, p.56: Flower, complete double, formal type, near-imbricated. Colour camellia Rose 622/self (rose-pink), 622/1, lighter towards haft, 10 cm across by 4 cm deep. Petals; 50 major size, obovate, 5 cm long x 4 cm wide, single apical notch, conspicuous venation, firm texture; petaloid segments pale green in centre with petal coloured margins. Centre of flower progressively smaller petals to bud-like centre. Mid-season flowering. Leaves; broad-lanceolate,12 cm long by 5-6 cm wide, dull medium green, lighter, glossy green

beneath, leathery, serrations broad and shallow; apices long acuminate, venation light. Plant habit, upright, open branched. Originated in the USA.

Captain Rawes. *(C.reticulata),* Sweet, 1830, *Hortus Britannicus* as **Captain Rawes;** Booth, 1830, *Transactions of the Horticultural Society of London,* 7:519-562 as 'Captain Rawes' Camellia'. A very large semi-double to incomplete double flower, 14-17cm across. Bright rose madder, lighter towards the centre. Petals about 15 in two rows, waved and undulated. Anthers, first bright yellow, darkening with age. Leaves, dull green above, light, glossy green below, distinctive veining, broad-elliptic, 8.5-9.5 cm long by 3.5-6 cm wide, blunt apex, finely and sharply serrate. Open growth habit, forming a small tree up to 10 meters in height. The first introduction of *C.reticulata* was made by the East Indiaman skipper, Captain Rawes, in 1820, who brought back from China an unnamed camellia, which he gave to Thomas Carey Palmer of Kent, England, where it flowered in 1826. In 1824 a further import was made by John Dampier Parks which flowered in 1827 and a description and illustration was published in the *Botanical Register* (t.1078), 1827 by John Lindley who gave it the botanical rank of *C.reticulata.* In the same year an illustration of Captain Rawes' plant was published in the *Botanical Magazine,* (t.2784) but exhibited differences to the plate of Park's plant. As pointed out by Robert Sealy in a letter to Kew 26/2/63, the illustration of the plant imported by Parks has a well developed gynoecium while that of Rawes' importation does not. It would thus appear that a fertile and an infertile form may have been introduced. This would seem to be borne out by the fact that the camellia generally known as 'Captain Rawes' has proved to be a most infertile triploid. On the other hand there have been reports from time to time of seedlings from what is nominally this camellia. The first name given, that of *Camellia reticulata, is* regarded as a species name and not applicable as a cultivar name. Other names applied, such as 'Semi-duplex' and 'Semi-plena' are invalid as 'Semi-duplex' was used for a *C.japonica* in 1810 and 'Semi-plena' also in 1822. The name 'Captain Rawes' Camellia' was also applied to the *C.japonica* cultivar **Rawesiana,** making it invalid for the *C.reticulata.* Earlier reports than 1830 of names in Japanese literature, have been 'Tô-tsubaki' and 'Kara-tsubaki', These translate as "Chinese Camellia" and appear to refer to *C.reticulata* as a group, rather than a cultivar. No Chinese name has been located in that country for the cultivar and it has recently been re-introduced to the land of its origin where it has been given the synoym 'Guixia' or 'Returning Cloud'. Jane Taylor in *The Milder Garden* 1990, p.206 erroneously states: "introduced (by Robert Fortune) in 1820". The plant introduced by Robert Fortune is 'Pagoda' (**Songzelin**). Further synonym: 'Chinese Peony-Flowered'. Orthographic error: 'Captain Rowes'. For colour illustations see Urquhart, 1960, *The Camellia,* pl.XXI; and Macoboy, 1981, *The Colour Dictionary of Camellias,* p.152; *American Camellia Yearbook,* 1947, p.119 and 1975, p.149. Received RHS, F.C.C., 1963. Originated in China.

Cardinal Stuart. *(C.x williamsii),* C. Aust, *Camellia News,* No.182, Autumn 2010, p.8 , Regn No.614-N; A chance seedling of **Jamie.** Semi-double, with 2 more rows of petals than parent, and petals opened more widely. Bright scarlet colour. Slow, bushy growth, with glossy dark green leaves. Flowers mid-season to late. Named for the younger brother of Bonnie Prince Charlie. Originated by Terence E. Pierson, Jaspers Brush, NSW, Australia.

Cardinal (Marchants) Variegated. *(C.japonica),* Stonehurst Nurseries Catalogue, 1980, illegally as 'Cardinal Variegata': Virus variegated form of **Cardinal (Marchants)** - Cardinal red blotched with white. Originated in England. Note: Such latin forms as "variagata" are illegal for new cultivars after 1958.

Cardinal Variegated. *(C.japonica),* SCCS, 1960, *Camellia Nomenclature,* p.36 as 'Cardinal Var.': A virus variegated form of **Carter's Cardinal** - Bright red marbled white. See pl.22, p.29, *Encyclopedia of Camellias in Colour,* Vol .II, 1978. Originated in USA.

Cardinale Antonelli. *(C japonica),* de Jonghe, 1851, *Culture du Camellia,* p.99: Large, full, imbricated form, bright pink, with broad bands and streaks of white. Fratelli Rovelli Catalogue, 1852, p.13: Tuscany. Imbricated. Brilliant pink with broad blotches and suffused white lines.

Verschaffelt, 1854, *Nouvelle Iconographie* Book XI, pl.I as 'Cardinal Antonelli': We received this Camellia from Italy in 1853...Its very large blooms belong to the class of perfections by the perfect imbricaton of their petals. They are delicate pink, more vivid to the circumference, taking on a purplish tint to the centre. The numerous petals are small, rounded, emarginated, delicately veined and form a compact, upright heart at the centre. Orthographic variant: 'Cardinal Antonelli'. Orthographic error: 'Cardinal Antonnellii'.

Cardinale Ferretti. *(C.japonica),* Luzzatti, 1851, *Collezione di Camelie,* p.9: Pink with a whitish centre. Imbricated. Originated in Italy. Orthographic variant: 'Cardinal Ferretti'.

Cardinale George. van Houtte, 1873-1874, Catalogue, 150-y:39. Orthographic error for **Cardinale Giorgio Haulik.**

Cardinale Georgio. van Houtte, 1874-1875, Catalogue, 157:27. Abbreviation for **Cardinale Giorgio Haulik.**

Cardinale Giorgio Haulik. *(C.japonica),* Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.5: Flower, large, regularly imbricated rose form double. Petals numerous, dense, rounded, lobulate and of a light vermilion colour. Originated in Italy at the Villa Quiete Gardens.

Cardinalis. *(C.japonica),* Jacob Makoy Nursery Catalogue, 1833. No description. Courtois, 1833, *Magazin d'Horticulture,* 1[pt.D]:315; Berlèse, 1837, *Monographie,* ed.1, p.118: Leaves large, a little curled, borders very serrate, venation apparent, surface uneven. Buds oblong with yellowish-green scales. Flowers semi-double, rather large, of a deep cherry red; the petals of the centre intermixed with fertile stamens; calyx divided into 4 segments as in **Sophiana**; the style protruding from the bud before it is open. Synonym: 'Moensii'. Originated in Belgium by M. Möens.

Cardinal's Cap. *(C.japonica), American Camellia Yearbook,* 1961, p.219, Reg. No.585: A 12 year old chance seedling, first bloomed 1955; originated by Andrew Surina, California, USA. Plant growth is upright and dense, medium in rate with dark green leaves averaging 8.5 cm x 4.5 cm. The anemone form flower, 5-6 cm across and 2.5 cm deep is Cardinal red and has 5 petals and 105 petaloids. Blooms mid-season to late.

Cardo. *(C.japonica),* Newmans Nursery Catalogue, 1886-1887, p.116-119. No description. Originated in Australia. (Believed extinct.)

Cardinia. *(C.japonica),* ACRS, 1962, *Camellia Annual,* No.9 incorrectly as 'Cardenia'. Originated by F.S. Tuckfield, Berwick, Victoria, Australia. A seedling of **Hikarugenji,** pollen parent unknown. The plant first flowered in 1959. The flower is an incomplete double with an attractive sheen. Inner petals and large petaloids, very erect with numerous stamens intermingled. Colour, blood red, RHS, 820/1. Flower, 8-10 cm across and 5-6 cm deep. Blooms mid-season to late. Leaves, narrow, elliptical, 10 cm x 5 cm, dark, glossy green. Plant habit, vigorous, upright and bushy. See colour plate No.24, ACRS, 1966, *Camellia News,* p.24.

Care Free. *(C.japonica), American Camellia Yearbook,* 1960, p.194, Reg. No.460: A 9 year old chance seedling originated by George Demetropolis, Alabama, USA. Plant growth is average and medium in rate. The dark green leaves average 11 cm x 6 cm. The deep salmon rose-pink flower, 12.5-13 cm across by 5 cm deep, is semi-double to peony in form with 10-12 petals, 31 petaloids and 5 rabbit ears. Stamens are golden yellow. Blooms early to mid-season.

Carega Superba. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.16; Burnier Catalogue, 1855-1856: Rosy flesh coloured, all veined and striped with carmine, petal margins diaphanous; imbricated. Originated in Florence by Franchetti, Italy. Orthographic error: 'Carego Superba'.

Carego Superba. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues.* Orthographic variant for **Carega Superba.**

Carini. *(C.japonica),* Isola Madre Catalogue, 1845: Rose coloured with stripes of white. Imbricated. Originated in Italy by Rosani.

Carini Conte. Rovelli Catalogue, 1874, p.30. Orthographic variant for 'Conte Carini'.

Carillon. *(C.japonica),* Outteridge, 1962, *1000 Named Camellias in Australia,* p.6: Red and white, single, large. Mid-season flowering. Seedling of unknown parentage, originated by E.G. Waterhouse, Gordon, NSW, Australia.

Carina. *(C.japonica),* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.16; No details.

Cariofiliflora. Sacco, 1832-1833 according to Schiavone, 1981, *Il Giardino nell Camelie,* pl.57. Orthographic variant for 'Caryophylliflora', synonym for **Dianthiflora.**

Cariofilifolia Major. *(C.japonica),* Sacco, 1830-1832 according to Schiavone, 1981, *Il Giardino nell Camelie,* pl.54. No description. Originated in Italy. Orthographic variant: 'Caryophyllaeflora'. (Believed extinct.)

Cariollii Superba. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue, p.23, as 'Cariolli Superba'. No description. (Believed extinct).

Cariophyllae Flora. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for 'Caryophylliflora'.

Carl der Grosse. Jacob Makoy et Cie Nursery Catalogue, 1849, p.19. No description. Berlèse, 1849, *Annales de la Société Central d'Horticulture de France,* vol.40, p.130. Orthographic variant for **Charlemagne.**

Carl der Groser. Franchetti, 1855, *Collezione di Camelie,* p.16.Orthographic variant for **Charlemagne.**

Carl M. Allen Jr. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 2000, p.5 with colour photo, Reg. No.2519. A rose red, sometimes with white variegation, anemone to peony form chance seedling. Flowers early to mid-season. Originated by Henry Rehder, Sr, Wilmington, N.C., USA. *American Camellia Yearbook,* 2000, p.2, colour photo p.c9. The 10 year old seedling first flowered in 1995. Average flower size is 8.2 cm across x 3.2 cm deep, with 24 petals, 14 petaloids, yellow anthers and cream filaments. Plant growth is spreading and average with dark green leaves 7.5 cm long x 3.2 cm wide.

Carl Rosenquist. SCCS, 1942, *Classification of Camellias,* p.2. Synonym for **Madame Lebois.**

Carl Rosenquist Variegated. SCCS, 1947, *The Camellia. Its Culture and Nomenclature* as 'Carl Rosenquist Var.'. Synonym for **Admiration.**

Carl Tourje. *(C.pitardii x C.reticulata),* Fendig, 1953, *American Camellia Catalogue;* SCCS, 1960, *Camellia Nomenclature:-* Soft pink with shadings of deeper pink. Large semi-double with wavy petals. Vigorous, upright, open growth. Mid-season blooming. A seedling from the cross *C.pitardii* var *yunnanica x C.reticulata* **Damanao** erroneously as 'Chang's Temple'; originated at the Huntington Gardens, San Marino, California, USA. See colour plate, frontispiece, SCCS, 1959, *The Camellia Review*, vol.20, No.4.

Carles-quint. Jose Marie Serra, 1855, *Establecimento de Horticultura,* p.4. Orthographic error for **Charles Quint.**

Carlo Alberto. *(C.japonica),* Burdin Maggiore & co., 1849-1850, Catalogue General: Beautiful red lined with white. Petals ruffled elegantly and curled. de Jonghe, 1851, *Traité de la Culture du Camellia,* p.99: Irregular flowers, red, bordered with white. Petals ruffled and indented. Luzzatti, 1851, *Collezione di Camelie,* p.9: Red lined and bordered with white; perfectly imbricated. According to Franchetti, 1855, 'Sacco di Lainate' is a synonym. However this is an orthographic variant for 'Sacco Lainatensis'. (Burnier & Grilli, 1846-1847), which would give this name priority. A check of the original descriptions indicates that they are independent varieties. Originated in Italy by Burdin. Orthographic variants: 'Charles Albert', 'Karl Albert,. Orthographic error: 'Charlo Alberto'.

Carlo Augusto. *(C.japonica),* Del Lungo & Girardi, 1928, *Le Camelie,* p.113: Flower semi-double, rose form; petals broad, marbled with white, external petals reflexed towards the calyx. Some stamens in the centre. Listed in the light red group. Originated in Italy.

Carlton Maryott. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1999, p.14, Reg. No.2494. A red, semi-double chance seedling with creamy yellow anthers and pink filaments. Originated by Arthur A. Maryott, Gaithersburg, Md., USA. *American Camellia Yearbook,* 1999, p.2, colour photo before p.1. The 20 year old seedling first flowered in 1993. Average flower size is 10 cm across x 3.8 cm deep, with 18 petals. Plant growth is average and dense with a medium growth rate. The dark green leaves are 8.2 cm long x 3.5 cm wide. Plant is very cold hardy.

Carmel. *(C.japonica),* Camelliana Nursery Catalogue, 1962; *American Camellia Yearbook,* 1970, p.161, Reg. No.1082: A 13 year old chance seedling that first bloomed 1959; originated by Dr. John D. Lawson, California, USA. Plant growth is upright, average density and slow in rate with medium size, light green leaves. The formal double bloom is blush pink with no anthers. It measures 8.5 cn across and 2.5 cm deep with 60-65 petals. Flowers mid-season.

Carmela. *(C.japonica) Camelia,* La Sociedad Española de la Camelia, No.17, Dec. 2010, p.35 with colour photos; Large formal double, white (RHSCC 155D) with bud centre showing cream. 9-11 cm diameter and 2.5-3 cm deep. Occasional flowers have 30-40 stamens, filaments greenish white, anthers yellow. Flowers fall complete. Observed in 1991 by Carmen Salinero Corral for the Estación Fitopatolóxica do Areeiro, Pontevedra, Spain. A sport of **Sweetheart.** 30 plants propagated in 2007 by graft have bloomed 100% true. Leaf 9 cm x 4.5 cm, elliptic, denticulate, pointed. Plant growth slow, upright, medium density. Flowers midseason to late.

Carmelita. *(C.japonica),* van Houtte, 1845-1846, Catalogue, 23:2: Ivory white with petals streaked rose pink. Originated by Lechi, Florence, Italy. Orthographic error: ‘Carmelite’.

Carmelita (Edinger). *(C.japonica), American Camellia Yearbook,* 1950, p.138, invalidly as ‘Carmelita’. Black and white photo. A pink semi-double with some petaloids in the centre. Originated by Mrs Mary Edinger, California, USA.

Carmelita Lechi. *(C.japonica),* Isola Madre Catalogue, 1845. No description. Franchetti, 1855, *Collezione di Camelie,* p.17: Very large, imbricated. Rosy red. Originated in Italy. Orthographic variant 'Carmelita Lecchi'.

Carnation. Kiyono Catalogue, 1934-1935. Synonym for **Rose Anemone** as 'Rose Enemy'.

Carnation. Berlèse, 1837, *Monographie,* ed.1. Synonym for **Anemoniflora Carnea.**

Carnation. *(C.x williamsii),* Penheale Nursery Catalogue, Cornwall, 1990-1991, p.2: Peony form, carmine pink. Spreading growth. Originated in the UK.

Carnation Blush. *(C.japonica),* Wendchuch, 1834, *Anleitung zur...,* p.22: Flesh pink semi-double with small reflexed petals, medium size. Flowering lightly and frequently. Originated in England.

Carnation Pink. Eastwoodhill Arboretum, 1982, *A List of Trees, Shrubs and Climbers.* Synonym for **Rose Anemone.**

Carnation Red. *Camellia Digest* 1 (2),1943. Synonym for **Rose Anemone** as 'Rose Enemy'.

Carnation Striped. Michael Floy, 1823, Catalogue, p.27. Synonym for **Variegata.**

Carnation Tsubaki. Inazawa Nurseries Co. Ltd. Catalogue, 1986-1987, p.5, A-213; See also p.381, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Synonym for **Kânêshon-tsubaki.**

Carnation Waratah. Loudon, 1825, *Greenhouse Companion,* p.74. Synonym for **Anemoniflora Variegata.**

Carnation Warrata. Berlèse, 1837, *Monographie,* ed.1, p.72. Orthographic variant for 'Carnation Waratah', synonym for **Anemonifora Variegata.**

Carnation Warratah. Buckingham & Chandler, 1825, *Camellia Britannica,* p.15. Orthographic variant for 'Carnation Waratah', synonym for **Anemoniflora Variegata.**

Carne. André Leroy, Angers Catalogue, 1823, p.10. Synonym for **Incarnata.**

Carnea. Loddiges Catalogue, 1818, pt.11, p.13. This name has been used for **Middlemist's Red** and, invalidly, as a synonym for **Incarnata.** It is regarded as a synonym for **Middlemist's Red.**

Carnea. Baumann & Baumann, 1829, *Collection de Camellia élevés à Bollwieler,* pl.6, pp.6, 7. Invalid synonym for **Incarnata.**

Carnea Baumannii. *Annelen der Blumsterei,* 1832. Synonym for **Incarnata.**

Carnea (Blush). Parmentier, 1818, *Catalogue des Abres et Plantes Cultivées...,* p.15. Synonym for **Incarnata.**

Carnea Buff. McIlhenny Catalogue, 1946-1947, p.8. Synonym for **Incarnata.**

Carnea Middlemist. Bosse, 1840, *Handbuch Blumengartnerei,* p.446. Synonym for **Middlemist's Red.**

Carnea Nova. Jacob Makoy, 1830, Catalogue, p.6. Courtois, 1833, *Magazin d'Horticulture,* 1 [pt.D]:293.Synonym for 'Rosacea'.

Carnea (Palmer). Trillon, Le Mans Nursery Catalogue, 1843, p.4. Orthographic error for 'Carnea', synoym for **Middlemist's Red.**

Carnea Plena. Loddiges Catalogue, 1811, as 'Carnea pl.'(fawn). Synonym for **Incarnata.**

Carnea Rosea. L.L.Liebig, 1839, *Verzeichnis von Warmen und Kalten Hauspflanzen…,* p.9. Mertens & Fontaine Catalogue, 1845, p.106, pl-p.109. Mertens & Fontaine, *Collection de cent espèces.....camellia,* 1845, pl.70. Synonym for **Middlemist's Red.**

Carnea Stella. Bahuaud-Litou Catalogue, 1914. Synonym for **Incarnata.**

Carnea Stellata. Camellia Society of America Yearbook, 1939, p.19.Synonym for **Incarnata.**

Carnea (1). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Incarnata**.

Carnea (2). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Chandleri.**

Carnee. Vibert, Apr.1845, *Revue Horticole,* p.127, 131. Orthographic error for 'Carnea', synonym for **Middlemist's Red.**

Carneo Plena. Sweet, 1818, *Hortus Suburbanus Londinensis.* According to Loudon, 1825, a synonym for **Middlemist's Red** as 'Middemist's Blush'.

Carneria. *(C.japonica), Jardim Portuense,* Apr 1844, No.7, p.105; Dark pink, opening regularly, with petals striped white in the centre; petals seem full of dew and make an extraordinary 'bend' over the stalks. Bred by M. Carneiro and commonly known as 'Carneiro's Imperial'. Originated in Portugal.

Carnescens. *(C.japonica),* Sweet, 1830, *Hortus Britannicus,* ed.2, p.74: Single. Pale red. Originated in England. Nicholson, 1900, *The Century Supplement of the Dictionary of Gardening,* p.188. Single or semi-double, rose, large flower.

Carnival. *(C.japonica),* SCCS, 1951, *The Camellia. Its Culture and Nomenclature:* Pink striped red. Large, irregular semi-double to anemone form, 9-10 cm across by 7 cm deep with 27-30 petals. Leaves apple green, elliptic, 7.5 cm long by 4 cm wide, thin texture, acuminate, raised venation, finely serrulate. Plant habit upright, compact and rapid in rate. First flowered 1948. Originated by Richard Brown, Sacramento, California, USA. *American Camellia Yearbook,* 1954, p.305, Reg. No.75.

Carnival Prince. *(C.japonica),* Nuccio's Nurseries Catalogue, 1971; *American Camellia Yearbook,* 1979, p.103, Reg. No.1525: A large to very large, rose-pink semi-double with irregular petals, to full peony. A *C.japonica* mutant of **Carnival Queen**. Mid-season flowering; originated by Nuccio's Nurseries, Altadena, California, USA. Mutation first observed 1964. Average flower size, 11-12.5 cm across. Plant growth upright, average in density and rapid in rate with light green leaves, 10 cm long by 5 cm wide. Chinese synonym 'Kuanghuan Wangzi'.

Carnival Princess. *(C.japonica),* Nuccio's Nurseries Catalogue, 1971; *American Camellia Yearbook,* 1979, p.103, Reg. No. 1524: A large to very large, pale pink bordered white, semi-double with irregular petals to full peony form *C.japonica* mutation from **Carnival Queen.** Blooms mid-season. Originated by Nuccio's Nurseries, Altadena, California, USA. Mutation first observed 1964. Average flower size, 11-12.5 cm across.

Carnival Queen. *(C.japonica),* Nuccio's Nurseries Catalogue, 1969. *American Camellia Yearbook,* 1979, p.103, Reg. No.1521: A large to very large, white with occasional stripes of rose-red and pale pink, semi-double with irregular petals to full peony form *C.japonica,* chance seedling. Blooms mid-season. Originated by Nuccio's Nurseries, Altadena, California, USA. The 15 year old seedling first bloomed 1962. Average flower size 11-12.5 cm across. Plant growth upright, average in density and rapid in rate with 10 cm x 5 cm light green leaves. Colour photo, frontispiece, SCCS, 1960, *The Camellia Review,* vol.31, No.1. Sports: **Carnival Prince** and **Carnival Princess.** Chinese synonym 'Kuanghuan Wanghou'.

Carnosa. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.55. No description. Originated in Italy. Synonym: 'Carnosa Nova'. (Believed extinct.)

Carnosa Nova. Verschaffelt Catalogue, 1849-1850, p.45. Synonym for **Carnosa.**

Carocciolli. Jacob Makoy et Cie Catalogue, 1841, p.10. Orthographic error for **Caraccioli.**

Carol Betts. *(C.japonica), American Camellia Yearbook,* 1966, p.85, Reg. No.831: A 7 year old chance seedling that first bloomed 1962; originated by Julington Nurseries, Florida, USA. Plant growth, upright and dense, medium in rate with dark green leaves averaging 6 cm long by 2.5

cm wide. The formal double flower is light peach pink, 7.5 cm across by 2.5 cm deep with 60 petals in 12-15 rows of small, round, slightly cupped petals. Flowers mid-season.

Carol Coleman. *(C.japonica),* Pyron, Joseph H., "Georgia's Camellia Varieties", Mar.1956, *Camellian,* p.22: "A deep pink, peony form". Originated by D.S. Coleman, Georgia, USA.

Carol Compton. SCCS, 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for **Kokuryû.**

Carol Dickerson. *(C.japonica),* SCCS, 1962, *Camellia Nomenclature,* p.24, Ivory white. Medium size, formal double with tiered, incurved petals. Medium, upright growth. Blooms mid-season. Originated by Reg Ragland, California, USA.

Carol Duchess. Hillcrest Nursery Catalogue, 1958. Orthographic error for 'Coral Duchess', synonym for **Claudia Phelps.**

Carol Holland. *(C.reticulata),* ACS., Nov.1988, *The Camellia Journal,* vol.43, No.4, p.22, Reg. No.2096 with colour pl. opposite p.186: A semi-double *C.reticulata* seedling of **Buddha.** Blooms early to mid-season. Originated in the USA by Robert Ehrhart, Walnut Creek, California. *American Camellia Yearbook,* 1988, p.187: The 5 year old seedling first bloomed 1987. Average flower size 12.5 cm across x 6 cm deep with 20 petals. Plant growth is upright, average and medium in rate with dark green leaves, 10.5 cm long x 3.8 cm wide.

Carol Humphery. *(C.japonica), American Camellia Yearbook,* 1984, p.176, Reg. No.1943: A large, medium red, rose form double to formal double *C.japonica* chance seedling of **Lady in Red,** blooms mid-season. Originated by Ted Alfter, California, USA. The 10 year old seedling first bloomed 1978. Average flower size is 12.5 cm wide by 5 cm deep with 30-35 petals. Plant growth is upright, dense and rapid in rate with dark green leaves, 10-11 cm long and 5-6 cm wide. Sport: **Carol Humphery Variegated.**

Carol Humphery Variegated. *(C.japonica),* Valdosta Camellias, Nov.1987, ACS., *The Camellia Journal,* Vol.42, No.4, p.19: A virus variegated form of **Carol Humphery** - Medium red blotched with white. Originated in USA.

Carol Lombard. Gerbings Azalea Gardens Catalogue, 1943-1944. Synonym for **Souvenir de Bahuaud-Litou.**

Carol Lynn. *(C.japonica),* River View Nursery Catalogue, 1957-1958, p.8: White striped red. Large semi-double with loose, slightly waved petals. Medium growth. Early to mid-season flowering. Originated in USA. Orthographic error: 'Carol Lynne'.

Carol Lynne. SCCS, 1960, *Camellia Nomenclature,* p.37. Orthographic error for **Carol Lynn.**

Caro-Lan. *(C.japonica)* ACS, *The Camellia Journal,* June 2006, p.28, colour photo p.29, Reg. No.2677. A chance seedling that first flowered 1994. Originated by Harold Haeffele, Hampstead, N.C.,USA. The 9 cm diameter, dark pink, formal double bloom has a lighter coloured centre. The bloom is incurved, star-shaped and tiered, with heavy petal texture. Plant is open with average growth rate and dark green leaves. Flowers mid-season to late.

Carole Lombard. The Pacific Camellia Society, 1946, *Camellia Nomenclature,* p.7. Synonym for **Souvenir de Bahuaud-Litou.**

Carolina. *(C.japonica),* P. Verleeuwen, Catalogue, 1835-1836, p.12. No description. J.E. von Reider, 1834, *Die Beschreibung und Kultur der Azalenn, Cactus, Camelien..,* p.213. No description.van Houtte, 1843-1844, Catalogue 12:uu as "Delicate pink". Berlèse, 1843, *Iconographie,* with erroneous reference to pl.214 named 'Carolinea'. Baumann Mulhouse Catalogue,1841-1842, p.13. No description. An American variety listed by Prince & Co.

Catalogue, 1844, p.104. Sport: **Carolina Foliis Variegatis.** Synonym: 'Carolina Imbricata'. (Believed extinct.)

Carolina. *(C.japonica),* Geldorf, Const., 1844, Catalogue of Plants and Price List, p.4: Similar form to **Triumphans.** Vermilion red. Treseder's Nurseries Ltd Catalogue, 1964-1965, p.3: Small size, crimson, anemone form. Originated in the UK.

Carolina. *(C.japonica), Beeton's Gardening Book,* 1883, p.111: Double white. Originated in England.

Caroline Simpson. *(C.japonica),* ACRS, *Camellia News,* 1996, No.139, p.9, colour photo p.2, Reg. No.463. Registered by Mrs Caroline Simpson, Bellevue Hill, NSW, Australia. A sport of **Lady Vansittart White** which first appeared 1970, and has remained stable. Originated by Professor E.G. Waterhouse, Gordon, NSW. A single flower of 9 petals, broadly white, centre heavily and extensively veined pink (RHS.CC.65A) to the centre of each petal, 10 cm diameter x 5.5 cm deep. Flowers over a long season on a medium, spreading bush. Leaves deep green, glossy, flat, acute apex, elongate, occasionally oval, serrate margins, 8 cm long x 5.5 cm wide. Flowers shed whole, petals occasionally fluted.

Caroline Smith. *(C.japonica),* Three cultivars of this name were distributed in Europe; one proved a synonym for **General Lafayette**, another was named **Carolina Smith d'Amerique.** The third is as follows: Geldorf, Const., 1844, Catalogue of Plants and Price List, p.5: Six or seven rows of bright, cerise pink petals and the centre variegated like a Flemish carnation (red stripes). Berlèse, 1845, 'Monographie', ed.3, p.207: Flower, full ranunculus form (Formal double), 9-10 cm across, sometimes more, intense cherry red around the circumference, bright rose intermediately and light rose in the centre, regularly imbricated to the centre; the centre petals are marked with dark red stripes. The corolla appears like a number of flowers superimposed. Orthographic variants: 'Caroline Schmidt', 'Caroline Schmitt', 'Caroline (Smith)', 'Carolina Smith', 'Caroline Smith's'. Abbreviations: 'Carolina'. 'Caroline', 'Caroline Smith's'.

Caroline Smith. Verschaffelt, 1853, *Nouvelle Iconographie,* Book VIII, pl.IV. Synonym for **General Lafayette.**

Caroline (Smith's). Oudin, Catalogue of Plants for the Conservatory, 1845. Synonym for **Caroline Smith.**

Caroline Smith d'Amerique. *(C.japonica),* van Houtte Catalogue, 1844-1845, 19:9: Superior imbrication, very large size, delicate pink. Originated by J.B. Smith, USA, according to *Magazine of Horticulture,* 1844, 10:7 and named 'Carolina Smith'.

Caroline Tuttle. Feray's Fine Flowers Catalogue, 1960. Orthographic error for **Carolyn Tuttle.**

Caroline Williams. Burncoose & Southdown Nursery Catalogue, 1986. Orthographic error for **Carolyn Williams.**

Caroline Willis. Feray's Fine Flowers Catalogue, 1960. Orthographic error for **Carolyn Willis**.

Carolinea. *(C.japonica),* André Leroy, Angers, Nursery Catalogue, 1833, p.13. No description. Berlèse, 1843, *Iconographie du Genre Camellia,* pl.214: The flower, about 10 cm in diameter, is very full and round like a rose, dense and irregular. The colour is light red, almost rose, with touches of delicate carmine. The petals, disposed in 6-7 rows, are broad, rounded, lightly notched, imbricated. The first petals form a separate serries while the interior ones are small, lengthened, upright, also red like the others and forming a centre apart from the circumference. The flower has some resemblance to **Florida.** Originated by Dr Sacco, Italy.

Carolinian. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943. No description. Originated in USA. (Believed extinct.)

Carollina Foliis Variegatis. Henderson Nursery Catalogue, 1863 as 'Carollina Fol. Var.'. Orthographic error for **Carolina Foliis Variegatis.**

Carollus. Verschaffelt Catalogue, 1846, p.51. Orthographic error for **Carolus.**

Carol's Katie. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2013, p.28 with colour photo; Regn No.2894; Registered and propagated by Carol Comber, Pensacola, Fla., USA. ACS, *Yearbook*, 2013, p.108 with colour photo; A 12 year old seedling, parentage unknown, first flowered 2008. Medium size, 9.5 diameter x 2.5-3.8cm deep, fragrant, semi-double flower is pink to rose pink, Bright yellow anthers and white filaments (photo shows a hose-in-hose form semidouble with stamens both above and between the layers of petals). Plant is described as both dense and open, with average growth rate. Mid-green leaves average 9-9.5cm x 3.2cm with low serration. Flowers mid-season to late.

Carolus. *(C.japonica),* Anonymous, 1832, *Annales de Société d'Horticulture de Paris,* 10:310-317: As presented by Berlèse but not specified if new or grown by him. However in his 1837 *Monographie,* ed.1, p.71.127 it is described as: Leaves, 3 cm wide by 7.5 cm long, round-oval, prominently veined; bud oval, depressed at apex, scales green. Flower, small, almost double, cherry red. Synonym: 'Carolus X'. Orthographic error: 'Carollus'. Synonym for **Charles X.**

Carolus X. Longone Catalogue, 1846. Synonym for **Charles X.**

Carolus de Morilet. *(C.japonica),* Anonymous, 1879, *Gardeners' Chronicle,* vol.12, new series, p.817. No description. (Believed extinct.)

Carolyn. *(C.japonica),* SCCS, 1958, *Camellia Nomenclature*, p.23: Light salmon pink with a few lighter veins and a few petaloids intermingled with white stamens. Large semi-double. Slow willowy growth. Mid-season blooming. Originated by Mrs L. McDaniel, Mississippi, USA.

Carolyn Adams. *(C.x williamsii),* Tammia Nursery Catalogue, 1975: Soft pink, medium size, formal double. Vigorous, upright growth. Early to mid-season flowering. Originated by Tammia Nursery, Slidell, Louisiana, USA from a cross between *C.saluenensis* and *C.japonica* **Gauntlettii** as 'Lotus'. Colour plate inside back cover ACS, 1975, *The Camellia Journal*, vol.30, No.1.

Carolyn Anderton. *(C.sasanqua). New Zealand Camellia Bulletin*, 1995, Issue No.120, vol.XIX, No.1, p.46, Reg. No.357: Originated by C. Anderton, Tauranga, New Zealand. White flushed pink, (RHS.CC.56C-54B) semi-double with about 158 golden yellow anthers with cream filaments, 18 petals and 10 crinkled petaloids. The flowers are 10 cm across x 5 cm deep and growth habit is spreading and rapid. Leaves dark green, 7 cm across x 3 cm wide. Blooms early to mid-season. A seedling of **Weeping Maiden** x **Jury's Joy.** Strong perfume and floriferous.

Carolyn Bourke. *(C.japonica),* ACRS, 1973, *Camellia News*, No.51, p.37, Reg. No.159: Originated by G.W. Hooper, N.S.W., Australia. A chance seedling from 'Donckelaeri' (**Masayoshi**). Seed planted 1967, flowered 1971. The plant has a dense, upright growth habit and blooms mid-season to late. The pink, 11 cm, semi-double flowers are produced abundantly. The deep green, 8.5 cm x 5 cm, obovate leaves have no secretions at their base, but sharply serrate at the apex.

Carolyn Coleman. *(C.japonica),* SCCS, 1968, *Camellia Nomenclature*, p.32: Blush pink with orchid underside base petals. Medium size, formal double. Medium, compact growth. Blooms mid-season. Originated in the USA.

Carolyn Dickson. *(C.japonica),* ACS, *The Camellia Journal*, Aug. 1999, p.14, Reg. No.2502. A deep rich red semi-double chance seedling with clustered stamens and some ruffled petals. Originated by Lucile Dickson, Hephzibah, Ga., USA. *American Camellia Yearbook*, 1999, p.4, colour photo before p.1. The 7 year old seedling first flowered in 1994. Average flower

size is 10 cm across x 4.5 cm deep, with 12 petals, yellow anthers and pink filaments. Plant growth is upright and average with dark green leaves 9.5 cm long x 4.8 cm wide.

Carolyn Felkel. *(C.japonica),* ACS, May 1996, *The Camellia Journal*, vol.51, No.2, p.9, Reg. No. 2364. A large, white with pink edges, rose form double chance seedling, late flowering. Originated by Bruce M. Haniford, Fountain Inn, S.C., USA. *American Camellia Yearbook*, 1996, p.1, colour photo before p.1. The 15 year old seedling first flowered in 1980. Average flower size is 10-11.5 cm wide x 5-7.5 cm deep, with yellow anthers. Plant growth is upright and vigorous with dark green leaves 7.5 cm long x 3.7 cm wide.

Carolyn Louise. *(C.x williamsii).* ACRS, *Camellia News*, 1993, No.127, p.8, Reg. No.421, colour photo p.2: Originated by Alan B. Raper, Rhodoglen Nursery, The Patch, Victoria, Australia. Seed parent Chapman's Nursery form *C.saluenensis* hybrid, pollen parent unknown. First flowered 1987. Semi-double of 14 petals, soft pink (RHS.CC.49C) fading to white at the petal base, size 9.5 cm across x 5.3 cm deep. Free flowering, early to mid-season on an upright, rapid growing, open plant. Leaves olive green, glossy, flat, elliptic, apices acuminate, margins serrulate, 9.5 cm long x 5,3 cm wide. Stamens columnar, petals notched.

Carolyn Luce. *(C.japonica),* SCCS, 1962, *Camellia Nomenclature,* p.25: Peony form sport of **Eleanor Hagood.** Originated by E.C. Luce, California, USA.

Carolyn Maree. *(C.japonica),* ACRS., 1977, *Camellia News,* No.66, p.27, Reg. No.192: Originated by G.W. Hooper, N.S.W., Australia. A chance seedling, planted 1969, first flowered 1974. It has a dense, spreading growth habit with lanceolate leaves, averaging 12.5 cm long by 4.5 cm wide, pointed apex, tapered base, finely serrate. Flower, soft pink, medium sized semi-double. Blooms early to mid-season.

Carolyn Phillips. (*C.reticulata* hybrid). SCCS *Camellia Nomenclature* 2009, p.137. Dark rose pink. Very large semi-double to loose peony. **Valley Knudsen** x **Jean Pursel**. Vigorous, upright growth. Late flowering. Originated in 2008 by CamelliaShop, Savannah, Ga., USA.

Carolyn Raborn Rankin. *(C.japonica), American Camellia Yearbook,* 1969, p.159, Reg. No.1026: A 9 year old chance seedling that first flowered 1963; originated by Mrs S.J. Raborn, Alabama, USA. Plant growth is of average density, rapid in rate with dark green leaves, 11 cm x 6 cm. The semidouble flower is 11.5 cm across and 6 cm deep and has 14 petals. Deep pink with yellow anthers and filaments. The stamens form a circle with the pistil extending above them. Blooms midseason.

Carolyn S. Sharp. 1948, *Camellias Illustrated*, p.31. Orthographic error for **Carolyne S.**

Carolyn Showdon. SCCS., 1987, *Camellia Nomenclature,* p.117. Orthographic error for **Carolyn Snowdon.**

Carolyn Snowdon. *(C.reticulata* hybrid), *International Camellia Journal*, No.18, p.142, Reg. No.11: Originated by Dr J.A. Smart, Barnstaple, North Devon, England, from the cross *C.reticulata* **Buddha** x *C.japonica* **Ville de Nantes.** First flowered 1978. The flower is a large semi-double, size, 12 cm x 6 cm with 16 slightly notched petals in 2 rows, standing apart and 1-2 petaloids. Its colour is RHS Red Group 53B-C, stamens in fascicles, anthers yellow, filaments white. Flower shatters. Leaves, glossy, medium green, keeled, elongated elliptic, moderately serrate, acuminate,13 cm long by 6.5 cm wide. Petioles 10 mm long. Habit, upright and rapid grower. Orthographic error: 'Carolyn Showdon'. Received the RHS "Award of Merit" in 1986.

Carolyn Tuttle. *(C.japonica),* Nuccio's Nurseries Catalogue, 1955, p.4 with illustration: Rose opal pink. Medium large, full peony form. Compact, upright growth. Blooms early to late. Nuccio's catalogues for 1955 to 1958, include a colour photo. Hertrich, 1955, *Camellias* in *the*

Huntington Gar*dens,* vol.II, p.62, black and white illustration. Originated by Tuttle Bros. Nursery, California, USA. Orthographic error: 'Caroline Tuttle'.

Carolyn Williams. *(C.x williamsii),* Treseders, Truro Nursery Catalogue, 1972-1973, p.6: Large size, rose pink with deeper streaks, opening flat. Southdown Nursery Catalogue, 1973-1974. No description. Treseder & Hyams, 1975, *Growing Camellias,* p.110: An unusual bicolor, which arose as a self sown seedling at Caerhays, with large, flat flowers, carried, almost entirely, face downwards with broad, pink petals, being boldly streaked with carmine. Orthographic errors: 'Carowyn Williams', 'Cy Williams', 'Caroline Williams'. Originated at Caerhays Castle, Cornwall, England.

Carolyn Willis. *(C.japonica),* Griffin, ed., 1959, *Camellian,* p.16, in an advert. for Wheelers Central Georgia Nursery; *American Camellia Yearbook,* 1957, p.298-299, Reg. No.299: An 11 year old chance seedling, originated by Wheelers Central Georgia Nursery, Georgia, USA that first bloomed 1954. Plant growth is upright and open with mid-green leaves, 10 cm long by 4.5 cm wide. The flowers are white with light rose pink stripes, and average 11.5 cm diameter and 5.8 cm deep, with 15 petals and 15 petaloids. Flowers mid-season. Orthographic error 'Caroline Willis'. Black and white photo, p.82, Sharp, 1957, *Camellia Illustrated.*

Carolyn Winifred. *(C.japonica),* ACRS, 1970, *Camellia News,* No.40, p.26, Reg. No.119: Originated by E.R. Sebire, Wandin North, Victoria, Australia. A seedling from *C.japonica* **Ville de Nantes** with unknown pollen parent. Seed planted 1962, first flowered 1966. The vigorous, upright, dense plant produces 11 cm, formal double, medium pink blooms in mid-season. The bright green leaves are 8 cm long by 5 cm wide with serrations about 3 mm pitch.

Carolyne S. *(C.japonica),* Sharp, 1948, *Camellias Illustrated,* colour photo p.31 as 'Carolyn S'; SCCS, 1950, *The Camellia. Its Culture and Nomenclature:* Medium large, red semi-double to peony form. Mid-season blooming. Originated by Ore, California, USA.

Caronation Blush. Longone Nursery Catalogue, 1846. Orthographic error for **Carnation Blush.**

Carousel. *(C.hybrid),* James, 1958, NCCS., *Bulletin,* 12(1):13; SCCS., 1958, *Camellia Nomenclature, p.99:* Pale pink, striped orchid. Medium size, (10 cm) semi-double. A seedling of **Sylvia May.** Originated by V.R. James, California, USA.

Carowelliana Alba. Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France,* vol.40. Orthographic error for 'Carswelliana Alba', synonym for **Tumida.**

Carowyn Williams. Southdown Nursery Catalogue, 1973-1974. Orthographic error for **Carolyn Williams.**

Carpenteri. *(C.japonica),* Glen St. Mary Nursery Catalogue, 1936, p.24, as 'Carpentri': Medium pink. Medium size peony form. Originated at Glen St. Mary Nursery, Glen St. Mary, Florida, USA. Orthographic errors: 'Carpentre', 'Carpentri', 'Carpinteri', 'Carpentrii', 'Carmeptre'.

Carradino. William Bull, Catalogue, 1870, p.75. Orthographic error for **Corradino.**

Carrea. van Houtte, 1844-1845, Catalogue, 18:14. Synonym for **Lovely Rose.**

Carrie Mack. *(C .japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues.* No description. No valid listing located.

Carrier's Queen. *(C.japonica),* Florida Nursery & Landscape Co. Catalogue, 1948. No description. Originated in USA.

Carrier's Variegated. *(C.japonica),* Hume, 1946, *Camellias in America,* p.328 as originating in Griffin's Nursery, Georgia, USA before 1945. No description.

Carroll Gale. *(C.japonica),* McCaskill Gardens Catalogue, 1958; SCCS, 1960, *Camellia Nomenclature,* p.37: Light pink. Medium size, rose form double. Vigorous, compact, upright growth. Blooms Mid-season. Originated at McCaskill Gardens, California, USA.

Carroll Leonard. *(C.japonica), New Zealand Camellia Bulletin,* 1995, Issue No.120, vol.XIX, No.1, p.46, Reg. No.356: Originated by T.Lennard, Te Puke, New Zealand. Dark Red (RHS.CC.46A) formal double with 30 petals, 10 cm across x 5 cm deep. Spreading, open growth with light green leaves 8 cm long x 4.5 cm wide. A chance seedling that blooms mid-season.

Carroll Waller. *(C.japonica), American Camellia Yearbook,* 1974, p.168, Reg. No.1256: An 8 year old chance japonica seedling that first bloomed 1968; originated by Helmuth Scholl Jr. and L.B. Wilson Jr., Mississippi, USA as Scholl & Wilson No.20 seedling. Commercially introduced, 1972. Plant growth average in density and medium in rate with dark green leaves, 12.5 cm long by 6 cm wide. The peony form, **Daikagura** type, bloom is pale pink (Nickerson Color Fan 7.5 RP 8/5) with 36 petals and yellow anthers and filaments. It measures 11cm across and 7.5cm deep. Large, heavy textured petals interspersed with petaloids of pastel pink colour giving a fluorescent quality. Received 2 ACS Provisional Seedling Certificates of Merit for chemically treated flowers. Exceptionally cold hardy. Colour plate front page ACS, 1974, *The Camellia Journal,* vol.29, No.4 erroneously as 'Carroll Waller'.

Carroyphylloides. Baptist & Son Nursery Catalogue, 1861, p.9. Orthographic error for **Caryophylloides.**

Carr's Circus. *(C.japonica),* SCCS., 1958, *Camellia Nomenclature,* p.23: Pink and white. Medium size semi-double to peony form with fluted petals. Vigorous, compact growth. Mid-season blooming. Originated by R.G. Carr, Tulare, California, USA.

Carry Back. *(C.japonica),* Cannon, 1963, ACS., *The Camellia Journal,* vol.18, No.5, p.28. No description. Originated in USA. No valid listing located.

Carson. *(C.japonica),* Hillier's Arboretum, 1987, Hampshire County, Council File. No description. No valid listing located.

Carsvelliana. Maupoil & Figlio Catalogue, 1847. Orthographic variant for **Carswelliana.**

Carsvelliana Alba. Franchetti, 1855, *Collezione di Camelie.* Orthographic variant for 'Carswelliana Alba', synonym for **Tumida.**

Carswalliana. Rollisson & Son, 1846, Catalogue No.1, p.7. Orthographic error for **Carswelliana.**

Carsweliana. Arnaud Nursery Catalogue, 1839-1840. Orthographic error for **Carswelliana.**

Carsweliana Rubra. Loureiro Catalogue No.9, 1872-1873. Orthographic error for **Carswelliana Rubra.**

Carswelliana. *(C.japonica),* Anonymous, 1835, *The Floricultural Cabinet and Florist's Magazine,* vol.III, p.118: Descriptions of Camellias raised in the gardens of Frederick Campbell esq, MP, Woodhall, Lanarkshire, Scotland: No.8 *C.j.* var. 'Carswelliana'. 'Carswell's hybrid'. A

seedling from the semidouble red. (**Rubra Plena**) A very fine, regularly formed flower of a deep red colour, striped with white. van Houtte Catalogue, 1839, 1:2: Brilliant flower, salmon pink, formal double, a white stripe on each petal from the centre to the circumference. Illustrated in Berlèse, 1843, *Iconographie,* vol.3, pl.241. Also Mertens & Fontaine, *Collection de cent espèces.....camellia,* 1845, pl.26. Synonym: 'Carswell's hybrid'. Orthographic errors: 'Carsvelliana', 'Carsweliana', 'Carwelliana', 'Karswilliana', 'Karlswilhelmina', 'Carswalliana'. Van Houtte, in his 1846 Catalogue, gives 'Lord Kerr' as a synonym, and Frères Noisette Catalogue, 1857, p.34 gives 'Lord Kerr Nouveau' as a synonym.

Carswelliana Alba. Jacob Makoy Nursery Catalogue, 1842, p.9. No description. van Houtte, 1843-1844, Catalogue, 12:ee as 'Tumida' syn. 'Carswelliana Alba'. In his 1846-1847 Catalogue he reversed this making 'Tumida' the synonym. Auguste van Geert Nursery Catalogue, No.117, 1850, p.7: Medium sized flower, rounded petals, completely imbricated, pure white streaked with carmine. Rounded foliage. Verschaffelt, 1849, *Nouvelle Iconographie,* Book II, notes that 'Carswelliana Alba' is known under the name 'Tumida' while von Biedenfeld, 1856, gives them as alternative names. However, under the rules of priority, **Tumida** is the valid name.

Carswelliana Rubra. *(C.japonica),* José Marques Loureiro Catalogue No.9, 1872-1873, under "Foreign Camellias" as 'Carsweliana Rubra'. A red sport of **Carswelliana.**

Carter Sunburst. Thoby et al., 1988, *Tsubaki - a Propos de Camellia,* p.45. Orthographic error for **Carter's Sunburst.**

Carter's Abundance. Griffiths & Strother, 1954, ACS, *Nomenclatural Crossreference List,* p.2. Synonym for **Yaeshiratama.**

Carter's Cardinal. *(C.japonica),* Wylam, *American Camellia Yearbook,* 1957, p.27: "Another excellent red is **Carter's Cardinal** which Nuccio's Bros. Nursery at Altadena, are introducing for Elvin H. Carter, Monterey Park, California. The rich, clear red peony form flowers average 10-11.5 cm across and have good substance and texture. This seedling of **Aspasia Macarthur** is characterized by a strong, compact, upright growing habit and large, bold foliage". Unfortunately Nuccios invalidly released this in their 1958 Catalogue as 'Cardinal', a name previously used by Hovey in 1838. There is a variegated form known as **Cardinal Variegated.**

Carter's Carnival. *(C.japonica),* SCCS., 1958, *Camellia Nomenclature,* p.23: White striped pink and rose. Large semi-double. Slow, upright growth. Blooms mid-season to late. Sport: **Quaker Lady.** Carter, writing in the *American Camellia Yearbook* of 1953, p.73 says: "In addition I have several good seedlings of **Aspasia Macarthur...**One plant in particular produces a rather flat bloom with broad, curling centre petals and few stamens. The large blush-white flowers have scattered, wide, gay stripes of pink. I had intended to call this variety 'Carnival' but some other variety has prior claim".

Carter's Pink. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.35. Abbreviation for **Carter's Sunburst Pink.**

Carter's Starburst. *(C.japonica),* Valdosta Camellias, ACS., Nov.1990, *The Camellia Journal,* vol.46, No.4, p.22. No description. Originated in USA. No valid listing located.

Carter's Sunburst. *(C.japonica), American Camellia Yearbook,* 1959, p.269, Reg. No.367: This seedling hybrid (japonica x reticulata) was originated by E.H. Carter, California, USA. First flowered 1951. The leaves are large and medium green. The flower averages 13.5 cm across and is pale pink, striped deeper pink. They vary in form from semi-double, through peony form to formal double on the same plant. Flowers mid-season to late. This cultivar is now considered to be a straight *C.japonica* with no *C.reticulata* in its breeding. It has produced a family of sports

including: **Carter's Sunburst Blush, Carter's Sunburst Pink, Carter's Sunburst Pink Variegated, Carter's Sunburst Variegated, Chow's Han-Ling, Han-ling Raspberry, Han-ling Snow, Carter's Sunburst Sweetheart.** Synonym: 'Carter's Sunburst Regular'. Orthographic error: 'Carter Sunburst'. Chinese synonym: 'Dakate'. For colour photos see p.74, Macoboy, 1981, *The Colour Dictionary of Camellias* and on p.21, *New Zealand Camellia Bulletin,* vol.V, No.2, 1967. This Camellia has received the ACS. "National Camellia Hall of Fame Award" for 1978, the SCCS. "Margarete Hertrich Award" for 1963, and 'John Illges Award" for 1964 and the RHS, "Award of Merit" 1977.

Carter's Sunburst Blush. *(C.japonica), American Camellia Yearbook,* 1977, p.208, Reg. No.1444: A very large, pale pink striped a deeper pink with a 4 mm white border on each petal. This semi-double to peony form japonica is a mutant of **Carter's Sunburst Pink** and blooms early to late. First observed 1971 and originated by Hulyn Smith, Georgia, USA. Average size is 13.5 cm across and 5.5 cm deep. Plant growth is average in density and medium in rate with light, medium green leaves 11 cm x 5.5 cm. See colour plate p.25, ACRS, 1966, *Camellia News,* No.24. Chinese synonym: 'Balbian Dakate'.

Carter's Sunburst Pink. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1963-1964, p.3. No description. Tammia Nursery Catalogue, 1965-1966; Nuccio's Nurseries Catalogue, 1965-1966; *American Camellia Yearbook,* 1966, p.85, Reg. No.870: This sport of **Carter's Sunburst** was first observed by Otto Lochen, San Gabriel, California, USA in 1960. Plant growth and blooms are identical with the parent, except that the colour of the flower is pink. It won the "Sewell Mutant Award" for 1968 and the "William Hertrich Award" for 1970, then the RHS "Award of Merit" in 1977. For colour illustrations see pp.59, 75, Macoboy, 1871, *The Colour Dictionary of Camellias* and on p.21, *New Zealand Camellia Bulletin,* vol.V, No.2, 1967. Chinese synonym 'Fenkate'.

Carter's Sunburst Pink Variegated. *(C.japonica),* Kramers Bros. Nursery Catalogue, 1962 as 'Carter's Sunburst Pink Var.': A virus variegated form of **Carter's Sunburst Pink** - Deep pink marbled with white. Originated at Kramer Bros Nursery, Upland, California, USA. See colour plate No.24, p.29, *Encyclopedia of Camellias in Colour,* vol.II, 1978. Chinese synonym 'Fuse Fenkate'.

Carter's Sunburst Regular. Stewart's Florists and Nursery Catalogue, 1964, p.1. Synonym for **Carter's Sunburst.**

Carter's Sunburst Sweetheart. *(C.japonica), American Camellia Yearbook,* 1982, p.171, Reg. No.1814: A large, blush pink with real small red spots and stripes, semi-double to peony to formal double *C.japonica* mutant of **Carter's Sunburst.** Flowers mid-season to late. Originated by Robert L. Wines, Ocala, Florida, USA, who first observed the mutation in 1975. Average flower is 12.5 cm wide by 6.5 cm deep with yellow anthers. Texture, long lasting, abundance of flowers. Plant growth is upright, open and medium in rate with dark green leaves, 10 cm x 5 cm. Chinese synonym: 'Qingren Dakate'.

Carter's Sunburst Variegated. *(C.japonica),* SCCS., 1968, *Camellia Nomenclature,* p.32 as 'Carter's Sunburst Var.': A virus variegated form of **Carter's Sunburst** - Pale pink blotched white. Originated in USA.

Carter's Sunburst (White). *(C.japonica),* ACS, 1992, *The Camellia Journal,* vol.47, No.4, p.13. Valdosta Camellia Scions: A white sport of **Carter's Sunburst.** Orthographic variant: 'Carter's Sunburst White'. Originated in USA.

Cartionne Rosea. *(C.japonica),* Peer, 1956, *American Camellia Yearbook,* p.56. No description. (Believed extinct.)

Cartlotta Papidoff. de Bisschop Catalogue, ca. 1937. Orthographic error for **Carlotta Papudoff.**

Caruza. *(C.japonica),* José dos Santos Laranjeiro, Catalogue No.13, 1942-1943, p.8. No description. Originated in Portugal.

Carvain's Silk Moire. *(C.japonica), American Camellia Yearbook,* 1972, p.127, Reg. No.1212: An 8 year old chance seedling that first flowered 1969; originated by Jon Laird Carvain, Fort Worth, Texas, USA. Plant growth is upright, dense and rapid in rate with dark green leaves, 6 cm long by 3 cm wide. The semi-double, **Frizzle White** type, bloom is coral pink, heavily variegated white, giving a moired appearance. Anthers and filaments, yellow. It has 18-22 petals and 4-6 petaloids and measures 9 cm across by 5.5 cm deep. Blooms mid-season. See colour illustrations: *American Camellia Yearbook,* 1973, facing p.148 and on front cover, SCCS., 1973, *The Camellia Review.* vol.34, No.6.

Casa d'Angeles. (*C.reticulata* hybrid), Heartwood Nursery, Seedling List 2009; A 7.5 cm diameter, bright rose flower with angel-winged petals. Smallish dark green leaves with dark stems. Upright, open growth. A hybrid incorporating 'Purple Gown' (**Zipao**), **Tom Knudsen,** *C.pitardii* and *C.fraterna.* Originated by Heartwood Nursery, Fort Bragg, Calif., USA (HW0306).

Casablanca. *(C.japonica),* Wilmot 1945, *Camellia Variety Classification Report,* 1945, p.7; Fruitland Nursery Catalogue, 1945-1946, p.24: The self, soft rose-pink sport of **Otome-shibori** as 'Huntington'. Medium size. Blooms mid-season. Sports to **Sweetheart** and **Otome Rosea Variegated.** Synonyms: 'Bleichroeder Pink', 'Huntington Pink', 'Otome Pink', 'Pink Bleichroeder', 'Otome Rosea', 'Anne Galli' and, erroneously, 'Baronne de Bleichroeder Pink'. Note: The synonym 'Bleichroeder Pink' is the name retained in USA.

Casablanca Variegated. Laurel Lake Nursery Catalogue, 1964 as 'Casablanca Var.'. Synonym for **Sweetheart.**

Casactiolis. *(C.japonica),* Seidel, 1846 Pflanzen Catalog, p.6. No description. (Believed extinct).

Casati. *(C.japonica),* Ambroise Verschaffelt, 1950, Catalogue Général, p.46. No description. de Jonghe, 1851, *Culture du Camellia,* p.100: Imbricated, broad petals, pink blotched. Luzzatti, 1851, *Collezione de Camelie,* p.10; Verschaffelt, 1856, *Nouvelle Iconographie,* Book V, pl.IV: As dainty by its delicate foliage as by its regular blossoms of uniform pink colouring, this Camellia was sent us from Milan three years ago by Mr F. Mariani. It produces, in early spring, its floral miniatures, formed of numerous, rounded petals, outspread and imbricated, the central ones turned up to form a small, full rose. Very small white maculae appear at the apex of the petals.

Casatti. *(C.japonica),* Glen St Mary Nursery Co. Catalogue, 1933, p.23: White. Medium size, formal double. Vigorous, upright growth. Orthographic errors: 'Casetti', 'Cassati', 'Cassata', 'Cassetti'. Synonyms: 'Churchwell', 'Perugiana', 'Church White', 'Churchwell White'. Originated in the USA.

Cascade. *(C. rosiflora.)* Anthony Huxley, 1992, *The New RHS Dictionary of Gardening,* vol.1, p.483: Branches pendulous. Flowers small, pale pink. Trehane Camellia Nursery Catalogue, 1995. A *C.rosiflora* seedling with a weeping habit.

Cascading White. *(C.hybrid),* ACRS., 1989, *Camellia News.* No.111, p.12, Reg. No.369: Originated by Kenneth P. Brown, Mitcham, Victoria, Australia, seed parent **Wirlinga Princess,** pollen parent unknown. First flowered 1985. Small size, white, semi-double to peony form flowers, 4 cm across x 2.5 cm deep, produced over a long season, on a medium growing, upright plant with long pendulous branches. Leaves lanceolate, semi-gloss, flat, sparsely serrate, apex cuspidate, 5 cm long x 2.4 cm wide. Very pendulous, flowers in clusters along branches and at tips. Flowers fall whole.

Casetti. SCCS.,1949, *The Camellia. Its Culture and Nomenclature.* Orthographic error for **Casatti.**

Casila. Shirley Hibbert, 1862, *The Floral World and Garden Guide,* vol.5, p.89. Orthographic error for **Casilda.**

Casilda. *(C.japonica),* Verschaffelt, 1856, *Nouvelle Iconographie,* Book V, pl.III: Blossoms of the largest size, numerous and large rounded petals, outspread, bilobate, imbricated, a snow-white colouring, striped purplish pink, more vivid towards the centre. It was obtained from seed in Italy. Orthographic error: 'Casilla'. Synonym: 'Casilda (2)'.

Casilda. SCCS., 1947, *The Camellia. Its Culture and Nomenclature,* Bright flame pink. Large single. Slow, compact growth. Flowers mid-season to late. It has red stamens and irregular fluted and twisted petals. There is also a variegated form. This cultivar bears no relationship to Verscheffelt's **Casilda** and was given this name in America where it is still in use. However it was renamed **Flaming Star** by McCaskill in 1950 and this must be regarded as its valid name. Orthographic error: 'Casilla'. Synonym: 'Casilda (1)'.

Casilda Variegated. *(C.japonica),* McCaskill Gardens Catalogue, 1957 as 'Casilda Var.'. A virus variegated form of **Flaming Star** as 'Casilda' - Bright flame pink, marbled white. Originated by McCaskill Gardens, Pasadena, California, USA.

Casilda (1). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Flaming Star** as 'Casilda'.

Casilda (2). Fendig, 1953, *American Camellia Catalogue.* Synonym for **Casilda.**

Casilla. Vanderbilt, 1940, *Camellia Research,* p.3. Orthographic error for **Casilda.**

Casimir. *(C.japonica),* ICS *Journal,* 2004, pp.74 with colour photo, Reg. No.47: Originated in Carquefou, France by M. Aldred LeMaître. An open pollinated seedling of the Higo camellia **Yamato-nishiki.** First flowered 2000 at 4 years. A prostrate, bushy shrub of rapid growth rate. Young foliage may show brown stripes or spots. Blooms mid-season. A white and red (RHS.CC.46D) single, somewhat Higo-type, with about 150 stamens. Flower is similar to, but distinct from Higo **Daikanhô.** First flowered March 4th, the feast day of St. Casimir.

Casino. *(C.japonica),* Brisbane Botanic Gardens List, 1867. No description. Originated in Australia. (Believed extinct.)

Casoretti. *(C.japonica),* Isola Madre Catalogue, 1845. No description. Originated in Italy. (Believed extinct.)

Casoretti Nuova. *(C.japonica),* Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.5. No description. Originated in Italy. (Believed extinct.)

Cassandra. *(C.japonica),* Australian Botanical & Horticultural Society Report, 1849 without a description. A seedling raised by Macarthur of Camden Park, N.S.W., Australia. The description from his 1850 notebook is: "Scarlet crimson, four rows of outer petals, inner petals small and crowded with a few white amongst kernel. Pretty flower with few anthers. Very large size. Waterhouse in *Camellia Quest,* 1947 says: "This description identifies a camellia growing at Camden Park. Its blooms are 12.5 cm in diameter and corresponds to the details given above". Synonym: 'Chandleri Magniflora'. See colour photo, p.75, Macoboy, 1981, *The Colour Dictionary of Camellias.*

Cassata. Vanderbilt, 1940, *Camellia Research,* p.3. Orthographic error for **Casatti**.

Cavalcade. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1944-1945, previously as 'No.240 Tea Gardens': Dark red splotched white. Large, bell shaped single. Originated at Magnolia Gardens, Charleston, South Carolina, USA. Orthographic error: 'Calvacade'.

Cavaleriana. Nakai, 1940, *Journal of Japanese Botany,* 16(12):2 as *Camellia cavaleriana,* synonym for *Camellia pitardii.*

Cavalier. *(C.japonica), American Camellia Catalogue,* 1970, p.161, Reg. No.1085: A 12 year old chance seedling that first bloomed 1965; originated by G.Stuart Watson, Albany, Georgia, USA. Plant growth is average with rate, medium to slow. Leaves are large, dark green. The rose form double, 'Mathotiana' (**Julia Drayton**) type, bloom is dark pink or light red, 12.5 cm across and 7.5 cm deep. Sometimes opens to show stamens. Blooms mid-season to late.

Cavalier Busca. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.18. No description. Originated in Italy. (Believed extinct.)

Cavalier Carlo Schmitz. Linden Nursery Catalogue, 1875 as 'Cav. Carlo Schmitz'. Synonym for **Carlo Schmitz.**

Cavalier de Burger. *(C.japonica),* van Houtte, 1858, Catalogue, 72:8: Clear red with small spots of white. Imbricated. Originated in Italy.

Cavalier di Borghese. *(C.japonica),* Jean Verschaffelt, 1850, Catalogue Général, p.46. No description. Originated in Italy. (Believed extinct).

Cavalier Matteo Nicolay. Linden Nursery Catalogue, 1875 as 'Cav. Matteo Nicolay'. Synonym for **Puccini.**

Cavaliere A. Colla. *(C.japonica),* Burdin Maggiore & Cie Catalogue 1870-1871. No description. Originated in Italy. Orthographic variant: 'Cavaliere Arnoldo Colla'. (Believed extinct.)

Cavaliere Arnoldo Colla. Prudente Besson & Figlio, 1878 Catalogue, p.42. Orthographic variant for **Cavaliere A.Colla.**

Cavaliere Puccini. *(C.japonica),* Andre Leroy, 1867, Catalogue, p.132: Imbricated red, lined with white. Jules Menoreau Nursery Catalogue, 1878, p.8: Imbricated, red lined with white. Originated in Italy.

Cavalier's Lady. *(C.sasanqua), American Camellia Yearbook,* 1962-1963, p.215, Reg. No.621: A 10 year old sasanqua seedling that first bloomed 1965; originated by Charles J. Hayes, Virginia Beach, Virginia, USA. Growth habit, upright and dense, medium in rate with dark green leaves. The rose form double flower is lavender pink, 6-6.5 cm across and 2.5 cm deep with 20-25 petals and yellow stamens. Blooms early to mid-season.

Cavandesii. van Houtte, 1841, Catalogue, 7:15. Synonym for **Palmer's Perfection.**

Cavandishii. Anonymous, 1841, *Gardeners' Chronicle.* Synonym for **Palmer's Perfection.**

Cavendishii. Berlèse, 1840, *Monographie,* ed.2, p.186.Synonym for **Palmer's Perfection.**

Cavifolia. *(C.japonica), Jardim Portuense,* Apr 1844, No.7, p.105; Very similar to **Carneria,** slightly darker and without "dew" on the petals; leaves are concave, like a spoon, and very dark green. Originated in Porto, Portugal.

Cay McKenzie. *(C.japonica), American Camellia Yearbook,* 1971, p.44, 45, Reg. No.1140: A 5 year old chance japonica seedling that first bloomed 1969; originated by Linton Baggs, Macon, Georgia, USA. Plant growth is upright and rapid in rate with dark green leaves, 11 cm long by 5.5 cm wide. The anemone form bloom is a light, clear pink, with yellow stamens and white filaments. It has 10 petals and numerous spoon-shaped petaloids. Flowers mid-season. Colour plate, inside back cover, ACS, 1976, *The Camellia Journal,* vol.31, No.1.

Cdt. Relly. de Bisschop Nursery Catalogue, 1957. Abbreviation and orthographic error for **Cadet Reilly.**

Cecelia. *(C.japonica),* McCaskill Gardens Catalogue, 1948; *American Camellia Yearbook,* 1948, p.169: Seedling No.116. This semi-double, rose form blossom is soft, salmon rose in colour, 10 cm across. Blooms mid-season to late. First flowered 1943. The habit of growth is vigorous, bushy and upright with medium green leaves, elliptic, acute and slightly serrate, 8 cm long by 5 cm wide. A chance seedling of unknown parentage, originated in USA by the McCaskill Gardens, Pasadena, California. See black and white photo, p.31, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III. Orthographic error: 'Cecella'.

Cecella. SCCS., 1958, *Camellia Nomenclature,* p.23. Orthographic error for **Cecelia.**

Cecil Beard. *(C.japonica),* ICS *Journal,* 1997, p.87. ACS, November 1996, *The Camellia Journal,* vol.51, No.4, p.33: Very large, red semi-double. Flowers mid-season to late. Originated by Marvin Jernigan, Warner Robins, Ga., USA.

Cecil Beard Variegated. *(C.japonica),* ACS 1995, *The Camellia Journal,* vol.50 No.1, p.2, Reg. No.2306: Very large red and white variegated semi-double *C.japonica* (**Ville de Nantes** x **Granada**). Blooms mid-season to late. Originated in USA by Marvin Jernigan, Warner Robins, Georgia. ACS 1995, *American Camellia Yearbook,* p.2 and colour photo: The 12 year old seedling first flowered 1985. Average flower size is 15 cm across x 10 cm deep with 43 petals, white anthers and filaments. Plant growth is upright, dense and vigorous, with dark green, fimbriated leaves 10 cm long x 5 cm wide.

Cecil de Voltaire. Vanderbilt, 1940, *Camellua Research,* p.3. Orthographic error for 'Cecile de Voltange'.

Cécile Voltange. *(C.japonica),* Verschaffelt, 1848, *Nouvelle Iconographie,* Book XII, pl.I: Mr Bélot de Fougére, Maulines, France obtained this variety from seed. It forms a vigorous shrub, with strong, elongated-oval leaves, slightly pointed, of a deep glossy green, smooth nerves, and numerous, deep serrations. The blossom is perfectly imbricated, with numerous, rounded petals, of a deep red colour at the centre and circumference, with a white zone occupying the intermediate third of the corolla. Orthographic errors: 'Cecile de Valtange', 'Cecil de Voltaire', 'Cecile de Voltagne', 'Cecile de Voltage', 'Cécile de Vallonge'.

Cecilia. *(C.sasanqua).* Camellia Forest Nursery Catalogue, 2008, p.5; Small pink formal double. Long flowering, early season. Moderate grower, bushy habit, with small leaves giving the plant a neat appearance. Note; Not to be confused with the 1954 *C.japonica* **Cecelia.**

Cecilia Pirlo. *(C.japonica),* Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.5. No description. Originated in Italy. (Believed extinct.)

Ceineray. *(C.japonica),* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.16; No details.

Celebration. *(C.x williamsii),* Veitch Nursery Catalogue, 1962: Light orchid pink. Medium sized semi-double. Medium, bushy growth. *C.saluenensis x C.japonica.* Originated in England. Received the RHS Preliminary Commendation in 1959. Chinese synonym: 'Qingzhu'.

Celebrity. *(C.japonica),* Gerbings Azalea Gardens Catalogue, 1961; *American Camellia Yearbook,* 1962-1963, p.215, Reg. No.616: An 8 year old chance seedling that first bloomed 1957; originated by John T. Weisner, Fernandina Beach, Florida, USA. Upright, open, rapid growth with dark green leaves, averaging 10 cm long by 5 cm wide. The semi-double, white to blush flower, resembles Frizzle White and is 12.5-13 cm across by 4.5 cm deep with 14-16 petals, none too many petaloids, white stamens. Blooms early to mid-season.

Celesiana. Giacomelli Catalogue, 1879. Orthographic error for **Celestina.**

Celeste G. *(C.japonica), American Camellia Yearbook,* 1960, p.194, Reg. No.498: An 8 year old chance seedling that first bloomed 1958; originated by Mrs O.Henry Wienges, St. Matthews, South Carolina, USA. Plant growth is average in density and medium in rate with dark green leaves, 7.5-10 cm long by 3.5-5 cm wide. The semi-double flowers, 10 cm in diameter and 5 cm deep, are pale pink in the centre, deepening to rose on the ruffled edges and have 23 petals with occasional petaloids interspersed amongst yellow stamens. Flowers mid-season.

Celeste Olivia. *(C.japonica),* ACRS., 1983, *Camellia News,* No,87, p.22, Reg. No.305: Originated by T.J. Savige, Wirlinga, N.S.W., Australia. A chance seedling first flowered 1982. It is pink, RHS Red Group, 52C with fine veining to 52A. Flowers, 10.5-14 cm in diameter with 60-70 petals, outer rows orbicular, inner graduating to obovate and slightly channelled. Blooms early to mid-season. The upright, open plant has 8 cm long by 4 cm wide dark green leaves, narrowly obovate, shortly acuminate with average serrations. Colour photo p.13 above *Camellia News.*

Celestial. *(C.japonica),* Buist Nursery Catalogue, 1968, p.9 as "pink". Fendig, 1950, *American Camellia Catalogue* describes it as a "rose form, complete double, imbricated, medium size, 8 cm in diameter by 5 cm deep. Rose pink with a purple cast. Petals fold downwards. Flowers extremely variable in form. Leaves, thick, waxy, olive green, oval, 7.5 cm x 3.7 cm. Hardy, compact, vigorous shrub." Fendig thinks that it is possibly identical with **Celestine.**

Célestin Rortais. *(C.japonica),* J & F Thoby, Gaujacq, France, Catalogue, 2005, p.40; Synonym for 'Magnoliaeflora Alba' (**Miyakodori).**

Celestina. *(C.japonica),* Anonymous, Mar.1832, *Revue Horticole,* p.203-204: Double. Light rose, fine form. Originated by Cunningham, England. Charles van Geert, 1847, Catalogue, No.10, p.7: Good imbrication. Soft pink blotched with white. Charles van Geert Catalogue, 1848, p.107: Imbricated with broad petals, soft pink blotched with white. Synonym: 'Celestina Vera'. Orthographic errors: 'Celestine', 'Cunningham's Caelestrina', 'Coelestrina', 'Caelestina'.

Celestina de Francfort. van Geert Nursery Catalogue, 1845. Synonym for **Hendersonii.**

Celestina Vera. William Bull Nursery Catalogue, 1869, p.79. Synonym for **Celestina.** Orthographic error: 'Celestine Ora'.

Celestine. *(C.japonica),* Vanderbilt, 1940, *Camellia Research,* p.3; Thomasville Nursery Catalogue, 1941, erroneously as 'Celestina': Rose pink, sometimes spotted white. Large, rose form double. Vigorous growth. For black and white photo see p.67, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II. From the descriptions it is unlikely that it is synonymous with **Celestial.** Synonym: 'Christmas Red'.

Celestine Ora. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.36. Orthographic error for 'Celestina Vera'; synonym for **Celestina.**

Celia. *(C.japonica),* Waterhouse, 1947, *Camellia Quest,* p.16. A Macarthur seedling 53/52, from Camden Park, N.S.W., Australia. No description. (Believed extinct.)

Celina Daly. *(C.japonica),* ACS 1991, *American Camellia Yearbook*, p.77, Reg. No.2217: Very large, rose-pink peony form *C.japonica* chance seedling of **Dazzle;** blooms mid-season. Originated by O.L. Jacobson, Jacksonville Beach, Florida, USA. The 9 year old seedling first flowered 1985. Average flower size is 12.5-15 cm across x 10 cm deep. Plant growth medium in rate with dark green leaves 12.5 cm long x 5 cm wide. Colour photo pp.80-81.

Celina Vaughn. *(C.japonica), American Camellia Yearbook,* 1959, p.270, Reg. No.386: A chance seedling, originated by James A. Vaughn, Columbia, South Carolina, USA which first flowered 1954. Plant growth is upright, average in density and medium in rate. The dark green leaves average 7.5 cm long by 3.5 cm wide. The rose form, double flowers, white and red, candy striped, are 11 cm in diameter and 3.5 cm deep with 25 petals and white filaments. Flowers mid-season. It sports a solid red form known as **Celina Vaughn Red.**

Celina Vaughn Red. *(C.japonica),* SCCS., 1960, *Camellia Nomenclature,* p.38: A red, semi-double sport of **Celina Vaughn.** Originated in the USA.

Cèline. *(C.japonica),* Verschaffelt, 1853, *Nouvelle Iconographie,* Book II, pl.II: It was obtained from seed in Belgium and the uncommon arrangement of its large bloosoms with their orange-rose colouring at the centre, becoming paler towards the margin, contrast with the monotonous regularity of the cogeneric varieties. The petals of the first two rows are very large, rounded, full, outspread, the following ones are smaller, rumpled, ruffled, and close set, recalling that of certain peonies.

Celine Carnea. *(C.japonica),* Linden Nursery Catalogue, 1878, p.8. No description. Originated in Belgium. (Believed extinct.) Orthographic error: 'Caline Carnea'.

Centifoglia Carnea. Medici Spada, 1857, *Catalog nel Giardino a Villa Quiete,* p.9. Orthographic variant for **Centifolia Carnea.**

Centifoglia Rosea. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. Orthographic variant for **Centifolia Rosea.**

Centifolia. *(C.japonica),* van Houtte, 1845-1846, Catalogue, 27:21: Crimson red, spotted with white, imbricated, very large, formed like the hundred-leaved rose, flowers slightly tilted, leaves warty and reticulated, appears to be an original species from China or Japan, flowers profusely. Berlèse, 1849, *Annales...* p.273, says "originally from China" but it is believed to have been originated by Hugh Low of Clapton, England and owes its name to its resemblance to *Rosa centifolia.* See illustrations pl.95, Morren, 1846, *Annales de Gand* 2:443, also pl.III, Book IX, Verschaffelt, 1848, *Nouvelle Iconographie.* Leaves, briefly petiolate, are large elongated-ovate, pointed with deep serrations, 9-10 cm long by 6-7 cm wide with prominent

venation. The bud is large and round. The blossom, 10-11 cm across, is rose shaped with wide, emarginate petals with rounded lobes, diminishing gradually to the centre where they are erect in the form of a rosebud. They are of a deep carmine-red, sometimes with one or two white stripes. Orthographic errors: 'Centifoglia'. Synonyms: 'Centifolia di Low', 'Centifolia Low's', 'Low's Centifolia', 'Centifolia'(Lows). Chinese synonym 'Xiandi'.

Centifolia (Portugal). *(C.japonica), Jardim Portuense,* Apr. 1844, No.7, p.105 as 'Centifolia'; Very full double flower, pink, similar to *Rosa centifolia.* Originated in Porto, Portugal.

Centifolia Alba. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847: A large, full form similar to *Rosa centifolia* of a pure white. An original release by Burnier & Grilli, Florence, Italy. Verschaffelt, 1856, *Nouvelle Iconographie,* Book X, pl.II: Pure white blossoms of the largest size, composed of numerous and ample petals, perfectly rounded and imbricated outspread, remarkably slender and transparent. An Italian camellia originated by Bouturlin. Sports: 'Comtesse Woronzoff', 'Lavandel'. Chinese synonym 'Baixiandi'.

Centifolia Carnea. *(C.japonica),* Luzzatti Catalogue, 1853; Verschaffelt, 1855, *Nouvelle Iconographie,* Book I, pl.II: It came to us from Florence in 1853. Its blossoms, larger than average, are composed of large, rounded petals, upright, imbricated, hooded, entire or slightly emarginate, of a delicate flesh pink colour with pale carmine stripes here and there, the central petals more compact, ruffled and arranged like a tea rose.

Centifolia di Low. Del Lungo & Girardi, 1928, *Le Camelie,* p.159. Synonym for **Centifolia.**

Centifolia (Lows). Verschaffelt Catalogue, 1847-1848, p.55. Synonym for **Centifolia.**

Centifolia Low's. Franchetti 1855, *Collezione di Camelie,* p.18. Synonym for **Centifolia.**

Centifolia Pale Pink. *(C.japonica),* Darlington Hall Nurseries Catalogue, 1966, p.2. No description. Originated in the UK. No valid listing located.

Centifolia Rosea. *(C.japonica),* de Jonghe, 1851, *Traité de Culture du Camellia,* p.100: Large size, imbricated, pink striped white. Flower the form of **Centifolia Alba.** Luzzatti, 1851, *Collezione di Camelie,* p.10: Rose colour, stained white, equal in form to **Centifolia Alba.** Verschaffelt, 1857, *Nouvelle Iconographie,* Book I, pl.II: Cherry red, striped white. As in the hundred petalled rose, the petals of the first rows are very ample, outspread, curved in; the others are upright and grouped in a compact heart. A few white stripes interrupt the uniformity of the general colouring. Originated by Bourturlin, Italy. Orthographic error: 'Centifoglia Rosea'.

Centifolia Rubra. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.18: Very full. Perfectly imbricated, outer petals dark red, centre a little paler. Originated in Italy by Bourturlin.

Cereixa de Tollo. *(C.japonica),* Sociedad Española de la Camelia, *Camelia,* July 2008, p.33 with colour photo. Originated by Viveiros Rio Tollo, Goián, Pontevedra, Spain, in 1994. Rose form double, 7.5-10 cm diameter. Rose cerise (RHSCC 35C) with 43-50 petals and 0-10 petaloids. 20 to 40 stamens intermingled with the petaloids. Leaves 8-9 cm x 5 cm, dark green, elliptic and slightly convex. Plant shrubby, upright and rapid growing. Late flowering. Sterile..

Cerere. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue, p.23, as 'Cerrere'. No description. Burnier & Grilli Catalogue, 1846-1847: Crimson red, part of the petals white, feathered with red. Rose form double. Similar to Chandleri. According to Berlèse, 1849 **Cerere** and **Ceres** are synonymous, but this is rejected as they are different colours.

Ceres. *(C.japonica),* Colla 1843, *Camelliografia,* p.97: Flower has 9-12 petals, regularly disposed in 3-4 rows, opening almost flat, a little waved, ovate, slightly emarginate. A milk-white semi-double, 10-12 cm across. Berlèse, 1849, *Annales de la Société Central d'Horticulture de Paris,* vol.40, p.75: White at the circumference, becoming off-white to the centre. Corolla somewhat ample, irregular roseform. Exterior petals large, small in numbers; those of the interior, elongated and various intermingled with numerous stamens. Very floriferous. Obtained from seed by Negri, Milan Italy. Orthographic errors: 'Cere', 'Cerea'.

Ceres (Paul). *(C.japonica),* Paul, 1879, *Gardeners' Chronicle,* vol.12, new ser. p.469 invalidly as 'Ceres'. A pink semi-double. Originated by William Paul, Cheshunt, England.

Cereus Gardeners. *(C.japonica),* ACS, Aug. 1995, *The Camellia Journal,* vol.50, No.3, p.36, Reg. No.2332: Medium size, pale pink with deeper pink outer petals, formal double *C.japonica* chance seedling. Blooms mid-season to late. Originated in the USA by Elizabeth R. Scott, Aiken, South Carolina. ACS 1995, *American Camellia Yearbook,* p.3 with colour photo: The 19 year old seedling first flowered 1983. Average flower size is 8.5 cm across x 5 cm deep with 63 petals. Blooms occasionally will have a small red dot or stripe, and outer petals stand up, creating a cup form. Plant growth is upright and vigorous with dark green leaves 11 cm long x 5.5 cm wide.

Cericca. *(C.japonica),* Trillon, 1845, Catalogue, p.3. Bright red. Originated in France.

Cericea. Trillon, Le Mans, Nursery Catalogue, 1843, p.3. Orthographic variant for **Sericea.**

Cericea Striata. Verschaffelt Catalogue, 1847-1848, p.55. Orthographic variant for **Sericea Striata.**

Cerise. *(C.x williamsii),* Hillier Arboretum, 1987, Hampshire County Council List. No description. Originated in England. No valid listing located.

Cerise des Vosges. *(C.japonica),* de Bisschop Nursery Catalogue, 1935, p.5 as "red". Originated in France. Orthographic variant: 'Cerise de Vosges'.

Cerito. Berlèse, 1845, *Monographie*, ed.3, p.98. Orthographic variant for **Cerrito.**

Cerito d'Italie. van Houtte, 1846-1847, Catalogue,27:21. Synonym for **Cerrito.**.

Cernuschi. *(C.japonica),* de Jonghe, 1851, *Traité de Culture du Camellia,* p.100. No description. Franchetti, 1855, *Collezione di Camelie.* p.18: Imbricated, red, soft violet veins. Originated in Italy.

Cerrere. Verschaffelt, 1844-1845, Catalogue, p23. Orthographic error for **Cerere.**

Cerrito. *(C.japonica),* van Houtte, 1841, Catalogue, 7:4. No description. Rousseau, Angers, Nursery Catalogue, 1842, p.1: Imbricated, white streaked pink. van Houtte Catalogue, 1842, 9:8: Imbricated, white with rose-pink streaks. Burnier & Grilli Catalogue, 1845-1846: Imbricated. White striped red. Originated in Italy, raised by Mariani. Orthographic errors: 'Cerito', 'Cerryto'. Synonym: 'Cerito d'Italie'.

Cerruti. *(C.japonica),* Burdin Maggiore et Cie Catalogue, 1870-1872 as a fresh introduction. No description. Originated in Italy. (Believed extinct.)

Cerryto. Verschaffelt Catalogue, No.50, 1844, p.18. Orthographic error for **Cerrito.**

Ceruba. *(C.japonica),* Verschaffelt, 1844, Catalogue No.50, p.17. Originated in Italy. No description. (Believed extinct).

Cesare-Areni. Verschaffelt Catalogue, 1844-1845, p.23. Orthographic error for **Cesare Arici.**

Cesare Aricci. Isola Madre Nursery Catalogue, 1845. Orthographic variant for **Cesare Arici.**

Cesare Arici. *(C.japonica),* van Houtte Catalogue, 1842 as 'Cesare Arini'; Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France,* vol.40, p.278: Flower, 10-11 cm across, anemoniform, of a dark, orange red colour. Exterior petals in 2-3 rows, large, rounded, notched; those at the centre, numerous, short, even; petaloids grouped in clusters and forming a concave centre, similar to **Santiniana.** Orthographic variant: 'Caesare Arici'. Orthographic errors: 'Cesare Aricci', 'Cesare Arini', 'Cesare-Areni'. Originated in Italy by Brozzoni.

Cesare Arini. van Houtte, 1842, Catalogue. Orthographic error for **Cesare Arici.**

Cesare Augusto. Auguste van Geert Nursery Catalogue 1848, p.15. Synonym for **Augusto.**

Cesare Franchetti. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.19: Imbricated, double, bright pink with the central petals streaked white. Burnier Catalogue, 1855-1856: Vivid rose with the petals in the centre marked with wide stripes of white, full, imbricated. Originated in Italy.

Cesare Morandini. *(C.japonica),* Mercatelli Nursery Catalogue, 1885. No description. Originated in Italy. (Believed extinct.)

Cesari Superba. *(C.japonica),* Stefano Pagliai Catalogue, 1867, p.65. No description. Originated in Italy. (Believed extinct.)

Cesarini. *(C.japonica),* van Houtte, 1845-1846, Catalogue, 23:3. No description. Originated in Italy. (Believed extinct.)

Cezanne. *(C.reticulata),* ACRS, 1971, *Camellia News,* No.43, p.35, Reg. No.147: Originated by F.S. Tuckfield, Berwick. Victoria, Australia. Seed parent **Dali Cha,** erroneously as 'Noble Pearl'. Seed sown 1965, first flowered 1969. The plant has an upright, open growth habit and produces blooms to 12 cm diameter, rose madder, HCC 23/1 to 23/2 in mid-season. The semi-double flowers are hose in hose with the inner petals flushed and rabbit eared. The 15

cm long by 5 cm wide, olive green, reticulate leaves are slightly concave, narrowly elliptic with acuminate apex and fine serrations.

CF.21. *(C.sasanqua x C.oleifera).* Camellia Forest Nursery Catalogue, 1995, p.7: A seedling of **Narumigata** x *C.oleifera* originated by Dr. Clifford R. Parks, Chapel Hill, N.C., USA, and selected because of its hardiness, vigour and floral display. It makes a heavy bud set and produces large, white, single blossoms with pink markings over a long period, early to mid-season. It is a sister seedling to **Survivor.**

CF.30. *(C.japonica),* Camellia Forest Nursery Catalogue, 1995, p.10: Large size, medium red peony. Blooms mid-season. Considerable flower bud hardiness. Cold hardy with an excellent floral display. Originated by Dr Clifford R. Parks, Chapel Hill, N.C., USA.

CF.37. *(C.hybrid).* Camellia Forest Nursery Catalogue, 1995, p.11: Originated by Dr Clifford L. Parks, Chapel Hill, N.C., USA as a seedling of *C.japonica* x *[C.saluenensis x C.rosiflora*]. A single, shading from pink to white. Early flowering, floriferous, vigorous, erect grower with fine delicate foliage.

CF.38. *(C.x williamsii x C.rosiflora).* A seedling of *C.japonica* 'Donckelaeri' (**Masayoshi**) x [*C.saluenensis* x C.rosiflora], originated by Dr Clifford L. Parks, Chapel Hill, N.C., USA. Deep rose pink, single flowers, floriferous. Blooms early to late. A very strong grower with a fastigate habit.

CF.42. *(Wabisuke).* Camellia Forest Nursery Catalogue, 1995, p.8: A seedling of **Sukiya,** raised by Dr Clifford L. Parks, Chapel Hill N.C., USA. Very hardy. Small pink single flowers, delicate foliage.

CF.44. *(C.japonica x C.lutchuensis).* Camellia Forest Nursery Catalogue, 1994, p.11: A seedling of *C.japonica* **Ville de Nantes** x *C.lutchuensis.* A white, single miniature flower with very vigorous spreading growth, fragrant and free flowering. Originated by Dr Clifford L. Parks, Chapel Hill, N.C., USA.

Cha Xiang Piao Piao. (Tea Breeze), *(C.sinensis). Camellias*, Y.C. Shen, 2009, p. 29 with colour photo; A form of *C.sinensis* at Nuccio's Nurseries with purplish coloured leaves.

Chabana. Japanese name for the Camellia flowers which are used in the tea ceremony. Chinese reading is 'Chahua'.

Chabashira. (Tiny stalks floating vertically in cup of tea), *(C.rusticana),* Hagiya & Ishigawa, 1968, Kyôto Engei Kurabu, *Tsubaki, Tokushû,* No.9: "Description of New Snow Camellias" with black and white photo p.7: A dark red single of 5-6 petals, 5-6 cm across with twisted and creped petals, cup form. Stamens about 100, filaments dark yellow. Early to mid-season flowering. Leaves pendulous, obovate, 7 cm long. Long petioles. Collected in the wild from the mountains of the Mishima Sub-prefecture, Niigata Prefecture, Japan, 1961 by Susumu Ishizawa. Named and released by Kaoru Hagiya. See Seibundô Shinkôsha, 1979, *Senchinshû*, p.95 & p.230. Note: The chance phenomenom of 'chabashira is adored among Japanese as an omen of good luck.

Chachahime. (Tea Princess), *(C.hybrid),* ICS, 1990, *Japanese Camellia Cultivar List*, p.27: Very small size, very soft pink ground with red stripes, single with incurved petals. Blooms early to late. *C.japonica* var *rusticana,* 'Donchô' (**Tôyô-no-hikari**) x *C.sinensis* 'Cha Z.1'. Originated in the Niigata Prefecture, Japan. Named and released by Kaoru Hagiya in 1980.

Chahua. Chinese name for the camellia flower. Japanese reading 'Chabana', particularly referring to the flower arrangement used in the tea ceremony.

Chahua Shangren. Gao, Jiyin, Ltr.25-5-1990. Chinese synonym for **Elegans.**

Chahua Wangguo. (Camellia Kingdom). *American Camellia Yearbook,* 1993, p.37. Chinese synonym for Australian *C.reticulata* hybrid **Camelot.**

Chahuajie. (Flower Festival). *American Camellia Yearbook,* 1993, p.39. Chinese synonym for USA *C.reticulata* hybrid **Fortieth Anniversary**.

Chaieyii. *(C.japonica),* Forrest, Mary, 1985, *Trees and Shrubs cultivated in Ireland'.* Origin unknown. No valid listing located.

Chalice. Semmes Nursery Catalogue, 1947-1948, p.12. Synonym for **Hanafûki.**

Chalin. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars*, p.136. Chinese synonym for **Charlean.**

Chalisi Beitesi. Gao, Jiyin, Ltr.25-5-1990. Chinese synonym for **Charlie Bettes.**

Chalisidun Xiaojie. Gao, Jiyin, Ltr.25-5-1990. Chinese synonym for **Miss Charleston.**

Chalisi Kebe Nüshi. Gao, Jiyin, Ltr.25-5 1990. Chinese synonym for **Mrs Charles Cobb.**

Chalk Pink. *(C.japonica), American Camellia Yearbook,* 1966, p.85, Reg. No.888: A chalk pink sport of **Tricolor** that was first observed, 1955 by Mrs Lucy Rigsdill, Ruston, Louisiana, USA. Plant growth is upright and dense, rapid in rate with dark green, serrated leaves. The edges of the leaves turn under and they measure on an average, 10 cm x 5 cm. The semi-double flower has all the characteristics of its parent except for the colour. It has a white wash that melts into pink. The flower averages 8.5 cm across by 5 cm deep with 20-26 petals, the anthers are yellow and the filaments white. It has a thick, waxy texture and blooms mid-season.

Challenger. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943: Light pink. Medium size, peony form. Originated at Magnolia Gardens, Charleston, South Carolina, USA.

Chalmeri. *(C.japonica),* Loddiges Catalogue, 1836, p.24. No description. Berlèse, 1845, *Monographie*, ed.3, p.156: Large size, rose form double, cherry red, rounded and imbricated petals. Originated in England. Orthographic error: 'Chamleri'.

Chalmeri Perfecta. *(C.japonica),* Philadelphia Correspondent, 1842, *Magazine of Horticulture,* 8:173 as 'Chalmerii Perfecta': Originated by Peter Raabe. Leaves thick, about 11 cm long and 7 cm broad, ovate, slightly acuminated, serrated, veined and of a dark, glossy green; flower very double, full to the centre, of a beautiful cupped form, colour a clear cherry red, petals oval, cupped, imbricated and numerous, texture delicate. Buist, 1845, *American Flower Garden Directory,* 3rd ed., p.216: An American seedling in the possession of Mr Wm Chalmers, gardener to George Pepper esq. Abbreviation: 'Chalmeri'.

Chalmer's. van Houtte, 1846-1847, Catalogue, 27:21, 29, as a synonym for **Chalmer's Perfection.**

Chalmer's Perfecta. van Houtte, July,1846, *Flore des* Serres,...vol.2, p.125, pl.V. Orthographic variant for **Chalmer's Perfection.**

Chalmer's Perfection. *(C.japonica),* van Houtte, 1846-1847, Catalogue, 27:21, 29; and *Flore des Serres,...* vol.2, p.125, pl.V as 'Chalmer's Perfecta': Imported from the USA to Europe by Louis van Houtte. The bush is erect, well branched from the top to the bottom, leaves quite small, ovate sublanceolate, acuminate, of a good green with veins of a paler tint and wide spaced serrations. The buds are ovate-spherical, solidly attached, with scales of greenish brown. The flowers, 9-10 cm in diameter, have numerous petals, imbricated with regularity and decreasing in size from the circumference to the centre and are of a bright rose with tenuous veins of a deeper colour. Sometimes, on opening, they are a pale rose bordered with bright rose which dims with the age of the bloom. The flowers are technically called a "perfection". Franchetti, 1855, *Collezione di Camelie,* p.19 describes it as "dark red and pale pink, small petals, rounded, often those at the circumference, cherry red, and those of the

centre almost white, very beautifully imbricated." while van Houtte Catalogue, 1846-1847, 29:21 has "Perfectly imbricated, very slender petals, sometimes dark rose, sometimes very soft rose, rounded and overlapping, graceful and unusually spotted white. During the second flowering period, the centre petals open quite white while the outer petals remain a vivid cerise." According to Rubel, 1957 *Camellian*, 8(4):21: This was originated by Chalmers, gardener to Mr George Pepper, Chestnut St., Philadelphia, USA and seen by C.M. Hovey of Boston in 1830. Van Houtte also says it bears the name of its originator. Therefore, for all its similarity, it appears to be a different cultivar to **Chalmeri Perfecta** which was said to have been originated by Peter Raabe. Orthographic variants: 'Chalmer's Perfecta', 'Perfecta'(Chalmer). Synonyms: 'Perfecta', 'Chalmer's', 'Perfetta Chalmers'. Orthographic errors: 'Perfetta Calmer', 'Perfection' (Palmer's), 'Perfection Palmer's'.

Chalmer's Perfection. *(C.japonica),* SCCS., 1950, *The Camellia. Its Culture and Nomenclature,* p.28: Light pink. Medium formal double. Compact growth. Early to mid-season. Although it is given as Raabe's Camellia, priority name **Chalmeri Perfecta,** its description of light pink does not conform to any of the earlier listings which are "cherry red"; "bright rose" so it is included as probably a different cultivar.

Chamei. (Camellia Plum), *(C.sasanqua)* , Gao & Zhuang, 1988, *The Camellia in China,* p .73, No .527, colour photo, No.303: Medium size, white, becoming red at the petal apex, with 6-7 crinkled, incurved petals. Leaves dark green, elliptic, shallowly serrulate. Originated in China.

Chameleon. *(C.japonica),* Kramer Bros. Nursery Catalogue, 1974; *American Camellia Yearbook,* 1979, p.103, Reg. No.1537: A large, multicolour, from rose red to pink and variegations of white, sometimes speckled, semi-double, *C.japonica,* chance seedling, late blooming; originated by Kramer Bros. Nursery, Upland, California, USA. See colour photo, p.75, Macoboy, 1981, *The Colour Dictionary of Camellias.*

Chamil. *(C.japonica),* Jean Verschaffelt, 1864, Price List, No.1, p.5. No description. Originated in France. (Believed extinct).

Chamleri. Loddige's Catalogue, 1836, p.24. Orthographic error for **Chalmeri.**

Chamlerii. Bosse, 1840, *Handbuch Blumengartnerei,* p.443. Orthographic error for **Chalmeri.**

Champ. Cannon, 1970, ACS., *The Camellia Journal,* vol.25, No.1. Synonym for **Debbie.**

Champagne Music. *(C.japonica), American Camellia Yearbook,* 1974, p.168, Reg. No.1281: An 8 year old japonica chance seedling that first bloomed 1969; originated by Mrs Jim Luker, Savannah, Georgia, USA. Plant growth is upright and dense with dark green leaves. 9.5 cm in length and 5.5 cm wide. The peony form, **Debutante** type, bloom is deep pink with about 80 petals and 26 petaloids, golden anthers and cream filaments. Average size 11.5 cm aross and 6 cm deep. Heavy texture, long lasting, falls complete. Blooms mid-season to late.

Champagne Sorbet. *(C.sasanqua).* C.Aust, *Camellia News* No.182, Autumn 2010, p.6 with colour photo; Regn No.596-N.; A seedling of **Marie Young,** first flowered 2001. Small to medium size flowers, single, soft pink. Flowers from mid-autumn. Compact, tight, upright growth. Very narrow leaves. Originated by Justin O'Malley Jones, Marion Grove Nursery, Mangrove Mountain, NSW, Australia.

Chamyiolof. *The Gardeners' Chronicle and Agricultural Gazette,* No.12, Mar.24, 1856, p.208. Orthographic error for **Contessa Samailoff.**

Chamzota. Lemaire, 1869, *L'Illustration Horticole,* 16:sub. pl.581. An error for *C.chamgota* Buchan ex Wallich, a synonym for *C.kissi* Wallich, (1820).

Chancelor. Hume, 1946, *Camellias in America,* p.329. Orthographic error for **Chancellor.**

Chancellor. *(C.japonica),* Lindo Nursery Price List, 1940-1941; Peony type, medium to deep pink, flecked with white, large size. McIlhenny Catalogue, 1941, p.3: Rose pink, blotched white. It is now considered to be the deep pink sport of **Concordia.** Synonym: 'Sophia'.

Chances Are. (*C.reticulata* hybrid). ACS, Aug. 1996, *The Camellia Journal,* vol.51, No.2, p.31, Reg. No.2381. A very large, magenta rose seedling of **Pink Sparkle**, pollen parent unknown, flowering early to mid-season. Originated by Houghton S. Hall, San Anselmo, Calif., USA. *American Camellia Yearbook,* 1996, p.2, colour photo before p.1. The 15 year old seedling first flowered in 1990. Flower size is 15 cm across x 7.5 cm deep with 17 petals, gold anthers and white filaments. Plant growth is upright and rapid with dark green leaves 11.5 cm long x 3.7 cm wide.

Chancler's Victory. Mark S. Cannon, Scion Catalogue, 1962, p.2. Orthographic error for **Chandler's Victory.**

Chandler. L.L. Liebig, 1839, *Verzeichnis von Warmen und Kalten Hauspflanzen…,* p.8. Fruitland Nursery Catalogue, 1943-1944, p.20, 26, 29. Orthographic error for **Chandleri.**

Chandler Elegans. Sharp, 1948, *Camellias Illustrated,* p.125, 126. Synonym for **Elegans.**

Chandler Elegans Rose. Burnier & Grilli Catalogue, 1846-1847. Synonym for **Elegans.**

Chandler Elegans Variegated. Fendig, 1953, *American Camellia Catalogue.* Synonym for **Elegans Variegated.**

Chandleri. *(C.japonica),* Chandler & Buckingham, 1825, *Camellia Britannica,* with plate; Curtis, 1825, *Botanical Magazine* with plate; Edwards, 1825, *Botanical Register* with plate: Originated by Chandler in 1819 and first published with illustration in Edward's *Botanical Register,* 1825, where it was stated to be the product of the 'Waratah', (**Anemoniflora**) with the 'double striped', (**Variegata**). The flowers are large and very regularly formed, measuring up to three and a half inches (8.5 cm) in diameter. They are a deep, almost crimson, red colour. The petals, although not numerous, are comparatively large, of a roundish form, a little divided at the extemities and incurved at the edges. The whole are marked with dark coloured veins. Sometimes the flowers vary...with the petals marked with white. Synonyms: 'Mr Chandler's Camellia', 'Chandler's Red', 'Chandleri Elegans Rubra', 'Chandleri Red', 'Chandleri Rubra', 'Chandleri Crimson', 'Chandleri Pulcherrima', 'Boleni', 'Pride of the Emperor's Garden', 'Chandler's Superb Striped Waratah', 'Chandleri Striata', 'Chandlerii'(Australia), 'Striata Chandleri'. Orthographic errors: 'Chandlerii', 'Chandelery', 'Chandlearii', 'Chandelarii', 'Chandelerii', 'Chandeleri Nuova', 'Chandlerri', 'Chandlreri', 'Chandlery Rubra'..

Considerable confusion was caused by the use of synonyms for the companion seedling, **Elegans** which incorporated the words 'Chandler' or 'Chandleri" and in some cases the name **Chandleri** has erroneously been used for **Elegans.** See illustration p.73, Paxtons, 1836, *Magazine of Botany,* vol.2, and Mertens & Fontaine, *Collection de cent espèces.....camellia,* 1845, pl.60 . 'Versicolor' erroneously given as a synonym.

Chandleri Alba. McIlhenny Catalogue, 1941, p.3, with the synonym 'Madge Miller'. As the name 'Chandlerii Alba' was previously used by Berlèse for an unknown variety, it is rejected here in favour of **Madge Miller** as a valid name.

Chandleri Alba. SCCS, 1947, *The Camellia. Its Culture and Nomenclature.* Synonym for **Shiro Chan.**

Chandleri Alba (1). Fendig, 1953, *American Camellia Catalogue.* White form of **Elegans,** synonym for **Shiro Chan.**

Chandlery Elegans. Franchetti, 1855, *Collezione di Camelie.* Synonym for **Elegans.**

Chandlery Rubra. Onillon, Angers, Nursery Catalogue, 1837, p.2. Orthographic error for **Chandleri.**

Chandlreri. Hibbert & Buist, 1832, *The American Flower Garden Directory,* p.78. Orthographic error for **Chandleri.**

Chandu. *(C.japonica),* Fendig, 1952, *American Camellia Catalogue.* Large, rose-red, irregular double (Peony form), 11-12.5 cm in diameter by 6-7.5 cm deep. Colour soft carmine rose (RHS,CC.,621). There are 12-15 slightly fluted, outer petals in two rows. Inner petals and petaloids form a ball shaped mass in the centre. Stamens are few and hidden, filaments white and anthers yellow. Petals are 4-5, 5 cm, obovate with notched apex and tapered base. Leaves, medium green, oval, 12.5 cm x 5.5 cm, texture stiff. Apex cuspidate, recurved, base tapered,

veins raised, serrations fine and shallow. Originated by Mervin R. Culbertson, Rex Rd., Rivera, California, USA from a seedling of **Elegans** that first bloomed 1949.

Changban Songzilin. (Long petalled Pine Cone), *(C.reticulata),* Gao & Zhuang, 1989, *The Camellia in China,* p.57, 58, No.382, colour photo No.240: Medium size, 8.5-9.5 cm across, spinel pink, semidouble to open peony form with 30-34 ovate, channelled, emarginate petals, with a central stamen group broken into 4-5 fascicles by erect centre petals. Leaves elliptic, 9-9.5 cm long x 4.5-5.5 cm wide, mid-green, apex acuminate, margins serrulate. Blooms mid-season. Originated in Tengchong, Yunnan Province, China.

Chang Chia Ch'a. Yü & Feng, 1958, *Yunnan Shanchahua Tuchich.* A different reading for **Zhangjia Cha.**

Changchiacha. Ikeda, 1975, *American Camellia Yearbook,* p.153. A different reading for **Zhangjia Cha.**

Changchiatiechih. Ikeda, 1974, *American Camellia Yearbook,* vol.II, p.111. Synonym for 'Chang Chai Ch'a' which is a different reading for **Zhangjia Cha**.

Changchatiechih. Peer, 1949, SCCS, *Bulletin,* vol.11, No.2, p.9, 11. Corruption of 'Changchiatiechih', synonym for 'Chang Chia Ch'a', a different reading for **Zhangjia Cha.**

Changchiahung. Ikeda, 1974, *American Camellia Yearbook,* vol.II, p.111. Different reading for 'Zhangjiahong', synonym for **Zhangjia Cha.**

Change of Day. Camellias Aust., *Camellia News*, Autumn 2013, p.28. Early sales name for **New Day Rise.**

Changeable. Prince, William, 1828, A *Short Treatise on Horticulture*, p.170. Synonym for 'Mutabilis'.

Changeable Lady. *(C.japonica),* Hillcrest Nursery Catalogue, 1958. No description. Originated in USA.

Changecai. (Change's Elegance), *(C.japonica),* Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.58 with colour photo; A famous ancient cultivar from Zheijiang and Fujian Provinces, China. Flowers white, pink or red or with mixed colours or spots. Formal double, 80-100 imbricated petals, Leaves dark green, broad-ovoid. Plant somewhat spreading and pendulous, vigorous growth. Flowers early to mid-season. Individual flowers are usually named as follows; white as 'Bai Changecai', pink as 'Fen Changecai'', red as 'Hong Changecai', and those of mixed colours as 'Hua Changecai'.

Changrui Jinxin. (Long Stamens Gold Heart), *(C.japonica),* Gao & Zhuang, 1989. *The Camellia in China,* p.32, No.134: Medium size, semi-double with long stamen column and gold anthers. Originated in China.

Chang's Camellia. Bao, 1980, ACS., *The Camellia Journal,* vol.35, No.2, p.18. Synonym for **Zhangjia Cha.**

Chang's Family Camellia. Waterhouse, 1970, ACRS, *Camellia News,* No.40, p.9. Synonym for **Zhangjia Cha.**

Chang's Crimson. Feng et al., 1981, Yunnan *Shanchahua.* Translation for 'Zhangjiahong', synonym for **Zhangjia Cha.**

Changsheng Jiangjun. Shao, Taichong, 1992 *The Observations from the Camellia World,* p.71, No.257. Chinese synonym for the USA *C.japonica* **Winner's Circle.**

Chang's Temple. Peer, 1949, SCCS., *Bulletin,* vol.11, No.2, p.11. Western synonym for **Zhangjia Cha.** It has been argued that as 'Chang's Temple' was published earlier than **Zhangjia Cha** it should have priority. However, as Bartholomew points out on p.16 of the 1980, *American*

Camellia Yearbook, it has been shown that it was originally applied incorrectly to what was in fact **Damanao** or 'Cornelian'. Therefore 'Chang's Temple' has no priority over **Zhangjia Cha.**

Changxue Jinxin. *(C.japonica),* Shanghai Botanic Gardens List, 1984. A white, semi-double with prominent, yellow stamens. Translation is 'Eternal Snow, Golden Heart'. Originated in China.

Changyumao. Gao, Jiyin, Ltr,31 July 1990. Chinese synonym for **Feathery Touch.**

Chankô. (extinct), *(C.sasanqua),* Shirai-bunko, (ca,1800), *Korai Tsubaki Nayose:* Red flower. See Suzuki, JCS., 1983, *Tsubaki*, No.22, p.144. Originated in Japan. (Believed extinct).

Chanleri Elegans. E.B. Campernowne Nursery Catalogue, 1967, p.4. Orthographic error for 'Chandleri Elegans', synonym for **Elegans.**

Channa. (obscure), *(C.japonica),* Hamamatsu, Utakuni, 1825, *Setsuyô Kikan,* vol.23. No description. Originated in Japan. (Believed extinct.)

Chanshanchu. Waterhouse, 1965, *International Camellia Journal,* No.3, p.26: Different reading for 'Ch'ao-hsien Ch'a', synonym for **Chôsen-tsubaki.**

Chansonette. *(C.hiemalis), American Camellia Yearbook,* 1958, p.286, Reg. No.320: A seedling of **Shishigashira**, originated by Marjorie Washburne, Port Arthur, Texas, USA. Plant growth is rapid in rate, open and spreading. The leaves are 7.5 cm long by 2.5 cm wide. The imbricated, formal double flowers, average 7.5 cm across by 2.5 cm deep with 46 petals. The colour is a strong, brilliant pink. Petals become ruffled as the flower ages. Blooms early. It won the Ralph Peer "Sasanqua Award" in 1958. Colour photos: *American Camellia Yearbook,* 1960, p.176 and Macoboy, 1981, *The Colour Dictionary of Camellias,* p.172. Chinese synonym 'Zili'.

Chapel Bells. *(C.japonica),* Tammia Nursery Catalogue, 1965: White, medium to large peony form. Originated by Tammia Nurseries, Slidell, Louisiana, USA.

Chapelle de Lucs. *(C.japonica),* Claude Thoby, 1993, *Camélias,* pp.10, 17, 39; colour photo p.5: Semi-double white, slightly scented. Some petaloids, petals emarginated. A plant of little vigour. Leaves small, dull deep green, ovate to elliptic, apices acute, margins serrulate. Blooms mid-season. Originated in France.

Chapman's Pink. *(C.japonica),* Silver Birch Nursery Catalogue, 1956. Small, soft pink, semi-double. Originated in Australia.

Chaqu. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars*, p.162. Chinese synonym for **Interlude.**

Chardonneret. *(C.japonica),* Thoby, 1975, Ancienne Maison, Guichard Soeurs Catalogue: Flower, imbricated, flesh pink dusted with carmine. Mutates frequently. Originated in France.

Charisma. *(C.japonica),* SCCS., 1981, *Camellia Nomenclature,* p.35: Bright to deep red. Large semi-double. Vigorous, compact, upright growth. Mid-season blooming. Originated by Alice Spragg, Sutherland, N.S.W., Australia. A renaming of the ACRS Reg. No.210, 'Panache' as the name had previously been used for another Camellia.

Charity. *(C.x williamsii), New Zealand Camellia Bulletin,* 1975, vol.lX, No.l, p.29, Reg. No.104: Originated by L.E. Jury, New Zealand, Vigorous, spreading habit. Leaves, 7.5 cm x 3.5 cm,

light, dull green. Flowers, 11 cm across, semi-double with 5 rows of petals and some petaloid stamens; brighter and pinker than RHS,CC., Red-Purple Group, 62C, delicately veined 62A-B. Late flowering. Seedling from *C.saluenensis x C.japonica* **Waiwhetu Beauty.** Received RHS "Award of Merit", 1986. Synonym: 'Jury's Charity'.

Charlean. *(C.x williamsii), American Camellia Yearbook,* 1962-1963, p.215, Reg. No.639: An 8 year old hybrid seedling of **Donation,** backcrossed to 'Donckelaeri' originated by William Stewart, Savannah, Georgia, USA. Plant growth is upright and spreading, rapid in rate with light green leaves, 10 cm x 4.5 cm. The semi double flowers, 13 cm across and 7 cm deep, are medium translucent pink, with faint orchid overtones, pink filaments and lemon yellow anthers. Flowers have about 30 petals with scattered stamens. Cold hardy. Blooms mid-season to late. Received the Aubrey Harris Hybrid Award of the ACS, 1945. Sport: **Charlean Variegated.**

Charlean Variegata. Stonehurst Nursery Catalogue, 1987. Orthographic error for **Charlean Variegated.**

Charlean Variegated. *(C.x williamsii),* Mark S. Cannon Scion Catalogue, 1964-1965, p.3. No description. Tammia Nursery Catalogue, 1965-1966 as 'Charlean Var.'. A virus variegated form of **Charlean** - Translucent pink blotched white. Colour photo, back cover, ACS., Aug.1990, *The Camellia Journal*, vol.46, No.3. Orthographic error: 'Charlean Variegata'. Originated in USA.

Charlemagne. *(C.japonica),* Anonymous, 1841, *Gardeners' Chronicle.* Baumann, Mulhouse, Nursery Catalogue, 1841-1842, p.13. No description. Berlèse, 1849, *Annales de la Société Central d'Horticulture,* vol.40, p.130: Flower formal double, 10-11 cm across, carmine red with touches of rose. Petals fan shaped, wide, lightly notched, in 6-7 rows, close set and imbricated from the circumference to the centre. When the flower is fully open the centre sometimes displays aborted stamens. Originated in Germany by Gruneberg. Orthographic variants: 'Karl der Grosse', 'Carl der Grosser', 'Carle der Grosse'. Orthographic errors: 'Charlement', 'Chaulement', 'Carle de Grosse'.

Charlement. Seidel, 1846, Pflanzen Catalog, p.6. Orthographic error for **Charlemagne.**

Charles di Ghirlanda Silva. *(C.japonica),* van Houtte, 1869-1870, Catalogue, 129:163: (Ch.Mauri). Almost imbricated, vivid red, bluish, centre butterfly wings shape. Originated in Italy by Moïsi Mauri.

Charles Duell. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1944-1945: A medium large, deep pink semi-double. Vigorous, upright growth. Originated at Middleton Gardens, Charleston, South Georgia, USA.

Charles Enke. *(C.japonica),* Verschaffelt, 1860, *Nouvelle Iconographie,* Book XII, pl.III: Independently of its large floral dimensions, of the perfect imbrication of its numerous petals, of its charming, small foliage...it is a pinkish red, transparent, glossy, with vivid, satiny tints. It measures 10-11 cm in diameter and formed of numerous ovate-oblong petals, slightly emarginate at the apex. It was obtained from seed in Ghent, Belgium. We have dedicated it to Charles Enke, Chief Gardener to Prince Troubetskoy of Moscow.

Charles F. Holden. *(C.japonica), American Camellia Yearbook,* 1959, p.270, Reg. No.369: A 7 year old chance seedling originated by David L. Feathers, Lafayette, California, USA, which first bloomed 1956. Plant growth is upright, dense and strong with dark green leaves, 11-12.5 cm long by 5.5-6 cm wide. The deep, dark red, rose form double flowers are 8-10 cm across and 5 cm deep and have about 50 pointed petals of good substance. Flowers mid-season to late.

Charles F. O'Malley. *(C.japonica),* ACS., 1989, *The Camellia Journal,* vol.44, No.3, p.9, Reg. No.2154: A large size, flesh pink, formal double, *C.japonica* chance seedling. Blooms mid-season to late. Originated by by Marge O'Malley, Woodside, California, USA. *American Camellia Yearbook,* 1989, p.119: Flower size, 11 cm across x 3.2 cm deep with 100 petals. Plant growth is upright, dense and medium with light green leaves.

Charles Favre. *(C.japonica),* Rollisson & Son, 1846, Catalogue, No.1, p.7. Originated in France. No description. (Believed extinct).

Charles Havery. Bahuaud-Litou Nursery Catalogue, 1914. Orthographic error for **C.M. Hovey** as 'Charles Hovey'.

Charles Henty. *(C.japonica),* ACRS., 1967, *Camellia News,* No.28, p.5, Reg. No.87: Originated by H.J. Henty, Balwyn, Victoria, Australia. It was an **Esther Henty** x **Gauntlettii** seedling, planted 1957 and first flowered 1963. It produces in mid-season, a 11-12.5 cm diameter by 6 cm deep flower on an open, upright, vigorous plant. The colour of the bloom is HCC., China Pink, 024/3 at the base, veined deeper and fading to white on petal edge with an odd fleck of 024/1 shade. The dark green leaves are 11 cm long by 6.5 cm wide, long acuminate, coarsely serrate. See colour photo, p.76, Macoboy, 1981, *The Colour Dictionary of Camellias.*

Charles Hovey. de Bisschop Nursery Catalogue, 1935. Synonym for **C.M. Hovey.**

Charles Kahn. *(C.japonica),* Stowe, 1951, *American Camellia Yearbook,* p.282, with black and white photo, p.288; *American Camellia Yearbook,* 1956, p.59, Reg. No.276: An 11 year old chance seedling originated by J.L. Kahn, Pensacola, Florida, USA. First flowered, 1950. Plant growth, upright and rapid with medium green leaves, elliptic, acuminate and serrate. Flower buds are round and pinkish white. The incomplete double blooms, similar to **Gloire de Nantes,** are pinkish white with spots and streaks of red, average 9 cm across and have 25 petals. Flowers Mid-season.

Charles Le Fevre. *(C.japonica),* Veitch Nursery Catalogue, 1856-1857. No description. Originated in France. (Believed extinct.)

Charles Malmo. *(C.japonica),* Portland Camellia Nursery, Camellia Catalogue, 1945-1946. No description. Originated in USA.(Believed extinct.)

Charles Mason Hovey. *Camellia Digest,* 1943, 1(3). Synonym for **C.M. Hovey.**

Charles Maxwell. *(C.japonica),* SCCS., 1950, *The Camellia. Its Culture and Nomenclature; American Camellia Yearbook,* 1954, p.305, Reg. No.23: A 10 year old seedling of **Enrico Bettoni,** grown by Mrs C.O. Maxwell, Cairo, Georgia, USA. It is of rapid, upright growth. The 10-11 cm diameter flowers are complete formal double, imbricated, rose red in colour, slightly darker than **Prince Eugene Napoleon**. It is superior to **Brilliant** in that there is no tendency for the petals to reflex with age.

Charles Michael. *(C.x williamsii),* Williams, 1951, RHS. Journal, 76(11):398: "There are two or three other really good pinks, the best is called **Charles Michael** and this had the largest flower of all. The petals are long and not quite so regular in size as some of the others and the flowers are not as flat until fully opened, but the quality of the flower and the clearness of the pink is the best of all. However it is not really early." The earliest record of this cultivar is in Arnold Foster's *Shrubs for the Milder Counties,* 1948, p.202 where he used the abbreviation 'C. Michael', but this was not acceptable to the raiser. Further confusion was caused by the cultivar being listed by Hilliers as 'Michael', when this name had previously been applied to a **Cornish Snow** hybrid at Caerhays. Originated by Mr. Julian Williams, Caerhays Castle, Cornwall, England and named for his head gardener. Received the RHS., "Award of Merit", 21 April 1987. Plant, vigorous, fairly erect, spreading, free flowering. Leaves 8.2 cm x 3.5 cm,

slightly glossy, fairly dark green. Flower 8 cm across, single with 2 rows of petals; inner petals very pale pink, outer lightly flushed with RHS Red Group 56A.

Charles Newman. Cannon, 1985, ACS, *The Camellia Journal,* vol.40, No.4, p.13. Abbreviation for **Charles A. Newman.**

Charles Minarik. *(C.japonica), American Camellia Yearbook,* 1991, p.77, Reg. No.2219: Medium sized white single, *C.japonica* seedling, late blooming. Originated by Dr Charles E. Minarik, West Harwich, Maryland, USA. The 8 year old seedling first flowered 1987. Average flower size is 8-10 cm across x 5 cm deep with 6 petals and 4 petaloids. Plant growth is upright and rapid with dark green leaves 8 cm long x 5 cm wide. Colour photo pp.80-81.

Charles O'Malley. ACS 1992, *The Camellia Journal,* vol.47, No.4, p.13. Orthographic variant for **Charles F. O'Malley.**

Charles Quint. *(C.japonica),* van Houtte, 1844-1845, Catalogue, 18:9; Burnier & Grilli Catalogue,1846-1847: Salmon violet, unique form with petals extremely complicated. Originated in Italy. Orthographic error 'Carles-quint'. Synonym 'Charles V.'.

Charles R. Butler. *(C.hybrid), American Camellia Yearbook,* 1984, p.43, Reg. No.1960: A large to very large cerise pink semi-double, *C.hybrid* chance seedling, originated by the Belle Fontaine Nursery, Theodore, Alabama, USA. The 7 years old seedling first bloomed 1977. Average size, 17 cm across by 10 cm deep with 14-18 petals, high and crinkled. Blooms mid-season. Plant growth is open and medium with dark green leaves, 12.5 cm long by 5 cm wide.

Charles R. Grandy. *(C.japonica),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* White blushed pink. Large rose form double. Medium size, compact growth. Blooms mid-season to late. Originated by Mrs C.R. Grandy, Norfolk, Virginia, USA.

Charles Sargent. Coolidge Rare Plants Gardens Ltd. Catalogue, 1936. Synonym for **Professor Sargent.**

Charles S. Reid. *(C.japonica),* Dodd, 1968, *An Adventure in Camellia Seedlings,* p.5, colour photo: A chance seedling of **Elizabeth Le Bey** originated by Richard Dodd, Marshallville, Georgia, USA. Medium size, crimson informal double with a large, anemone centre consisting of a tight mass of small, irregular petals and petaloids surrounded by large, guard petals.

Charles S. Tait Sr.. *(C.japonica),* Fendig, 1950, *American Camellia Catalogue:* Large, incomplete double, medium pink with white blotches, 12.5 cm across by 7.5 cm deep. Petaloids semi-erect and with a tendency to rosette. Filaments white, anthers brown. Leaves mid-green, wide-ovate, 8-10 cm long by 5-6 cm wide; shallowly serrate, thin and stiff. Plant habit erect, compact, Vigorous and hardy. Originated by C.S. Tait Sr. Brunswick, Georgia, USA, from seed planted in early 1920's, thought to be that of **Elegans.** The cultivar was called 'Tait's Masterpiece' for many years, but this name was not published. To avoid confusion with the Californian variety 'Masterpiece' it was renamed in honor of the originator.

Charles Simon. *(C.japonica),* List. Nantes Collections, 1977. No description.. No valid listing located.

Charles Thiébaut. *(C.japonica),* Schneider, Sept.1894, *Revue Horticole,* p.432. No description. Originated in Belgium. (Believed extinct.)

Charles Thomas. *(C.japonica),* ACS, *The Camellia Journal,* Aug. 1998, p.23, Reg. No.2465. A small, rose, rose form double chance seedling. Flowers mid-season. Originated by Charles T. Elliott, Sr, Swainsboro, Ga., USA. *American Camellia Yearbook*, 1998, p.1, colour photo before p.1. The 15 year old seedling first flowered in 1993. Average flower size is 7.5 cm across x 4.5 cm deep with 44 petals, golden anthers and cream filaments. Plant growth is dense and vigorous with dark green leaves 7.5 cm long x 3.2-3.8 cm wide.

Charles Turner. *(C.japonica),* Stowe, 1951, *American Camellia Yearbook,* p.281, black and white photo, p.289: "The **Charles Turner,** named for his brother, is a fine semi-double, measuring 12.5 cm across and 5 cm deep. The flower is a shade of dark red with a group of yellow stamens in the centre. It is a fast, tall grower and heavy bloomer, starting in mid-season and continuing over a long period." Raised by Filo Turner, Pensacola, Florida, USA from seed of unknown parentage, first bloomed in 1949. The petals are wedge shaped with noticable veining; filaments pink, anthers yellow. Leaves mid-green, oval, 8 cm long by 4 cm wide, short cuspidate apex, tapered base, prominent venation, shallow serrations. *American Camellia Yearbook,* 1954, Reg. No.200.

Charles V. Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.5. No description. Synonym for **Charles Quint.**

Charles X. *(C.japonica),* Anon. 1830, "Ueber die Cultur der Kamellien" in *Der Blumen Gaertner,* p.51. No description. Synonym 'Carolus' under which name Berlèse gives the description: Leaves 3cm wide x 7.5cm long, round-ovate, prominently veined, bud oval, depressed at apex, scales green. Flower small, almost double, cherry red. Synonyms: 'Carolus', 'Ludwig Philip I'. Orthographic error: 'Carollus".

Charles Zerkowsky. *(C.japonica), American Camellia Yearbook,* 1983, p.156, Reg. No.1919: A very large, soft, medium pink, with white flecks, peony to rose form double, *C.japonica* chance seedling, originated by Ferol and Sam Zerkowsky, Slidell, Louisiana, USA. The 7 year old seedling first bloomed 1982. Average flower size, 15.5 cm across by 12.5 cm deep chemically treated. It has 32 petals, yellow anthers and white filaments. Flowers early to mid-season. Plant growth, upright, open and medium in rate with dark green leaves, 9 cm x 4 cm. See colour photo on front cover, ACS, Aug.1983, ACS., *The Camellia Journal,* vol.38, No.3.

Charlesii. Puddle, 1956, RHS, *The Rhododendron and Camellia Yearbook,* No.10, p.75 as a synonym for **Anemoniflora.**

Charley V. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2009, p.29, Regn No. 2773; Originated by Hal Vanis, Henderson, Tex., USA. *American Camellia Yearbook,* 2009, p.108 with colour photo; A 12 year old chance seedling, first flowered in 2000. Medium size, 9.5 cm diameter x 6.5 deep, loose peony form with upstanding petals, red splashed with white, and with yellow anthers. 16 petals and 14 petaloids. Plant is upright and vigorous. Dark green leaves average 9 cm x 3.8 cm. Flowers mid-season. SCCS, Supplementary List 2011, name given as Charlie V.

Charlie Adams. *(C.japonica),* ACS, *The Camellia Journal,* Sept. 2013, p.26 with colour photo; Regn No.2863; Originated and registered by Robert. A. Stroud, Slidell, La., USA. ACS, *Yearbook,* 2013, p.108 with colour; A 15 year old seedling, parentage unknown, first flowered 2001. Propagated by Jim Campbell, Covington, La. The medium to large, 11.5cm diameter x 5cm deep flower is bright red with white genetic variegation. Semi-double (photo shows a loose peony form), yellow anthers and white filaments. Heavy petal texture, and flowers fall whole. Plant is upright and open, with average growth rate. Dark green leaves average 5cm x 2.5cm with low serration. Flowers mid-season to late.

Charlie Bettes. *(C.japonica), American Camellia Yearbook,* 1960, p.194, Reg. No.459: A 7 year old chance seedling, originated by Charles Bettes, Jacksonville, Florida, USA, that first bloomed 1957. Plant growth is dense and rapid with dark green leaves, averaging 10.5 cm x 5.5 cm. The white semi-double flowers, 13.5 cm across and 6 cm deep, are similar in form to **Hikarugenji,** with 54 petals and many petaloids, with deep yellow stamens intermingled. Early blooming. Awarded the "John Illges Medal" in 1971. For colour illustrations see front covers of the ACS, *The Camellia Journal,* vol.26, No.2, 1971 and SCCS, *The Camellia Review,* vol.33, No.5, 1972. Orthographic variant: 'Charles Bettes'. Chinese synonym: 'Chalisi Beitisi'.

Charlie Bush. (*C.reticulata* hybrid). ACRS, *Camellia News,* 1995, No.135, p.13, Reg. No.457: Originated by John Hunt, Montrose, Victoria, Australia. A seedling of *C.reticulata* hybrids **Arch of Triumph** x Las**ca Beauty.** First flowered 1991. An informal double pink flower shading to light pink (RHS.CC.55B-C) on petal edge with 23 petals, 16.5 cm across x 8 cm deep. Flowers freely mid-season to late on a slow growing, upright, bushy plant. Leaves are dark green, matt, elliptic, flat, margins serrulate, apices acuminate, 11.5 cm long x 6 cm wide. Petals fluted. Filaments in groups. Flowers shed whole. Very thick petal texture with heavy veining. A large, high flower. Chinese synonym 'Fenchali'.

Charlie Forte. *(C.japonica), American Camellia Yearbook,* 1960, p.194, Reg. No.464: An 8 year old chance seedling, originated by Mrs W.J. Beasley, Hartsville, South Carolina, USA, that first bloomed 1954. Plant growth is upright and open with bright green, serrated leaves, 11.5 cm long by 4.5 cm wide. The brilliant red, semi-double flower, 12.5-13.5 cm across by 5.5 cm deep, has 7-8 petals and 3-4 petaloids, with a tight cluster of upright, deep pink stamens. Blooms early to mid-season.

Charlie Hoak. *(C.japonica),* SCCS., 1955, *The Camellia Review.* No description. Originated in USA.

Charlie Manship. *(C.japonica), American Camellia Yearbook,* 1965, p.228, Reg. No.775: A 12 year old chance seedling that first bloomed 1958, originated by Mrs W.J. Beasley, Hartsville, South Carolina, USA. Plant growth is upright and open, rapid in rate with dark green leaves, 11 cm x 5.8 cm. The flower is semi-double, similar to **Finlandia** and is a bright rose pink with pink-yellow anthers, 7 layers of petals, 33 in number and measures 10.3 cm across by 5 cm deep. Usually 5 half size petals stand upright in the centre, intermingled with stamens. Blooms mid-season.

Charlie Mason. *(C.japonica), American Camellia Yearbook,* 1980, p.161, Reg. No.1660: A large pink peony form *C.japonica* chance seedling, originated by Dr J.M. Habel, Suffolk, Virginia, USA. The 20 year old seedling first flowered 1966. Average flower size is 12.5 cm across by 6 cm deep with 20 petals, yellow anthers and white filaments. Blooms late. Plant growth is spreading, rapid in rate, with dark green leaves measuring 11 cm x 6 cm.

Charlie V. SCCS, Supplementary List 2011. Variation of spelling for **Charley V.**

Charline Preston. *(C.japonica),* SCCS., 1984, *Camellia Nomenclature,* p.26: Reddish pink. Large semi-double. Medium size, upright growth. Originated by L.C. Preston, Walnut Creek, California, USA.

Charlo Alberto. Joseph Baumann, 1856, Prix Courant, p.3. Orthographc error for **Carlo Alberto.**

Charlotta Grissi. Fruitland Nursery Catalogue, 1936-1937, p.16. Orthographic error for **Carlotta Grisi.**

Charlotte. *(C.japonica),* Guilfoyle Nursery Catalogue, 1866, p.18. Originated in Australia. No description. Synonym 'Charlotte Guilfoyle'. (Believed extinct).

Charlotte. Platt, James,1970, RHS., *The Rhododendron and Camellia Yearbook,* No.24, p.159: Class for single flowered cultivars of *C.japonica.* Mr Edmund de Rothschild of Exbury, took first prize with a charming little cup-shaped flower named 'Charlotte'. Abbreviation for **Charlotte de Rothschild.**

Charlotte. *(C.japonica),* J & F Thoby, Gaujacq, France, Catalogue, 2005, p.40; A seedling of **Gloire de Nantes.** Formal double, rose-pink, petals raised and wavy. Strong growth.

Charlotte Blount. *(C.japonica), American Camellia Yearbook,* 1981, p.95, Reg. No.1773: A large, strawberry red semi-double to peony form *C.japonica,* (**Dixie Knight** x **Tomorrow**), originated by W.F. Homeyer, Macon, Georgia, USA. The 14 year old seedling first flowered 1975. Average flower size 12.5 cm wide by 5 cm deep with 85-94 petals. Anthers and filaments are white.

Plant growth is upright and average in rate with dark green leaves, 8.5 cm x 5 cm. Sport: **Charlotte Blount Variegated.**

Charlotte Blount Variegated. *(C.japonica),* Cannon, 1980, ACS., *The Camellia Journal*, vol.35, No.4 as 'Charlotte Blount Var.': A virus variegated form of **Charlotte Blount.** Strawberry red marbled white. Originated in USA.

Charlotte Bradford. *(C.japonica), American Camellia Yearbook,* 1950, p.148 as "pink and white". SCCS., 1950, *The Camellia Its Culture and Nomenclature:* "Sport of **Mrs Baldwin Wood.** Phlox pink variegated white in varying degrees." Fendig, 1953, *American Camellia Catalogue:* Large, pink variegated, incomplete double, 11 cm across by 5 cm deep. The colour is phlox-pink with white spots or blotches. Petals are fluted. Central petals are golden in colour. Leaves are dark green, oval, 7 cm x 4.5 cm, with thick texture and coarse serrations. Plant habit, upright with loose, open growth. Orthographic error: 'Charolette Bradford'. Originated by Bradford's Wayside Nursery, Ocean Springs, Mississippi, USA, from a sport on **Thelma Dale**, which is itself a pink sport of **Mrs Baldwin Wood.** Synonym: 'Carlotte Bradford (Light). See black and white photos, p.71, Hertrich, 1957, *Camellias in the Huntington Gardens*, vol.II and p.95, Sharp, 1957, *Camellias Illustrated.*

Charlotte Bradford (Light). Mark S. Cannon Scion Catalogue, 1962, p.2. A virus variegated form of **Thelma Dale.** It is not considered sufficiently different to **Charlotte Bradford** to warrant valid status. Synonym for **Charlotte Bradford.**

Charlotte Corday. *(C.japonica),* Auguste van Geert Nursery Catalogue, 1848, p.15. No description. Auguste van Geert, 1863-1864, Catalogue No.54, p.34: Very large, imbricated, ivory white, lined with pink. Originated in Belgium.

Charlotte de Rothschild. *(C.japonica),* Stonehurst Estate Catalogue, 1964-1965; Gorer, 1968, RHS., *The Rhododendron and Camellia Yearbook,* No.28, p.172, erroneously as 'Charlotte Rothschild'. No description. Trehane Camellias Catalogue, 1980, "(England, circa 1930) Six petalled, charming white, opening flat with a column of white stamens and pale gold anthers. Neat, round bush, slow growing, glossy leaves; buds very freely. Flowers mid-season". Sunningdale Nurseries Catalogue, 1968-1969, p.10: Huge single white with wavy petals. Seedling of **Alba Simplex** x **Gloire de Nantes.** Abbreviations: 'Charlotte', 'Charlotte Rothschild'. Colour illustration: Bloms, Watford, 1975, Catalogue.

Charlotte Guilfoyle. Guilfoyle's Catalogue of Melbourne Botanic Gardens, 1883, p.172. A synonym for **Charlotte.**

Charlotte Hoak. *(C.japonica),* SCCS., 1956, *The Camellia. Its Culture and Nomenclature,* p.33: Porcelain white. Large single with irregular, fluted petals and unique stamen formation. Vigorous, compact, upright growth. Flowers mid-season. Originated at McCaskill Gardens, Pasadena, California, USA.

Charlotte Holman. *(C.japonica),* SCCS., 1956, *The Camellia. Its Culture and Nomenclature,* p.33: Faint blush pink with deeper pink flecks and dots. Medium size, formal double. Originated by Allan, USA.

Charlotte Johnson. (*C.japonica), American Camellia Yearbook,* 1980, p.161, Reg. No.1636: A large black-red semi-double, *C.japonica* chance seedling, female parent, **Midnight,** originated by Melvin & Ted Alfter, Bakersfield, California, USA. The 8 year old seedling first bloomed 1978. Average flower size 11 cm across and 7 cm deep with 14-18 petals. Some have a 'Tinsie' centre; others have some petaloids; others have a centre like **Midnight.** Blooms mid-season to late. Plant growth is upright, dense and rapid in rate with dark green leaves, 11 cm x 6 cm. Sport: **Charlotte Johnson Variegated.**

Charlotte Johnson Variegated. *(C.japonica), American Camellia Yearbook,* 1981, p.95, 96, Reg. No.1740 as 'Charlotte Johnson Var.': A large, black-red, variegated 50-60% white - A virus variegated form of **Charlotte Johnson.** Originated by Ted Alfter, Bakersfield, California, USA.

Charlotte Menca. *(C.japonica),* Giles & Son Nursery Catalogue, 1881, p.91. No description. Originated in Australia. Orthographic error: 'Charlotte Meuca'. (Believed extinct.)

Charlotte Petherick. *(C.x williamsii). Camellias, The Gardener's Encyclopedia,* 2007, Jennifer Trehane, p.271 with colour photo; Neat and very floriferous. 8-9 cm diameter, single with a wide centre of incomplete stamens. Soft pink. Flowers mid-season to late. Leaves 8 cm x 3.5 cm, dark green, glossy, no serrations. Dense, vigorous, bushy growth. Originated by Charlotte Petherick, Cornwall, England, 2005.

Charlotte Rothschild. Sunningdale Nurseries Catalogue, 1969-1969, p.10. Orthographic error for **Charlotte de Rothschild.**

Charlotte Walker. *(C.japonica), American Camellia Yearbook,* 1965, p.228, Reg. No.735: 3SCCS., No.62-244. Originated by Stephen L. Walker, Sacramento, California, USA. A 14 year old seedling from the female parent 'Magnoliiflora' (**Hagoromo**), male parent unkown. First bloomed 1955. Flowers are white, semi-double with pale yellow stamens. Best desribed as a pure white 'Magnoliiflora'. Maximum size, 10 cm x 5 cm. Blooms mid-season. Plant is medium growing, compact, upright.

Charmer. *(C.sasanqua),* SCCS., 1950, *The Camellia. Its Culture and Nomenclature:* White, edged pink. Large single. A seedling that originated at McCaskill Gardens, Pasadena, California, USA. Colour illustration facing p.178, *American Camellia Yearbook,* 1956 and black and white photo, p.284, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III.

Charmer. *American Camellia Yearbook,* 1985, p.182, Reg. No.1983. A *C.japonica* seedling originated by Houghton S. Hall, San Anselm, California. Renamed **Piquant,** ACS., 1986, *The Camellia Journal,* vol.41, No.2, p.24 due to the name having been already used for a *C.sasanqua.*

Charming Appearance. *Camellias,* Y.C. Shen, 2009, p.313 with colour photo; Synonym for **Enishi.**

Charming Betty. Mark S. Cannon Scion Catalogue, 1962, p.2. SCCS., 1966, *Camellia Nomenclature,* p.33. Abbreviation for 'Charming Betty Sheffield' now considered a synonym for **Funny Face Betty.**

Charming Betty Sheffield. *American Camellia Yearbook,* 1962-1963, p.216, Reg. No.578. In the same Yearbook, p.218, Reg. No.608 is the cultivar **Funny Face Betty,** both given as sports of **Betty Sheffield.** As they proved too similar to be regarded as separate cultivars, **Funny Face Betty** was acepted as the valid name as it had been listed in the Tammia Nursery Catalogue in 1961, one year earlier.

Charming Red. Bao, 1980, ACS., *The Camellia Journal,* vol.35, No.2, p.18. Synonym for **Zuijiaohong.**

Charming Snow. *(C.japonica), Camellias,* Y.C. Shen, 2009, p.104 with colour photo; Pale pink, loose formal double, deeper colour at base of rounded petals. Diameter 9 cm. Leaves elliptic, dark green. Upright growth.

Charmingly Drunk Red. Feng et al., 1981, *Yunnan Shanchahua,* p.53. Synonym for **Zuijiaohong.**

Charolette Bradford. Wheelers Central Georgia Nursery Catalogue, 1954-1955, p.6. Orthographic error for **Charlotte Bradford.**

Charter. *(C.japonica),* Fendig, 1951, *American Camellia Catalogue:* Large, white, semi-double to incomplete double (anemone form) 10 cm across. Several rows of petals and the small, central petaloids are intermixed with yellow stamens, which are small and numerous. Buds are round. Leaves are medium green, elliptic, 8 cm long by 3.8 cm wide with slender, acuminate apex, tending to recurve, texture stiff and leathery with shallow, coarse serrations and raised venation. Plant growth is slow and spreading. Originated by Mrs Reynolds Flournoy, Columbus, Georgia, USA, from a seed of 'Leucantha', (**Tricolor White**) planted about 1940 and named for the Charter Garden Club of Columbus.

Chasen. (Tea stirring whisk used in tea ceremony), *(C.japonica),* Hino, Sukekatsu, 1637, *Suketatsukyôki;* Hirayama, (late 17th century), *Tsubaki Byôyu; Chinka Zufu,* (before 1700), Watanabe,1969, pl.654: A dark red, peony type bloom with a coronet-like centre. A possible synonym is **Shizuya-no-chasen** in the *Hyakuchinshû,* Sakuden, 1630. Originated in Japan. (Believed extinct.)

Chasen-bako. (Box for storing tea whisk), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.102: A small, deep red bloom with a centre row of standing petals surrounding a stamen cluster. Originated in Japan. (Believed extinct.)

Chasen-kagura. (Tea whisk - Shinto dance), *(C.japonica),* Tuyama, 1968, *Camellias of Japan,* pl.239, p.162: Leaves rhombo-oblong to rhombo-obovate, olivaceous green, wavy, impressed on lateral margin; veinlets, flat or slightly elevated, serrulate, 7-8.1 cm long by 3.8-4.3 cm wide; petioles, 5-8 mm long, glabrous. Flowers, rosy red (Rose opal 022 to 022/1), petals wrinkled and recurved above half, stamens numerous, long and spreading, hairy petals 3, normal petals 8-11, largest 4.2 cm x 3.4 cm. Androeceum 4 cm high, divided into groups mixed with petaloids. The faint yellow pistil and bright yellow stamens, long, large and divided, protruding beyond the petals, have the appearance of a Chasen (Tea whisk). Late flowering. Originated at Jôritsuji Temple, Yatsuo-machi, Toyama Prefecture, Japan. Named and released by Takeda Pharmataceutical Company in 1968. See colour photo, p.95 & p.230, Seibundô Shinkôsha, 1979, *Senchinshû* and p.313, Yokoyama & Kirino, 1989, *Nihon no Chinka.*

Chastity. *(C.japonica),* Woodroof 1947, SCCS., *Bulletin,* vol.8, No.6, p.4; Valley Garden Supply Catalogue,1946-1947: White with a cream centre. Large, double peony. Vigorous, compact, upright growth with twisted, light green, medium sized, serrated foliage. Flowers early to mid-season. See black & white illustration, p.80, Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.1. Originated by Valley Garden Supplies Co. California, USA.

Chatam. Charmwood Nursery, 1967, ACS., *The Camellia Journal,* vol.22, No.1, p.35. Orthographic error for **Chatham.**

Chateau de Gaujacq. *(C.sasanqua).* Pépinières Thoby, Carquefou, France, Plant List, 2003, p.16. No details. J & F Thoby, Gaujacq, France, Catalogue, 2005, p.40; Single flower, soft rose, can tolerate a high ph soil level.

Chateau de la Foltiere. *(C.japonica),* Originated and propagated by Alain Jouno. Registered by Parc Botanique de Haute Bretagne, Le Chatellier, France. A 4 year old plant, parentage unknown, first flowered 2014. To be further propagated by a nursery. A single flower, white, 8cm

diameter x 3.5cm deep. Stamens columnar, anthers yellow, filaments white. Flowers fall whole. Plant is upright with medium growth rate. Dark green leaves, flat, 9cm x 5cm. Flowers early.

Chateau de la Moglais. *(C.japonica),* Originated and propagated by Alain Jouno. Registered by Parc Botanique de Haute Bretagne, Le Chatellier, France. A 4 year old plant, parentage unknown, first flowered 2014. To be further propagated by a nursery. Single flower (resembles a butterfly), 11cm diameter x 3.5cm deep, colour pink. Stamens tubular to columnar, anthers yellow, filaments white. Flowers fall whole. Plant is upright with rapid growth. Clear green leaves, 12cm x 6cm. Flowers early.

Chateau de Trevarez. *(C.japonica).* Originated by Roger Salaün, "Stervinou", Guipronvel, France. A 24 year old seedling of **Gloire de Nantes,** pollen parent unknown, first flowered 2000. Plant is upright and fast growing, with mid-green elliptic leaves, 8cm x 5cm. Flower is a loose rose form to informal double, 10-12 cm diameter x 3-4 cm deep, with stamens dispersed among the inner petals. Flower colour rose, anthers yellow and filaments white. Long flowering mid-season, and flowers fall whole.

Chateaubriand. *(C.japonica),* Galeotti, M., 1853, *Journal d'Horticulture Pratique de la Belgique,* vol.11, p.140: Imbricated, deep carmine, each petal bordered with light carmine rose.Anonymous, 1853, *Floricultural Cabinet,* "Notes on new or rare plants", vol.21, p.148. Imbricated form, a bright carmine, with each petal edged with white. Originated in France.

Chatillionii. Alex Verschaffelt, 1846, Catalogue, p.51. Orthographic error for **Chatillonii.**

Chatillonii. *(C.japonica),* Geldorf, Const., 1844, Catalogue of Plants and Price List, p.5: Double, glossy vermilion. van Houtte, 1843-1844, Catalogue, 12:9. No description. Orthographic error 'Chatillioni'. Originated in Belgium.

Chatham. *(C.japonica), American Camellia Yearbook,* 1965, p.228, Reg.No.766: A 6 year old chance seedling that first flowered 1962, originated by J.M. Jones, Savannah, Georgia, USA. Plant growth is of average density, medium in rate with dark green leaves averaging, 9 cm long x 3 cm wide. The semi-double to anemone form flowers are Turkey red with yellow anthers and red to yellow filaments. they are 15.5 cm across and 6.5 cm deep with 13 petals and 3-15 petaloids. Early Flowering. Orthographic error: 'Chatam'.Sport: **Chatham Variegated.**

Chatham Variegated. *(C.japonica),* Dunn, 1968, *ACS., The Camellia Journal,* vol.23, No.4, p.27 as 'Chatham Var.'. A virus variegated form of **Chatham** - Turkey red marbled white. Originated in USA.

Chats. *(C.japonica),* Shepherd & Co. Nursery Catalogue, 1880, p.9: "Brilliant rich rose, free bloomer." The name "Chats" would appear to be an abbreviation for "Chatsworth", the name of Shepherd's Nursery at Rooty Hill. Originated by Shepherd, N.S.W., Australia.

Chatsworth. Waterhouse, 1947, *Camellia Quest,* p.23. Synonym for **Chats.**

Chatsworth Belle. *(C.x williamsii). Camellias, The Gardener's Encyclopedia,* 2007, Jennifer Trehane, p.272 with colour photo; Flowers 9-10 cm diameter, formal double, sometimes in tiered hexagon form. Mid-pink, shading a litlle darker at petal edges. Flowers mid-season to late. Leaves 10 cm x 4.5 cm, serrate, glossy dark green. Vigorous, upright, bushy growth. Originated by David Feathers, Calif., USA, 1996, and named for the estate of the Duke of Devonshire.

Chawa. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.419; Chinese synonym for the Italy *C.japonica* **Bella di Chiavari.**

Chaya-no-hoshi. (Star of Teahouse), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.5: Very small size, tubular to campanulate, single, vivid red with white spots. Originated in Shizuoka Prefecture, Japan.

Cheap Frills. (*C.reticulata* hybrid). SCCS, *Supplementary List* 2011; Medium size, light pink, semi-double to peony form with very wavy petal edges. Strong compact growth. **(**((*C.pitardii* var *yunnanica* x **Forty-Niner**) x {*C.pitardii* var *yunnanica* x [(**Zipao** 'Purple Gown' x **Damanao** 'Crimson Robe') x (**Damanao** 'Crimson Robe' x *C.fraterna*)]}**)**. Originated in 2007 by Daniel Charvet, Fort Bragg, Calif., USA.

Cheapside. *(C.x williamsii),* RHS., 1990, *Rhododendrons with Camellias and Magnolias,* p.67: Semi-double, bright rose-pink, seedling of *C.saluenensis x C.japonica* **Gloire de Nantes.** Originated by R.F. Winton, Ascot, Berks., England.

Chee Chew. Inazawa Nurseries Whole Sale Catalogue, 1986-1987. Orthographic variant for 'Chi Chiao', different reading for **Qiqiao.**

Cheeky. *(C.japonica),* C.Aust, *Camellia News,* No.193 Spring 2013, p.26 with colour photo; Regn No.684; A cross of **Bokuhan** x **Mini Pink.** Originated by Donal R. Coe, Albury, NSW, first flowered about 1997. Registered by Desmond Klemke, Albury. Anemone form similar to **Bokuhan,** with 5 or occasionally 6 soft pink guard petals surrounding a tight upright mass of pure white petaloids. The upright plant has an average to fast growth rate. Leaves are flat, mid-green, glossy, finely serrate, 8cm x 5cm with acute apex. Petiole about 1cm long. Flowers midseason.

Cheer Leader. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.39. Orthographic variant for **Cheerleader.**

Cheerful. *(C.japonica),* McIlhenny 1934, *List of Camellia Japonicas for Sale,* p.7: Dark pink. Full double, medium sized blossom. Centre holding tightly until fully open. Originated by S. Quin, McComb, Mississippi, USA about 1883. Synonyms: 'Cheerfulness', 'Lucinda', 'Otome Red', 'Ulrick Brunner Rose'. Erroneous names invalidly given to this cultivar include: 'Hi-otome', 'Beni-otome', 'Ko-otome', 'Kyobotan'. For black and white photo see, p.73, Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II. In America this cultivar was confused with the old Japanese, small formal double red **Kô-otome** and its various readings.

Cheerfulness. Gerbing Azalea Gardens Catalogue, 1938-1939 as 'Cheerfull Ness'. In Catalogue, 1940-1941 this was corrected to 'Cheerfulness', a synonym for **Cheerful.**

Cheerfulness (I). Vanderbilt, 1941, *Camellia Research, II,* p.2. Synonym for **Cheerful.**

Cheerfulness (II). Vanderbilt, 1941, *Camellia Research, II,* p.2. Synonym for **Kô-otome.**

Cheerleader. *(C.japonica),* Nuccio's Nurseries Catalogue, 1965. A virus variegated form of **Touchdown** - Deep rose-pink, marbled white. Originated by Nuccio's Nurseries, Altadena, California, USA. Orthographic variant: 'Cheer Leader'.

Cheerio. *(C.japonica),* SCCS., 1947, *The Camellia. Its Culture and Nomenclature:* White striped or flecked with red to solid pink and ocasionally half red and half white. Medium large, semi-double. Medium, compact growth. Fendig, 1950, *American Camellia Catalogue:* A white variegated flower, varying in form from semi-double to incomplete double, 8-11 cm across. Colour variable, having as many as five different colour combinations, ranging from white, flecked and streaked with light, clear pink, to self chrysanthemum-crimson but characteristically variegated red, pink and white. The anthers are yellow. Leaves are dark green, stiff, glossy, oval and turn downwards, 8-11 cm long by 5-5.5 cm wide. Venation obscure, serrations shallow and apex acuminate. Plant is tall and compact of average growth

rate. Originated by John S. Armstrong, Ontario, California, USA. For black and white photo see p.35, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III. Orthographic error: 'Cheero-o'.

Cheero-o. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Cheerio.**

Chengdu Yanzhilian. *(C.japonica), Chinese Camellia Culture,* 2003, Appendix, p.567 as 'Chengduyanzhilian'; Slow growth rate, formation of new branches weak, thick trunk, red-brown twigs. Leaf obovate to elliptic, juvenile leaves curved inward to boat shape, dark green, 7.5-9.5 cm x 4.5-6 cm. Petals flat in several rows, apex concave, outer petals reflexed, some petaloid stamens when fully open, inner petals do not open. Deep red flower, 8-9 cm diameter. Late flowering. Synonym 'Zhushalian'. From Sichuan Province, China.

Chenhui. (Morning Glow), *(C.reticulata).* CSC. 1989, *Report on the Camellias of China:* Rose form, silvery pink. Petals slightly spoon shaped. 9-11cm across, 20-28 in 4-5 whorls. Stamens few, adnate basally to petals, singly or several, mingled with petals. Pistil degenerate, style thin and twisted. Flowers mid-season to late. Originated in China.

Chensi. (Meditation). Gao, Jiyin, Ltr, 5th August 1992. Chinese synonym for the New Zealand *C.pitardii x C.japonica* **Contemplation.**

Chenyungfen. Liu, Tzi-Ming, 1959, *Chung kuo chu ming ti chi chung hua hui.* Different reading for **Zhenyunfen.**

Cheng Kung Fen. Ichijima, Kenkichi, ed. 1906, *Kokon Yôrankô* vol.306, reprint of Yashiro Kôken, 1841. Different reading for **Zhenggongfen.**

Chenshuang. (Morning Frost), *(C.reticulata),* Gao & Zhuang, 1989, *The Camellia in China,* p.70, No.506, colour photo No.300: Large size,11-11.5 cm across, red, semi-double with 22-25 large, rounded, emarginate petals, inner irregular, mixed with fasciciles of stamens. Leaves dark green, ovate. Blooms early to mid-season. Originated in Tengchong, Yunnan Province, China.

Chenxi. (First Rays of the Sun), *(C.japonica),* Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.49: Small size, 6-7 cm across, white, single of 6-7 petals. Blooms mid-season. Originated in China. Gao & Zhuang, 1989, *The Camellia in China,* p.33, No.141.

Cheops. (*C.sasanqua*), ACRS, Dec.1990, *Camellia News,* No.115, p.11, Reg. No.389: Originated by Mrs Hilda Rahn, Strong's Road, Jasper's Brush, N.S.W., 2535, Australia. A chance seedling that first flowered 1988. An informal double (peony) to formal double flower of 40 petals, of pale lavender rose-pink, RHS.CC.75D (or METH 12 A3), 10 cm across x 3.5 cm deep. A rapid growing plant, upright, pyramidal and dense. Leaves deep, glossy green, ovate, keeled, dentate, 6 cm long x 4 cm wide.

Chep Marisson. Mark S. Cannon Scion Catalogue, 1962, p.2. Orthographic error for **Chep Morrison.**

Chep Morrison. *(C.japonica),* SCCS., 1956, *The Camellia. Its Culture and Nomenclature,* p.34: Dark Red. Large, semi-double to semi-peony form. Vigorous, compact growth. Mid-season blooming. Originated by T. Clower, Florida, USA. Orthographic error: 'Chep Marisson'.

Cherie. *(C.sasanqua),* Fendig, 1953, *American Camellia Catalogue,* as pink, semi-double, early. SCCS., 1954, *The Camellia. Its Culture and Nomenclature:* Pale pink. Semi-double to rose form double. For black and white photo see p.285, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III. Originated by McCaskill Gardens, Pasadena, California, USA.

Cherie Shirah. *(C.japonica),* ACS, *The Camellia Journal,* June 2005, p.8, colour photo p.9, Reg. No.2636. A chance seedling that first flowered 1991. Originated by John W. Shirah, Lakeland, Fla, USA, and propagated by Shirah's Camellia Nursery. The 10 cm diameter, formal double flower is pink, and the photo shows attractively incurved petals. Flowers mid-season. *American Camellia Yearbook,* 2005, p.41, colour photo p.C4. Plant is spreading with average growth rate. Dark green leaves are 8.2 cm x 3.2 cm.

Cherilyn. *(C.sasanqua),* ACRS., 1959, *Camellia Annual,* No.6, p.21, Reg. No.37: Originated by Mrs A.S. McCloy, Pymble, N.S.W., Australia. A chance seedling from the garden of Dr Ducker, Lindfield, NSW. A flower with up to 80 petals and petaloids, of a pink colour fading to pale pink. A vigorous grower.

Chernobyl. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, Medium size semi-double with yellow stamens dispersed among centre petals. Red with purple shades (RHS.CC.46A). Stated to come from seed of 'Rubra Simplex' **(Rubra),** irradiated by the nuclear accident at Chernobyl. First flowered in 1993. Originated by Dott. Guido Cattolica, Livorno, Italy.

Cherohee. Van der Vis, Boskoop, Special Camellia List, 1964-1965, p.1. Orthographic error for **Cherokee.**

Cherokee. *(C.sasanqua),* McIlhenny, 1934, *List of Camellia Japonica for Sale,* p.4: Rose madder and Alizarin-crimson, exceptionally fine, five petalled single, perfectly formed blossom with prominent stamens of the largest size. Mid-season blooming. Originated at Magnolia Gardens, Charleston, South Georgia, USA. Synonyms: 'Hibiscus', 'Red Hibiscus', 'Variegated Hibiscus'. Orthographic error: 'Cherohee'.

Cherokee Rose. *(C.japonica),* Kiyono Nurseries Catalogue, 1934-1935, p.19. No description. Originated in USA. (Believed extinct.)

Cherries Jubilee. *(C.japonica),* Nuccio's Nurseries Catalogue, 1983; *American Camellia Yearbook,* 1984, p.176, Reg. No.1950: A large, burgundy red with red and white petaloids, intermingled with stamens, semi-double to rose form double, originated by Nuccio's Nurseries, Altadena, California, USA. The 5 year old seedling first bloomed 1982. Average size, 10.5 cm across. Blooms mid-season. Plant growth is upright, dense and medium in rate with dark green leaves, 10 cm x 2 cm. Nuccio's No. 8206. For colour illustrations see frontispiece, SCCS., 1984, *The Camellia Review,* vol.46, No.1 and on the back cover ACS., 1985, *The Camellia Journal,* vol.40, No.1, and p.4, *International Camellia Journal,* 1989, No.21. Sport: **Cherries Jubilee Variegated.** Chinese synonym: 'Yingtaojie'.

Cherries Jubilee Variegated. *(C.japonica),* ACS 1993, *The Camellia Journal,* vol.48, No.4, p.32: Valdosta Camellia Scions as 'Cherries Vubilee V.': A white blotched, virus variegated form of **Cherries Jubilee**. Originated in USA.

Cherry. *(C.japonica),* Vanderbilt, 1940, *Camellia Research,* p.3. No description. Originated in USA.

Cherry Blossom. (*C.sasanqua*), *American Camellia Yearbook,* 1948, p.172: Colour white, edge tinged pink, 9 petals, ruffled, irregular. Diameter of flower, 5-6 cm; foliage 3.5 cm long x 1.3-2.0 cm wide; medium green. Habit of growth, upright, Compact. Originated by Fruitland Nurseries, Augusta, Georgia, USA.

Cherry Blossom. SCCS. 1976, *Camellia Nomenclature,* p.37. Synonym for **Sakuraba-tsubaki.**

Cherry Blossom Palace. Macoboy, 1981, *The Colour Dictionary of Camellias,* p.137. Synonym for **Gôshôzakura.**

Cherry Bounce. *(C.japonica), American Camellia Yearbook,* 1970, p.162, Reg. No.1118: A sport of **Mathotiana Supreme** first observed 1960. Plant growth is upright, open and medium in rate with dark green leaves, averaging 7.5 cm long by 5 cm wide. The rose form, double bloom resembles **Shiragiku** as 'Purity' and averages 10.5 cm across by 5 cm deep. It is a dark, cherry red with 40 - 45 wavy petals, 3-4 petaloids, pale yellow anthers. The flower is loose and deeply creped or fluted. Blooms mid-season. Originated by G.E. Carver Jr., Houston, Texas, USA.

Cherry Frost. *(C.japonica),* ACS., 1987, *The Camellia Journal,* vol.42, No.4, p.22, Reg. No.2066: Miniature red with red and white petaloids, anemone form, *C.japonica* chance seedling. Blooms mid-season. Originated by Don Bergamini, Martinez, California, USA. *American Camellia Yearbook,* 1987, p.79 with colour photo facing p.60: The 8 year old seedling first flowered 1984. Average flower size, 5 cm across x 2.5 cm deep with 5-6 petals and many petaloids. Plant growth is average and medium in rate with dark green leaves, 7.5 cm long x 5 cm wide.

Cherry Glow. *(C.reticulata),* ACRS., 1970, *Camellia* News,No.40, p.26, Reg. No.121: Originated by E.R. Sebire, Wandin North, Victoria, Australia. Seed parent 'Crimson Robe', (**Dataohong**), pollen parent unknown. The plant is an open, upright, vigorous grower. It produces in mid-season, 15 cm across, double to incomplete double blooms with 18 petals, of a glowing red colour. The 10 cm long by 5 cm wide, lanceolate leaves are deep green, reticulate, with shallow serrations. Sport: **Cherry Glow Variegated.** Chinese synonym: 'Yingtaohong'

Cherry Glow Variegated. *(C.reticulata),* Cannon, 1978, ACS., *The Camellia Journal,* vol.33, No.4 as 'Cherry Glow Var.'. A virus variegated form of **Cherry Glow** - Glowing red, blotched white. Originated in USA.

Cherry Leaf Camellia. Macoboy, 1981, *The Colour Dictionary of Camellias*, p.115. Synonym for **Sakuraba-tsubaki.**

Cherry-O. *(C.japonica),* McIlhenny, 1941, *700 Varieties of Camellias*, p.5: Large semi-double. Carmine, shading to pink, blotched white. Originated at Jungle Gardens, Avery Island, Louisiana, USA. Orthographic variant: 'Cherryo'.

Cherry Red. *(C.japonica),* Vanderbilt, 1943, *Trade Available Camellia Stocks.* No description. Originated in USA. (Believed extinct.)

Cherry Ripe. *(C.reticulata),* ACRS., 1971, *Camellia News*, No.43, p.34, Reg. No.133 erroneously as 'Cheery Ripe'. Originator, Howard Asper, Escondido, California, USA. First flowered 1966. It has a spreading, open, typically reticulata growth habit. It produces in mid-season, a cerise, 15 cm diameter single bloom of 7-9 petals, veined and slightly crinkled. The leaves, 10 cm x 4 cm, are uniformly elliptic, dark green, semi-glossy with small serrations.

Cherry Viewing. Macoboy, 1981, *The Colour Dictionary of Camellias.* Synonym for **Sakuragari.**

Cherub. *(C.x williamsii),* RHS., *The Rhododendron and Camellia Yearbook*, No.19, 1965, p.162: Grown by Sir Giles Loder and granted a Certificate of Preliminary Commendation on trial at Wisley. *RHS., Rhodendrons 1987 with Magnolias and Camellias*, p.97. Award of Merit, 9 April 1987. Raised by Sir Giles Loder, Ockenden House, Haywards Heath, West Sussex, England. Plant vigorous, erect, slightly spreading, very free flowering. Leaves 6 cm x 3.2 cm, fairly dark green. Flower 7.5 cm across with 2 rows of petals; Red-Purple Group, RHS.CC.62A-B, very delicately veined deeper than 62A. Blooms mid-season.

Cheryl Drinkard. *(C.japonica), American Camellia Yearbook*, 1974, p.168, Reg. No.1282: A 13 year old Japonica chance seedling that first bloomed 1967, originated by B.V. Drinkard, Mobile, Alabama, USA. Plant growth is upright, dense and rapid in rate with dark green leaves, 11 cm x 5 cm. The formal double, **Alba Plena** type, bloom is rose on outer petals, shading lighter towards the centre with 85 petals. It measures 11 cm across by 4 cm deep. Sports develop from this cultivar, one speckled, another speckled and variegated. Blooms early to mid-season.

Cheryl Hunter. *(C.japonica),* ACS, *The Camellia Journal*, Sept. 2013, p.27 with colour photo; Regn No.2875; Originated, registered and propagated by Vernon E. Howell, Lucedale, Miss., USA. ACS, *Yearbook*, 2013, p.109 with colour photo; A 17 year old seedling, parentage unknown, first flowered 2001. The very large, 15cm+ diameter x 7.5cm+ deep flower is semidouble, light red, 25 large, wide petals, outer petals sometimes edged darker red. Yellow anthers and pink filaments (photo shows the stamens dispersed outwards). Heavy petal texture and flowers fall whole. Plant is upright, dense, with vigorous growth. Dark green leaves average 10cm x 5cm, with medium serration. Flowers early to late.

Cheryl Lynn. *Encyclopedia of Camellias in Colour,* vol.II, 1978, p.29. Orthographic error for **Cheryll Lynn.**

Cheryll Lynn. *(C.japonica),* Keeton, 1967, *American Camellia Yearbook*, p.68: "**Cheryll Lynn** is available for the first time this season, originated by Howard Collier, Chowchilla, California, USA. This very striking, light pink, formal double has created much attention. The flower is 10-11 cm across, with large petals; it opens well and blooms mid-season. It has won first award in the seedling class in several shows." Orthographic error: 'Cheryl Lynn'. See colour illustration, frontispiece, SCCS., 1967, *The Camellia Review*, vol.28, No.4. Sport: **Cheryll Lynn Variegated.** Chinese synonym 'Queli'.

Cheryll Lynn Variegated. *(C.japonica),* Gentry, 1968, ACS., *The Camellia Journal,* vol.23, No.4, p.8 as 'Cheryl Lynn V.' A virus blotched form of **Cheryll Lynn** - Light pink blotched white. Originated in USA.

A 6 year old *C.japonica,* (**Elizabeth Boardman** x **Moonlight Sonata**) that first bloomed 1976. Originated by Dr W.F. Homeyer, Jr., Macon Georgia, USA. The formal double, **Alba Plena** type, bloom is blush pink with 120 plus petals. Average size is 9.5 cm across. Blooms mid-season to late. Plant growth is upright

and medium in rate with dark green leaves, 6 cm long by 4 cm wide. See colour illustration No.26, p.30, *Encyclopedia* of *Camellias in Colour*, vol.II, 1978. Chinese synonym 'Xiuqi'.

Chief Arnold. *(C.japonica),* ACS, *The Camellia Journal,* Dec. 2009, p.29, Regn No. 2776; Originated by E. Hulyn Smith, Valdosta, Ga., USA. *American Camellia Yearbook*, 2009, p.109 with colour photo; A seedling of **Edna Campbell,** pollen parent unknown, first flowered in 1998. Propagated by Loch Laurel Nursery and Erinon Nursery. Large semi-double flower is 12.7 cm diameter x 3.8 cm deep, and colour deep red. Yellow anthers and yellow-red filaments. Heavy petal texture with a waxy sheen. Vigorous, upright growth. Dark green leaves average 7.5 cm x 3.8 cm. Flowers mid-season.

Chief Slack. *(C.japonica),* Stowe, 1951, *American Camellia Yearbook,* p.280: "Mr & Mrs G.J. Slack, Pensacola, Florida, USA are proud of their seedling **Chief Slack,** which is a white, incomplete double with a few golden stamens in the centre of the bloom. One side of the flower has a few bright red streaks and blotches. The centre petals are smaller than the outer petals and stand up more. The flower measures 10 cm across by 6 cm deep. The plant is a medium-fast grower and blooms mid-season". See black and white photo, pp.288-289 same Yearbook.

Chikubu-goromo. (Clothes from Chikubu Island), *(C.sasanqua),* SCCS., 1951, *The Camellia. Its Culture and Nomenclature* as 'Chikuba-Goromo': Pale pink with shades and stripes of deeper pink. Single. See Hakoda, 1974, *Nôkôdai Nôjôohô,* No.6, P.38.Originated in Japan.

Chikubu-jima. Wada Nursery Catalogue, 1941, p.31. Different reading for **Chikubu-shima.**

Chikubu-shima. (Chikubu Island), *(C.japonica),* Mizuno, 1681, *Kadan Kômoku:* White with red stripes. Synonym: 'Takeshima-kasuri'. Different reading: 'Chikubu-jima'.(Believed extinct.) Originated in Japan.

Chikubu-shima. (Chikubu Island), *(C.sasanqua),* Ashizawa, 1897, *Chabaika Taishû;* Ishii, Yugi, 1932, *Genshoku Engei Shokubutsu Zufu:* Pink with shades and stripes of whitish pink; slender petals, often marginate, single. Medium size. Upright grower. Different readings: 'Chikubu-jima', 'Chikuba-shima'. Originated in Japan.

Chikubu-shima. (Chikubu Island), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1968, pl.646: Deep red, large size, single, with an anemone, petaloid centre. Different reading: 'Chikubu-jima'. Thought to be a sport of **Takeshima-kasuri.** Originated in Japan. (Believed extinct.)

Chikugo-shibori. (Ancient Fukuoka dappled), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.229: Red, vertical variegation on a white background; white double, peony form blooms, medium size. Mid-season flowering. Leaves, elliptic, medium size, acuminate, curved, sharply serrate. Plant habit, erect and vigorous. Originated in Kurume, Fukuoka Province, Japan. "Chikugo" is the ancient name for "Fukuoka".

Chikushi-akebono. ('Akebono from Chikushi) *(C.hybrid). "Camellias in Kurume",* ICS Congress, Kurume 2010, p.101; An amphidiploid of **Minato-no-akebono**, produced with colchicine treatment by S. Hisatomi, Kurume, and T. Kage, Fukuoka, Japan in 2006. Peach pink, small size, cup-shaped single. Tubular stamen cluster. Fragrant. Growth vigorous and upright, with somewhat few branches. Leaves small, broadly elliptic and undulate. Flowers mid-season.

Chikushi-hagoromo. ('Hagoromo' from Chikushi). *(C.japonica), "Camellias in Kurume",* ICS Congress, Kurume 2010, p.47 with colour photo; Peach pink, medium size formal double. Upright growth. Leaves medium size, long elliptic. Apex acute and base obtuse. Late flowering. An 80 year old tree in a private garden in Kusano-machi, Japan. Named by Kazue Hisatomi in 2001.

Chikushi-no-haru. (Spring in Chikushi), *(C.japonica),* Watanabe, Kyôto Engei, Kurabu, *Tsubaki, Tokushû,* No.10, 1970, p.115. No description. *Encyclopedia of Camellias in Colour,* vol.I, p.103, pl.207 & p.321: Medium size, 11 cm across, pale pink, semi-double to peony form, with 8-9 petals, each having a fine peppering of pink dots, large and round. Flower somewhat bellshaped with a central column of stamens, filaments pale yellow. Flowers early to mid-season. Leaves, medium, glossy, dark green, slightly keeled, sharply serrate, prominently veined. See colour photos and descriptions, p.94 & p.229, Seibundô Shinkôsha, 1979, *Senchinshû* and p.374, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Named by Murata, Teruo, Kurume Horticultural Research Dept., of a seedling raised by a citizen of the Fukuoka Prefecture, Japan. Resembles **Yuba-shibori.**

Chikushi-no-homare. (Glory of Kyûshû), *(C.rusticana),* Watanabe, Kyôto Engei Kurabu, 1970, *Tsubaki, Tokushû,* No.10, p.115. No description. *Encyclopedia of Camellias in Colour,* 1972, vol.II, p.170, pl.427; Seibundô Shinkôsha, 1979, *Senchinshû,* p.94 & p.229: A very pale pink, semi-double to open peony form bloom, with large outer petals intermixed with greenish-yellow stamens. Blooms early to mid-season. For colour photo see p.366, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Leaves, pale yellowish green, elliptic, small to medium size, finely serrate. Originated in Kurume, Fuku'oka Prefecture, Japan by Senkaen, Kurumeshi. This cultivar is a sister seedling to **Gyôzan.**

Chikushi-no-musume. (Kyûshû Girl), *(C.japonica). Kurume Camellia,* 1997, English translation, p.6; Faint pink, medium size single. Flowers mid-season. Originated in Kurume, Fuku'oka Prefecture, Japan by Y. Tajiro, named by Y. Toyofuku.

Chikushi-shibori. (Variegated Camellia from Chikushi). (*C.japonica* hybrid). *"Camellias in Kurume"*, ICS Congress, Kurume 2010, p.112 & 126. No description. From Kurume City, Japan.

Chikuzenkô. (Fukuoka Red), *(C.sasanqua),* Itô, Jyukyû, 1739, *Honzô Hanamakie.* Small, single, red with curved inner petals. Originated in Japan. (Believed extinct.) "Chikuzen" is an ancient name for part of the Fuku'oka Prefecture.

Child of Grace. (*C.pitardii* hybrid). *New Zealand Camellia Bulletin,* March 1999, Issue No.132, vol.XXI, No.1, p.14, Reg. No.400. Registered by N. Haydon, Takanini, New Zealand. A seedling of **Nicky Crisp,** pollen parent unknown. Flower is a miniature formal double, 7 cm diameter x 2.5 cm deep, with about 65 petals which are slightly cupped and bilobed. The overall colour impression is (RHS.CC. 65B) with the outermost petals lighter (RHS.CC. 69B) and the inner petals darker (RHS.CC. 62A). Flowers have good weather hardiness. The plant, which first flowered in 1995, is dense and of average height and growth rate, with mid-green leaves 6 cm long x 3 cm wide.

Childe Harold. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature,* p.27: White. Large, semi-double to peony form with a satin sheen on the petals. Originated in Portugal.

Childsi. W.C. Weeks Lid Nursery Catalogue, 1964, p.5. Orthographic error for 'Childsii', synonym for **Althaeiflora.**

Childsii. Hillier's Nursery Catalogue, 1952. Synonym for **Althaeiflora.**

Chile's Big Red. *(C.japonica),* Mark S. Cannon Scion Catalogue, 1962, p.2. No description. Orignated in USA. No valid listing located.

Chimes. *(C.x williamsii),* SCCS., 1955, *The Camellia Review;* Puddle, 1958, NCCS., Bulletin, vol.12, No.1, p.24: Deep rose red. Medium size single, 8 cm across, campanulate form. Mid-season to late blooming. Marchant, Keeper's Hill Nursery Catalogue, 1965, p.16: Flowers 8 cm, across, rose-red and bell-shaped. Originated by Keeper's Hill Nursery, England.

Chimonji. (Thousand Letters), *(C.japonica),* Nihon Shokubutsu Kaisha Ltd. Catalogue, 1912-1913, p.27: "Pink striped with white". Originated in Japan.

Chimuka. Ichijima, Kenkichi, ed., 1906, *Kokon Yôrankô,* vol.310. Reprint of Yashiro Kôken, 1841. Different reading for **Chinka.**

China. *(C.japonica),* Berlèse, 1837, *Monographie,* ed.1, p.107, 130: The branches, leaves end wood resemble those of **Rubra Plena,** buds large, oval, with apple green scales; flower, 7.5 cm across, full, of a deep orange-red, petals elevated, numerous, compact and arranged as in **Atrorubens** but of a more globular form. Originated in China. Synonyms: 'China de Tat', 'Rives Nova', 'Perfection Carminea', 'China (Tat)', 'Reeves Nova'.

China Clay. *(C.x williamsii),* Tregrehan Camellia Nursery Catalogue, 1973: Medium semi-double, white, open growth. Gallagher, 1976, *American Camellia Yearbook,* p.123: "Amongst her next batch of seedlings resulting from a cross between *C.x williamsii* **J.C. Williams** and *C.japonica* **Marjorie Magnificent,** a pure white, semi-double camellia emerged. As one of the local resources is **China Clay,** the name stuck". It received an 'Award of Merit' from the RHS in 1976. For colour photo see facing p.113 of above *Yearbook.* Originated by Miss Gillian Carlyon, Cornwall, England.

China de Tat. Berlèse 1843, *Iconographie,* description facing pl.224. Synonym for China.

China Doll. *(C.japonica),* SCCS., 1960, *Camellia Nomenclature,* p.39: Blush white edged, coral pink. Large, high centred, peony form with loose, fluted petals. Mid-season blooming. Compact growth, medium in rate. See colour illustration, pl.27, p.30, *Encyclopedia of Camellias in Colour,* vol.II, 1978. Originated by H. Shackleford, USA. Chinese synonym: 'Zhongguo Wawa'.

China Festival. (*C.granthamiana x C.reticulata* hybrid). Seibu Maizaru Institute of Botany, 1993-1994, *Seibu no Tsubaki.* No.6: Dark pink, peony form. Large size. A seedling of *C.granthamiana x C.reticulata* hybrid **Dr Clifford Parks.** Originated at the Seibu Maizuru Farm, Japan.

China Girl. *(C.sasanqua x reticulata), American Camellia Yearbook,* 1982, p.171, Reg. No.1778: A very large, pink, semi-double *C.reticulata* hybrid; *(C.sasanqua* **Narumigata** x *C.reticulata* **Damanao**), flowering late autumn; originated by Dr Clifford Parks, North Carolina, USA. The 16 year old seedling first flowered 1968. Average flower size is 10 cm wide by 4 cm deep with about 12 petals and 1-2 petaloids, yellow anthers and cream filaments. Plant growth is open, upright and medium in rate with dark green leaves.

China Lady. *(C.reticulata x C.granthamiana),* Nuccio's Nurseries Catalogue, 1968; *American Camellia Yearbook,* 1979, p.104, Reg. No.1511: Nuccio No.6207. A very large, rich, orchid pink semi-double with irregular petals, *C.hybrid,* a cross between *C.reticulata* **Buddha,** and *C.granthamiana;* originated by Nuccio's Nurseries, Altadena, California, USA. The 16 year old seedling first flowered 1962. Average flower size, 13-15 cm across. Flowers early to late. Plant growth is upright and rapid in rate with mid-green leaves, 10 cm x 5 cm. Chinese synonym: 'Hannü'.

China Large. *(C.japonica),* Berlèse, 1837, *Monographie,* ed.1, p.107, (as 'Chine Large', p.130): Leaves, long, narrow, reflexed, of a green similar to **Rubra Plena;** flower about 7.5 cm across, full, of the form of the preceding (**China**) and a similar colour, petals of the interior, imbricated, entire, rounded at the apex, borders recurved, a few small petals in the centre, unequal, slightly spotted white. Originated in England.

China Maid. *(C.japonica),* Harrison's Master Catalogue, 1955-1956: Single. Pale, shell pink flowers of open, trumpet form. A delicate and lovely colour. Originated in New Zealand.

China Pink. *(C.sasanqua),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.251. No description. (Believed extinct.)

China Red Chrysanthemum Petal. Ikeda, 1976, *American Camellia Yearbook,* p.140; Tsui Wah Garden, 1974, *Chungkuo Shangtung Moutan, Yunnan Chahua Chanlan,*. Synonym for 'Hanhong Juban'.

Chinshin. (Kyûshû Fidelity), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû*, p.99, colour photo, p.231, description: Pure white single, 6-7 petals, 7 cm across, campanulate, central column of stamens with white filaments and light yellow anthers. Blooms mid-season to late. Leaves, elliptic, smooth, dark green, with raised midrib and obscure venation. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.53. Originated in the Nagasaki Prefecture, Japan. Discovered by the staff of the Agriculture Section of Hirado City Office in 1975. Named and released by Saburô Kumazawa. Note: Name also translated as "Personal Name".

Chinshô-kingyo. (Smiling Fishtail Camellia) *(C.japonica), Latest Illustrated Book of Japanese Camellias, (Camellias of Japan*), 2010, p.226 with colour photo; Red radial strips on white

ground, small semi-double, can throw solid red or solid white flowers. Leaves fishtailed. Upright, vigorous growth. Selected by Tetsuro Ito around 1990 from seedlings produced by Kenichi Suzuki. Named and released by Toturo Nakamura. From Kanagawa Pref., Japan. Estimated to be a seedling of 'Kari-goromo'.

Chinshû-nishiki. (Chinshû Brocade), *(C.japonica).* Seibundô Shinkôsha, 1979, *Senchinshû,* p.231: Large and small white variegation on a deep red ground, campanulate single; pinched yellow stamens, small. Late blooming. Leaves, small, long-elliptic, acuminate apex, recurved, finely serrate. Plant habit spreading and variable. This flower resembles **Kochô-wabisuke.** Originated in Kurume-shi, Fuku'oka Prefecture, Japan. Named and released by Tadashi Hisatomi in 1960. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.240, 241.

Chin Tai Chiu Hsin. Chuang, 1959, *Yunnan Shanchahua.* Different reading for **Jindai Jiuxin.**

Chintz. Hertrich, 1954, *Camellias in theHuntington Gardens,* vol.1, p.318. Synonym for **Sarasa.**

Chin Yeh Ta Hung Chiu Hsin. Chuang, 1959, *Yunnan Shanchahua.* Different reading for **Jinye Dahong Jiuxin.**

Chinyehtahungchiuhsin. Ikeda, 1976, *American Camellia Yearbook,* p.144. Different reading for **Jinye Dahong Jiuxin.**

Chioma di Berenice. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, p.75 with colour photo; Medium size, loose anemone form, white with pink variegations (RHS.CC.55B and 55C). Some visible stamens among the central petaloids. A seedling of **Alba Simplex** x 'Giorgia Bianca', first flowered in 1980. Originated by Dott. Guido Cattolica, Livorno, Italy.

Chipmunk. *(C.x williamsii),* SCCS., 1962, *Camellia Nomenclature,* p.120, Rose-pink. Medium large, semi-double, with golden stamens and petaloids intermixed. Vigorous, bushy growth. Mid-season blooming. A seedling of **J.C. Williams** raised by R. Carr, Tulare, California, USA.

Chippewa. *(C.japonica),* Hogg, 1838, *Magazine of Horticulture,* 4:155: Like **Wardii.** Scarlet and double. Originated by Michael Floy, Harlem, New York, USA.

Chi-pu. Yashiro, 1841. Different reading for **Qipu.**

Chire. Gao, Jiyin, Ltr, 22nd August, 1994. Chinese synonym for the USA *C.japonica* **Red Hots.**

Chirifurei-sanhô. (Scattered Marks Sanhô), *(C.japonica),* Kaoru, Hagiya, 1979, *Tsubaki no Sazanka,* p.27, No.3: Leaves elliptic, dark green with creamy variegation in streaks, spots and freckles. Originated by Kaoru Hagiya, Niigata, Japan.

Chirihakama. Watanabe, 1960, Kyôto Engei Kurabu, *Tsubaki, Tokushû,* No. 1, p.52 and ibid No. 10, p.115 as 'Chiri-hakama'. Orthographic error for **Fujibakama.**

Chirihime. (Scattering Princess), *(C.x vernalis),* Uesa, 1844, *Sômoku Benran;* Nihon Shokubutsu Kaisha Ltd., Catalogue, 1912-1913, p.27: Rose-pink, flecked white, miniature double. Petals fall scattered. Pale red, meagre, scattered stamens and pistil. Small size. Early to mid-season flowering. Leaves elliptic, small, acuminate, coarsely serrate, prominent venation, pale green. Plant habit, low growing and wide spreading. Originated in Kansai, Japan. Synonym: 'Chirihime'(Kansai), 'Benisuzume'. A possible synonym for **Yae-wabisuke** of Reikanji, according to Andoh.1971.

Chirihime (Kansai). Hakoda, 1987, JCS., *Tsubaki,* No.26, p.50.Synonym for **Chirihime.**

Chirihime (Kantô). (Scattering Princess from Kantô), *(C.hiemalis),* Hakoda, Nôkôdai, 1974, *Nôkôdai Nôjôhô,* No.6, p.38 as 'Chirihime'; Hakoda, 1987, JCS., *Tsubaki,* No.26, p.48: Light red colour, medium size, irregular double flower. Originated in the Tokyo Prefecture, Japan.

Chirimen. (Dust of Cotton), *(C.japonica),* Sakuden, 1630, *Hyakuchinshû:* Deep red, double of 8-9 rows of petals, a cluster of stamens, mixed with degenerated white stamens like the dust from cotton. See Kyôto Engei Kurabu, 1961, *Tsubaki Tokushû,* No.2, p.103. Originated in Japan. (Believed extinct.)

Chirimen. (Crêpe), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl. 331, 497. Deep red, double, medium size, cup-shaped. Hirayama, (late 17th century), *Tsubaki Byôbu;* Yashiro, 1841, *Kokon Yôrankô,* vol.309. No description. It is not confirmed that these ancient **Chirimen** are the same as the modern clone. A colour photo and description of the modern variety of this name can be found in *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.88, pl.157 & P.314: A medium size, red, rose form double, with dark red stripes and a few white streaks and scattered stamens in the centre when fully opened. Leaves, dull, mid-green, obovate, coarsely serrate, suddenly acuminate. Originated in Japan.

Chirimen. (Crêpe), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* True red, single with tea whisk stamens. Note: It is not known if the **Chirimen** in *Kôken Yôrankô* or *Tsubaki Byôbu* are the same as this. Originated in Japan. (Believed extinct.)

Chirimen-kasuri. (Crêpe Dappled), *(C.japonica), Chinka Zufu,* (before 1700), Watanabe, 1969, pl.484: Medium size, red camellia with a group of erect centre petals having white blotches. Originated in Japan. (Believed extinct.) Different reading: 'Chirimen-tobi'iri'.

Chirimen-kô. (Red Crêpe), *(C.sasanqua),* Itô Jukyû, 1739, *Honzô Hanamaki'e,* vol.16: Red, medium size. Synonym: 'Beni-chirimen'. Originated in Japan. (Believed extinct.)

Chiri-nishiki. Kyôto Engei Kurabu, *Tsubaki, Tokushû,* 1960, p.52. Orthographic error for **Chirimen.**

Chirimen-tobi'iri. Different reading for **Chirimen-kasuri.**

Chiriranka. (Scattered Petals), *(C.sasanqua),* Shirai-Bunko, Higashimurayama, 1789, *Shoshiki Hanagatachô:* Deep red, double, petals fall one by one. Watanabe, 1963, Kyôto Engei Kurabu, *Tsubaki, Tokushû,* No.5, p.82 as 'Chiri-ranka'. (Believed extinct.) Originated in Japan.

Chiri-tsubaki. (Petal Scattering Camellia), *(C.hiemalis),* Hino, Sukekatsu, 1628, *Sukekatsukyôki,* 1628; *Chinka Zufu,* (before 1700), Watanabe, 1969, pl.269; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki* in section on early flowering. Described by Satomi, 1956, *Camellia Varieties of Japan,* p.5: Pale pink. Small to medium size double. Mid-season blooming. See colour illustration, p.76, Macoboy, 1981, *The Colour Dictionary of Camellias.* Kitamura, 1956, *American Camellia Yearbook,* p.17 uses the name for the Camellia 'Goshikino-tsubaki', which is now called **Goshikichiri-tsubaki,** but this is different to the **Chiri-tsubaki** in the *Chinka Zufu.* This tree was the type for Makino's *Camellia japonica* f. *polypetala, Journal of Japanese Botany,* vol.46, 1928. Orthographic error: 'Chiro-tsubaki'. Synonym: 'Umegaka'. See *Encyclopedia of Camellias in Colour,* vol.I, pl.556 & p.391 which lists it as 'Umegaka'.

Chiri-tsubaki. (Petal Scattering Camellia), *(C.hiemalis),* Chûgai, 1936-1937, Descriptive Catalogue, p.26: Light pink. Double. Dwarf. Sport of **Shishigashira.** Synonym: 'Pink Shishigashira'. Originated in Japan.

Chiri-tsubaki. (Petal Scattering Camellia), *(C.japonica),* Iwasaki, Kan'en, 1829, *Honzô Zufu:* Red with a flower form like the wild camellia, single. Petals fall one by one. Originated in Japan. (Believed extinct.) See JCS., 1981, *Tsubaki,* No.20, p.102.

Chiri-tsubaki. (Petal Scattering Camellia), *(C.japonica),* Ono, Ranzan, 1803, *Honzô Kômoku Keimô,* vol.32; Yashiro, 1841, *Kokon Yôrankô,* vol.306: Described as planted in Jizô-in Temple,

Kyôto. Synonym for **Goshikichiri-tsubaki.** For detailed description see Tuyama, 1966, *Camellia Cultivars of Japan*:, p.346. Originated in Japan.

Chiri-tsubaki-Reikanji. (Petal Scattering Camellia from Reikanji), *(C.japonica),* Tuyama, 1968, *Camellias of Japan,* p.149, pl.195: This is the falling camellia or "petal scattering camellia" and the name appears to have been applied to a number of camellias with this habit. The type would seem to be the old plant in the grounds of the Buddhist Temple, Reikanji, Shishiga-tani, Sakyô-ku, Kyôto-shi, Japan. Leaves rather small, lanceolate to broadly-lanceolate, rarely narrowly elliptic, veinlets a little impressed, petioles glabrous. Flowers semi-double, deep pink, Rhodamine 527, sometimes pink and white variegated, petals narrowly obovate. Petals completely falling after flowering. Late blooming. Originating in Japan. This plant is reputed to be over 380 years old.

Chiriwata. Sakuden, 1630, *Hyakuchinshû.* Medium size, semi-double red with tubular stamen cluster. Different reading for **Chirimen.**

Chiro-chan. Domoto Nursery Price List, 1954-1955. Orthographic error for **Shiro Chan.**

Chisato-no-aki. (Autumn in Villages), *(C. hiemalis),* Hakoda, 1987, *Tsubaki,* No.26, p.48: White, irregular peony form. ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.38: Medium size, white, irregular peony form. Blooms early to mid-season. Originated in Kumamoto Prefecture, Japan.

Chishanghong. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p.154. Chinese synonym for 'Ikegamiko'.

Chishukô. Different reading for **Chisome.**

Chisome. (Thousand Dyed), *(C.sasanqua),* Itô, Jukyû, 1739, *Honzô Hanamaki'e,* vol.16: Red, semi-double, medium size, opens wide. Synonym: 'Chisome-beni'. Different reading: 'Chishukô'. Originated in Japan. Believed extinct.

Chisome-beni . Synonym for **Chisome.**

Chisongzi. *(C.japonica),* Huang Nursery Catalogue, 1949, according to Liu, 1959. Different reading: 'Chih Sung Tsu'. Synonym: 'Red Pine Cone'. No description. Originated in China.

Chisyu-kiku. Nobelius Nursery Catalogue, 1942. Orthographic error for **Chitosegiku.**

Chita-hagoromo. (Hagoromo from Chita), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* No description. Originated in the Aichi Province, Japan. Nippon Tsubaki - Sasanqua Meikan, 1998, p.163 with colour photo; English translation p.112. Medium size, pale pink, lotus-form semi-double, tubular to split stamens. Flowers mid-season to late. Leaves elliptic, medium size, thick. Upright growth, vigorous dense branches. The original tree grows in a convent in Chita District. Named by Minoru Satô in 1979.

Chita-no-homare. (Honor of Chita), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.94, colour photo, p.229, description: Small, soft pink, finely dotted a deeper pink with occasional streaks; open, informal double. Blooms early. Leaves, wide elliptic, wavy, prominent venation. Plant habit vigorous and erect. Originated in Chûbu, Japan.

Chita-tarô-an. ('Tarô-an' from Chita), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.139, colour photo and description: Large size, bright pink, saucer-shaped single, of 5 broad, emarginate petals and a spreading cluster of stamens with pale yellow filaments and gold anthers. Blooms very early to mid-season. Leaves deep green, elliptic, apices tapering acute, margins serrulate. Originated in the Chûbu area, Japan. A seedling of **Tarô'an.**

Chitose. (Eternity), *(C.japonica),* Itô, Ihei, 1695, *Kadan Chikinshô,* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White, large size, double with red dots. Originated in Japan. (Believed exinct). Different reading: 'Chiyo'.

Chitose. (Eternity), *(C.japonica),* Okumura, Shigetarô, ca,1810, *Chinka Hin'i.* No description. Originated in Japan. (Believed extinct.)

Chitose. (Eternity), (*C.rusticana*), Seibundô Shinkôsha, 1979, *Senchinshû,* p.229: Pale pink, peony form to formal double, with about 20 thick, fleshy petals, gathered up in waves with stamens intermingled, filaments yellow. Size, medium large; mid-season flowering. Leaves, medium size, elliptic, apex acute, prominently serrate, petioles hirsute. Plant habit, side spreading, variable. Of snow camellia lineage, originated in Higashi Kubiki-gun, Niigata Prefecture, Japan.

Chitosegiku. (Eternal Chrysanthemum), *(C.japonica),* Kasuya, Kamegorô, 1858, *Tsubaki Irohanayose Irotsuki,* in the section on new flowers; Itô, Ko'emon, 1879, *Chinka Shû:* Crimson, lined and spotted white. Medium formal double. For colour plates see *Encyclopedia of Camellias in Colour,* vol.1, 1972, p.178, pl.428 & p.355 and also Tuyama. 1966, *Camellia Cultivars of Japan,* p.366, pl.208; Tuyama, 1968, *Camellias in Japan,* p.199, pl.392: Blooms mid-season. Leaves, long-oval to obovate, large, acuminate, flat, dark green, prominent venation, shallowly serrate. Plant habit, erect and vigorous. Late blooming. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.402 and Seibundô Shinkôsha, 1979, *Senchinshû,* p.94 & p.230 as 'Chitosegiku'. Different reading: 'Chitosekiku'. Corruption of names: 'Chitosigibu', 'Chitose Siguba', 'Chisyu-kiku'. Resembles **Orandakô, Momijigari** & **Hitosuji.** Originated in Kantô area, Japan.

Chitose-giku. J & F Thoby, Gaujacq, France, Catalogue, 2009, p.2; White single.

Chitosekiku. SCCS., 1951, *The Camellia. Its Culture and Nomenclature.* Different reading for **Chitosegiku.**

Chitose-nishiki. McIlhenny, 1937, *600 Varieties of Camellia.* Orthographic error for **Chiyoda-nishiki.**

Chitose Siguba. Masons Nurseries Catalogue, 1968. Corruption of Japanese name **Chitosegiku.**

Chitosigibu. Synge, 1957, RHS,. *The Rhododendron and Camellia Yearbook,* No.11, p.123. Corruption of the Japanese name **Chitosegiku.**

Chittacong. Bob Wines Nursery Catalogue, 1985-1986, p.5. Orthographic error for **Chittagong.**

Chittagong. *(C.reticulata), American Camellia Yearbook,* 1971, p.45, Reg. No.1142: A 13 year old, chance *C.reticulata* seedling, first flowered 1961 and originated by Mrs M.I. Peer, Los Angeles, California, USA. Plant habit is spreading and medium in rate with dark green leaves, 12.5 cm long by 4 cm wide. The semi-double bloom, (similar to **Frizzle White**) is sweet pea red and measures 12.5-13 cm across and 5 cm deep. Blooms mid-season. Orthographic error 'Chittacong'.

Chiuszn-shipaban. Hertrich, 1955, *Camellias in the Huntington Gardens,* vol.II, p.352. Corruption of the Chinese name 'Chiu Hsin Shih Pa Pan', different reading for Jiuxin Shibaban', synonym for **Shizitou.**

Chiwaki-shiratama. (White Camellia of Chiwaki), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.44; ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.5 as 'Chiwaki-Shirotama': Small to medium size, white, tubular to campanulate single. Originated in Suzuka-shi, Mie Prefecture, Japan. Note: "Chiwaki" is the name of the god of the "Tsubaki Ohkami" Shrine in Suzuka-shi. Named by Ikutaka Yamamoto, the chief priest of the Shrine.

Chiyecha. (Saw Leaved Camellia). Shao, Taichong, 1992, *The Observations from the Camellia World,* No.429, p.81. Chinese synonym for the Japanese *C.japonica* **Nokogiriba-tsubaki.**

Chiyo. Kyôto Engei Kurabu, 1970, *Tsubaki Tokushû,* No.10, p.116; Itô, Ihei, 1695, *Kadan Chikinshô.* Different reading for **Chitose.**

Chiyo. (Thousand Ages), *(C.sasanqua),* Itô, Jukyu, 1739, *Honzô Hanamaki'e:* White, semi-double, medium size. Originated in Japan. (Believed extinct.)

Chiyo. (Thousand Ages), *(C.japonica),* (Higo), *Encyclopedia of Camellias in Colour,* vol.II, 1978, p.117, pl.269: Red, single with 6-7 large, rounded petals with a central, higo-like ring of stamens with pinkish filaments and golden anthers. Leaves, long, flat, dark green. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.206, description, p.207, colour photo: Medium size, deep red, Higo style, single of 6-7 large, irregular sized, overlapping petals with the stamens in a spreading circle, pinkish filaments, yellow anthers. Originated in the Niigata Prefecture, Japan. Blooms mid-season to late. Leaves broad-elliptic, apices acuminate, margins serrulate, slightly rolled, shining deep green with long petioles. See colour photo p.97 and description, p.231, Seibundô Shinkôsha, 1979, *Senchinshû.* This is not the old *Kadan Chikinshô* cultivar but recently discovered as a natural Yabu (Bush Camellia) mutation. Different reading: 'Sendai'. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.165 with colour photo; English translation p.114.

Chiyoda-fukurin. (Bordered 'Chiyoda'), *(C.japonica),* Seibundô, Shinkôsha, 1979, *Senchinshû,* p.98, colour photo, p.231, description: A soft pink, campanulate single with the colour softening to white at petal edge and with large, red streaks. A central column of stamens slightly pinched in at the top. Leaves, elliptic, apex blunt, flat surface. Originated in Chûbu, Japan as a sport of **Chiyoda-nishiki.** Named and released by Minoru Satô in 1977. Note: "Chiyoda" is a place name in Kyôto which includes the Royal Palace.

Chiyoda-kagami. (Chiyoda's Mirror), *(C.japonica),* Satomi, 1956, *Camellia Varieties in Japan,* p.5: Red. Large double. Petals pointed. Mid-season blooming. Originated in Japan.

Chiyoda-nishiki. (Chiyoda's Brocade), *(C.japonica),* Chûgai, 1934-1935, Descriptive Catalogue, p.32: Crimson splashes on snow white. Single. Early flowering. SCCS, 1947, *The Camellia. Its Culture and Nomenclature:* Soft pink, marbled white. Large single to semi-double. Vigorous, low, spreading growth. In America it received many synonyms and erroneous names

including: ‘Chitose-nishiki’, ‘Nana-Lomachi’, ‘Princess Nagaskie’, ‘Marlott’s Variegated’, ‘Mallot Variegated’, ‘Mallott’, ‘Princess Bacahachie’, ‘Nana-Romachi’, ‘Killarney King’, ‘Sacamento Pink’. Originated in Chûbu, Japan. Chinese synonym ‘Qiandaijin’.

Chiyoda-nishiki. (Chiyoda’s Brocade), *(C.japonica),* For colour photo see *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.78, pl.126 with description by Sato: Red streaks on white ground, campanulate bloom; medium size, number of petals, 5. Dark and pale red, large and small vertical stripes. Stamens tubular to “tea whisk” form, filaments white; stamens about 110. Flowers midseason to late. Leaves are medium elliptic and thick. It originated at Tôju-en, Chiyoda Mura, Old Nakajima Sub-prefecture, Aichi Prefecture, Japan as a seedling of **Shûfûraku.** See p.98 & p.231, Seibundô Shinkôsha, 1979, *Senchinshû* and p.262, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Sport: **Chiyoda-fukurin.** Note: There is often confusion between the above and below cultivars.

Chiyoda-nishiki-Kansai. (Chiyoda Brocade Kansai), *(C.japonica),* Minagawa, 1962, *Chinkashû;* Tuyama, 1966, *Camellia Cultivars of Japan,* p.292, pl.168: A campanulate single of pinkish white with streaks and dots of crimson. Blooms early to mid-season. Leaves small, long, apices pointed, strongly waved, venation impressed, petioles hirsute. Synonym: ‘Chiyoda-nishiki’ Takarazuka’. Note: The name was taken from the address of the originator, Tôju-en, Chiyoda Village, Nakajima-gun, Aichi Prefecture, Japan and propagated at Takarazuka, Hyôgo Prefecture.

Chiyoda-nishiki-Nagoya. Tuyama, 1966, *Camellia Cultivars of Japan,* p.292. Synonym for **Chiyoda-nishiki.**

Chiyoda-nishiki-Takarazuka. Tuyama, 1968, *Camellias of Japan,* p.186, pl.320: Leaves narrowly elliptic to elliptic, cuneate at the base, gradually acuminate at the apex, strongly wavy, minutely depressed, serrulate. Flowers, palest pink, splashed with small pink lines and dots, campanulate. Flowers mid-season to late. Sato, 1975, *Chûbu no Tsubaki,* p.50 as ‘Chiyoda-nishiki’. According to Minoru Satô, this is different from the genuine ‘Chiyoda-nishiki’. Originating from a plant at Yamamoto, Takarazuka-shi, Hyogo Prefecture, Japan. It is a synonym for **Chiyoda-nishiki-Kansai**.

Chiyoda-no-hiki. Camellia Society of America, 1939, p.21. Corruption of Japanese name **Chiyoda-nishiki.**

Chiyo-Dzuru. McIlhenny, 1937, *600 Varieties of Camellias.* Different reading for **Chiyozuru.**

Chiyogiku. (Myriad Ages Chrysanthemum), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.231: White lines on red, multiple double, medium-small size, Mid-season flowering. Leaves, medium size, elliptic, acuminate, curved on a plant of erect, vigorous, bushy habit. Resembles **Orandakô.** Originated in the Chûbu District, Japan.

Chiyohime. (Eternal Princess), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.98, colour photo, p.231, description: Small, campanulate, soft pink single of 7-9 petals, large, slightly rounded, somewhat crinkled, flushed a deeper pink. Late flowering. Leaves, small, long-elliptic, acuminate, mid-green, venation obvious, waved, sharply serrate. See p.93, Yokoyama & Kirino, 1989, *Nihon no Chinka.* Synonym: ‘Senhime’. Resembles **Momochidori, Hamadayama.** Originated in Kantô area, Japan. Named and released by Saburô Yokoyama around 1974, released by Masaomi Murata.

Chiyoji-guruma. Fendig, 1953, *American Camellia Catalogue.* Corruption of Japanese name **Chôjiguruma.**

Chiyo-kagami. (Eternal Mirror), *(C.sasanqua),* Satomi, 1958, *Nomenclature List of Sasanqua of Japan,* p.8: Dark pink, large, single with round petals, with occasional petaloids. Originated in Japan.

Chiyo-no-hanagata. SCCS., 1947, *The Camellia. Its Culture and Nomenclature.* Erroneous synonym for **Chô-no-hanagata.**

Chiyo-no-haru. (Eternal Spring), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.99, colour photo, p.231, description: Soft pink, medium size, formal double of open form, emarginate petals. Leaves, elliptic, medium size, acuminate, prominently veined, sharply serrate. Plant habit, vigorous and erect. Originated in Tenri City, Nara Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.167 with colour photo; English translation p.115. A cross between **Miura-otome** and **Yae-shiratama**. Named and released by Ikuo Nishihata in 1967.

Chiyo-no-homare. (Eternal Honor), *(C.japonica),* Satô, 1975, *Chûbu no Tsubaki,* p.12: A higo-like single, of 8-9 cm across, with 6-7 ruffled and distorted petals, white with red dots and streaks and a large, open burst of stamens, Early flowering. Flowers sometimes have a pink background. Leaves, medium size, elliptic, thick, even, prominent venation. Plant habit, erect and vigorous. Originated in the Chûbu District, Japan. A seedling of **Shûfûraku** x **Hanamiguruma.** Named and released by Minoru Satô in 1949.

Chiyo-no-tama. (Jewel of Thousand Ages). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.167 with colour photo; English translation p.115. Medium size, vermilion, bud-centred formal double, scattered stamens appearing at the last stage of blooming. Flowers early to mid-season. Leaves narrowly elliptic, medium size, waved. Upright growth. An old camellia at a private family, but origin details obscure. Named by Nagaharu Niwa in 1989, released by Gifu Camellia Club. From Gifu Prefecture.

Chiyo-no-tsuru. Hosaka, 1937, *Kômoku Zufu.* Different reading for **Chiyozuru.**

Chiyorozu. (Ten Million). *(C.saluenensis). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.167 with colour photo; English translation p.116. Miniature, purplish red, tubular to trumpet shaped single, slender petals, cylindrical stamen cluster. Flowers early to mid-season. Leaves narrowly elliptic, small, flat. Upright, vigorous growth. A natural seedling of *C.saluenensis.* Named and released by Nobuo Sasai in 1985.

Chiyozuru. (Long Lived Crane), *(C.sasanqua),* Serizawa, 1877; Minagawa, Iza'emon, 1885, *Nisshi'en Chabaifu:* White. Large single with long petals. According to Yashiroda, 1950, *American Camellia Yearbook,* p.18: White with a suspicion of pink; blooms up to 15 cm across, with notched thin, creped petals; narrow, long greenish leaves; upright, fast growth. Yamazaki, *1972, Encyclopedia of Camellias in Colour,* vol.I, p.210, pl.514, description, p.382: White, slender petals, 7-10, flower diameter 10-15 cm, early flowering. Petals obovate, deeply notched, apices crinkled. On the apex a little pink colour remains. Stamens in a spreading group. (ume). Leaves, dark green, lustrous, lightly serrate, 5-6.5 cm long by 2.5-3.5 cm wide. Different readings: 'Chiyo Dzuru', 'Chiyo-no-tsuru', 'Tiyozuru'.

Chiyozuru. (Long Lived Crane), (Higo), Yokoyama, 1975, *Gendai Tsubaki Meikan,* p.169, black and white photo; Seibundô Shinkôsha, 1979, *Senchinshû,* p.98 & p.231: Large, white Higo camellia, 10-11 cm across with 6-7 petals with crinkled edges and a large burst of about 180 golden stamens. Leaves, long elliptic, to obovate, sharply serrate, venation depressed. Different readings: 'Chiyo-tzuru', 'Chiyo-juru'. Originally imported to Tokyo from Kumamoto Prefecture, Japan. Resembles **Daisetsuzan.**

Chizhu Cha. Ichijima, Kenkichi, ed., 1906, *Kokon Yôrankô.* Reprinted from Yashiro Kôken, 1841. Flowers look like azaleas. Different reading for 'Chih-chu-cha' as synonym for **Zhizhu Cha.** Originated in China.

Chizu. (Personal Name), (Wabisuke), Kirino, Shûhô, Wabisuke Group, Kyôto Engei Kurabu, 1982, *Tsubaki Tokushû,* No.11, pp.116, 118, 119, colour photo, botanical drawings and description: Small size, campanulate single of Wabisuke form with 6 spinel pink petals and a small stamen

cluster. Yokoyama & Kirino, 1989, *Nihon no Chinka*, p.166, description, p.167, colour photo: Small size, deep pink, open campanulate single of 6 rounded, concave petals with a small stamen cluster with yellow anthers. Blooms mid-season. Leaves mid-green, ovate, apices blunt acute, margins serrulate. Originated near Kôtoku Temple, Fukumitsu-chô, Toyama Prefecture, Japan. Collected by Takasaka in 1979, named and released by Takeo Ogawa.

Chizu. (Longevity). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.163 with colour photo; English translation p.112. Small to medium size, dark red, long tubular single, cylindrical stamen column. Flowers mid-season to late. Leaves lanceolate, medium size. Somewhat spreading growth, vigorous. A natural seedling of **Benikujaku**. Named and released by Yoshihiko Mishima. A seedling sibling to **Kuroyuri.** From Hyôgo Prefecture.

Chô-asobi. Wada, 1941, *Japanese Garden Treasures,* p.31 as 'Choasobi'. Different reading for **Chô-no-asobi.**

Cho-chi-deri. Fendig, *1953, American Camellia Catalogue.* Corruption of the Japanese name **Chôchidori.**

Chôchidori. (Butterfly Plover), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki,* in the section on new cultivars; Itô, Ko'emon, *1879, Chinka Shû:* White. Medium size, single, magnolia form. There are many Japanese camellia books which contain colour plates of this camellia beginning with Adachi, 1960, *Camellia. Its Appreciation and Artistic Arrangements* where 'Chôchidori' is shown in four flower arrangements on pp.163, 171, 189, 211. It is also illustrated in Tuyama, 1966, *Camellia Cultivars of Japan,* pl.57 & p.102, and 1968, *Camellias of Japan,* pl.86, description, p.6; *Encyclopedia of Camellias in Colour,* vol.I, 1972, pl.64, p.58 & p.300; Seibundô Shinkôsha, 1979, *Senchinshû,* p.97 & p.231: Flower, pure white, slender, normal petals, 6-8, arcuate but margins incurved, apex slightly outcurved, channelled. Staminal tube simple, tending to be irregular, opened at the apex. Late flowering. Leaves, narrowly elliptic, gradually undulate, thin in texture. Different readings: 'Chohchidori', 'Cyôchidori'. An old variety from the Edo period. Originated in Kantô, Japan.

Chôchidori. (Morning Plover), *(C.sasanqua),* Ashizawa, Yagorô, 1898, *Chabaika Taishû:* Medium size, white. Originated in Japan. Different reading: 'Asachidori'. (Believed extinct.)

Chô-chô-san. *(C.japonica),* SCCS *Bulletin,* vol.11:1, p.17, 1949. No description. As Cho Cho San. McCaskill advert. in SCCS, 1950, *Camellia Review,* vol.12, No.2, p.18. No description. Sunningdale Nurseries New Zealand Catalogue, 1964, p.16: A delicate, dainty, shell pink with a long tube of golden stamens. Nuccio's Nurseries Catalogue, 19501951, p.4: Light pink. Medium size, semi-double to occasional anemone form. Medium, compact growth. Flowers mid-season. Imported from Japan to USA by Domoto, California, about 1936 and named in California for the heroine of the opera "Madame Butterfly". Synonyms: 'Madame Butterfly', 'Palmerston'. Chinese synonym: 'Qiaosang'.

Chocolate Ball. *Latest Illustrated Book of Japanese Camellias, (Camellias of Japan),* 2010, p.90 with colour photo; Synonym for **Chokorêtobôru.**

Chôgashima. (Chôgashima Island), *(C.japonica),* Sakata & Arisumi, 1983, *International Camellia Journal,* p.21 as 'Cho-Ga-Shima'. No description. Sakata et al. Mar.1981, Studies in the Flower colour in Camellias, II; *Memoirs of the Faculty of Agriculture* Kagoshima University, Vo.XVII, p.91. Originated in Japan.

Chôhanagata. Hosaka, 1937, *Kômoku Zutu.* Different reading for **Chô-no-hanagata.**

Choh-chidori. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai,* p.217, pl.83. Different reading for **Chôchidori.**

Chohjuraku. Andoh, 1971, *Tsubaki, Meika no Shôkai to* Saibai, p.217, pl.163. Different reading for **Chôjuraku.**

Choh-no-hanagata. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai,* p.216, pl.101. Different reading for **Chô-no-hanagata**.

Choice Camellia. Burnell, ed., 1837, *Magazine of Botany and Gardening,* vol.3, p.152. Synonym for **Eximia.**

Choice Fragrance. (*C.japonica* hybrid). *New Zealand Camellia Bulletin,* March 2002, Issue No.141, vol.XXII, No.5, p.10, Reg. No.429. Registered by J.R. Finlay, Whangarei, New Zealand. A cross between an unnamed hybrid seedling (**Mrs Bertha A. Harms** x **Salab**) x *C.japonica* **Erin Farmer,** which first flowered in 1988. Flower is of anemone form, 10 cm diameter x 4.5 cm deep, with about 10 bright pink (RHS.CC.52A) petals and 60-80 petaloids of the same colour. The flower is fragrant. The plant is upright, and of average density and growth rate with dark green leaves 9 cm long x 5 cm wide. Flowers early to mid-season.

Chôji-akerena. (Clear Anemone form), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô.* Deep red, inner petals incurved, large size, anemone form. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû,* No.5, p.80. Originated in Japan. (Believed extinct.)

Choji-bu-rawa. Sandhurst Nurseries Catalogue, 1957. Corruption of the Japanese name **Chôjiguruma.**

Choji-gurma. Satomi, 1958, *Nomenclature List of Sasanqua of Japan,* p.8. Orthographic error for **Chôjiguruma.**

Chôjiguruma. (Wheel of Anemone), *(C.sasanqua),* Shirai-Bunko, Higashimurayama, Kichi'emon, 1789, *Shoshiki Hanagatachô,* as 'Kin-no-zai'. Tokyo Nursery Catalogue, 1896: Single with many central petaloids. Pink. *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.390, pl.553 as **Chôjiguruma:** Light red, graduated colour on small, anemone form flower, 6-7 cm across, early blooming, 7-9 outer petals with central stamen group almost completely metamorphosed to long, curved, petaloid flags. Leaves, yellow-green with little lustre, long and slender, 5-6.5 cm long by 2-3 cm wide, long-acuminate, conspicuous venation, serrations, irregular but prominent. Itô, Ko'emon, 1879 lists it as 'Kin-no-zai', then in 1886 Minagawa has 'Chôji-guruma' and finally Fukui, 1895, *Nihon Engeikai Zasshi* records it as 'Ki-no-ma'. Corruptions of name: 'Chojigurma', 'Chouiguruma', 'Coji-guruma', 'Chiyoji-guruma'. Different readings: 'Chûjikuruma'. Synonyms: 'Kin-no-zai', 'Kin-no-sai', 'Kin-no-ma', 'Cloves Wheel'. Chinese synonym: 'Dingziche'.

Chôjikuruma. Different reading for **Chôjiguruma.**

Chôji-myôrenji. (Anemone form Lotus), *(C.japonica),* Uesa, 1844, *Sômoku Benran.* Rose-red, anemone form. Large size, opens flat. Originated in Japan. (Believed extinct.)

Chojiraku. Nuccio's Nurseries Catalogue, 1974-1975. Corruption of Japanese name **Chôjuraku.**

Chôjishiro. SCCS., 1978, *Camellia Nomenclature,* p.38: White. Medium size single Higo. Synonym for **Chûjôshiro.**

Chôju. (Longevity) (*C.hybrid*) from Ehime Pref,. *Tsubaki* No.38, Japan Camellia Society in 1999. Seed parent *C.japonica* **Osaraku**, pollen parent *C.granthamiana*. Pink, yellowish in the center, single, flat, medium size, petal shapes unequal, early blooming. Leaves resembling but smaller than those of *C.granthamiana*. Tree upright growth, vigorous. Cold hardiness relatively low. Originated by Hiroyasu Watanabe in 1997.

Chôju-no-haru. (Long Life's Springtime), *(C.japonica), Encyclopedia of Camellias in Colour,* 1972, vol.I, p.364 and vol.II, 1978, pl.382, description, p.253: Medium size, soft, pale pink

semi-double, cupped, 14-16 petals, surrounding a short central, cylindrical bunch of stamens with yellow anthers. Flowers mid-season. Leaves, small, dark green, long-elliptic, acuminate, shallowly serrate. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.301 and 1984 *Chabana Koyomi Vol.1, Tsubaki* p.52 as 'Kazukiyama'. Synonym: 'Kazuki-yama'. Originated by Mrs Kurihara, Nerimaku, Tokyo, Japan.

Chôjuraku. (Pleasure of a Long Life), (Higo), Satomi, 1956, *Camellia Varieties of Japan:* Light cherry pink, 11 cm across, 7-8 petals, flat form single. Stamens open wide, white. Blooms mid-season to late. Leaves, medium size, elliptic, dark green. See colour illustrations: *Encyclopedia of Camellias in Colour,* vol.I, p.55, pl.52 as 'Higo-chôjuraku' and Hiratsuka, 1964, *Higo Camellias,* p.11 & 12; Seibundô Shinkôsha, 1979, *Senchinshû,* p.98 & p.231 as 'Chôjuraku-higo'; Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.117. Different readings: 'Choh-juraku', 'Chôju-raku'. Corruption of name 'Chojiraku'. Synonyms: 'Higo-chôjuraku', 'Chôjuraku-higo'. Originated in Kumamoto Prefecture, Japan as a seedling of **Osaraku.**

Chôka. (Butterfly Flower), *(C.japonica),* Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* White with a pink tinge, double with 4-5 rows of round petals apices, lotus shape. Originated in Japan. (Believed extinct.)

Chôka. (obscure), *(C.japonica),* Okumura, ca.1810, *Chinka Hin'i.* No description. Originated in Japan. (Believed extinct.)

Chôka. (Name alludes to Adachi, Chôka), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.97, Colour photo, p.231 description: Small dark crimson single, 5-6 petals, campanulate. Compact central column of filaments, filaments pure white, anthers golden. In the early stages the blooms are almost black, becoming deep red later in the season. Mid-season flowering. Leaves elliptic, apex short acuminate, veins inclined to be prominent. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.229. Note: This is not the original Okumura Camellia. Originated in the Tokyo Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.166 with colour photo; English translation p.114. The original tree is growing in Meiji Shrine.

Chôkai. (Name of mountain), *(C.rusticana),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.97, colour photo, p.231, description: Small size, cup shaped, simple single of 5 petals, white, with a spreading group of lemon yellow stamens with deep yellow anthers. Leaves, elliptical, apex bluntly acute, recurved, sharply serrate; petiole hirsute. Originated in Chôkai Town, Yuri Sub-prefecture, Aichi Prefecture, Japan. Named and released by Tokuji Ôoka in 1980.

Chôka-wabisuke. (obscure), (Wabisuke), Uekiya, Seigorô, 1874, *Tsubaki Hyakuro no Zu.* No description. Originated in Japan. (Believed extinct.) Thought to be a corruption of **Kochô-wabisuke** but not confirmed.

Chokorêtobôru. (Chocolate Ball). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.166 with colour photo; English translation p.115. Miniature, dark red, tubular single, cylindrical stamen column. Flowers mid-season to late. Leaves narrowly elliptic, small, lightly waved. Spreading, weak growth. A natural seedling of **Kuro-tsubaki.** Leaf buds, petioles and flowering buds are red. Named and released by Shinichi Noguchi in 1994. From Tokyo.

Chö-Mo-Longma. *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, p.76 with colour photo; Medium size, anemone form, white. Inner petaloids assume yellowish shades. A seedling of **Alba Simplex** x 'Pomponia Semiplena' **(Pomponia Semi-duplex),** first flowered 1983. Originated by Dott. Guido Cattolica, Livorno, Italy.

Chonchiflora. Verschaffelt, 1844, Catalogue No.50, p.18. Orthographic error for **Conchiflora.**

Chonchiflora Magno Major. Verschaffelt, 1844, Catalogue No.50, p.18. Orthographic error for 'Conchiflora Magno Major', synoym for **Conchiflora Major.**

Chongbai. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars,* p. 133. Chinese synonym for **Adorable.**

Chongjie. (Adoring Pure) (*C.reticulata* hybrid) China Regn No.18. *China Flowers & Horticulture*, Oct 2007, No.20, p.46, with colour photo; A cross of **Suzanne Withers** x **Kona,** originated by John Wang, Orinda, Calif., USA. Flowers semi-double, about 13 cm diameter. Colour a very light purple when opening, becoming almost pure white when fully open. About 19 petals in 2-3 whorls, inner petals incurved in a V shape, and lighter colour than the outer petals, which are flat with round or emarginated apex. Leaves broad and thick, 11.5-12.5 cm long and 6.5-7 cm long Flowers mid-season.

Chongjing. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.426; Chinese synonym for the Australia *C.japonica* **Ace High.**

Chonglang. (Charging Waves), Gao & Zhuang, 1989, *The Camellia in China,* p.55, No.367, colour photo, No.223. Chinese synonym for *C. japonica* **Oki-no-nami.** Later changed to 'Chongzhilang'.

Chongningpao. (Chongning Gown), *(C.japonica),* Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.60 with colour photo; A rare cultivar, originated in Sichuan, found at present only in the garden of Mr Xu Yongcai, Shifang City, Sichuan, China. Flowers red to deep red, peony to rose form double, large, wavy petals with concave tips. Yellow stamens and petaloids mixed. Leaves dark green, lanceolate, shiny. Slow, spreading growth. Flowers early to mid-season.

Chongshan. Gao, Jiyin, 1998, The World's Best Camellia Cultivars, p.162. Chinese synonym for Kasane-ôgi.

Chongzhilang. (Charging Waves), Gao & Zhuang, 1989, *The Camellia in China,* p.55, No.367, colour photo, No.223. Chinese synonym for *C. japonica* **Oki-no-nami.** Previously as 'Chonglang'.

Chongqinghong. (Chonqing Red), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.52, No.332, colour photo No.191: Medium size, 8-9 cm across, deep red, formal double, with about 60 rounded petals, some emarginte, in 7-9 rows. Leaves small, mid-green. Late blooming. Originated in China.

Chô-no-asobi. (Playing of Butterflies), *(C.sasanqua),* Serizawa, 1877; Saitama Engei, 1911 as 'Chio-no-asobi'. Ashizawa, 1898, *Chabaika Taishû;* Wada, 1941, *Garden Treasures of Japan,* as 'Choasobi': Single pink spotted white. *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.214, pl.540, colour photo, p.388, description: Medium size, 5-6 cm across, pink single, spotted white, 6-7 petals, deeply cleft at apex; spreading group of stamens in the centre. Early flowering. Leaves, dusky green slender and long, 5 cm x 2 cm, acuminate, recurved, coarsely serrate. Based on the same characters as 'Chô-asobi'. Chinese synonym: 'Feidie'.

Cho-no-gata. Vanderbilt, 1940, *Camellia Research,* p.3. Corruption of the Japanese name **Chô-no-hanagata.**

Cho-no-hagasane. Nobelius Nursery Catalogue, 1941, p.30. Synonym for **Hagoromo**, ('Magnoliiflora').

Chô-no-hanagata. (Butterfly Flower form), *(C.japonica),* Kasuya, Kamegorô.1859, *Tsubaki Irohanayose Irotsuki* in the section on peony form flowers; Itô, Ko'emon, 1879, *Chinkashû; Encyclopedia of Camellias in Colour,* vol.I, 1972, p.109, pl.223, colour photo, p.323, description: A soft pink, shading to white, large incomplete double, open peony form, 11 cm across by 5 cm deep with 18-25 petals. Two outer rows of guard petals are large and flat, centre petals, erect and crinkled, folded over and intermixed with anthers when fully open. Anthers golden and

filaments white. Late flowering. Leaves, flat, glossy, medium green, elliptic, 8-10 cm long by 4-5.5 cm wide, edges almost not serrated, reflexed downwards. Loose, vigorous, upright growth. A Japanese variety from Kantô area, imported to USA by McIlhenny in 1941. Listed by Chûgai Nursery, 1938-1939. See Seibundô Shinkôsha, 1979, *Senchinshû,* p.98 & p.231; Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.298, 299. Corruption of name: 'Chiyo-no-hanagata', 'Cho-no-Hanegata', 'Cho-no-gata'. Different reading: 'Choh-no-hanagata'. Synonyms: 'Dorothea Blanche', 'Heart's Desire', 'Robinson 56'. Resembles **Toki-no-hagasane.**

Cho-no-Hanegata. Wheeler's Central Georgia Nursery Catalogue, 1954-1955, p.5. Corruption of the Japanese name **Chô-no-hanagata.**

Chô-no-hige. (Butterfly's Antennae), *(C.japonica),* Tuyama, 1968, *Camellias of Japan,* p.136, pl.162: Leaves, dark green, rhombo-elliptic to broadly elliptic, dull surface, flat, veins slightly impressed, 6.7-7.7 cm long by 3.7-4.2 cm wide; petioles 5-7 mm long, glabrous. Flowers, widely opened, deep red, (Cardinal Red 822/2) petals wide, wrinkled and slightly recurved, 5-7 in number. Largest about 4.5 cm x 4.5 cm. Androecium, small, 2.5-3 cm high, stamens scanty, filaments pinkish. Late flowering. Originated in the garden of the Buddhist Temple, Jiganji, Ogure-dani, Fukui Prefecture, Japan.

Chô-no-mai. (Dancing of Butterflies), *(C.x williamsii),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.27: Small size, very pale pink, single, opening flat. Late blooming. Seedling of *C.japonica* 'Goshikiyae-chiri-tsubaki' x *C.saluenensis.* Originated by Katsuyoshi Yoshikawa, Kyôto Prefecture, Japan in 1969.

Chô-no-mai. (Dancing of Butterflies), *(C.sasanqua),* Satô, ed. 1975, *Chûbu no Tsubaki,* p.115: Pinkish white, medium size with pink base, single of 5-6 widespread petals. Early blooming. See JCS., 1987, *Tsubaki,* No.26, p.43. The original tree is growing in Nishio City, Aichi Prefecture. Named and released by Minoru Satô in 1974. Chinese synonym: 'Youdie'.

Chontelle. *(C.sasanqua),* Thermal Nurseries (Rotorua) Lid Catalogue, 1986, p.22: Deep pink, semi-double. Originated in New Zealand.

Choo Choo. *(C.reticulata* hybrid), Gentry, 1979, ACS., *The Camellia Journal,* vol.34, No.4. No description. SCCS, 1981, *Camellia Nomenclature,* p.171: Large to very large, semi-double red. Medium, open, upright growth. Flowers mid-season to late. A seedling of reticulata hybrid **Buddha,** raised by Ted Alfter, Bakersfield, California, USA. Sport: **Choo Choo Variegated.**

Choo Choo Variegated. *(C.reticulata* hybrid), Gentry, 1982, ACS., *The Camellia Journal,* vol.37, No.4 as 'Choo Choo Var.'. A virus variegated form of **Choo Choo** - Red blotched white. Originated in USA.

Chôraku. Different reading for **Osaraku.**

Chôrenge. Kyôto Engei Kurabu, 1975, *Kyôto Engei* No.73, p.21. Different reading for **Tobirenge.**

Chôryô. (Personal Name), *(C.japonica),* Uesa, 1844, *Sômoku Benran.* White blotched rose-red. Large with three rows of petals. Originated in Japan. (Believed extinct.)

Chôseiden. (Place Name in China), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.131, colour photo and description: Medium to large size, pink, single, of 5 large, overlapping petals and a pinched central stamen cylinder with white filaments, joined for the lower half, and yellow anthers. Late blooming. Leaves green, elliptic, margins serrate. apices abruptly acute. Originated in Ishikawa Prefecture, Japan. A seedling of **Chôchidori.** Named and released by Tadao Yamaguchi in 1979.

Chôsen. Itô, Jukyû, 1739, *Honzô Hanamaki'e;* Watanabe, 1968, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.9, p.161 as 'Cyôsen'. Synonym for **Chôsen-tsubaki** in the *Kadan Chikinshô.*

Chôsen-tsubaki. (Korean Camellia), *(C.japonica),* Itô Ihei, 1733, *Kadan Chikinshô,* vol.3. Itô, Jukyû, 1739, *Honzô Hanamaki'e,* vol.15; Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Single, very large, crimson, large, spreading stamen cluster. Late flowering. According to Yokoyama, JCS., 1983, *Tsubaki,* No.22, p.132, this ancient **Chôsen-tsubaki** is thought to be the same as the modern **Kumagai.** Originated in Japan.

Chôsen-tsubaki. (Korean Camellia), *(C.japonica),* Tuyama, 1966, *Camellia Cultivars of Japan,* p.182, pl.108; Tuyama, 1968, *Camellias of Japan,* p.132, pl.149: Slow growing cultivar with thick branches and dense foliage. Leaves, dark green, rhombeo-elliptic to broad-elliptic, suddenly acuminate, minutely serrulate, veins slightly impressed, petioles glabrous. Flowers single, bright red, (Cardinal Red 822/2) petals strongly wavy at margin, stamen tube normal, filaments reddish, anthers small, yellow. Flower 9-10 cm across with 5-6 petals. Flowers mid-season to late. Tuyama says that though the name means "Korean Camellia" it has no relationship with Korea. Different readings: 'Chohsen-tsubaki', 'Cyôsen'(tsubaki). Originated in Japan. Note: Although Tuyama describes this cultivar as the same as the ancient **Chôsen-tsubaki,** it has now been generally accepted that the modern **Chôsen-tsubaki** is different. See *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.14 & p.292 and Seibundô Shinkôsha, 1979, *Senchinshû,* p.98 & p.231.

Chôsen-kotsubaki. (Korean Small Camellia), *(C.japonica),* Shirai-Bunko, 1789, *Shoshiki Hanagatachô:* Deep red, very small, blooms thickly. See Kyôto Engei Kurabu, 1964, *Tsubaki Tokushû,* No.5, p.79. Originated in Japan. (Believed extinct.)

Chô Shinji. ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.5. Different reading for **Chôshinji.**

Chôshinji. (Chôshin Temple), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.198, colour photo and description: Small size, billiant, deep red, open, cup-shaped single, with 6 overlapping, channelled petals, some margins incurved, and a central stamen cylinder with pinkish filaments, joined for the lower half, and bright yellow anthers. Blooms very early to mid-season. Leaves mid-green, elliptic, apices tapering acuminate, margins serrate. Originated in the Toyama Prefecture, Japan. An old tree thrives in a temple in Fukumitsu Town. Named and released by Takeo Ogawa in 1979. Different reading: 'Chô Shinji'.

Chôshô. (Derisive Smile), (Higo), Taniguchi, 1912, *Chinka Kyokan;* Hiratsuka, 1964, *Higo Tsubaki,* p.14 & p.41, pl.70: White splashed pink. See also colour photo Adachi, 1960, *Camellia. Its Appreciation and Artistic arrangement,* p.58 and Seibundô Shinkôsha, 1979, *Senchinshû,* p.98 & p.231: Linear red spots on white background. On outside of petals there is an irregular red line. The flower opens evenly. Stamens spreading, filaments white, pistil pale green, Size, medium small. Midseason flowering. Leaves, medium size, long-elliptic. Originated in Kumamoto Prefecture, Japan.

Chôshun. (Long Spring), *(C.rusticana),* Tuyama, 1968, *Camellias of Japan,* p.157, pl.225: Leaves, narrowly elliptic to elliptic, olivaceous green, loosely undulate, dull-shining, veins flat, manifestly serrate, 7.9-8.8 cm long by 4.1-4.3 cm wide, petioles, 5-9 mm long, hairy. Flowers, peony type, deep rose, (Crimson 22/1), paler on periphery; petals, 12-16, the largest, 6.1 cm x 5.1 cm, emarginated, arcuated outwards; packed with many irregular petals and petaloids in the centre. Androecium, 2.2-2.5 cm high, stamens scanty, filaments pink. Gynoecium lacking. Flowering period short, late. Originated in Mr Usujima's private garden, Makiyama, Yatsuo-machi, Toyama Prefecture, Japan.

Chôshun. (Long Spring), *(C.hiemalis),* Hakoda, 1987, JCS, *Tsubaki,* No.26, p.48; ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.38: Medium size, peach pink, informal peony form.

Blooms early to mid-season. Discovered by Katsuhiro Maeda in Hanamatsu City, Shizuoka Prefecture, Japan in 1972, named by Fusako Yamasaki..

Chris. *(C.japonica), American Camellia Yearbook,* 1966, p.86, Reg. No.886: A peony form, light pink chance seedling, originated by Owen D. Edge, Columbus, Georgia, USA. Plant growth is spreading and average in rate with light green pointed leaves, 10 cm x 5 cm.The flower is light pink, blending to a lighter pink towards the centre. It is 11 cm across by 6 cm deep. Anthers are yellow. Bloom formation is similar to **Spring Sonnet.**

Chris Bergamini. *(C.japonica),* ACS, *The Camellia Journal,* Nov.1999, Reg. No.2508. Details given incorrect. Originated by Don Bergamini, Martinez, Calif., USA. *American Camellia Yearbook,* 1999, p.5, colour photo before p.1. An anemone form chance seedling. Colour is white with varying and very prominent stripes and patches of pink and red. The 10 year old seedling first flowered in 1995. Flowers are 5.7-8.2 cm across x 1.2-1.8 cm deep, with 12-16 petaloids and 50-70 petaloids. Flowers profusely. Plant growth is upright and average with dark green leaves 7.5-9 cm long x 3.8-5 cm wide.

Chris Jubilee. *(C.japonica), Camellias*, Y.C. Shen, 2009, p.105 with colour photo; Anemone form, 7-9 cm diameter, white outer petals boldly striped with burgundy red, central petaloids a mixture of burgundy and white.

Chris Lee. *(C.japonica), American Camellia Yearbook,* 1992, p.31, Reg. No.2251: Originated by Dr O.V. Lewis, Picayune, Mississippi, USA. The 30 year old seedling first flowered in 1970. A large bright red, anemone form chance seedling, blooms early to late. Flower size 12.5 cm across x 8 cm deep with 40 petals and 7-8 petaloids, yellow anthers on white filaments. Petals heavily veined, petaloids streaked with white. Plant growth is upright and average with dark green leaves 9 cm long x 5 cm wide. Colour photo between pp.80-81.

Chrissie. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1952-1953; Fendig, 1952, *American Camellia Catalogue:* Large, semi-double to incomplete double, pure white, 10 cm across by 4 cm deep. The flower is cup shaped. The petals are large and crinkled around the top margins. More than 200 fragile stamens with golden anthers. Similar to **Gauntlettii.** In the incomplete double formation, erect petals in the centre, mix with fascicles of stamens with creamy filaments, anthers dark yellow. Leaves, lanceolate, medium dark green, 7.5 cm long by 4 cm wide. Serrations, holly-like, turned down. A seedling of 'Magnoliiflora', (**Hagoromo**) probably fertilized by **Gauntlettii,** named for Mrs Christine Holland. Originated in USA.

Chrissie's Retic. *(C.reticulata* hybrid), *New Zealand Camellia Bulletin,* vol.XV, No.5, P.24, 1988, Reg. No.249: Originated by Neville Haydon, Auckland, New Zealand. An 8 year old chance seedling that first flowered 1984 on a typical plant, upright, dense and average in rate. Leaves average, 11 cm x 5 cm, dark green. The peony form flowers have about 22 petals and the odd petaloid, yellow anthers, white filaments. In size they are 13 cm across x 7 cm deep, white in the centre, shading to pale pink at the edge (RHS.CC.Red Purple 57D). Chinese synonym: 'Kelixi'.

Christine Ann. *(C.japonica), New Zealand Camellia Bulletin,* 1992, Issue No.112, vol.XVII, No.5, p.37, Reg. No.316: Originated by Myrtle T. Kennedy, Whangarei New Zealand. An 8 year old chance seedling that first bloomed in 1989. The plant is of average growth and habit, and the leaves are mid-green with good serrations and measure 9 cm x 4 cm. The flower is anemone form with a large boss of petaloids and 6 wavy petals. Average flower size is 10 cm across and coloured wildwood pink (RHS.CC.58C). The anthers are yellow with pale pink filaments. Flowers early to mid-season. Holds well, having firm textured petals that stand up through the centre.

Christine Collins. *(C.japonica)* ACS, Yearbook 2011, p.139 with colour photo; Regn No.2816. A 25 year old seedling, first flowered 1996. Originated by James P. Taylor, Quitman, Ga., USA, and registered by Christine T. Collins. Propagated by Mark Crawford, Loch Laurel Nursery. Medium to large flower, 10 cm diameter x 7.5 cm deep with 50 petals. Semi-double to loose peony form is blush pink, and has a slightly flared ring of stamens with yellow anthers and white filaments. Slow, upright growth. Dark green leaves are 10 cm x 6.5 cm.

Christine Dodd. *(C.japonica),* ACS, *The Camellia Journal,* Nov. 1999, p.19, Reg. No.2511. *American Camellia Yearbook,* 1999, p.5, colour photo before p.1. Originated by Tom Dodd, Semmes, Ala., USA. A semi-double chance seedling with deep pink outer petals and light pink to white inner petals. Flowers mid-season The 15 year old seedling first flowered in 1989. Average flower size is 13.5 cm across x 2.5 cm deep, with 24 petals (the outer folded petals give bloom its star shape), 4 petaloids, yellow anthers and filaments. Plant growth is upright and spreading, with dark green leaves 9 cm long x 5 cm wide.

Christine G. *(C.japonica), American Camellia Yearbook,* 1980, p.161, Reg. No.1627: A large, medium rose-red peony form *C.japonica* chance seedling, early to mid-season flowering, originated by Paul Gilley, Grandridge, Florida, USA. Average flower size is 12.5 cm across by 6 cm deep with 40 plus petals and yellow filaments. Flowers long lasting and good texture.

Christine Gonos. (*C.reticulata* hybrid) ACS 1994, *The Camellia Journal,* vol.49, No.3, p.34, Reg. No.2301; *American Camellia Yearbook,* 1994, p.60: Originated by Jack Mandarich, Menlo Park, California, USA. A seedling of *C.reticulata* hybrid **Mouchang** x (**Mrs D.W. Davis** x **Estella d'Ancona**). Large to very large; flowers pink. Blooms mid-season to late. The 10 year old seedling first flowered 1983. Average size bloom is 12.5 cm across x 6.2 cm deep. with

50+ petals. Plant growth is upright and spreading, open and average inrate with dark green leaves 8.7 cm long x 6.2 cm wide. Colour pl. between pp.64-65.

Christine Lee. *(C.japonica),* Gerbing's Azalea Gardens Catalogue, 1938-1939: Large, semi-double pink flower with stamens in centre, 10-12.5 cm across, late flowering. Small, glossy foliage, tall, upright grower. See black and white photo, Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.I, p.83. Originated from a seedling of unknown parentage by Dr W.G. Lee, Macon, Georgia, USA and named for his first wife. Sports: **Christine Lee Variegated, Christine Red Sport.** Not to be confused with the variety **Enchantress,** which was distributed under the name 'Christine Lee'. Chu-hung Chü-pan. Chuang, 1959, *Yunnan Shancha Hua.* Different reading for **Zhuhong Juban.**

Chü Pan. Fang, 1930, *Tiannan Chahua Xinozhi.* Different reading for **Juban.**

Chu Ting Hung. Chen, 1955, *Guan Shan Shumuxue.* Different Reading for 'Zhudinghong'.

Chuan Chu. Chang & Chang, 1867, *Pentsao Kangmu.* Different reading for **Juanju**. The Japanese reading is 'Kushitama'.

Ch'uan-chu Ch'a. Watanabe & Andoh, 1980, *Tsubaki, Hana to Kino Bunka,* erroneously as 'Huan-chu-cha'. Different reading for **Chuanzhu Cha.** Japanese reading: 'Kushitama-cha'.

Chuan Chu Hua Shu. Old Chinese name for Camellia. Synonym for *Shan Cha Hua.*

Chuandanzi. (String of Beads), *(C.japonica),* Shanghai Botanic Garden's List, 1985. No description. Originated in China.

Chuandiaozhong. *(Enkianthus cinque* flowers), *(C.japonica),* Shanghai Botanic Garden's List, 1985. No description. Originated in China.

Chuanfurong. (Sechuan's Hibiscus), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.52, No.333, colour photo No.192: Large size, 8-11 cm across, crimson, semi-double of 10-20

petals, with a brushlike stamen cluster with small, golden anthers. Blooms mid-season. Originated in Sechuan Province, China.

Chuangzhongyue. (Moon in the Window), Gao & Zhuang, 1989, *The Camellia in China,* p.78, No.600. Chinese synonym for the Japanese sasanqua **Mado-no-tsuki.**

Chuanmanao. (Sechuan's Agate), *(C.japonica),* Gao & Zhuang, 1989, *The Camellia in China,* p.52, No.331, colour photo No.190: Medium size, 6-9 cm across, deep red with white variegation, formal double. Leaves deep green, broad-ovate. Blooms early to mid-season. Originated in the Sechuan Province, China.

Chuanmudancha. *(C.japonica), Chinese Camellia Culture,* 2003, Appendix, p.570; Robust plant with horizontal branches. Leaf elliptic, yellowish green, 7.5-10 cm x 4-5.5 cm. Flower spinel red, 11-13 cm diameter. About 10 petals, flat in 2-3 rows, bases joined, large and thick, veins obvious, irregularly arranged. Some petaloids and stamens. Flowers early to late. From Sichuan Province, China.

Chuan Pan. Waterhouse, 1970, ACRS., *Camellia News*, No.40, p.7. Different reading for **Juanban.**

Chüan-pan Mou-tan. Yü & Bartholomew, 1980, *American Camellia Yearbook,* p.27. Different reading for **Juanban Mudan.**

Chüan-pan Tieh-ch'ih. Yü & Bartholomew, 1980, *American Camellia Yearbook,* p.25. Different reading for **Juanban Diechi.**

Chuanzhu Cha. (String of Pearls Camellia), *(C.japonica),* Li, Shizhen, 1590, *Benceo Gangmu;* Fang, 1930, *Tiannan Chahua Xiaozhi*, according to Bartholomew, *American Camellia Yearbook,* 1982, pp.147-155: The petals are fragmented and piled up and the colour is pink. See Gao & Zhuang, 1989, *The Camellia in China,* p.48, No.290. Originated in China. Different reading: 'Ch'uan-chu-ch'a'.

Chûbon. Watanabe, 1970, Kyôto Engei Kurabu *Tsubaki Tokushû,* No.10, p.116. Different reading for **Chûhon.**

Chûbu-benibotan. *"Sasanquas, The Winter Flowers",* ICS Congress, Kurume 2010, English translation p.65; Synonym for **Benibotan (Chûbu).**

Chûbu-chûjôhaku. (Chûjô's White from Chûbu), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.96, colour photo, p.230, description as 'Chûbu-chûjyôhaku': White, single, medium size flower, opening evenly, 8-10 cm across, 6-7 large, crinkled and creped petals, a large number of stamens, spread out like a Higo, with an occasional anemone centre. Leaves, wide elliptic, undulate, medium size, acuminate apex, dark green. Originated in Chûbu, Japan.

Chûbu-goshiki-tsubaki. (Five Coloured Camellia from Chûbu), *(C.japonica),* Yokoyama, 1975, *Gendai Tsubaki Meikan:* Seibundô Shinkôsha, 1979, *Senchinshû,* p.96, colour photo, p.230, description: Single, campanulate bloom of 5-6 petals, inner curved, large, rounded with a deep pink throat fading to a broad, white border on petal margins, or white with pink stripes or solid pink or pure white. Leaves, ovate, dark green, size, medium small, apex acuminate. shallowly serrate, flat. See colour photo, p.59, Katei Gahô, ea., 1984, *Chabana Koyomi Vol.1, Tsubaki.* Synonym: 'Owarigoshiki-tsubaki'. Often used for the tea ceremony. Originated in Chûbu, Japan.

Chûbu-hakubotan. (White Peony from Chûbu), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.294, colour photo and description: Medium to large size, white, semi-double, opening through a spherical shape, 2-3 rows of emarginate, concave, overlapping petals and an irregular, central stamen cluster with yellow anthers. Late blooming. Leaves deep green,

broad-elliptic, flat, apices acuminate, margins shallowly serrate. see Sato, 1973, *Chûbu no Tsubaki,* p.103 erroneously lists this as 'Hakubotan'. Originated in Chûbu, Japan.

Chûbu-hakutaka. (White Hawk of Chûbu), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.I, 1972 p.62, pl.77, description, p.302: A white, single campanulate to cupped flower with 5-6 large, waved petals and a splayed centre of about 125 stamens, filaments milk white, Flower reaching about 10 cm across. Blooms early to late. Leaves, dark green, long-elliptic, thick, dull surface. Discovered in Sufu'e Machi, Nakajima Sub-prefecture, Aichi Prefecture Japan, by Satô and named by him.

Chûbu-hakutsuru. (White Crane of Chûbu), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.I, 1972, p.82, pl.142, description, p.313; Seibundô Shinkôsha, 1979, *Senchinshû,* p.112 & p.237 as 'Hakutsuru-Chûbu': A white with fine, dark red lines, campanulate single of 5-7 large, rounded petals with reflexed apices. A large, central column of about 120 stamens with dull, yellow anthers and whitish filaments, becoming brush shaped. Early to mid-season flowering. Leaves, broad-elliptic, suddenly acuminate, glossy, dark green, obscure venation, serrulate margins with reflexed apex. Satô, 1975, *Chûbu no Tsubaki,* p.22, erroneously lists this as 'Hakutsuru'. Synonym: 'Hakutsuru-Chûbu'. The original tree was planted in the garden of Nagoya Castle and called one of the three castle camellias with **Daijôkan** and **Chûbu-tamatebako**, but destroyed in World War II. Originated in Japan.

Chûbu-hanafûki. Seibundô Shinkôsha, 1979, *Senchinshû,* p.229: This was the old name for the present day **Dainagon,** but was also used as a synonym for **Chûbu-tamadare.**

Chûbu-hanamiguruma. (Chûbu Flower Viewing Carriage), (Higo), *Encyclopedia of Camellias in* Colour, vol.I, 1972, p.74, pl.116, description, p.308 as 'Chûbu-hanami-guruma'; Yokoyama et al. 1975, *Gendai Tsubaki Meikan,* p.167: A medium size, 5-6 petalled single about 7.5 cm across, white, with streakings and pepperings of pink and red. Flowers open evenly, with large, rounded petals and a typical Higo burst of about 130 stamens. Flowers early to mid-season. Leaves, wide-elliptic, medium size, thick, flat, dull, light green. There is a mutation with a white, ornamental border. See Seibundô Shinkôsha, 1979, *Senchinshû,* p.96 & p.230. Resembles **Hanamiguruma** but leaves are smaller and undulate, and flower colour paler. Originated in Chûbu, Japan.

Chûbu-hatsugasumi. (First Mist in Chûbu), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon No Chinka,* p.106; ICS., Apr.1990, *Japanese Camellia* Cultivar List, p.5: Medium size, pale pink, bowl-shaped single with embracing petals. Blooms mid-season. Originated in the Chûbu District, Japan.

Chûbu-hatsukari. ('Hatsukari' from Chûbu), *(C.japonica),* Satô, 1975, *Chûbu* no *Tsubaki:,* p.12 lists this as 'Hatsukari' but the name was changed later to 'Chûbu-hatsukari' to avoid confusion. Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.50, colour photo, p.51, description: A white, medium size, campanulate single, with 5-7 reflexed petals with irregular margins. Large, central column of about 120 stamens with milk white filaments, joined for the lower half and yellow anthers. Flowers early to mid-season. Leaves, broad-ovate, coarsely serrate, apices abrupt acute, dark green. Originated in the Chûbu District, Japan. Synonym for **Hatsukari (Chûbu).**

Chûbu-higurashi. (Chûbu Twilight), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.97, colour photo, p.230, description: Large, semi-double, 14-16 petals in 2-3 rows standing apart, white with streaks and marks of crimson and, sometimes a white border. Large, slender, elliptical leaves with shallow serrations and veins slightly raised. Sport: **Momoji-no-higurashi.** Originated in Chûbu, Japan.

Chûbu-hinazuru. (Crane Chick from Chûbu), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka.* p.71, colour photo and description: Small size, white, cup-shaped single with thick, compact petals and a central stamen column, pinched in at top, filaments white, joined for lower half, with yellow anthers. Blooms early to late season. Leaves dark green, broad-elliptic. Originated in the Chûbu District, Japan.

Chûbu-kaguyahime. (Kaguya Princess in Chûbu), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.279. colour photo and description: Medium size, soft pink with red splashes, campanulate single with 6 petals, and a central stamen cylinder with white filaments, joined for the lower third, and yellow anthers. Blooms early to mid-season. Leaves deep green, broad-elliptic, apices abrupt acute, margins shallowly to obscurely serrate. Originated in the Chûbu District, Japan. A seedling of **Tatsuta-nishiki.**

Chûbu-kamakura-shibori. (Chûbu Kamakura Dappled), *(C.sasanqua),* Seibundô Shinkôsha, 1970, *Garden Life,* No.36, p.119: Medium size, single of 5 petals. Light red, heavily marked white. Originated in Chûbu District, Japan. This is a possible synonym for 'Kamakura-shibori' as a synonym for the *C.sasanqua* **Shokkô-nishiki.**

Chûbu-kanbotan. (Winter Peony from Chûbu). *(C.hiemalis). Nippon Tsubaki - Sasanqua Meikan,* 1998, p.320. English translation p.242. Medium size, deep peach red, double. Flowers early to mid-season. Leaves narrowly elliptic, somewhat small. Spreading, vigorous growth. Origin unknown, has been sold in Shizimu City on the northern bank of Lake Hamana as 'Benibotan'. Considered to be a natural seedling of **Shishigashira.** From Shizuoka Prefecture.

Chûbu-kimigayo. ('Kimigayo' in Chûbu), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.95, colour photo, p.230, description: A white, open, informal, incomplete double, large, 10-11 cm across, with thin, translucent petals, particularly towards the edges, which are fluted and waved. The stamens are broken into fascicles by small, erect, creped, centre petals. Leaves, medium size, mid-green, shallowly serrate, margins twisted, reflexed with impressed venation. Originated in Chûbu, Japan. See colour photo & description in Satô, 1975, *Chûbu no Tsubaki,* p.88 which erroneously lists this cultivar as 'Kimigayo'. There is also a cultivar of the name **Kimigayo** from the Kantô District which has a cylindrical stamen cluster.

Chûbu-kyôkosode. Synonym for **Saifu.**

Chûbu-kumagai. (Kumagai is a hero in a Kabuki Drama), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.95, colour photo, p.230, description: A crimson, single to semi-double 9 cm across, with 9-11 large, round, fluted petals. The flower is a higo-like form with a large, rounded, central boss of 200 stamens with yellow anthers, late blooming. See Satô, 1975, *Chûbu no Tsubaki,* p.112 which erroneously list this cultivar as 'Kumagai'. Resembles **Higo-hagoromo**. Originated in Chûbu, Japan.

Chûbu-kusudama. Synonym for 'Kusudama' as synonym for **Yuba-shibori.**

Chûbu-manazuru. (Flying Crane in Chûbu), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.I, 1972 p.82, pl.140, description, p.311; Seibundô Shinkôsha, 1979, *Senchinshû,* p.248 as 'Manazuru-Chûbu'. A medium size, 7-8 cm across, cup shaped, white bloom with rare, fine crimson lines on 6-7, large, rounded petals, reflexed and wavy at the apex. A central column of stamens of large diameter with creamy white filaments and golden anthers. The pistil protrudes before opening. Blooms mid-season. Leaves, glossy, dark green, wide-elliptic. A red striped variegation of **Kamohonnami.** Different reading: 'Manazuru-Chûbu'. Originated in Chûbu, Japan.

Chûbu-meigetsu. (Full Moon in Chûbu), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.97, colour photo, p.230, description: A medium size, 7-8 cm across, white, campanulate, single

flower of 7-8 irregular petals; outer, recurved; central column of stamens with yellowish filaments and deep golden anthers. Early flowering. Leaves, elliptic, tapered acuminate apex, prominent venation, margins finely serrulate. Sometimes erroneously marketed as 'Haku-myôrenji'.

Chûbu-moshio. Seibundô Shinkôsha, 1979, *Senchinshû,* p.252. Synonym for **Yae-hime.**

Chûbu-murui-shibori. ('Murui-shibori from Chûbu), *(C.japonica),* Seibundo Shinkôsha, 1989, *Senchinshû,* p.251. Resembles **Murui-shibori.** Originated in Chûbu, Japan. Synonym: 'Murui-shibori-Chûbu'.

Chûbu-myôjô. ('Myôjô' from Chûbu), Yokoyama & Kirino, 1989, Nihon 1989, *Nihon no Chinka,* p.242: White moires on red ground, single, tubular form, medium size. A seedling of **Iwane-shibori.** Originated in the Chûbu district, Japan.

Chûbu-senbazuru. ('Senbazuru' from Chûbu), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.64, description, p.65, colour photo: Small sized, vase-shaped single of 5 rounded petals and a central stamen cylinder with white filaments, joined for lower third, and light yellow anthers. Blooms mid-season. Leaves glossy, dark green, slender, elliptic, apices acuminate, margins serrulate. A bushy plant. Originated in the Chûbu district, Japan.

Chûbu-setsugekka. ('Setsugekka' from Chûbu), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.96, colour photo, p.230, description: An average size, 6-7 cm across, 5 petalled, saucer-shaped single, pale pink ground, peppered with pink dots and small dashes. Central ring of stamens, filaments creamy, anthers light yellow. Leaves, dull green, wide-elliptic, medium size, acute apex, wavy with prominent venation. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.254 colour photo. Originated in Chûbu District, Japan. Resembles **Setsugekka,** but which has white ground and occasionally produces a pure white flower, and its leaves are strongly twisted compared to **Chûbu-setsugekka.**

Chûbu-shikainami. *Encyclopedia of Camellias in Colour,* vol. I, 1972, p.145, pl.328, description, p.339: A semi-double to open, incomplete double peony form, with 2-3 rows of large, imbricated outer petals, 10 in number, and some small, erect centre petals breaking up the stamen cluster. Bloom is 10 cm across, very pale pink to white, colour deepening in the throat and venation, some streaks of crimson. Filaments milk white. Blooms mid-season. Leaves, wide-elliptic, thick, lustrous green, sometimes showing yellow variegation. Plant habit side spreading and vigorous. See Yokoyama & Kirino. 1989, *Nihon no Chinka,* p.372, colour photo. Synonym for **Shikainami-Nagoya** by Tuyama, 1968, *Camellia of Japan,* p.187, pl.368. Seibundô Shinkôsha, 1979, *Senchinshû,* p.66 & p.219, 'Shikainami-Chû', resembles **Shikainami** but the flower is larger and the plant more vigorous. Satô, 1975, *Chûbu no Tsubaki,* p.73 erroneously lists this cultivar as 'Shikainami'. Sport: **Shikainamibeni.** Originated in Chûbu District, Japan.

Chûbu-shirodaikagura. (White Daikagura from Chûbu), *(C.rusticana),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.230: White, in the initial period of opening it is minutely marked with pink, an open peony form with scattered fascicles of stamens intermixed with the central petals. Large size. Early blooming. Leaves, long-ovate, medium size, acuminate apex, slightly keeled at midrib, otherwise flat, petioles hirsute. Has some resemblance to **Shiro-daikagura** even in flowering periods. Originated in the Chûbu District, Japan.

Chûbu-taiyô-nishiki. (Brocade of the Sun - Chûbu), *(C.japonica),* Sakata et al., 1981, "Studies in the Flower Colour of Camellia, II"; *Memoirs of the Faculty of Agriculture, Kagoshima University,* vol.XVII, p.89. Sakata & Arisumi, 1983, *International Camellia Journal,* p.20. No description. Originated in Japan.

Chûbu-tamadare. (Chûbu Pedant Gems), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.II, 1978, p.155, pl.378, description, p.253; Seibundô Shinkôsha, 1979, *Senchinshû,* p.96 & p.230: A bowl shaped, deep pink, double, 16-20 petals, large, rounded, outer rows embracing a centre of some erect petals, intermixed with stamens. Leaves, wide-elliptic, large, thick on a spreading tree. Flowers early to mid-seasom. The stamens are cylindrical, though of irregular length, with occasional petaloids. It resembles the Kantô **Hanafûki** but flowers earlier, its colour is darker and the leaves larger. It is an ancient specimen which existed in olden times in Inazawa, the Aichi Prefecture where it was called 'Tamadare'. Synonym: 'Chûbu-hanafûki'.

Chûbu-tamanokoshi. Synonym for 'Tamanokoshi-Chûbu' as synonym for **Tama-nokoshi.**

Chûbu-tamatebako. (Treasured Cabinet from Chûbu), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.1, 1972, p.148, pl.337, description, p.341; Seibundô Shinkôsha, 1979, *Senchinshû,* p.96 & p.230: A large, white with rare slender crimson lines, globe shaped semi-double of about 18 petals in three layers, enclosing a somewhat irregular stamen cluster with white filaments. Flowers mid-season to late. Leaves, broad-ovate to broad-elliptic, thick with a short rounded apex, raised midrib and obscure venation. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.385, colour photo. Originated in Chûbu District, Japan. Resembles **Tamatebako** which has pure white flowers without any crimson marks as **Chûbu-tamatebako.** Note: Satô, 1975, *Chûbu no Tsubaki,* erroneously lists this cultivar as 'Tamatebako' which is a different cultivar. The original tree was in the garden of the Nagoya Castle, Nagoya City as one of the three "Goten Tsubaki", the castle camellias, with **Daijôkan** and **Chûbu-Hakutsuru.**

Chûbu-tônishiki. (Chûbu Chinese Brocade), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.1, 1972, p.154, pl.361, description p.345: A medium size, loose, informal double of soft pink, fading to white at the petal margins, with the petals veined deeper pink towards their base. Two rows of large, rounded guard petals, 120 in number, enclose groups of erect, ruffled petals, forming the stamens into 5 fascicles with milk white filaments. Mid-season flowering. Leaves, medium sized, broad-elliptic, light green. Originated in Chûbu District, Japan. Note: The Kantô cultivar reading **Kara-nishiki,** (same characters) is a different variety. Resembles **Hikarugenji.** Synonyms 'Kurume-genji' from Seibundô Shinkôsha, 1979, *Senchinshû,* p.96 & p.230, and 'To-nishiki' in Tuyama, 1968, *Camellias of Japan,* pl.383, & p.203 & Satô, 1975, *Chûbu no Tsubaki,* p.87.

Chûbu-tsukimiguruma. (Chûbu Moon Viewing Carriage), *(C.japonica), Encyclopedia of Camellias in Colour,* vol.1, 1972, p.50, pl.38, description, p.296; Seibundô Shinkôsha, 1979, *Senchinshû* p.96 & p.230; Satô, 1975, *Chûbu no Tsubaki,* p.74, erroneously as 'Tsukimiguruma': Medium size, 8-9 cm across, single pink, with colour softening to white towards the centre; 5-7 large, rounded, reflexed petals with their tips becoming deep pink, surrounding a large, spreading stamen cluster, in a ring form, with yellow filaments and anthers. Blooms mid-season. The flower is somewhat Higo like in form. Large, lanceolate to ellipic, flat, dark green leaves with well defined venation, long tapered apex and serrulate margin. Habit is erect and bushy. An old variety grown at the Higashiyama Botanic Gardens, Nagoya City, Japan, believed to be synonymous with the old Edo cultivar, 'Tsukimi-guruma', (Kamegorô, 1859), which is one of the 'Sanzuma" *three spouses* with **Yukimiguruma** and **Hanamiguruma,** implying that these varieties were loved as if they were wives, by the ancient camellia growers. See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.128, 129, colour photo. Synonyms: 'Goshozakura' and 'Tsukimiguruma-Nagoya'.

Chûbu-tsurikagari. (Hanging fire basket - Chûbu), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.96, colour photo, p.230, description: Large, 10-11 cm across, semi-double crimson, moired and figured with white. Three rows of petals around a small, cylindrical

stamen cluster, lotus form, sometimes divided by 1 or 2 small, twisted, centre petals. Leaves, medium size, lanceolate-elliptic, dark green with defined venation, undulate, margins serrulate, apex acute; petiole hirsute. A variegated form of **Yae-hime.** Originated in the Chûbu District, Japan.

Chûbu-yatsuhashi. (Chûbu Eight Bridges), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.97, colour photo, p.223, description: Medium size, single flower, almost triangular in shape with 3 large, reflexed petals and 2 or 3 small petals, a large ring of hooded stamens with light yellow anthers. Flower colour is white with streaks and peppering of pale red or pink with red streaks, or pure white. Mid-season flowers. Leaves, medium size, long-elliptic, reflexed, dull, dark green, apex blunt acute and margins serrulate. Originated in the Chûbu District, Japan.

Chûbu-yobukodori. (Chûbu Cuckoo), *(C.japonica),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.97, colour photo, p.223, description: small size, 6-8 cm across, 5 petalled, campanulate, palest pink single with a solid stamen cluster, a little pinched in at the top, white filaments, golden anthers. Blooms early. Leaves, small, long-elliptic to lanceolate, long tapering apex, reflexed and waved, light green. Synonym: 'Owari-yobukodori'. Originated in Chûbu District, Japan. Resembles **Yobukodori** which blooms mid to late season and has larger flowers.

Chudie. (Chuxiong Butterfly), *(C.reticulata),* Feng Guomei, 1989, Chuxiong Camellia Catalogue, with colour illustration: Large, 11-13 cm across, open peony form bloom, with wavy erect petals. Light red colour. Mid-season blooming. Originated in Chuxiong, Yunnan, China.

Chueh Chueh Hua. Waterhouse, 1970, ACRS., *Camellia News,* No.40, p.9, Different reading 'Quequehua'. (Speckled Flower). Ikeda, 1976, *American Camellia Yearbook,* says that this is a missreading of the characters of Chuang's *Yunnan Shancha Hua,* 1959 for 'Kuai Kuai Hua' which is a different reading for **Guaiguaihua,** (Broken Pieces Flower). It is probably a synonym for **Damanao**.

Chuguang. Gao, Jiyin, 1998, *The World's Best Camellia Cultivars*, p.160. Chinese synonym for *C.hiemalis* **Hatsuhikari.**

Chûgûji. (Chûgûji Temple). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.165 with colour photo; English translation p.113. Pale pink, tubular stamens, cupped petals in early stages of blooming, cylindrical stamens. Flowers early to late. Leaves elliptic, medium size, margins bent outwards. Upright growth. A natural seedling of **Hatsu-arashi.** Named by Saikô Nishino, the head priest of Chûgûji Temple, released by Taneo Okada in 1977. From Osaka.

Chûhaku. Itô, Ihei, 1710, *Kadan Chikinshô,* vol. 2: Medium size, twofold red with white spots. Points of corolla are sharp. Different reading for **Nakajiro.**

Chuhkyoh-bijin. Andoh, 1971, *Tsubaki, Meika no Shôkai to Saibai.* Different reading for **Chûkyôbijin.**

Chûhon. (Medium Quality), *(C.japonica),* Itô Ihei, 1695, *Kadan Chikinshô,* vol.I; Yashiro, 1841, *Kokon Yôrankô,* vol.306: Single, white flower, daubed with pretty red freckles. Tubular stamens. Kasuya, Kamegorô, 1859, *Tsubaki Irohanayose Irotsuki:* Small size, white single. Resembles **Asukayama.** (Believed extinct.) Originated in Japan. Different reading 'Chûbon'.

Chuhuang. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias,* p.416; Chinese synonym for the Japan *C.hybrid* **Shokô.**

Chu-hung Chü-pan. Chuang, 1959, *Yunnan Shanchan Hua.* Different reading for **Zhuhong Juban.**

Chuhungtsueban. Ikeda, 1976, *American Camellia Yearbook,* p.144. Different reading for **Zhuhong Juban.**

Chui Hsin. Chuang, 1959, *Yunnan Shancha Hua.* Different reading for 'Juixin'.

Chuishangjiao. Gao, Jiyin, 2007, *The Identification....Outstanding Camellias*, p.415; Chinese synonym for the Japan *C.japonica* **Fukiage-shibori.**

Chuizhi Jinxin. (Weeping Branch - Gold Heart), *(C.japonica),* Wang & Yu, 1981, *Shancha Hua:* Single red with golden stamen cluster. Originated in China. See Gao & Zhuang, 1989, *The Camellia in China*, p.33, No.139.

Chûjôhaku. (Chûjôhime's White), *(C.japonica),* Minagawa, 1934, *Chinkashû;* Tuyama, 1968, *Camellias of Japan,* p.13, pl.25, description, p.92; Seibundô Shinkôsha, 1979, *Senchinshû,* p.230: Pure white bush camellia, occasionally anemone form. Petals.8-10, laxly wavy, wrinkled, incised at apex. Stamen cluster, broad and short; stamens numerous and scattered. Flowers early to late. Leaves, ovoid-elliptic, suddenly tapered apex; petioles glabrous. Chûjôhime is a famous princess from a Kabuki drama and in this case it probably means a "White Silk Dress". 'Chôjô' is also an ancient name for the Imperial Guards who wore white silk uniforms. Different readings: 'Chûjôjiro', 'Chûjôshiro'. Originated in in the Kansai District, Japan.

Chûjôhaku (Chûbu). (Chûjohime's White). *(C.japonica), Nippon Tsubaki - Sasanqua Meikan,* 1998, p.165 with colour photo; English translation p.114. Medium size, white, flat single, circular stamens with occasional creamy petaloids. Flowers early to late. Leaves broadly elliptic, large, waved. Spreading growth. Appeared in *Chûbu Tsubaki Meikan* in 1933.

Chûjôhime. (Chûjô Princess), *(C.hybrid),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.27: Small size, pale pink, imbricated double from Niigata Prefecture, Japan. Blooms early to late. Fragrant. A seedling of *C.japonica* var. *rusticana* **Tsuzumi-oka** x *C.lutchuensis. Nippon Tsubaki - Sasanqua Meikan,* 1998, p.165 with colour photo; English translation p.114. Parentage stated to be **Tsuzumi-oka** x *C.hiemalis.* Named and released by Kaoru Hagiya in 1987.

Chûjôjiro. Tuyama, 1966, *Camellia Cultivars of Japan.* Different reading for **Chûjôhaku.**

Chûjôshiro. (Chûjôhime's White), (Higo), Taniguchi, 1912, *Chinka Kyôkan:* White, medium size, single Higo camellia. The same characters as **Chûjôhaku** but a different cultivar. Originated in Japan. Synonym: 'Chôjishiro'.Different reading: 'Chûjôhaku'.

Chûkan. (obscure), *(C.japonica),* Hirayama, Tokuo, (Late 17th Century), *Tsubaki Byôbu.* No description. See Watanabe, 1961, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.2, P.48. Originated in Japan. Different reading: 'Nakakan'. (Believed extinct.)

Chûkei-no-kaori. (Aroma of Devotion), *(C.japonica),* ICS., Apr.1990, *Japanese Camellia Cultivar List,* p.5: Large size, white, peony form. Originated in the Chiba Prefecture, Japan.

Chûkin. Sakuden, 1630, *Hyakuchinshû:* Single, large, dark red, with 7 petals, margined light pink with small pinkish petaloids in the centre. Different reading for **Hiru-no-nishiki.**

Chûkyôbijin. (Beautiful Nagoya Woman), *(C.japonica),* Watanabe, 1970, Kyôto Engei Kurabu, *Tsub*aki *Tokushû,* No.10, p.116; *Encyclopedia of Camellias in Colour,* vol.I, 1972, p.82, pl.141, description, p.312; Seibundô Shinkôsha, 1979. *Senchinshû,* p.95 & p.230: A medium size, cup formed, white single, with one or two large splashes of vermilion, 5-6 large, rounded petals with some frilled edges. Stamens about 110, spreading and short. Anthers dull gold, filaments creamy white. Mid-season flowering. Leaves, elliptic, dark green, slow acuminate, reflexed apex, margins serrulate. Different readings: 'Chuhkyoh-bijin', 'Cyûkyô-bijin', 'Chyûkyô-bijin', 'Chuh Kyoh Bijin'. Margined flower sport: **Nagoya-obi.** Originated by Asai, Shinichi, Hachikai-mura, Ama-gun, Aichi Prefecture, Japan in 1968. Registered by the Chûbu Camellia Society. Flower form resembles **Shûfûraku.** Sport: **Chûkyô-reijin.**

Chûkyô-musume. (Daughter of Nagoya), *(C.japonica),* Inazawa Nurseries Co. Ltd. Catalogue, 1962: Dark red single. Bell shaped. Originated in Nagoya, Japan. Different reading: 'Chuhkyoh-musume'.

Chûkyô-nishiki. (Nagoya Brocade), *(C.japonica),* Watanabe. 1970, Kyôto Engei Kurabu, *Tsubaki Tokushû,* No.10, p.116; Seibundô Shinkôsha, 1979, *Senchinshû,* p.230: Red perpendicular streaks on a white ground, campanulate single. Stamens a compact, central cylinder. Medium size. Mid-season flowering. Leaves, elliptic, medium size. Originated in the Chûbu District, Japan. A chance seedling, originated and released by Toshiaki Kosaki.

Chûkyô-reijin. (Nagoya's Beautiful Woman), *(C.japonica),* Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.264, colour photo, p.265, description: A sport of **Chûkyôbijin.** Medium size, light pink, margined white, wide campanulate, single with 5-6 broad, overlapping, emarginate petals, with a central stamen cylinder with white filaments, joined for the lower half, and yellow anthers. Blooms mid-season. Leaves elliptic, dark green apices acuminate, recurved, margins serrulate. Originated in the Chûbu District, Japan.

Chûnagon. (A High Court Official of the Heian Era), *(C.rusticana),* Seibundô Shinkôsha, 1979, *Senchinshû,* p.95, colour photo, p.230, description: White, medium size, campanulate single of 5-6 long petals, cleft at apex. Stamen cluster, compact, central, cylindrical; anthers yellow, filaments pale cream. Leaves obovate, long acuminate, recurved apex, margins strongly, sharply serrate. Somewhat resembles **Kaga-hassaku.** See Yokoyama & Kirino, 1989, *Nihon no Chinka,* p.50, colour photo. Originated in Ishikawa Prefecture, Japan. *Nippon Tsubaki - Sasanqua Meikan,* 1998, p.165 with colour photo; English translation p.114. Stated to be a seedling of **Kaga-hassaku.** Originated by Torao Kaneko, named and released by Ryôji Nakamura in 1950.

Chunchihlien. Feng et al., 1986, *Yunnan Camellias of China,* p.165. Different reading for **Chunzhilian.**

Chung Cho Yang. *(C.japonica),* SCCS, 1956, *The Camellia. Its Culture and Nomenclature: A* sport of 'Eighteen Scholars'. White with central portion sulphur yellow and flecked pink. It was sent from Taiwan to Ralph Peer, Hollywood, California, USA in 1954. The name in Chinese Pinyin is 'Zhongzhuoyang'.

Chung's Temple. Yang, 1965 *Camellia Varieties of Taiwan.* Orthographic error for 'Chang's Temple', synonym for **Zhangjiacha.**

Chunhua. (Spring Flower), *(C.reticulata).* Gao & Zhuang, 1989, *The Camellia in China,* p.58, No.388: Large size, spinel pink, 10-11 cm across, semi-double of 19-20 petals. Leaves medium green, elliptic, 7.2-8.5 cm long x 3.3-4 cm wide. Flowers mid-season. Originated in Tengchong, Yunnan Province, China.

Chunhui. (Spring Sunlight). (*C.reticulata). Collected Papers,* 8-11th January 1994, International Symposium on C.chysantha, p.171: "Selecting and breeding new varieties of C.reticulata": Rose form with 25-30 petals in 5-6 rows. Petal margins crimson and centre spinel pink. Diameter of flower 8-10 cm. Stamens few, single or severally from base of interior petals. Pistil degenerate and divided to base. Blooms mid-season to late. Leaves long, ovate, 8-9 cm long x 3.1-3.4 cm wide and keeled. Branched brittle. Originated in China.

Chunjiang Haoyue. (Chunjiang's Moon) *(C.japonica),* China Regn No.7. *China Flowers & Horticulture,* Sept 2006, No.18, p.48, with colour photo; A sport of **Betty Foy Sanders** found in 2000. Pure white with occasionally one or two red stripes on the petals. The Chujiang is the longest river in Zheijiang province, a branch of the Yangtzie.

Chunjiang Hongri. (Chunjiang Red Sun), *(C.japonica),* China Regn No.5. *China Flowers & Horticulture,* Sept 2006, No.18, p.48, with colour photo; A seedling of **Royal Velvet**, with male parent **Mark Alan.** Originated by Li Jiyuan, Fuyang, Zheijiang, China. Cold hardy. Flower colour red, intermediate between the parents. About 40 petals, which are pink at the base and have a radial line. Red styles, yellow stigma.

Chunjiang Jinlan. (Chunjiang Broche Orchid), (*C.polyodonta* hybrid). China Regn No.43. *China Flowers & Horticulture,* Mar 2009, No.6, p.42, with colour photo; A seedling of *C.polyodonta* with **Mark Alan** as pollen parent. Originated by Li Jiyuan, Ni Sui and Fan Zhengqi from Ningbo University and the Institute of Subtropical Forestry, Zhejiang, China. Flowers double form, 11-12 cm diameter, imbricated, deep red. Petals obovate. About 80 stamen/petaloids. Leaves elliptic to obovate, bases cuneate, apices acuminate, 5.2- 6 cm long and 3.5-4 cm wide. Flowers late season.

Chunjiang Lidai. (Chunjiang Beautiful Belt), *(C.japonica),* China Regn No.44. *China Flowers & Horticulture,* Mar 2009, No.6, p.42 with colour photo; A cross of 'Zhaicaidai' (**Margaret Davis Picotee**) with **Mark Alan** as pollen parent, originated by Li Jiyuan, Ni Sui and Li Xinlei from Ningbo University and the Institute of Subtropical Forestry, Zheijiang, China. Flowers double form in 3-4 whorls, 11-12 cm diameter. White with red dots or stripes White filaments with a pink line, anthers gold. Leaves elliptic, bases cuneate, apices acuminate, 8.2 cm long x 3.2 cm wide. Late flowering.

Chunjiang Suizi. (Chunjiang Fringed), *(C.japonica),* China Regn No. 45. *China Flowers & Horticulture*, Mar 2009, No.6, p.43 with colour photo; A cross of 'Maoyuan Daheihong' (**Clark Hubbs**) with **Midnight Magic** as pollen parent, originated by Li Jiyuan and Ni Sui from Ningbo University and the Subtropical Forestry Institute, Zheijiang, China. Flowers red, double form in 9-10 whorls, 8-9 cm diameter, imbricated. Petals about 60, outer 30 circular and fimbriated, inner petals obovate and shorter. Leaves elliptic, bases cuneate, apices acuminate, margins serrate, 8.2 cm long x 3.2 cm wide. Late flowering.

Chunjiang Xiumin. (Chunjiang Nimble Delicate), (*C.chekiangoleosa* hybrid), China Regn No.46, *China Flowers & Horticulture*, Mar 2009, No.6, p.43 with colour photo; originated by Li Jiyuan, Ni Sui and Tian Min of Ningbo University and the Subtropical Forestry Institute, Zheijiang, China. A cross of *C.chekiangoleosa* with *C.japonica* 'Zhaicaidai (**Margaret Davis Picotee**) as pollen parent. Flowers peach red double form in 9-10 whorls, 11-12 cm diameter, imbricated. Petals about 65. Leaves elliptic, bases cuneate, apices acuminate, 9.5 cm long x 3.5 cm wide. Late flowering.

Chunjiang Zhixia. (Chujiong's Summer), *(C.azalea),* China Regn No.6. *China Flowers & Horticulture*, Sept 2006, No.18, p.48, with colour photo; A bud mutation of the species *C.azalea* found by Li Jiyuan, Fuyang, Zhejiang, China in 2004. Young shoots glabrous, light purple. Leaves dark green, thick, obovate to obolanceolate. Flower bud erect, upright. 9-11 petals, more than the species type. 78-91 filaments, 2.3 cm long. Style 1.4 cm, 4-fid with arms 5 mm. Synonym; 'Chun-River Summer'

Chunjie. Gao & Zhuang, 1989, *The Camellia in China,* p.82, No.646. Chinese synonym for **Spring Festival.**

Chunmei. (Spring Charm), *(C.japonica),* Chang, Shao Yun, 1987, *Camellias from Zhejiang,* p.72, colour photo [p.125]: Double hibiscus type, medium size, 8-9 cm across x 3-5 cm deep with 2-3 rows of large, imbricated petals, 60-70 in number, and a centre of small, semi-erect petals, petaloids and stamens. Colour is pale pink with pink and red streaks; petals creped. Leaves 7.8-8.1 cm long x 4.5-5.2 cm wide, elliptic, margins serrulate, mid-green and curved, apex blunt acute, base broad-cuneate, veins prominent. Buds ovate, yellowish green. See Gao & Zhuang, 1989,

Lichtenthal, 1852, *Manuale botanico enciclopedico popolare:* Red, sometimes white, sometimes variegated. Originated in Italy.

Cidade de Narón. *(C.japonica) Camelia,* La Sociedad Española de la Camelia, No.17, Dec. 2010, p.36 with colour photo. Formal double, imbricated and tiered, red (RHSCC 45C), 8-10 cm diameter. Flowers fall complete. Leaf dark green, 7.5-8.5 cm x 4.5-5 cm, lanceolate to elliptic. Upright, bushy growth, slow to medium rate. A seedling of **Bob Hope**, pollen parent unknown, first flowered in 2007. Originated by Eusebio López Redondo, A Coruña, Spain. Flowering season late.

Cidade de Vigo. *(C.japonica),* Alfredo Moreira da Silva Catalogue, 1985-86, p.17, incorrectly as 'Cipade de Vigo'; No description. Also Catalogue 2005-06, p.4; pink and white; Ferreira & Celina, 2000, *O Mundo da Camélia,* p.77 with colour photo; Pink, spotted and marbled with white, medium to large semidouble. Flowers mid-season, strong growing plant. *La Camelia .....Diputación Provincial de Pontevedra,* 2004, p.107 with colour photo; Semidouble, sometimes peony form. RHSCC 55B. Originated in Portugal 1987-88. Orthographic errors 'Ciudad de Vigo', (illegal translation). 'Cidadade de Vigo', 'Cipade de Vigo'.

Cidade do Porto. *(C.japonica),* Ferreira & Celina, 2000, *O Mundo da Camélia,* as 'Cidade de Porto' with colour photo; p.77; Red semi-double with some central petaloids, medium size, flowers midseason. Armando Oliveira, letter, Semi-double, pink with deeper veining, last inner petals lightly twisted, bright yellow stamens, medium size. Leaves slightly serrate, not very dark grren with yellowish veining. Originated in Portugal.

Cile Mitchell. *(C.x williamsii). American Camellia Yearbook*, 1992, p.32, Reg. No.2249: Originated by Hulyn Smith, Valdosta, Georgia USA; Large light orchid pink, rose form double to formal double hybrid of *C.saluenensis x C.japonica.* Blooms early to late. The 12 year old seedling first flowered 1985. Average flower size is 12 cm across x 5.5 cm deep with up to 74 petals, some folded, and 30 petaloids, with yellow anthers and white filaments. Plant growth is upright, dense and vigorous with dark green leaves 9.5 cm long x 4 cm wide. Colour photo between pp.40-41. Chinese synonym 'Xili'.

Cile Stanaland. *(C.japonica), American Camellia Yearbook,* 1971, p.45, Reg. No.1145: An 8 year old chance seedling that first bloomed 1968, originated by Clyde R. Stanaland, Jacksonville, Florida, USA. Plant growth is spreading and medium in rate, with light, green leaves, 7.5-8.5 cm long by 4 cm wide. The peony form bloom is white with bright yellow anthers. It has 26 petals and up to 125 petaloids and measures 10.3 cm across and 6 cm deep. Flowers mid-season. Good texture and lasting qualities.

Cile Watford. *(C.japonica),* ACS, *The Camellia Journal*, Dec. 2009, p.29, Regn No. 2777. Propagated by E. Hulyn Smith, Valdosta, Ga., USA. *American Camellia Yearbook*, 2009, p.109 with colour photo; Originated by Walter Homeyer, Macon, Ga. A white, medium size, 9 cm diameter x 2.5 cm deep, rose form double. Heavy petal texture and falls in one piece. Upright, dense and vigorous growth. Dark green leaves average 9 cm x 5 cm. Flowers mid-season.

Cilie Sutton. *(C.japonica),* SCCS *Camellia Nomenclature* 2009, p.31; White with pink tinges at the petal edges. Medium size single. Vigorous, upright, spreading growth. Flowers mid-season. **Rebel Yell** x **Omega.** Raised by CamelliaShop, Savannah, Ga, USA, in 2008.

Cimarosa. *(C.japonica),* Verschaffelt, 1860, *Nouvelle Iconographie,* Book.III, pl.III: Obtained from seed by Mr Santarelli, Florence, Italy. The blossoms, larger than average, are white tinged a delicate pink and banded here and there with a vivid red and composed of oval, imbricated petals arranged in a form of a star of 6 rays. The leaves are large, lanceolate, acuminate. Orthographic errors: 'Cima Rosa', 'Cima Rosea', 'Cinna Rosea', 'Cinia Rosea', 'Cimea Rosea', 'Cinnea Rosea', 'Clima Rosea'.

Cimarosa Extra. *(C.japonica),* Jean Verschaffelt, 1879, Catalogue, No.21, p.68: Charming variety obtained by Mr. Tretiakoff… A white base, washed with more or less salmon pink bordered with white. Originated in Russia.

Cincinnato. *(C.japonica), R. Società Toscana d'Orticultura Bollettino,* 1876. A seedling from 'Borzoniana' raised by Santarelli. Large spiral formed flower, vivid red, centre streaked with white. Originated in Italy.

Cinctia. *(C.japonica),* Charles Vuylteke, 1877-1878, Catalogue, p.9. No description. (Believed extinct).

Cinderella. *(C.sasanqua),* Blackwell Nursery Catalogue, 1950-1951: White shading to pink at edge. Single. Originated in USA.

Cinderella. *(C.japonica),* Plant patent No.1281 granted May 1954, John R. Lodge, Altadena, California, assigned to Edward B. Arneson, California Camellia Gardens, San Fernando, California, USA. A sport of 'Fred Sander'. White with streaks, veining and blotches of rose madder. Medium size, semi-double with irregular, cupped petals, the edges deeply lacinated, fimbriated and wrinkled. Colour photos *American Camellia Yearbook,* 1956, facing p.242 and

in the Nuccio's Catalogues of 1957 and 1958. Sports: **Raspberry Ice, Robert Strauss.** Chinese synonym: 'Huiguniang'.

Cindy Ann. *(C.japonica),* SCCS., 1962, *Camellia Nomenclature,* p.28: White dashed pink. Large semi-double with petals incurved, partially covering yellow stamens. Vigorous, upright growth. Early flowering. Originated by Ashby, USA.

Cindy B. *(C.japonica), American Camellia Yearbook,* 1969, p.159, Reg. No.1035: A 12 year old seedling that first bloomed 1957, originated bt T.E. Herrin Sr, Pensacola, Florida, USA. Plant growth is upright, open and average in rate with dark green leaves, 7.8 cm long by 5 cm wide. The semidouble flower is 12.8 cm across and 6 cm deep with 17 petals. White with rose stripes and yellow anthers. Long lasting. Blooms mid-season.

Cindy Kendrick. (*C.reticulata* hybrid). SCCS *Camellia Nomenclature* 2009, p.137. Soft pink, very large semi-double. **Valley Knudsen** x **Jean Pursel**. Vigorous, upright growth. Late flowering. Originated in 2008 by CamelliaShop, Savannah, Ga., USA.

Cindi Mint. *(C.japonica), Camellias,* Y.C. Shen, 2009, p.106 with colour photo; Red to crimson with some narrow white stripes, anemone to peony form, 6-7 cm diameter.

Cinearea. Oudin Nursery Catalogue, 1845-1846, p.42. Orthographic error for **Cinerea.**

Cinerea. *(C.japonica),* Oudin Nursery Catalogue, 1845-1846, p.42 as 'Cinearea'. No description. van Houtte Catalogue, 1851, 44:6: Red, variegated with lilac. Imbricated. Orthographic error: 'Cinearea'.

Cinerea (Negri). *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.19, as 'Cinerea': Imbricated, pale rose-red, colour deeper at the circumference. Originated by Negri, Italy. Synonym 'Cinerea'.

Cinzia. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue, p.23. Charles van Geert Catalogue, 1845 P.3. No description. van Houtte Catalogue, 1845-1846, 23:3: Full anemone form, salmon pink, finely whipped with white. Originated by Conte Caraccioli, Italy. Synonym: 'Cinzia Anemoniflora'

Cinzia Anemoniflora. *Floricultural Cabinet,* 1846, as 'Cinzia Anemonaeflora'. Synonym for **Cinzia.**

Cirberi Alba. *(C.japonica),* Catologue Generale la Société Royale d'Horticulture de Belge, 1842, p.21. No description. Originated in Belgium. Synonym 'Cirberi Flora Alba'. Orthographic error 'Ciberii Alba'. (Believed extinct.)

Cirberi Flora Alba. Seidel, 1846, Pflanzen Catalog, p.6, as 'Cerberii Flora Alba'. Synonym for **Cirberi Alba.**

Circe. *(C.japonica),* Rev. Herbert, 1837, *Amaryllidaceae and Supplement,* p.367: 'Pumila' or **Circe,** regularly formed, double white, dwarf myrtle-leaved. From seedlings impregnated by the **Pompone** raised from the common single red by the 'striped', (**Variegata**) by the Rev. Herbert. Van Houtte listed it in his 1851 Catalogue, 44:6, as "Imbricated. Cream white, small central group of petals." In his 1859 Catalogue 77:53, he equates it with 'Myrtifolia Alba', which he had first listed in 1841. Verschaffelt, 1850, *Nouvelle Iconographie,* Book XII, pl.II supplies the information that 'Myrtifolia Alba', synonym 'Myrtifolia Albicans' was raised by Rev. Herbert. Synonyms include: 'Albicans', 'Myrtifolia Alba', 'Myrtifolia Albicans', 'Myrthifolia Alba', 'Pumila', 'Princess Royale de Frankfort', 'Princesse Royale de Gruneberg', 'Schachkoenigin', 'Schachkenigin', 'Schachkoeniginn de Frankfort', 'Schachkönigin' (Herbert), 'Circe Pumila'.

Circe (Franchetti). *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.19, invalidly as 'Circe': Imbricated; bright rose. Originated in Italy.

Circe (Macarthur). *(C.japonica), Australian Botanical and Horticultural Society Report,* 1849 invalidly as 'Circe': A scarlet, formal Camellia raised by Macarthur, Camden Park, N.S.W. Australia. (Believed extinct.)

Circe Pumila. van Houtte Catalogue,1846-1847, 27:22. Synonym for **Circe.**

Circuit Rider. *(C.japonica), American Camellia Yearbook,* 1973, p.168, Reg. No.1272: A 7 year old *C.japonica* seedling (**Dr Tinsley** x **Tomorrow**), that first bloomed 1968; originated by E.P. Atkin, Shreveport. Louisiana, USA. Plant growth is upright, medium in rate with light green leaves, 10 cm x 5 cm. The peony form bloom is pale pink outside to white in the centre. It measures 11 cm across by 4.5 cm deep with 32 petals and several petaloids, yellow anthers and white filaments. Blooms mid-season to late.

Circus Girl. *(C.japonica),* Gerbings Azalea Gardens Catalogue, 1958: Multicolor and every colour combination from red to pink and variegations of white, pink and red. Large semi-double. Originated by H. Shackelford, USA.

Cisello Lombardo. *(C.japonica),* Stefano Pagliai Catalogue, 1867, p.65. No description. Originated in Italy. (Believed extinct.)

Cissy Purvis. *(C.japonica), American Camellia Yearbook,* 1980, p.161, Reg. No.1598: A large, orchid pink, anemone form, *C.japonica* chance seedling; originated by George Stewart, Sacramento, California, USA. The 10 year old seedling first bloomed 1975. Average flower size is 11 cm

across by 4 cm deep. Blooms mid-season. Plant growth is upright, average in density and medium in rate with light green leaves, 10 cm long by 6 cm wide.

Citation. *(C.x williamsii),* Puddle, 1958, NCCS., *The Camellia Bulletin,* vol.12, No.1, p.23: This variety, long grown under the dubious name of 'Semi-double'...the flower size is as large as any and it has immense vigour. The pink buds open pale silvery blush, forming a large, semi-double flower of irregular shape. It has a tendency towards doubling of the flowers and on an established bush there may be single, semi-double and irregular flowers. The leaves are pale green. Originated in England. It came to Bodnant in 1933 under the name Williamsii semi-double. Received a RHS "Award of Merit" in 1960. Chinese synonym 'Jiajiang'.

Clair Gothard. *(C.japonica), American Camellia Yearbook*, 1992, p.32, Reg. No.2241: Originated by C. Comstock, Beaumont, Texas, USA. A cherry red, medium sized, formal double. The 21 year old seedling first flowered 1970. Average flower size is 9 cm across x 4 cm deep with 60+ petals, completely imbricated. Plant growth is upright, dense and vigorous with dark green leaves 9 cm long x 5.5 cm wide. Colour photo between pp.40-41.

Clair Jenny. *(C.japonica),* Sanlando Nursery Catalogue, 1958. No description. Originated in USA.

Claire Bull. *(C.hybrid), New Zealand Camellia Bulletin,* Mar.1991, vol.XVII, No.1, p.47, Reg. No.283: An 8 year old seedling of chance parentage, originated by David Bull, Auckland, New Zealand. A dense, upright grower of medium rate, with dark green leaves 8 cm long x 4-5 cm wide. Flowers light pink with a white fleck, formal double, showing a few cream filaments with gold anthers. Size 11 cm across x 5 cm deep with about 73 petals. Blooms mid-season to late. RHS. Colour Chart 58D.

Claire Hannah. *(C.x williamsii),* ICS *Journal,* 1996, p.28 with colour photo**,** Reg. No.28. A cross of **St. Ewe** x **Blood of China.** An irregular semi-double of 26 petals, 8-10 cm across x 5-6 cm deep, tending to open peony form, coral red with folded petals and golden anthers and filaments. Originated by Bernard B. Jones, Sidmouth, Devon, UK, and first flowered 1995. Plant has the vigorous upright growth of **St. Ewe** with denser foliage, while the flowers are akin to **Blood of China** and **Guilio Nuccio.**

Claire Louise. *(C.japonica), New Zealand Camellia Bulletin,* July 2006, No.154, p.14, Reg. No. 474. Originated by Peter Matthews, Titirangi, New Zealand. A chance seedling that first flowered in 1981. Plant is upright, open in structure and of medium growth rate. Mid-green leaves are 9 cm long x 4.5 cm across. Flower is of anemone form, 9 cm wide x 4 cm deep, with about 16 petals and an inner mass of petaloids and anthers (almost orange stamens and cream filaments). Young flower has creamy centre petals (RHS.CC. 158C) with touches of pink, while the outer petals are pink (RHS.CC. 55B). Older flowers have a much bigger area of a deeper pink on the petals (RHS.CC. 55D), and the colour darkens in full sunlight. Flowers early to late. Flowers keep well.

Claire Maxwell. *(C.reticulata hybrid),* SCCS., 1984, *Camellia Nomenclature,* p.114: Pink. Large semi-double to rose form double. Medium, spreading growth. *C.reticulata* 'Crimson Robe' x

C.reticulata hybrid **Jean Pursel.** Flowers mid-season to late. Originated by Frank Pursel, Oakland, California, USA.

Claire Renee. *(C.japonica),* Griffin, ed.1958, *Camellian:* Dark pink. Large to very large anemone form. Vigorous growth. Originated by Shackelford, USA. Sport: **Claire Renee Variegated.** Orthographic variant: 'Renee Claire'.

Claudia Phelps. *(C.japonica),* Fruitland Nursery Catalogue, 1949-1950, p.27: SCCS., 1949, *The Camellia. Its Culture and Nomenclature:* sport of the 'Duchess of Sutherland'. Large semi-double, delicate pink but shades to white towards the edge. Sometimes splashed with

white. Synonyms: 'Coral Duchess of Sutherland', 'Coral Duchess', 'Tillie Rice'. Possibly the same as **Ruth Royer.** Black and white photo, p.87, Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.1. Orthographic error: 'Mrs Claudia Phelps'.

Claudia Vanis. *(C.japonica),* ACS, *The Camellia Journal,* Nov. 1999, p.5, Reg. No.2509. A hot pink, rose form double chance seedling. Flowers mid-season. Yellow anthers, bright yellow filaments. Originated by Dr Tom Dodd, Semmes, Ala., USA. *American Camellia Yearbook,* 1999, p.5, colour photo before p.1. The 14 year old seedling first flowered 1989. Average flower size is 12 cm across x 2.5 cm deep, with 64 petals that may be crinkled or lightly streaked with lighter pink. The heavy textured petals also have a sheen. Plant growth is upright, dense and vigorous, with dark green leaves about 9 cm long x 6.5 cm wide.

Clio. *(C.japonica),* Oudin, Lisieau, Nursery Catalogue, 1844, p.10: Medium size, delightful form, soft pink. Harrison, ed., 1846, *Floricultural Cabinet,* vol.14, p.43: "Rose, double". Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France,* vol.40, p.77: Flower 9-10 cm across, irregular double, rose-form, or peony form. Exterior petals in 3-4 rows; those of the centre in a bouquet. Resembles **Althaeiflora.** Verschaffelt, 1858, *Nouvelle Iconographie,* Book I, pl.IV: A pink floral colouring, edged with white. Blossoms, larger than average, are formed of oval or full petals, either rounded or sub-bilobate, imbricated but not regularly. The pink ground is veined a deeper shade and bordered with white, which extends towards the longitudinal centre of the petal. Originated in Italy.

Clio (Macarthur). *(C.japonica), Australian Botanical and Horticultural Society Report,* 1849, invalidly as 'Clio'. *Macarthur's notebook,* ca.1852: Deep rose colour. Small size like **Paeoniiflora** but darker. Middling. Very abundant flowerer. Originated By Macarthur, Camden Park, N.S.W., Australia. (Believed extinct.)

Clisson Glob. Verschaffelt Catalogue, 1847-1848, p.55. Orthographic error for **Clisson Globe.**

Clisson Globe. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847 as 'Clisson Glob': Large, full scarlet red of spherical form. Synonyms: 'Sloane', 'Globe Crimson'. Originated in Italy. Orthographic error: 'Clisson Glob'. Reduced to synonym for **Globe Crimson.**

Cliveana. *(C.japonica),* Sweet, 1830, *Hortus Britannicus* ed.2, p.74, with 'Lady H. Clive's' as a synonym: "red". Loddige's Catalogue, 1830, p.21. No description. Berlèse, 1837, *Monographie,* ed.1, p.68, 75, 127 as "Cliviana": Leaves 5.4 cm wide by 8 cm long, ovate-oblong, acuminate, serrulate, erect and dull green; buds very large, oval, obtuse, scales green; flower very large, 11 cm across, double, cupped, sometimes rose-red, often cherry-red, more or less brilliant according to the season. The petals of the first row, 6 in number, are 3.8 cm broad and 5 cm long, concave or channelled, forming a star and crennate at the apex; those at the centre tufted as in the **Anemoniflora** and forming an elevated and irregular heart, about 3.8 cm across, some of these last are striped with white. Originated in England. Synonyms: 'Lady H. Clive's', 'Lord Clives', 'Cliveana de Knight'. . Orthographic errors: 'Cliviana', 'Cleveana', 'Cleviana', 'Cliveiana'.

Cliveans de Knight. Jacob Makoy et Cie Catalogue, 1836, p.15. Synonym for **Cliveana.**

Cliveana (Gerbing). *(C.japonica),* Thomasville Catalogue, 1935, p.7, with colour photo on p.6; Gerbings Azalea Gardens Catalogue, 1939: Semi-double, light pink flowers of large size; round, dull green foliage; mid-season bloomer. Very fast, upright growth. This appears to have originated in USA and the name has sometimes also been spelt 'Cliviana'. See black and white photo, Hertrich, 1955, *Camellia in the Huntington Gardens,* vol.II, p.72, 75 with the description: Flower: semi-double, to incomplete double predominantly; Spinel Red 0023/self-/1 (rose red), darker venation; 9 cm broad by 4 cm deep. Petals up to 12 sub-cordate segments, 4.5 cm long x 4.2 cm wide, firm substance, tendency to incurve or, towards the centre, to inroll, shallow, if any, notching. Centre of flower, a few incomplete petals and small petaloids intermingled with stamens, white filaments, yellow anthers, Buds, near globular. Leaves, elliptic-lanceolate to elliptic-ovate, tending to cup towards underside, 7-8 cm long x 4-4.5 cm wide, dark, glossy

green, thin, leathery texture, broad, coarse serrations; apices long pointed. No relationship with the European cultivar of the same name.

Cliveana Vera. *(C.japonica),* Rousseau, Angers, Nursery Catalogue, 1842-1843, p.1. Very large pink flowers. Originated in France. (Believed extinct.)

Clower Red. *(C.japonica),* Fendig, 1951, *American Camellia Catalogue:* Large, rose-red with orange tinge, flat, irregular double, 11 cm across. The 2 or 3 rows of guard petals are practically obscured by the central mass of petaloids. A few stamens are intermixed in the centre. Leaves, dark green, 8.5 cm long by 5 cm wide, texture thin, tip blunt, veins numerous and raised, Serrations shallow and fine. Originated by T.S. Clower, Gulfport, Mississippi, USA from seed of **Jarvis Red** x **Reverend John Bennett.** Orthographic error: 'Clower's Red'. *American Camellia Yearbook,* 1954, p.305, Reg. No.133. Sport: **Clower's Red Variegated.**

Clower White. *(C.japonica),* Doty et al., 1949, *American Camellia Yearbook,* p.243: From seed produced by T.S. Clower, Gulfport, Mississippi, USA by pollinating **Gloire de Nantes** with **Nobilissima** in 1937. First flowered 1943. The plant has vigorous, heavy foliage and growth. The flowers are pure white, loose, incomplete double, with high, upright, inner petals interspersed with stamens. The anthers turn black with age. Orthographic error: 'Clower's White'. Registered No.32 by American Camellia Society in their Quarterly, vol.5, No.1, 1950.

Clower's Red. Tammia Nursery Catalogue, 1958. Orthographic error for **Clower Red.**

Clower's Red Variegated. *(C.japonica),* Tammia Nursery Catalogue, 1958 as 'Clower's Red Var.'. A virus variegated form of **Clower Red** - Red blotched white. Originated in USA.

Clower's Number 2. Hillcrest Nursery Catalogue, 1958 as 'Clower's #2'. Orthographic error for **Clower Number 2.**

Clower's White. SCCS., 1950, *The Camellia. Its Culture and Nomenclature,* p.29. Orthographic error for **Clower White.**

Clowesiana. *(C.japonica),* Jacob Makoy Catalogue, 1836, p.15. No description. Berlèse, 1843, *Iconographie,* vol.2, pl.189: Flower about 10 cm across. The corolla is full, irregular, very packed, cupped, flared, convex, white becoming rosy, flesh pink in the centre. The first 2 or 3 rows of petals are broad and long, displayed horizontally, a little reflexed, sometimes notched, sometimes with lines and bands of pink; those following are unequal, deformed, large as those preceding, but confused; the others of lesser dimensions, grouped irregularly in fascicles and forming a kind of cup; finally those in the other rows are large, concave or channelled, close set, numerous, imbricated vertically and forming a centre of a kind of vase, hollowed out, and at the heart a glimpse of 2 or 3 petaloids, erect and greenish. Synonyms: 'Marochetti', 'Fanny Essler', 'Fanny Essler de Gand', 'Fanny Eslers', 'Fany Esler Vera'. Orthographic errors: 'Clovesiana', 'Clovvesiana', 'Clawesiana', 'Clawsiana'. Originated in Belgium or England.

Clown. *(C.japonica), American Camellia Yearbook,* 1960, p.195, Reg. No.508: A 6 year old chance *C.japonica* seedling, first bloomed 1957; originated by Julington Nurseries, Jacksonville, Florida, USA. The dark green leaves average 12.5 cm long. The peony form flowers are 7.5-10 cm across and 4-5 cm deep. The petals vary from rose-red, clear red to dark red and white. The colours are in fine stripes. The centre is composed of many small petals and petaloids with short stamens intermingled with large petals to ones curved like rabbit ears, which surround the centre. Stamens light yellow, Mid-season flowering. Sports include **Clown Red** and **Clown Variegated.** Chinese synonym 'Huaji'.

Clown. (Cattolica). *(C.japonica),* Cattolica, G., *Le mie Camelie, My Camellias,* 2005, p.77, as 'Clown' with colour photo; Medium size, semi-double, white with streaks and blotches of pink-red variegation (RHS.CC.67C). A seedling of **Madoni** x 'Rubra Simplex' **(Rubra),** first flowered 1974. Originated by Dott. Guido Cattolica, Livorno, Italy.

Clown Red. *(C.japonica),* Tammia Nursery, 1968, ACS., *The Camellia Journal,* vol.24, No.1: A self red form of **Clown**. Originated by Tammia Nurseries, Slidell, Louisiana, USA.

Clown Variegated. *(C.japonica),* Tammia Nursery, 1968, ACS., *The Camellia Journal,* vol.24, No.1 as 'Clown Var.': A virus variegated form of **Clown Red** - Red blotched white. Originated by Tammia Nursery, Slidell, Louisiana, USA.

Cluscii. Isola Madre Catalogue, 1845. Orthographic error for 'Clusii', synonym for 'King of the Camellias'.

Clusia. Seidel, 1846, Pflanzen Catalog, p.6. Synonym for **Kingii.**

Clusiana. Paxton, 1840, *Magazine of Botany,* vol.7, p.92. Synonym for 'King of the Camellias', synonym for **Kingii.**

Cluster Flowering. Chandler & Buckingham, 1825, *Camellia Britannica.* Synonym for **Florida.**

Cluster Red. *(C.japonica),* Greenbriers Nursery Catalogue, (before 1945), according to Hume, 1945, *Camellias in America.* SCCS., 1951, *The Camellia. Its Culture and Nomenclature:* Large semi-double to loose peony form with irregular petals and a high centre. Originated at Greenbrier Nursery, USA.

Clyde Lester. *(C.japonica),* ACS 1995, *The Camellia Journal,* vo.50, No.2, p.15, Reg. No.2320. Small red semi-double *C.japonica* chance seedling. Late flowering. Originated in USA by Walter A. Wilson, Augusta , Georgia. ACS 1995, *American Camellia Yearbook,* p.3 with colour photo: The 30 year old seedling first flowered in 1984. Average flower size is 7.5 cm across x 3.5 cm deep with 21 large petals, and stamens intermixed. Plant growth is upright and medium in rate with dark green leaves 3.7 cm long x 2.5 cm wide.

Clyde Wilson. *(C.japonica),* Flanders, 1969, *American Camellia Yearbook,* p.109: This seedling, **Clyde Wilson,** is a rose-red colour and first bloomed 10 years ago. It won an ACS Blue Ribbon at the Savannah Show. Originated by H.P. Wilson, Georgia, USA.

Clymene. *(C.japonica),* Baumann, Mulhouse, Nursery Catalogue, 1841-1842, p.13. No description. Verschaffelt, 1848, *Nouvelle Iconographie,* Book VI, pl.I: This plant was obtained from seed in Italy...it is of vigorous aspect, covered with oval-elongated, pointed leaves, serrated only towards the apex, of deep, glossy green. The ample, flat blossoms are regularly imbricated, the numerous petals are rounded, slightly emarginate, of a bright pink, tinged with white and veined a deeper shade of pink.

Clymene (Macarthur). *(C.japonica), Australian Botanical and Horticultural Society Report,* 1849 invalidly as 'Clymene'. From Macarthur's Notebook, 1850: Scarlet crimson, Outer petals large and good, inner similar and crowded. (Believed extinct.) Originated by Macarthur, Camden Park, N.S.W., Australia.

Clyne Anemone. *(C.japonica),* Turner, 1963, RHS., *The Rhododendron and Camellia Yearbook,* No.17, p.93. No description. Orthographic error 'Glyne Anemone'. An anemone flowered Camellia from the Clyne Garden.

Coach Tom Osborne. (*C.reticulata* hybrid). ACS, *The Camellia Journal,* Aug. 1997, p.16, Reg. No.2428. A very large, red, semidouble hybrid (*C.reticulata* seedling x unknown *C.japonica* seedling), which flowers early to midseason. Originated by Albert E. Buchholz, Cupertino, Calif., USA. *American Camellia Yearbook,* 1997, p.1, colour photo before p.1. The 15 year old seedling first flowered in 1990. Average flower size is 14.5-15 cm across x 7 cm deep with 14 petals, 198 petaloids, yellow anthers and yellow filaments. This is a good seed setter. Plant growth is upright, open and average with dark green serrated leaves 12-12.7 cm long x 7-7.5 cm wide.

Coburghii. Verschaffelt, 1844, Catalogue No.50, p.19. Orthographic error for **Coburgii.**

Coburgii. *(C.japonica),* Catalogue Generale la Société Royale d'Horticulture de Belgique.1842, p.21. No description. Burdin Maggiore & Co. Catalogue,1845, p.41. No description. Charles van Geert Catalogue, 1848, p.4: Rose form,, pure white. Originated in Belgium. Orthographic error 'Coburghii'.

Cocardi Rose. Reuthe Catalogue, 1935. Orthographic error for **Cocarde Rose.**

Cocarde Rose. *(C.japonica),* Sander Nursery Catalogue (before 1914), Notebook No.28. No description. Originated in Belgium. (Believed extinct.) Orthographic error: 'Cocardi Rose'.

Cocardiana. Graffi Catalogue, 1855. Orthographic error for **Coccardiana.**

Coccarda. Ridolfi, Florence, Catalogue, 1848, p.7. Orthographic error for **Coccardiana.**

Coccardiana. *(C.japonica),* Verschaffelt Catalogue, 1846, p.51. No description. Ridofi Catalogue, 1848, p.7 as 'Coccarda': Double flower with large, irregular cluster, white, often with some petals pinkish or steaked with pink. Originated in Italy. Orthographic errors: 'Cocardiana', 'Coccarda'.

Coccinea. *(C.japonica),* Curtis, 1819, *Monograph on the Genus Camellia,* as 'Flore Pleno Coccinea'. "Large scarlet. I have only Mr Palmer's authority for this variety." It was commercially listed in Loddige's Catalogue, 1823, p.21 and in his *Botanical Cabinet* of 1827 with an excellent colour plate. It was raised by Mr Allnutt of Clapham, England. The flower is of medium size, of bright scarlet colour and round petals. Informal double. For illustration see Chandler & Booth, 1831, *Illustrations and Descriptions of Camelliae,* pl.35 as 'Splendens' and p.8, pl.11 in Baumann, 1829, *Collection Camélias élevés à Bollweiller.* Courtois, 1833, *Magazin d'Horticulture* p.314 as 'Splendens': Crimson red double flower, rounded petals, some stamens, forming a central cup. Synonyms: 'Splendens', 'Mr Allnutt's Splendid', 'Alnut's Brilliant', 'Large Scarlet', 'Almet's Splendor'. Orthographic errors: 'Coccinee', 'Coccinia', 'Cocinea'.

Coccinea Flore Pleno Folius Variegata. *(C.japonica),* Henderson, E.G., Catalogue, 1868, p.70, as 'Coccinea Fl. Pl. Fol. Var.'. No description. Henderson & Son, 1871, Catalogue No.146, p.49: A beautiful double, scarlet flower with yellow variegated leaves.

Coccinea Grande. *(C.japonica),* Sacco. 1830-18333 according to Schavione, 1981, *Il Giardino nell Camelie,* pl.25 as 'Cocinia Grande'. No description. (Believed extinct.) Originated by Dr Sacco, Milan, Italy.

Coccinea Magna. Anonymous, 1841, *The Gardeners' Chronicle.* Orthographic error for 'Coccinea Major', synonym for **Leeana Superba.**

Coccinea Major. van Houtte Catalogue, 1839, 1:7. Synonym for **Leeana Superba.** Orthographic errors: 'Coccinea Magna', 'Coccinia Magna'.

Coccinea Pictorum. *(C.japonica),* Berlèse, 1843, *Iconographie,* vol.3, pl.269: The Flower, about 10 cm across, is full, regular, of clear cherry-red carmine. The petals in 9-10 rows are rounded, ample, not numerous, in a cup-shape, almost entire; those of the centre are fewer, regularly placed, but imbricated. The corolla is a perfectly round rosette, sometimes regularly imbricated; the petals at the centre, inserted on the slant, varied. Raised by Dr. Sacco, Milan, Italy from seed. Orthographic error: 'Coccinia Pictorum'.

Coccinee. Vibert, 1845, *RevueHorticole,* p.127-131. Orthographic error for **Coccinea.**

Collettii. *(C.japonica),* Jacob Makoy Catalogue, 1838. No description. Jacob Makoy Catalogue, 1841, p.10: "There are many camellias found in commerce which are false (Virus variegated). This is a wonderful variegated, which I have raised from seed." van Houtte Catalogue, 1841, 7:5: Red with white blotches. Most beautiful; then in his 1844-1845, 18:9 Catalogue: Velvety blood red, covered with wide, pure white blotches. Berlèse, 1843, *Iconographie,* vol.3, pl.275 and Verschaffelt,1850, *Nouvelle Iconographie,* Book II, pl.I both have illustrations and desciptions: Informal double to peony form, 9 cm across, intense red, marbled white, shows some stamens when fully opened. Large, outer guard petals, imbricated, with small petals in the centre. Mid-season flowering. Rounded, deep green leaves, 7.5 cm long by 5 cm wide, round bases, sharp serrations, slow, bushy growth. Supplied by Jacob Makoy Co., Liège, Belgium who, according to Berlèse, 1843, obtained it from Italy; however Makoy says he raised it from seed in Belgium. Synonyms: 'Collettii Maculata', 'Girard Debaillon', 'Purpliana', 'Purplyana', 'Genevieve de Barbier', 'Tea Garden Strain', 'Collettii Vera', 'Collettii de Milan', 'Collettii Maculosa'. Orthographic errors: 'Colletii', 'Colleti', 'Coletti', 'Colletia', 'Colletti', 'Collestii', 'Colettii', 'Coeltti', 'Coleti', 'Coletti Maculata', 'Colleti Vera', 'Coletti Vera', 'Colleti Maculata', 'Collettia Maculata', 'Collietti', 'Colletti'. Orthographic variant: 'Colettii Vera'. Chinese synonym 'Kelaidi'.

Collettii de Milan. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue, p.23. No description. Berlèse, 1843, *Iconographie,* vol.3, pl.275, as 'Collettii': Informal double to peony form, 9 cm across, red marbled white. Originated in Italy. There would appear to have been two **Collettii,** one Makoy's a formal double, the other, Berlèse, a peony form.

Collettii Maculata. Fruitland Nursery Catalogue, 1933-1934. Synonym for **Collettii.**

Collettii Maculosa. Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.43. Synonym for **Collettii.**

Collettii Vera. Loureiro 1872-1873, Catalogue No.9. Synonym for **Collettii.**

Colonel L.E. Edwards. *(C.japonica), American Camellia Yearbook,* 1961, p.220, Reg. No.574: A 5 year old chance seedling of **Galilee** that first bloomed in 1959; originated by L.H. Knock, Frederick, Maryland, USA. Plant growth is upright and rapid in rate with light green leaves, 10 cm long by 4.8 cm wide. The peony form flower, 11 cm across and 6 cm deep, is carmine red with yellow stamens, 40 petals and 6 petaloids. Blooms mid-season to late.

Colonel Lady. Griffiths and Strothers, 1954, ACS., *Nomenclatural Cross-reference List,* pp.2, 3, 4. Orthographic error for **Colonial Lady.**

Colonel R.D. Hicks. *(C.hybrid), American Camellia Yearbook,* 1983, p.156, Reg. No.1870, as 'Col. R.D. Hicks': A medium red anemone form *C.hybrid* **Salab** x *C.japonica* **Kramer's Supreme,** originated by Frank Pursel, Oakland, California, USA. The 8 year old seedling first bloomed 1979. Average flower size 10 cm across. Blooms midseason to late. Plant growth is upright, average in density and medium in rate with dark green leaves, 9.8 cm long by 6 cm wide.

Colonel Reb. *(C.japonica), American Camellia Yearbook,* 1967, p.225, Reg. No.906: An 8 year old chance seedling that first bloomed 1960; originated by L.B. Wilson Jr, Gulfport, Mississippi, USA. Plant growth is spreading and open. Flower varies from semi-double, with a mass of stamens and purple tipped petaloids, to anemone form with two rows of guard petals and a mass of petaloids with some stamens, to peony form with 28 large petals and large, twisted petaloids, separating stamens into 5 fasciciles. Blooms measure 13.7 cm across by 6 cm deep with 20-28 petals, petaloids from 10 to a mass. Colour is red with yellow anthers and white filaments. Blooms early to mid-season. Abbreviation: 'Col Reb'.

Colonel Stockdale. *(C.japonica),* Cotton, 1948, *American Camellia Yearbook,* p.50 as 'Col. Stockdale': This is another variable *C.japonica*, which blooms November to February. (Early to mid-season). It is semi-double with 4 fascicles of stamens in most flowers. Some flowers are mistaken for the 'Tea Garden Donckelaeri' while others are almost identical to **Mrs Freeman Weiss.**

Colonel W.A. Strother. *(C.japonica),* Dodd, 1968, *An Adventure in Camellia Seedlings,* p.4, colour photo: A red, anemone form seedling of **Elegans**. The centre is a mixture of stamens, petaloids and small, twisted petals. The outer guard petals are irregular. Originated by Richard Dodd, Marshallville, Georgia, USA.

Colonial Dame. *(C.japonica),* NCCS., 1948, *The Camellia Bulletin; American Camellia Yearbook,* 1955, p.335, Reg. No.233: A 12 year old chance seedling, originated by Tick Tock Nursery, Thomasville, Georgia, USA. Flowered for the first time in 1947. Plant growth is upright and slow. The medium size leaves are lightly serrate, similar to 'Herme', (**Hikarugenji**). The flower is white to blush pink, 10-12 cm across, a very full semi-double, similar to 'Donckelaeri' (**Masayoshi**) with 20-25 petals. Flowers mid-season. Formerly known as 'Tick Tock No.11'. Synonym: 'Gertrude Murray'. Chinese synonym: 'Guifuren'.

Colonial Lady. *(C.japonica),* Valley Garden Supplies Catalogue, 1946: One of the many sports of 'Herme', (**Hikarugenji**). The name was given to this mutation by Vern O. McCaskill, Pasadena, California, USA in 1938. SCCS, 1947, *The Camellia. Its Culture and Nomenclature:* ('Fragrant striped'). Sport of 'Herme'. White with carmine red stripes and flecks. See Hertrich, 1954, *Camellias in Huntington Gardens,* vol.I, p.89, black and white photo and colour plate, Fendig, 1953, *American Camellia Catalogue:* A medium to large white, variegated with red, semi-double to incomplete double, about 10 cm across. The colour is predominantly white, irregularly striped and flecked with red. The margins of the rounded petals are waved. Inner petals are semi-erect and stamens partially intermingle with the inner-most. Filaments are pale yellow and anthers dark yellow. Slightly fragrant. Leaves medium green, elliptic, 8 cm x 3.8 cm, smooth and glossy, acuminate, shallowly serrate. This variety has sported to **Orchid Pink** and **Spring Sonnet.** Synonyms: 'Crystal Lake', 'Fragrant Striped', 'Herme Sport No.3', 'Herme White', 'White Herme', 'White Jordan's Pride', 'White Hikarugenji'. Pseudonym: 'Jenny Lind'. See colour plate facing p.50, *American Camellia Yearbook,* 1952. Chinese synonym 'Qiaomin Furen'.

Colonial Pink. *(C.japonica),* Wilmot, 1943, *Camellia Variety Nomenclature Report,* p.9. SCCS, 1950, *The Camellia. Its Culture and Nomenclature,* p.29: Deep pink. Medium large, semi-peony form. Vigorous growth. Mid-season blooming. Originated by the Blackwell Nursery, Semmes, Alabama, USA.

Colonnello Quintini. *(C.japonica),* Stefano Pagliai Catalogue, 1867. p.66. No description. Mercatelli Catalogue, 1881, p.14 as 'Colonnello Quintini': Bright, satiny rose,veined more vividly, paler in the intermediate petals. Imbricated. Originated by Antonelli, Genoa, Italy. Orthographic error: 'Colonnello Quintili'.

Color de Laca. Cachet Catalogue, 1840-1841, p.2. Synonym for **Sacco.**

Color di Lacca. van Houtte, 1839, Catalogue, 1:2. Synonym for 'Sacco Nova'. Berlèse, 1840, *Monographie* gives it as a synonym for **Sacco.**

Colorata. *(C.japonica),* Hovey ed., 1837, *The Magazine of Horticulture:* Double flower, rosiform with long, outer petals in multiple rows with fertile stamens in the centre, mixed with petaloids. Colour, clear rose. Originated in England.

Colorata Faciata. *(C.japonica),* Cachet Catalogue, 1840-1841, p.2. No description. Synonym: 'Colorata Striata'. Originated in Italy. (Believed extinct.)

Colorata Nova. *(C.japonica),* Hovey, ed., 1838, *The Magazine of Horticulture;* Berlèse, 1845, *Monographie,* ed.3, p.157: Leaves, 4-5 cm wide by 7-8 cm long, long-oval, acuminate apex, recurved, surface rough, veins prominent, very deep green. Flower, 8-9 cm across, double, rose form, of a pale shade of cherry-red; exterior petals, long, notched, in many rows, the first two rows, reflexed, imbricated, of very bright red, those following are very long, horizontal, while in the centre are 3 or 4 small, long petals, narrow and recumbent. Originated in USA.

Colorata Pura. *(C.japonica),* Maupoil & Figlio Catalogue, 1847. No description. Originated in Italy. (Believed extinct.)

Commendatore Quinzio. *(C.japonica),* Henderson & Son, 1870, Catalogue No.141, p.18 erroneously as 'Commandatore Quingino'. Roda Nursery Catalogue, 1885. Large, very well made imbricated flower, ivory white completely edged pale pink.. Del Lungo & Girardi, 1928, *Le Camelie,* p.146: Of Italian origin, raised by Santarelli. Imbricated camellia, flowers ivory white margined pale pink. Orthographic error 'Commendatore Quinsio'.

Commendatore. Backhouse Nursery Catalogue, 1870. Abbreviation for **Commendatore Betti.**

Commendatore Beatii. Nicholls Nursery Catalogue, 1887. Orthographic error for **Commendatore Betti.**

Commendatore Betti. *(C.japonica),* van Houtte Catalogue, 1858, 72:8: Very large, imbricated. Vivid rose. The modern variety has become variegated by virus and its description is: " Medium to large formal double, rose pink, generally with some blotching." Originated by Bouturlin, Florence, Italy. Orthographic errors: 'Commendatore Beatii', 'Commendatore', 'Commdator Betti', 'Commandatore Betti', 'Commandatori Batti', 'Commander Betti', 'Cornmendatore', 'Commendatore Relly', 'Commendatore Betty', 'Il Commendatore Betti', 'Commudatible. Received a RHS, F.C.C. in 1885.

Commendatore Lomemelina. *(C.japonica),* John Fraser & E. Langton Nursery Catalogue, 1874-1875. Beautiful rosy red of perfect form. originated in Italy.

Commendatore Quinsio. *(C.japonica),* Hazlewood & Jessep, 1972, *Checklist - Camellia Cultivars from Nursery Catalogues,* p.44: Ivory White, margined pale pink, formal double. Originated in Italy. Orthographic error for **Commendator Quinzio.**

Commensa. *(C.japonica),* Berlèse, 1843, *Iconographie* in a description facing pl.275. Jacob Makoy, 1844, Catalogue: By its foliage **Commensa** resembles 'Donckelaeri' from which it has arisen, but differs by its flowers, which are of good size, deep rose in colour, sometimes blotched white and in which the petals, numbering 50-60, are arranged in symmetry not encountered in any other camellia. Anonymous, 1844, *Revue Horticole*, p.19:21. Originated by Mr Donckelaer as a chance seedling of 'Donckelaeri' and introduced by J. Makoy of Liège, Belgiun in 1844. A formal double with numerous, obovate to orbicular petals, 5cm x 4-4.5 cm, tiered, decreasing in size to the centre. The flower is about 9 cm across, colour Claret Rose (HCC,021), inner petals Camellia Rose, (HCC.622), sometimes flecked white or with a white band down the centre of the petals. Leaves, elliptical or narrowly-elliptic, 7-9 cm long x 3-4.5 cm wide, acuminate, sharply serrate. Mid-season blooming. See Puddle & Hanger, 1962, RHS., *The Rhododendron and Camellia Yearbook,* No.16, p.118, 119. Described and illustrated by Verschaffelt, 1848, *Nouvelle Iconographie*, Book VI, pl.II as **Commensa** and in Book VII, pl.I as 'Reine des Fleurs'. Synonyms: 'Reine des Fleurs', 'Reine des Fleurs Variegated', 'La Reine des Fleurs', 'La Commensa', 'Lady Derby', 'Commensa Donkelaar'. Orthographic errors: 'Comensa', 'Comenso', 'Comminza'. 'Commensus', 'Commensas', 'Comenza'.

Commensas. Joseph Baumann, 1849, Prix Courant, p.4. Orthographic error for **Commensa.**

Commensus. Rollisson & Son, 1845, Catalogue, No.1, p.7. Verschaffelt Catalogue, 1847-1848, p.55; Jacob Makoy et Cie Catalogue, 1849, p.19. Orthographic variant for **Commensa.**

Commerzienrath Linau. *(C.japonica),* Verschaffelt, 1854, *Nouvelle Iconographie*, Book XII, pl.I: Originated from seed by Mr Geitner, Zwickau, Saxony, Germany. The blossoms of nearly medium size are full bodied, regularly imbricated, of a vivid pink colour. The foliage is small.

Commingii. Colla 1843, *Camelliografia*, p.40. Orthographic error for **Cumminghii.**

Commodore. *(C.japonica),* Verschaffelt, 1852, *Nouvelle Iconographie,* Book VII, pl.III: In the class of white camellias it is unsurpassed for regularity of form and purity of colouring. Its imbrication of the petals seem to be drawn by compass. Originated in Italy. Orthographic error 'Comodore'.

Commonza. da Silva, 1880, *Forcing Varieties of Camellias in Oporto,* p.5. Orthographic error for **Commensa.**

Commre. Betti. Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.5. Abbreviation for **Commendatore Betti.**

Communis. *(C.japonica),* Anonymous, 1831, *Annales de la Société d'Horticulture de Paris,* 8:93-99. "Notice about Camellias and about Tea". No description. (Believed extinct.)

Communist. Fruitland Nursery Catalogue, 1942-1943. Name changed to **Wall Street Red** by Magnolia Gardens where it originated.

Como. *(C.japonica),* Chandler's Nursery Catalogue, 1936, p.5: Rose-red, medium size single. Upright, bushy growth. Mid-season flowering. Originated at the Como Nursery, Bayswater, Victoria, Australia.

Comodore. Auguste van Geert, 1858, Catalogue, No.45, p.30. Orthographic error for **Commodore.**

Compact Flowered. Loudon, 1841, An Encyclopedia of Plants, p.1239. Synonym for **Compacta.**

Compacta. *(C.japonica),* Loddige's Catalogue, 1830, p.21 and his *Botanical Cabinet*, vol.XIX, 1832, Folio 1836: "This is a neat, small flowering variety, distinct from every other white, having the character of *C.sasanqua* in the flower, but the leaves are japonica. We believe that it was raised by Mssrs Young of Epsom, England".

Compacta Alba. *(C.japonica),* Tourres, Macheteau, Catalogue, 1839, p.21. Rousseau, Angers, Catalogue, 1842-1843, p.1: "Pure white". *The Gardeners' Chronicle and Agricultural Gazette,* No.38, Sept.22, 1856: Form very fine, petals smooth and finely cupped. Medium size, colour white with creamy centre. Awarded a 1st Class Certificate at the National Floricultural Society show, Mar.27. Verschaffelt, 1859, *Nouvelle Iconographie,* Book IX, pl.II: Blossoms of the largest size, flawless imbrication, pure white with a light yellowish tinge. The blossoms are not less than 10.5 cm across, composed of large and numerous, imbricated, rounded petals, divided at the apex into two lobes. Originated by Mr.Gaines, London, England, who obtained it from seed. Synonyms: 'Boutonniere Alba', 'Caldwell White', 'Compacta Alba Plena'

Compacta Alba Plena. Seidel, 1846, Pflanzen Catalog, p.6. Synonym for **Compacta Alba.**

Compacta Grandiflora. *(C.japonica),* Isola Madre Catalogue, 1845. No description. Originated in Italy. (Believed extinct.)

Compacta Nova. *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1835, p.38. No description. Colla, 1843, *Camelliografia*, p.98: A corolla of 9 petals disposed alternatively in 3 rows, round-oval, totally white. Received from Burdin under the name **Compacta Nova.** It does not accord with the 'Compacta' of Berlèse, (Momog.n.14) which is not so full and is smaller in size. Originated by Burdin, Italy.

Compacta (Nuccio). *(C.sasanqua),* Paige, 1967, *American Camellia Yearbook*, p.145, invalidly as 'Compacta'. A new dwarf from Nuccio's Nurseries, Altadena, California. USA, which seldom exceeds 32 cm in height, but spreads out laterally. Synonym: 'Nuccio's Compacta'. Now listed by Nuccios as **Sasanqua Compacta.**

Compacta Rubra. *(C.japonica),* Harrison, 1836, *Floricultural Cabinet,* vol.4, p.154, in a list of Continental red flowered varieties. Jacob Makoy et Cie Catalogue, 1836, p.15. No description.

Complecta. *(C.japonica),* Verschaffelt Catalogue, No.50, 1844, p.19. No description. Originated in Belgium. (Believed extinct.)

Complexa. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue No.50, p.23. Charles van Geert Catalogue, 1845, p.4. No description. Ibid, 1850, Catalogue, No.117, p.5: Medium sized flower, imbricated. A beautiful lilac tinted purple. Originated in Italy.

Complexa Vera. *(C.japonica),* Ambroise Verschaffelt, 1851-1852, Catalogue Général, p.16. No description. Originated in Italy. (Believed extinct).

Compo Molendini. Scott, J., & Son Nursery Catalogue, 1868. Orthographic error for **Campo-Molendina.**

Compos Ta. Cachet Nursery Catalogue, 1845-1846, p.6. Orthographic error for **Composita.**

Composita. *(C.japonica),* Sacco, 1832-1834; van Houtte Catalogue, 1842, 9:51: Well imbricated, very delicate, vivid rose. Berlèse, 1845, *Monographie*, ed.3, p.158: Flower double, rosiform, petals in 4 rows with small ones inside, cup-shaped with curved petals. Originated by Dr Sacco, Italy.

Composita Nova. *(C.japonica),* Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France,* vol.40, p.278: Flower formal double, unicoloured, 10 cm across, very pale, cherry-red. Petals in 6-7 rows; those at the circumference, broad, rounded, notched; the others almost entire,

medium size, with some incurving of the margins and regularly imbricated. Originated in France.

Composita Vera. *(C.japonica),* Verschaffelt, 1852, *Nouvelle Iconographie,* Book I, pl.IV: Grown commercially for a few years already, it is said to be of English origin. The name refers to the unusual number of petals which compose the bloom, which is uncommonly large and of a uniform cherry-red. Its petals are wide, rounded and, in general, concave, upright, fully bilobate at the apex and very regularly imbricated. von Biedenfeld says it is from Biseau.

Comte de Chambard. McIlhenny, 1937, *600 Varieties of Camellias.* Orthographic error for the **Comte de Chambord.**

Comte de Chambord. *(C.japonica),* Verschaffelt, 1857, *Nouvelle Iconographie,* Book II, pl.II: A magnificent variety obtained from seed in France.The foliage is ample, the blossoms are of the largest size and, except in the centre where appear a few timid traces of white, it is uniformly a vivid, cherry carmine with velvety tints. They are composed of rounded, outspread petals, imbricated with perfect regularity. Blooms mid-season. Orthographic errors: 'Comte de Chambard', 'Conte de Chambarh'.

Comte de Commer. Fruitland Nursery Catalogue, 1933-1934. Orthographic error for **Comte de Gomer.**

Comte de Donnii. *(C.japonica),* Baptist & Son Nursery Catalogue, 1861, p.9. No description. Originated in Australia. (Believed extinct.) Orthographic error: 'Compte de Donnii'.

Comte de Flanders. André, Edouard. F., ed.1864, *Plantes de terre de bruyères...,* p.210. Orthographic variant for **Comte de Flandre.**

Comte de Flandre. *(C.japonica)* van Houtte Catalogue, 1844-1845, 19:10; Ysabeau, 1844, *Annales de la Société d'Horticulture de Paris,* 35(201):136. No description. Verschaffelt, 1858, *Nouvelle Iconographie,* Book VIII, pl.II: It was produced (by sporting) on the Camellia **Valerio** and immediately grafted to preserve it. Its blossom, at least 10 cm across, is composed of ample petals, almost even, rounded, imbricated with perfection, of a beautiful white, liberally striped with pink, delicate veined and fasciated in the same shade. Le Texnier, 1911 Catalogue lists two camellias of this name, one grown from seed by Donckelaer and the other introduced by Vershaffelt. Oudin, 1844: Same as 'Napoleon' of Defresne. Carmine pink, very large, full double flower. It would appear from this that 'Comte de Flandre' was erroneously used as a synonym for 'Napoleon'. Orthographic variants: 'Comte de Flanders', 'Comte de Flandres', 'Conte de Flandre', 'Conte di Fiandra', 'Conte de Flandra'. Orthographic error 'Compte de Flandre'.

Comte de Flandre (Verschaffelt). *(C.japonica),* Geldorf, Const., 1844, Catalogue of Plants and Price List, p.5: Of Donkelaer. Deeper rose than **Triumphans.** The flower is formed by many rose-form clusters of petals. This makes the flowers, composed of 11 clusters, very distinct. Note: This apparently is the 'Donckelaer' cultivar mentioned by Verschaffelt.

Comte de Flandres. Charles van Geert Catalogue, 1845, p.4. Orthographic variant for **Comte de Flandre.**

Comte de Fosi. *(C.japonica),* Vershaffelt Catalogue, 1844-1845, p.24. No description. Orthographic variant: 'Comte Fossi'. (Believed extinct.)

Comte de Gomer. *(C.japonica),* Verschafelt, 1860, *Nouvelle Iconographie,* Book II, pl.I: The blossom of the largest size, is composed of innumerable, rounded petals, even, close, serried and imbricated with the utmost regularity. Its delicate pink colouring is closely striped and banded with crimson. It was raised from seed by Count Bernadino Lechi, Brescia, Italy and named for the French horticulturalist, Comte de Gomer of Amiens. This variety was also illustrated in pl.196, *The Floral Magazine*, 1865. The camellia at present grown under this name shows a wide range of variation from almost self carmine (HCC.21/1) to heavily flecked with deeper colour and some white blotched. Leaves broadly elliptic, 8 cm long by 4.5-5 cm wide, serrate, shortly acuminate, mid-green. In American the names 'Anna Frost', 'Madonna Pink', and 'Madonna' have been erroneously equated with **Comte de Gomer.** Orthographic errors: 'Compte de Comer', 'Comte de Comer', 'Compte de Gomer', 'Compte d'Gomer', 'Come de Gomer', 'Comte de Gomez'. Orthographic variant: 'Conte de Gomer'.

Comte de Gomer Rose. *(C.japonica),* Nantes - *Collections des Espaces,* 4, 1980. A self rosepink form of **Comte de Gomer.** Originated in France.

Comte de Gomer Rouge. Thoby et al., 1988, *Tsubaki - A Propos de Camellia,* p.45. Orthographic variant for **Comte de Gomer Rubra.**

Comte de Gomer Rubra. *(C.japonica),* Nantes - *Collections des Espaces,* 4, 1980. A self red form of **Comte de Gomer.** Originated in France. Orthographic variant: 'Comte de Gomer Rouge'.

Comte de Gomez. Wilmot, 1943, *Camellia Variety Nomenclature Report,* p.9. Orthographic error for **Comte de Gomer.**

Comte de Hainaut. van Houtte Catalogue, 1862-1863, 93:64. No description.

Comte de Hainoute. Nicholls. R.U., Nursery Catalogue, 1880-1881. Orthographic error for **Comtesse du Hainaut**.

Comte de Kervegnen. Linden Catalogue, 1875, 99:8. No description. Originated in Belgium. (Believed extinct.)

Comte de Nesselrode. *(C.japonica),* Auguste van Geert, 1861, Catalogue, No.50, p.35. No description. Ibid, 1863-1864, Catalogue, No.53, p.35: Very large, magnificent pink. Henderson Nursery Catalogue, 1867, p.33. No description. Linden Catalogue, 1871-1872. A large pink flower, tipped and edged white. Of European origin. [from] Ludicke, Belgium. The variety was imported by McIlhenny from Seidel to the USA about 1937. However, in America, the name has been erroneously applied to a variety originating in Magnolia Gardens. Orthographic variant: 'Comte Nesselrode'. Orthographic error: 'Comte F. Nesselrode'.

Comte de Nesselrode (MG). *(C.japonica),* SCCS, 1947, *The Camellia. Its Culture and Nomenclature* invalidly as 'Comte de Nesselrode': Deep pink striped and spotted red. Large, loose peony form. Medium, upright, open growth. (Possibly not the same as the variety listed in old literature which was rose pink tipped and edged white). See Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III, p.41, black and white photo. Magnolia Gardens Catalogue, 1948-1949 says "We believe this to be a colour sport of **Margaret Walker**. It sports to **Comte de Nesselrode Pink.** Abbreviation: 'Nesselrode'. Orthographic error 'Nestlerode'.

Comte de Nesselrode Pink. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue.* A solid pink form of **Comte de Nesselrode (MG).** Originated in USA.

Comte de Neupperg. *(C.japonica),* Prince & Co., Nursery Catalogue, 1846-1847, p.9. No description. Orthographic error: 'Conte de Neipperg'. (Believed extinct.)

Comte de Paris. *(C.japonica),* van Houtte, Sept.1846, *Flore des Serres et des jardins de l'Europe,* vol.2, pl.8: This variety was produced as a sport of the **Duchesse d'Orleans** a pure white variety striped pink, the original sport being fixed by grafting by Mr Van Gheersdaele of Ghent, Belgium. It is a large, vigorous grower, with fully imbricated flowers of perfect regularity and a rich, pink colour, striped and veined a very bright pink or red. Berlèse described the variety in the 1847 *Annales de le Société Centrale...* and mentions that the same sport was fixed by Mariani, Milan in 1842, while Verschaffelt, 1852, illustrates and describes it in his *Nouvelle Iconographie,* Book VI, pl.III together with the **Duc de Chartres** also a sport of the **Duchesse d'Orleans.** Orthographic variant: 'Conte de Paris'. Orthographic errors: 'Conte Parigi', 'Compte de Paris'.

Comte de Rouvroy. *(C.japonica),* Oudin Nursery Catalogue, 1844, p.10: Very large, irregular flower, very vivid deep red, widely variegated with white. Harrison, ed., 1846, *Floricultural Cabinet,* vol.14, p.43: Large red with delicate white spots. Originated in France.

Comtesse de Boigne. *(C.japonica),* Berlèse, 1842, *Annales Société d'Horiculture de Paris,* 30(175):427, 428. Large, irregular double, white, with raised centre, 10-12 cm across. The outer petals are in 5-6 rows, oval and notched, spread horizontally and imbricated. The petals bordering the centre are of similar form, but in order to be on the same plane, they are moulded to the larger petals, which gives the flower an unusual formation. The centre consists of a number of small, incomplete, twisted petaloids and sterile stamens, packed in a cluster. Obtained from seed by M. Drouard-Gouillon, Nantes, France, about 1840. Berlèse, 1845, *Monographie* ed.3, p.99: White semi-double to informal double with the centre filled with a mixture of small petals, petaloids and stamens. Orthographic variant: 'Contessa de Boigne'.

Condessa de Penafiel. *(C.japonica),* José Marques Loureiro Catalogue No. 1, 1865, p.34, & No.9, 1872-1873 p.42: Semi-regular rose form. Colour, white striped with carmine. Orthographic errors 'Condesa de Peñafiel', 'Condessa de Peñ-afiel'. Originated in Portugal.

Condesa Lawinia Maggi. Escuela di Agricultura Catalogue, 1882. Orthographic error for **Lavinia Maggi.**

Condor. *(C.japonica),* Bahauad-Litou Nursery Catalogue, 1914. No description. Orignated in France. Thoby Catalogue, Gaujacq, 2005; No description. May be an orthographic error for **Candor.**

Conestabile. Auguste van Geert, 1854, Catalogue No.36, p.35. Verschaffelt, 1855, *Nouvelle Iconographie,* Book VIII, pl.II. Orthographic error for **Connestabili.**

Conestabilis. Escuela de Agriculture de Pontavedra, 1882, Catalogue. Orthographic error for **Connestabili.**

Conestable. Vanderbilt, 1940, *Camellia Research,* p.3. Orthographic error for **Connestabili.**

Confederate. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue:* Pink variegated. Complete double. Mid-season. SCCS, 1954, *The Camellia. Its Culture and Nomenclature,* p.36: Soft phlox pink. Large, rose form double. Medium, compact growth. Early to mid-season flowering. Originated in USA.

Conferta. *(C.japonica),* Herbert, 1837, *Amaryllidaceae & Suppl.,* p.368 as 'Conferta' or 'Odin'; a fine double red, not regular. No anthers visible. Originated in England.

Confetti. *(C.japonica),* SCCS., 1972, *Camellia Nomenclature,* p.39: White splotched red. Miniature formal double to anemone form. Vigorous, bushy, upright growth. Mid-season blooming. Originated by V. McCaskill, Pasadena, California, USA. Sports include **Confetti Blush** and **Confetti Red.**

Confetti Blush. *(C.japonica),* SCCS., 1972, *Camellia Nomenclature,* p.39: Sport of **Confetti.** Pink with an occasional red stripe and edged white. Originated by Vern McCaskill, Pasadena,

California, USA. For colour illustrations see Macoboy, 1981, *The Colour Dictionary of Camellias,* p.130 and *Encyclopedia of Camellias in Colour,* vol.II, p.31, pl.33.

Confetti Red. *(C.japonica),* SCCS., 1972, *Camellia Nomenclature,* p.39: Red sport of Confetti. Originated by Vern McCaskill, Pasadena, California, USA.

Confissa. Auguste van Geert Nursery Catalogue, 1848, p.16. Orthographic error for 'Confusa'.

Conflagration. *(C.japonica),* Magnolia Gardens and Nursery Catalogue, 1942-1943. No description. Fendig, 1952, *American Camellia Catalogue:* Large, grey red, semi-double to incomplete double (anemone form), 10 cm across by 5 cm deep. Stamens are central but intermix with and partly enclose petaloids. Petals somewhat irregular and waved, of thin texture, some of the outer ones are 5.5 cm wide. Filaments are whitish pink, anthers yellow. Leaves, medium green, elliptic, 9.5 cm x 4 cm wide with long, narrow apex. Serrations very shallow, edges appear to be scalloped. Veins notable and slightly raised. Vigorous, upright growth. Originated at Magnolia Gardens, Johns Island, South Carolina, USA from seed of unknown parents. See black & white illustration, p.91, Hertrich, 1954, *Camellias in the Huntington Gardens,* vol.I. Sport: **Conflagration Variegated.**

Conflagration Variegated. *(C.japonica),* Fendig, 1953, *American Camellia Catalogue* as 'Conflagration Var.': A virus variegated form of **Conflagration** - Fire red blotched white. Originated in USA.

Confucius. *(C.reticulata* hybrid), Peer, 1954, NCCS., *Camellia Bulletin,* vol.8, No.1, p.9, black and white photo p.22: Orchid pink. Large semi-double with high centre and intermingled stamens and petaloids in the centre. Medium, compact, upright growth. Mid-season flowering. Originated at the Kunming Botanical Institute, Yunnan, China as a cross between *C.reticulata* and *C. pitardii* var. *yunnanica.* Chinese synonym: 'Kongfuzi'.

Confusa. Nakai, 1940, *Journal of Japanese Botany,* 16(12):2. Given specific status as *Thea confusa* by Craib, Kew Bulletin 1914, reclassified as *Camellia confusa* by Cohen-Stuart in 1916; reduced to *Camellia oleifera* var. *confusa* by Sealy, 1958 and re-instated as the species *Camellia confusa* by Chang 1981.

Congesta Americana. Seidel, 1870, Pflanzen Catalog, p.6. Orthographic variant for **Congesta d'America.**

Congesta d'America. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. No description. Orthographic variant 'Congesta Americana'. (Believed extinct.)

Conglomerata (Rust). Griffith & Strothers, 1954, ACS., *Nomenclatural Cross-reference List,* p.2. Synonym for **Harlequin.**

Congratulations. (*C.reticulata* hybrid) *New Zealand Camellia Bulletin,* March 1997, Issue No.126, vol.XX, No.1, p.19, Reg. No.374. Originated by G. & A. Reynolds, Cambrian Nurseries, Hamilton. A chance *C.reticulata* seedling, 10 years old which first flowered in 1993. The flower is a pale orchid pink (RHS 68A – B), and is a very large formal double, 12 cm in diameter, with about 45 wavy petals that are thick and textured, becoming tiered as the flower matures. The bush is upright and of medium size and density. Leaves average 9.5 cm long by 4.5 cm wide. Flowering period is midseason to late. Won Best Reticulata Seedling at the 1995 NZ National Show.

Congressman Frank Boykin. *(C.japonica),* Harriss' Longview Nursery Catalogue, 1955-1956, p;12. No description. Originated in USA.

Conier's Variegated. *(C.japonica),* Wilmot, 1943, *Camellia Classification Report,* p.9. No description. Originated in USA. (Believed extinct.)

Conifera. *(C.japonica),* Ferreira & Celina, 2000, *O Mundo da Camélia*, p.78 with colour photo; Red spotted with white. Semidouble with shape like a pine cone. Small to medium size, flowers mid-season to late. Origin not given.

Connata. Sealy,1958, A *Revision of the Genus Camellia,* p.145, 146. The species *Camellia connata* originally described by Craib as *Thea connata* in the Kew Bulletin, 1914.

Connestabile. Jean Vervaene fils, 1864, Price List No. 1, p.5. Leroy, André, Catalogue, 1868. Orthographic error for **Connestabili.**

Connestabili. *(C.japonica),* Luzzatti, 1851, *Collezione di Camelia,* p.12: Pink, darker veined, plumed with white. Imbricated. Verschaffelt, 1855, *Nouvelle Iconographie,* Book VIII, pl.II as 'Connestabile': The pleasing arrangement of its petals, imitating that of a half opened rose. Well rounded, semi-convex petals of a pink colour with a few white stripes at the centre. Originated by Carlo Luzzatti, Florence, Italy. Orthographic errors: 'Conestabile', 'Connestabile', 'Conestable', 'Connestabilis', 'Conestabilis'.

Connestabilis. Leroy, André Catalogue, 1873, p.135. Orthographic error for **Connestabili.**

Conquerant. *(C.japonica),* van Houtte Pere Catalogue, 1896, 205P:109. No description.1898, 225:204: Large flower, almost double, of a beautiful, deep rose. Waterhouse, 1951, *American Camellia Yearbook,* p.89: From Louis van Houtte, 1899. Very bright Camellia red. Semi-double and anemoned. Very bold and good. From Caledonia Nursery ledger entries. On p.91 Waterhouse states: "The variety **Conquerant** mentioned in the Ledger bears a very large, **Elegans** like bloom, but is much deeper in colour and is without the white flakes."

Conqueror. *(C.japonica),* Seidel, 1846, Pflanzen Catalog, p.6. No description. Originated in Germany. (Believed extinct).

Conquete. Forrest, 1985, *Trees and Shrubs Cultivated in Ireland*. Orthographic error for **Coquettii.**

Conqueflora. Leroy, André, 1847, Catalogue, p.48. Orthographic variant for **Conquiflora.**

Conquiflora. *(C.japonica),* Debonnaire, 1832, *Annales de la Société d'Horticulture de Paris,* 11:15-20 in a list of 88 cultivars in Berlèse's collection. No description. Originated in Italy. Orthographic variant: 'Conqueflora'. (Believed extinct.)

Conquistador. *(C.japonica),* Nuccio's Nurseries Catalogue, 1959: Coral rose. Large semi-double with fluted petals intermixed with stamens. Vigorous, upright, compact growth. Mid-season to late blooming. Originated at Nuccio's Nurseries, Altadena, California, USA. Sport: **Conquistador Variegated.** Chinese synonym: 'Zhengfuzhe'.

Conquistador Variegated. *(C.japonica),* SCCS., 1960, *Camellia Nomenclature,* p.41 as 'Conquistador Var.': A virus variegated form of **Conquistador.** - Coral rose and white. Originated by Nuccio's Nurseries, Altadena, California, USA.

Conrad Hilton. *(C.japonica),* Tourje, 1955, *American Camellia Yearbook,* p.32. This eggshell white sport of **High Hat** is a sensation. Introduced by Nuccio's Nurseries, Altadena. Synonyms: 'White Dyke', 'White Daikagura'. Chinese synonym: 'Kanglade Xierdun'.

Conspersum. *(C.japonica),* Linden Catalogue, 1875. No description. Originated in Italy. (Believed extinct.)

Conspicua. *(C.japonica),* Courtois, 1833, *Magazin d'Horticulture,* 1[pt.D]:315. No description. Jacob Makoy et Cie Catalogue, 1833. No description. Harrison, 1835, *The Floricultural Cabinet*, vol.III, p.186 as a British hybrid having dark red flowers. Berlèse, 1837, *Monographie,* ed.1, p.107, 130: Leaves 5.5 cm wide by 10 cm long, lanceolate, oblong, somewhat acuminate, undulating, close, reflexed, deeply serrate; bud oblong with green calycinal scales; flower, 8 cm across, regular, double, orange red approaching carmine; the petals of the circumference

arranged in several rows, broad, imbricated and deeply crenate at the apex, some of those in the centre, long, twisted and reclining. Mertens & Fontaine, *Collection de cent espèces.....camellia,* 1845, pl.45. A seedling of **Corallina.** *Journal of Agriculture,* 1871, vol.1, p.198: Bright scarlet, but only semidouble, never-the-less very fine. This seems to correspond with the form grown in Britain today. See Robert Veitch Catalogue, 1955, p.8: Large, deep rose-red, semi-double. Orthographic errors: 'Cospicua', 'Conspicuous'. Synonym: 'Conspicua Vera'.

Conspicua. Treseders Nurseries (Truro), Lid Camellia List, 1962, p.2. Thought to be erroneously for **Emperor of Russia.**

Conspicua de Beck. Porcher, 1847, *Revue Horticole,* ser.3, vol.1, p.448. Synonym for **Beck's Conspicua.**

Conspicua de Loddiges. *(C.japonica),* Loddiges Catalogue, 1836, p.24 as 'Conspicua'. No description. Jacob Makoy Nursery Catalogue, 1838 as **Conspicua de Loddiges.** No description. Buist, 1839, *Camellias,* p.5 as 'Conspicua' (Loddiges); Buist, 1845, *The American Flower Garden Directory,* 3rd ed., p.217: A shrub of strong handsome growth with large dark green foliage. Flowers, very double 12.5 cm across; bright orange red, hemispherical shaped, petals erect and appear as if 3 or 4 flowers are united. Berlèse, 1843, *Iconographie,* vol.3, pl.218 as 'Russelliana', **Conspicua de Loddiges** or 'Lepida Nova': The flower is 12 cm across, an irregular, incomplete double of scarlet red, margins pale pink, sometimes with white patches. The exterior petals, 6 cm long by 5 cm broad, are thick and rounded, lightly notched, veined blood red, few in number, displayed horizontally cup-like, the others a little upright; those of the interior are few, of average form, upright with soft pink margins. According to van Houtte Catalogue, 1844-1845, 18:14, synonyms are: 'Beck's Conspicua', 'Macrantha Latifolia', 'Latifolia Macrantha', 'Russelliana', and 'Imperatrix' while Berlèse adds 'Lepida Nova', however 'Beck's Conspicua', as described by Berlèse, 1840, *Monographie,* p.110, seems sufficiently different to be regarded as a separate variety and 'Latifolia Macrantha' is a synonym for 'Latifolia Vera'. Orthographic variants; 'Conspicua'(Loddiges), 'Conspicua Loddigessii'.

Conspicua Gombarda. Verschaffelt Catalogue, No.50, 1844, p.19. Orthographic error for **Conspicua Lombarda.**

Conspicua (Loddiges). Buist, 1845, *The American Flower Garden Directory,* 3rd ed. p.217. Orthographic variant for **Conspicua de Loddiges.**

Conspicua Loddigesii. Seidel, 1846, Pflanzen Catalog, p.9. Orthographic error for **Conspicua de Loddiges.**

Conspicua Lombarda. *(C.japonica),* Verschaffelt Catalogue, 1847-1848, p.55 as 'Conspicua Gombarda'. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. Orthographic error 'Conspicua Gombarda'. Originated in Italy. (Believed extinct.)

Conspicua Vera. Berlèse, 1841, *Iconographie,* vol.1, pl.12. Synonym for **Conspicua.**

Constabile. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. Orthographic error for **Costabili.**

Constance. *(C.japonica),* Hazlewood Nursery Catalogue, 1941: Raised at Camellia Grove, Ashfield, NSW, Australia and transplanted to the garden of G.G. Linton, Somersby. A semi-double, deep pink, veined crimson, surrounding prominent stamens of rich yellow. See black and white photo, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III, p.45.

Constance Geraldine Selby. *(C.japonica),* Guilfoyle, 1883, Catalogue of Melbourne Botanic Gardens, p.172. No description. Originated in Australia. (Believed extinct.)

Constance Mellon. *(C.japonica),* Dodd, 1968, *An Adventure in Camellia Seedlings,* p.5, colour photo: An Elegans seedling, deep pink coloured semi-double with a centre of stamens and twisted small petals. Originated by Richard Dodd, Marshallville, Georgia, USA.

Constancia. Charles van Geert Nursery Catalogue, 1845. Synonym for 'Dernii', itself a synonym for **Augusta.**

Constancy. *(C.japonica),* Hertrich, 1954, *Camellias in the Huntington Gardens,* p.92, black and white photo, p.90, description: Irregular double flower, Turkey red 721/2 and /3; to 9 cm across by 4 cm deep. Petals: retuse, about 4.5 cm long x 4 cm broad, approximately 12 segments, conspicuous veining, undulate, firm texture. Centre of flower a mass of incomplete petals and large petaloids hiding short stamens. Mid-season flowering. Leaves: bases rounded, near cordate, tending to curve down at apex and base, dull, dark green, heavily coriaceous, downward pointing tips, broad serrations, light venation. Originated in USA.

Constantia Nova. Verschaffelt Catalogue, 1844-1845, p.24. No description. Orthographic variant for **Constantin Nova.**

Constantiana. *The Gardeners' Chronicle and Agricultural Gazette* No.12, Mar. 241856, p.280. Orthographic variant for **Constantin.**

Constantin. *(C.japonica),* Verschaffelt, 1844-1845, Catalogue, No.50, p.24. No description. Burnier & Grilli Nursery Catalogue, 1846-1847: Vivid pink. Imbricated. Auguste van Geert Nursery Catalogue, No.105, 1848, p.108: No description. Berlèse, 1849, *Annales de la Société Central d'Horticulture de Paris,* vol.40, p.313: Flower 10 cm across, rose form to formal double, loosely imbricated, clear carmine cherry red. Petals in 4-5 rows, outer round-oval, others ovoid, indented, slightly reflexed, not numerous. Auguste van Geert Nursery Catalogue, 1850, Catalogue, No.117, p.5: Very large semi-imbricated flowers, blush lilac. Originated by Caters de Wolf, Anvers (Antwerp), Belgium. Orthographic errors: 'Constantiniana', 'Constantin de Caters', 'Constantin de Cators', 'Constantin de Catters'. Orthographic variant 'Constantiana'.

Constantin de Caters. Berlèse, 1849, *Annales de la Société Centrale d'Horticulture de France,* vol.40, p.313. Synonym for **Constantin.**

Constantin de Cators. van Houtte Catalogue,1845-1846, 23:3. Synonym for **Constantin.**

Constantin Nova. *(C.japonica),* Burnier & Grilli Nursery Catalogue, 1846-1847: Soft pink. Flower large. Magnificent. Originated in Italy.

Constantin Tretiakoff. *(C.japonica),* Lemaire, 1867, *L'Illustration Horticole,* vol.14, pl.509:- A sport of the Camellia 'Elisa Centurione' originated by Verschaffelt. It bears flowers of the largest size, petals numerous, rounded, deeply cleft at apex, imbricated; the background colour white, with a transparent, rosy tint deepening towards the centre. Orthographic errors: 'Constantino Tretiakoff', 'Constantia Tretiakoff' , 'Constantia Tretuakoff' , 'Constantine Tretiakoff', 'Constantino Tretiakoff', 'Madame Constantine Tretiakoff'. Originated in Belgium.

Constantine Tretiakoff. Shepherd & Co. Nursery Catalogue, 1880, p.9. Orthographic error for **Constantin Tretiakoff.**

Constantiniana. Anonymous, 1846, *Annales de Gand,* 2:13, pl.50. Orthographic variant for **Constantin.**

Constantino Tretiakoff. Roda Nursery Catalogue, 1885. Orthographic error for **Constantin Tretiakoff.**

Constellation. Wilmot, 1943, *Camellia Variety Classification Report*, p.10. No description. Magnolia Gardens and Nursery Catalogue, 1944-1945: Another old original which is quite unknown due to the difficulty of its propagation. Early blooming, medium sized, imbricated, deep pink fading to blush in centre. Many flowers tiered forming a 6 pointed star. All petals of its 10 rows are incurved. Believed to be synonymous with **Myrtifolia.**

Conte Aldo Annoni. *(C.japonica),* Burdin Maggiore & Co. Catalogue, 1880-1881, p.73. No description. Rovelli Catalogue, 1893-1894: Imbricated. Pink striped and marbled (with white). Orthographic errors: 'Comte Ononi', 'Comte Onnone', 'Conte Annone'.

Conte Alessandro Komar. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9: Imbricated, in the form of a star, like a concave figure of eight, the acuminate petals arranged in a spiral; a brilliant rose, tinted vermilion. Sometimes the central petals show one, almost white, narrow stripe. Originated in Italy by F. Albertini. Orthographic variant: 'Comte Alessandro Komar', 'Comte Alexandre Komar'. Orthographic errors: 'Comte Alessandre Komar', 'Conte Alexxandro'.

Conte Alexxandro. Fendig, 1953, *American Camellia Catalogue.* Orthographic error for **Conte Alessandro Komar.**

Conte Angelo Antonelli. *(C.japonica),* Stefano Pagliai Catologue, 1867, p.68: Immense flower, perfectly imbricated. Colour of 'Reine des Fleurs'. Originated in Italy at Giardini Antonelli.

Conte Annone. Volonte Catalogue, 1888. Abbreviation for **Conte Aldo Annoni.**

Conte Archinto. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. No description. Originated in Italy. (Believed extinct.)

Conte Barni. Luzzatti, 1851, *Collezione di Camelie,* p.12: Deep red petals lined with white. Imbricated. Orthographic error for **Comte Barini.**

Conte Bernadini Lechi. Jean Verschaffelt, 1860-1861, Price List, p.13. Orthographic error for **Don Bernardo Lechi.**

Conte Bernadino Lechi. Verschaffelt Catalogue, 1867-1868, p.39. Synonym for **Don Bernardo Lechi.**

Conte Bernardino Lechi. William Bull, 1872, Retail Catalogue, No.72, p.135. Synonym for **Don Bernardo Lechi.**

Conte Bobrinski. Franchetti, 1855, *Collezione di Camelie,* p.20. Orthographic variant for **Comte Bobrinsky.**

Conte Boutourlin. Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.5. Orthographic variant for **Conte Bouturlin.**

Conte Bouturlin. *(C.japonica),* Luzzatti Catalogue, 1853. No description. Franchetti, 1855, *Collezione di Camelie,* p.20: Large size, formal double, imbricated, concave, with many petals, bright salmony red, with a purple tint at the edges and in the centre, middle petals gradually becoming smaller. Verschaffelt, 1856, *Nouvelle Iconographie,* Book IV, pl.III as 'Comte Boutourlin': This camellia is a splendid variety, both for its excellent form and its vivid carmine colouring. It is of Italian origin and was sent by Mr Luzzatti, Florence. Black and white photo, Hertrich, 1959, *Camellias in the Huntington Gardens,* vol.III, p.40: Flower is a complete formal double, outer petals and margins Carmine 21/1 fading to centre to Neyron Rose 623/1, veins darker; 10 cm broad by 4 cm deep. Buds globular. Petals about 60, broad ovate, outer reflexed, lax, progressively smaller to centre. Flowers mid-season to late. Leaves, glossy, dark green, elliptic to broad-elliptic, heavily curved, margins slightly rolled under, 8-10 cm long by 4-5 cm wide; broad, shallow serrations; apices short to medium long pointed,

reflexed downwards. Originated by Carlo Luzzatti, Florence, Italy about 1825. Orthographic variants: 'Comte Boutourlin', 'Conte Boutourlin'. Orthographic errors: 'Conte Pietro Boutourline', 'Comte Bontourlin', 'Comte de Boutourlin', 'Compte Botourlin', 'Duc de Boutourlin', 'Comte Bouterlin'. Synonym: 'Conte Pietro Bouturlin'.

Conte Bouturlin Nova. *(C.japonica),* Scarlatti Catalogue, 1888, as 'Conte Boutourlin Nova': Flower imbricated, vivid red, veined, the greater part of the petals of the circumference spotted widely with white. Originated in Italy.

Conte Bouturlin Rose. *(C.japonica), Nantes, Services des Espaces, Collection,* 1980 as 'Comte Bourtourlin Rose': A rose-pink sport of **Conte Bouturlin**. Originated in France.

Conte C.F. Cicogna. Tirocco, 1928, *La Camelia,* p.42. Synonym for **Conte Cicogna.**

Conte Caraccioli. *(C.japonica),* van Houtte Catalogue, 1842, 9:9 as 'Comte Caraccioli. No description. Burnier & Grilli Nursery Catalogue, 1846-1847, as 'Cinzia': Pink, full waratah type with fine white stripe. Synonyms 'Cinzia', 'Bricchiana'. Orthographic errors: 'Comte Caracciole', 'Comte de Caraccioli', 'Comte Carractioe', 'Comte Caractioli', 'Comte Carractioli', 'Comte Carractioli Vera', 'Comte de Carracioli', 'Comte di Carracioli'. Orthographic variant 'Comte Caraccioli'.

Conte Carini. Luzzatti Catalogue, 1853. Orthographic variant for **Comte Carini.**

Conte Cavalli. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. No description. Originated in Italy. (Believed extinct.)

Conte Cavour. Mercatelli Catalogue,1881: Very large, perfectly imbricated flower. Vivid carmine rose, often with violet reflections. Originated by Franchetti, Florence, Italy. Orthographic error for **Conte di Cavour.** Chinese synonym 'Kangte'.

Conte Cesare. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.20: Imbricated vivid red at circumference, paler at the centre. Originated in Florence, Italy by Bouturlin.

Conte Cesarino Borgia. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. No description. (Believed extinct.) Originated in Italy by Giarnetto.

Conte Cicogna. *(C.japonica),* Fratelli Rovelli Catalogue, 1852, p.14: [from] Milan. Red variegated white; beautiful. Luzzatti Catalogue, 1853. No description. Franchetti, 1855, *Collezione di Camelie,* p.20: White flower, spotted with vivid red. Synonyms: 'Conte G.P. Cicogne', 'Conte Gian Pietro Cicogne', 'Conte C.F. Cicogna'. Originated in Milan, Italy by the Conte G.P. Cicogna. Colour photo; Hillebrand & Bertolazzi, *Antiche Camelie del Lago Maggiore,* 2003, p. 135, as 'Conte Gian Pietro Cicogna', showing a distinctive red veining.

Conte Corimb. *(C.japonica),* Bergami Nursery Catalogue, 1858. No description. Originated in Italy. (Believed extinct.)

Conte Crivelli. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847. No description. van Houtte Catalogue,1847, 30:13: Imbricated, amaranth red. de Jonghe, 1852, *Traité de la Culture du Camellia,* p.101: Formal double, pale rose, finely speckled with carmine. Originated by Mariani, Italy. Orthographic variant: 'Comte Crivelli'. Orthographic errors: 'Comte Cruvelli', 'Comte Grivelli', 'Comte Gruvelli', 'Conte Grivelli', 'Comte Crevelle', 'Comte Crevellii'.

Conte de Broobrinsky. da Silva, 1880, *Forcing Varieties of Camellias in Oporto.* Orthographic error for **Comte Bobrinsky.**

Conte de Brookinski. Ingram, 1951, *American Camellia Yearbook,* p.97. Orthographic error for **Comte Bobrinsky.**

Conte de Chambarh. G. Mariotti, Nervi, Nursery Catalogue, 1924, p.14. Orthographic error for **Comte de Chambord.**

Conte de Flandra. Burnier & Grilli Catalogue, 1846-1847. Orthographic error for **Comte de Flandre.**

Conte de Flandre. Del Lungo & Girardi 1928, *Le Camelie,* p.128. Orthographic variant for **Comte de Flandre.**

Conte de Gomer. Mariotti Catalogue, 1924, p.14. Orthographic variant for **Comte de Gomer.**

Conte de Medici Spada. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. No description. Roda Catalogue, 1885, p.54: Imbricated, carmine red, fading towards the centre. Rovelli Catalogue, 1896, p.41: Imbricated, carmine pink, central petals with paler borders. Mariotti Catalogue, 1924: Pink lined white, abundant flowers. Originated in Italy by Desio. Abbreviations: 'Conte Spada', 'Comte di Medica'. Orthographic variant: 'Conte di Medici Spada', 'Comte Medici Spada'. Orthographic error: 'Comte de Medica Spada'.

Conte de Paris. Burdin Maggiore & Co. Catalogue, 1856-1857. Orthographic variant for **Comte de Paris.**

Conte de Spaur. Franchetti, 1855, *Collezione di Camelie*, p.20. Orthographic error for **Conte di Spauri.**

Conte de Toll. Mariotti Catalogue, 1924, p.14. Orthographic variant for **Comte de Toll.**

Conte della Porta *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847. No description. Originated in Italy. (Believed extinct.)

Conte di Cavour. As this camellia was dedicated to the famous Italian statist, Camillo Benso, **Conte di Cavour,** this becomes the orthographically correct name. *(C.japonica),* Mercatelli Catalogue 1881, erroneously as 'Conte Cavour'. Very large, perfectly imbricated flower. Vivid carmine rose with violet reflections. Originated by Franchetti, Florence Italy. Orthographic errors: 'Conte de Cavour', 'Conte Cavour'. Chinese synonym 'Kangte'.

Conte di Fiandra. Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. Orthographic variant for **Comte de Flandre.**

Conte di Medica. Vanderbilt, 1940, *Camellia Research,* p.3. Abbreviation for **Conte de Medici Spada.**

Conte di Medici Spada. Seidel 1897, *Preiverzeichnis,* p.11. Orthographic variant for **Conte de Medici Spada.**

Conte di Parigi. Luzzatti, 1951, *Collezione di Camelie,* p.12. Orthographic error for **Comte de Paris.**

Conte di Romay. *(C.japonica),* Fratelli Rovelli Catalogue, 1852, p.14. [from] Lombardia. No description. van Houtte Catalogue, 1858, 72:9: Imbricated. Very beautiful. Originated in Italy.

Conte di Soranzo. Ambroise Verschaffelt, 1857, Catalogue, No.63, p.26. Verschaffelt, 1859, *Nouvelle Iconographie,* Book VII, pl.III. Orthographic variant for **Conte Soranzo.**

Conte di Sorazo. Vanderbilt, 1940, *Camellia Research,* p.3. Orthographic error for **Conte Soranzo.**

Conte di Spaur. Rovelli Catalogue, 1852, p.14. Orthographic error for **Conte di Spauri.**

Conte di Spauri. *(C.japonica),* Burnier & Grilli Catalogue, 1846-1847. No description. Verschaffelt, 1853, *Nouvelle Iconographie,* Book III, pl.I as 'Comte de Spaur': Received from F. Mariani, Milan, Italy, the blossom is of medium size, the colouring bright pink with vivid carmine tints and often striated with white. The petals are rounded, slightly emarginate, outspread and

imbricated alternatively or in rays; at the centre they are lanceolate, incurved and a more vivid colour. Orthographic errors: 'Comte de Spaur', 'Conte de Spaur', 'Conte di Spaur'. Synonym: 'Comte de Spauri'.

Conte di Strassoldi. *(C.japonica),* van Houtte Catalogue, 1858, 72:9: Violet red, petals veined and lined with white. Imbricated. Originated in Italy. Orthographic error: 'Conte di Strassoldo'.

Conte di Strassoldo. Verschaffelt Catalogue, No.63, 1857, p.26. Orthographic error for **Conte di Strassoldi.**

Conte Durini. *(C.japonica),* Franchetti, 1855, *Collezione di Camelie,* p.20: Imbricated; bright red stained white. Verschaffelt, 1860, *Nouvelle Iconographie,* Book IX, pl.II as 'Comte Durini': A true rose by the form, the delicate pink colouring with broad, white stripes. A medium size bloom, small foliage. It was sent to us 3 years ago by Mr Miellez of Lille who received it recently from Italy where it had been obtained from seed. Orthographic variant: 'Comte Durini'. Orthographic error: 'Comte Durvini'.

Conte Franc. Annoni. Rovelli Catalogue, 1896, p.38. Abbreviation for Conte Francesco Annoni.

Conte Francesco Annoni. *(C.japonica),* Anonymous, 1872, *I Giardini...:* Almost rosy white, vivid carmine stripes, abundant flowers. Rovelli Catalogue, 1896, p.41: Imbricated; white edged and mottled carmine. Most beautiful. Originated in Italy by Pessina. Orthographic variant: 'Comte Francesco Annoni', 'Conte Franc. Annoni'. Orthographic error: 'Comte Francisco Annoni'.

Conte Francesco Mariani. *(C.japonica),* Stefano Pagliai Catalogue, 1867, p.18: Ivory white, lined with pink; imbricated. Gelli & Figlio Catalogue, 1871-1872: Ivory white, lined with brilliant pink. Originated in Italy by Mariani.

Conte G.P. Cicogna. Mercatelli Nursery Catalogue, 1894. Synonym for **Conte Cicogna.**

Conte Gallini. *(C.japonica),* Longone Catalogue, 1910-1911, p.77; Large flower. Bright crimson. Originated in Italy.

Conte Gian Pietro Cicogna. Cazzaniga Catalogue, 1883. Synonym for **Conte Cicogna.**

Conte Giulio Litta. *(C.japonica),* Medici Spada, 1857, *Catalogo nel Giardino a Villa Quiete,* p.9. No description. Originated in Italy. (Believed extinct.)

Conte Grivelli. van Houtte Catalogue, 1858, 72:9. Orthographic error for **Conte Crivelli.**

Conte Horner. *(C.japonica),* Mercatelli Nursery Catalogue, 1894. No description. Originated in Italy. (Believed extinct.)

Conte Lechi. *(C.japonica),* Medici Spada, 1858, *Catalogo nel Giardino a Villa Quiete,* p.5, as 'Conte Lecchi'. No description. (Believed extinct.) Orthographic variant: 'Comte Lechi'. Originated in Italy.
